

# THE GOLDTHWAITE EAGLE

VOLUME THIRTY-EIGHT

GOLDTHWAITE, MILLS COUNTY, TEXAS, FRIDAY, JULY 22, 1932.

NUMBER FORTY-SEVEN

## A GREAT SUCCESS

The three days barbecue, racing and jubilee at the Fair grounds in this city has been a huge success. More people have been here during this time than have attended the fair for a number of years and a general good time has been had by all. People have been here from all parts of the county and from other parts of the state, meeting with friends and enjoying the hospitality of Mills County.

Candidates for state, district and county offices have spoken to their hearts' content, as good races have been witnessed as were ever run on the track here and there are lots of horses in the running, the carnival attractions are good and the patronage appears to be satisfactory.

The business houses of the city closed each day at noon to give their clerks and customers an opportunity to see the races and enjoy the barbecue.

The feeding of the multitude was the big problem and some predictions were made that this could not be accomplished satisfactorily, but it has been done and how. People have been given all the barbecue and accessories they wanted and there has been great supplies left over from each day to be given to all applicants. It was all well cooked and distributed in a systematic way that insured a sufficiency for everybody. Nothing has been left undone and no dissatisfaction has been voiced—it has been a huge and wonderful success. Everybody having to do with the provisions has a right to be proud and the community and county are proud of them.

It was a big undertaking, but it was put over in a big way and its history is creditable to Goldthwaite and Mills county. The fact should be emphasized that it was all free, not even a charge of admission to the barbecue tables or the picnic grounds, the only charge being for the grandstand to see the races and this was known and expected by everybody.

## DELEGATION FOR HUNTER

A delegation was here from Wichita Falls Wednesday in the interest of Tom F. Hunter, candidate for governor. In the delegation was Mrs. Tom F. Hunter, Judge and Mrs. P. B. Cox, Mrs. J. W. Fox and Taylor Buchanan, a newspaper man. J. L. Lightfoot of Cisco and Casa Marsh of Waco were also in the delegation. Judge Cox was the principal speaker for the forenoon and he was followed by Sam McCollum of Brady, who also delivered a masterful address in the interest of Mr. Hunter. Before these gentlemen spoke Mrs. Hunter made a brief talk, to the audience, expressing the thanks of herself and her husband for the very courteous reception of his candidacy and his representatives by the people everywhere.

After mingling with the crowd and enjoying a dinner of barbecue and other good things on the grounds the delegation left for Wichita Falls, expressing themselves as being delighted with Mills county and grateful for the opportunity of meeting the people and addressing them.

## THE END IS NEAR

The end of the campaign for the first primary draws near and already the time for important newspapers for free space by the state candidates has closed. The Eagle has remained true to its first decision to refuse all free publicity and while almost all of the statewide candidates have supplied their pictures and large volumes of reading matter concerning their campaigns, none of it has appeared in the paper. In the run-off campaign there will doubtless be a lot more of this propaganda sent out for free publication, but the number of candidates will be smaller and the Eagle's waste basket will not overflow so often. Anyway, the Eagle has treated them all alike.

## A BACKWARD PARTY

"Backward, turn backward, O time, in your flight!"  
"Make me a child again just for tonight."

Everything except Father Time turned backward on Friday night last, when Misses Olive Mae and Izetta Featherston entertained the members of the Three L Club and a number of guests with a Backward Party. All of the girls wore their dresses backward and the boys wore ties and shirts backwards, while a few of the most daring wore suspenders and pants backward. The guests entered the house at the backdoor, bade goodbye to the hostesses and told how they had enjoyed the evening.

After being cordially asked back they were shown into the reception room, where one by one they registered backward in a little book. After registration the gay group was led out on the lawn, where they played games—Three Deep, Little White House Over the Little Green Hill, etc. Moved by the spirit of backwardness, many of the boys persisted in running backward, while playing and one young gentleman, who always gets all the fun out of every situation he meets, persisted in telling the truth backward throughout the party. After a pleasant period of time was spent playing games, the group was divided into couples and the hostess read a note which started the crowd on a long, exciting treasure hunt. The different notes led the descendants of Coronado to remote bridges, to forks in lonely roads, to haystacks, to isolated hills, and finally to a verse in the Bible. After the party of tired treasure seekers had reassembled in the house the person who first found the sought for scripture read: "Either what woman, having ten pieces of silver, if she lose one piece, doth not light a candle and sweep the house, and seek diligently till she find it?"

Rather than sweep the house most of the group gave up the search immediately, but a few of the most faithful followers of Old Missouri and Seminole Bill got the broom and went zealously to the task prescribed. In a short time Morine Brown discovered a vast wealth of popcorn under a bed, and the feverish search came to an end. Instead of sending it away to have it assayed the backward group disposed of the treasure in another manner.

At a late hour the guests greeted the hostesses and went home. All wished that Father Time would have co-operated with them and turned backward too, so the delightful evening could have lasted longer. XX

## MRS. J. D. LOWE NAMED INFORMAL PARTY HONOREE

Affording friends of Mrs. J. D. Lowe of Whitewright the opportunity of spending a brief time with her, informally renewing acquaintances formed several years ago, when she lived in Brownwood, Miss Ann Epps entertained during late afternoon hours on Monday at her home on Ave. E. The honoree who is visiting friends here this week, was before her marriage, Miss Mildred Davenport, a former member of the faculty of the Brownwood city schools. Congenial mingling of friends and informal conversation that featured the hours of entertaining was interspersed with readings and musical numbers given by the guests, the impromptu program including vocal selections by Miss Edna Germany, accompanied by Mrs. J. C. Epps, piano numbers of Miss Lorene Allison, Mrs. Tom Carney and Mrs. Epps, and several delightful readings given by Mrs. Lowe.

An attractive remembrance of the occasion was presented to the honoree.—Brownwood Bulletin.

## MARRIAGE LICENSE

County Clerk Porter issued license since last report to Melton Waller and Miss Leila Shelte House, of Richland Springs.

## TRAINING SCHOOL

The Rev. King of Austin, Tex., conducted a very profitable training school for the religious workers of the Center City community the latter part of last week. He met with the young people of the community Sunday afternoon, July 17, to help them in organizing a Young People's Division of the church. The new council composed of Bertram Geeslin, president; Yvonne Welch, vice president; Lynn Harbor, secretary-treasurer; Cary Owens and Lois Blackwell, councillors; appointed Lucille Welch as chairman of committee on worship, evangelism and missions, and Hollis Blackwell chairman of the committee on service, recreation and training.

The new officers will take up their respective duties and conduct their first program Sunday night at 7:15 o'clock, July 24. The subject for discussion will be "Is Virtue Its Own Reward?" Brock McCasland was leader of a very interesting program of singing and special music Sunday afternoon, July 17, at Center City Baptist church. Special music by Bertram Geeslin and Mollie McCasland accompanied by Mrs. Wilbur Waggoner was especially appreciated, and the talk on music by G. D. Byrd was very impressive.

Visitors from other communities are welcome to these musical programs. They are cordially invited to help in rendering the programs.

A duet by Mrs. Joe Anderson and her sister, Adeline Spinks of the North Bennett community will be a feature of the next program, which is to be arranged for July 31, by Lucille Welch. REPORTER

## CORN COB AS CHIGGER REMEDY

Scratch chiggers with a corn cob and they will die and fall off the body, Stanley Casstevens, Alvarado, said in a letter to the Star-Telegram yesterday. Just an ordinary corn cob will do the job, he claims. If picnickers would rub the infested area with a cob after an outing in the country they would not be worried with scratching the next day, he claims.

