VOL. IX, NO. 47

WHITTLIN'

BY DOLPH MOTEN

Wild water stories are scarce in our area. Reason for this, no doubt, is that we receive so little rainfall that it's only rarely that there is enough water to make a story.

However, one such story has developed out of the recent rainy spell. It comes from north of town, in the Rhea Community.

It was passed onto us as just a story, nothing more, and in a cloak of secrecy about how the story could be verified, if it could.

Seems that up at Rhea, where the new Farm-to-Market Road is under construction, more rain was received on one of the occasions than anywhere else around.

Water, according to the story, crowded into the newly-fixed road bed and swept a main-tainer, full-size, some two miles down the road.

As a rule, you wouldn't think about water moving a main-tainer anywhere, much less on the Plains. But that's the story which was relayed to us.

Man!

With Bob McMeans from here and our father, who lives at Lampasas, we made a whirlwind trip to the Astrodome, the enclosed big league baseball park in Houston, over the week-end.

The structure is every bit as fabulous as we had heard it was.

We were impressed by a number of things about the sports palace and especially by the fact that the temperature remains a comfortable constant 70 degrees or so, no matter what the temperature is outside and also by the friendliness and helpfulness of all the people who work at the dome.

All the people had, we're sure, been well schooled about how to be nice, courteous and helpful to all the game's customers. No one we had conversation with left the impression that he was smarter than we were even though we were the one who was in need of a lot of information about where our seat was, where the advance ticket sale window was, etc.

That attitude on the part of the ballpark's employees can add much to the enjoyment of a visit to the Astrodome.

There were some 66,000 people in attendance at Saturday's two games which we attended and we figured the odds that we'd see someone we knew were about nil. But while hunting our car in the vast parking lot following the night game we walked right by Harold Carpenter and Wendol Christian, the Oklahoma Laners. It was just old home week right there in the shadow of the dome 750 miles from Farmer County for a few minutes.

Probably the greatest asset about the dome for big league baseball fans in this area is the fact that after going that far to see games they're assured of seeing one. In other words, there'll be no rain outs. That's exactly what would have hap-

(Continued on page 2)

BASEBALL STARTS --- Manager Alfred Moody is shown repairing a baseball glove for a player on his team, First National Bank-Lawlis Gin, Monday night in preparation for the 1965 season over with Bovina Gin-Generalgas. The Monday night game launched a two-month season of baseball play here.

TEXICO-FARWELL OUT--

Change Baseball Program Plans

Texico-Farwell teams have decided not to participate with Bovina and Oklahoma Lane teams in boys baseball this summer on the Little League and pee-wee level.

Leaders of the program here were notified of the change in plans this week.

Bovina and Oklahoma Lane will field teams to make up four-team leagues on both those levels, according to Gary Cox, who is in charge of the program here for Bovina Lions here.

Play began Monday night under the new setup and will continue on that basis through the next two months.

Cox has prepared news-schedules which will be distributed to team leaders this week.

Cox has also announced plans to form a new pee-wee team for Bovina making a total of three. Previously, Bovina has had one Little League and one pee-wee team. Bovina will have three of each.

At planning meeting Friday night, Bovina Lions decided on details of this summer's program.

The biggest change in the operation of the program this summer will be that umpires

(Continued on page 2)

PIONEER RESIDENT--

Services Sunday For Mrs. Bingham

Mrs. Helen Bingham, 82, died Friday at Clovis Memorial Hospital following an extended illness.

Mrs. Bingham has been a pioneer resident of the Bovina-Farwell area since 1902. She moved to Bovina in 1945.

Funeral services were at 3 p. m. Sunday at the Texico-Farwell Methodist Church with Rev. W. C. Strickland, church pastor, officiating.

Burial was in Texico Cemetery.

She is survived by a son, Henry, of Lamesa; a daughter, Beulah Harrison of Eads, Colo;

five grandchildren and two great-grandchildren.

Mr. J. F. Bingham, her husband, passed away in November of 1961 while a resident of Bovina.

Mrs. Bingham has been living at the Retirement Ranch in Clovis since that time.

Pallbearers were Sam and John Aldridge, J. E. Stone, C. E. Trimble, George Trimble and Wilbur Charles.

Honorary pallbearers were G. D. Anderson, H. Y. Overstreet, Leroy Faville, J. R. Thornton, Jack Glenn, J. P. Macon, Joe Bell, Bill Glenn and Charlie Lovelace.

PROGRAM STARTS MONDAY--

Project Head Start Planning Continues

Detailed planning is underway here this week for the beginning of Project Head Start which begins Monday.

The project here will consist of a two-month program for 3-children from poor families to be aided in being ready to begin the first grade next fall.

Bulk of the funds for the project will be provided by a federal grant in the amount of \$5,260 from the Office of Economic Opportunity. It is a part of President Johnson's war on

poverty.

Mrs. Charles Corn and Mrs. Vernon Estes have been named teachers for the project. They are slated to attend a workshop in regard to the program at Southern Methodist University in Dallas this week in preparation for the beginning of Head Start Monday.

Superintendent Otis Spears says "about 30" have been enrolled for the course. He requests that parents who can bring their children to the school Monday at 8 a.m.

Transportation systems will be worked out at that time and the children will be taken home by school bus that afternoon.

Two meals, breakfast and lunch, will be provided for the children in the cafeteria. Mrs. Helen Wassom and Mrs. J.G. Eubanks will operate the cafeteria.

