## Second Annual Victory Book Campaign Starts

### Books Or Cash Donations At City Utilities Office

The second annual drive for the collection of books for all branches of the service under way officially on Friday, Jan. 22, 1943, and will be carried on throughout the month of January and include Friday, March 5.

The purpose of the drive is to collect as many books as it is possible to accumulate in the time. This year, however, the drive is being placed on the books—both as to condition and readability—rather than on the attainment of a staggering over-all total. Classifications of books for the increasing military of our fighting men, soldiers, marines, coast guardsmen and merchant seamen include current best-sellers.

## OUR MEN NEED BOOKS

Send them to the nearest collection center or public library.

More recently published books, popular fiction, technical books, humorous and small-sized editions of your favorite titles, both current and classic.

It is the consensus of opinion of the man on the street here that the two Camp Bowie soldiers probably used the wrong technique if they were trying to negotiate a loan from the Trent State Bank here last Sunday morning. At any rate, they didn't get the loan!

Sgt. Alford M. Parson and Sgt. Richard Hanson of Camp Bowie were returning to camp and traveling north through the streets of Goldthwaite during the cold of the morning last Sunday about four a. m. when Sgt. Hanson, the driver, apparently fell asleep on the down grade and drove his 1941 four-door Chevrolet through the stone front of the Trent State Bank, stopping bang-up at the president's desk. The car was so wedged in that it took a Fairman Company tractor to pull it out—badly wrecked.

Damage to the bank building is estimated at about \$400 by Grover Dalton, with two chairs smashed and a desk slightly damaged.

V. D. TYSON SELLS CALVES AT \$14.10 PER HUNDRED LBS.

V. D. Tyson last week sold some calves from his Williams Ranch place for the highest price of any sold in this part of Texas—at \$14.10 per hundred pounds.

## 21,497 CASUALTIES IN NAVY MARINES, COAST GUARD IN WAR

The Public Relations Office of the Eighth Naval District, Dallas, has furnished the Eagle a casualty list of men in the naval services from December 16 to December 31, 1942. No names of men or boys from Mills or nearby counties appears on the list.

Casualties of United States naval forces—dead, wounded and missing—reported to next of kin from Dec. 16 to Dec. 31, 1942, inclusive, totaled 21,497. They are subdivided into the following classifications:

Dead	418
Wounded	403
Missing	398
Total	1,219

The names of 101 Texans are included in the grand total. Of these, 29 were reported dead, 32 wounded, and 40 missing.

The preponderant share of these casualties resulted from direct action with the enemy, but included in the total are names of those who were lost in accidents at sea and in the air on duty directly connected with war time operations. Natural deaths or accidents not connected with operations against the enemy are not included in the total.

The casualties in this list cover personnel of the Navy Marine Corps and Coast Guard. Some of those under the classification of "missing" may have been rescued at sea and landed at isolated spots or otherwise made their way to safety at places from which they have had no opportunity to communicate with U. S. Naval authorities.

List No. 20 brings the total of Navy, Marine Corps and Coast Guard casualties reported to next of kin from Dec. 7, 1941, to Dec. 31, 1942, inclusive, to a grand total of 21,497.

## "BOMBERS OVER BERLIN"

I've heard of the "Moon over Miami," And it always gave me a thrill, And how the blue-birds will fly over Dover, We hope that they pretty soon will; But the one that gives us all fiendish delight—I hope you don't think it's a sin— Is the one we hear now near every night, Entitled, "Bombers over Berlin."

There are things we've always looked up to, As our Freedom-spanned land we have trod, Such as blue sky and stars and firmament, And life-giving showers and God; We've seen our Cadets cutting didos, With eschelen, dog-fight and spin, But how we would like to have just a glimpse Of "Bombers over Berlin."

You Hitler! Who never looked over your shoe-tops! And you, Goering! and Ribbentrop, too! Get those stiff necks ready for bending! There's lots of looking-up coming to you! You Heimler! and all your Brute Heelers, With your noose, your torture and gin, Just drop your eye-glass, you won't need a spy-glass To see "Bombers over Berlin!"

You Nazis have this coming to you; Don't holler for friends you have none, Just dig-in and dodge and crawl under, Prostrate Poland showed you how it is done! Drag your Fuehrer out of his dug-out, by his mustache, Wipe the sweat and the slaver off his chin, And say "You lied, you lied to US too, you rat! Hell, Hitler, there's 'Bombers over Berlin!'"

—F.P.B.

## ADVERTISING NEED SEEN TO KEEP UP PRESTIGE OF STORES

Fort Worth, Jan. 11.—Maintenance by retail stores of the leadership which they have gained through advertising is one of the chief goals of wartime advertising, members of the Texas Newspaper Advertising Managers Association were told here today.

In a round-table discussion led by retiring President Luther Lau of the Beaumont Enterprise Journal, members discussed the need of both retailers and wholesalers to maintain their advertising despite a shortage in the goods they sell. It was recalled that after the last war, firms who didn't retain their leadership through advertising suffered great losses in trade, and often were forced out of business.

# NEWS from

YOUR COUNTY HOME DEMONSTRATION AGENT  
TEXAS EXTENSION SERVICE

By GERALDENE SUMMERS  
Mills County Home Demonstration Agent.

### FRAME GARDEN

Doris Smith, Victory Garden Demonstrator of the Prairie 4-H Club, has recently finished a frame garden which is 15 feet by 3 feet. She used scrap lumber to make the frame and old sacks which were sewed together as the cover. Doris has already put out onion sets in the frame garden and later will plant carrots, radishes, lettuce, beets, and greens. This is one assurance of having fresh vegetables at the table the year round.

### POULTRY DEMONSTRATOR

On May 22, 1942, Anna Belle Wasserman, Victory Poultry Demonstrator of Duren 4-H Club, bought 100 day-old pullets of which she raised 90 to laying pullets. To date Anna Belle has sold the eggs two different times and received \$15. She is buying war stamps with the money and will later buy more baby chicks to help in the 1943 production goals set by Claude Wickard, the Secretary of Agriculture.

### MAKE PLANS FOR LIVESTOCK SHOW

Last week, Jan. 12-16, Mills County 4-H Club members met in their respective clubs and made plans for the exhibits for the Livestock Show. The club program for January was on Poultry Production for 1943.

- Points stressed were:
1. Buy a quality breed.
  2. Make definite preparations before chicks arrive.
  3. Have brooder temperature 95 to 98 degrees.
  4. Disinfect brooder house with hot water to which lye has been added.
  5. Have litter on floor.
  6. Have baby chick starter on hand.
  7. Recommend glass waterers.
  8. Make own feed hoppers from scrap lumber.
  9. Feed starter until chicks are 6 to 8 weeks old. Gradually change to growing mash and feed that until 5 months old, then change to laying mash.

