

Goldthwaite Eagle

VOLUME THIRTY-FIVE.

GOLDTHWAITE, MILLS COUNTY, TEXAS, FRIDAY, JANUARY 11, 1928.

NUMBER NINETEEN.

CHEESE FACTORY BUSINESS INCREASES

Each month sees steady increase in the quantity of cheese produced by Mills County Cheese and Butter Company. Since opening for business about the first of November this factory has demonstrated its ability to meet all conditions of competition and climate and has been growing steadily.

At fifty cents per pound—the price being paid—a farmer can make good money by milking ten or more cows. In fact, his income will net around \$150 per month. This is steady, all year, income and does not depend upon the boll weevil or dry weather.

Good cows, real milkers, are a necessity in order to make money selling milk. If you haven't good milk cows and don't have the money to buy them, the Trent State Bank will finance you. There are dozens of farmers who live within a few miles of Goldthwaite who are geographically situated for the economical marketing of dairy products who should grasp this opportunity of financial freedom by converting their ranches into dairy farms.

POULTRY STOCK STAGES A RAPID COME-BACK

Aspermont.—It pays to feed poultry an egg laying ration. Oscar Vandervorth of Old Glory knows this to be true for he tried to get along without such as mash last summer when eggs were cheap and saw his flock of 392 hens shrink from a big spring egg production to a point in August and September when five or six eggs was considered a day's work by the flock. At this juncture the county agent, Fred S. Reynolds, came to the rescue. Mr. Vandervorth enrolled as a demonstrator, the flock was vaccinated; the two houses equipped with dropping boards, roosts, nests, feed hoppers and water containers; and the flock put on a laying ration again. By the end of October daily egg production had increased to 100 eggs and a month later the flock averaged 160 to 165 eggs per day. Two-thirds of the flock is mixed, but due to careful culling of old hens, good daily management and feed, and marketing through the Central West Texas Poultry Association, Mr. Vandervorth is making such a success as to be visited by others who wish to learn his methods.

The poultry flock demonstrators, twenty in all in Stone-wall County, are observing these suggestions promulgated by Mr. Reynolds: 1. Provide dropping boards and roosts; 2. Have feed hoppers and water mid-afternoon in house or pen nearby; 3. Keep birds until to force the eating of an egg-laying mash; 4. Keep hoppers supplied with a first class mash at all times; 5. Rid birds of lice by dusting them with sodium fluoride; 6. Paint roosts and dropping boards with carbolineum to kill all mites and blue bugs; 7. Worm the flock properly for round worms and tape worms.

John W. Roberts the other night ran his car into the concrete wall, trown on the square and wrecked his car pretty badly. Mr. Roberts suffered a cut on his hand which has caused considerable trouble.

PLEASE RETURN

The Study of the Methodist pastor of this place was entered and from it was taken a Bible in which the pastor has placed outlines of certain books of the Bible upon which he has spent much time. These would probably be worth nothing to any one having the Bible and worth much to the pastor. If the person having the book will return it to his study or the Eagle Office he will receive a new Bible gratis and no questions asked.

NORA VIRDEN DEAD

Miss Nora Virden, daughter of J. J. and Mrs. A. C. Virden, was born June 23, 1909 and died January 3, 1929, age 19 years, 6 months and twenty days. When about eleven years old she was converted and she joined the Methodist church at Pleasant Grove. In 1920 her membership was transferred to the Methodist church at Goldthwaite where she was a consistent and useful member until God called her from the church militant to the church triumphant. She was loyal to her church and stood ready to any call of duty. Her Bible was her companion. Each day she read it and her beautiful life was in no small measure the result of it. She was always faithful. Her faithfulness in her studies was rewarded by her high marks in her work, where she always ranked high. She graduated at the high school at Goldthwaite in 1926, the following year entering the John Tarleton College at Stephenville and being placed on the honor roll there. At the time she was taken ill she was teaching school at Pleasant Grove and was doing satisfactory work there. She was reared in that community. From that community has come some very good material and power to the church at Goldthwaite. I hope that it will continue to be the great and good community that I hear it is. She was a product of a good Christian home in a good community. She was of an unusual home; the father, five sisters, two brothers, two sister-in-laws, and two brother-in-laws are all consistent members of the Methodist church.

The funeral services were conducted by her pastor at the Pleasant Grove church amid indelible weather conditions but was impressive though not as being the end of a beautiful life, but the transferring of a character to a land where future development and activity will continue in the presence of the Father of us all.

The family and the loved ones have our prayers and know how to look to Him who is ever ready to help.

The church sustains a loss but in having known her and the faith of meeting her in the church triumphant. May we remember her life and be inspired to greater things?

Her Pastor,
S. D. LAMBERT,
Goldthwaite, Texas.

Mr. and Mrs. Dutch McKenzie spent last week-end in Galveston.

Miss Leona Pass spent last Friday in Brownwood.

BAPTIST CHURCH

A question of importance was propounded to this preacher a few days ago—one that all church going people are interested in.

"What should the pastor's relation be toward the Sunday School?"

Doubtless a layman could answer that question better than a preacher. There is a relation and one that should be of vital importance. The pastor that is not out and out for his Sunday School to my way of thinking will certainly be changing pastorates, and rightly so. Personally I am for the Sunday School, and a "Standard" one where it is possible. I give you my reasons. The standard school insures you of a better organization; it also enlists and enlightens more workers for the teaching organization of the church. I do not believe that the pastor should maintain a "domineering" attitude over the Sunday School. He must remember that there are others that may know more about Sunday School work than himself. I feel that the pastor, officers and teachers should feel free to offer any suggestions and manifest a spirit of cooperation with each other for the development of the school. I also think that any member of the Sunday School should feel free to offer suggestions.

I have never been very strong on the pastor teaching a Sunday School class. It is true that many of them do, and they are successful. I will give two reasons why I think that the pastor ought not to teach a class when possible for him to avoid it. First, a preacher should be able to give his congregation the best message possible every time he goes before them, and for him to do that it requires no little time and thought. This age demands of the pulpit thought, accuracy, power and brevity. It matters

not how much time a preacher may have given to his message during the week, to do his best on Sunday in the delivery of his prepared message, it is absolutely necessary that he spend at least thirty minutes in private devotion just before going into the pulpit. He also needs all of his energies, both physical and mental, concentrated on his message.

The second reason I give. There are numbers that are likely to be as capable of teaching as the pastor, and why should the pastor want to take all the joy and credit for building a Sunday School? The more you can get to take a definite part in the Sunday school work the better the Sunday School will be. We have a good Sunday School at the Baptist church, and we are going to have a better one. But the Superintendent, teachers and other officers are going to make it better. The pastor is going to get behind and push. I believe that I can push more than I can pull.

I have a question for the gentleman who asked me the one I have been discussing. "What is the Superintendent's relation to the Sunday School?" Will he answer the question or have another superintendent of this town to do it? If the answer cannot be obtained from the above mentioned, let one of the preachers answer it. I am for a better and larger Sunday School for every church in town.

The Baptist church gave \$300 to Buckners Orphans Home during the month of December. Let every member remember that our goal for home expenses is \$3600 or \$3000 a month. Let's keep right up. Just remember that it is easier to keep up than to catch up.

Go to Sunday School and stay for church next Sunday. "There will be no regrets."

—G. C. IVINS, Pastor.

HISTORY OF SCOUTING

The story of Scouting reads like a fascinating novel. But unlike the plot of a novel, the scene of scouting is laid in interesting facts. It had its inception back in the days of the Boer War in South Africa. Confronted by the serious problems of trusty means of communication between army posts Robert Baden-Powell, then an officer in the British armies, conceived the plan of using young men and even boys in carrying dispatches. When the war was over he returned to his native England. There he was brought into intimate contact with the boys of his homeland. Thinking about them he foresaw in them the possibilities of men of Empire. Over a period of years he thought of plans for training them into outstanding citizens of England. During those years his confident and helper was his mother with whom he discussed all his plans. It was Mrs. Powell who encouraged her warrior son in his plan for training the boys of England to become leaders in the civic and commercial and political life of England. The result of his thinking is the great Boy Scout program that is now accepted by leadership program in all the great nations of the world and in dozens of smaller principalities. In Siam, the Soudan, Turkestan, China, the Balkan States, as well as in the European nations and among the countries of the Western Hemisphere Boy Scouts are known as the future builders of empire.

The advent of scouting into the United States is romantic. Nearly a score of years ago William Boyce Thompson, publisher of the Chicago Ledger and Saturday Evening Blade was a visitor in London. Lost in the streets of London he was compelled to ask a British boy the way to a certain hotel. The boy not only volunteered to

DOES IT PAY?

