L. E. MILLER & SON.

For Rent or Sale A residence in the BROTHER OF W. N. SULLIVAN

The following is from the Sullivan Mo.,) News:

Stephen Henry Sullivan was born near the site of the present town of Sullivan, Mo., Sept. 25, 1845. He died lived, owned a large number of slaves at his home in Sallivan Monday night, and much mining and farming land in May 10, 1920, at the age of 74 years 7 this locality and naturally his interests months to days. He had been in failing and sympathies lay with the South. The health for several years and the past youth shared in these sympathies but few weeks was confined to his bed later became a very carnest supporter with heart trouble.

Mr. Sullivan had been prominent in from Dublin to visit homefolks and the affairs of his community ever since his early manhood. He was the grandson of Stephen Sullivan, who laid out & McCullough sell everything to build the town of Sullivan in 1858. The railroad people gave the town his name be cause he donated the land for the depot grounds and built the depot himself. He also built the first house in town in

You Want a Tractor That Anyone Around the Farm Can Operate

I kept this fact in mind while I was looking over the tractor field to pick the one I was going to sell to my friends.

I never looked twice at tractors with complicated parts or gears exposed to dirt. They bring too much trouble and expense to the farmer. I found the tractor I was looking for in the G-O.

It's so simple any boy can keep it running. It has less chances of getting out of order because it has fewer wearing parts. Almost anyone who can handle a tool can make the few adjustments ever necessary, right in the field.

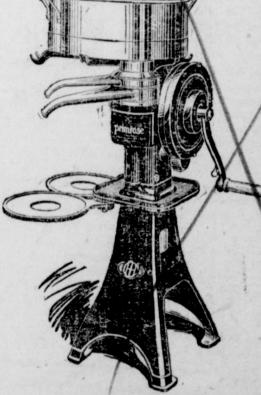

And the troubles that go with gear transmissions are eliminated by the G-O advanced driving mechanism. It gives six speeds, forward and reverse, without using gears or clutch. No gears to strip.

Furthermore, it hasn't a gear or chain on the rear wheels. Power is applied direct to the rims by the G-O Patented Method. Every gear and bearing is enclosed in dust-tight casing and running in oil.

Come in and look over the G-O, or let me bring it out to your place and show how it pulls three 14-in plows at the rate of ten acres a day on a low consumption of kerosene. Write me for a free catalog.

In the first instance, mental inhibition is shown, in the latter instance it is not. Under the first condition, the body exhibits automatism and may originate motion; under the latter, the stimulus must be from outside. Under the first condition, the animal does as he wishes; in the latter, the body does as it must. There seem to be many who would

believe that thought also is a function of some of these cells, which up to this day have but yielded motion to any stimulus we have been able to apply. If this be true, why are we not able to produce thought by stimulating these cells after death. The cells are are the cells the stimulation of which produces motion. If this be true, where among all the multitude of cells which compose the great nerve centers are these particular cells located, the stimulation of which, may cause thought? We do not know where they are, but we are mighty sure they have not been removed or escaped, while death was taking place.

Fourth and Pin stree's there is located a great central office for the telephone system of St. Louis. Thousands of wires run into it from all portions of the city, and | through this machine is conducted information of every sort. A fire is ignited and destroys a section of this office and over a large district information | can no longer be received or communicated. A cyclone breaks forth and hurls down and tangles hundreds of wires. The office is there unharmed, but it is useless. It no longer performs the function for which it was ereated. When in good condition its batteries stood loaded with electrical which alone can originate these messages and set the machine in motion? Is not the machine sufficiently complithat it will originate its own messages? There is no stranger law and more unalterable in nature, than the law of in ertia. Matter at rest remains at rest, and the perpetual motion machine that generates its own running force, like the philosopher's stone and the elixer of perennial youth, remains a hidden se-

GONE BUT NOT FORGOTTEN.

Mrs. Roberta Canady, wife of Ola J. Winters, Texas, May 16 .- The fun- Canady of this place, died in the famin the city cemetery Sunday evening, The service was held at the home of Rev. P. W. Stuckey preaching the funeral services. Our darling was 21 years 8 months and 28 days old, and was the and mother, three sisters, two brothers, husband and two sweet little children, besides a host of friends, to mourn her departure.

