and Mrs. Ruby Boyd of San Angelo; one sister, Mrs. Mary E. Stanley of San Angelo; 15 grandchildren; 18 great-grandchildren; and three great-greatgrandchildren.

The following poem was written by Mrs. Cummings' granddaughter, Mrs. Bob (Barbara) King, and was read at the graveside services by Rev. Lay.

Mrs. Cummings was a wonderful woman indeed. She was always at hand in time of need.

She reared her family and taught them love, And always had help from the Lord above.

She was known as Nan Naw in all hearts she won, She was friends to all, and

enemies to none. Many hours she spent with her Bible at hand, Planning her life in The Great

Promised Land. With each passing day, her faith grew stronger, As she grew older, her days

appeared longer. We have no regrets as Nan vaw's at rest, She is with God, where her

care is the best. Love, courage, faith, and how to deeply care.

Is the trait she left us, all which is very rare. No one can replace her in our Life and Hearts,

But to join her in Heaven we'll all do our part.

Interment was in the cemetery at Comanche. A number of Mullin friends

Cancer eye is a common focus of screwworm attack on South Texas livestock. Last year, 5.6 percent of the 6,273 worm samples received at the Mission lab were found in eye lesions. A new technique called cryogenic surgery looks promising in aiding losses in their area. Treatment has been effective with cancers on both the eyeball and eyelid. The process entails quick freezing with liquid nitrogen.

Several homeowners have asked what can be done to pecan trees this time of year in an effort to control disease and insects. The only applications required by pecans for this time of year is an application of fungicides and zinc sulfate. Using maneb, Du tee, Polyiam or Dodine will aid in scab control. Where rosette is a problem, an application of zinc sulfate should be applied. Do not apply either the fungicides nor the zinc sulfate until the leaves on the tree are about one third grown.
