Farm and Ranch School Editor

FARM FACTS AND FANCIES

(By W. P. Weaver)

A Community Creed

My community is the place where my home is founded, where my children are educated, where my income is earned, where my friends dwell, and where my life is chiefly lived. I have chosen it, after due consideration, from among all the places on earth. It is the home spot for me. Here let me live until death claims me. Then let me be buried in it. I want to be buried in it.

A Community

With an unselfish leader in every community could redeem the world. The crying need of community is local leadership.

Community

Community organizations are organized at Lake Mount Olive and Prairie Point. A plan of work for the organization of the Center Point community centers is being considered.

These clubs are organized for the purpose of promoting the progress of the community by local specialists on dairying, hogs, beef cattle, and such other vital importance.

If the "saved", their salvation through themselves.

The "4 Squares Plan" will be begun during the week of January 10-14.

The "4 Squares Plan" will be begun during the week of January 10-14.

The "4 Squares Plan" will be begun during the week of January 10-14.

The "4 Squares Plan" will be begun during the week of January 10-14.

The "4 Squares Plan" will be begun during the week of January 10-14.

PARENT-TEACHERS ASSOCIATION

There will be a meeting of the Parent Teachers Association at the high school building, next Tuesday, January 11, at 4 p. m. All members are urged to be present.

MRS. J. A. HESTER, Pres.

T. E. L. CLASS

On Tuesday evening, December 21, the T. E. L. class of the Baptist Sunday School met in the beautiful home of Dr. and Mrs. J. M. Campbell on College Heights for the regular social and Christmas tree for class members and shut-ins, in the home department. Regardless of the bitter cold weather, the reception was keen interest of every member.

The reception and dining rooms were beautifully decorated in Christmas greens and red and the tree was weighted down with gifts. Everyone was remembered and good will prevailed. An interesting program was rendered. The Scripture reading was Luke's gospel giving the account of Christ's birth. Roll call was on quotations concerning Christmas.

After the gifts were distributed a delicious refreshment plate consisting of sandwiches, coffee and cake was served. It has been said, "To get things coming your way, it is first necessary to go after them." So let every member go after some unenlisted person for class or home department, and remember "It's not the individual, nor the army as a whole, but the everlasting teamwork of every blooming soul."

The wind was blowing colder and colder as we decided the opportune time had come to thank our good hostess for the delightful time, she had made possible for us to enjoy in her cosy home.

Little Miss Doris Johnson visited her mother, Mrs. A. F. Johnson of this city last week, accompanied by her aunt, Mrs. Nilford Favors, of Paint Rock. Little Doris will make her home with her aunt until her mother is strong enough to care for her.

Marion Stephens of Wichita Falls brought his mother, Mrs. C. L. Stephens, home last Saturday. Mrs. Stephens had spent five weeks visiting him.

Misses Mildred Stephens and Lila Harvey spent last Sunday in San Saba.

PIONEER CITIZEN CELEBRATES BIRTHDAY

Mrs. Baylor Lewis, 1309 First St., gave a dinner Sunday, commemorating her mother, Mrs. S. E. Hester, who was seventy years old.

A sumptuous feast was served to three of Mrs. Hester's children and their families.

In the afternoon pictures were made of family groups and the honoree with the beautiful birthday cake.

Mrs. Hester is one of the early settlers of Brown County coming here with her husband in 1876 from Mill county, line, later moving to Williams ranch where she lived until the beginning of Goldthwaite.

Four years ago she moved to Brownwood with her daughter, Mrs. Lewis.

Mrs. Hester is a native born Texan, her grandfather, John Dilard, was among the heroes who died in the Alamo.

She was the recipient of many useful and lovely gifts and the day will long be remembered by all as one of many pleasant reunions.

Those present on this occasion were Mr. and Mrs. John A. Hester, Richard W. Hester, Misses Geraldine and Lottie Belle Hester of Goldthwaite, Mr. and Mrs. Ben Hester, and Miss Frances Hester, Mrs. Baylor Lewis and Herbert Lewis, all of Brownwood; also Mrs. Dolph Livingston of Ft. Worth.

Another daughter, Mrs. J. C. Wilsford, of Snyder was unable to be present.

Mr. D. D. Kemper and family moved to their farm near North Bennett last week. Mr. Joe Doggett and family moved to Mr. Kempers residence here.

Messrs Vaughn and Howard Ralph are mingling with friends here after spending the holidays with their families in Ottawa, Kansas.

Boyd Scott, employe of the Santa Fe station, spent New Year's day with his parents in Temple.

Miss Jimmie Reta Inman returned Tuesday night from her home in Kerens, Texas, where she spent the holidays with her parents. Illness prevented her from reporting to her students in Goldthwaite High school on Monday.

METHODIST CHURCH

"Is it well with thee, is it well with thy husband; is it well with thy child?" will be the Scriptural text next Sunday morning.

The theme for Sunday night will be "The Meaneast Woman in the World."

ART AND CIVIC CLUB

Mesdames Neal Dickerson, H. Frizzell, O. H. Yarborough, Annie Little, L. E. Miller, C. M. Burch, W. K. Marshall, C. A. Eacott and Mrs. Hugh McCullough, of Hico, joined the members of the Art and Civic Club in the L. R. Conroe home Wednesday afternoon when Miss Lucille Conroe entertained with a delightful 42 party. The rooms given over to the hospitality were made cheerful and inviting by decorations in keeping with the holiday season. Thirteen merry games of 42 were played, at the conclusion of which it was found that Mrs. Walter Fairman and Mrs. Bina Oquin had tied for high score for club members, each winning nine of the thirteen games played, and Mrs. O. H. Yarborough showed her efficiency and practice by winning high score among the guests.

After partaking of a delicious refreshment of gelatine nut-salad, topped with whipped cream and fruit cake, the guests bade Miss Lucille goodbye, each thanking her for a very pleasant afternoon.

REPORTER

Little Lavene Graham returned to her home at Caps, Texas, last Saturday, after spending the holidays with her grand-parents, Mr. and Mrs. E. L. Pass.

Miss Leona Pass left on last Saturday morning's train for Pampa, Texas, where she is teaching school after a visit with her parents.

Misses Melba and Joyce Cockrum returned to Denton Sunday night to resume their studies in the College of Industrial Arts, after spending the holidays with homefolks.

Misses Norma Roberts, Celia Wilcox and Mr. Joe Odell and Eural Letbetter visited W. L. Harvey and folks of Richland Springs during the Christmas holidays.

NEW OFFICERS

Last Saturday, the Commissioner's Court met and approved the bonds of the new County officers and the new officials are all at home in the Court house. Following is a list of the County officials:

- L. E. Patterson, Judge.
- Jno. S. Chesser, Dist. Clerk.
- L. B. Porter, County Clerk.
- Carl Bledsoe, Sheriff and Tax Collector.
- I. A. Dyches, Tax Assessor.
- Mrs. Bina Oquin, Treasurer.
- Jim Long, Surveyor.
- A. T. Pribble, County Atty.

COMMISSIONERS:

- L. B. Burnham, Precinct One.
- Wm. Biddle, Precinct Two.
- J. B. Renfro, Precinct Three.
- Jesse Lowe, Precinct Four.
- L. J. Vann, Public Weigher Precinct Three.

JUNIOR B. Y. P. U. PROGRAM

Subject—Snow, God's Beautiful Gift to Us.

- Song.
- Leader—Thelma Richards.
- 1. Introduction—By Leader.
- 2. Scripture—Gen. 9:3-17.
- 3. God Makes The Snow—Lucille Bledsoe.
- 4. Every Snowflake is Different—Wayne Locklear.
- 5. Snow is Pure—Raymond Bledsoe.
- 6. Snow is Useful—Howard Hoover.
- God Made Us—Olan Langlitz.
- 8. No Two People Are Alike—Lawrence Bledsoe.
- 9. God Wants Us to be Pure—Mollie Pitts.
- 10. God Wants Us to be Useful—Luther Ray Rudd.
- 11. Business and Record.
- 12. Closing Prayer—Mrs. Bill Scott.