Roberta was born near Woodstock,

Va., in 1898. She and her parents Texas in 1901 and settled in the South Bennett community, where she grew to young womanhood. She joined the Methodist church at the age of eleven years. She loved her Sunday school and church. December 1, 1915, she married Ola J. Canady at Brownwood, Texas, came with her parents to Portales, where she has since lived. She was sick two weeks, but bore her suffering so patiently. She realized the last week she lived that she could not get well. She asked her husband on Saturday to bring her children in, sweet Lina Mae and dear little Melvin, and kissed them good-bye. I did not see her, my heart was breaking, but they told me she smiled so sweet on them when her little boy said "Mama is sweet." It was too much for the husband and father. Heart broken, he came out with his dear fittle sick baby in his arms with tears flowing down his cheeks. He knew the werst. She passed away without a struggle.

Our home is vacant everywhere we go. We could not stand it if we thought we would never see her any more. But we will, by the grace of God. We will meet her in that city there to part no more. We can't see her sweet form or hear her sweet voice in song in which she loved so well to sing the praises of her Savior and Lord.

Written by her father and mother, Mr. and Mrs. W. H. Moreland.

THE BRIGHT SIDE.

igly beautiful daughter. She hovered around the girl all the timecircle of men-for her daughter was undoubtedly the belle of the evening. During some war talk the gaily: "The casus belli! What was the casus belli?" Her mother stood on tiptoe, shook her finger at Ver beautiful daughter across a dozen men, and called reproachfully: "Grace, dear, how often have I told you to say stomach?"

Over the Prunes .- First Landlady-I manage to keep my boarders longer than you do.

Second Landlady-Oh, I don't know. You keep them so thin that they look longer than they really are.

Laura gazed intently at some sardines lying in an open can. "What seems to interest you?" her mother asked. Pointing a pudgy finger, the little girl answered: 'I was just thinking what a lot of trouble that middle fish would have if it wanted to turn

An American tells of a visit to a zoo in Ireland, on which occasion he was much interested in a solitary sea-lion. Turning to one of the keepers, the American asked, as he pointed to the solitary beast: "Where is his mate?" 'He has no mate, sor, ' responded Pat, "We just feed him on fish."

Said an Irish leader: "Min, ye are on the verge of battle. Will yez fight

or will yez run?" "We will!" came a chorus of eager

"Ye will what?"

"We will not," says they. "Thank ye, me min," says he. "I thought ye would."

The following printer's error is cited by the Boston Transcript: "The docter felt the patient's purse and declared there was no hope."

HONEY FOR FARMERS' TABLES.

Bees work while we work and gather nd store that choice food, honey. The nectar of flowers, nature's purest and nost wholesome substance, is elaborated by bees and a chemical change takes place in the sac of these workers, producing delicious, appetizing food that should be on every farmer's table.

There is difference of opinion as to the value of sugar as a food, especially when eaten in large quantities. Dr. Kellogg says that cane-sugar should be caten only in small quantities. "Large quantities," he says, "cause acidity and give rise to gastrie catarrh and indigestion. Sweet fruits such as raisins and figs, honey and maltose sugar are natural and wholesome sweets and may be eaten freely." Another authority, Dr. C. C. Miller, says: "It would be greatly for the health of the present generation if honey could be at least partially restored to its former place as a common article of diet."

Every farmen could keep a few stands of bees and supply his table with honey. The cost would be negligible, but the value of the honey considerable when we compare it to sugar at present prices. There are very few purposes in sweetening foods where honey could not replace sugar and for nost purposes it is superior.

value to that of producing honey, as important as honey producing is, It collects pollen on its rugged body in searching for nectar and carries it to W. E. Miller, the last regular meeting other flowers, thus helping nature cross of the "City Federation of Women" fertilize stigmas and produce better Clubs" was held Wednesday afternoo seeds, fruits and flowers. Any one who will do their community and the Eagle the favor of reporting items from his community will be cheerfully supplied with stamps and ville have been visiting in the homes of stationery by this office.