A net profit of \$25 to \$30 was made on the J. W. Johnson farm in Jackson County by the use of 200 pounds of 12-4-4 fertilizer on a demonstration acre of cotton. The county agent, cites this as typical of other fertilized demonstrations, reports 842 lbs of seed cotton from the first picking on the demonstration acre as against 338 pounds from the unfertilized check acre.

tell the way but offered, and did, accompany Mr. Thompson to his hotel. When he arrived at the hotel Mr. Thompson thanked the boy and offered to tip him. The boy politely refused the tip. Surprised, Mr. Thompson asked him the reason. The boy told him he was a Boy Scout and that he could not accept pay for doing a good turn. Mr. Thompson was so impressed with the boy's behavior that he proceeded to find out about the thing. He came in contact with Robert Baden-Powell. When Mr. Thompson returned to the United States he associated with him some of the outstanding public men of the nation and with them developed the program which has become the Boy Scout program in this country. The movement was incorporated February 8 1910.

In recognition, not for his military services, but for his services to the British Empire as the founder of the Boy Scout program Robert Baden-Powell and is today known as Sir Robert Baden-Powell. There is no man more universally loved by the boys of the world than is Sir Robert. His plan born in war days has become the best known peace program in the world. It is recognized by the League of Nations as the outstanding program for the development of world peace and Boy Scouts everywhere are being taught the honor and nobility of righteous peace.

Mr. Thompson and his associates incorporated the scouting program they developed. Within a few years the work had grown so rapidly that the leaders realized the value of securing a greater charter for the organization than that then existent. So with the assistance of a number of influential men in Washington, D. C., a bill was prepared and presented to Congress. This bill was passed by Congress and the old incorporators were granted a Charter by Congress on June 15, 1916. Only two other organizations in the United States operate under such a charter. These are the American Red Cross and the Near East Relief. The later organization will surrender its charter shortly after its work is done. That will leave only the Boy Scouts and the Red Cross operating under that special privilege, namely, a Federal Charter.

NEW ARRIVAL

William Burrell Johnson arrived at the home of Mr. and Mrs. Jack Johnson January 2, 1929. The little fellow seems to be happily located, and his grandparents, Mr. and Mrs. R. E. Ross, seem to be very proud of the little fellow.

WORK PROGRESSING ON TEXAS-LOUISIANA POWER CO. PLANT

Work is being pushed on the new \$125,000.00 power plant and ice factory for the Texas-Louisiana Power Company. Concrete for the base is being run, a crew of twenty-five or thirty workmen and engineers being busy at this.

It is the plan of the Texas-Louisiana Power Company, according to Mr. Barnett, local manager, to build a modern plant which will take care of the needs of Goldthwaite for years to come. The present equipment is being taxed to the limit to supply the necessary amount of current and considerable addition power would be used were it possible to supply it.

In addition to the power plant there will be built an ice plant adequate to supply this trade territory. This ice factory will mean hundreds of dollars in wages which have heretofore been spent elsewhere will be released in Goldthwaite.

When the power plant is completed rebuilding of the entire outside construction of the Texas-Louisiana properties will be done. It is the present plans to place all poles and lines in the alleys. This building will enable the power plant to function at the maximum efficiency.

THE ROYAL CAFE ENLARGES KITCHEN

Skillets and dishes gave way to hammers and saws last week when W. F. Brim, manager, decided to re-arrange the kitchen at the Royal Cafe. The kitchen has been made to extend practically across the back of the building, making it more convenient for the cooks to work.

"Continued growth in business," Mr. Brim stated, "made it necessary to have more room in my kitchen, and it is my intention to give my customers the best service possible."

The enlarged kitchen adds much to the looks of the cafe, and Mr. Brim invites his patrons to thoroughly inspect it.

MORE THAN BALE TO THE ACRE YEARLY

Stanton, Texas — A three year record of more than a bale and a half of cotton to the acre each year is held by a Brazoria County 4-H Club boy, Albert Novak of Danbury. In 1926 he made 774 pounds of lint, 830 pounds in 1927, and last year 1031 pounds. His net profit from the acre in 1928 was \$257.31 and due, so his county agent says, to fall plowing, an application of 400 pounds of 18 per cent superphosphate, shallow cultivation, field selected seed and the use of calcium arsenate and sulphur to control the weevils and fleas.

Clarence Herrin and Gerald Elliott of Fort Collins, Colorado are visiting Miss Leona Pass of this city.

Mrs. P. H. Hamilton is in San Antonio, where she is taking a beauty culture course.

F. N. Erwin is still very sick from the effects of a relapse of the flu.

W. F. Brim was in Waco Wednesday on business.

"IN THE CONGRESSIONAL NURSER"

JOHANSSON GAGES INSURE PERFECT PARTS IN NEW MODEL A CAR

A million axle shafts, each one exactly like the 999,999 within one thousandth of an inch—four million pistons fitting four million cylinders with degree of exactness that all but staggers the imagination—many more millions of drilled and threaded holes, all placed with an accuracy of location that is incomprehensible to any but the mechanically or mathematically minded—and all these factors, combined with other millions of parts manufactured in widely separated units of a gigantic plant, meeting on an assembly line to fashion a million automobiles! This is the miracle that is modern mass production, the miracle that was conjured up by Mr. Henry Ford when he started his first automobile assembly line.

The story of how it is possible to make a million—or ten million, or twenty million, for that matter—of any machine part, each one identical with all its fellows, is a story of measurements. Just as that story of measurements explains the ability of the Ford Motor Company to produce fifteen million Model T automobiles, it also explains Mr. Ford's ability to produce the Model A in the same parts and by the same methods that made possible the pioneer Ford cars, yet at limits that are from one-fourth to one-half what they were on the Model T.

Today, in the Detroit plants, mechanics who have never before looked through the eyepiece of a microscope are measuring within limits too fine for any unaided eye to see. Model A parts machined to within one ten-thousandth part of an inch accuracy are all in the day's work. Back of this precision are something like a gillion gages that must be kept in correct adjustment at all times, any many thousands of these gages are in constant use throughout the Ford plants. There is no time for hand-fitting of inaccurate parts on the assembly line. They must either fit the first time or they are valueless. Therefore, the parts must leave the various machines which fashion them with every specified dimension correct. The result is that when put together, the car moves off the assembly line under its own power, a complete means of transportation requiring no special adjustments.

There are inspection and working gages to measure outside and inside diameters, lengths, widths, heights, angles, pitch diameter and lead of screw threads, which are in the hands of workmen throughout each day, testing and checking each part as it passes from machine to machine through the plant. But these gages will wear or get slightly out of adjustment under constant use, therefore they must be constantly watched. So behind them must be master gages, the product of C. E. Johansson Division of the

Ford Motor Company, are accurate within a millionth of an inch!

Throughout the Ford plants inspectors are moving constantly, each with special hardened, ground and lapped rectangular steel blocks—Johansson Gages. These gage blocks are in special sizes to meet requirements of the workman's scrutiny; making it unnecessary for inspectors to make up combinations to measure different dimensions of length. A set of 81 gage blocks, such as is used in the tool rooms, can be combined to measure 120,000 different size lengths, from three-sixteenths inch to over twelve inches, and each of the 120,000 combination gages represent a variation of one ten-thousandth of an inch.

On some operations where the limits are close, the gages are changed every two or four hours to correct the wear of one ten-thousandth part of an inch which occurs in that time. Others are adjusted or changed at less frequent intervals, as frequency of use and amount of wear dictates.

In addition to their use in the production of Ford cars, trucks, airplanes and Lincoln automobiles, the Johansson gage blocks are the standard of the world for industrial precision measurement of length.

COULD YOU HAVE BELIEVED IT?

If you positively knew you could have \$500.00 cash, a thorough business training, a good position and seven months experience if trained in a Byrue Commercial College again—no cash, no job or experience if trained in another school, which would you choose? The answer is easy, but how are you going to convince yourself that a Byrue Commercial College has these great advantages? Here's how: Ask three students that have graduated in the combined course of bookkeeping and shorthand in any other school if twelve months

is not a fair average time to graduate in a school teaching Gregg Shorthand and 20th Century Bookkeeping, then ask three who have graduated in a Byrue Commercial College in the Famous Byrue Shorthand and Bookkeeping if four and one-half months is not a fair average time to graduate. Also get the catalogues of other schools and Byrue's and compare their course of bookkeeping and Shorthand and time required with Byrue. The Byrue student graduates in four and one-half months, and the other in twelve months. Time saved by Byrue, seven and one-half months. Put the time at a low salary and you would have earned from \$500.00 to \$700.00, and by the use of the famous Byrue Shorthand and Bookkeeping taught exclusively in Texas in the three Byrue Commercial Colleges under the direction of the author you have been given the most modern, thorough, practical training to be had in seven and one-half months less time, and you will have seven and one-half months valuable experience and a good position.