Vacationists, golfers and everyone who are in the chigger region can profit by this simple remedy, Casstevens said.—Fort Worth Star-Telegram.

## BLANTON SPEAKS HERE

## BAPTIST CHURCH

The annual meeting of the Mills County Baptist Association is on Friday before the third Sunday in August, which is the 19th day of the month. Let every church in the county elect their delegates and send an offering for printing of minutes.

Let everyone read Article 12 as printed in the constitution found in the back of our 1931 minutes. So far we have not appointed the chairmen of the main committees, but we are doing so now asking that every chairman appointed serve in this capacity.

Missions—including all—Rev. Jo Frizzell.  
Education—W. E. Miller.  
Benevolences—Rev. L. L. Hays  
Christian Service—Geo. W. Jackson.

Other committees will be appointed at the association. If for any reason any of these will not serve please notify the writer of these notes at once. If the chairmen will read Article 12 they can very easily know what is included in their report.

Saturday is an important day in Texas. Election day and this preacher's wife's birthday. Something remarkable about the T. E. L. class of the Baptist Sunday school. It seems that they all were born in July or in Arkansas. That is the information handed us by our superintendent. But there is one thing about being born in July or Arkansas. Hot weather does not worry. One can just go right on to Sunday school and church. Wish we had a few more members born in July or Arkansas.

A gentleman, who is not a member of the Baptist church asked this preacher if the Baptists were holding an encampment or an institute at the lake. To which we replied that we did not know. That most of them were coming into town for church on Sunday. We could not say what they were doing thru the week, but as long as they put in their appearance on Sunday, we are not going to have them break ranks. Fred Martin, who is noted for integrity, truth and veracity, reported Sunday morning that they were having to sleep under two quilts at the lake, and it's a known fact that it has been so hot in town that a man could not sleep in the ice house. Possibly that is the reason for so many being on the lake.

We just happened in on the committee appointed to draw up a platform governing the citizens who visit the lake. This committee seemed to be hopelessly deadlocked on one plank that some wanted in the platform. This was a wet plank and it was to be placed forty feet above the water for the purpose of high diving. Personally, we are against this wet plank. We are against anything that will endanger the life of any one and the Methodists can not endure deep water and that is the reason the Baptist and Methodists will be played on the lake, and when our marines get on the lake it is going to be too bad. These deep water boys just can't fight on dry land, but believe it or not, these dry landers just can not be whipped in their own yard.

Just laying aside all foolishness, we had one of the best games of volley ball last Thursday night we have ever witnessed, and as far as we know a good spirit prevailed throughout the game on the part of everyone that was interested. Every player played "heads up ball." Everyone playing to win. Not so much for his Sunday school, but because he enjoyed the game.

Sunday will be a hard day as to church going. Just after election. Some will be elated with joy, while others will be disappointed. We know that there can be no rainbow without sunshine and that there can be no rainbow without a cloud. And Sunday morning we are going to have the sunshine and we are going to have the clouds, and for that reason we will have the rainbow. So regardless of whether we win or lose, let's see the

Rev. Henry Pollard and family of Falfurrias were here to attend the funeral of J. E. Swim last Friday. Bro. Pollard conducted the funeral and preached at Big Valley church Sunday.

There was a party at the home of W. T. Kerby Saturday night.

A good rain would be appreciated by the farmers of this section. Threshing is over and the corn is made, but cotton would be benefitted by rain, and grass would be revived in the pastures.

Our good neighbor W. H. Oglesby became unconscious while on the way home from town Wednesday afternoon and is in a serious condition at this writing. We hope for his early recovery. FARMER

rainbow and all go to Sunday school and church. Here is hoping that everyone that reads these lines will think seriously before you cast your vote and vote for men and women whom you honestly believe will better serve your country. Just remember after you cast your vote Saturday and then again in August, that you will not be allowed to speak until next election. May the God of Heaven and earth help us to speak right, and when we have spoken, may those whom we have placed our confidence in never do anything to betray our confidence. PASTOR.

## CENTER CITY

We are having warm dry days. A good rain is needed on all vegetation. Threshing of grain is just about over. The crops were not so good as those of last year. However, we are thankful for good crops anyway.

Ernest Langford, Mrs. Sammie Smith and Misses Hartal and Naomi Langford accompanied Mrs. Eden to her home in Cottonwood, Arizona, for a visit. Mr. Langford and Mrs. Smith have two sisters and a brother living there.

The training school conducted by Rev. Horace King was interesting and profitable for those who attended. We are sorry that all did not have the opportunity to attend. Mr. King was present Sunday and helped organize the young people into a working class. We sincerely hope these young folk will put forth every effort to make this a profitable year.

Our revival is in progress, having begun Sunday morning. For some reason a mistake was made and Bro. Page came a week early. After learning his mistake he offered to stay and preach the two weeks instead of ten days. A few were not ready for the meeting, but after hearing the first sermon, I believe, all were glad to begin and are anxious to hear him. He is a forceful speaker and a live revivalist. Bro. Ramsey and family are helping all they can and may lasting good be accomplished through their work here.

Miss Gladys Casbeer is at home, slowly improving from her operation. She will be confined to her bed for some time.

Miss Lois Blackwell spent last week with Miss Maida Hudson near Evans. Miss Hudson returned with her for a visit Sunday.

A number of visitors attended singing Sunday afternoon. You are always welcome. Come again and bring someone with you.

Mmes. Lewis Covington and children of Pleasant Grove and Archie Collier and little son of Goldthwaite visited relatives here Sunday.

Our neighbor, George Bird has grown melons which he calls candy roasters. The one at display at Oglesby's store Tuesday attracted much attention. It is said to be of a finer texture and flavor than the squash, kershaw or pumpkin.

Bro. Trav Sparkman reports a fine meeting at Cherokee, in San Saba county. He had thirteen conversions and eighteen additions to the church. He recently moved from this place to Center Point and visits here often.

Elder Clem W. Hoover Will Begin Meeting

A protracted series of services will begin at the Church of Christ tabernacle, just south of the church building, next Wednesday night, July 27. The preaching will be done by the pastor of the church, Elder Clem W. Hoover, who is one of the strongest preachers of that church and is popular with his congregation and with other congregations where he has preached. He is well versed in

the scripture and is well able to hold the attention and interest of his hearers. These services are for all the people, regardless of church affiliations, and a cordial invitation to attend and take part in the services is extended. O. S. White of Ranger will have charge of the song services and all the singers of the city are invited to join in this part of the service and make it interesting and beneficial.

Mrs. J. M. Oglesby of Center City was an appreciated caller at the Eagle office Monday.

Joe Witherspoon and his wife and son were here from Weatherford Saturday and Sunday, visiting Mr. and Mrs. J. T. Helm.

Every citizen should vote in the election Saturday. That is the only way in which we can know that officers selected are the choice of a majority of the people.

Her husband, now deceased, was country clerk of Mills county some years ago and no more efficient officer ever served the county. The family is kindly remembered here by many friends.

G. H. Frizzell is feeling rather "cheesy" since his company sold its holding of mohair last week three-quarters of a cent higher than the Schreiner Co., of Kerrville, sold the same grade of mohair. The last named company is recognized as one of the leaders in that line in the southwest, hence the Frizzell Co. attained quite a victory in the sale.

Mr. and Mrs. Harry deGrummond and little son of Temple, were here Monday in the interest of her father, W. H. Hawkins of Stephenville, who is a candidate for congressman-at-large and his name appears first on the Mills county ballots. Mr. deGrummond is train dispatcher for the Santa Fe. They are very hopeful of Mr. Hawkins' success in the election Saturday.

