## TWO HUNDRED TON SILO

**Burnett Bros. and others to Put them Up this Summer. The Beginning of Prosperity.**

In an interview with Com. Redge Burnett, of the firm of Burnett Bros., Stockmen, we found him very optimistic over his trip to Fort Worth with his bunch of baby beeves. While he got no prize, he out weight either the 1st or 3rd prize calves and nearly topped the market, getting the 2nd best price ever given for calves in Fort Worth. The other feeders from Central and North Texas and Oklahoma, had fed seven months against his 90 days which shows the superiority of crushed maize and baled cane and millet with cake, against cottonseed bulls, cake and corn. With the advent of the silo, and it is coming in a gallop, the south Plains county, is going to astonish the world with its finished beef. Let Mexico turn her steers in free if she wants too, we can beat her all hollow. Let them come and we will fatten them with our silage and get the profit.

In this connection we wish to say that Burnett Bros have purchased their ensilage machinery and a big sixteen horse power engine, capable of hoisting silage over a forty foot silo and will cut for the public this summer. They are also dealing with a firm for at least four, two hun-

dred ton silos, of which Mr. M.V. Brownfield will use two.

In conversation with Dick Brownfield, he said he would erect two this summer. Dick is conservative and never gets too enthusiastic about anything, but he says he is thoroughly convinced that the silo is the thing for this country. The only trouble he apprehends is getting the cattle to a railroad as very fat cattle ought not be drove over five miles per day. He says we will need a railroad worse than ever. Well lots of feed and fat stock bring the iron-horses all right.

Lence Price will likely build an under ground silo, and we think probably Bud Jones, Harry Braidfoot, Doggie Patterson, M. B. Sawyer and probably other progressive cattlemen will build silos. We believe that ten for Terry this year will be a conservative estimate. Mr. Burnett says he believes he can put up a two hundred ton silo on the ground out of the very best fir lumber, complete for \$450.

Just for a little discussion between stockmen pro and con, we will ask you to write your opinion for publication, in preceding issues of the Herald, as to whether or not "Baby Beeves

are a Waste?" Let us have your opinion.

### Hero Fund Tickets.

Cashier Bell of the Brownfield State Bank, informed us this week that tickets were now on sale at his bank, which intitles the holder to a trip through the 500 feet Anamo Hero Monument at San Antonio when it is completed.

The price of the ticket is 50 cents each, and will be used in constructing the monument. Ticket are now on sale in practically every bank in the state. The proposed monument will be the tallest in the world; and will be quite large at the base and all the lower floors will be used to store the archives of each county and the state. Reports from over the state say the tickets are going rapidly and the management think they will be able to let the contract for the monument by early fall.

### Easter Services

The Easter Program last Sunday at the methodist church was one of rare impressiveness. The song service was exceptionally well rendered in spite of the fact that the songs were anything but simple. Under the able direction of Bro Jno. S. Powell, however, they were thoroughly mastered and each participant did his or her part well. Bro. Powell is a man whose intrinsic value cannot be estimated, and his great ability as a leader in music and otherwise, coupled with his sweet spirit of a real singer and the godly character of the man, combine to make a man of whom his town and country are proud. The other exercises were well rendered. The perfect union, the genuine enthusiasm of the children, breathing Easter spirit, all had its part in making a profound impression. We would not forget to mention the services of Bro J. L. Randal who so faithfully did his part in the training and preparation of the school, nor fail to mention the help we received from the various denominations of our town. There were a score of helpers from the Baptist and Christian denominations, but the able assistance given by Mrs. Hardin, Misses Daugherty, Knox and Dixon, deserve special notice.

Although it was a great occasion, and to our mind, it was just such a scene as pleased the Risen Lord. After a short address by the pastor, Bro. Powell took up a "Thank offering" unto the Lord amounting to twelve dol-

lars. We want to commend the hearty good will and the cheerful co-operation of the people of the town for the help they rendered to each other in an enterprise like this.

Thus we commemorated the resurrection; a greater day than Xmas, for that only commemorates the beginning of His suffering; this the beginning of His triumphs. That the beginning of His suffering; this the beginning of His glory. That the beginning of His abasement; this the beginning of His greatest honor. The former commemorates the coming of His kingdom; the latter the establishment of His throne forever. All Hail the day of light! And again, we say; All Hail!