### BIG VALLEY 4-H CLUB

The Big Valley 4-H Club met January 13 at the school house

with 15 members present. The Home Demonstration Agent, Miss Geraldene Summers, gave a demonstration on poultry. Plans were made for the entries to be made at the Livestock Show.

Those present were Miss Ruby Cave, sponsor of the group, Elizabeth Ann Hapgood, Mona Martinez, Sybil E. Woods, Eliza Flores, Rita Lou Dennard, Mary Lena Flores, Okey Flores, Melba McConal, Kathryn Dennard, Mary Ynostrosa, Ramona Martinez, Genieve Norriege, Nicholosa Martinez, Juanita Weaver, and Miss Summers.

This group has made 20 utility bags for the Red Cross.

### SOAP MAKING

Not so many years ago all the soap the family used was made at home. Soap making like many of the common household duties of the past has, for the most part, been taken out of the home and the process of soap making once so familiar to all householders, is now known to comparatively few. However, Mills County homemakers find there is a considerable saving in the family budget if they utilize all the fat scraps and cracklings by turning them into soap.

Several questions naturally present themselves when one thinks of soap making. One wants to know if soaps for all purposes can be made at home; if one can make toilet soap that will be kind to the skin; if soap flakes, scouring soaps, abrasive soaps can be made at home; and if one can make colored and perfumed soaps. In each case the answer is YES.

Soap making is the simple process of combining oil or fat with an alkali such as lye. Best results are obtained by following the recipes carefully and paying particular attention to the temperatures recommended. The ingredients can be varied to meet the cleaning problems for which the soap is intended.

A two-quart enamel pan or pitcher should be used for mixing the lye solution. Mrs. Roy Simpson of the Live Oak Home Demonstration Club uses a large wash pot to mix the rest of the soap ingredients. ALWAYS use a wooden paddle or spoon or an enamel spoon for stirring. Molds for the soap can be made from

small cheese boxes which have been lined with wax paper or a camp muslin cloth. If you are making soap to exhibit at the Livestock Show, the home demonstration agent suggests using match boxes which have been lined with wax paper.

The grease should be cleaned by adding twice its bulk of boiling water. Stir the grease until it is dissolved and then let it stand until it hardens. If the grease has a strong odor melt it in the top of an improvised double boiler and cook it with clabbered milk—one cup of milk to a pound of grease. A sliced medium sized potato added for each three pounds of grease is another good method for combatting odors in grease.

**Soap Recipe**  
The following soap recipe has proved most efficient:

Six-pounds fat, 2 1-2 pints cold water, 1 can high-test lye (about 13 ounces). Add the lye to the water. (This will prevent boiling action.) Cover lye as you stir with wooden or enamel spoon to prevent fumes irritating nose and throat. Cool to correct temperature. Melt fat to clear liquid. If different kinds of fat are used mix thoroughly. Cool until the fat reaches the right temperature. Pour the lye solution into the fat in a thin steady stream, stirring the fat and lye solution slowly, steadily, and in one direction. Stir until the mixture becomes thick like honey. This will take about 10 or 20 minutes. When spoon leaves a decided track in the thick mixture it is ready to pour.

If you want to make soap float, gently fold in air before it sets. If the mixture of lye and fat does not become thick within a reasonable time and there is a greasy layer on top, the mixture is too warm. Set the container in a pan of cold water for a short time and keep mixture stirred from side and bottom or simply leave mixture standing in the room and give it an occasional stir. If, on the other hand, there are lumps in the mixture, it is doubtless too cool, so place container in pan of warm water for a short time and continue stirring to remove lumps. All this can be avoided if a thermometer is used.

When the soap is thick pour into box that has been lined with waxed paper. Cover soap to retain heat. Let it remain undisturbed for 24 hours in a warm place. When there is neither grease on top nor liquid at the bottom, it is ready to cut. Stack in log cabin fashion to harden. The soap should be allowed to stand from three to six months before using. It will then be perfectly dry.

### Imperfections in Soap

Hard, crumbly soap is caused by excess lye or too vigorous stirring. Hard, brittle soap is caused by too low a temperature while stirring. Greasy layer on top of the soap indicates too little lye for the amount of fat used.

Streaked soap shows that fat and lye solution were not thoroughly mixed. Clear lye on the bottom of the soap may be due to a partial separation of the fat and lye.

White deposit on soap may be due to use of hard water in making lye solution; a little free lye; addition of too much borax. Cracks in the soap may be due to too much stirring; too much free lye; drying too quickly.

A neutrap soap will not "bite" the tongue or smart the skin; it will not feel greasy to the hands; it will be odorless; and it will have a uniform attractive appearance.

**Variations in Homemade Soaps**  
**SOAP FLAKESE.** Flake soap that is about three days old with soap chipper or slaw cutter. Stir occasionally while drying. This is convenient because it dissolves so readily, and is economical in use as well as convenient.  
**SOAP JELLY.** Cut 1 pound of hard soap into fine shavings and add 1 gallon of water. Boil slowly for about ten minutes, then cool. Keep covered to prevent drying out.

**BORAX SOAP.** Two table-spoons borax may be added to the recipe for quickening the sudsing action of the soap.  
**GLYCERINE SOAP.** Add 4 to 6 ounces of glycerine to the soap shortly after the lye solution has been added. This is especially good for dry, sensitive skins. (Glycerine has gone to war. Perhaps it will be hard to buy any.)

**COLORS AND PERFUMED SOAPS.** No soap should be deep-

## CEDAR KNOB

By Mrs. ELMER SCOBY

This is our first writing since the beginning of the new year. The year extends ahead with a long busy season for the farmer and the farmer's wife.

Boss Cornelius spent a night in Brownwood last week at the bedside of a sick friend.

Mr. and Mrs. Fullbright Mays have moved to their farm they recently purchased from Mr. and Mrs. Marvin Atnip. We welcome them to our community.

Mrs. Williams of Dallas is visiting in the home of her sister, Mrs. Mays.

Mr. and Mrs. Boss Cornelius nearly had a serious fire Monday night of last week. Mr. Cornelius awakened in the night smelling smoke. He discovered a chest near the heater in the bedroom was on fire, and by quick action he was able to smother the blaze. The contents of the chest were a total loss, including several new sheets and quilt tops, one of which Mrs. Cornelius valued very highly.

Miss Zeldia Stuart is employed as a night operator at the telephone exchange.

We appreciate Bro. Bowles' sanction of the rural correspondent. Sometimes our writings seem futile.

Elmer Scoby had word from his brother in Camp McCoy, Wisconsin. He stated that it was extremely cold there. It was 10 degrees below zero, but he said that people there did not consider that cold weather.

Mrs. Cornelius hears almost daily from her soldier son stationed in Nebraska. He stated that there was snow on the ground most all the time.