There were thirteen, the unlucky number, at Sunday school Sunday morning, but Sunday night there as a nice sized crowd at D. Y. P. U. and the program and quiz was fine.

There wasn't any prayer meeting Saturday night, because there were just six present. Some had tire trouble and others just didn't come. The leader was a new one, so he didn't go ahead and have the meeting. Next Saturday is election, so there won't be any prayer meeting.

Last week was an awful warm week and so far this week is warm. We are in need of a good rain, which would cool everybody and help the grass grow.

This community wishes to extend its deepest sympathy to the bereaved, which were the McNutt family of Trigger Mountain, the Langford family at Center City, the Swin family at Big Valley and the Montgomery family at Mount Olive, for the loss of their loved ones. We wish to let Mr. and Mrs. Herman Cox at Stamford know we sympathize with them in the loss of their infant. May God's richest blessings rest on all of you is our prayers.

**Feels Stronger Than Ever**

Just to prove to any doubtful man or woman that Kruschen Salts is the SAFE way to reduce—let us take the letter of Mr. F. J. Fritz of Cincinnati, Ohio, recently received.

He writes: "I've tried extreme dieting, setting up exercises with very little results—but the results from Kruschen are almost incredible. In 3 months I reduced from 205 to 179 pounds and feel stronger than ever—no more wheezing or gasping for breath—friends say I look 100% better."

Bear in mind, you fat man, that there is danger in too much fat—try the safe way to reduce—one-half teaspoonful of Kruschen Salts in a glass of hot water every morning—cut down on fatty meats and sweets—one bottle that lasts 4 weeks costs but a trifle—get it at Hudson Bros. or any drugstore in the world.

**CARD OF THANKS**

We wish to thank our friends for the sympathy and help given during the sickness and death of our husband and father, H. M. McNUTT. Also for the flowers.

MRS. H. M. McNUTT and Family.

**SOUND THINKING NECESSARY**

To solve the problem of unemployment is the popular topic of discussion and a subject for daily debates among all classes of people. Scores of voluntary economists are proposing scores of remedies on how to solve the problem of the workless workers, although most of them never earned a day's pay by their own ability or creative knowledge. They remind one of the old maid who tried to tell the mother of a family how to bring up her children.

To discuss unemployment we must go to the bottom of the causes and discard the notion of trying to wipe out unemployment through relief commissions, or even with better business conditions. Unemployment will be with us to stay until we can solve our economic and industrial problem by putting wages on a level with the value of purchase.

Inequality in the distribution is the worm in the core of our society. We must do some sound thinking to save our nation from eventual destruction from these elements. Ancient dynasties and empires have perished because the people did not understand what was destroying their civilization. Is big business so newsighted it can not see the pitfalls it is creating through continually reducing salaries and wages?

The foundation of prosperity is based on the buying power of the masses. A pauperized condition of the people makes an insecure foundation for any nation. We must not lose sight of those two fundamentals. —Editorial Digest.

**SUNDAY SCHOOL CLASS GIVES BRIDE'S SHOWER**

Mrs. J. N. Weatherby opened her Center Avenue home to members of the Euzeilian class of the First Baptist church of which she is teacher, when they met Tuesday evening for a short business meeting followed by a social hour. A feature of the evening was a linen shower given Mrs. J. N. Wilson a member of the class, who was recently married. Refreshments were served on the terrace to fifteen. —Brownwood Bulletin

**OFF THE AIR**

The decision of the eastern interscholastic athletic association not to permit the broadcast of the football games which its member institutions control is not surprising. Before the football season opens in September it is likely that other conferences and athletic associations will take similar action.

Sponsors of football are not the first to give consideration to the possible disadvantages of the broadcast. The question was fully discussed at the major league baseball meetings last winter. Several owners were then favorable to the action now announced by the large eastern colleges. Others believe the broadcasting of games instead of keeping people at home would tend to create interest in the sport and that attendance would increase as a consequence.

Representatives of a dozen eastern universities in voting against continued broadcasting subscribe to the opinion that more people will go to their games if they can not sit in their homes and take them off the air. They frankly admit that they are interested in maintaining football revenue at the highest possible figure and that the ban on the radio is deemed necessary in the face of a further probable decline in football attendance this year.

If the ban on football broadcasting is extended and it becomes impossible for the hundreds of thousands who are interested in the gridiron sport to listen in Saturday afternoons, some of them doubtless will go to the games in which they are interested. Whether total attendance will be much affected is, however, a question. —Cleveland Plain Dealer.

**THE VETERANS' DOLLAR**

When Gen. Frank T. Hines, head of the Veterans Administration, was asked what part of the dollar appropriated for the veteran actually reaches the veteran, his reply was that the veteran receives nearly 86 1-2 cents of it directly or more than 96 cents directly or indirectly. He explained:

The total disbursements during the fiscal year 1931, exclusive of that made incidental to the Civil Service Retirement Act and loans secured by adjusted service certificates, approximated \$761,263,000, subdivided as follows: Administration, 3.88 per cent; direct benefits, 86.44 per cent; indirect benefits, 9.68 per cent.

The disbursements made for administrative purposes include salaries of employees other than those assigned to the several hospitals and homes, travel of veterans for rating purposes, out-patient treatment, rents, printing and binding, supplies and equipment, etc. Direct benefits include the amount of disbursements made for compensation, disability allowance, and other payments of monies made direct to the veterans or his dependents. The indirect benefits include the salaries of employees assigned to the hospitals and homes under the jurisdiction of the Veterans Administration and other expenses incidental to hospital and domiciliary care and treatment.

**LODGE RESOLUTIONS**

Resolutions of respect for Wm. Biddle, Past Master and Secretary of Center City Lodge, No. 558, A. F. and A. M.

It is well said that amid the toiling hours of our business career we should pause for a short time to pay a loving tribute to our beloved ones, who have gathered up their working tools and departed this life to worlds unknown.

We love and revere the memories of those gone before us, and we mingle our tears with those of their friends and associates, as we recall the many virtues of our worthy brother, Wm. Biddle, and of the principles devoted to the cause of Free Masonry among us, and as one who labored faithfully for the good of humanity, we realize that he is now face to face with the Supreme Master of the universe, and as we bow to his authority the hope is indulged that our deceased brother will stand the test and receive the welcome plaudit: "Well Done Thou Good and Faithful Servant, Enter Into the Things Prepared for You."

Brother Biddle was one of the faithful members of this lodge and was always found at his post of duty. A chair has been vacated that will be impossible to fill.

He will be sadly missed in our councils. His devotion to the principles of Free Masonry and the teachings of our Order will be an inspiration to those who may follow in his footsteps.

May Heaven's richest blessing rest on his beloved companion and son and may they find consolation in the thought that earth's loss is heaven's gain and bow with humble submission to the will of our Heavenly Father, feeling that it will be their blessed privilege to join their loved one in the final end.

Therefore, be it resolved: That we honor his life, deplore his death, revere his memory and bid him God-speed to a well-earned rest beyond the vale.

Be it further ordered that a copy of these resolutions be spread on the minutes of this Lodge, a copy be furnished the family of the deceased and a copy be furnished the Goldthwaite Eagle for publication.

Brother Biddle was born in England July 7, 1864, and was

**PROPOSE COUNTY MERGER**

A committee of the state bar association of Tennessee has recommended reducing the number of counties in that state from the present ninety-five to about thirty. Lawyers should know a good deal about the machinery of government.