Business men prefer Byrue trained office help. Byrue trained students are holding the most responsible bookkeeping, shorthand, secretarial, and accounting positions at the best salaries, in the large cities where business is found. If you can secure and hold the best paying positions with four and one-half months training why spend twelve months in some school not permitted to teach the famous Byrue system? Byrue scholarships are sold under a money back guarantee. Get the Byrue bookkeeping and shorthand in one-half the time and one-half the cost of others. Byrue Colleges operate three free employment departments for the placing of all graduates. Write for catalogue today. Investigate, you are entitled to the best. Byrue Commercial College, Dallas, Houston, San Antonio. H. E. Byrue, President.

BRACKWELL MOTOR CO.
BROWNWOOD, TEXAS

Simplicity of cooling system is a feature of the new Ford

A COMPLETE water plant is a part of every automobile as it is a part of every modern city.

The purpose of this water plant is to keep the engine cooled to a temperature that will make it efficient in operation. If it were not for this, the cylinder walls would become overheated and the pistons refuse to operate.

The cooling system of the new Ford is particularly interesting because it is so simple and reliable.

When the radiator is full of water, the engine of the new Ford will not overheat under the hardest driving. Yet the water is so regulated that it will not impair engine operation by running too cold in winter.

The cooling surface of the Ford radiator is large, with four rows of tubes set in staggered position so that each receives the full benefit of the incoming air. The fan is of the airplane propeller type and draws air through the radiator at the rapid rate of 850 cubic feet per minute at 1000 revolutions per minute of the motor.

The hot water around the cylinder head is drawn to the radiator to be cooled by a centrifugal water pump of new design.

The entire cooling system of the new Ford is so simple in design and so carefully made that it requires very little attention.

The radiator should be kept full, of course, and drained once each month so that sediment will not collect and retard the free passage of water. In cold weather, a reliable anti-freeze solution should be added.

As owner and manager of this important water plant you should also see that the water pump and fan shaft are properly lubricated and the packing around the pump shaft kept in adjustment.

Hose connections may also need replacement after long service. For those little adjustments, it pays to call on the Ford dealer.

He works under close factory supervision and he has been specially trained and equipped to do a thorough, competent job at a fair price.

FORD MOTOR COMPANY

Save time stamps trouble and delay

You can buy a radio set, sight unseen, but you cannot get such values as we offer, right here in town with prompt, friendly attention and service.

And when you buy an RCA Radiola from us, you see it, hear it, TEST the very set you select.

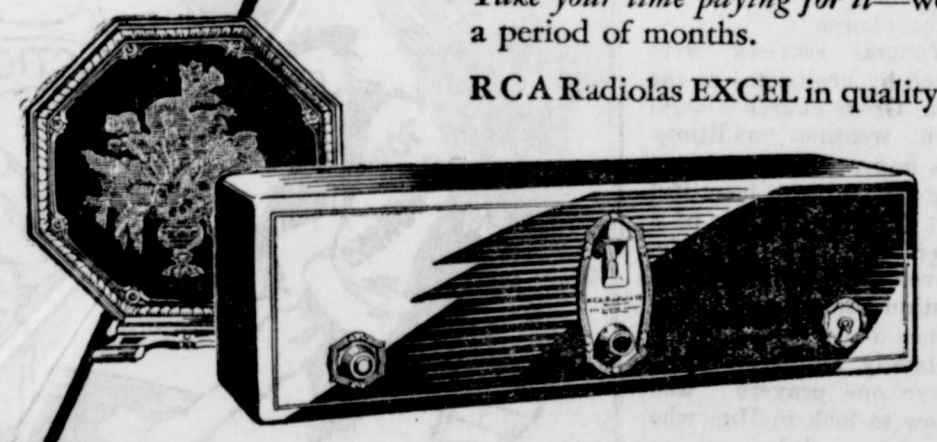

No guess work—and a critical family or friends to comment disparagingly on it.

You KNOW you are getting the greatest value in radio, for Radio Corporation of America is the greatest name in radio.

We have an RCA Radiola at YOUR price—any price you want to pay from \$82.75 up. And every model is a FULL 100 cents value for every dollar you spend.

Take your time paying for it—we extend the payments over a period of months.

RCA Radiolas EXCEL in quality. Come in and hear them.

Goldthwaite, Texas

**COUNTY AGENT
REVIEWS WORK**

The 1928 report of County Agent W. P. Weaver to the Extension Service is interesting and shows progress along many lines. The following gives some of the high spots in the report.

He reports ten community clubs and 11 organized 4-H clubs; three Junior judging teams trained; 307 visits to 28 farms; 135 telephone calls and 135 office calls relating to extension work; 411 letters written and 260 bulletins distributed.

The report shows 5 methods and 16 result demonstrations in soil improvement involving 80 acres; 17 result demonstrations with cereals; 6 method and 19 result demonstrations with pecan and orchard trees.

The number of sheep, goats and dairy cattle has greatly increased in 1928 as was the number of farms starting with sheep and goats for the first time.

The County Agent gave 38 terracing demonstrations and reports 106 farms terraced with the assistance of 5 groups of farmers that have been trained to operate the level.

The 4-H Club work made splendid progress during 1928. Eleven local clubs with a membership of 108 boys and 76 girls held 46 meetings. The local clubs raised funds to send 16 boys and girls to the A. & M. Short Course. The business of Goldthwaite gave two trips. In the County Judging Contest, Catherine Duren won honors in poultry and Ray Duren in Dairy judging. J. B. Lewis and Tommie Graves represented Mills County in the Club Congress at the Short Course.

Bill Hendry, Chester Head, Howard Blackwell of Center City, Ray Duren and Burton Leverett, Lake Merritt, won trips to the Dallas Fair on grain judging.

December 8th was Achievement Day and the entries show 41 pens of poultry and 14 pigs. Lee Hendry, Center City, won first and the championship with his Duroc gilt. Winifred Duren of Duren won first on her Poland China gilt.

Selma Cornelius, Center City, Catherine Dellis, Trigger Mt.,

won honors on pen and single entries in the poultry department.

It will be remembered that five 4-H clubs placed booths at the County Fair.

The county is now busy with plans for a successful 1929 program.

**MULLIN NEWS NOTES
(Mullin Enterprise)**

Hoyt Williams of Marshall is temporarily bookkeeper in the First State Bank, while Miss Birdie Burkett takes a vacation.

Hoyt formerly worked in the bank here and is really at home.

C. R. Dudley, prosperous ranchman of Democrat, was looking after business here Saturday and ordered the Enterprise.

Mr. and Mrs. W. C. Preston and family and father Boland Tyson were recent visitors in the Mrs. Presto home in Brownwood.

Ford Leineweber if foreman of a Santa Fe section at Ogles, Texas. Ford is an experienced man and has hosts of friends here who are pleased to see him progressing.

Lawrence McKinney of the Luling oil fields, is visiting home. Mrs. McKinney and her children here are seriously ill.

Mrs. Addie Pyburn was called to Eola Sunday on account of the illness of Jess Queen's and Osburn Pyburn's families.

Miss Beulah Smith, efficient night operator of the Southwest Telephone Company, is convalescing from an attack of Flu.

Mrs. W. A. Henderson, the efficient Rural Telephone operator is now a victim of the Flu.

A. G. Gregory, Jr. was called to Brownwood recently on account of the serious illness and death of his father.

J. B. Applewhite has returned home from a pleasant visit in the home of her daughter, Mrs. J. T. Allen in Brownwood.

Mrs. B. I. Lawson of Duren visited in the home of her son in the Lake Merritt community

the past week.

Pete Weston and Miss Flowlers Lindsey drove to Brownwood Sunday afternoon to see Miss Loraine Neill.

W. S. Kemp and family and E. A. Kemp are Flu patients.

Five members of the Will Spinks family have the Flu.

A. H. Daniel received a message the 4th of January that his younger brother, Rube Daniel, had died in the hospital at Crockett January 4th due to Flu complications. Only a few days ago Mr. Crockett's aunt died at Crockett. His many friends extend deepest sympathy in this double bereavement.

George Burkett and family and John Burkett spent the week-end at Bend, in San Saba County.

Mrs. J. L. Farmer is one of the Flu victims this week. She has been very sick for the past few days.

Francis Leineweber is on the sick list.