Gary Cox, grade school principal, will supervise the program and will be one of the bus drivers. Other bus drivers are yet to be named, says Spears.

Buses will deliver the children to their homes and to the gin labor camps in Bovina and at Oklahoma Lane. There will be no in-city bus service.

Children in the program will need smallpox vaccinations and polio shots, Spears says. However, if they don't have these, they will be admitted to the program anyway and arrangements will be made for the children to receive the shots.

Bovina in one of three towns in the 18th Congressional District to be included in Project Head Start at present. Tulla and Flomont are the others. The project will last for 40 school days --- eight weeks.

Weather by Willie
Good chance for moisture this week.

Cemetery Working Saturday

Annual working of Bovina Cemetery is scheduled for Saturday in preparation for Memorial Day.

Families who attend the working are asked to bring basket lunches.

Everyone in the community is invited to participate in the project of beautifying the cemetery.

If the weather is bad the lunch will be at the Church of Christ.

Vandals Hit Northside

Vandals struck in Bovina Wednesday night.

Three large plate glass windows were broken in the office of Northside 66 Service Station on Highway 60.

No attempt was made to enter the building, according to Deputy Henry Minter and Marshall Bill Denny, who investigated.

The plate glass windows were approximately five by eight feet in size and cost about \$70 each. The windows were broken by rocks.

Boyd Gilreath is owner-operator of the station. Harry J. Charles is owner of the station building.

DE Course Enrolls 22

A total of 22 Bovina High students began a driver education course here Monday.

Classroom portion of the course is being taught by Roger McFarren. He and Gary Cox will share the driver training portion of the program.

Students who complete the course will receive half a credit toward graduation. Cost of the course is \$25 per student.

Students who will be in grades nine through 12 next school year are eligible for the course.

TEC SIGN --- Admiring the new Texas Employment Commission sign recently erected by Bovina Chamber of Commerce and Agriculture is Orval Galley of the Hereford TEX office. The sign is in front of the building, now occupied on a two-day-a-week basis by the TEC here, which formerly housed headquarters for Panhandle Growers Association. Don Stone painted the sign.

AT ASSEMBLY--

Outstanding Students Get Special Awards

Awards for '64-'65 school year were presented to outstanding students in Bovina High and Junior High Tuesday of last week at a special assembly.

Receiving perfect attendance awards for the school year were Richard Carson, Gary Sides, Stuart McMeans, Joe Don Stevens, Phil Sorley, Vicki Vaughn, Lana Drager, Judy Sisk, Carmen Ward, LaNell Christian, Linda Rejino, Rex Cumpton, Janie Argon and Nancy Pewitt.

Commercial award went to Dorothy Bowman with June Gay Douglas receiving business

education award and Patsy Cumpton getting the best typist award.

Other honors and those receiving them were:

Agriculture, Billy Marshall; Athletics, Gene Pruitt and Lynn Looney;

Band, Mary Dane; Baseball, Al Shamblin; Dramatics, Connie Vaughn; English, Sandra Patterson; Homemaking, Tonya Ivy, who also received a national Crisco company award;

Language, Ronnie Glasscock; Math, David Anderson; Science, Billy Minter; Social Studies, Janie Hawkins;

Valdictorian, Lynn Looney; Salutatorian, Billy Minter; Citizenship, Qwen Crittan; Honor Student, Alexander Or-

lowsky;

Outstanding Seniors, an award presented by Bovina Lions Club, Tonya Ivy, Billy Minter and Alexander Or-

BAPTIST BIBLE SCHOOL --- In session this week at First Baptist Church of Bovina is Vacation Bible School which had an enrollment of 233 as of mid-week. At left is a group of Junior II students. At right is Mrs. Jim Russell's class of Primary I stu-

--- In center is the sign in front of the church welcoming children to the school which concludes Friday. The school opened Saturday with pre-registration and a parade through town.

Whittlin'--
(Continued from page 1)

pened to us Saturday when it rained bucketfuls in Houston. Had the field not had a roof, there wouldn't have been any baseball played and we'd have been a long way from home with no game to watch.

The first impression we had about the dome as we neared it was that it wasn't as large as we had imagined. When you're entering the dome area, it doesn't appear any larger than the coliseum at Lubbock. As you get close to it, of course, this impression is changed and the vastness of it is easily realized.

We weren't disappointed about anything in regard to our trip -- even the traffic tickets we got were just warnings -- but if we had over estimated anything in our pre-trip imagination, it was the \$2 million scoreboard. We don't mean to belittle it in anyway, you understand, but it wasn't just what we had anticipated.

It was noticeable to us that the opposing team, the San Francisco Giants, were curious about seeing the scoreboard and watched it, just as the

spectators did, as it was going through its "acts."

Advice from this department to others considering making the trip would be to take more time than we did. A weekend, though all the time we could spare, just isn't enough time to see enough games to justify the trip. . . unless you fly, which we didn't. A week is about the amount of time needed to make a nice, enjoyable trip by car.

All in all, ours was a wonderful trip and we're glad we had the opportunity to make it.

Baseball Change--

(Continued from page 1)
will be paid at a rate of \$2 each per game. Previously umpiring was on a volunteer basis. Lions will provide the funds for paying of the umpires.

Team sponsors will be responsible for uniforms for their players and for insurance for the players on their teams.

Committees of Lions members will take a week each of preparing the field for play and for operation of the public address system and score keeping.

Bovina and Oklahoma Lane will participate with Friona teams in a Pony League.