Is baby beef a waste? Give us your opinion Mr. Cattleman in a short article. If a waste; why? If not, why not?

With the aid of the silo, grit and pluck, old Terry is going to come to the front, believe me and I should worry, and a few more outlandish lingos and epitaphs

Europe reminds one of a big checkerboard; everytime one power moves his men (army) it makes an opening for another power to move his men or jump a king.

One of our prominent citizens dreamed on night this week that a ten inch snow fell and every body in the county was going to build a silo. We hope the silo dope will stick, and hunt moisture like a duck, but think it rather late, or early to start old Winter again.

Outside of sandstorms in the early Spring, the South Plains has almost ideal weather. You dont have to lay wake nights fanning off and cussing mosquitoes. The summer days are as balmy as in Italy, with always a coal breeze. The fall is ideal and winter is not severe. With all our sand storms, a tornado is unknown, but every time we have a bad sandstorm just look at the black headlines of your next daily, at the list of cyclone victims back east. Which do you prefer?

Bro. Sam Malone, of the Sentinel, has got up from a

big round with old pugilist Grippe, in which the Sentinel man took the count, but now comes fourth very grouchy, which grouch was applied upon the innocent and unsuspecting heads of his delinquent subscribers, who will miss connection with their Sentinels hereafter, unless Malone connects with their dollar. Our whole heart goes out to our fellow craftsman, as we had a very unsuccessful encounter with our mutual enemy in January and missed an issue. But we laid our blame all on Lubbock, as we met him up there, as the Lubbock people had very light drinks for Xmas times.

## Silver Anniversary

## A Terrifying Dream

I had an awful dream last night, Although it wasn't still, I thought I saw a million plunks Come rolling down a hill.

Yes down they all came rolling; Clanking their music silvery, For I dreamed I was Rockefeller, And Rocky—he was me.

I was living in a palace: Had servants by the score, And a big skyscraper office, Twenty stories high or more.

For I had countless millions, And no more I'd sweat and toil, As my steamers plow the ocean, While my wells were gushing oil.

No more for me patched trousers All frazzled at the knee; For I was Rockefeller, And Rocky—he was me.

Then trouble came in bunches When my factory foreman Mike Sent in a wireless cable, The workmen all gone on a strike.

They're demanding higher wages Wire the Governor for help, And you'd better leave your office

Or you'll likely lose your scalp. So I grabbed my hat and started I was heading up Wall street, I could hear the mob howling, And the clatter of their feet.

And then the mob espied me; They all at once gave chase, My hair stood up with anger While the sweat ran down my face.

One great big, burly fellow Gained on me at every bound; I reached a ditch too wide to jump, No time to go around.

With yells of rage and eyes aflame, To bathe in my gore; With death in front and worse behind,

I rolled out on the floor. Atho'twas but a foolish dream I'm glad to know and see That Rockefeller's Rocky still And what is left is me. Sweet William.

## COMMISSION SUGGESTS WORKMAN'S COMPENSATION ACT.

Present Method Wasteful—Elimination of Middlemen Suggested As Solution.

Houston, Texas.—A workman's compensation act along the lines suggested by the Texas Welfare Commission contemplates the practical elimination of the middlemen, who are largely the cause of muleting the employer and defeating the injured employe of his just dues. This it does by accepting the broad principle that all workmen injured in the course of employment shall be compensated by the industry in which they were engaged when injured.

The extent of the waste resulting from our present system is indicated by a statement by the committee of the Wisconsin Legislature. It said that for an employer to pay about \$18 to an injured employe on account of injury, it requires \$32 to carry the \$18 to him.

Mr. R. S. Lovett, executive head of the Harriman lines, in discussing this subject, said in part:

"A man suffers an injury that may justify perhaps a verdict for twenty or thirty thousand dollars. The lawyer makes a contract with him, usually by which the lawyer gets fifty per cent of the recovery and by which the injured person is precluded from settling his own claim. This is money out of pocket for the railroad and it is not money in the pocket of the injured employe.

For that reason the system is vicious and it can be, and ought to be, remedied. My own judgment is that the best remedy would be a statute that would prohibit lawyer's fees in any personal injury case of more than five hundred dollars. I think that would be ample compensation. Having practiced law myself, I know something of the value of legal services and I hope I do not depreciate them; but railroad companies employ lawyers to defend such suits and at the time I lived in Texas—I do not know what the scale is now—the very best lawyers in the state would take and defend such cases for \$250 or \$300 per case."