Mr. Jarrett is sick at the home of his daughter, Mrs. J. W. Ratliff. His condition is considered serious.

Mrs. Amos Green is reported very ill with an attack of pneumonia.

Little Joe Boland of Zephyr was a recent visitor of his grand parents, Mr. and Mrs. D. J. Locket.

M. S. Savoy is at home from Daniel Baker College convalescing from an attack of the Flu.

D. B. Eaton, a pioneer citizen of Mullin and who has been

in business here longer perhaps than any man in town, is able to be back at work in his barber shop.

D. B. Lindsey was a Brownwood visitor Monday.

M. E. Casey shipped a car of cotton seed to Brownwood last Saturday.

Swan Roberts shipped a car of cattle to Fort Worth Monday.

J. H. Randolph received a car of cotton seed cake Friday.

Misses Petsick and Scott were Goldthwaite visitors last Monday afternoon.

The grandson of S. S. Price has been critically ill and was carried to the hospital recently at Brownwood.

Sam Renfro of Zephyr was transacting business here last Monday.

Homer Keating has moved from Lometa to the Randolph home on 6th Street.

J. M. Kuykendall, prosperous farmer of Blanket Springs, was in town Monday. He said they all had the flu, but that they were improving.

Little Dorothy McCown has been quite ill for several days.

PEUGH-HARRIS

Miss Bernice Harris and Mr. Franklin Peugh were married at the groom's home in Higgins, Texas, Saturday, December 22 at 10:30 a. m., Rev. Preston officiating. A wedding breakfast was served immediately after the ceremony, then the happy couple left for their honeymoon to visit the bride's relatives and friends at Waco and Rev. H. E. Moreland at Goldthwaite, after spending a short time in Oklahoma City.

The bride is a charming young lady of the Methodist Home at Waco, Texas, which we are proud of. She had been with Rev. Moreland several years as a helper in the summer revivals and they feel that they made no mistake in selecting her, as she made many friends by her loving and sweet way she had in meeting them at Goldthwaite and San Saba county, where she went from place to place working in the meetings.

Mr. Peugh is a son of Mr. and Mrs. William Peugh of Higgins, Texas. He came to the Moreland home a stranger, but left with a deep friendship with them.

The friends of Miss Bernice wish her and her companion a long and happy life.

**We now cover
DUNLOP
TIRES
with this
SURETY
BOND**

NO tire guarantee ever offered can compare with this new Surety Bond, backed by Dunlop AND the American Surety Company.

It is blunt. It says: "Your tire will run perfectly for 12 months or we stand the gaff."

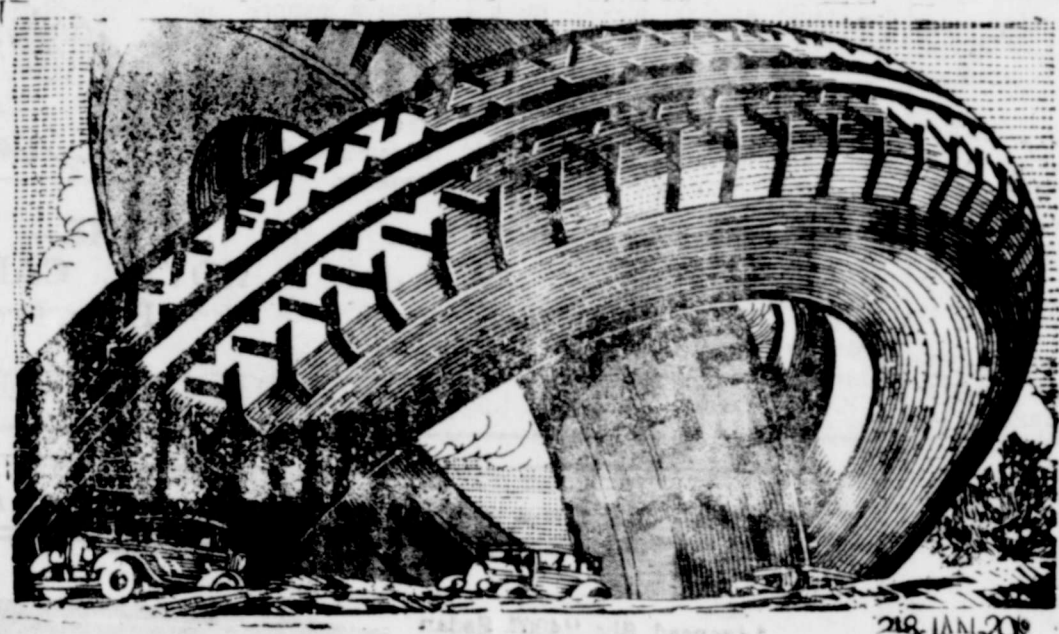

No matter whether failure is due to accident, or collision, or blow out, or misalignment, or stone bruise, or road-cuts, or rain-smash or side-wall injuries, or tube pinching, or valve-trailing, or faulty toe-in, or under-inflation. We will either repair it free of charge or you get a new tire at reduced price.

Of course, we offer this Surety Bond only with genuine Dunlop tires. They are the only tires that are built strong enough and fine enough to make possible a Surety Bond, especially one as liberal and sweeping as this is. Come in and read a copy.

Dunlop's new Winterized Tires are in stock... This show away with Cheats

CORRECT—ATTEST:

J. W. Arnold, W. D. Miller, J. E. Peck.

ROCK SPRINGS
By Busy Bee

Brother Jackson Sparkman preached Sunday morning to a small crowd.

There is still lots of sickness in this community.

J. F. Davis and wife spent Sunday in the J. T. Robertson home.

Dwight Nickols is working for Otis Hutchings at Center Point this week.

Miss E. W. McNutt returned home last Thursday from San Angelo.

B. D. Forehand spent Monday night with his parents.

Douglas Robertson of Lake Merritt visited J. T. Robertson and family Sunday.

Paul Shipman moved to the Walter Weatherby farm last week.

Bro. Sparkman and wife and R. C. Webb and wife dined in the McNutt home, Sunday.

Mrs. Eula Nickols visited in the Robertson home Sunday afternoon.

Mrs. J. C. Stark was called down to the Smith brothers at Bull's Creek Sunday afternoon as some of them were sick.

Jno. W. Roberts and wife were our telephone operators Sunday.

Miss O'leta Daniel was able to go back to her school, Sunday.

We are glad to report that Ashley Weathers was able to come home last week. We hope he continues to improve.

Glenn Nickols visited in the Joe Roberts home Monday.

Will Stark fell from a tree last week, hurting himself pretty badly, however he is up at this writing.

Quite a bunch visited the oil well Sunday afternoon.

Ray Stark, who is teaching school at Norton, Texas, opened school again Monday.

Jack Robertson had special business in Center Point Monday.

Mrs. Abijah Stark spent Friday night with Austin Whitt and family in Goldthwaite.

Mrs. Eula Nickols spent Monday with her daughter, Mrs. Homer Doggett, in the city.

Jack Robertson went to Big Valley Tuesday.

Our community extends sympathy to Jack Virden and family of Goldthwaite for the loss of their daughter.

Miss Ethel McClary, who is in Ranger under treatment of doctors, will soon be able to be with us again.

Mr. and Mrs. Joe Davis spent Saturday night with J. C. Stark and family.

Miss Johnnie Belle Circle is going to grammar school in Goldthwaite since Christmas.

The drillers found the well to be a very dry hole.

The local news in the Eagle was really newsy last week. We like to keep up with people we know.

Otto Roberts keeps hauling wood to the city.

We hope KGKB will let us know when they put on their first program.

LIVE OAK
By the Happy Kid

It has been quite a while since I have seen any news from this community, so I will drop in a few items.

Our school is progressing nicely. There are only a few present, due to the fact that the flu is raging in our community.

Miss Edith Wilkey is on the sick list with the flu.

Lydia Mae Kight spent last Monday night with Nonella Lee.

Miss Addie Mae Templin has quit school here, having moved to California.

Mr. Floyd Reamer, Rouse and Henry Davis visited in the E. E. Franklin home last week.

J. D. Kight has gone to Midland, Texas to work.

Mrs. D. A. Smith and children returned to Dallas Monday night, after a visit here with home folks.

Will Urbach has been real sick this week with flu.

COMMUNITY CLUB RALLY
JANUARY 16

A Community Club rally, sponsored by Farm & Ranch, will be held at Goldthwaite on January 16th. All clubs, P. T. A. and Civic organizations are requested to send delegations.

The meeting will open at 10:30 for the following program:

10:30-10:45—Song Service; Invocation Methodist pastor.