Reflections
From
The Blade

3 YEARS AGO
MAY 23, 1962

Bovina members of Oasis Shrine Club are selling bumper stickers here this week to raise funds for Seventh Annual Oasis Shrine Club Childrens Clinic which will be in Hereford June 1 and 2.

Rain, marred in some areas south of Bovina by hail, came to Parmer County last week after a lengthy dry spell.

Jerry Rigdon and Patricia Crawford were awarded Lions Club award for outstanding boy and girl from Senior class Friday afternoon at a special assembly.

Miss Nancy Cumpston will be honored with a bridal shower Tuesday at the home of Mrs. J.D. Kirkpatrick.

Work continues on Bovina's proposed paving project as members of city council and other volunteers launched a paving sign - up campaign Monday of this week.

Bovina Lions are working in an effort to raise funds to help pay indebtedness on new lighted ballfield here.

Mrs. Jim Howard was honored with a lullaby shower Thursday morning at Baptist parsonage.

Home of Mr. and Mrs. Wilfred Sikas was scene of a farewell breakfast for members of senior class and sponsors Saturday morning.

Junior Choir of First Baptist Church presented a cantata with a candle lighting service Sunday afternoon.

6 YEARS AGO
JUNE 3, 1959

Four college students from Bovina were among the 300 graduates to receive degrees from West Texas State College in Canyon. They are Mrs. Vernon Estes, Glendon Sudderth, Norris Samuelson and Miss Daylitha Bradshaw.

Appointment of G.W. Mayben as operating superintendent of the Baltimore refinery of the American Oil Co. was announced last week.

Avis Williams, high school senior, honored her classmates with an informal supper and party recently.

Mr. and Mrs. H.D. Bradshaw invite friends to an open house Sunday afternoon. The courtesy is in honor of their daughters, Miss Daylitha Bradshaw and Mrs. Al Rawls.

Charles Denny Williams of Bovina is one of more than 550 seniors who have applied for bachelor's degrees at North Texas State College this semester.

Janice Richards and Nita Beth Estes, star Bovina Fillie basketballers, have been invited to play in Texas North-South girl's basketball game.

Mrs. Pearl M. Dodson, tax assessor-collector for Bovina Independent School District, attended an annual tax meeting in Canyon Friday.

Three Years Ago
April 4, 1962

Bovina's newest business, The Mustang Drive-In, opens for business tomorrow with grand opening set for Saturday.

Boyd Gilreath is new mayor. He was elected by a 2-1 margin over L. M. Grissom in regular city election yesterday.

Several friends of Mrs. J. H. Steelman surprised her with a birthday dinner recently at her home. She celebrated her 75th birthday.

Approximately 43 Junior High science students went on a field trip Saturday to Palo Duro Canyon. The annual affair is sponsored by the West Texas Geological Society.

Happy and Bovina were leaders in district literary events which were conducted in Bovina Friday.

Next week, April 9-15, is Clean-Up, Paint-Up, Fix-Up Week in Bovina and is so designated by Bovina Chamber of Commerce and Agriculture.

City of Bovina voters will decide "for or against" changing form of city government from present city commission type to aldermanic in a special election which will be Saturday at American Legion Hall.

Cigarettes and a small amount of cash made up the loot which was stolen during a Wednesday night break-in of Bonds Oil Co. here.

Six Years Ago
April 1, 1959

The home of Mr. and Mrs. A.E. Steelman was the setting for a private wedding Friday afternoon when their daughter, Evelyn Joyce, became the bride of Arthur Edd Vineyard of McLean.

Darlene Denney, six-year-old daughter of Mr. and Mrs. Bill Denney, was honored with a birthday party in her home last week.

Mr. and Mrs. Levi Johnson received word last week of the arrival of a new granddaughter. The baby's mother is the former Betty Rose Johnson.

Three enterprising young men, students at Southeastern Oklahoma State College, Altus, put on a do-it-yourself thief catching act Sunday morning that not only got back their own belongings which had been stolen but numerous other items of several Bovina residents.

Tentative plans have been made members of Future Homemakers of America for their annual FHA Week observation.

Dear Fellow Texans:

I am unqualifiedly opposed to the proposed order by the Secretary of Agriculture which would have the effect of prohibiting skip-row planting of cotton.

Under present regulations, cotton can be planted in two rows, leaving the next two to four rows fallow, or planted in other crops, and then planting two more rows of cotton. Only the actual rows planted in cotton are now counted for acreage in cotton production.

The primary purpose of this skip-row method is to allow the plants to benefit from moisture and soil nutrients in the fallow land between the cotton rows. This has proven to be very effective in the drylands in combating wind and water erosion, as well as growing a higher quality of cotton fiber.

Skip-row planting is a method of cultivation in these areas just as intensive irrigation and fertilization are the most economical ways in other cotton growing areas with plenty of water.

Under the proposed regulation, all the area up to 64 inches in width between the rows of cotton will be considered devoted to cotton, even though the land is actually planted with some other crop.

This means that the real size of cotton allotments owned by skip-row growers will be reduced by over 30 percent, unless they plant cotton one row after another. But under this method the land would deteriorate and the occurrence of soil and wind erosion would increase.

It is unjust and unfair to attack skip-row planting to reduce cotton production as it is only one of the reasons for increased production, along with irrigation, fertilizers or pesticides.

I have strongly urged that the Secretary of Agriculture think seriously of his responsibilities to these farmers and withdraw the proposed rule changes relating to skip-row planting of cotton.

