The Great Religious Weekly has just alighted in our home from our best "fellow."

Well, we are having some real has been a great deal of snow

sorghum and kaffir. Last year there was considerable acreage in cotton only in small patches, some that was properly worked and cultivated, proved to be a paying experiment. There were about fifty bales of seed cotton shipped from Portales to Hereford, Texas, to be ginned; therefore, we are satisfied of the experiment, and the talk now, is that Roosevelt county, New Mexico, will be classed among the fleecy staple counties. Bear in mind please, that we don't intend shipping our next crop to

Texas to get it ginned, eh? While we have had some rain and lots of snow the stock have stood the winter remarkably well. While this part of New Mexico has never gone through but little excitement, nor ever had a boom it now looks like we are about to come to the front. Here is the

Fistula, Polleyil and the Teeth a Specialty Derangements of the teeth of the horse very frequently lead to

grave difficulties, both local and constitutional. The teeth often become decayed, holes form in them and toochache is a commo occurrence. There is no such thing as blind teeth, as is often termed, it is either a rotten or a long tooth. Ninety per cent the horses that are fed condition powders to recuperate the health, need nothing but their teeth repaired.