10:45-11:00—School and the Four-Square Plan—L. E. Patterson, County Supt.

11:11:30—Address—Representative Health Department.

11:30 - 12:00—Community Club Work and County Agricultural Program, — County Agent.

NOON

1:30-2:30—Model Club Meeting.

2:30-3:30—Reports from Community Clubs.

3:30-4:30—Address: Representative Farm & Ranch.

The purpose of the meeting is to review the work of the past year and plan for greater success in 1929. Farm & Ranch is sponsoring the move and is spending thousands of dollars every year to encourage communities to organize for progress.

People of the several communities in Mills County must solve their own problems. No one else can do the job for them. Many agencies are ready to help the citizens of each community, but some citizens must lead the way.

We are facing big issues that must be solved in 1929. Come to the meeting and start right early in the year.

B. A. Howington of Indian Gap community lost his house and all household good Tuesday night at 7:00 o'clock by fire. It is thought that it was caused by defective flues.

Mr. and Mrs. Luther Oquin and family returned to San Angelo Sunday, after a visit with Mr. and Mrs. M. E. Archer.

Mr. and Mrs. Gabe Garrett returned Tuesday from a visit in South Texas.

READ-WILLIAMS

Monday morning, January 7, 1928, Miss Lallie Williams and H. E. Read were quietly united in marriage by Rev. Ivins, pastor of the Baptist church of this city.

Lallie is the daughter of Mr. and Mrs. J. A. Williams of near Mullin. She was reared in this county. She is a graduate of Mullin High School and spent one winter in Howard Payne College. She is a well-known, likable young lady, with a pleasing disposition and is very pretty.

Mr. Read is the son of Mr. and Mrs. J. A. Read of Blum, Texas. He formerly owned the Rowena Reporter, and is an experienced printer, being in the business eight years. He is at this time connected with the Concho Herald at Paint Rock, Texas.

The happy young couple left immediately after the ceremony for Paint Rock, where they will make their home.

The Eagle joins the many friends of Mr. and Mrs. Read in wishing them a long and happy wedded life.

DAIRYING

Dairying is a common sense business. Patiently, intelligently (The Mullin Enterprise)

ly and persistently followed, it will bring the Southern farmer to independence. But he who seeks to achieve that independence should not become discouraged if he doesn't travel the whole road in a day.

It's the years between that counts.

It's the years of learning the principles of correct breeding, feeding and management; the years of building a small herd from the ground up; the years of assiduous application to the business in hand—the business of milking cows at a profit. These are the years that count.

Dairying is a profitable occupation for the Southern farmer, but it means work every day in the week, every week in the year. The family flivver will stay in the shed, and the fish will stay in the creek when the cows come home.

Yes, dairying will lead to independence and financial security, to freedom from debt—providing the rules of the game are followed; providing the producer has learned the business of commercial milk production thoroughly and puts his knowledge into effect.

Any Southern farmer who seeks the financial independence that dairying brings can find it—but he must be willing to go through the years between.—Southern Dairyman.

THE RECORD-BREAKING NEW NASH "400"

Advanced Six "400" Sedan
\$1705

The NASH-BIJUR lubricating system means Extra Thousands of Miles

EXTRA thousands of trouble-free, smooth-running miles — these are the gift of the Nash-Bijur centralized chassis lubricating system.

Every Nash "400" Advanced Six model has this system built into its chassis. You press a convenient pedal—21 vital points are instantly flushed with oil.

Steering mechanism, spring shackles, clutch bearing—all are kept thoroughly, regularly lubricated. Squeaks never develop. Rattles fail to appear.

And, even after you have driven thousands upon thousands of miles, you'll find these vital parts are ready for thousands more, due to the efficient and thorough lubrication they have received.

The Bijur lubricating system, the Twin-Ignition motor and "400" ease of steering are the outstanding engineering achievements of the year.

And the new Nash "400" is the ONLY car in which you will find them all!

The New NASH "400"
Leads the World in Motor Car Value

IMPORTANT FEATURES—NO OTHER CAR HAS THEM ALL

- | | | | |
|---|---|--|--|
| Twin-Ignition motor | Aluminum alloy pistons (linear stress) | Bijur centralized chassis lubrication | Longer wheelbases |
| 12 Aircraft-type spark plugs | New double drop frame | Electric clocks | One-piece Saloon fenders |
| High compression | Torsional vibration damper | Exterior metalware chrome plated over nickel | Clear vision front pillar posts |
| Houdaille and Lovejoy shock absorbers (exclusive Nash mounting) | World's easiest steering 7-bearing crankshaft (better crank pins) | Short turning radius | Nash Special Design front and rear bumpers |

LYNCHINGS

The following concerning
lynchings for the past year was
compiled by Tuskegee Institute
in the Department of Records
and Research. There were 9
persons lynched in 1928. This is
7 less than the number 16 for
1927, 21 less than the number
30 for 1926, 8 less than the num-
ber 30 for 1926, 8 less than the num-
ber 16 for 1924. Six of the
persons lynched were taken
from the hands of the law,
one from jail and five from
officers of the law outside of
jails.

There were 24 instances in
which officers of the law pre-
vented lynchings. Three of
these were in Northern states
and 21 in Southern states. In
23 of the cases the prisoners
were removed or the guards
augmented or other precau-
tions taken. In 1 other instance,
armed force was used to repel
the would be lynchings, 14 white
men, one white woman and
25 Negro men were thus saved
from death at the hands of
mobs.

Of the nine persons lynched
8 were Negroes and one white,
(Mexican) The offenses char-
ged were: murder, 2; rape, 2;
wounding men in altercation,
2; killing of officers of the law,
3.

The states in which lynch-
ing occurred and the number
in each state are as follows:

Louisiana, 2; Mississippi, 3;
Missouri, 1; New Mexico, 1;
Texas, 2.

AGAIN THE INDIAN

What but shame can any well
informed citizen feels when he
thinks of the treatment the In-
dians have received at the
hands of the nation's officials.
Multitudes of strangers from
other lands have come among
us, been granted the rights of
citizenship and then left to
work out their own salvation
as part and parcel of the whole.
But what about the Indian?
Here before the white man
came, almost from the first de-
ceived, betrayed, robbed of
his native rights, possessions,
freedom. Kept now for genera-
tions as a ward in the land of
his birth, he is still defrauded
by his white neighbors of priv-
ileges granted him in such mat-
ters as water and fishing rights,
and swindled at times in the
sale of his land when falling
into hands of unscrupulous
sharpers. It isn't slavery, but
if all the facts were arrayed
and could stand facing the
American public as real per-
sonalities, there would be a
protest that Congress would
have to hear.

We are glad to know that this
ward of the nation has friends
who, against the inertia, ap-
parent graft and mismanage-
ment of bureaucracy, are work-
ing for him. Among the pur-
poses of a movement now on
foot are these: 1. To free him
from the Bureau wardship of
his person. 2. To arrange that
each state shall treat him as
it does its other citizens, edu-
cating him, guarding his health,
policing his territory. Congress
appropriating the amounts now
annually voted by the Bureau
to the states. 3. The Red Cross
given all power to serve him
free of Bureau control. 4. Com-
petent untangling of the In-
dia property-mess created by
and existing in the Bureau. At
no time while the above pur-
poses are being carried out
shall the Indian be disturbed
in any way of his present
rights, or the occupancy of
such Indian property as he
now possesses.

In 1887 the Government made
an appropriation of five mil-
lions for the Indian Bureau; in
1917 thirteen millions. An in-
crease is now sought to twenty
millions while the number of
Bureau Indians is approximate-

ly the same as in 1887. Forty
year of Bureau captivity and
training, as another has said,
and still no graduation into
American life. Are there no
more John Browns or William
Lloyd Garrisons?

*** NEWS NOTES FROM *
* * * * *
* EVERYWHERE *
* * * * ***

Damages totaling \$17,794
are asked of Mayor Palmer C.
McInnis in a suit filed Thurs-
day in the District Court by
Clyde Maner, represented by
Callaway and Callaway, at-
torneys at Brownwood. This
damage suit grew out of the
shooting of Maner by the may-
or on the evening of Armistice
Day, 1928, on the Comanche
road this side of Blanket.

New York, Jan. 3.—Every in-
dication points to a favorable
year in 1929 for the packing
house industry and for live-
stock products. There seems
little chance of lower prices
for livestock or meat products
although the price levels prom-
ise to be fairly stable. There
will be an adequate supply of
meat but the market is not like-
ly to be flooded by heavy mar-
ketings. There will be a lot
of corn fed but the high prices
of corn at present does not give
hope of any slump in prices for
finished animals.