Mr. L. A. Bartay and family of Brownwood and Charles H. Johnson of Hot Springs, Ark., came here last Sunday to spend the week visiting Mrs. Bartay and Mr. Johnson's mother, Mrs. J. W. McAlexander.

Mrs. Gladys Crockett of Austin spent the holidays in the home of her sister, Mrs. Jesse Cockrum.

Miss Faye Cockrum returned to her school at Jones Valley Monday, after spending the holidays with homefolks.

THE CITIZENS OF LAKE MERRITT COMMUNITY TO PUT OVER PAPER

The mayor of the Lake Merritt Community, W. P. Weaver, has been successful in getting the citizens of the community to put over paper. The citizens of the community are to be put over paper. The citizens of the community are to be put over paper.

A group of about fifty citizens of the community are to be put over paper. The citizens of the community are to be put over paper. The citizens of the community are to be put over paper.

Mr. Weaver suggested that the citizens settle on purebred sires, a community cannery, and a boys and girls club and the matter was discussed for a few minutes. At a meeting to be called in the near future definite decisions will be made.

Those attending the meeting were J. A. Smith and family, Clint Petty and family, T. B. Graves and family, Chas. Brown and family, Willis Booker and family, Will Garner, John Long and family, R. S. Daniels and family, C. M. Collier, Arnold, Bob and the two Misses Reynolds, W. L. Stuck and family, Mr. Townsend and family, the children of George Mason, F. M. Fessler, Raymond Goeslin, Florence Oden, Ira Ward George Hill and family, Bueh Weston, Edgar Jenkins, Jack Shaw, J. D. Robertson, J. D. Nix, Earl Nix and Miss Wilma Long and Lon Nix and Miss Velma Long, Wallace Leverett and family and possibly others.

Lake Merritt people have come to the wise conclusion that cotton as a leading crop is doomed in Mills county and they are using the right method of cooperation—of switching to other crops with the greatest possibilities of success.

Miss Florence Gray returned last Sunday to Crews, Texas, where she is teaching school, after spending the holidays with her parents.

TO THE READERS OF THE EAGLE --

Following its custom of several years, the Eagle this year made its annual bargain offer of \$1.00 per year until January 1, 1927.

A great many of our friends, both old subscribers and new readers, responded to this offer. In fact, the number who have come in and subscribed or phoned or wrote us that they wanted to take advantage of this offer, but could not get to town at this time leads us to believe that a great many more would like to subscribe or renew, but have been prevented from doing so on account of the inclement weather.

So, in justice to them, the Eagle has decided to prolong its bargain time-limit through **SATURDAY, JANUARY 8th**

After that time the regular price of \$1.50 will become effective again.

Yours very truly,
Eagle Publishing Company.

THE STATE OF TEXAS

To the Sheriff or any Constable
of Mills County, Greeting:

You are hereby commanded to
cause to be published once each
week for a period of ten days be-
fore the return day hereof, in a
newspaper of general circulation,
which has been continuously and
regularly published for a period
of not less than one year in said
Mills County, a copy of the fol-
lowing notice:

THE STATE OF TEXAS

To all persons interested in the
Estate of H. D. Barrow Deceased,
H. G. Bodkin has filed in the
County Court of Mills County, an
application for the probate of the
last Will and Testament of said
H. D. Barrow, Deceased, filed
with said application, and for
Letters Testamentary, which will
be heard at the next term of said
Court, commencing on the first
Monday in March, A. D. 1927, the
same being the 7th day of March,
A. D. 1927, at the Court House
thereof, in Goldthwaite, at which
time all persons interested in said
Estate may appear and contest
said application, should they de-
sire to do so.

Herein fail not, but have you
before said Court on the said first
day of the next term thereof, this
Writ, with your return thereon,
showing how you have executed
the same.

Given under my hand and the
seal of said Court, at office in
Goldthwaite, Texas, this 28th
day of December, A. D. 1926.

ELVIS MORRIS,

Clerk County Court, Mills County
(Seal) 1-14-27. Texas.

LENITE—A NEW BASE
FOR ARTIFICIAL TEETH

Science has evolved a new
base said to be superior to rubber
in the following points: It is a
blend and pleasing to the eye. It
is said to be impervious to the
fluids of the mouth, therefore
more sanitary. It eliminates rub-
ber sore mouth. It is slightly
lighter than rubber. It conducts
heat and cold almost equal to
mettle. It can be sterilized by
boiling. Now ready for public
use.—Dr. Em. Wilson.

NOTICE TO DEBTORS AND
CREDITORS

To those indebted to or holding
claims against the estate of Thos.
N. Berry, deceased:

This is to notify all persons in-
debted to the said estate to come
forward and make settlement
and those having claims against
the said estate to present them to
the undersigned administrator,
within the time prescribed by law
at his residence in Goldthwaite,
Mills County, Texas, where he re-
ceives his mail.

This the 30th day of December,
A. D. 1926.

W. W. BERRY,

Adm'r of the Estate of Thos. N.
Berry, deceased.

FOR SALE

PAYNE GAP NEWS

Eagle and Readers:

Well as the news this week will
begin practically on the new year
I will send the old bird some of
the freshest crumbs.

Santa Claus come and went and
everybody in this community en-
joyed themselves fine and wish
Christmas would come oftener
and Santa Claus wouldn't wait
so long to come.

Before I begin with the New
Year's news, I will drop some of
the Christmas news.

Miss Irene McMurray spent
Christmas eve, Saturday and Sun-
day morning with Miss Laura
Horton of Pleasant Grove com-
munity.

Mr. and Mrs. Marvin Collier and
family and Mrs. J. G. McMurray
ate Christmas dinner

Miss Opal Taylor and Mr. Clem
Howard ate Christmas dinner
with Mr. and Mrs. Arthur Hunt.

The party at Paul Horton's last
Thursday night was attended by
a hundred or more young people
besides the old folks, and there
was a plenty of them. Everyone
enjoyed themselves and all hope
Mr. Horton will give another
party soon.

Mr. and Mrs. Hubert Ervin and
family spent last Thursday night
until bed time with Mrs. J. G. Mc-
Murray and Fred.

Mr. and Mrs. Kenneth Witty,
from Cross Plains, spent Christ-
mas with friends here and relatives
at Star.

Conk Ervin returned home
from Ranger Saturday afternoon
with him a Ford roadster.

Our school opened again Mon-
day and is progressing nicely.

Mr. and Mrs. Johnnie McMur-
ray spent Friday night in the
home of Mr. and Mrs. Arthur
Hunt.

Mr. and Mrs. Weems Weath-

ers and daughter Mary Alice, Mrs.
H. D. Barrow, Mrs. Emmer Phil-
lips and Mrs. Mamie Woodall
spent Sunday afternoon out at
Mrs. H. D. Barrow's farm.

Mr. and Mrs. J. G. McMurray
and Mrs. Marvin Collier, of Cen-
ter City spent the afternoon Sun-
day with Mr. and Mrs. Gid Wat-
son of near Goldthwaite.

Mr. and Mrs. Conk Ervin and
two daughters, Beth and Mary
Louise, sat up until bed-time with
Mr. and Mrs. J. G. McMurray.

Miss Irene McMurray and Mr.
and Mrs. Johnnie McMurray
motored up to Mr. and Mrs. Hu-
bert Ervin's and listened to some
good radio music Sunday night.

Ray McMurray spent Friday
night with Monroe Jordan.