Vice President Thomas Riley Marshall opened the seventh-fifth Southern Baptist convention, saying: "I hope the clergy and laymen of this country will understand that their divine mission is to go out and preach the gospel and not beat the bass drum in a political parade. There is enough for the church to do without trying to reform congress. I am a part of congress and The Notorious Oklahoma Outlaw and I know." May the Lord send us more Marshalls and fill every pulpit in the world with Gospel preachers who will preach the Gospel instead of politics.

The cold storage bill requiring that the date of entry of goods into cold storage be marked on them when they are offered for sale, and limiting the period of such storage passed the senate Monday and was sent to conference. This was one of the measures proposed by President Wilson in his message to congress last year making recommendations as to means of reducing the living costs. If the bill becomes a law it will probably lower commodities usually held in storage, as it will have a tendency to release larger amounts of storage produce and thereby throw more on the market at a time. This condition will gradually adjust itself until it will work for the best interests of both producer and consumer, and will to a certain extent stabilize prices.

The McCormick resolution calls upon the reserve board to inform the senate what steps it is taking to end the present inflation of currency and credit and what it proposes to do to mobilize credits to move the 1920 crop. This resolution was adopted in the senate Monday. Senator Owen of Oklahoma declared Wednesday that the resolution of the senate to make the above enquiry of the board gives the federal reserve board an excellent opportunity SHOW STARTS EACH EVENING AT Senator Owen was author of the Federal reserve act, which is intended to prevent panies. Senator Owen warned the senate that the people would not stand for a panie now and if it is caused by their policy a big row will be started. He said the country would not submit to any depression created by the banks of the country. We need a few more senators like Owen.

BRIEFS.

Bolsheviki Win .- The Bolsheviki won important successes this week over the Poles in passing the Dvina River at Polotzk, in the government of Vitobsk, according to an official statement by the Soviet government at Moscow.

Investigate. - Favorable report was ordered Wednesday by the Senate Auditing Committee on the Borah resolution calling for an investigation by the senate into all expenditures made by Republican and Democratic presidential candidates, as well as the contributions received in their behalf.

West Side Square

The Eagle notes an advertised cut in

prices of a number of department stores

throughout the nation. While large

supplies may have something to do with

the cut, still another factor comes in

for its share of responsibility-"fear."

The large dealers are afraid of being

caught in the decline expected as a war

aftermath. Prices steadily advanced

after the armistice was signed until

a new high level was reached, and are

now thought by many to be at their

highest point. This is what is making

the large dealers shaky, and they are

advertising a cut in prices to hedge

their loss by reducing stocks fast. It

has been ascertained that some of the

mous profits. By carefully comparing

prices with the prices prevailing in

Goldthwaite, it is to be noted that a

reduction of twenty or even thirty per

cent could be made by some of the larg-

er stores in the cities and still not be

down to the level of some of the country

merchants in the smaller towns. Even

in the same towns there is a difference

illustrated by the advertisements of

days ago. One advertised gingham at

a twenty per cent reduction, but it ap-

pears that this merchant had been sell-

ing this brand of goods at fifty cents

a yard. Another merchant in the same

town advertised that he had never sold

this brand of goods for over forty cents

a yard, which price was about equal to

the prices the goods of the first mer-

chants would bring after the cut. Peo-

ple should note these things and find

out if the cut was really a cut price or

a reduction to a fair price. Twenty

per cent reduction is a large reduction,

as twenty per cent in dry goods is con-

sidered a fair margin of profit, and

dealers tell us that they would be glad

if they could get that much the year

round in Goldthwaite. If the wholesale

price should break considerably then

we should expect a reduction by the re-

tail merchants, but so far the wholesale

price has not changed on woolens and

cotton goods to any appreciable extent,

and the large cuts now advertised in

the Eastern cities is only another way

'marking them up in order to mark

run by those who seek to discredit all Aspirin Tablets except those made by them.

THE FACTS ARE

that we regularly handle large quantities of Aspirin U. D. Co. Tablets that we know are Pure and Genuine. They are rigidly tested by first class chemists and are put out by a firm of the very highest standing, the United Drug Company of Boston. We, as Rexall Druggists, are their ex-clusive agents in Goldthwaite.

The Aspirin patent expired in 1917 and any one can now make Aspirin and sell it under that

Aspirin U. D. Co. Tablet are put up in packages of 12's, 24's and 100's. The price is moderate, for there is no profiteering in United Drug Company business methods.