Mr. and Mrs. E. D. Kelley and little daughter visited Mr. and Mrs. Elmer Scoby and mother Friday night.

Johno?  
 Floree, if you and Lucy did alright last week-end, what would you call how you did this week-end?

Gladys, just whose wedding did you go to Wednesday night? We heard Mrs. Bigham telling Cash how to act.

My! My! These Soph. girls just can't be quiet in English. Can you Floree, Monetta, Jackie, Oma Jean, Olive Dee, and Wanda?

Johnny Ray thinks he might as well start going to Zephyr too. What about that, Patsy?

Mullin and San Saba sure will miss Barbara and Bobby when they go to Austin. What's Austin got that Goldthwaite hasn't, girls?

Jackie D. and "Blackie" M. seemed to be doing okay-dokay Saturday night.

We are proud to welcome Mrs. Cowan, who succeeds Miss Padgett, and will teach elementary Spanish.

Our new pupils are Wynone Whitty, Wandadean Whitty, and Wymen Whitty, from Whiteface, Texas.

One of the most outstanding assembly programs of the year was presented Wednesday by several Grammar pupils under the direction of Mrs. Bowman.

As six girls sang "Mr. Five by Five" Bobby Burks dramatized it with plenty of rhythm.

Tanner Fairman gave a very interesting and informative talk on the torpedo, increasing interest by means of his colored illustration on the blackboard.  
 The 7-I Class sang "A Merry Life."

Last but not least came the dramatization of "This Is the Army, Mr. Jones." We are sure it could not have been done in a more interesting or effective manner and was enjoyed by the audience.

Elizabeth Ann McMurray had a party Saturday evening. The 13 guests played games and afterward were served hot cocoa and cookies. She took them all to the show. The guests were Norma Sue Ross, Ed Gilliam, Billie Max Miller, Vera Mae Bell, Charles Crook, Barbra Dell Porter, Laverne Sykes, Joyce Harrell, Earlene Nix, James Carol Calaway, Freddie Wittenburg, Sealy Reid, and Jerol Vaughan.

## 16 WAR UNITS NEEDED TO DEFER FARMERS IN DRAFT AMENDMENT

(NOTE—Since this article has been prepared the number of units has been reduced from 16 to eight.)

Congress has lately amended the Selective Service Act providing for deferment of every registrant found by a local board to be necessary to and regularly engaged in an agricultural occupation, so long as he remains so engaged and until a satisfactory replacement can be obtained. Two new classifications have been created—Class II-C, essential registrants in agriculture who have no other grounds for deferment; and Class III-C, where the registrant is necessary or essential in agriculture who is also deferred by reason of dependency.

Any registrant deferred in either II-C or III-C who leaves his farm job without a permit from his local USDA War Board will be immediately reclassified into I-A. Deferred registrants may move from one necessary farm job to another without losing his deferred status.

A 16 war unit stand has been set as the guide in determining draft deferment. Local boards in their discretion may grant deferments to registrants whose number of war units fall somewhat short of 16, if they show cause to increase their production to equal or exceed the 16 war unit standard.

**War Unit**  
A war unit is a measure of production of essential farm products. The following examples show the number of acres of crops or number of animals needed to equal one war unit:

**CATTLE**—Twelve head of beef cattle in a farm herd equals one unit; 20 head of beef cattle in a feed lot equals one unit; 15 head of beef cattle on the range equals one unit; 75 head of stocker cows run on grass equals one unit; 1 milk cow in production equals one unit.

**CHICKENS**—Egg production, 75 hens equals one unit; broilers, 600 equals one unit; flock replacement, 300 equals one unit.

**HOGS**—20 hogs equals one unit.

**SHEEP AND WOOL**—Farm flocks, 30 head of sheep equals one unit; lambs in feedlot, 160 equals one unit; range, 45 head equals one unit.

**TURKEYS**—Forty head equals one unit.

**PEANUTS**—Two acres equals one unit.

## POTATOES (Irish and Sweet)

Two acres equals one unit.

**FIELD CROPS** (such as barley, wheat, oats, sorghum, etc.)—15 acres equals one unit.

**CORN, Edible Beans, Green Peas**—Five acres equals one unit.

**FRUIT TREES**—One acre of bearing fruit trees equals one unit.

## SMALL FRUITS and Berries

Seven acres equals one unit.

**TRUCK and Canning Crops (Vegetables)**—One acre equals one unit.

**COTTON** (1 inch or over)—Two acres equals one unit.

## NUTS from present planting

Five acres equals one unit.

Nonessential farm products such as popcorn, watermelons, cantaloupes, no war unit credits given.

## A total of 16 units in any combination offers deferment.

For example, if a Mills County farmer plants 32 acres in peanuts, he is put in either II-C or III-C.

## GRANDSON OF LOCAL PEOPLE GRADUATES

The following article is from the Bangs Gazette. The young Schindler referred to is a grandson of Mr. and Mrs. B. J. Crawford, Route 1, Goldthwaite:

R. J. enlisted in the Navy on June 2, 1942, and was sent to Great Lakes, Ill., for indoctrinal training before being transferred to the Jacksonville station. Now a qualified radioman, he will be assigned to a Naval Air unit for further duty.

## Improved Uniform International SUNDAY SCHOOL LESSON

By HAROLD L. LUNDQUIST, D. D. Of the Moody Bible Institute of Chicago. (Released by Western Newspaper Union.)

### Lesson for January 24

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

### JESUS THE GREAT PHYSICIAN

LESSON TEXT—John 5:2-7.  
GOLDEN TEXT—Wilt thou be made whole?—John 5:6.

Hope of the hopeless, help of the helpless—who would that be, but Jesus? Coming to Jerusalem for the feast He did not seek out the homes of the mighty, the places of learning and culture, but betook Himself to the Pool of Bethesda, where there "lay a multitude of them that were sick, blind, halt, withered." Why did He go to such a place? Because He always had compassion upon those in need.

In this multitude He saw at once the neediest man of all—one without friends or loved ones to care for him, despondent and disheartened. What happened that day may well encourage the heart of every sad, lonely, and discouraged one.

We see three things here.

### I. Hopeless Infirmity (vv. 1-7)

How weak and helpless is humanity. Oh, yes, we seem to be strong, capable, fearless, but only until we meet some great elemental problem. Then we see that we are indeed a great multitude of impotent folk. The gently falling snow stopped the undefeated Napoleon. The silent fog can paralyze a nation. Sickness, death—who can stay their hand? We need the steady and powerful grip of God upon our lives if we are to go through such experiences. Not only was this man ill and weak, but his long years of suffering had made him so accustomed to weakness that he had reached a state of despair.

Such an attitude invites defeat. It may be the only recourse of the man of the world, but with Jesus standing by to help, there is good reason for assurance of faith in the darkest hour.