The lawyers who declared their belief that one-third the present number of counties would be sufficient in Tennessee pointed out that the step they were recommending would eliminate sixty-five county judges and county courts and of course a multitude of other county offices and officials. They also observed that while the taxpayer should favor county mergers if he really wants relief, politicians will obviously oppose them.

There is no reason why politicians should favor a proposal that would do away with a whole flock of political jobs. But there are many more taxpayers than political job-holders. Some day the taxpayers will wake up to their own interests. When that day comes, this whole business of paying out good money to keep outgrown county lines on the map will be settled by the taxpayers and not the politicians.

There are already signs that the ice is breaking. The recommendation of this Tennessee bar association committee is one of them. The report of the Mississippi research commission is another. The proposal made by a committee of engineers to give Missouri forty instead of 113 counties is a third. In Texas, the county merger movement is receiving earnest support. In Georgia several counties have already been consolidated. In the Carolinas, and in Kansas, people are taking an active interest in the matter. And it is understood that there is at least one case in Arkansas where the people of two adjoining counties are seriously considering the advantages of a merger that would give them only one court house to keep up and one set of officials to pay.—Arkansas Gazette.

**COMING BACK**

The only thing that keeps most of us from realizing our own possibilities and of getting the highest satisfaction out of life is fear. There are few human beings in the world who are not afraid of something, and as long as one is afraid of anything he cannot achieve perfect happiness.

Primitive man must have lived in a state of almost constant terror. He was afraid of wild beasts, afraid of enemies of other tribes, afraid of the thunder and lightning, afraid of evil spirits that lurked in the darkness of the forest—of real dangers and of unreal dangers which he imagined. Very few people in these days have the perfectly natural physical fears that surrounded the lives of our ancestors. But who of us has not some mental fear, fear of something that has not happened but which we think may happen to ourselves or our loved ones?

In the past two or three years the people of the United States have been the prey of a new kind of fear. They have been afraid that, in the popular phrase, the bottom had dropped out of everything. They have feared that never again would they have a job, that the factories that have shut down would never start up, that they would never be able to sell the products of their farms—those and a thousand other fears which have no relation to common sense or reality seemed to take possession of perhaps the majority of Americans.

And that is one of the reasons we have been so slow in coming back from the economic crisis. We have been afraid to use our intelligence and common sense and go ahead when everybody else was afraid to do anything but accept conditions as they are and paint them, mentally, much worse than they are.

We see signs that this widespread fear is beginning to disappear. We do not believe it ever had any real foundation, and we believe people are waking up to that fact. If we are right, and hope and courage are beginning to replace fear, then we have made a good start toward the return of good times.—Stephenville Empire-Tribune.

**Drapes and Bed Spread that Match**

A fresh, cool and summery appearance can be given to the sleeping room by the use of one of the new ensembles composed of tailored bedspread and matching window drapes which come in various colors and designs, developed in fast dyed cotton prints. These drapes and spreads are vat dyed and hence both sunfast and rub fast as well, and are very effective

in floral patterns on a rose, green, blue, tan, or orchid background. The drapes and spread shown above have a small all-over flower design, the flowers being in two shades of red and leaves in blue, against a tan and white background which meets the demand for the Colonial spirit. Scalloped edges and narrow piping trim are in keeping with the simplicity of the early American flower pattern.

**RACE SUICIDE**

Suicide among individuals is more prevalent than ever before, but the popular and most approved method of suicide is birth control. That method relieves parents of the care, worry and exertion of bringing the species into the world and caring for them after they get here. This form of suicide is becoming alarmingly fashionable and its advocates would try to preach its virtues. But has it virtues? No. I would look upon it as the most tempting route to unvirtuousness that has ever been devised by mankind. One of the greatest and most subtle enemies of the human race is one who preaches birth control. Personal ease, convenience and pleasure are its main incentives. Striving for these things never promoted virtue or built up heroic or worthwhile characters. What percentage of our heroes of the past came from families who were reared in ease and affluence? Very few, when compared with those heroes who come from the ordinary walks of life.

I was reading a short sketch on the outstanding characters of the world some time ago and I was very much impressed with the large number that came from large families reared in comparative poverty. One noted world character contemporary with our generation was the 13th child of the family, another was the 14th child of the family and several others were from comparatively large families. It is a rare thing that heroes develop from small families, especially families reared in ease and affluence. As a rule the child reared in ease and affluence, coddled, nurtured and shielded from the cares and hardships of life is rarely able to maintain his standards of living after being thrown on his own resources. The substances massed by others for him is soon used up because he neither knows how to conserve it or use it, due entirely to the fact that someone else has always done his thinking and when thrown on his own resources he doesn't know how to think for himself and his last days are generally filled with poverty, chagrin and want.

But that is not all. Neither is it the most alarming feature of this birth control philosophy. It is said by one who studies such matters and is accepted as competent authority that all the chief nations of Europe are dwindling. This is said to be definitely established by the last birth rate statistics of England, France, Germany and Italy.

We used to speak of the "White Man's Burden," but it would probably be better to speak of the "White Man's Power," power to rule the earth and formulate laws and build up civilization, according to his wants and liking. Here

**LUMBER YARD FRONT IS TREATED TO NEW COAT OF PAINT RECENTLY**

The Hico yard of the Barnes & McCullough Lumber Company has been freshened up within the last few days with a coat of paint, in fact two or three coats and as a result presents a much neater appearance.

H. E. McCullough, manager of the Hico yard, believes in practicing what he preaches, and when he recommends Duco paint to the homeowners and property holders of this vicinity, he displays confidence in the product by using some of it on his own property.

The large sign on the front of the office will be repainted as soon as possible, and when this is completed the yard will be in tip-top shape. — Hico News Review.

we might recall what was termed "The Yellow Peril" only a few years ago. When I view the devastation in the ranks of the white man by the monster "birth-control" the yellow peril looms more largely before me than ever before. The white race has dominated the earth for centuries and as we have thought, and continue to think, has thoroughly demonstrated its fitness to rule, but how long will it continue to rule, now begins to arise as a serious question.

We are told by this same student of birth statistics that if the present rate of birth control continues to obtain in these countries that in seventy-five years the population of the countries above named will have decreased by nearly one-half. The yellow man is learning our sciences, taking up our method of organizing and maintaining armies and is said to be making great progress in all of our methods of world domination. He already has vastly superior numbers to ourselves, and is very much distressed about land to colonize his surplus population on. Some day, and that day may not be so far off as many of us think, there may come a tryout, as to whom shall rule the earth between the yellow man and the white and when this comes numbers will more than likely be the determining factor, and we, through our new philosophy of birth control will be sadly lacking and through our willful repeal of Nature's laws may become extinct as other peoples on the earth, before us, have become extinct.

I am fully convinced that Nature's laws can not be set aside for man's ease and convenience without demanding of him the penalty for its violation. Besides, it would naturally appear that any nation that would defeat nature's means of its perpetuation is voluntarily choosing the road to its own extinction. A. J. HARRISON.

**TIME TO CLEAN HOUSE**

The new federal tax bill is  
in effect and the public is be-  
ginning to pay on every hand  
to maintain a war time cost of  
government in sorely depressed  
peace times.

Various states are in the  
same position as the federal  
government.

Within the last five years,  
according to a list recently is-  
sued, 122 cities in the United  
States, along with 104 coun-  
ties and improvement districts,  
have defaulted on principal or  
interest of their bonded debts.  
Since that list was issued, Chi-  
cago, Cook county, Ill., has an-  
nounced default on \$900,000 of  
bonds and interest, along with  
statement that there is a delin-  
quency of \$99,000,000 in 1930  
taxes for Chicago and Cook  
county.