BIRTHS OF CHILDREN SHOULD ALWAYS BE RECORDED, SAYS STATE BOARD OF HEALTA

Austin, Texas, May 19 .- It is largely up to the mothers of Texas to put the state in the registration farea; the State Board of Health fully recognizes that if Texas as a state is ever to get into what is known as the registration area of the United States Vital Statisties Bureau and become recognized as being on a par with those states which now enjoy this great advantage that this will come about largely through the co-operation of the mothers themselves. There are almost daily evidence es of the fact that mothers are becom ing more and more aware of the vital importance of having their children's births recorded which is important not only from a legal, social and industrial standpoint, but is absolutely necessary for the accurate and scientific study of disease and its proper prevention.

While it is the duty of the mother to know that her child's birth is recorded it should at the same time be a great pleasure and a source of satisfaction to her to know that she has performed this important piece of business for her helpless child and there is no one thing requiring so little time and effort on her part that will be so much appreciated by the child when it has grown to realize the value of this forethought on the part of its own mother.

During 1919, probably more than 10, 000 children were born in the state, of Texas whose births were not reported. Millions of dollars have been lost in claims and millions more have been spent in litigation for property rights which might have been saved to some one's children if only mother or some one had acted in time in behalf of the child by recording the date of birth.

Mother, will you help your child by making such report to the State Board of Health and also arge other mothers to do likewise?

PROCRASTINATION.

My friend, have you heard of the town of Yawn

On the banks of the River Slow, Where blooms the Waitawhile flower

And the Some-time or-other scents the

air.

And the soft Go-easys grow?

It lies in the valley of What's-the-use In the province of Let-her-slide; That old "tired feeling" is native

It's the home of the listless I Don't-

Where the Put-it offs abide.

The Put-it-offs smile when asked to pay

And they say, "We'll do it tomorrow';

And so they delay from day unto day, Till death slides up and steals them

And the creditors beg, steal or borrow. -Walter Pulitzer, in N. Y. Globe.

NOTICE

Name "Bayer" means genuine Aspirin
prescribed by physicians for nineteen
years. Handy tin boxes of 12 tablets cost few cents. Aspirin is trade mark of Bayer Manufacture of Monoacetic-acidester of Salicylicacid.

Big Value in Tires for The Smaller Cars

Back of the manufacture of Goodyear Tires for the smaller cars is the same purpose to supply high value in the product that is behind the manufacture of the Goodyear Tires that equip the most expensive automobiles built.

This purpose is expressed by the enormous resources, extraordinary skill and scrupulous care applied to the manufacture of Goodyear Tires in the largest tire factory in the world devoted solely to the 30x3-, 30x3½-, and 31 x 4-inch sizes.

The effect of this endeavor is noted in the fact that last year more cars using these sizes were factory-equipped with Goodyear Tires than with any other kind.

It is also noted in the fact that if you own a Ford, Chevrolet, Dort, Maxwell, or other car requiring one of the sizes mentioned, you can secure Goodyear Tires and Goodyear Heavy Tourist Tubes at the nearest Goodyear Service Station.

30x31/2 Goodyear Double-Cure \$2350 Fabric, All-Weather Tread......

30x3½ Goodyear Single-Cure \$2150

Goodyear Heavy Tourist Tubes are thick, strong tubes that reinforce casings properly. Why risk a good casing with a cheap tube? Goodyear Heavy Tourist Tubes cost little more than tubes of less merit. 30x 3½ size in water- \$450

"HOW EUROPE CAN **ESCAPE COLLAPSE**"

"We Must Aid By Extending Credits," Says Davison.

"GRAVE MENACE TO U. S. A."

"Uuropean Ruin Would Involve America-Starvation and Disease Rampant.'

Des Moines, Ia.-Speaking before the general conference of the Methodist Episcopal Church, Henry P. Davison, chairman of the board of governors of the league of Red Cross societies, said:

As chairman of the convention of Red Cross societies, composed of representatives of twenty seven nations that met recently in Geneva, I am custodian of authoritative reports recording appalling conditions among millions of people living in eastern Europe.

One of the most terrible tragedies in the history of the human race is being enacted within the broad belt of territory lying between the Baltie and the Black and Adriatic seas.

