TOLBERT PATTERSON

Candidate for Representative Comanche and Mills counties. Mr. Patterson is making an active campaign in the two counties. He has participated in a number of community meetings and has made a number of speeches outlining his policies. Mr. Patterson will speak in Big Valley tonight and in Goldthwaite Saturday afternoon at 2 o'clock from the band stand on the court house lawn. Ladies are especially invited to hear him.

Warning

It has come to my knowledge that a former employee is testing eyes and fitting glasses without a Texas optometry license and representing he is connected with me. I have never had a man representing me in that capacity. I have always personally done my own eyesight fitting and will continue to do so. Any person claiming to represent me as stated above is an impostor and the sheriff should be notified. DR. FRED R. BAKER.

THE ISSUE

Gentlemen opposing me have made a remarkable discovery. They have found out you love to pay taxes. More taxes and bigger the better. They are trying to make you mad at me because I was so slow about levying some more taxes. They are terribly sore because I failed to soak you with a thirty-million dollar tax bill to pay the Old Age Pension. "Beat Luker and give me the job. I will give you a tax wall you never dreamed of and do it quick." Those who seek only to get the money without regard for those who toil to pay should not tamper with tax bills.

We made a good start toward collecting escaping taxes in the last regular session. We will continue this work. In addition to this, we must levy some new taxes. The pension must be paid and it must be paid with taxes. The tax must be sensible. We cannot afford to create more debt than we help. You have a right to expect that your Representative will keep his feet on the ground in any storm. You want common sense legislation. So do I. Let us go on together. Yours, R. A. LUKER. Fate Eckert and family spent several days last week in Austin, visiting relatives and friends. Buck, Johnnie and Rachel Ford went to Austin last week to do some remodeling on their home down there. The ball game Sunday afternoon between Moline and Scallorn was 4 to 1 in Scallorn's favor. Scallorn's team will play Lometa Sunday afternoon. We didn't have church Saturday night and Sunday on account of the rain. The Goldthwaite singing class invites all the singers and every one else that loves to hear singing to meet them at the Scallorn church Sunday night. REPORTER.

It is important to read the advertisements in the Eagle. They all carry a profitable message.

THE MEXICAN ROAD

It is exactly 400 years this month since Alvar Nunez Cabeza de Vaca entered the City of Mexico to end the long odyssey of his wanderings from the Florida coast. The first white man ever to cross the Rio Grande, his meandering journey thence to the late Aztec capital was a wearisome trek of many months. With time the route was shortened, but for centuries travel between the Texas border and the heart of the Mexican plateau remained a difficult and long-drawn out affair. So it was until the railroads linked the two countries in the time of Diaz. Since then aeroplanes have cut the time to a few hours.
The formal opening of the long-planned highway from Laredo to Mexico City has added another chapter to the history of connections between the two lands. It is probably more important than any step previously taken, for more people are destined to use the new route than have ever gone that way by foot, or mule, or by train or air. The popularity of the road was assured from the start. It taps the rich field offered by the universal motoring habits of the American people, eager to visit exotic places and infinitely restless in their quest of novelty. It will profit by the cult of things Mexican that has grown up in this country in recent years. Mexico is foreign in a sense in which not even Quebec is foreign. It offers endless interest to the tourist—variety of scenery and strange customs, the beautiful handwork of one of the world's most artistic races, historical monuments out of a distant past full of pageantry and deep mystery. With all our own country contains, it has no romantic gardens of Koxchimilco or rich treasures of Monte Alban, no mighty citadel of Teotihuacan or pyramid of Chichen, no place so full of memories of mighty drama as the Zocalo, or so redolent of the peace of another world as Taxco of the Guerrero hills.
The new highway bids fair to be much more than a sightseeing thoroughfare. It should do more to establish real friendship between the two nations than all the instrumentalities of diplomacy or the studied efforts of the peace societies. It would be hard even to imagine serious discord with a people to visit whom in the fullness of peace affords so much delight to the visitor. And, lest we forget that a road runs both ways, may increasing numbers of Mexicans avail themselves of it to know better their neighbors to the north.—New York Herald Tribune.

BOUNTIES TO FARMERS

The relief issue, which both sides admit is the heart of the budget balancing issue, stands at the center of the coming campaign. It also is recognized as determining the size of taxes that will need to be levied to pay the bills.
Viewpoints of the two parties are disclosed by their platforms to be far apart.
Less of a difference is found in the party promises concerning bounties to be paid to farmers. Republicans promise farmers two bounties, one similar to the bounty now paid for applying soil conservation methods, and a second designed to enable farmers to export surplus products for whatever price they will bring.
Democrats promise one bounty, the present soil conservation bounty of approximately \$500,000,000 a year. But they promise to make price fixing loans on certain commodities, and their critics contend that these loans can become bounties much like those of the old federal farm board.
The present soil conservation program is to be financed by revenue from the new tax on undistributed corporation earnings.—United States News.

STRANGE ECHO OF NRA

A peculiar situation develops with a report of the federal trade commission charging "collusive bidding" on PWA projects by four steel companies. The report states that the companies in question "admitted" that they had quoted identical prices on sheet piling for three projects and explained that in so doing they were continuing a practice established under the NRA steel code.
The steel code, of course, was approved officially by the administration, and after the supreme court had invalidated the NRA it was the administration's desire that the standards it had instituted should be maintained. There have been complaints from administration sources that certain industries were failing to do that. Yet when one of them does it in a single particular it is cited to a government agency and the report is turned over to the president for "appropriate action."
Price-fixing and agreements that tend to eliminate competition and create monopoly should never be permitted. But they were permitted under the NRA, which was to be the keynote of the New Deal arch. And now if there is to be a penalty for the practice, just how many people should it affect?—Kansas City Times.