In the face of his need—yes, even in the light of Jesus' provision for that need—the leaders of the Jews could only criticize.

### II. Heartless Religion (vv. 10-13, 15-16)

Jesus had done for the man what the Jews had not been able to do; in fact, one wonders whether they had so much as lifted a finger to help this poor sufferer. But now that he was able to walk, they were greatly concerned about the violation of their Sabbath day restriction against any work.

Instead of shouting for joy that this man was able to carry not only himself but his bed, they became zealous about maintaining the letter of their law.

Are there not those in our day who would be greatly disturbed if the deathlike quiet and dignity of their church services were to be broken by the cry of a new born babe in Christ? Would a revival be welcomed in the great churches of America which have lost the savor of Christ and the power of the gospel? We think not.

The man who had been healed answered well (v. 11). He did not know who Jesus was, but he knew that if He had authority to heal, He also had the right to tell him to carry his bed. When we meet Jesus we will be healed of our infirmities and, like this man, be delivered from the fear of cold ecclesiasticism.

But let us turn to the heart of our lesson, which is the act of Jesus in giving him

### III. Healing of Body and Soul (vv. 8, 9, 14)

The body of this man was miraculously healed. There was no partial improvement, no long drawn out convalescence and regaining of strength. In fact, he was told to do something which called for the full vigor of a healthy body, to show that he was healed.

Even so when we are healed from sin it is hot to a half-dead existence, but to the full vigor of spiritual life. We are to arise and walk in the power and grace which Christ has brought into our lives.

Note that the miracle performed here was for the glory of God. The miracles of God are not mere marvels or wonders. They are not for the advancement of the cause of any man or for personal glory. They are the mighty signs of an omnipotent God wrought for the good of men, for their spiritual enlightenment, and as a testimony to the one true God.

So in this case Jesus found the man in the temple to admonish him to continue steadfast in the spiritual liberty which had come to him "lest a worse thing befall" him.

Evidently this man's infirmity had been caused by sin, and even though he had suffered those 38 long years the tendency toward sin was still alive in his heart. Sin dies hard. How often have we not seen those who have cried to God out of their affliction, promising all sorts of spiritual changes if God will deliver them. When He does, they go right back to their old ways. The one who does that may well be looking for the "worse thing" which will surely befall him.

## 12 CENTS PER QUART MAXIMUM PRICE FOR SWEET MILK IN MILLS

Effective today, a revision in the ceiling price of fluid sweet milk for Mills County has been ordered in a new regulation issued by the Southwest Regional OPA office, A. T. Pribble, chairman of the local War Price and Rationing Board, announces.

The ceiling price revision in Mills County is part of a region-wide program designed to restore balance in the supply of milk to different communities and for different uses. The order hikes prices in a majority of the areas, but maintains present levels in some while reducing prices in a few areas.

Ceiling prices for Mills County established by the regulation are as follows:

	Wholesale	Retail
Gallon	40	44
1-2 Gallon	21	23
Quart	10 1-2	12
Pint	5 1-4	6
1-2 Pint	3	

Culminating two months' work, regional OPA officials in Dallas ordered the new price revision to replace the General Maximum Price Regulation which set the ceiling price of milk for retailers and wholesalers at the highest price each individual seller charged in March, 1942. There is no ceiling at the producer level.

The new regulation, Mr. Pribble explained, only sets a maximum price which can be charged for milk in this county—wholesalers and retailers can sell at any price below the ceiling. Petitions for adjustment can be made at the Office of Price Administration at Dallas, Mr. Pribble said.

Under the maximum regulation which revises the ceiling prices for milk, every county, parish, city and town in Texas, Louisiana, Arkansas, Oklahoma, Missouri and Kansas are placed in either Class 1, 2 or 3 in Zone 1, or in Class 1, 2 or 3 in Zone 2. Mills County is in Class 3, Zone 2.

## COFFEE REDUCED

Registration of institutional users for their February allotment of coffee began on January 15 and will end on February 5, Mr. Pribble reminded cafes and other institutional users this week.

"The February allotment percentage will be only 40 per cent of the base," Mr. Pribble explained. "For example, if an institution used 400 pounds of coffee in September and 400 pounds in October, 1942, the base would be 800 pounds; and using that total as a base, the allotment for February would be 40 per cent of 800 pounds, or 320 pounds."

Another amendment to the Coffee Rationing Regulations also has changed the basic allotments for institutional users who were not in operation between September 1, 1942, and November 21, 1942. This basis has been decreased from one pound of roasted coffee for every 60 meals served to one pound of coffee for every 100 meals served.

"Coffee stamp No. 27 expired, so far as consumers are concerned, on January 3," Mr. Pribble added. "Retailers had until Jan. 13 to exchange the No. 27 stamps they had taken in from customers for stock replacement certificates. In a few instances, where replacement supplier of coffee were not available, the board can issue an exchange certificate. Wholesalers have until January 23 to make this exchange."

## TEXAS FARMERS CAN APPLY FOR MORE MILEAGE TO JAN. 31

College Station, Jan. 12.—Texas farmers were warned by the State USDA War Board this week that only a few days remain in which appeals for more mileage can be made.

Temporary transport rations to keep trucks moving cannot be issued after January 31, the Board said, and pointed out that all appeals should be presented to district ODT offices by January 20 in order for local war price and rationing boards to issue gasoline coupons before the January 31 deadline.

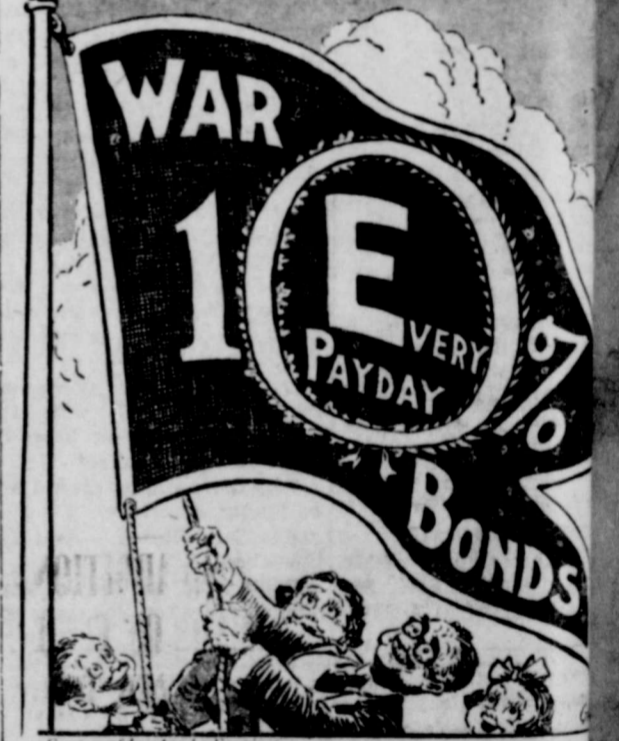

Appeals for more mileage are made to local county farm transportation committees and then presented to ODT for consideration. County farm transportation committees already have been supplied with sufficient appeal forms to handle county

mileage problems, it said.