Mr. and Mrs. Joe Petrey, of
Moline, moved to their new home
near Evant last week.

Nolan Horton has returned to
school in Austin. He spent the
holidays here with his parents.

Ray McMurray spent Satur-
day night and Sunday with Mr.
Jeff and Lonnie Carroll at Izora.

Mrs. Conk Ervin spent the day
Monday with Mrs. J. G. McMur-
ray.

Miss Irene McMurray and Mr.
and Mrs. Johnnie McMurray
motored to Goldthwaite Monday.

Born to Mr. and Mrs. Hap Ar-
rowood, a 9 pound girl, Decem-
ber 31, 1926.

Mr. and Mrs. W. B. Wilkey, of
Center City, spent Saturday night
and Sunday with Mr. and Mrs.
Hap Arrowood.

DIETETIC IMPORTANCE OF CANNED PINEAPPLE

Almost seven million cases of canned pineapple are exported annually from an increased interest is shown by scientists and physicians in the role which pineapple dietetics.

Pineapple, rather than a fruit, is the subject of a great deal of scientific investigation since the fresh pineapple we get in this country has been green, and therefore less food value than the product which has been at maturity.

At the Hawaiian Agricultural Experiment Station it was found that during the growth of a fruit, relatively small amounts of sugar are stored in it, but in the short period of ripening there is a rapid accumulation of sugar. Therefore the green gathered does not contain a normal sugar content.

Grades A, B, and C are a marked extent in pineapple investigations showed, and experiments made at Cornell University, New York, showed that all three of these grades were retained in the product. Besides being a source of vitamins, canned pineapple contains thirty-six per cent carbohydrate and several

of the most important mineral salts. Its juice contains "bromelain," a highly digestive juice, which is especially beneficial in aiding the digestion of meats.

Physicians, realizing the value of these elements contained in pineapple, have found certain specific uses for it, notably in diphtheria cases where the juices have proved very soothing to the throat. Owing to the digestive properties in pineapple, it is also used in many hospitals for invalids and convalescents. It not only aids in the digestion of other foods, but is a spur to the appetite.

Certain grades of "crushed" pineapple and a small quantity of sliced are packed especially for diabetic patients without sugar. With the exception of these few cases packed for medicinal purposes, all other pineapple contains the rich syrup made from refined pineapple juice and pure cane sugar.

Housewives who are using the largest part of the seven million cases of pineapple exported every year from Hawaii, will find in this product not only the delicious tropical tang which lends itself to a variety of uses in the meal, but valuable nutritive and digestive qualities which should give it a regular place in the daily menu.

MARKET MOVED

We have bought the City Meat Market and moved it into the building with the Bill Cafe on the East Side of Fisher Street, where we are prepared to serve you with the choicest cuts of meat. We kill only lot fed stuff, assuring you of the best. We will appreciate your business.

WILL CHIROPRACTIC CURE ME

REGARDLESS of whether your trouble is in the head, eyes, ears, nose, throat, shoulders, arms, chest, back, hips, legs, heart, liver, spleen, stomach, intestines, kidneys, generative organs, or any other part of the body, those parts are all supplied with nerves and can be cured by Chiropractic adjustments.

It is a proven fact that 95 per cent of all diseases are caused by impingement of the nerves. Chiropractic being the science that removes the impingement, it has proven a positive cure for 95 per cent of all diseases.

Too often people suffering from one ailment or another are influenced by those who are prejudiced against Chiropractic; those who claim they have tried it without results; or those who say "Chiropractic may be good for some things, but I don't believe it would work in your case." It should be remembered that there is always more or less prejudice against anything that has proven merit.

There are others who expect to get well in a few days of something that have had for years. They take two or three adjustments without marked results and then with unfairness to themselves, the science, and those who might later take Chiropractic, say that they tried adjustments, but without results. And I regret to say that there are a few who criticize the science because they have unluckily fallen into the hands of incompetents.

To you who are in search of health let me say that the advice of one who is prejudiced is seldom worth considering; that the condemnation of one who has not given a thing a fair trial should be overlooked; and that if you have failed to get results from one Chiropractor you should not be discouraged, try a better one. Your failure to get well should not be blamed upon the science.

You have 95 chances out of a hundred of getting well through Chiropractic. Never within the history of the world has a science grown as rapidly as Chiropractic. And it has grown by merit alone; by curing where every other method has failed. You should try Chiropractic first. But even if you have gone the rounds of other sciences without results, health still awaits you at the fount of Chiropractic.

WHAT IS DISEASE AND WHAT CAUSES IT

Before answering this question it is necessary to give a brief explanation of the makeup of the human body and its method of functioning. So numerous are the nerves and so intricate the system that if every particle of substance of the body could be removed excepting the nervous system the uttermost outline of every organ and tissue would remain in perfect form. The body would look like a perfect physique made up of millions of tiny threads.

The nervous system might be likened to the electrical system of a city. The brain is the central power plant; the spinal cord (which originates in the brain) and its thirty one branches (which make their exit from between the joints of the spine or nerve trunks) are the cables; the individual nerves branching out from the nerve trunks are the wires; the organs and tissue cells are the motors and globes.

Every motor and globe throughout the city is furnished with light and power flowing over the wires from the central power plant where all the electrical force is generated.

Every organ and tissue throughout the body is furnished with life or nerve energy which flows from the brain where the life force is generated, out through the spinal cord and over the nerves the same as electricity flows over wires.

Just as stopping the dynamo at the central power plant will throw a city into darkness, when the brain stops functioning the light of life leaves the body. And just as pushing the button stops the flow of electricity to the motor or globe, pressure upon a nerve by a slightly dislocated spinal joint will stop the flow of nerve or life force to the organ or part supplied by that nerve.

The nerve energy is the force by which the organs and tissues retain their life and carry on the various functions.

DISEASE is the manifestation of interference with these functions by pressure upon the nerves where they leave from between the joints of the spine. And the retarded flow of nerve or life energy is the CAUSE of disease.

Now let us explain why the different varieties of disease. In the human body there are NINE DIFFERENT FUNCTIONS which govern its entire workings namely: MOTOR, which moves the body; CALORIC, which heats the body; SENSORY, which governs all the senses of the body; SECRETORY, which secretes all the fluids of the body; EXCRETORY, which excretes all the waste and poison from the body; NUTRITIVE, which furnishes nutrition to the body; EXPANSIVE, the function of growing; REPARATORY, which heals diseased organs, broken bones, cuts, etc., and REPRODUCTIVE, which is the function of procreation.

Ninety-five per cent of all diseases are the result of a PLUS or a MINUS of the nerve force governing one or more of these functions. For instance, too much Motor and we have muscular contractions or spasms, such as a shaking palsy, St. Vitus' dance, wry neck, while with too little of the same function we have paralysis, prolapsis, etc. Too much Caloric and we have fever; too little and we have a chill. Too much Sensory and we have pain; too little and we have numbness. This refers to the sense of touch or feeling. Interference with the nerves governing the four other senses causes other varieties of trouble. Too much Secretion of certain glands and we have one kind of trouble; too little and we have another kind. Too much excretion of Kidneys and we have dry scaly skin; diabetes, etc., too little and we have dropsy, autointoxication, and all kinds of skin diseases. Too much Nutrition and we are too fat; too little and we are underweight. Too much Expansion makes giants; too little makes dwarfs. And so on down the line.

The general pathology or manifestation of each of the PLUS and MINUS conditions is subdivided into many species of incoordinations, dependent upon the degree the nerve is impinged, each specie being given the name of a disease. As an example, the PLUS or Caloric fever is divided into typhoid fever, typhus fever, dengue, influenza, etc. The MINUS of the Motor function, paralysis, is divided into many species such as hemiplegia, spastic spinal paralysis, infantile paralysis, etc. Hence the different names of diseases.