Mr. E. P. Ripley, president of the Santa Fe, said in part:

"Our loss and damage claims per mile were about three times as much as the average of our entire railroad in fourteen states. I suppose everybody knows about the loss and damage industry in Texas; it is an industry; that is the correct name to give it. It may be felonious, but it is an industry."

## PAY ATTENTION TO DETAILS

Fields Must be Handled Differently During Very Dry Seasons Than When Rain is Plentiful.

Those sections that have actually suffered from a surplus of water, unless the farms were properly underdrained, will have an experience during the dry seasons that will lead them to pay attention to the details of what is called dry farming. Let no one be unduly fearful because of the results which will follow from the dry seasons. As we have noted above, these seasons are favorable to the doing of some very important things. They are particularly good in that the grain which we grow will be free from rust and the straw will be as bright as can be desired, but we must handle our fields differently during these seasons than during those where we have abundant and sometimes more than abundant rains. Briefly we will state that we will plow with much care, says the Dakoto Farmer. We will plow as early as possible after harvest or else use a packer so as to establish a reasonable degree of solidity in the plowed field. We will not sow broadcast but use a drill and in some cases it will be very desirable to use some form of a press drill. We will drag the grain as well as the corn. We will drag the corn longer than we do the grain fields because the grain will sooner cover the ground by its growth and so shading it will prevent the escape of moisture. The dryer the season the more thoroughly we will cultivate this corn with the surface cultivator and continue that cultivation later than ordinarily. We can use a single horse cultivator with surface blades and while the dust will rise and the ground will appear to be like ash heaps, still beneath that looseness of dry earth there will be maintained a reasonable degree of that moisture that is absolutely essential to the growth of the corn plant. Let us take comfort that under these dry farming conditions and dry weather periods, we will not have rust on our potatoes but some of the best crops of this kind will be grown during these seasons. We can have a reasonable degree of size in the potato, but better than all this we will have the high quality of potato that is rarely ever grown when the seasons of abundant rains maintain.

## THIS LADY'S GOOD APPETITE

### Mrs. Hansen, In a Letter From Mobile, Tells How She Gained It.

Mobile, Ala.—"I suffered for seven years, with womanly trouble," writes Mrs. Sigurd Hansen in a letter from this city. "I felt weak and always had a headache and was always going to the doctor. At last I was operated on, and felt better, but soon I had the same trouble.

My husband asked me to try Cardui. I felt better after the first bottle, and now, I have a good appetite and sleep well. I feel fine, and the doctor tells me I am looking better than he ever saw me."

If you are sick and miserable, and suffer from any of the pains due to womanly trouble—try Cardui.

Cardui is successful because it is composed of ingredients that have been found to act curatively on the womanly constitution.

For more than fifty years, it has been used by women of all ages, with great success. Try it. Your druggist sells it.

N. B.—Write to: Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book, "Home Treatment of Women," sent in plain wrapper, on request.

### To Burn Paper.

There are times when there are bundles of old papers to be burned. This is dangerous in a grate fire. The following is the method which will avert danger of the chimney catching fire: Make tight rolls of all the papers and fasten them with pieces of soft wire—broomstick wire will do. They will then form a kind of a log and burn slowly without a flame. The rolls may be made of any size and several of them burnt together.

### Beet Seed Industry of Poland.

The growing of beets for seed in Poland was started 30 years ago and has been brought to a certain perfection, so that the local seed quite equals that of the foreign, and in many cases it has turned out much better.

## Students' Loan Fund.

Effort has been made in the past to create the prejudice against the University and the Agricultural and Mechanical College. Much that these institutions have needed has been withheld partly in satisfaction of this prejudice. Happily, this kind of demagogy is passing away. Need for higher education is recognized by all people, and heretofore much of its cost, especially in the case of the University, has been borne out of revenues coming from the endowment funds. Some effort used to be made to show that the University and the Agricultural and Mechanical College were "rich men's" schools, but this is easily shown to be untrue. Out of a student body of nearly 2,000 now attending the University over 600 young men and women are working their way through this institution earning their board by waiting on the tables at boarding houses and in other ways. And these young men and young women are honored by the student body and some of them stand at the head of their classes. An institution that affords this opportunity for worthy young men and young women and under such circumstances can not be said to be discriminating on account of wealth or social conditions. There are more farmers sons and daughters attending the University, I am told, than even attend the Agricultural and Mechanical College. For worthy young men and young women such as these I have referred to, students' loan fund should be created from which they could borrow a small sum annually, according to regulations to be prescribed by law or rules of the board of regents to aid them in the completion of their education, they being required to pay it back with small interest from their first earnings after graduation. Such a fund would do untold good, as I conceive it, and will bring the University within the reach of all."—Governor Colquitt's Message.