Temporary rations issued under the following circumstances: (1) when rate of war necessity does not cover applicant's present ration through January; (2) where previously issued rations are insufficient; (3) where applicant has not yet applied for a certificate of war need; (4) where appeal application has not been filed; (5) where appeal gasoline than has been on a certificate of war need has not been decided.

**BOY NEWS**

By CLEMENTINE WILMETH BRILEY

After a week of rather mild weather and a Saturday warm enough to start some efforts at gardening, the thermometer dropped to 24 Sunday morning.

We were shocked Sunday morning to hear of the death of John Tom Newberry of Goldthwaite, who was buried at Regency Saturday afternoon. Our disrupted phone system paralyzes our communication. Mr. Newberry had been ill for several years, but was better and was thought to be getting along fairly well when he took a sudden turn for the worse, and was gone before some of us could know about it. We extend our deepest sympathy to his wife who so faithfully nursed him through all his illness.

We were sorry to lose from our community this past week Mrs. Herman Glen Egger and their children, Oleta Page and Wanda Laere. They have moved to the Atkinson place at Ridge. Gene Egger and Mrs. Dewey Smith delivered Mrs. Egger and the children to their new home Tuesday. Gene Egger will cultivate the Singleton place for next year.

The Ernest Russell family have moved to a place near Rising Star.

Miss Dolly Reynolds spent the past week with her friend, Mrs. Bob Egger. Mrs. Egger, whose health continues very frail, is standing the winter very well so far.

Miss Dolly has moved her house upon the hill near the home of her nephew, Roy Reynolds, she has had it weather-boarded and is painting it white, making it look neat and pretty.

The Bud Ratliff house, now owned by Dr. Duffer, has been moved across the road out of the maneuver area.

Mrs. Effie Egger got her house moved out of the maneuver area last week and has placed it out in front of the Sawyers place.

Clifford Crowder and his son-in-law, Harry Schurmer, and Will Crowder were at P. R. Reid's a little while Sunday morning. Clifford has been in bad health for some time, and does not seem to be any better. He has had to give up his work.

Leslie White had Ernest Malone to take him and some of his household goods to Regency Thursday where he would visit his mother, Mrs. Martha Louise White, and his sister, Mrs. Henry Egger. He expected to leave Saturday for McCamey.

Mrs. Nellie Malone visited Mrs. Effie Egger and Mrs. Charles Griffin Thursday.

Mrs. Irene Reeves and Jay called on Mr. and Mrs. Charles Griffin Sunday afternoon.

Mr. and Mrs. Dewey Smith delivered Mrs. Roscoe Jones and her children, Frances and Barbara, to their new home at the Henry Egger place Friday. On their way home Mr. and Mrs. Smith visited a while with Mr. and Mrs. Henry Egger and Mr. and Mrs. Ben Egger at Regency. Mr. and Mrs. J. R. Briley were the guests of Mr. and Mrs. Hubert Reeves Sunday after church.

Mr. and Mrs. Johnnie Egger spent Saturday night and Sunday with relatives in Brownwood.

Wood Roberts has gone to Brownwood and is working at Camp Bowie. His son, Charlie, has bought a little house and lot in Brownwood, and they are staying together there, and both working at the camp.

**TWO BIG AIRFIELDS ARE CONSOLIDATED**

San Antonio.—Two of San Antonio's largest military establishments—Kelly and Duncan fields—Saturday were officially merged, when it was revealed a war department order, effective as of Jan. 9, made the two one unit, to be known as San Antonio Air Depot. Officials declared that with the merger the order effected a unification of the largest hangar and the largest repair depot in the United States.

to a fusion of the two fields, all flight training will be done at Kelly and all mechanical and repair facilities will be taken over by Dun-

field. Instructors' school, now at Field, will be shifted to Camp Field, which will then be known as the central instructors' school for the Gulf

**SICK SWINE**

The County Agent has been called on by several hog producers in recent weeks for help in determining the cause of heavy losses and sickness among their herds. A licensed veterinarian from the State Livestock Sanitary Commission was obtained through the help of the Commissioners' Court to work with the County Agent on this problem.

In some cases where losses have occurred symptoms of hog cholera have been very pronounced and at the same time this has been associated with an infection of Swine Influenza, and in some cases Swine Plague.

Livestock men are urged to vaccinate against hog cholera where it is known the disease is present on the place. If you do not have the virus or germ on your place then every precaution should be made to keep it off. The hog cholera virus can be spread from the soles of people's shoes or by trucks and trailers in which diseased hogs have been hauled and the beds not disinfected.

In vaccinating for cholera care should be taken to see that the virus and serum are handled according to directions on the bottle and administered to the animal in such a manner that no loss of the virus or serum will be had after treatment. Also be sure the materials are fresh, which can be determined by the date on the bottles.

Swine influenza and swine plague can best be controlled by preventative methods. Do not allow the vitality of the hogs to become lowered to where they have very little resistance to the disease. Lowered resistance may be brought about, of course, through exposure to cold, exhaustion from shipping or hauling, poor housing, improper feeding, etc. No specific curative treatment for these diseases is known. There are serums, aggresins, and bacterins on the market that have been used to some advantage, both as a curative and preventive agent.

**BEAN WEEK**

To encourage the use of beans in war-time meal planning, the Department of Agriculture has designated dry edible beans as a Victory Food Special from January 18 to 23. Increased civilian use of dried beans will help release other vital protein foods for the armed forces and Lend-Lease shipment.

Local merchants are featuring dry edible beans in special sales during the week's Victory Food Special drive. Dry edible beans are a highly concentrated food, rich in vitamins and minerals, with higher fat and protein content than other common vegetables.

**TWO ADDITIONAL CARS OF FEED WHEAT ORDERED THIS WEEK**

Two additional cars of feed wheat were ordered this week for Mills County farmers to be used in feeding poultry and other livestock. This makes a total of seven capacity car loads, of 1,500 bushels each, for distribution. Orders are now being received by the local AAA office on the eighth carload which will likely be completed by the end of this week.

Any farmer needing wheat for poultry or other livestock uses may make deposit with the local AAA Office for any number of pounds at a basis of \$1.58 per hundredweight. This price is offered only for January orders. Directions for feeding wheat to poultry, hogs, dairy cattle, and beef cattle may be secured from the County Agent or the local AAA Office.

Randolph officials said that the field will not be used any more for basic flight training when this shift is made.