This are includes the New Baltic states-Poland, Czecho-Slovakia, the Ukraine, Austria, Hungary, Roumania, Montenegro, Albania and Serbia.

The reports which come to us make it clear that in these war ravaged lands civilization has broken down. Disease, bereavement and suffering are present in practically every household, while food and clothing are insufficient to make life tolerable.

Men, women and children are dying by thousands, and over vast once-civilized areas there are to be found neither medicinal appliances nor medi-Best auto paint made. Hacket Store. cal skill sufficient to cope with the devastating plagues.

Wholesale starvation is threatened old and new gold. Finder please return to in Peland this summer unless she can procure food supplies in large quan-250,000 cases of typhus in Poland and

This is already one of the worst

to each 150,000 people. In the Ukraine, we were told, typhus and influenza have affected most of the population.

A report from Vienna, dated February 12, said: "There are rations for three weeks. Death stalks through the streets of Vienna and takes unhindered toll."

Budapest, according to our information, is one vast city of misery and cuffering, the number of deaths is double that of births. Of the 160,000 children in the schools, 100,000 are de. an experiment. This idea originated in pendent on public chairty. There are the brain of a Goldthwaite lawyer. The 150,000 workers idle.

the four countries composing Czecho-

In Serbia, typhus has broken out again, and there are but 200 physicians to minister to the needs of that entire country.

In Montenegro, where food is running short, there are but five physicians for a population of 950,000.

Returning to the United States a few weeks ago with all these stories ringing in my ears I found myself once more in a land whose granaries were overflowing, where health and plenty abounded and where life and activity and eager enterprise were in the full

I asked myself: "What if this plague and famine were here in the great territory between the Atlantic seaboard and the Mississippi valley which fairly parallels the extent of these ravaged countries and that 65,-000,000 of our own people condemned to idleness by lack of raw material and whose fields had been devastated by invasion and rapine were racked by starvation and pestilence and if we had lifted up our voices and invoked the attention of our brothers in happier Europe to our own deep miseries and our cries had fallen on deaf ears, would we not in our despair exclaim against their heartlessness?"

"Only Three Ways to Help Europe." There are three ways by which these stricken lands can secure supplies from the outside world. One is by payment, one by credit, and the third is by exchange of commodities. If these peoples tried to buy materials and supplies in America at the present market value of their currencies, Austria would have to pay forty times the original cost, Germany thirteen times, Greece just double, Czecho-Slovakia fourteen times and Poland fifty times. These figures are official and are a true index of the economic plight of these countries.

WILL MILLS COUNTY ADVANCE OR STAND STILL IS QUESTION TO BE DECIDED BY VOTERS

The question to be settled today is: Will Mills county advance or stand still? For many years Mills county has had commissioners to oversee the contities. There are now approximately struction and repair of roads. Every body knows the result. Last winter in the area occupied by Polish troops. during the influenza epidemic people "Worst Typhus Epidemic in History" living in the country had to bring double teams to town after the doctors, in order to save the lives of members f their families. The roads were imcrippled and business suspended. In passable by automobiles-the quick some districts there is but one doctor way of travel. Will this happen again n Mills county this winter? Where is the man who will vote for this condi-

> Mills county is in the most prosperous condition in its history. Crop pros pects were never better. A large majority of the progressive farmers own automobiles. More will own them as soon as local dealers can get them from the factories.

The road superintendent idea is not law was adopted bodily by the citizens Typhus and smallpox have invaded of Dallas county, and is claimed by them to be the best plan yet put forward. Mills county has had some good ommissioners. All, in fact very few. who make good commissioners do not make road experts. The old day of cheap wages and slow work is past. The cry of the hour is for efficiency. We elect commissioners and pay taxes in order to learn them to work roads, and after four years they are replaced by politicians who are campaigning while the commissioners are busy filling up the mud holes.

For over four years Germany was beating to their knees five of the greatest nations of the earth. The armies of these nations were controlled exactly as the road work is now controlled in Mills county-each one under a separate head. Some wise American originated the idea of combining these armies and placing them under one command. In one hundred and fifteen days Germany was crushed!

For many years the hard-working citizens of Mills county have given battle to what is thought to be civilization's