COMANCHE, Jan. 4.—The
peacane crop of Comanche Coun-
ty will exceed a million and a
half pounds this year according
to those best in position to
know and the crop will bring
approximately \$150,000 averag-
ing 11c per pound. This means
approximately fifty cars of
units that Comanche County
will market this season, and
which comes as an additional
crop not contemplated in the
county's annual income.

The consensus of opinion is

that citrus fruit crop in Rio
Grade Valley will be larger
and of better quality than last
season. The yield will proba-
bly surpass that of 1927, when
the output was estimated at
between 1,500 and 1,700 car-
loads, including truck ship-
ments.

Brownwood, Tex.,—Jan. 2.—
Though J. W. Murr, owner,
says the "old gray mare ain't
what she used to be," the no-
table animal was brought into
play by Capt. Henry Murr of
the Crooked Hollow polo team
in a matched game at San
Angelo, in which four of the
mare's colts were also played,
and led the flock of wiry pon-
ies through a hard-fought con-
test. The old gray mare has
been the sensation in West
Texas polo circles, and has
played in many contests. She
knows the game and apparen-
tly loves it.

With several hundred recog-
nized automobile camps in Tex-
as ready to serve the motorist
almost anywhere he chooses to
stop, the State has taken a
leadig position in the entire
country in the number of motor
inns. Some of the most beauti-
ful camps to be found any-
where in the United States are
in Texas, according to Texas
Camp Owners' Association of-
ficials.

Dallas, Tex.—The wealth of
Texas exceeds \$10,250,000,000,
and it ranks eleventh among
the States of the Union in point
of total wealth, according to a
recent investigation and report
by Burt C. Blanton, consulting
engineer of Dallos.

**FORMER POOR BOY
IS NOW EXECUTIVE**

A few years ago a poor boy,
believing that business held a
real future for him, went to a
banker friend with a request

for a loan to put him through
Tyler Commercial College, Ty-
ler, Texas. The banker, believ-
ing both in the lad and the
efficiency of T. C. C. training,
advanced him the sum of \$210.

Today that former poor boy,
as a result of that loan and the
course it enabled him to take,
is one of the most respected
citizens of Austin, Texas, chief
executive of a thriving life
insurance company, which nets
him an income of over \$5,000.00
a year. That young lad was
no other than Mr. F. W. Wool-
sey.

During his course at T. C. C.,
young Woolsey became inter-
ested in banking, and it wasn't
long after he graduated until
he was occupying a bookkeep-
ing position in a Bay City,
Texas, bank. After rising to the
position of Assistant Cashier,
he accepted a position with the
State Banking Department.
While in that position he be-
came interested in the insur-
ance business and bought an
interest in the Austin Mutual
Life Insurance Company. Later,
giving up all other interests,
he devoted his entire time to
this business and built it up
from a small business to a
prosperous one with a splen-
did future.

"T. C. C. training gave me
a start and has helped me all
the way," he says.

Doesn't Mr. Woolsey's story
show you that if you
WANT to make your mark in
the world, you CAN. If you
are interested in attaining an
adundant Success, clip the
coupon printed below and mail
it today for the large, free
book, "Achieving Success in
Business." No obligation, of

course. Just clip the coupon
and mail it now.

PRIORITY OF WATER RIGHTS

The legislative advisory committee on priority of usages of water in the State, it is reported from Austin, will recommend a classification in this order: State, municipal, irrigation, power, amusement and recreation. The priority, under general heads, would thus stand: First, consumption for human uses; second, consumption for industrial uses other than hydroelectric power; third, consumption for agriculture; fourth, consumption for hydroelectric power; fifth, non-utilitarian purposes.

To the opinion which takes into consideration the special nature of water resources in a State like Texas, which has no great surplus above the requirements under the first three general heads, the priority outlined seems the reasonable one. Water is first a requisite for human existence, so "domestic" consumption properly comes first. As between industrial use, boilers, etc., and use for irrigation, there is a preference for the former only by virtue of the special circumstances which exist for it is necessary to make a choice. For instance, if there is not enough water in a particular watercourse to supply a factory with water for its boilers and to give an applicant what was asked for irrigation, it would be more to the advantage of the community and the public to have the factory run than it would be to have the production of this one farm increased by irrigation.

The controversial point in the classification is over the place of use for creating electric power. The committees subordinate this use to others likely on the theory that electric power can be made by other means whereas water is indispensable for drinking, for running factories and for irrigation.

The priority classification seems to be a natural one. A great deal of trouble would have been saved had it been officially fixed a long time ago.—The Dallas News.

CHEVROLET PRODUCTION DURING 1928 SURPASSES ALL PREVIOUS RECORDS

Detroit, Mich., Jan. 12.—With thousands of the new Chevrolet sixes daily being placed in the hands of owners, Chevrolet Motor Company announced officially here yesterday that production for the first ten and a half months, equalled 1,200,000 units. This figure, it was said, represented an increase of 180,000 units year.

Month after month of last year found Chevrolet shattering all former production marks. Its all time record for monthly output occurred in May, when 140,775 units were produced. May stood out in the Chevrolet calendar also because it included the greatest single day's output in the company's 16 years of history. Seven thousand and seventy-five cars and trucks, completely finished, rolled off the Chevrolet assembly lines May 28.

Coincidentally with the announcement of 1928 production figures, Chevrolet officials at the New York Automobile Show last week, were viewing with interest the continued enthusiasm that the crowds bestowed on the new sixes. Several ranking officials reiterated the statement made a few weeks ago by W. S. Knudsen, president, that 1929 production would equal at least 1,250,000 units. One of the salient tributes paid Chevrolet by visiting automobile men at the show involved the company's remarkable evolution from four to six cylinder production in the short space of a few weeks. Today all nine of Chevrolet's assembly plants are rapidly adjusting themselves to take care of peak schedules.

A MERRY PARTY

(The Mullin Enterprise) On Thursday evening at 7:30 o'clock the doors of Mrs. Weston's lovely home were thrown open to a number of ladies who arrived just in time to spend one of the most pleasant evenings of the holiday season.

Green and red colors were carried out on the dinner plate which was laden with delicious sandwiches, salad, hot punch, peaches and cream, cake and mines.

Those enjoying the occasion were: Mrs. M. E. Casey, Mrs. V. E. Priddy, Mrs. F. E. Leineweb, Mrs. W. S. Kemp, W. C. Preston, Mrs. Flowers Lindsey and Miss Anita Fletcher. The out-of-town guests were Mrs. Dan Weston of San Angelo and Mrs. Walter Williams of Haskell.

See Mary Pickford in "My Best Girl" at the Dixie Monday and Tuesday nights.

NEWS-REVIEW AT HICO CHANGES MANAGEMENT

(The Mullin Enterprise) The Hico News-Review has changed ownership. Our friends Mr. and Mrs. Finis E. Forgy have sold out to a Mr. Smythe. Mr. and Mrs. Forgy had been with the Hico people two years and during that time built the paper from a small, struggling newspaper to one with the largest circulation in the county.

Myrtle Harrison and Mrs. Smith Bodkin announce they will continue business at the same stand upstairs in the Ligon building.

NAILS AND STAPLES

Vol. No. 1. January 11th, 1929. Num. Five.

Published in the interest of the people of Mills County by Barnes & McCullough.

Paul McCullough Editor

Now that our New Year's resolutions are broken, we can again enjoy life.

B. A. Howington's house burned day before yesterday. A stove caught on fire and set the house. A flue was suspended on the rafters and did not extend from the ground up, consequently the paper on the ceiling caught fire. We are rebuilding the home.

Girls, if you want to get squeezed, attend the basket

ball games this winter. Sheetrock, as you know, is made of gypsum rock, consequently it is vermin proof. A mouse once tried to get through a Sheetrock finished partition and died of nervous prostration.

Father: "I never kissed a girl until I met your mother." Will you be able to say the same thing when you become a married man?" Son: "Not with such a straight face as you can, Father."

When you buy American fencing you get fencing that will stand the hardest kind of usage.

A bargain sale has parted many a wife and her husband's money.

Fix for turkeys. I'll bet you that there'll be a good price this year.

After the ball is over—what a relief to get out of the starched shirt.

We wish every one a prosperous 1929.

If we wrote what we would like to write about the weather, the Eagle would suppress this issue of Nails and Staples.

NEWS NOTES FROM EVERYWHERE

Damages totaling \$17,794 are asked of Mayor Palmer C. McInnis in a suit filed Thursday in the District Court by Clyde Maner, represented by Callaway and Callaway, attorneys at Brownwood. This damage suit grew out of the shooting of Maner by the mayor on the evening of Armistice Day, 1928, on the Comanche road this side of Blanket.