**809 ADDED TO OLD AGE ASSISTANCE ROLLS DURING DECEMBER**

Austin, Jan. 20. (Sp. to Eagle)—Old Age assistance checks will be mailed this month to 183,292 old people receiving an average check of \$20.31. The rolls made a net increase of 809 during December. Needy aged added to the rolls numbered 2,260. Those who were dropped from the rolls included 923 who were removed because of death and 528 removed because they were no longer in need or because they failed to meet other eligibility requirements. Payments will total \$3,722,438 from state and federal funds.

Proration cuts each recipient's check \$1 below his authorized grant. The average check would be \$21.31 if sufficient funds were available. The average grant, as well as the number on the rolls, continues to increase as cases are re-investigated and grants are adjusted to increased costs of living. In December the average check was \$20.06, 25 cents less than the current month.

Continuing its reorganization of the Aid to Dependent Children program to include only those families in desperate need, the welfare department announced that in January 11,943 families will be helped, as compared with 12,544 in December. The 26,852 children represented by the families still on the rolls will receive the maximum grants allowable under the Constitutional amendment, since their unmet needs far exceed the maximum of \$16 for one child and \$24 for any number of children in one family. January grants average \$21.36. The net decrease in the numbers of families on the rolls represents 560 who certified as eligible during the month and 1,161 families removed.

The reorganization of the Aid to Dependent Children program made it possible to discontinue the \$10 cut formerly in effect in all grants and prevented the necessity of making another cut as the rolls increased. In September, a year after the beginning of the program, the \$1-500,000 annual state income for the assistance became inadequate to pay grants in full to all children on the rolls.

Aid to the needy blind is the only one of the three social security assistance programs which has not yet become subjected to proration. However, for several months payments have been in excess of monthly income. January payments will total \$95,666, compared with the monthly maximum income of \$66,666. The difference is made possible by money accumulated in the fund during previous months when the rolls were smaller. The number of blind recipients increased from 4,000 in December to 4,106 in January. Checks this month will average \$23.30, an increase of 11 cents over the December average.

## A Soldier Sends A Little Girl A Button

(From Martin Andersen's column in the Orlando, Fla., Morning Sentinel)

Up in Sanford, N. C., on the outskirts of Fort Bragg, Judy Mae Bryan, age 12, was in a restaurant with her mother eating ice cream on a Sunday afternoon. Turning her head, Judy noticed a soldier sitting in one of the booths, looking at her intently. She smiled and spoke to him. He smiled back and spoke.

During the conversation she found he was stationed with an artillery unit at Fort Bragg and asked him for one of the artillery insignia on his collar. He told her that he couldn't give her one off his uniform but he would get one and send it to her.

Last week Judy received her artillery button and a letter. Here it is—a letter written by a Fort Bragg soldier to a 12-year-old girl he met one Sunday afternoon in a restaurant:

"Dear Judy:  
This letter would very easily be from any one of two million soldiers to any one of two million little girls like yourself. It is something I don't expect you to understand now. I hope you will keep it and read it some time in later life when you have lived long enough to see its meaning.

"Last August, a year ago, I was drafted into the United States Army from a Middle Western town. With the usual bustle I was sent to a reception center, processed and sent to Fort Bragg. We were told at the time that we were being called to protect the 'American Way of Life.' Little did we know just what that meant. We could not quite understand what it stood for. To us, like many others who have never known anything but the blessings of freedom, it was just a figure of speech.

"Transplanted from Camp Robinson to Fort Bragg in a great rush; then 13 weeks of rush—primary training, commands, pushed around, bawled-out until we were so confused we didn't know where we were. We only knew that we were being trained to kill.

"Gone as far as we were concerned were the 'Bill of Rights,' freedom of speech, government of, by and for the people, for we had become, in a manner, slaves to the rule of might. We did resist—true—but there was nothing we could do about it. We rapidly found what life under a dictator could be.

"We were not mad at anybody, though, could not understand why it was necessary to kill a person we had never seen.

"Then came Dec. 7, 1941—Pearl Harbor! Shocked, mad enough to fight anything. That soon passed. Again we wondered just why people who knew so much more than we were so worried.

"Well, Judy, last Sunday afternoon I think I found the answer.

"There was a soldier who had been out for a week-end . . . Then the smile of a small face that seemed to lift all the gloom and worry. I wonder what kind of world this would be if all the sweetness and joy of living were wiped from that face by the brutal hand of force.

"Well, I had my questions answered. I think it's the answer two millions of us have been looking for. I wouldn't want to live in that world and couldn't live in it long. This is the reason that until that threat is removed no true American can rest. If it takes us to the last man, that last man will finish the job.

"I don't have the words to express just what I mean. I hope you can read the thoughts between the lines. CHARLIE."  
"P. S.—Here's the insignia you asked for, Bye."

"We haven't had a day's absence since she was put in this department."

## State Department Health Notes

### SOCIAL HYGIENE DAY

The Seventh National Social Hygiene Day will be observed in Texas on Wednesday, Feb. 3, 1943. Dr. George W. Cox, State Health Officer and chairman on Health and Emergency Medical Service, announced in Austin this week.

"With the mass movement of men into army camps, with war industries doubling and redoubling their production, 'boom town' conditions frequently prevail," Dr. Cox said. "Broken family ties, crowded housing, unprecedented demands on medical facilities, lack of knowledge, and prostitution, favor the spread of venereal diseases, which in turn cost millions of dollars in medical care, lost time, inefficiency, labor replacement and accidents.

"Physical fitness not only of our soldiers, marines and sailors but also of our civilian population, will determine the effectiveness of our war effort," Dr. Cox stated. "We must realize that the nation's defense depends on a healthy civilian population, able to produce needed materials."

Social Hygiene Day, nationally sponsored by the American Social Hygiene Association, will be observed throughout the country on February 3, 1943. Army and navy officers, industry, management, labor unions, health and welfare agencies participate in this nationwide campaign and collaborate on legal, medical, educational and protective measures to fight venereal disease among industrial workers.

"Physical fitness is the foundation of a sound national defense—the prerequisite for victory," asserted Dr. Cox. "More and more Americans are coming to realize that among the first enemies to be conquered in its present mighty effort are the venereal diseases. There can be no strong nation where bodies are unfit; most assuredly there can be no military victory where disease acts as an insidious 'fifth column' within our ranks."

Make this a winning scrap by giving your scrap metal to the Army now.

We're all in this for the duration. Your scrap metal is too. Give and give until it hurts.

Texans, the Army needs your help. It needs your scrap metal. Babies cry for it. They cry for you to give your scrap metal to the Army now and keep them safe.

Tired of giving? You don't know what it is to be tired. The Army needs your scrap metal.