### Primrose.

Well today has been another beautiful, breezy day and the sand has covered up most of the news.

Several of the school children are still out on account of the mumps.

Mrs. A. K. Huckleberry has been real sick for several days, but is better at this writing.

Mr. John M. Baker has sold his place to Mr. Hope Timmons. We did not learn the price paid.

Miss May Parker has returned from Fluvanna, where she had been to see her mother who has been sick. The young people sure missed miss May and now welcome her return.

Mr. Philip Allen left Sunday for Throckmorton county to visit his parents. He will return in about three weeks and begin work again at the L7.

A. W. Blankinslip made a business trip to Lubbock, this week.

Berlin Dickinson is at Lubbock under treatment of a Dr., and has been real sick.

Misses Kathryn Powell and Eldora Lewis went to Brownfield to be at the Easter services.

### GET AFTER MOISTURE EARLY

Every Move Made This Spring Should Be With Idea That No Rain Would Fall Till July.

Every move made with the soil this spring, whether in field or garden, should be done with the same carefulness that would be exercised if we knew there would not be another drop of rain till July. If this is done, whether we have a moist or a very dry growing season, we shall have a good garden and fair crops.

By harrowing closely after every particle of spring plowing or disking, by passing a heavy roller over all too loose soils and following with a fine harrow, this can be done on a large and surely paying scale.

In the garden do the same, and in addition, after any shower and once or twice a week, shower or no shower, pass an iron or steel rake over the slightly hardened surface between the rows and hills close up to the plants. Should ample moisture come—and the chances are about even many springs that it will not—all the extra tillage and firming of the soil will be well paid for in other ways than by retaining the moisture, and should the spring prove one of the old time very dry ones, it may mean a crop or garden.

### Piece of Good Advice.

They will never grind with the water that is froze. The human body is about two-thirds liquid. If you are a "cold proposition"—better "warm up" and you will find the "grind" a whole lot easier.

### TEXAS SANTA CLAUS' HEADQUARTERS.

Texas Nuts Fill Nations' Christmas Stockings.

Santa Claus spends a great deal of his time in Texas getting ready for Christmas. The Texas products are so popular with the children of the nation that each year he has largely increased his purchase of nuts, fruits, etc., until he now stands ready to buy the available output. He is so eager for our products that one would think he has been having a heart-to-heart talk with Uncle Sam, or had been reading the literature of the Texas Commercial Secretaries and Business Men's Association.

The Texas pecan is a special favorite with Santa Claus, and he is rushing car load shipments to his distributing depots where they will be convenient for filling Christmas stockings and decorating Christmas trees. Our peanuts, popcorn and other products are anxiously sought by Santa Claus and he finds them extremely popular with the children.

We not only load down his sled with things the children most love and which make the reindeer pull with pride, but we supply the decorations for the Christmas festivities. We ship out Christmas trees by the car load and send with them holly, mistletoe and flowers in profusion. Without Texas Santa Claus could hardly pull off a respectable Christmas celebration and he would certainly lose out with the children if he should attempt it.

Then there is the Christmas dinner that must be provided from the poultry yards, the winter gardens and the farms of Texas. We furnish several million fowls, train loads of vegetables and choice meats for the Christmas dinner and there is no more important function in the holiday festivities than a Christmas dinner prepared exclusively from Texas products.

A visit through our jobbing houses will convince one that Santa Claus is moving his headquarters to Texas. He is shrewd enough to grasp the advantages of our location as a world distributing center and he knows it is only a short time until he will be able to reach the hearthstone of the people more quickly from Texas than any other point on the globe.

Then he likes to live in a country where the atmosphere is laden with human happiness; it fills his heart with the holiday spirit and helps him to give us all a merry Christmas and a happy New Year.