The people begin to realize  
that public indebtedness, which  
they pay by taxing themselves,  
is due largely to burdens which  
they themselves demanded or  
encouraged.

Many families are now doing  
without luxuries which they en-  
joyed during the abnormal  
prosperity of a few years ago.  
They are eating simpler food,  
buying plainer clothes and us-  
ing their automobiles longer.  
Government must do the same  
thing. Public officials should  
realize that they no longer  
have the same tax resources to  
draw on, any more than the  
private citizen has the same in-  
come he had a few years ago.

Taxation budgets have been  
balanced by increased taxation,  
rather than by increased econ-  
omies and reduced governmen-  
tal overhead. This process must  
be reversed and budgets bal-  
anced by bringing government  
expenses and taxation within  
the ability of the people and in-  
dustry to pay, without hard-  
ship, out of normal peace time  
income.

**FAMOUS FOR TAXES**

Colbert, minister to Louis-  
XIV, was also so adept at levy-  
ing taxes, that at his death, the  
following epitaph was placed on  
his tombstone: "Here lies the  
father of taxation; . . . May  
Heaven . . . his faults forgiving  
while living . . . would never  
grant the nation."

**QUIT KICKING AND  
GO TO WORK**

Continual howling about re-  
duced earnings of many corpo-  
rations is doing much to prolong  
the depression, intimidate the  
individual and drive money into  
hiding.

Why shouldn't corporation and  
private earnings fall below the  
peaks of two or three years ago?  
We were then living under ab-  
normal conditions.

When an automobile salesman  
without any capital could open  
an expensive show room and  
sell automobiles as fast as he  
could get them, we were not liv-  
ing in normal times. When a  
bond salesman without any  
practical experience, capital or  
knowledge of the intrinsic value  
of the securities he handled,  
could open an office equipped  
with expensive furniture and  
oriental rugs, and sell securities,  
bonds, stocks, etc., to a clamor-  
ing public, and make money  
faster than he ever dreamed of,  
ordinary caution should have  
warned anybody conditions were  
not normal. When a real estate  
operator could take practically  
worthless land and sell it at fab-  
ulous figures, which no normal  
crop value could justify, it  
should have been self-evident  
that there was something wrong.  
And so on through every line  
of industrial, agricultural and fi-  
nancial activity.

During ten years of inflation  
countless persons came to think  
that by their own ability and  
shrewdness they were creating  
wealth for themselves by specu-  
lation when, as a matter of fact,  
most of them were creating  
nothing and saving nothing  
while they lived in a fool's para-  
dise which they thought would  
last forever.

The majority of persons have  
more today than they had in  
pre-war times, but they com-  
plain about having less because  
they are making comparisons on  
a false basis.

This is true of individuals and  
it is true of companies. Indus-  
trial concerns expanded beyond  
any normal requirements. They  
have endeavored to maintain  
operations on an inflated basis  
which cannot be done because  
there is no longer any artificial  
demand to maintain such pro-  
duction.

All over the nation, one-man  
industries and one-man farms  
are starting again on a deflated  
basis. You can drive through the  
country and see little shacks  
springing up on cheap land and  
in the far-away places. The oc-  
cupants of these little homes are  
going to produce their living and  
gradually make a little surplus.  
The big farmers, who bought  
high priced land on the strength  
of high priced crops, as well as  
the industries which built and  
equipped plants at peak prices  
and built up peak overheads, are  
all going to have to re-adjust  
themselves to the basis of the  
man who is starting at the bot-  
tom today. The laboring man  
who enjoyed war time wages for  
the past decade is in the same  
boat.

Emphasizing the term "hard  
times" has become more or less  
a racket indulged in by a grow-  
ing army of theorists who would  
remedy our ills thru schemes  
which try to create employment  
at public expense, thereby fur-  
ther discouraging industry thru  
exorbitant taxation, thus creat-  
ing more unemployment. Most  
of our economic doctors are  
afraid to state in plain English  
that we are on a new basis; that  
products of all kinds will be sell-  
ing at pre-war prices; that a  
large part of our unemployed  
are going to have to make em-  
ployment for themselves at  
wages more nearly what they  
received before the war. Many  
of the jobs they enjoyed will  
never return, because the condi-  
tions that produced them are  
gone forever, unless we start  
another world-wide war, which  
would be a terrific price to pay  
to stimulate employment.

It may be hard medicine to  
take, but it is reality and the  
sooner we recognize the condi-  
tions and adjust ourselves to  
them, the sooner we will conquer  
the depression by merely return-  
ing to more normal standards of  
living.

**VETS ARRESTED**

At Washington three members  
of the bonus-seeking army were  
taken into custody Wednesday  
as the aftermath of an unsuc-  
cessful attempt by a large group  
of veterans to approach the  
White House.

John Pace, a leader of the rad-  
ical group of ex-service men, and  
his companions, Beckworth  
Johnson and Walter F. Eiker,  
were booked on charges of dis-  
orderly conduct and parading  
without a permit. Bond for all  
three was set at \$125.

Shunted away from the execu-  
tive mansion by a heavy screen  
of guards, the arrest came after  
Pace again attempted to lead his  
group toward it.

There were several hundred  
in the group which started to-  
ward the White House, but most  
of the veterans dispersed good  
naturally. They told authorities  
they were on a "sight-seeing  
tour."

It was the second time in two  
days that extra guards had been  
rushed to the White House on  
reports of impending demon-  
stration.

**PROVING YOUR LOYALTY**

You may have a few lukewarm  
friends, but you'd like real  
friends.

Possibly you are trying to take  
in too much territory in the es-  
tablishment of certain friend-  
ships.

You want to be well thought  
of by too wide a circle, and in  
your efforts you do not con-  
vince anyone that you are des-  
irable as a strong and true  
friend.

To establish real friendships,  
enemies are bound to be made.

There will be occasions when  
you will be called upon to make  
decisions which will divorce you  
from some of those whom you  
wish to retain as friends.

If you are unwilling to make  
sacrifices for the fey as against  
your desire for the good wishes  
of a large number of persons  
you will be forever without the  
kind of friends who will stick  
in time of trouble.

Very likely you would be un-  
willing to do what you would  
require of those whom you wish  
for intimate friends.

This world continually dem-  
onstrates that you receive no  
more than you are willing to  
give in friendship, and the same  
rule applies to organizations to  
which you belong.

You get out in proportion to  
what you put into things. The  
few exceptions prove the rule.

How about proving yourself  
loyal to a person or a cause?—  
Houston Chronicle.

**NEGRO CAN'T VOTE**

The plea of Julius White,  
Houston negro, that he and other  
qualified negro voters be per-  
mitted to participate in the Dem-  
ocratic primaries, was thrown  
out of the federal court, Wed-  
nesday, when Federal Judge T.  
M. Kennerly, in a written opin-  
ion, ruled that he had no juris-  
diction in the case.

If you haven't secured your

Point section gave the Eagle  
editor's family a large and most  
delightful watermelon last Sat-  
urday and we all sure appre-  
ciated it. He is engaged to some

certainly grows the best. It was  
mighty kind of him to remem-  
ber the Eagle folk in this way  
and we sincerely thank him.

if repaired by L. E. Miller, the  
Jeweler, and the cost will be

**HAVE A CARE**

Again we say, beware of the plans of those candidates who have some fake remedy for the tax situation, which would not work even in the midst of prosperity, and which if it would work would cause the taxpayers and citizens to rise up in revolt. And take with a grain of salt the claims of candidates who by condemning the records and reputations of all other office-holders except themselves, hope to gain of salt the claims of candidates by condemning the records and reputations of all other officeholders except themselves, hope to gain elevation to the positions which they seek.