## Your Income Tax Explained

(No. 3 of a series)

### PERSONAL EXEMPTION

Every individual is allowed a credit against his net income which varies with his domestic status, that is, whether he is (a) a single person, (b) a married person living with husband or wife, or (c) a head of family. This credit is known as personal exemption, and is shown on line 21 of the return Form 1040. The amount of the personal exemption also varies depending upon the period during which the taxpayer occupied the particular exemption status.

The personal exemption for a single person is \$500 for the year; for a married person living with husband or wife, \$1,200, and for a "head of a family," \$1,200. (Personal exemption as head of a family has no effect on liability to file a return.) For federal income tax purposes, widows, widowers, divorcees, and married persons separated by mutual consent, as well as persons who have never been married, are classed as single persons.

A head of family is defined as "an individual who actually supports and maintains in one household one or more individuals who are closely connected with him by blood relationship, relationship by marriage or by adoption, and whose right to exercise family control and provide for those dependent individuals is based upon some moral or legal obligation." A single person, or a married person not living with husband or wife, may, therefore, enjoy a head of family exemption under certain conditions.

Taxpayers using a Simplified Return (which is permitted if the gross income for the year is \$3,000 or less and derived solely from earnings from employment and/or from dividends, interest and annuities) obtain personal exemption based on their status as of July 1 of the year. Thus, a taxpayer married and living with husband or wife on July 1 is entitled to \$1,200 personal exemption on Form 1040A; if he were a widower on July 1, his exemption would be \$500, irrespective of the date on which he became a widower. The amount of the exemption is not deductible from the income but is reflected in the amount of tax shown in the table on the reverse side of the form.

Taxpayers using Form 1040 obtain personal exemption proportionate with the number of months during which the particular status is held. Thus, for a person who married on July 1, (who was not a head of a family prior to his marriage) the personal exemption would be \$850 (\$250 for the six months as a single man, plus \$600 for the six months as a married man). In this example it is assumed that the wife has no income.

Married persons may, however, file joint returns, even though one has no return, and by filing a joint return a couple married during the year may obtain an exemption amounting to the exemption to which they would be entitled for the period of married status, plus the amount of their individual exemptions prior to their marriage. In the example given the total exemption in a joint return would be \$1,100 (\$250 for each spouse for six months plus \$600 for six months married status).

If a husband and wife living together both have income and file separate returns on Form 1040, the personal exemption applicable to a married person may be taken in the return of either or divided between them in any way they may agree, but the total personal exemption taken in the two separate returns may not exceed \$1,200.

If you coast now you won't have any coast line. The Army needs your scrap metal. Give it now.

Roses are red; Violets are blue; Sugar is sweet; Isn't scrap metal too?

Junk the Japs with your scraps. Help win the war. Give all your scrap metal now.

Don't sell your country short with a shortage of scrap metal. Give it to the Army now.

## REP. MOORE WRITES ON HAPPENINGS AT STATE LEGISLATURE

To the People of the 104th Legislative District:

The Legislature is now in session and I am at my post of duty to which you elected me. As your Representative I feel that it is my duty to report back to you relative to the work here. Since we are restricted in the use of gasoline and tires, it will not be possible for me to see you often personally. I will, therefore, report through our papers and I hope that each of you, as you read this, will consider this as a message to you personally.

I believe this Legislature will attack, discuss, and pass upon pending legislation in a serious manner. The war is the foremost matter in the minds of most members. The Governor reflected this in a brief speech in a joint session last week. Many members have sons, or other relatives, in the service.

Much of the fan-fare of other sessions has been dispensed with. We have only gotten started with the work. Price Daniel was elected as speaker. The committee appointments have not been made. Only routine bills have been passed.

I am glad to report back to you that I am pleased with the friendly reception that I have received here. The people are friendly in this city, and the members are all friendly and sincere people as far as I have known them.

My wife and I have an apartment at 307 West Fifteenth Street, only four blocks from the capitol and three blocks from the First Methodist Church where we attend church. We are in a convenient location and invite friends from my district to call on us.

Some members have introduced bills as you will see from press reports, and these will be numbered and referred to committees when the committees are appointed. Through the medium of our home papers, I will discuss some of these bills in future articles.

I am the author of a bill, or rather a constitutional amendment, for improving, clarifying, stabilizing, and liberalizing aid to dependent children. I had others to sign with me in this bill.

I am also the co-author of a bill to remove the "ceiling" from the Old Age Pension payments. My bill will be known as a House Joint Resolution and each will be given numbers and when referred to committees will be given places on the calendar.

I find nothing difficult about preparing or filing a bill. I have been teaching such things in our public schools for many years.

When I consider that this Legislature will provide for the expenditure of \$200,000,000 of the taxpayers' money, it gives me a sense of responsibility that I hope you will share with me. Any time you feel like writing me any suggestions, or giving me your views on pending legislation, I will be glad for you to do so. As a member of the Legislature, I need your co-operation, sympathy and prayers, for I hope to render faithful and satisfactory service in this position.

Very sincerely,  
O. H. MOORE,  
Representative District 104.

January 11, 1943.

Dear Mrs. Thompson:  
So many of my friends have inquired about me, I thought I would write you and ask you to put it in the Eagle about my selling my place and moving to Fort Worth.

I came to Fort Worth in November and bought a nice two-story house with two complete apartments. My daughter, Mr. and Mrs. B. A. Weeks and family have the up-stairs and Mr. and Mrs. G. B. Salters, Dorothy Ann and I have the downstairs. I am located near two city bus lines and in one block of elementary and junior high school. Also in walking distance of two large Baptist Churches.

Dear Mom and All:
Just a few lines. Of course, no
ews, except I haven't heard
om any of you yet. Maybe if
ou all would send a letter regis-
tered air-mail I would get it.
Most of the boys that have got-
ten letters were sent this way.
Let's try it once.
I think maybe we are going to
get paid now in the near future.
Sure hope so. I didn't get paid
at Anged Island so am out now.
Sincerely all of them did.
Boys, you all write and tell
me how the hunting is coming
along. Charles, are you still
afraid of the skunks? Do you
still have to hold your nose? Ha-
ha.
Daddy, how cold is it riding
the tractor. Do you want me to
send you my overcoat? Do you
know what? Here we have four

really come regular, too.
Tell Abner (Uncle Dick) he

Well, will close for now. Will
write some more in a few days.
Boys, was old Santa good to

Dear Editor:
December the 17th it rained
and snowed all day long. I
walked guard through the rain
and snow for two hours. We were
on guard duty for 24 hours.
Walked two hours and slept four
hours. They drilled us an hour
after each meal three hours a
day. Then at 15 minutes until
six o'clock we have to dress in
our best clothes and stand re-
spect while they play the "Star
Spangled Banner." This is every
evening.
John Deere gave all of us a
nice hill fold for Christmas.
Then the army gave us a four
dollar rating from private to
private first-class. I think may-
be I will start to school soon. I
made it fine on the rifle range
shooting close range. We left
Thursday and camped out until
Saturday. We go back tomorrow
for long range. The four posi-
tions are laying down on your
stomach, sitting flat down,
kneeling, and standing. I hope
to run a good score on the long
range.
I have gained 11 pounds and
feel fine. On the range shooting
I got 163 out of 200. I believe if
I hadn't been so cold I could
have made the 200.
I am enjoying reading the