The Chiropractor who knows his business can readily distinguish which of the functions are involved, and knowing where every nerve is that governs all these functions, he can readily locate the displaced spinal joints that are pressing upon those nerves. Having located them, with the proper adjustment with the naked hands, he can soon re-align them, removing the pressure from the nerves so the life or nerve force can flow unobstructed to the organs and tissues affected. And health is the result.

The Chiropractor does not cure the patient. There is only one thing that can. And that one thing is the Nature that built the body in the first place out of one cell; that turns food into living flesh, repairs wounds and broken bones, makes the eyes see and the heart beat. The Chiropractor is merely the mechanic who locates and removes the obstruction to Nature's forces as an automobile mechanic would adjust the carburetor to permit the proper flow of gasoline to the motor. However, due to the intricacy of the nervous system, and the superior knowledge required to recognize certain conditions, locate their cause and remove same, it requires great skill on the part of the Chiropractor.

WHY DO CHIROPRACTORS ADVERTISE—AND IS ADVERTISING ETHICAL

A few days ago a sweet little girl was brought to me after having spent a year in plaster paris casts and steel braces. Her little legs were shriveled to almost nothing. X-ray examination showed that the hip joints were eaten away with tuberculosis, so nothing on earth could ever make her walk again. And, remember, all this was caused by a fall, dislocating joints and impinging nerves in the lower part of the spine.

The sobs of that dear mother when told that her little girl would never walk again and her weebegone exclamation, "Oh God. My baby to go through life an invalid. If I had only known about Chiropractic a year ago when she first began to limp." This truly made me feel like a criminal. I felt that in a way I was responsible. Possibly had I done a little more advertising this mother might have known about the wonderful health-restoring possibilities of Chiropractic and her loved one saved.

Yet, some condemn Chiropractors for advertising on the grounds that it is "unethical." "Let the mothers and babies die, but don't be unethical." To advertise means to give notice. If the water system of this city should fail and you and thousands of others were dying of thirst and I knew where there was a spring of life-giving water, would you consider me a criminal to refuse to "give notice" of the spring. Or would you rather see the town perish than a selfish set of man-made ethics violated.

As a matter of fact thousands are suffering and many are dying daily simply because they know nothing of the health and life giving possibilities of CHIROPRACTIC. Health and happiness are within their reach if only they knew where to find them. Is it unethical, friend, to teach them health and where to find it. Was the Liberty Loan advertising campaign carried on by our government considered unethical.

I love human life more than ethics. Therefore I shall continue my efforts to spread the message that will bring health and happiness, sunshine and success, to every home.

And if you, my friend, have benefitted thru Chiropractic, or if you know anyone who has, it is your moral duty to tell it to one and all. By so doing you may save many lives. By failing to do so you may be responsible for much suffering and unhappiness. Don't worry about ethics. The Master of ethics passed upon the morality of advertising when he said, "GO YE INTO ALL THE WORLD AND PREACH THE GOSPEL."

WILL CHIROPRACTIC CURE STOMACH AND INTESTINAL TROUBLES

Possibly there are no diseases so prevalent as those of the stomach and intestines, no organs so subject to disease. This is accounted for by the fact that these organs are so frequently abused and not properly cared for.

The stomach is the receiving plant for the rough food materials from which the body is built and repaired. It is in this plant that the food undergoes certain digestive changes preparatory for the refining factory, the intestines, where all of the nutritive ingredients are abstracted and sent out through the circulation to the tissue cells to be built into living flesh. It is upon the stomach and intestinal tract that the entire body is dependent for its strength and nutrition. An arm or a leg might be eliminated without materially affecting the rest of the body, but to eliminate the stomach or intestines would be to destroy the entire body.

It is in these organs that we find Nature's most wonderful chemical laboratories. The proper digestion of food being dependent upon certain digestive fluids in their proper amounts, and these organs being the laboratories where such fluids are manufactured, it is obvious that interference with them will cause digestive troubles.

Another condition that causes severe stomach and intestinal trouble is the slowing up of the peristaltic motion, that is a function similar to the working of the heart. This is caused by a slight paralysis of the motor muscles in the stomach and intestinal walls which results in the waste matter lying in the intestines too long. Not passing out as rapidly as it should the poisons that are being thrown out through the bowels are reabsorbed, thrown back into the circulation and what the kidneys are unable to dispose of necessarily settles in the weakest tissues of the body. It is indeed unfortunate that we should pay so little heed to these important organs.

Yes, Chiropractic will cure stomach and intestinal troubles. Even though you have abused and neglected these organs, you still have a good chance of recovery through Chiropractic. Chiropractic is curing thousands yearly where everything else has failed.

Hotel Baylor: Monday, 2:00 to 8:00 p. m.; Tuesday, 8:00 to 11:00 a. m.; Thursday, 2:00 to 8:00 p. m., Friday, 8:00 to 11:00 a. m.

TEXAS TECH STUDENT WINS TEXTILE SCHOLARSHIP

Roger Allison, Brownwood, won the John W. Carpenter Textile Scholarship at the Texas Technological College this year. Mr. Carpenter is Vice-President and General Manager of the Texas Power & Light Co., and the Texas Electric Service Co.

The Textile Department of the Texas Technological College ranks with the highest textile schools in this country. The equipment in this Department was selected by L. W. Robert, of Atlanta, Georgia, who is one of the outstanding textile engineers of the South and who, also, is a member of the Board of Directors of the Georgia Institute of Technology. President P. W. Horn, with Mr. Carpenter, Mr. Robert and Wyatt C. Hedrick, of the architects' firm designing the College buildings, visited the textile schools at Philadelphia, Lowell, Mass., Boston Tech., and others and then adopted plans from the best features of these various schools for the Textile Department of the Texas Technological College at Lubbock, Texas.

This school is training the youths of Texas, many of whom come from Texas cotton farms, to a knowledge of textiles beyond the production of the raw product. It is giving them an opportunity to obtain knowledge that will enable them to co-operate in the development and establishment of the cotton manufacturing plants in Texas, which may be used in the conversion of our raw cotton to a finished product multiplying it many times in value.

This school will have much to do in the bringing about of a new era in southwestern commerce and industry. Mr. Carpenter, who is one of the original members of the Board of Directors of this school, says that this great Textile School will do more than any other institution in Texas to diversify the civic and commercial life of this State.

How Doctors Treat Colds and the Flu

To break up a cold overnight or to cut short an attack of grippe, influenza, sore throat or tonsillitis, physicians and druggists are now recommending Calotabs, the purified and refined calomel compound tablet that gives you the effects of calomel and salts combined, without the unpleasant effects of either.

One or two Calotabs at bed-time with a swallow of water,—that's all. No salts, no nausea nor the slightest interference with your eating, work or pleasure. Next morning your cold has vanished, your system is thoroughly purified and you are feeling fine with a hearty appetite for breakfast. Eat what you please,—no danger.

Get a family package, containing full directions, only 35 cents. At any drug store. (adv.)

What's better than Hot Chili these cold nights? Get a brick at BILL'S CAFE. One pound — 40c. Half pound — 20c. — BILL'S CAFE.

Announcing—

TRULY the most beautiful Chevrolet in Chevrolet history! Truly an achievement which must immediately change all existing ideas as to what the buyer of a low priced car has a right to expect for his money!

Here is the irresistible appeal of unbroken, flowing body lines—of modish new Duco colors, fashionably striped—of notable smartness—of that flawless silhouette regularly associated with the costliest of custom-built creations.

Here are score after score of advancements in design, literally too numerous to list completely—but typified by one-piece full-crown fenders, bullet-type lamps, coincidental steering and ignition lock and large 17-inch steering wheel.

Here is definite assurance of longer life, more satisfactory operation and even greater economy—for all models are equipped with a new AC oil filter and an improved AC air cleaner!