When some fellow makes a statement that you know is an untruth, don't fall out with everybody else and figure that there are no honest men left, for one snakelike speaker can scatter enough venom in one speech to keep several good men busy the rest of their natural life time, should they care to dispute the untruth and show the public the absurdity of same — which they hardly ever do, for they, like we, still believe in the fundamental common sense of the majority of the people, and hate to have their intelligence insulted by some such speaker expecting them to believe a lot of rot. — Hico News Review.

**TRENCH SILOS**

The trench silo is rapidly coming into popular favor in Texas. Until a little more than a year ago this method of providing juicy feed was comparatively unknown in this state, but so rapid has been their increase that there is already a goodly number in this commonwealth and the number is growing almost like wildfire. A little more than a year ago there was a report from county agents which showed a total of 34 trench silos in the state, and these were in 24 counties. At the close of the year county agents reported 209 of the silos had been constructed in 64 counties. Later reports show that the good work is being continued and that many farmers are preparing to build them. Harrison county, which led all others in construction last year, reported 22 built last year. In some of the counties, notably Randall, many trench silos were built last year. Randall alone reported 20. The silos vary in size all the way from 15 to 200 tons capacity, and the average cost of their construction is 25 cents per ton capacity. The ensilage held up well through the winter and greatly reduced dairy costs. The most common size of the silos is the 60-ton capacity, which are 10 feet wide at the top and 7 feet wide at the bottom, 6 feet deep and 100 feet long.

**NOTHING TO LOSE**

Some voters say they will stay out of the primary, fearing they will be obligated thereby to support some candidate they do not favor. They are making a mistake to the extent that they have nothing to lose by voting, since the nominees will be elected anyway—not the slightest doubt about it—and will neither care for the votes or need them in the general election. The voter is pledged to the support of the nominees, to be sure, and is in honor bound to support them, but to remain out of the primaries will lose to the voter an opportunity to help in selecting the candidates they approve. If the opposition is nominated the fight will be over and those who stay out of the primaries will disfranchise themselves to the detriment of their favored candidates and to the advantage of those they oppose. Go in and vote—the nominees will be elected anyway.

Senator William E. Borah of Idaho stated definitely Friday that he is not and never has been a candidate for a third party presidential nomination, but those wishing him to lead the Prohibition party refused to accept this as ending their hopes. In fact the chairman of the Prohibition party, said a movement was under way to create a greater party with Borah for president at the head of its ticket and a platform, giving equal prominence to economic issues and the liquor question.

**Mullin News**

News Notes Clipped From the Mullin Enterprise

Talk is again being revived about the continuation of the highway from Zephyr to Mullin and effort will be made by the citizens of Mullin to have it come through the business part of town in place of thru the northeast section as has been contemplated heretofore.

**M. E. CASEY ACCEPTS POSITION IN LUBBOCK**

M. E. Casey and family left Wednesday for their new home in Lubbock and that city is to be congratulated on the acquisition of this fine family.

Mr. Casey has a good position with a gin company and he has had years of valuable experience in that line.

Mr. and Mrs. Casey have an unusually large circle of friends here in the town, where they have spent the happy days of childhood and the aged and sick as well as the youth and will miss the cheer and companionship of these good people.

The children, Dorothy and Billy, have the heritage of the generous friendly spirit of their parents and their new friends will be a multitude in the western city.

**BANDITS ROB 5 ALICE MEN**

Below reprint an article published in the Caller at Corpus Christi. Mr. C. D. Jones referred to is Carmen Jones, son of Dr. R. H. Jones of Mullin and was reared here.

Five prominent Alice business men on a fishing trip in Juarez, Mexico, about 90 miles south of Laredo, were robbed of their money, watches and other valuables in a spectacular raid conducted by a group of heavily armed bandits in their fishing camp shortly after midnight Wednesday.

The fishing party was composed of A. G. Hayes, teller for the Alice Bank & Trust Co.; J. W. Roach, principal of the Alice high school; C. D. Jones, owner of the Jones pharmacy; S. P. Calhoun, manager of a local retail grocery and John Unley, filling station operator. The men left Alice Tuesday.

After lining their victims up, the camp was thoroughly searched and everything of value was collected by the bandits. The key was removed from the car by the fishermen, and the ignition cut before the raid was made.

A camp below the one pitched by the Alice men was robbed earlier in the night. The party returned to Alice Thursday night.

**MULLIN CATTLE TOP THE MARKET**

Twice during the month E.A. Kemp topped the Fort Worth market with his fat yearlings. The Star-Telegram carries the following news item in July 15 issue:

E. A. Kemp, Mullin, marketed at Fort Worth seven yearlings that averaged 905 pounds and sold for \$7.50 a hundred—the top price for the year. They had been on feed for about eight months. Two weeks ago he marketed a truckload of yearlings from the same feedlot at \$7—the first to bring the price for several weeks.

**STORE BURGLARIZED**

Last Sunday night the mercantile establishment of E. A. Kemp was entered and robbed of about \$30 in cash. The store was entered by breaking one of the upper back windows, then the vault was entered, where the money was obtained. So far Mr. Kemp has failed to miss any goods out of the store. It is thought the robbery was at an early hour, while people were at the church. No arrests have been made.

**PICNIC**

Quite a crowd enjoyed the picnic and barbecue at the Vaughan park Friday. The most of the local candidates were present, presenting their claim to the voters. Oscar Calloway made an address in the afternoon that seemed to be appreciated by the hearers. After Mr. Calloway's address the candidates for representative were each given a chance to tell the people why they should be the next representative.

**HONORED ON EVE OF DEPARTURE**

Tuesday afternoon at 6 p. m., a group of Mrs. M. E. Casey's friends honored her with a picnic on Mullin creek.

The friends, old and young, came to do homage to their good friend, who left for Lubbock the next day to reside.

The picnicers had a fine outing and a delicious feast of turkey and everything. Just as supper was over and the sun had gone for the day, Miss Rosa Meek Fletcher called for Miss Carrie Kirkpatrick to deliver a political address and instead she gave a most humorous sketch of the entire Casey family as they journeyed west and also presented to the honoree gifts at the call of each station between Mullin and Lubbock. It was a most unique and amusing plan and created much merriment.

Mrs. Casey is a priceless friend and her many loved ones here know she will soon draw a coterie of friends in her new home, but the vacancy she leaves here will be hard to fill. Mrs. S. J. Casey went to Temple Sunday, where she will be in a hospital for the next two weeks. Mrs. Casey's many friends anticipate for her a speedy recovery. She enjoyed the auto trip to Temple with Mrs. H. R. McDonald and son, who were en route to Cameron for a visit with relatives.

Mr. and Mrs. Jack Daniel and baby left on an automobile trip to Tennessee Sunday morning. They expect to be gone for several weeks.

Since last Friday this section has been suffering with extreme heat and the temperature ranging around 100 degrees. Late corn and gardens have suffered more than anything. A good rain would be acceptable at this time, both to relieve the heat wave and to furnish moisture to the parched earth.

Large substitution of American cotton for Indian by foreign mills is indicated in comparative figures on exports of cotton by the two nations, says the New York Cotton Exchange Service. While exports from the United States have been far above last season, Indian exports have been much smaller.