There is a serious and growing threat to the Constitutionally guaranteed right of privacy of the individual through several questionable practices by governmental agencies. I have objected to this encroachment upon a person's private affairs, and I have co-sponsored bills to prohibit these illegitimate practices.

In recent Senate hearings, it was revealed that the Post Office Department has had the mail of approximately 24,000 persons under surveillance over the past two years, by means of a "mail cover." This is a device used to keep systematic records of all mail received by a person or firm, as well as the recording of all information obtainable from the mail without opening it.

Under existing postal regulations, a "mail cover" is authorized to be placed upon any person or firm at the request of any government department, and the evidence indicates that this surveillance technique is used with little effort at control.

This practice is highly objectionable in a free country, as well as being legally questionable under the Fourth Amendment which protects "the right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures. . ." There is no law on the books authorizing this mail tampering.

Federal statutes also make it a crime to delay the mail for any purpose, and specifically if the delay is to pry into someone else's business. Yet, the Post Office Department removes mail from the regular channels, sets it aside, re-

CORDS the information and then puts it back in the regular course . . . a series of events which certainly delays the mail.

Another shocking practice is the seizure and opening of mail by the Post Office Department for the Internal Revenue Service for the purpose of collecting federal taxes. This seizure of mail without a search warrant is an obvious violation of the Fourth Amendment, and is an invasion of privacy that is directly contrary to all American concepts of fairness and privacy.

I am strongly opposed to these practices of snooping through the mails and will continue to support investigation and legislation which will insure protection of privacy for the individual and insure him his Constitutional guaranteed rights.

Assuming a continuation of current consumption and practices, there will not be enough usable water to meet the water requirements of the State of Texas by the year, 2,000.

If we are to meet the challenge that the demands for water in the near future will require, we must exert efforts not to waste time, talent, and finances, but must take immediate and appropriate steps to insure that effective measures are taken.

For this reason, I have been a firm supporter of the Water Resources Research Act, and have offered amendments to expand its coverage so that it can adequately fulfill its objectives.

Under this Act, Congress has authorized grant matching, and contract funds for assistance to educational institutions in addition to State land grant colleges, to competent private organizations and individuals, and to local, State and Federal agencies in undertaking special research in water resource problems.

The amendments which I have supported would raise the \$1 million ceiling per year to \$5 million, increasing by an additional \$1 million annually until it reaches \$10 million in the fifth year.

Secretary of the Interior Stewart Udall has notified the Senate that in the short life of the Office of Water Resources, 36 research proposals have been received, totaling \$1,750,000. This experience indicates clearly that the original \$1 million ceiling is inadequate and the larger amount is justified.

In addition, this bill encourages research by water resources research institutes, since the previous provision restricting support from them has been deleted.

This proposal has widespread support in Texas. Six proposals from the Texas Water Resources Center have already been submitted. These involve research into the water cycle, water and land management, and into qualitative, economic, and institutional aspects of water resources research.

The whole future of the Southwest part of the United States is vitally dependent on water. No sounder investment of public funds can be made today.

**JC's Slate
Trap Shoot
Sunday Aft.**

Blessed is the man who can enjoy the scenery of a detour.

If you can learn from your mistakes -- don't make any.

Don't waste your time on your critics - when you are doing your best.

Bovina Jaycees have scheduled the second in a series of trap shoots for Sunday afternoon at 3.

The shoot will be at Bovina Gun Club's shooting range east of town.

Shotgun marksman are invited by the Jaycees to participate in the fund-raising event.

Entry fee will be \$2 per shooter per heat. Winner of each five-man heat will receive his choice of \$5 or a ham.

Bank-Lawlis jumped off to an early lead in Bovina's Little League Monday night whipping Bovina Gin-Generals 20-11.

Cicero Smith was the winner of the first peewee game of the season, Tuesday night, downing Oklahoma Lane, 14-2.

Bovina Gin-Generals won Tuesday night's Little League game easily over Oklahoma Lane.

Schedule for the next four playing dates is as follows: THURSDAY—Oklahoma Lane vs. Parmer County Farm Supply, peewee; and Bank-Lawlis vs. Oklahoma Lane, Little League;

FRIDAY — Cicero vs. Bovina Blade, peewee; and Bovina Gin-Generals vs. Bovina Wheat Growers - Bovina Ins. Little League;

MONDAY — Parmer County Farm Supply vs. Cicero, peewee; Bank-Lawlis vs. Bovina Gin-Generals, Little League;

TUESDAY — Blade vs. Oklahoma Lane, peewee; and Bovina Wheat Growers - Bovina Insurance vs. Oklahoma Lane, Little League.

All peewee games begin at 5:30 and Little League games are at 7.

Farm Accident Hurts Wiseman

T.C. Wiseman suffered an injury to his right hand in a farming accident Wednesday.

The accident resulted in the loss of a portion of his little finger and injured the other three fingers. The mishap occurred on Wiseman's farm west of Bovina.

He was checking a belt on a rodweeder when the accident occurred.

Wiseman was confined to Parmer County Community Hospital in Friona from Wednesday until Saturday.

New Astounding Sorghum

Breakthru Yielder

If you're an irrigation farmer in Oklahoma or Texas and you want a sorghum that stands and yields like you've never seen before—try F-61, a new DeKalb Breakthru Hybrid. Produces large bronze seed in big semi-open heads. Similar to DeKalb F-63 in maturity. Try this yielder.

Outdoors In Texas

By—Vern Sanford
Least understood, yet the most vital piece of equipment for the fisherman, is the hook.