Such features as these are usually found only on cars costing up into the thousands. They are marks of distinction on the world's finest automobiles. Yet these are now offered on The Most Beautiful Chevrolet because the spectacular growth

of Chevrolet popularity has sent Chevrolet production to tremendous volume—and only the economies of tremendous volume plus inspired engineering make possible the manufacture of so fine a car to sell at Chevrolet prices.

We urge you to come in for a personal inspection. And we ask you to come, not in the customary casual mood—but actually anticipating the revelation you would expect when the world's largest builder of gearshift automobiles announces a completely new line of cars whose truly great value is based on irresistible beauty

and a host of improvements including:

- New AC Air Cleaner
- New AC Oil Filter
- New Coincidental Lock
- New Duco Colors
- New Gasoline Gauge
- New Radiator
- New Bodies by Fisher
- New Remote Control Door Handles
- New Tire Carrier
- New Bullet-Type Head Lamps
- New Windshield On Open Models
- New Heavy One-piece Full-crown Fenders
- New Hardware
- New Running Boards
- New Brake and Clutch Pedal Closure

Celotechnic Institute Studies Home Builders' Problems

THE Celotechnic Institute of America was recently established, with headquarters in Chicago, to study the problems of American home builders and to place at their disposal the latest discoveries in scientific construction.

It is the aim of B. G. Dahlberg, its founder, to delve into all home building problems and to give to the American public the benefit of his research work and to supply the very latest data on most modern building practices.

It will be a veritable laboratory of building facts including structural problems, modern plans, roof and floor insulation, building trends, analysis, laboratory tests, experimentation in refrigeration, sheathing and interior finishes.

"Important discoveries are constantly being made which practically revolutionize previous home building methods," declares Mr. Dahlberg. "In all the facts we give the public we will have an eye on economy, as well as utility, comfort, health and beauty. It is the aim of the institute to help the home builder build better homes without any material increase in the cost of construction. It will be a real service bureau for the home builder."

Mr. Dahlberg is one of the youngest of America's capitalists of industry. Born in Sweden, the early part of his life in America was spent in railroad work, a good portion of it as an associate of the late James J. Hill, the great empire builder of the Northwest. In more recent years he has been prominently identified with a number of large construction projects. A vision of great efficiency and economy in building, growing out of his experience, finally led to the decision to establish the Institute.

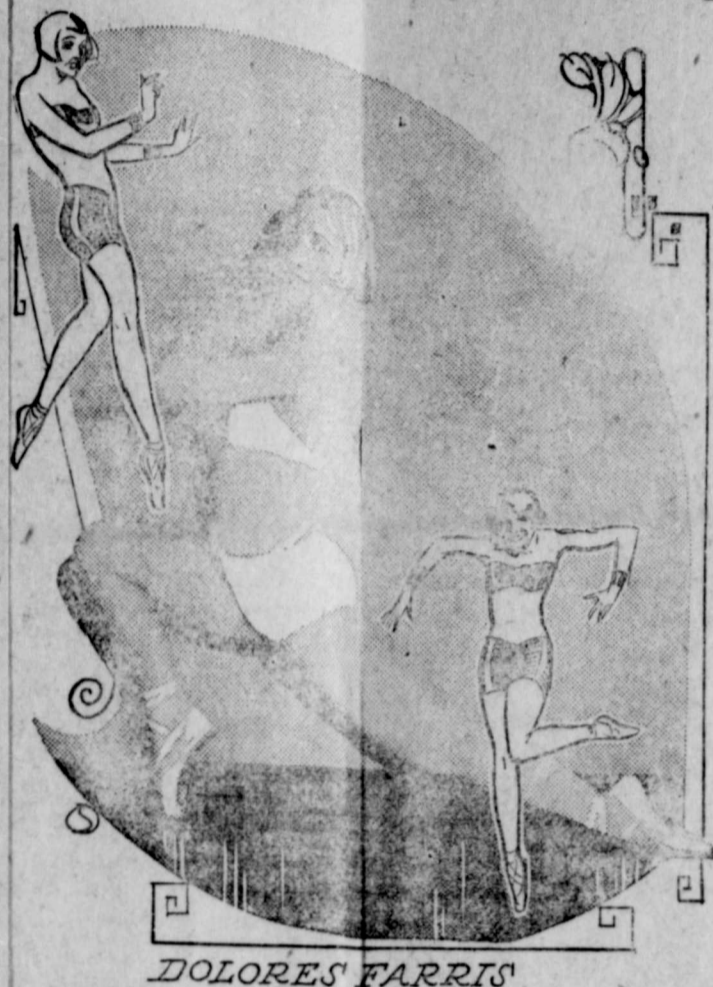

It Pays to Know the Difference

By the use of the Famous Byrne copyrighted systems, which we control, the Byrne Commercial College will place a student on the payroll in three months less time than schools compelled to teach other systems. If you doubt this give us the salary you earn in the time we save you and we will refund all tuition. In other words if a school teaching another system of shorthand and bookkeeping were to give you your tuition you would lose money to attend it because the salary you would lose by having to attend three months longer than with us would amount to twice as much as your tuition. Get the latest, most modern and complete. Beautifully illustrated catalogue describing our ten business courses mailed free upon request. POSITIONS SECURED.

Jazz Toe Dancing is New Fad of Broadway

DOLORES FARRIS

Ballet Steps Used for Charleston and Black Bottom
New York City.—The last fad of the opera has been invaded. Toe dancing, always considered sacred to opera, has come at last to Broadway.

CENTER POINT

Editor Eagle: Our Sunday school started off with new pep and a host of willing workers, last Sunday.

Rev. J. C. Gibbons filled his regular appointment Sunday afternoon. A nice program was also rendered.

Our League meets every Sunday afternoon at 2.30 p. m. Miss Bessie Hutchings will lead next Sunday. Come.

The young people enjoyed several parties in the nearby communities.

Holly Ray White, little son of Mrs. Lizzie White, is very ill at this writing.

Mr. and Mrs. Will Harmon spent Sunday afternoon in Mr. Joe Spinks' home.

Miss Mary Fallon reports a splendid time last week. She spent the week in Brownwood, a guest of her brother, Mr. Pat Fallon and family.

Hubert Meyer, of Goldthwaite, spent Saturday night and Sunday with Bert Davis.

Miss Inez Spinks visited Miss Malta Shelton Sunday.

Mr. and Mrs. Boyd Faulkner of Breckenridge, are visiting relatives in this community and in Goldthwaite.

Well, wedding bells are still ringing in this community. Miss Miriam Newman, oldest daughter of Mr. and Mrs. J. N. Newman and J. A. Doggett were married in Goldthwaite last Friday afternoon.

Mr. and Mrs. John Edlin spent Sunday afternoon in Mr. and Mrs. J. W. Randle's home.

Miss Mary Spinks was a guest of Miss Leona Newman Sunday. Misses Vergie Taylor and Malta Shelton lately visited their grandmother Wesson, of Goldthwaite.

Edward Dennis of Seallorn is moving to Mr. B. F. Mahon's farm in this community. Amos Shelton visited Carl Spinks Sunday.—ROSEBUD.

FOR WORKING PEOPLE The best of workers get out of sorts when the liver fails to act. They feel languid, half-sick, "blue" and discouraged and think they are getting lazy.

CENTER POINT

We are hoping all the people a happy New Year and good prosperity.

School began Monday morning at the regular time. All school children reported a good time during the Christmas holidays.

Miss Mary Spinks was the guest of Miss Leona Newman Sunday. Miss Inez Spinks was the guest of Malta Shelton Sunday evening.

Mr. Albert Spinks visited Mr. Claude Shelton Sunday evening. Quite a few people visited in the home of Mr. Ed Davis Sunday evening listening to the radio program.