Speaker Garner will have no formal notification that he has been nominated by Democrats for vice president, but will be advised by letter from Senator A. B. French governmental circles emphasize that it is far from the intention of European powers to form a united front against the United States on the matter of war debts. Any assertion, it is added, that Great Britain under the recent Franco-British consulate pact would be restricted in dealing with British debts to the United States is palpably absurd.

Harris County's commissioners court has been again defeated in the effort to have the present state automobile license law declared unconstitutional. District Judge Charles F. Ashe at Houston refused to grant a new trial in the suit, brought by the commissioners against the state. Judge Ashe handed down a judgment holding the law constitutional. The commissioners will take an appeal.

Unique in that it commemorated the only event of its kind in the United States within the last year—the construction of any new rail project—formal completion and inauguration of regular service over the Fort Worth & Denver Northern was observed at Pampa Friday. The new line, which extends from Childress to Pampa by way of Wellington and Shamrock, is 110 miles long. Its construction represents an expenditure of about \$4,000,000.

Phelps said he and another youth held his father and stepmother as they struggled, while two other youths stabbed them with a butcher knife. The hammer was found in the back yard of the Phelps home a quarter of a mile south of Birch Tree. The butcher knife, its blade broken, was discovered in the house.

COMMUNISTS' DEMANDS

If anybody is curious to know just what the Communists want he may get a good idea from the platform of the party in New York state. Among other things the communists demand: Unemployment insurance to the full amount of their wages for all workers, "industrial or farmer"; state to build workers' homes and rent them at cost; free food, clothing and school supplies for children of unemployed; full social, economic and political rights for negroes; immediate payment in full by the government of all deposits in closed banks; full payment of the veterans' bonus; the turning over of all army and navy appropriations into unemployment and social insurance fund; right of soldiers to elect their own officers and the abolition of all vagrancy laws and of eviction of needy unemployed. The general principle, it can be seen, is to take it away from those who have and give it to those who haven't.—Exchange.

HINTS FOR HOMEMAKERS

To remove coffee stains, cover the spot with the yolk of an egg to which has been added an equal amount of carbon tetrachloride. The mixture should be well stirred before using. After the spot has soaked a few minutes, wash out the mixture with warm water and, while still moist, iron on the wrong side of the cloth.

A colander turned upside-down over meat in a frying pan allows the steam to escape and at the same time prevents the fat from spattering on the stove.

If fried foods are placed on soft paper when taken out of hot fat, most of the excess grease will be absorbed.

When preparing fresh peaches or tomatoes for table use, the skins can be easily removed by firmly pressing the back of a knife against the fruit and drawing from the blossom toward the stem end. This will bruise the skin sufficiently, so that it can be peeled off without cutting.

Mildew stains may be removed from cloth after washing in the customary manner and immersing in hydrogen peroxide or in a solution of chlorinated lime while still damp. Then expose the spot to the sun's rays. If the material to be bleached is colored, a test on a scrap piece or on the selvage should be made to determine whether or not the dye is affected.—Popular Mechanics Magazine.

FUTILITY OF REPEAL

Regardless of whatever promises that may be made by either of the platforms of the major parties in the coming campaign, there is not a reasonable possibility that the eighteenth amendment can be repealed during the next national administration. The very strenuous efforts put forth in the two national conventions to get a repeal plank adopted, and the success of the Democrats in doing so, was nothing more than a vote-catching proposition. The Republicans know, and the Democrats know, that it will require a much longer and more difficult campaign to effect repeal than it did to adopt the prohibition amendment.

It must be remembered that it requires a two-thirds vote of congress to submit the proposition of repeal, and then a three-fourths ratification by the states to effect its accomplishment. In other words, the constitution provides the same method for repeal that is required to adopt an amendment. Recently a test vote in the congress showed a majority of both senate and house opposed even to submission of the question. A careful check-up of the candidates for election in both houses this fall does not indicate but a small change in favor of the wets in the next congress.

But if congress could be keyed up to vote two-thirds for repeal, it would still be a long distance from repeal, for 13 states refusing to give up prohibition could absolutely prevent repeal.

So long as the 18th amendment is not repealed by a two-thirds vote of congress and by three-fourths of the states of the union, a state might vote 100 to 1 for liquor and not get it. It would take 36 states voting for repeal before it could be accomplished. If 35 states were to vote wet and 13 dry, the amendment would still stand. And the discouraging thing for the wets is that at least 18 states seem impossible of ever going wet again.

Repeal in the light of these cold dry facts, seems a long way off.—San Marcos Record.

The Record is correct as far as it goes, yet the prohibition law is not on nearly so secure a basis as the Record seems to believe. The fact is, the 18th amendment is only an enabling act, giving congress the right and power to enact laws prohibiting the manufacture and sale of intoxicating liquor, but if the federal congress at the next session or at any other time votes to annul or abolish the Volstead act, the 18th amendment will be of no avail. Any session of congress can do away with the prohibition law, regardless of the amendment, hence it behooves those interested in abolition of the liquor traffic to elect congressmen committed to the cause of prohibition, and this applies to congressmen at large as well as those representing the districts.

President Hoover Friday ruled himself a \$15,000 a year reduction in salary and simultaneously reduced the salaries of his cabinet officers by 15 percent. Last Friday, the order, cutting cabinet members from \$15,000 a year to \$12,750 a year was issued while the president sat with them at his regular semi-weekly cabinet meeting. Mr. Hoover, himself, it was said, took a 20 percent cut as the maximum allowed under the law. Ordinarily he receives \$75,000 a year.

EXEMPTION CERTIFICATES

The following classes are exempt from poll taxes: Those who have become twenty-one years of age since the first of January, 1931; those who became sixty years of age before the first of January, 1931; those blind, deaf or dumb, or permanently disabled or who have lost one hand or one foot. Citizens of the above classes can vote without paying poll taxes, but must secure exemption certificates if they vote in the city boxes. Such certificates may be secured from the tax collector any day before election day. Voters who are exempt from poll tax and live outside the city are not required to have exemption receipts. Voters must be twenty-one years of age by the time of the primary to be eligible to vote.

Exemption certificates to young voters are not continuous. Other exemption certificates once given, need not be renewed unless the voter moves from one box to another. In case of removal of a voter who holds an exemption certificate to another voting box which requires such exemption certificates, the voter must present his certificate to the tax collector for endorsement, which endorsement will show the date of removal, the date of endorsement, the new address and precinct to which the voter has moved and be under the seal and signed by the county tax collector.

Putting Color into the Bathroom

WHEN the first of the modern bathrooms began to make their appearance, all white and spotless they somehow impressed everyone with the idea that nothing but white is clean. And then for years there came along the endless vista of white bathrooms, white walls, white bath curtains, white towels, and white toilet seats. If it wasn't white, it wasn't in the bathroom.

the rest of the color scheme. The towels are not necessarily all white any more, either. They now come in sets with pretty colored decorative motifs on the border, the towel, face cloth, and bath mat matching in design.

The toilet seat is in a rich peary texture colored variously, even the standard white, but with its thoroughly waterproof pyralin finish often furnishing the main color.

These seats are a mother of really decorative fabric accessories for the bathroom, morning operation day amid evening.

**REAL HARD TIMES**

You may think you are having a hard time, but suppose you had taken passage on the good ship Seaflower, sailing from Belfast harbor on July 19, 1741, bound for Philadelphia, writes Joe Taylor in the Dallas News. Suppose you had been one of the 106 passengers and had not been included among the 46 who died on the voyage of 16 weeks between Belfast and Boston. Imagine how delectable your present condition is in comparison with that of the remaining passengers, who were reduced to the extremity of eating six of their deceased companions, and were cutting up the seventh, when another British ship was sighted, and which gave succor. Those were the hard old times, sometimes mis-called the good old times.

