Fistula, Pollevil and the Teeth a Specialty Derangements of the teeth of the horse very frequently lead to grave difficulties, both local and constitutional. The teeth often become decayed, holes form in them and toochache is a common occurrence. There is no such thing as blind teeth, as is often termed, it is either a rotten or a loug tooth. Ninety per cent of the horses that are fed condition powders to recuperate their health, need nothing but their teeth repaired.