The young folks had a good league program Sunday. Miss Inez Spinks was leader. Mr. Gibbons also preached a good sermon Sunday.

There was quite a crowd at Sunday School Sunday morning. Everyone continue coming and bring someone with you. Also to the League in the afternoon.

Miss Vergie Mae Taylor was the guest of Miss Malta Shelton Sunday evening.

We are all hoping that Mrs. Miriam and Mr. J. A. Doggett, of Live Oak community, who are now a married couple, a happy life together.

Miss Malta Shelton and Miss Vergie Mae Taylor spent Saturday night with their grandmother Mrs. Wesson, of Goldthwaite.

Mrs. Boyd Faulkner spent Sunday afternoon with Mrs. Me Whorter.

Mr. and Mrs. Bill Harmon visited Mr. and Mrs. Joe Spinks Sunday evening.

There was a 42 party at Mr. Newman's Thursday night. They report a good time.

We hope every one made New Year resolutions and stay with them.

Financial Statement of the Financial Condition of the STAR STATE BANK

Table with financial data including Resources (Loans and discounts, Stocks, etc.) and Liabilities (Stock, Surplus Fund, etc.)

LOYALTY

Human relationship require lubrication just as any man-made machine requires it. Friction occurs just as naturally between humans working together in organization as in the springs, levers and wheels of a mechanical contrivance.

The happiness of the child depends on his loyalty to his parents and playmates. As he grows up he must be loyal to his class and school or he becomes a social outcast.

There is no excuse for disloyalty. You may say, "I have lost faith in so-and-so or in this movement." Suppose you have, that does not excuse you.

Membership or participation in anything should be synonymous with loyalty to that thing. Lukewarm interest and half support gain nothing for either organization or member.

COZART -- SIMPSON

Getting a right start for the New Year, Otto Simpson and Miss Ruby Cozart were united in marriage at the Methodist parsonage last Saturday night, January 1, at 8:00 o'clock, Rev. E. P. Neal conducting the ceremony.

The bride was very beautiful in a dress of blonde crepe Romaine with accessories to match. The groom wore a dark blue suit.

Mrs. Simpson is a beautiful and accomplished young lady with a host of friends here. She is employed in the county clerk's office here, where her competency and ability is appreciated by those who have occasion to need work of that nature.

Mr. Simpson, a member of the firm of Brim & Simpson, is a Mills county product, having been reared in and near Goldthwaite. He is a competent business man and his sterling character is attested by the large share of patronage his firm enjoys.

The happy young couple will continue to reside in Goldthwaite, Mr. Simpson conducting his garage business and Mrs. Simpson, for the time being, continuing in the county clerk's office.

The Eagle joins the friends of this popular young couple in wishing for them a long and happy wedded life.

Mr. and Mrs. L. E. Miller expect to leave Sunday for San Antonio and the Rio Grande Valley for a week's vacation trip.

Mrs. E. B. Buffington came in Tuesday morning from a two-weeks visit with her parents in Orange, Texas.

Mrs. E. C. Mitchell, of Brady, visited Mrs. W. O. Holland last Sunday.

Mr. and Mrs. E. C. McGuire and Mrs. Gartman, of Comanche, visited relatives and friends here Sunday.

Mmes. Virgil Jackson and Otis Gardner, of Lometa, were visiting friends in Goldthwaite Wednesday.

Carl Mahoney, of San Saba, spent last Sunday in Goldthwaite.

Will Tippen, cashier of the First National Bank, Lometa, was in Goldthwaite Wednesday on business.

Misses Myrtle and Dorothy Harrison and Jake and Max Harrison attended "Ben Hur" in Brownwood Tuesday. They were accompanied by Miss Addie Smith and Mrs. Haines Harrison.

Mrs. T. E. Todd and children, formerly of Lometa, have come to Goldthwaite to make their home.

Practical Four-Room Plan for That "Castle in Spain"

LAGSTONE terracing, iron grille balconies and a quaint wrought iron lantern give distinction to this little old world one-story house. Rough plaster walls and a colorful tile roof make an attractive exterior that will find a welcome in any neighborhood.

But a carefully designed floor plan is its greatest appeal. One enters from the covered loggia directly into the large story and a half living-room, with its triple-arched windows reaching from the floor almost to the ceiling. The dining room above is conveniently located and well lighted. The kitchen has been deftly planned to give the housewife the greatest comfort and step-saving.

Everything about the house has been planned to give the utmost in utility and real home comfort. The walls and ceilings are insulated throughout with celotex to cut down the coal bills in winter and keep the house cool in the summer. Who could wish for a more beautiful little home.

©. Celotex Insulating Institute, Chicago, 1926.

READY FOR BUSINESS
Our stock is being completed as rapidly as possible and we are anxious to supply you with your needs in the grocery line.

Our stock is fresh and clean and we have the store interior re-arranged so that it is new also. Come to see us.

Yours to serve,

Hog-Dairy Farms: World's Ton Litter Records

World's Record Litter—Poland Chinas (17) from Raleigh's Ideal Farms, Ill.; Interior and Exterior of Their Modern Sanitary Home; Holstein Cows That Furnish Them Skimmilk Milked by Machine.

CHICAGO—Hogs and dairy cows were both profitable to farmers the past year and promise continued returns next year, according to the Research Department of the National Association of Farm Equipment Manufacturers, in pointing out the lessons taught by the world's record Ton Litters. W. T. Rawleigh, Jr., of Illinois, again broke all Ton Litter records with Poland Chinas, following Jenkins Brothers' Indiana record with Duroc-Jerseys. The Illinois litter of 17 weighed up 5,117 pounds at 6 months of age; the 17 Hoosier Durocs broke the scale beam at 4,925 at the same age, each being a world's record at time of weighing. These are the only 2-ton litters officially appearing this year, though a year ago both of these herds won recognition with world's records over the 2-ton mark. There is nothing left to chance; they know what they are doing and can continue to do it with hogs that will return big profits for labor and feed. As both are similar farms in many ways, being larger than the average, with registered stock, the latest type of modern equipment, as well as high class scientifically trained labor, they are worthy of study for the average farmer who wants to succeed with hogs and dairy cattle.

**New England Atmosphere
With 1926 Improvements**

ANY one who has ever motored through the quaint sleepy towns of New England has fallen in love with the small houses that abound in that section of the country—neat, white, unpretentious and with a touch of reserve about them. Just such a house is the one pictured here. It is equally adaptable for town or country, and by merely shifting the living and entrance porches around can be built on a wide or narrow lot without spoiling its architectural.

The house is sturdily built and has an exterior of wood siding except for the unusual stucco panels that start at the level of the second floor windows. The roof is of stained shingles, preferably moss green, in keeping with the window shutters. A house of this compact style is very easy to heat, especially when the specifications call for insulation throughout with celotex, which prevents heat leakage, and keeps the house cool in the summer.

The living and dining rooms are here combined into one large room flooded with light by windows on three sides. The two bedrooms on the second floor each have double exposure and an extra large closet in which a window may be placed.

What the World Is Doing

(As Seen by Popular Mechanics Magazine)

Motor Rider Risks Life on Curve to Win Motorcycle Race

While credit for most motorcycle racing records is due to the drivers, sometimes their helpers and mechanics de-

serve no little praise. This was true in a race in Ireland not long ago. The machines were equipped with sidecars and each carried a passenger. To help preserve the balance in rounding a curve at a high rate of speed, the occupant of one of the cars leaned far outward, hanging to the side of the seat and dash. As the racer roared by, the passenger's head barely missed striking a flag post that had been stuck in the ground to mark the course of the track.