**GOMEZ DOTS**

Rev. A. D. Jameson and wife, accompanied by his brother Charles, visited Mr. and Mrs. Guy Taylor here on last Saturday. Rev. Charles Jameson was pastor of the Gomez church three years ago, and his many friends here are glad to see him among us again.

The young folks; the wee folks and the big folks, had an Easter egg hunt here last Saturday evening, and we think every one had a good time. True the wind did blow real hard, and right on the ground and if you've ever been to Gomez, you dont need any one to tell you what happens then. Well we are used to sand and it sure didn't spoil the egg hunt.

Mrs. Sam Key went out to Mr. Earley Key's on last Thursday and stayed until Sunday evening

Mr. Alvin Key and wife, who came in town the first of last week, returned to their home in Yoakum county on Saturday

Mr. Simon Holgate left on last Friday for eastern markets for spring goods.

Mr. Jim Burnett and family, were visiting Mesdames Robert and Simon Holgate, on last Monday.

Mrs. Ben Hurst is here to spend the rest of the week at her fathers, Mr. R. W. Glovers.

Mr. Jim Ralston from south Terry, was in trading on Monday.

Uncle George Wilkins happened to an unpleasant accident on Monday. He was returning from Brownfield and met an auto. His horses became frightened and ran, throwing him out of the buggy. Then the buggy tongue stuck in the ground and the horses tore loose and run on into Gomez. The men caught the horses and started to investigate and met Uncle George coming on to town. His face was bruised and bleeding, and we learn the buggy was wrecked.

On last Monday morning, Messers. Rhodes, Guy Taylor, and Walter Gainer, left for Taboka for freight.

The sick children at Mr. Wests; also Mr. Rhodes baby, are all on the mend.

Mr. E. E. Simms has gone to Lubbock for freight this week.

Mr. Winn got in with a load of cotton seed cake on Tuesday morning.

There was an unusually large crowd here at the I. O. O. F. Lodge on last Saturday night.

Mrs. Simon Holgate and children, visited at Mr. Jim Burnett's, several days this week.

Russel Bess and Port Ernest, of Plains, were here the last of last week after feed.

The Literary on last Friday night was the last one for this school term. The debate was good the Brownfield boys winning.

The play, "The Turn of the Tide" to be at the school house on next Saturday night promises to be real interesting.

Died on last Monday afterno on the little 4 months old baby girl of Mr. and Mrs. Oral Adams. It had been seriously sick for over a week, and for several days all hope of its recovery had fled. One more sweet life given to bud on earth and bloom in heaven.

**Our Textile Fibres**

**OUR VEGETABLE AND ANIMAL COMPETITORS.**

Cotton, from a worthless weed infesting the highways of agriculture, has become the world's most useful product. The splendor of its fibre attracted the attention of the inventive genius, aroused the courage of the manufacturer, plead for recognition of the producer and appealed to the wisdom of the consumer and with these powerful allies, it has fought its battles on every merchant's counter on the globe and has conquered 48 per cent of the textile trade of the world. Wool has been its strongest rival, but the result of the century's contest shows cotton to have passed from 21 to 48 per cent and wool moved downward from 36 to 16 per cent of the world's consumption.

The Texas Welfare Commission is investigating the production, marketing and manufacturing of textile fibres.

It was buried in the Brownfield Cemetery on Tuesday afternoon. The bereaved family have the sympathy of the entire community in their sad loss.

Mr. Marvin Allen of New Mexico, a former Gomez boy, was visiting friend in Gomez last Saturday and Sunday.

**We Think of You.**

When the world is wrapped in slumber,  
And the sky no longer blue,  
Oh! look then down upon us,  
For then we pray to you.

And when the sun has risen  
And shines down on brave and true,  
From golden morn to even tide;  
Oh then we think of you.

When life's hard days come on us,  
And our faithful friends are few,  
And it seems that life is very hard;  
Oh! then we dream of you.

When Poverty deprives us  
Of things that we most love;  
When all is sad and dreary,  
There comes down from above  
The knell of hearts so true;  
Oh then we love you.

We know that thou doest watch o'er us,  
And help us to get us through,  
The hardest things, so now

We ever give thanks to you.  
So God above us hear our prayer,  
And safely lead and guide us there,  
To that sweet home beyond the skies,  
Where soul and spirit never dies.  
When sorrows, heartaches shall be few,  
Because we ever trust in you.  
Lois Brownfield.