Most anglers are casual in their selection of hooks. Yet the hook is the primary link between fisherman and quarry. More fish are lost because of inferior hooks than any other piece of equipment.

In any sporting goods store there will be countless bins of different hooks. Offhand, most of them look pretty much alike. But upon closer inspection you'll find that all differ in one or several respects. A seemingly insignificant thing like the point can distinguish whether or not a hook is run-of-the-mill or quality merchandise.

A poorly manufactured hook has a conventional round bend, has a point which won't hold its sharpness and rusts easily. When you buy a cheap hook you get just what you pay for... a hook that will lose its sharpness after one or two fishing trips. And unless you inspect the point periodically, dullness may cause you to miss fish.

For example, when angling with live minnows you should use a thin-wire hook, preferably one with a wide bend. A heavy-shanked hook wounds the bait, often mortally. On a thin-wire hook the minnow will remain alive much longer. With a wide bend hook, the point extends farther beyond the minnow and allows easier hooking of a fish that might take the bait.

Most common hook is the ordinary round bend hook. But hooks with a more oblong shape, like the Eagle Claw, are very popular among Texas fishermen.

Two of the more common hooks are the Aberdeen and the Carlisle. The Aberdeen (a style of hook and not an exclusive brand name) usually is made of thin wire with a large bend. The Carlisle has a long shank and a round return bend and is made of regular wire.

Basically, hooks come in three shank lengths: short, regular and long.

Size of the hook is important. A general tendency among fishermen is to employ hooks that are too large. Even a small hook will catch big fish, if the fisherman plays the catch properly and knows how to handle his equipment efficiently.

A perch or bream fisherman, for instance, might select a No. 6 hook when a smaller No. 10, would be far more appropriate.

What goes with this numbering system? Largest numbers for smallest hooks?

Well, hooks are graded according to different sizes, designated by numbers. In the smallest sizes, hooks range from No. 1 to No. 22 (the latter is the tiny one kids catch minnows on). The larger sizes run from 1/0 up to about 20/0. The difference between a No. 1 and a No. 1/0 is four sizes, so don't confuse the two.

Basically, hooks have one of three different bends—round, parabolic and square, or variations of the three. The Aberdeen, as an example, is slightly square, while the O'Shaughnessy is parabolic.

You don't see extremely square hooks anymore since they have a tendency to break at the abrupt bends.

A hook is composed of the eye, where you tie the line, the shank, the bend, the barb and the point.

That protrusion which prevents a hook from slipping out is the barb. That part of the hook from the barb to the tip, and probably the most important feature on the hook, is the point. One with a bad point is practically worthless.

Quality hooks come with hollow-ground points. These feature razor-sharp points and curved barbs which insure maximum penetration and holding power. The "claw" point, a feature of the Eagle Claw hook, curves in slightly. This cuts down on penetration a bit but it holds better once imbedded.

Straight spear points generally are found only on cheap, inferior hooks. They won't hold their edge very long.

Hooks come in several different finishes—bronze, bright, gold-plated, nickel finished, tinned, japanned, and blued. The bronze hook is perhaps the most common. But finish-wise it is a poor choice since it tends to rust easily if not kept dry and away from moisture. Bronze hooks usually are cheap hooks.

Nickel-finish hooks are found on salt-water lures. They resist corrosion and stay sharp. Almost as good is the tinned hook. Hooks with these two finishes are the most expensive.

Third in quality is the japan-finish, which is a lacquer finish of blue-black.

Of Interest To THE WOMEN

Rainbow Girls Initiate Two New Members

SHARON HEMKE

Order of Rainbow for Girls held an initiation Monday last week for two new members, Sharon Hemke, daughter of Mr. and Mrs. Jim Hemke, and Debbie Edens, daughter of Mr. and Mrs. C. B. Edens.

Guests present were the Advisory Board members, Mrs. H. J. Charles, Mrs. Aubrey Brock, Mrs. Lawrence Jamerson, Mrs. Clifford Leake; Mrs. Jim Hemke and Mrs. Frank Hemke.

DEBBIE EDENS

BEGINNING NEXT WEEK--

FHA Girls Plan Summer Projects

The Bovina High FHA girls will begin their summer projects beginning Tuesday.

The first week will consist of officers training and getting the year book set up for the coming year. Beginning June 7, the girls will have a child care program that will include pre-school children from 7:30 to 10:30 a.m. They will also help with the program Head Start that will be offered this year, for preschoolers.

In the afternoons of this same week some of the girls will work on improvements on the cottage.

Mrs. Marjorie Caldwell of Midland will present the girls a charm course during the week of June 14 thru 18. There will also be classes for adult women during the mornings of the same week.

Mrs. Alan Staley, homemaking instructor, asks that women interested in taking this course get in contact with her before the course begins. The FHA girls have had Secret Grandmothers during the past year. The grandmothers were given a tea and the identity of the girls were revealed at the rose ceremony, and the installation of officers. After the ceremony the group was served cookies, punch and coffee.

Over 30 girls will be participating in the summer projects lasting thru June.

Marzie Lynn Circle Meets At Church

The Marzie Lynn Circle met in Bovina Methodist Church Tuesday afternoon.

Prayer groups met in separate groups for 15 minutes prior to program.

Mrs. John Dixon led the program titled, "Our Children and Theirs." Mrs. Henry Ivy, Mrs. Billie Sudderth and Mrs. John Dixon had parts on the program. Business was conducted by Mrs. Earl Ware.

There were 11 members present.