Phillip and wife for a Christmas
present. If I am moved from
here some one will let you know
my address. I hope I don't miss
a copy. There has been some
talk of us moving to Texas the
first of February. The shop

The TEXAN, Built In Texas By Texans, Used By 26 Nationalities

Clad in its war paint, the TEXAN roars through the sky. The famous trainer, manufactured at the Dallas division of North American Aviation, Inc., was known as the AT-6 to the Army Air Forces, the SNJ to the Navy and the Harvard to the British before it was given its new name by the War and Navy Departments at the suggestion of J. H. Kindelberger, president of North American. The TEXAN, a swift, sturdy plane, is powered by a Pratt and Whitney motor, has hydraulic landing gear, dual controls, two-way radio and is equipped with machine guns and bomb racks. It is one of the world's most universal planes due to the fact that cadet pilots of 26 nationalities are training in it.

DALLAS (Special to the Eagle)
Texas had a namesake in the air
today after J. H. Kindelberger,
president of North American
Aviation, Inc., announced that
the combat trainer made in
Texas by his firm had been
named in honor of the Lone
Star State.
Previously the ship, which is
being manufactured in the first
war-time aircraft plant to be
constructed in the state, was
known as AT-6 to U. S. Army
pilots, the SNJ to the Navy, and
as the Harvard to British fliers.
It will now be known as the
"Texan" throughout the United
States.
It was recently revealed that
the Dallas division of North
American now consists of two
huge plants, the one in which
Texans have been manufactur-
ing their namesake, and another
which was constructed in 1942.
In view of this expansion the
Dallas division will now manu-
facture bombers and fighters as
well as trainers. Although the
name of the bomber cannot be
announced yet, the War Depart-
ment has allowed the announce-
ment that the fighter to be pro-
duced in Texas is the North
American P-51 Mustang, which
made its deadly debut in the raid
on Dieppe.
In making the announcement
concerning the Texan, Mr. Kin-
delberger pointed out that the
main reasons for giving the
plane its new name are the fine
job that Texans are doing in
building it and the fact that
Texas is rapidly becoming one
of the nation's air centers, both

 ministers.

Mr. Newberry was born May

 moved to Mills County in 1902.  
 He united with the Baptist  
 Church at the age of 18. He was

 Aubra Mims Smith, son of Mr.  
 and Mrs. D. K. Smith, passed  
 away Tuesday evening at his  
 home in May, Texas after shoot-  
 ing himself with a .22 target.  
 His father and mother being  
 near when this terrible tragedy  
 happened, they called a doctor,  
 but Aubra never spoke a word,  
 although he lived for about 30  
 minutes. All was done that could  
 be done, but to no avail.

Aubra was born in Brown  
 County September 30, 1925, and  
 at the age of 8 he joined the  
 Baptist Church. Aubrey gradu-  
 ated from May High School last  
 year, where he played on the  
 football team. He loved sports  
 of all kinds. He went to John  
 Tarleton College until Christmas  
 of last year, when he quit col-  
 lege and enlisted in the Navy. He  
 was waiting for his call to fight  
 for our country when this ter-  
 rible thing happened.

Aubra leaves his father and  
 mother, Mr. and Mrs. D. K. Smith;  
 one brother, Owen Smith and  
 three sisters, Virginia, Gay-  
 lia and Kathleen; also two  
 nephews, Danny and James, and  
 two nieces, Betty Alice and Bo-  
 nita Fae.

Aubra was so jolly and friend-  
 ly and so full of life. He was  
 always trying to help those who  
 were down-hearted. He had lots  
 of friends among the older peo-  
 ple as well as the young. He  
 never failed to speak and have  
 something funny to say.

Aubra's boy friends were his  
 pallbearers. He was laid to rest  
 in the May Cemetery among a  
 mound of flowers. Aubra is gone  
 and how we will miss him in our  
 home and everywhere, but some-  
 day we will be reunited and  
 there will be no parting there.

 children, while Miss Smith joined  
 the older ones in singing  
 songs.

We have been unable to get  
 water at school since the pipes  
 have frozen. Miss Manning will  
 not permit us to eat icicles so  
 we have been going around with  
 parched throats.

We are grateful to Mr. Lee  
 and Mr. Kemp for building our  
 fires at the schoolhouse the last  
 two mornings.

### NEWS BEHIND THE TEACHERS' BACKS

Why does June hate to write a  
 little two-page theme when she  
 enjoys so much writing a six-

page letter to Doyce Von?  
 Everybody is having heart-  
 throbs over the new pupil and  
 especially the girls. The other  
 boys feel out of luck but don't  
 give up—they can't all have  
 him.

Mima has been forever and  
 continually turning around in  
 her seat lately. There seems to  
 be some attraction in the back  
 of the room—namely, a little  
 fifth-grade boy.

Well, Well, Miss Smith and  
 Miss Manning are "lone wolves"  
 these days, especially on their  
 week-end visits to Goldthwaite.

Everyone enjoyed Orbie D's  
 visit to School Tuesday. Espe-  
 cially one of our eighth-grade  
 girls.

We wonder why Daisy hates  
 to get up every morning. Is it  
 because she has heart-throbs  
 over somebody? Six nights out  
 of seven she has had the very  
 same dream.

June has been so lonesome!  
 Could it be because Doyce has  
 been sick and home in bed?

Lois Bullard came to school  
 with her hair rolled up and  
 looking unusually pretty Monday  
 morning. Really, it was because  
 of the new pupil but she was  
 very disappointed when she  
 found out he was just in the  
 fifth grade.

 throughout the day.

 her son, Richard Roberts, and  
 wife came back to this commu-  
 nity last week-end. We were very  
 glad to have her back with us.

 Sterling Benningfield. Earl Mc-  
 Crary also ate supper with the

 Cecil Scott home Monday. Mr.

 Willie Franklin, Marie, Sudie,  
 and Willis. Also their son-in-law  
 and daughter, Mr. and Mrs.

 Carl, Kenneth Lee, and John

 nounce the arrival of a new resi-  
 dent in our community, a seven-  
 pound girl to Mrs. Irvin (Naomi)  
 Ward at the home of Mr. and  
 Mrs. Cecil Scott. Mr. Ward is  
 in a naval base in California.  
 They have named the new arri-  
 val Linda Kay. Mrs. Ward's and  
 Mrs. Scott's sister, Nina Hale

 20, 1943.