New York, Jan. 3.—Every indication points to a favorable year in 1929 for the packing house industry and for livestock producers. There seems little chance of lower prices for livestock or meat products although the price levels promise to be fairly stable. There will be an adequate supply of meat but the market is not likely to be flooded by heavy mar-

ketings. There will be a lot of corn fed but the high prices of corn at present does not give hope of any slump in prices for finished animals.

COMANCHE, Jan. 4.—The pecan crop of Comanche County will exceed a million and a half pounds this year according to those best in position to know and the crop will bring approximately \$150,000 averaging 11c per pound. This means approximately fifty cars of units that Comanche County will market this season, and which comes as an additional crop not contemplated in the county's annual income.

The consensus of opinion is that citrus fruit crop in Rio Grande Valley will be larger and of better quality than last season. The yield will probably surpass that of 1927, when the output was estimated at between 1,500 and 1,700 car-

loads, including truck shipments.

Brownwood, Tex., Jan. 2.—Though J. W. Murr, owner, says the "old gray mare ain't what she used to be," the notable animal was brought into play by Capt. Henry Murr of the Crooked Hollow polo team

in a matched game at San Angelo, in which four of the mare's colts were also played, and led the flock of wiry ponies through a hard-fought contest. The old gray mare has been the sensation in West Texas polo circles, and has played in many contests.

Stop That Cold NOW!

SLIGHT colds are not, generally, dangerous in themselves but most often are signals of more serious illness not to be lightly regarded.

We have many highly endorsed cures, cold tablets and cough medicines that will stop that cold NOW and avert further sickness.

ATOMIZED VAPORIZED

Not WET . . . But DRY

A wet gas is an atomized mixture of gasoline vapor with liquid drops of raw gasoline. These drops, separating at every manifold, result in uneven distribution and flooded cylinders.

The new and better Texaco, vaporizes completely. It forms a dry gas—a perfect mixture of gas, oil vapor and air, which provides an even flow of fuel and power to every cylinder.

You buy the LIQUID but you use the VAPOR

Faster.. Faster.. We Drive

Changed Motoring Conditions Demand a New Gasoline

60 . . . 70 . . . perhaps more miles per hour—mastery of the highest hills in high gear—quick-action power—all of this you and thousands of others demand when you buy a car. You may never use this excess power, yet you want it.

Faster and faster—each year a little faster—you drive over increasing miles of improved roads. Faster and faster moves the traffic of cities.

The new and better Texaco is an answer to these changed and changing conditions. In the tank, the new and better Texaco is a pure, non-doctored liquid; at the spark, a vapor that is so free of moisture that it can be truly described as *dry*. It is this dryness—this ability to form a dry gas—which, in your engine, results in increased power and responsiveness throughout its entire driving range.

Anywhere—wherever you see the Red Star and Green T, drive in for the new and better Texaco—the gasoline that forms a dry gas.

The Texas Company, 17 Battery Place, New York City
Texaco Petroleum Products

The NEW and BETTER TEXACO GASOLINE

H. B. JOHNSON, Agent

Don't just ask for
"Motor Oil"

"Take-a-chance" oil in the engine sends many a good car to the scrap heap before its time has come.

That's why it is so important to use a full-bodied motor oil—a highly refined oil—like TEXACO, the clean, clear, golden motor oil. We have the right grade for your car.

TEXACO MOTOR OIL

TEXACO SERVICE STATION
Give her the gas!

Keep your hand off the gear-shift—"step on it."

The new and better Texaco Gasoline responds with the power that carries you over. Notice that quick pick-up and maintained power with TEXACO in the tank. Drive in for a fill.

FLOYD JACKSON

The NEW and BETTER
TEXACO
GASOLINE

What has
gasoline
to do with
lubrication?

Everything. The new and better Texaco Gasoline forms a Dry Gas. It burns completely. No "heavy ends" are left in the cylinders to dilute the oil film, break the seal, enter the crankcase and destroy the lubricating value of the oil.

The
NEW and BETTER
TEXACO
GASOLINE

LOUIE KARNES
STAR, TEXAS.

42°

BETTER than
GOVERNMENT
SPECIFICATIONS

Forty-two degrees better in boiling point! Better throughout the whole range of distillation! The result—better engine work. You can't mistake it. The new Texaco will surprise you. Our pumps dispense it.

HIGHWAY GARAGE

You use the vapor—
but you buy the liquid

When you drive up to a filling station you ask for "gas." And correctly, too. It is the gas—the vapor of the gasoline and not the liquid which gives the power.

The better the gasoline—the better it vaporizes—and the more power it produces.

The new and better Texaco Gasoline vaporizes perfectly. It forms a dry gas. Full power—real "Pop"—mileage.

Try Texaco today. There's a difference.

E. M. INGRAM
MULLIN, TEXAS.

The NEW and BETTER
TEXACO
FORMS A DRY GAS

HIGH TEST

If you aren't using the new and better Texaco Gasoline now, it's high time you started.

In every particular it is a "high test" gasoline. Starts easily, responds like a flash, and is there with plenty of power.

Best of all, it is easy on the valves and forms a very minimum of carbon.

The NEW and BETTER
TEXACO
GASOLINE
FORMS A DRY GAS

Weatherby Auto Company

LETTER FROM "BOTTOM OF THE WORLD" IS RECEIVED BY EAGLE

Shanghai, China, Nov. 27th, 1928
C. P. O. Box 1234

Dear Editor:

Here comes another letter from the "bottom of the world." It may be of interest to the readers of your most excellent paper.

We have recently had one of China's chief holidays. For more than a week I noticed signs of its coming. Great stacks of "moon-cakes" in brightly colored packets were shown in many stores. Beautiful lanterns were seen along the streets. Everything was in such gay style it made one think of a coming Christmas. It was the Chinese Moon-feast and Mid Autumn Festival. In their feasting it recalled our Thanksgiving Day.

The Chinese 15th of the 8th month is called "Tsoong-Tsin"—Middle Autumn. On that day they have theatricals before all the gods in the temple and burn the "Shaung-teo"—incense bushel. This bushel-like measure is made of incense sticks. The largest "bushels" sometimes measure as much as twenty feet in diameter. In the middle of the "bushel" is a long, large stick of incense made up of thousands of thin incense sticks the size of vermicelli. On the afternoon and night of this day each family also burns an incense bushel at home. They are smaller than the ones burned in the temple. On this day they who can so afford eat moon-cakes and all kinds of nice things. The incense bushel is decorated with flags and many-colored dragon-gates something as children have at home put candles on their birthday cakes; but the children in China take the flags and dragon-gate decorations from the bushel before it is burnt, and have great delight in playing with these, marching up and down the streets.

I asked the Chinese why they burn the incense bushel and eat the moon-cake, and worship the moon with candles, incense and food on this day. They answered that there are many reasons for it and many stories are told about it. One of the reasons is because there is a lady-god in the moon. Her name is Zaung-noo. She is said to be exceedingly beautiful. From the beginning of time to the end there never was nor will be one as beautiful as she. She was once upon a time a woman of this world; but became displeased with her husband and all the world flew to the moon. On this 15th the real story of why she fled is acted out in the long theatrical plays attended by throngs of people. In ancient times on the 15th of the 8th month when they burned the incense bushel the sweet fragrance would go high up to the moon goddess. She took pleasure in it and manifested her approval by coming near earth riding on a cloud and people could see the beautiful face. But now men's hearts have become wicked, and the world is full of sin, so the incense is not so pure as formerly and does not rise so high as to reach the goddess in her palace and so, not enjoying the fragrance, she comes no more on the clouds; but people still offer incense and hope she will appear sometime.

They say that in the moon

Now is the time to look after your leaky roof with a guaranteed Asbestos Liquid coating. Ask your neighbor who used our material on his roof.

Sold Exclusively by
R. E. and WATSON ROSS
Goldthwaite, Texas

this goddess has a most beautiful castle. It is called the "Yuih-Koong"—Moon Palace. Only one human has ever seen its glories. Once, Dong Dynasty, a Chinese king, called Ming Wong, by the magic of a holy monk, was enabled to mount up from earth to the Moon Castle to hear the music and see its beauty. He was allowed to stand outside for only a very few minutes. By that time the goddess knew that the king of man was there. She was very angry at the monk for leading the king to her holy land. Soon from the castle came most-unpleasant sounds. The monk understood that it was the queen's giving vent to her wrath and quickly led the king back to earth.

You can thus see how full of superstition the Chinese are and how much they need the Gospel and Jesus Christ that they may see the real King in His beauty and live forever in His Glorious palace on High. It's a joy to teach Chinese children of Jesus while they are young.