Farewell Coffee For Mrs. Vickers

The Friendly Circle Sunday School Class of First Baptist Church honored Mrs. Charles Vickers with a farewell coffee in the Bovina Restaurant Friday morning.

The class presented Mrs. Vickers with a gift and served coffee and doughnuts.

Those present were Mrs. Chaires Vickers and Carla, Mrs. Joe Moore, Mrs. Jim Heard and Diane, Mrs. D.C. King, Mrs. Bob McMeans, Mrs. Ralph Aday, Mrs. Lanham Ford, Mrs. Grady Sorely, Mrs. Jack Boggs, Robbie and Rhonda, Mrs. Glenn Kelly, Mrs. A.L. Nuttall, Mrs. Bobby Englant, Mrs. Jim Russell, Mrs. Henry Spicer, Mrs. Wendol Garner, Mrs. J.W. Harris, Mrs. Kieth Garner, and Mrs. Travis Dyer.

The Vickers have moved to Dalhart, where he will be farming.

Shower Fetes Bride-Elect

Miss Patsy Lloyd, bride-elect of Larry Webb, was honored with a bridal shower Thursday afternoon in the home of Mrs. A. M. Wilson.

Receiving and welcoming the guest was Mrs. Wilson, the honoree, Mrs. Travis Lloyd, her mother, and Mrs. Bessie Webb. The bride and mothers wore white irls corsages presented to them by the hostesses.

The serving table, which carried out the bride's chosen colors of apricot and white, was laid with a white net cloth centered with a spring flower arrangement. Individual cakes,

petifores and apricot punch was served from crystal appointments.

Presiding at the table were Miss Lynn Looney and Miss Tonja Ivy.

Miss June Gay Douglas presided at the guest book.

Hostesses were Mrs. Leslie McCain, Mrs. Jack Patterson, Mrs. R. L. Douglas Sr., Mrs. H. H. Kelso, Mrs. Jim Heard, Mrs. Grady Sorley, Mrs. Chester Rogers, Mrs. Lee Sudderth, Mrs. Erith Hawkins, Mrs. Henry Minter, and Mrs. A. M. Wilson.

Hastings Celebrate 50th Anniversary

Mr. and Mrs. Frank Hastings celebrated their 50th Wedding Anniversary in their home Thursday afternoon. Their daughters, Mrs. R.E. Wilson of Bovina and Miss Ann Hastings of Plainview, were hostesses for the occasion.

April Wilson, granddaughter of the Hastings, registered 122 guests during the afternoon. Ann Lynn and Candy Wilson, granddaughters of the Hastings, served the guests wedding cake and punch from a table laid with a ecru cloth and a low centerpiece of mums and gold leaves. Also assisting were Kregg Wilson, grandson of the Hastings, Mrs. Hillary Tidenberg and Mrs. Charles Tidenberg.

Special guests present were Mrs. J.P. McDonald of Folsom, New Mex. Mrs. McDonald made Mrs. Hastings wedding dress.

The Hastings received many cards, telegrams, and phone calls from Africa, Michigan, Colorado, Oklahoma, New Mexico and several towns in Texas.

Out of town guest calling during the afternoon were Mr. and Mrs. Frank P. Wilson Jr., and Pam, Mrs. Homer Greenhill, Mrs. W.E. Kirk, Mr. and Mrs. Frank P. Wilson Sr., Mr. and Mrs. M.H. Martin and Mr. and Mrs. Hugh Frazier, all of Amarillo.

Mrs. Joe Hastings, Mrs. Leona Daniel and Mr. and Mrs. Ulys Davis of Dimmitt, Mrs.

Bruce Rhodes Receives Study Award At WT

Bruce Rhodes, Bovina High librarian, has received an award for advanced study in English at West Texas State College at Canyon for a six-week period this summer.

Funds for the program are provided through National Defense Education Act, announces High School Principal Alan Staley.

Rhodes has a masters degree in English. He will begin the course next week.

My Neighbors

"You've got to win that sales contest—I've told the neighbors you would."

Tennie Harmon of Lubbock, Mrs. Mabel Reynolds of Farwell, Mrs. Henry Hastings, Mr. and Mrs. Ralph Hastings, Mrs. J. T. Gilbreath of Hereford, Mr. and Mrs. E.T. Foster, Mr. and Mrs. J.L. Stagner, Mr. and Mrs. Hillary Tidenberg, Mr. and Mrs. D.J. Melugin, and Mr. and Mrs. J.F. Beavers of Clovis, and Mr. and Mrs. Roy

NEXT WEEK--

Methodist Slate Church School

Bovina Methodist Vacation Church School will begin Sunday and continue thru Sunday June 6.

Weekdays, Monday thru Friday the school will have classes from 3 until 5 p.m.

There will be five age groups this year ranging from four years old thru the sixth grade.

Refreshments will be provided by the WSCS during the week. Each group will have worship, meaningful activities and recreation.

The offering given during the week will be used to help support the TV series, "Break-thru". Mrs. J.T. Hammonds will be principal of the school.

Wines Parents Of Baby Girl

Mr. and Mrs. Rommie Wines of Bovina have a baby girl born Sunday, May 23, in Parmer County Community Hospital at Friona. Anga Gale weighed 7 pounds and 7 ounces.

Paternal grandparents are Mr. and Mrs. Prentice Mills of Farwell and maternal grandparents are Mr. and Mrs. David Wines of Bovina.