Scientists to Search Sea Jungles in Hunt for Giant Squid

Turning to the sea for one of the most extensive big-game hunts ever organized, a party of scientists from the New York Zoological society seeks to plumb the depths of the Sargasso Sea and other mysterious caverns of the ocean for trace of the giant squid and kindred creatures little known to man. The expedition, headed by Dr. William Beebe, has fitted the 280-foot steamer "Albatross" with elaborate equipment for scientific research, including hooks, dredges, traps, light apparatus, complete photographic apparatus and a radio-broadcasting set, and anticipates a six months' tour. The ship has a cruising radius of 13,000 miles. Short inland trips in remote sections will also be made and collections of bird and animal life will be gathered up shore as well as from the depths of the sea.

Power of Sun Stored by Plants May Solve Fuel Problem

Although their progress is slow and unspectacular, scientists are making dogged attempts to discover a way to make artificial fuels which will replace the diminishing supplies of coal and oil. The process they seek to perform in their laboratories is the marvelous one that nature uses every day in storing up energy in leaves and plants by converting waste material into wood, etc., under the action of sunlight. Solution of the riddle is being sought in California by Dr. Herman A. Spoehr and a staff of research workers. A year's consumption of coal at the present time, represents the accumulation of 100 years, he says.

Protecting Young Trees

Young trees can be protected against cold by means of old inner tubes and casings slipped around the trunks as shown in the drawing. In the case of very small trees the tubes can be slipped right over

the branches, the latter being squeezed together with one hand. The tube is then tied with twine as shown. For larger trees casings may be used, as shown at the right. In the spring the coverings are taken off. After their removal a rubbery odor will be left on the bark, which insects and other vermin dislike.

Reducing Diameter of Stovepipe

Sometimes it is necessary to reduce the diameter of a section of stovepipe when there is not a tinsmith in the neighborhood. However, this can readily be done by anyone at home with materials and tools available almost everywhere. A piece of tongue-and-grooved board, a little longer than the section of stovepipe, is obtained and stuck through the pipe as shown. By means of a piece of flat iron or steel, such as a discarded plane bit or a wide chisel with the edge dulled, and a hammer, the stovepipe is tapped down into the groove as shown in the drawing. The work must, of course, be done gradually from one end of the pipe to the other and the result will be a neat job. If a board of a width to produce the desired reduction in diameter is not at hand, one may be built up of two pieces and then trimmed down to the right size.

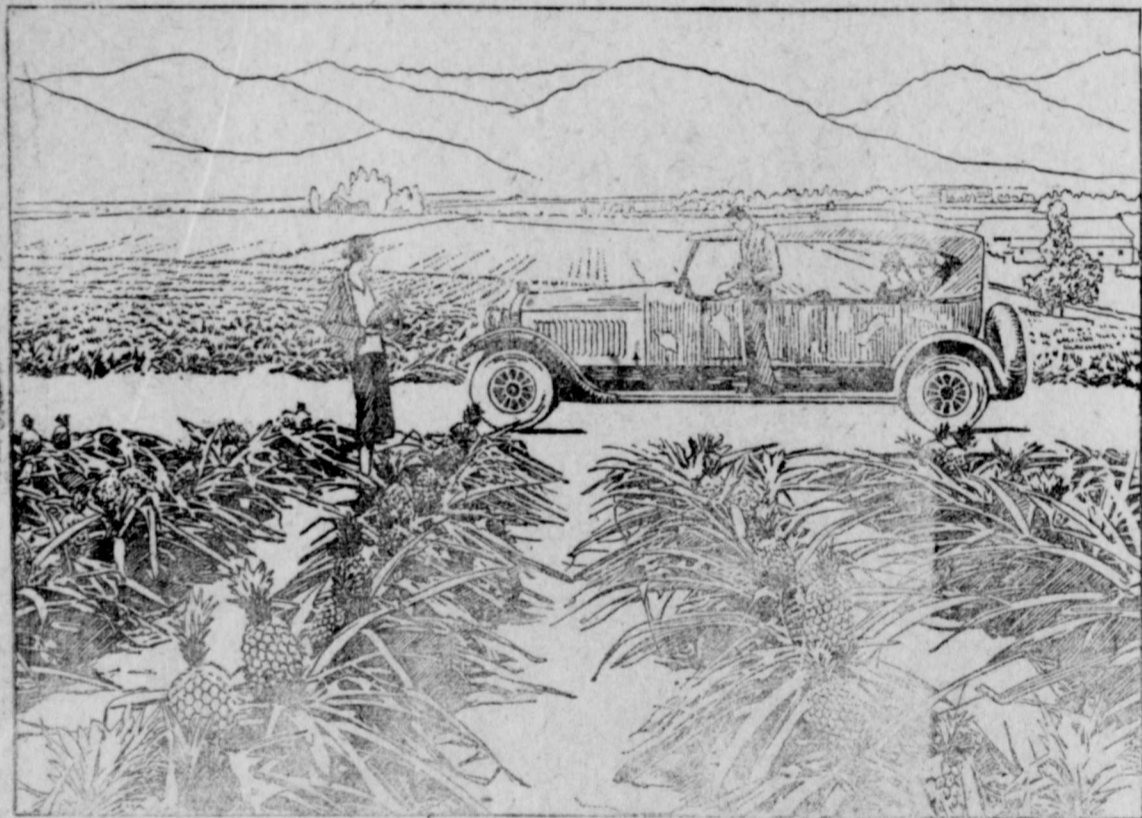

A Razor Kink

To the user of an old-fashioned razor who finds it a nuisance to take it to be honed, or too much trouble to do it himself, a method of keeping the tool in shape may prove of interest. One man has kept his razor keen and sharp for a dozen years, by using a trace of flour of emery on one side of the strop. Merely dip one finger into the emery once or twice and rub it on. Start stropping on that side and finish on the other. When the razor gets a little out of condition do it again. No doubt the treatment will have to be varied a little with different razors, but three or four times a year is usually sufficient.

Advertising on postage stamps has been permitted by the Italian government. The advertisers agree to turn over sixty per cent of their receipts for the privilege.

EXPLORING PINEAPPLE PLANTATIONS A NEW TRIP FOR TOURISTS

NOT so many years ago, pineapple was a fruit for kings. Poets used it as a symbol of rare luxury. Balance a cent months ago, it was a fruit for the masses, and it is now a fruit for the tourists. The enormous growth of the pineapple industry and the novel features of growing and canning this fruit, have made the exploration of pineapple plantations one of the most popular sight-seeing trips for tourists who visit Hawaii.

Besides giving the tourist a view of the endless pineapple fields as they can be seen from the roads, they can be seen from the roads, they can be seen from the roads, they can be seen from the roads.

The enormous growth of the pineapple industry and the novel features of growing and canning this fruit, have made the exploration of pineapple plantations one of the most popular sight-seeing trips for tourists who visit Hawaii.

Besides giving the tourist a view of the endless pineapple fields as they can be seen from the roads, they can be seen from the roads, they can be seen from the roads, they can be seen from the roads.

uninitiated to the richness of pineapple sample some of the most delicious to the shell, since it is this part from which, incidentally, the "pine" in pineapple is named, that is most choice.

A brief glance at the history of the pineapple reveals a most interesting story. It is a native of the South Sea Islands, and it is from there that the Spaniards took the first specimens which were introduced to the United States in 1493.

It is this variety for which Hawaii has become famous, since it is the very sweet pineapple variety. Captain Cook, an Englishman who passed much of the "wonder" of Hawaii, went over and established a modest canning plant there, and began to raise this choice variety.

The fruit is raised by planters who sell it to canners and the farming is done in a modern way with tractors for preparing the soil and plowing, after which native and South Sea Island workers set out the slips and keep them free from weeds. The plants grow from two to three feet in height, with saw-edge spiky leaves, and in eighteen to twenty months after planting,

the fruit is picked dead ripe, a delicious sun-ripened product.