The Seaflower did not reach the post of destination. It was diverted to Boston by the rescue ship, which supplied food, water and enough sailors to bring the suffering remnant to the nearest port. The captain and first mate were among those who had died, the mast was sprung under the stress of a storm. This unhistoric tragedy was recently found inscribed on a yellowed document in the archives of Boston municipal paltry, where it had reposed almost two hundred years. It was a petition to the selectmen of the town, seeking help for the survivors of the tragic voyage. The record does not reveal the action taken by the Town Council, but it is not doubted that help was rendered. The people of Massachusetts Bay were not overgenerous in their opinions, regarding one another with more or less suspicion as they did, but we can not entertain a doubt of their benevolence in the case cited. Probably the stewards of the town voted as much as six shillings to each of the sufferers. More than six shillings would very likely have seemed extravagant to the Puritan mind, perhaps a contribution to luxury or dissipation.

**COUNT YOUR BLESSINGS**

Mr. Mellon, now a diplomat, made a very diplomatic remark recently. He said that the trouble with us here in America is that we spend more time thinking about what we have lost than in rejoicing over what we have left. It was a wise thought, not to say a wise-crack. Many of us lament the evaporation of our equities, forgetting that we have our health left. When we come to evaluate the vanished equities and appraise our nonassessable health we discover that we still possess the better part. When State Press saw his investment in the Lizzie Fluke Oil & Petroleum company go blue, he went blue. It occurred to him that life is cruel, that fate is barbarous that fortune is a sorceress, which lures good men into quagmires from which they extricate themselves with such difficulty they don't look like anything after they drag out. But on a reconsideration, he found solace in the reflection that millionaires invariably have wrinkles around their eyes, sometimes bunions on their feet. Every thinking man can console himself for the loss of money by taking inventory of his advantages. The Hon. Al Smith, for one, is believed to have lost much of his pecuniary capital, as well as his chance to be president. But he still has a sound mind in a strong body, an undiminished group of personal friends and an affectionate family.—State Press in Dallas News.

**FOR LABOR AND FARM HOMES**

A dollar spent for road building is mostly an investment in labor. About 80 per cent of road building fund goes into the pockets of workmen, either on the job or in industries providing food, machinery and supplies. It is estimated that during 1931 an average of two million men were employed in road work, which meant a living for some six million persons.

There has never been a better time to build farm-to-market roads than now, when the economic need for improved highways, especially in rural and farming areas, grows more intense. Prices for materials are at extremely low levels. Most important of all is the crying demand for jobs and more jobs for those who are out of work.

Every time a new road is built, or an old one improved in accord with modern design, social and economic progress is made. Fine weatherproof, bituminous surfaced roads can be built for five thousand dollars a mile and less, giving men employment and opening inaccessible areas for settlement.

**ROBOT TALKS TO FIRE VICTIMS AND POINTS OUT WAY TO ESCAPE**

Talking in a calm voice, an automatic fire alarm warns its audience of the presence of flames and directs the way to the nearest exits.

By means of electrical devices, the system combines an automatic fire detector with a music reproducer that is connected to loud speakers. The system responds to heat in three ways, sending an alarm to the nearest fire station, directing the firemen to the side of the building nearest the fire, and turning on lights at the front of the building to show firemen the particular part of the building where the fire is located. At the same time, the robot turns on the music reproducer and a flave of trumpets comes from the loud speakers. In addition, green arrows light up, pointing to the exits.

After the trumpets sound, a calm, but commanding voice, produced by a record, says: "There is a fire emergency, but no immediate danger. You must leave the building. You are drilled in this and know just what to do. Leave your hats and coats, take your places in line. Steady now, do not rush. Follow the green arrows." A band strikes up a martial air and the sound of approaching sirens is heard. The record, in this case is designed for use in school. With variations, it could be used in theatres, churches, auditoriums and similar places. Everything in the record has a definite purpose. The band piece is chosen for its strong march rhythm. The siren is injected so the listeners will not be frightened when the real sirens are heard outside as fire engines arrive.—Popular Mechanics Magazine

"I feel like Joe E. Brown," So declared Mrs. O. M. Tucker of Springfield, Mo., after an operation that allowed her to open her mouth for the first time in more than a month.

"You can't imagine how odd it feels to be able to drop your jaw for the first time in weeks," she said. "Why, it seems I could swallow the world."

During the weeks her lips were plastered together Mrs. Tucker was fed liquids through a tube forced through the lips.

**BEAUTY in the HOME**

Modern Home Decoration Service  
Charming Informal Dining Room

IN the room pictured above, the low-beamed ceiling created a situation where a simple, sturdy type of furniture was needed. As a proper background, the walls were finished in flat wall patina green, with the ceiling several tints lighter than the wall color. The beams in the ceiling were stained walnut to carry the general woodwork color and then varnished and waxed to a dull finish. Table and chairs were finished natural and waxed. The china closet was done in mahogany red duo on the outside and the inside finish left natural, properly waxed. Against such a background, the yellow dishes sparkle most invitingly. A bowl for fruit, candlesticks or serving table, can well repeat this mandarin red note to advantage. Draw curtains in easement cloth for the windows are always good and are particularly practical for this room, as this style of curtains also hangs in very well with the simplicity of the large colorful rag rug which almost entirely covers the dark oak-stained floor.

I have been busy with my official work a good part of the time during the campaign, and have seen as many of the voters as I could at my spare time, yet I have been unable to see them all. This is to say that I solicit the votes of Mills county citizens in the primary for a second term as county judge. I have served you to the best of my ability the past year and a half and feel that with my experience and knowledge of the details of the office since assuming its duties I will be able to give fully as good, if not better, service than I have given in the past. I shall continue to give my full time and best ability to the duties of the office and will sincerely appreciate a re-election.

Yours to serve,  
ROY SIMPSON.

STATES ASK LOANS

Thirty states have already signified the probability that they will ask a portion of the \$300,000,000 provided in the closing hours of congress for direct relief of unemployment.

The first eight definitely to indicate the amounts needed gave a total of \$117,050,000 to be asked immediately. Gov. Pinchot of Pennsylvania has written the Reconstruction Finance Corporation asserting his state needs \$45,000,000, and Representative Britten said Illinois doubtless will need as much.

The fund is to be distributed in the form of loans to states which will distribute the money among their relief agencies.

President Hoover planned to sign the bill this week. Immediately afterward the corporation is expected to formulate regulations. All applications, whether for aid of a city, county or other political subdivision, must be attested, under the act, by the governor of the state.

The bill provides that not more than 15 per cent of the \$300,000,000 may be allotted to any one state. Governor Pinchot who last year appealed for federal aid to stem destitution in the Pennsylvania coal fields, was the first to take direct action.

LOTS OF PLUMS

What is practically a new source of revenue for Mills county is the market for wild plums, or mountain plums as they are called.

While in years gone by there has been a small demand for these plums for jelly making, the present season Long & Berry have bought truck loads of the fruit and thereby scattered a lot of money throughout the country. This week Mr. Berry carried a truck load of plums to Waco and sold 103 bushels in less than two hours and expects to leave for that city again today with another load. This shows there are resources in this county that have not been realized and they all go to make this a wonderful country. Few people realized that there were so many plums growing throughout the county until these gentlemen commenced to develop the market.