Adults helping conduct it will be Mrs. John Dixon, Mrs. Tom Ware, Mrs. Wayne Magness, Mrs. Oakley Stevenson, Mrs. Eddie Redden, Mrs. Durward Bell, Mrs. Scott Gober, Mrs. Nickie Foster, Mrs. Ronnie Sudderth, Mrs. Jimmie Ware, Mrs. Jimmie Clements, Mrs. Harold Snell, Mrs. Margaret Caldwell, Mrs. Paul Lloyd and Mrs. Jerry Wright.

There will be high school girls helping in each of these groups.

Mrs. George Turner will be in charge of the refreshments.

Jerry Strawn, Arnold Kriegel Tech Grads

LUBBOCK—More than 1,300 students have applied for degrees at Texas Tech's commencement exercises Saturday. Gov. John Connally will give the principal address at the 8 p. m. exercises in Lubbock Municipal Coliseum.

The list includes the following persons from Bovina:

SCHOOL OF AGRICULTURE — Bachelor of Science: Jerry Lynn Strawn — crops. SCHOOL OF BUSINESS ADMINISTRATION — Bachelor of Business Administration: Arnold Walter Kriegel — accounting.

Mr. and Mrs. A. M. Wilson, Pam and Suzanne, left early this week for a vacation to Yellowstone National Park, San Francisco, and other points of interest. The Wilsons plan to be gone approximately two weeks.

Mrs. Gaines Hostess For Widow's Club

Bovina Widows Club met in the home of Mrs. J. Sam Gaines Friday for a luncheon and an afternoon of visiting.

Regular members present were Mrs. Oma Gunn, Mrs. Margaret Caldwell, Rita Caldwell, Mrs. C. O. Edens, Mr. W. M. Lloyd, Mrs. J. R. Steelman, Mrs. J. R. Glover, Mrs. Ola Free, Mrs. Ellen Remmsnyder, Mrs. Pearl Hastings and the hostesses, Mrs. J. Sam Gaines and Mrs. Lady Armstrong.

Hogland, and Mrs. Hallie H. Veale of Perryton.

The Hastings report the reception will always be remembered.

Mrs. Hastings accredits cooperation as one factor that made for a happy home and made the 50th celebration possible.

Baptist Group Has Hayride

First Baptist Church intermediates and young people had a hayride Saturday night for the Teen Time being conducted every night this week from 7:30 until 10.

The hayride ended at Running Water Draw for a weiner roast. There were 32 present. A trio from Amherst presented the group with a hootenanny for entertainment.

June 6, 1639—Five hundred acres of land were granted to Edward Rausen by Massachusetts Bay Colony governors to set up the first gunpowder mill in America.

June 6, 1816—The year that New England had no summer began this day with a ten-inch snowfall.

June 18, 1798—The famous words, "Millions for defense, but not cent for tribute," were coined by Robert Goodloe Harper, Congressman from South Carolina, in a toast to John Marshall, one of the presidential envoys to French Foreign Minister Talleyrand. Marshall refused a bribe made by one of Talleyrand's agents and was being honored at a banquet given him by the federalists.

June 24, 1647—The earliest known suffragette in American history, mistress Margaret Brent, made her stance before the all-male Maryland Assembly, demanding the right to a voice and a vote.

June 30, 1859—With the eyes of five thousand persons upon him, French daredevil, Emile Blondin, dressed in pink tights and a spangled tunic of yellow silk, walked a tightrope across Niagara Falls in five minutes.

A smart husband hides his money in clothes that need mending.

This Week's DEVOTIONAL

NOW!
Redeem the time, because the days are evil. Ephesians 5:16.

Some time ago there was a striking cover picture on one of our national magazines. It showed a large clock with the minute and the hour hand set at two minutes before twelve. It seemed to say: "This is what time it is in the world's history." The final hour is about to strike. It is much later than you think when you consider the needs of your soul. This is no time to enjoy yourself but to prepare.

What a solemn lesson! Minutes by minute we are drawing closer to the judgment seat of God. Long ago, in a similar situation, Paul wrote to his Christian friends and said: "Redeem the time, because the days are evil." Sounds like a description of our age!

That is why the Bible emphasizes that we must redeem the time. Time is a great gift of God. We must use it to our best advantage. We cannot just stand there and watch it drift by. Like a swift river flowing out into the trackless ocean, so time, silently but very quickly, passes into the ocean of eternity. If you miss a train by half a minute, you have missed it completely. If the oxygen comes too late to the dying man by just one second, it is still too late. And if we delay in accepting Christ until one minute after death, we are eternally too late. God is calling us today! He is saying: "NOW is the accepted time. Now is the day of salvation!"

BIBLE QUIZ

...by Don Stone

May AWARD: ALL THE MEN OF THE BIBLE, Lockyer (\$4.95). Five consolation prizes will be awarded. Send your completed quizzes to: Box 422, Bovina, Tex.

Theme: Who am I?

1. We are easily confused one with another. Our names are similar. Our work was the same--prophets of God. My master left me his mantle and a double portion of his Spirit. Who are we? I am _____; my master was _____.

2. Often people confuse us. Our names are similar. We held similar positions. We were kings. My people once honored with the name of Israel came to know as Ephraim; I was their first king. My name is _____ and the other king I spoke about was _____.

3. We make the list of the kings very confusing, because our names are identical. To further complicate things, we both have an abbreviated name which is of _____ and my nephew was _____.

4. I am a prophet about whom little is known. My name was a common one in Israel of old. It is worn by more Old Testament men than the name of any other prophet. I am called _____.