To be at its best, pineapple must be picked thus, when ripened in the field, and since it spoils so quickly to stand shipping when ripe, it is pushed to the canneries and quickly packed into cans so that none of the exquisite flavor of the thoroughly matured fruit is lost.

The canneries are big central plants, in Honolulu and other places. Twice a day, trains laden down with pineapples leave for the canneries, and an illustration of the speed with which they are canned is that of a single Hawaiian canner which puts up in one day 64,000 pineapples.

The Cinnac machine invented by an Hawaiian, peels off the pineapples' hard irregular "shell," sizes the fruit to fit the can, cuts out the core and cuts off the ends, all at the whirlwind rate of thirty-five to sixty pineapples a minute.

An interesting device pours heavy syrup into each can after which they are sealed and passed through long steaming boxes, where they are cooked from seven to twelve minutes. After cooling and storing, so that any defective can will be revealed, the perfect cans are ready for export.

And although the can is opened in the modern kitchen and poured into a glass dish, perhaps, instead of being prepared in the castle on a silver platter to be placed before the king, its rare flavor makes it relished no less than in the days when it was a royal luxury.

What Is a Diuretic?
People Are Learning the Value of Occasional Use.
EVERYONE knows that a laxative stimulates the bowels. A diuretic performs a similar function to the kidneys. Under the strain of our modern life, our organs are apt to become sluggish and require assistance. More and more people are learning to use Doan's Pills, occasionally, to insure good elimination which is so essential to good health. More than 50,000 grateful users have given Doan's signed recommendations. Scarcely a community but has its representation. Ask your neighbor!

CHAPEL PROGRAM

Judge Patterson made a very interesting talk last Thursday morning. He spoke chiefly to the football boys, but we all profited by his visit. He brought a message of encouragement.

Judge Patterson expressed his belief that the Goldthwaite school of this year been the best in the history of Goldthwaite. He urged boys to develop their mental powers along with their physical powers, and so bring about the equilibrium which makes a boy a real, worth-while person. He said: "You must have the spirit to win or die if you make a fool of yourself or a good student."

For this talk, Judge Patterson named the names of those boys who had lettered in football this year. They are the following: Bill Page, Ernest Linkenhoger, Patterson, Oliver Carother Johnson, Millard Evans, Weatherly, Sam Rahl, W. L. Jimmy, Clarence Cave, Bill Ross, Jack Locklear and Rudd.

The boys were given their appreciation of their giving each player a card. Emily Anderson is in the Sanitarium. Miss Muriel Rogers is teaching in her home. Jennie Reta Inman is and Mrs. Earl Fairman is her classes. Barnhill was absent from Monday but came back on Tuesday. Many of the are and we hope soon back. Rhea spent Christmas at visiting B. N. Johnson spent the day.

JUNIOR-SENIOR PARTY

On Wednesday night, December 22, 1926, the Juniors and Seniors met at the home of Mr. and Mrs. John Hester to have a kid party. The house was elaborately decorated with all kinds of Christmas decorations which gave the Christmas spirit to everyone.

The first guests arrived at eight o'clock; they were all dressed like little children. They soon started many games. The hostess distributed jokes to the guests and they were read aloud. This caused much excitement and merriment. The little folks were then asked to form in line. Each was blindfolded and required to pin the tail on the donkey. There was much interest displayed over this. Euna V. Brim succeeded in winning the prize which was a barometer with the picture of a donkey on it. There were various other games played. The exciting game of the evening was the birthday month contest. The guests grouped themselves in twelve sections according to the month of their birth; each section represented a month. They then devised a stunt by which their audience might identify their birthday months. Several amusing exhibitions were given. First prize was awarded to May, and honorable mention was given to April by the judges; Mrs. Newton, Mrs. Barnhill and Miss Kerfoot. The prize that was given was a jar of candy which was divided among all the "May flowers", who were Mina Steen, Horace Cook, Billy Bigham and Gaylord Mullan.

There was also a fruit contest in which Sam Henry Rahl won the first prize, a little doll. When all the games had been played, everyone sat down in the floor and waited patiently for Santa Claus to come. The tree, which was the center of attraction, was standing in one corner of the room. Soon Santa Claus

CHAPEL PROGRAM

Wednesday, December 23 the program for chapel was unusual. A two act play was given by five of the high school boys. In Act I the setting was in a boys' dormitory in college. The time was almost any time. Act II was on the college campus.

The cast was: Studious Sam, Sam Rahl; Love Lorn Lonnny, Bill Page; Broken Hearted Bill, Bill Stephens; Triumphant Tommy, Ernest Linkenhoger.

The girl: Granville Barnett. Mrs. Bill Page furnished the music. Broken Hearted Bill and Triumphant Tommy were in love with the same college belle. She was a very graceful Miss, and was elaborately dressed. However she wore a heavy veil. Surprise and fun came at the last when Triumphant Tommy raised the veil and exposed the face of Granville Barnett.

Monday morning the student body greeted Mr. Newton with smiling faces. Vacation is over and everybody seems to be willing to "hit the ball" from now on until school is out.

The Sophomore Class had charge of the program at chapel. G. H. S. Song—Student body. Reading—Virginia Ruth Rudd. Vocal solo—Mrs. Sam Sullivan.

came and gave each child a present. They were dolls, tops, horns, carts drawn by donkeys, and all kinds of toys which children enjoy. Two lines were then formed, the boys in one and the girls in the other. Misses Newton and Anderson led the grand march, and in this way partners were chosen for the refreshment course. After this all left, bidding the host a merry Christmas and a happy new year.

NEWS BRIEFS

Gladys Rose spent Tuesday in Pleasant Grove. Kathleen Keese spent the Christmas holidays in Graham, Texas. Beulious and Eulois Doggett spent part of the Christmas holidays in Pleasant Grove.

Many of the ex-students are home for the holidays. The following have visited the High School: Nora Virden, Opal Philen, Al Gray, George Brown, Vivian Camp, bell, Anna Laura Brown, Ruth Featherston, Cecil Parker, Ruth Parker and Norma Lee Robertson.

VACATION OVER

There are no idle students this week because mid-term examinations are given at the end of the first term and cover all the material that has been studied since September. (The questions are representative ones that test the student's knowledge in each subject.)

Hardy McCary spent Saturday in Big Valley. Several new pupils enrolled in school Monday.

ENGLISH LITERATURE NOTES

The English Literature class has been studying figures of speech. Not a member of the class can now read a poem without appreciating the metaphors, the similes, the personifications, and other figures. The pupils as a group, however, have been most interested in allegories and fables. A fable written by one member of the class is printed below:

Long, long ago there grew in a large garden many wild flowers. Some were large and some were small. Among these flowers grew a thistle and a small, white daisy. The thistle was tall, had large, green leaves, and bore beautiful white flowers. Its body was covered with sharp thorns. The daisy grew by its side. It grew on a very small stalk, had very small leaves and bore small white flowers. It was easily seen that the thistle was the better dressed and more beautiful of the two. The thistle was very proud of its height and of its large leaves. So it scorned the small daisy that grew at its feet.

One day a man came into this garden of flowers, and seeing the thistle, stopped to admire it. The thistle was proud of the fact that it had attracted attention, so it touched the daisy with one of its leaves so that it might see the man admiring it. The man reached out his hand to gather the thistle and was stuck by one of the sharp thorns that grew on the stem. He became angry because the thistle had hurt him and threw it on the ground. As he did so he saw the daisy, so he stooped and gathered it and it did not hurt him for it had no thorns. To this day the daisy ranks among the first in the admiration of man, and the thistle is the most scorned.

Moral: The one that attracts the most attention is not always the one that is most respected.

ONCE THERE WERE TWO BOYS.