A Merry Christmas and a Blessed New Year to you and loved ones.

Yours in Christ's glad service,
(Rev.) H. G. C. HALLOCK.

CAR WRECK NEAR POMPEY SCHOOL

C. B. Lindsey and Miss Lorraine Neill were driving east near Pompey Sunday afternoon when their brakes locked and the car went into the ditch and turned upside down on top of both occupants in the middle of the public road. Nealy Blackman happened to pass in a few minutes and saw Miss Neill's head. He went to a nearby house and summoned aid to remove the car.

Miss Neill received a broken collar bone, a badly cut right arm and many minor bruises. She was carried to a Brownwood hospital.

Lindsey was exceedingly lucky as he was unhurt. The car was badly wrecked.

CARD OF THANKS

We wish to thank the people of Goldthwaite for their kindnesses and consoling words during the sickness and death of our beloved mother. May God bless you.

PAINS In Side and Back

"I HAD BEEN miserable for a long time. My health was poor, and I suffered a lot from weakness. At times, my strength was so little that I could not stand on my feet. I would have to give up and go to bed. My sides and back hurt dreadfully.

"I grew discouraged, for I could do so little. I worried about myself, and almost gave up hope of ever being strong and well. I could scarcely lift a bucket of water. My household work went undone, for I was not strong enough to do it.

"After I had taken Cardui for a little while, I began to feel better. I grew stronger, soon found that I could do my work with less effort, and the pains in my back and sides left me. I think Cardui is a wonderful medicine. My health has been excellent since then."—Mrs. D. L. Beckner, W. Main St., Salem, Va.

CHEVROLET PRODUCTION DURING 1928 SURPASSES ALL PREVIOUS RECORDS

Detroit, Mich., Jan. 12.—With thousands of the new Chevrolet sixes daily being placed in the hands of owners, Chevrolet Motor Company announced officially here yesterday that production for the first ten and a half months, equalled 1,200,000 units. This figure, it was said, represented an increase of 180,000 units over 1927, the best previous year.

Month after month of last year found Chevrolet shattering all former production marks. Its all time record for monthly output occurred in May, when 140,775 units were produced. May stood out in the Chevrolet calendar also because it included the greatest single day's output in the company's 16 years of history. Seven thousand and seventy-five cars and trucks, completely finished, rolled off the Chevrolet assembly lines May 28.

Coincident with the announcement of 1928 production figures, Chevrolet officials at the New York Automobile Show last week were viewing with interest the continued enthusiasm that the crowds bestowed on the new sixes. Several ranking officials reiterated the statement made a few weeks ago by W. S. Knudsen, president, that 1929 production would equal at least 1,250,000 units. One of the salient tributes paid Chevrolet by visiting automobile men at the show involved the company's remarkable evolution from four to six cylinder production in the short space of a few weeks. Today all nine of Chevrolet's assembly plants are rapidly adjusting themselves to take care of peak schedules.

PRAIRIE SCHOOL

This week ends our third month of school and consequently is considered quite critical by some pupils who do not enjoy examinations just after holidays, but we believe in these boys and girls. They are doing some splendid work.

The Manual Training boys and the Clothing class are planning some splendid projects. They intend to make the remainder of the school year count for much more than they have done, though they have done some very commendable work. These boys and girls are learning the practical side of home life which will help them all through life.

The Flu is raging in the community and taking quite a few of our students from the school room. Some of them have been quite sick, but are doing better now and I think will soon be in school again.

CHEVROLET

The Outstanding Chevrolet of Chevrolet History
—a Six in the price range of the four!

represents 4 years of Development and over a Million miles of Testing

Years ago, the Chevrolet Motor Company designed and built its first experimental six-cylinder motor. This far-sighted step was taken because Chevrolet engineers knew that the six-cylinder motor is inherently the most perfectly balanced motor—the ideal power plant to meet the growing public demand for greater reserve power, faster get-away and, above all—smooth, quiet performance.

Day and night, through winter's cold and summer's heat, the incessant testing went on—until the present motor was developed and finally pronounced correct.

At the same time other Chevrolet engineers were perfecting other parts of the chassis. And another great automotive organization—the Fisher Body Corporation—was devoting its gigantic resources to the creation of the finest, sturdiest and most beautiful bodies ever offered on a low-priced automobile.

As a result, the Outstanding Chevrolet offers an order of well-balanced excellence—a combination of performance, comfort, beauty and handling ease that is truly remarkable—with a fuel-economy of better than 20 miles to the gallon of gasoline.

You owe it to yourself to see and inspect this remarkable car. Come in today!

During the last four years, over a hundred six-cylinder motors were built by Chevrolet engineers and tested on the General Motors Proving Ground.

As a result, the Outstanding Chevrolet offers an

A Street Car Accident

By-M.B.

MRS. W. R. CURB DEAD

(The Mullin Enterprise)
Mrs. W. R. Curb, nee Miss Myrtle Hallford, of Prairie, died on the third of January while enroute to a sanitarium at Brownwood.

Her going was like the breath of an angel as they wafted her spirit to a better world. No pain left to mar the beauty of the face of that lovely young bride, blessed with sunshine of love all through her happy life. She was the first of the family to go, leaving behind her a devoted young husband, a father and mother, a sister and a brother.

The ways of Providence are mysterious and past finding out, and though we fail to understand why one so sweet and young should be taken from among us, we bow our heads in silent sorrow, at the same time acknowledging that life doeth all things well.

Funeral services were conducted by Rev. Gilmore and interment was at Prairie on January 4th.

TURNER-McFARLAND

(The Mullin Enterprise)
Miss Elsie McFarland and Mr. Boland Turner of Breckenridge were married in that city last Sunday. The groom is an employee of the Humble Oil Company.

The bride has lived in our city since childhood. She is a daughter of Mrs. and Mrs. W. H. McFarland of Mullin, and has many relatives and friends who join the Enterprise in wishing this happy young couple success all along the pathway of life.

THE FLU

If we but knew
The cause of flu,
And whence it comes and what
to do,

I think that you
And we folks too
Would hardly get in such a
stew,
Do you?

COULD YOU HAVE BELIEVED IT?

If you positively knew you could have \$500.00 cash, a thorough business training, a good position and seven months experience if trained in a Byrne Commercial College again—no cash, no job or experience if trained in another school, which would you choose? The answer is easy, but how are you going to convince yourself that a Byrne Commercial College has these great advantages? Here's how: Ask three students that have graduated in the combined course of bookkeeping and shorthand in any other school if twelve months is not a fair average time to graduate in a school teaching Gregg Shorthand and 20th Century Bookkeeping, then ask three who have graduated in a Byrne Commercial College in the Famous Byrne Shorthand and Bookkeeping if four and one-half months is not a fair average time to graduate. Also get the catalogues of other schools and compare their course of bookkeeping and shorthand and time required with Byrne. The Byrne student graduates in four and

one-half months, and the other in twelve months. Time saved by Byrne, seven and one-half months. Put the time at a low salary and you would have earned from \$500.00 to \$700.00, and by the use of the famous Byrne Shorthand and Bookkeeping taught exclusively in Texas in the three Byrne Commercial Colleges under the direction of the author you have been given the most modern, thorough, practical training to be had in seven and one-half months less time, and you will have seven and one-half months valuable experience and a good position.

Business men prefer Byrne trained office help. Byrne trained students are holding the most responsible bookkeeping, shorthand, secretarial, and accounting positions at the best salaries, in the large cities where business is found. If you can secure and hold the best paying positions with four and one-half months training why spend twelve months in some school not permitted to teach the famous Byrne system? Byrne scholarships are sold under a money back guarantee. Get the Byrne bookkeeping and shorthand in one-half the time and one-half the cost of others.

Byrne Colleges operate three free employment departments for the placing of all graduates. Write for catalogue today. Investigate, you are entitled to the best. Byrne Commercial College, Dallas, Houston, San Antonio. H. B. Byrne, President.

Sinton—A car load of fat hogs co-operatively marketed by San Utricio county farmers recently brought about \$100 net above prevailing prices in that section in spite of selling on a declining market, so P. Donald, county agent of that county, reports.

See Mary Pickford in "My Best Girl" at the Dixie Monday and Tuesday nights.

Bowie, Texas—At a canning demonstration attended by 71 persons in Montague county recently, Miss Alice Strawn, local home demonstration agent showed that a 190 pound beef was worth \$22.13 more canned than on foot after deducting all expenses. There were 72 No. 2 cans of chili, soup, hash and meat loaf, and 39 No. 3 cans of steak and roast.