5. We are of a category of Bible personalities who have names which may or may not be personal names. Although traditionally considered names, our monikers may be descriptions rather than actual names. I am a prophet, a messenger of God, known as _____. I am the recipient of two New Testament books. I am addressed as _____ meaning _____.

The winners will be announced June 9.

Record-Setting Crowd At Meet

A record-setting crowd of 274 was present for Bovina Wheat Growers annual meeting Thursday night in school cafeteria.

years, was re-elected to a new three-year term on the board. Betty Hawkins was in charge of the carnival-type program. Also appearing on it were Mr. and Mrs. Leslie McCain, Odiss

White, Wayne Spears, Lou Nat-tall, Martha Adams, Kathy Estes and Jack Boggs.

Guest speaker was Jack Tompkins, Amarillo TV farm newsman. He showed a film concerning, and discussed, the new farm bill.

Attendance at last year's meeting was 247. A total of 100 were present '63 and 140 turned out for the 1962 session.

Members of the board of di-rectors other than Grissom are M. H. Carson, Raymond Schueler, Webb Gober and Harold Hawkins.

8 Accidents During April

There were 8 rural accidents in Parmer County during the month of April, according to Sergeant W.E. Wells Highway Patrol Supervisor of this area.

These crashes resulted in six persons injured and an estimated property damage of \$3,135.

The rural traffic accident summary for this county for the first four months of 1965 shows a total of 36 accidents resulting in two persons killed, 18 persons injured, and an estimated property damage of \$19,800.00.

Rejoice in that day, and leap for joy—(Luke:23).

In the brief course of this day, we can experience all of God's good that we are willing to accept.

The rural traffic accident summary for this county for the first four months of 1965 shows a total of 36 accidents resulting in two persons killed, 18 persons injured, and an estimated property damage of \$19,800.00.

SAVE 10% with GULF WARRENGAS

Save up to 10% OR MORE... on tractor fuel and upkeep costs

REDUCE TOTAL TRACTOR COSTS. Save money with Gulf-Warregas* fuel over diesel, the so-called economy fuel--and over gasoline, too. Consider all costs.

SLASH REPAIR AND UPKEEP COSTS. Cut these costs about one-third with Gulf-Warregas, compared with gasoline engines. Save more than \$100 a year for 1000 hours of use with a 4-plow tractor.

FEWER OIL AND FILTER CHANGES. You go three times as long as diesels and one and one half times as long as gasoline engines between changes. Spark plugs last longer--no foul-up due to fuel residues.

Gulf-Warregas* is the LP-Gas member of the Gulf family of quality petroleum products.

16 men from Great Britain (Scotland and England) were in Friona and Farwell on Monday to visit with businessmen and agricultural agents. The men are making a tour of the United States to study American industry. In Parmer County...

they visited feed lots, elevators, and banks, where question and answer sessions were held to acquaint them with the local business and agricultural practices.

Farmers Have Great Variety Of Post-Emergence Herbicides

The battle cry of many Texas farmers for the immediate future may well be "Let's get 'em-down with weeds and grass!" Muddy fields have kept machinery idle but not weeds and grass, says Fred C. Elliott, cotton specialist for the Agricultural Extension Service at Texas A&M University.

Elliott said that farmers now have available more post-emergence herbicides than ever before to help them in the fight but that the number one weed control practice was still mechanical — rotary hoe equipped tractors. More than 51,000 were used last year in 173 counties, he added, and they did a good job. Careful attention to the operation of this equipment is the secret of its success, he said.

As for the herbicides, Elliott said herbicidal oil gives very effective control of small weeds and grass. This is an old practice, he added, and can be used

to get out of the grass for about \$1.50 an acre. Conditions must be right for its use, timing must be correct and application made with precision, he added.

He listed the following as other recommended post-emergence herbicides and herbicide mixtures. Diuron or caparol plus a surfactant — they are effective in the control of a wide range of weed species and do the best job on small actively growing weeds. They are used after the cotton is too large for lateral oiling.

DSMA plus a surfactant is effective against many grass species including the cocklebur, he said. It is more effective under hot dry conditions, above 75 degrees F. Its effectiveness is reduced when applied under cool, wet conditions, the specialist said.

Diuron plus DSMA plus a surfactant is more effective against a wider range of weeds and grass species under some

conditions than either of the two materials used alone, said Elliott. This mixture is desirable when the weeds present include crab — grass, morning — glory, cocklebur, goosegrass and seedling johnsongrass. Also when weeds are bordering on a drouth stressed condition of growth and when the weeds and grass are in various growth stages. Cotton should be more than six inches high when the mixture is used.

The cotton specialist suggests that cotton producers visit their local county agent and pick up copies of MP-504, "Lateral Oiling of Grass and Weeds in Cotton" and B-1029, "Suggestions for Weed Control with Chemicals." Both list application rates and many suggestions for the timing and proper use of the materials.

Good weed fighting weather could really give a boost to control practices, and chemicals, machines and hoe hands will probably all be needed, Elliott said.

YOUNG COTTON — Cotton on the Don Schumann farm in the Lazbuddie Community was slightly damaged by the recent hails and heavy rains in that area, (although the picture does not do the crop justice) it is one of the finest young cotton crops in the Lazbuddie area. It was planted on April 4, Schumann was busy late last week using a rotary hoe and cultivator to loosen the ground and clean away the weeds in the crop. Although, on irrigated land the crop has not been watered since it was planted. However, the ground was irrigated prior to planting.

There was a day when Congress passed laws instead of waving at them as they go by. There is not so much to see in a small town, but what you hear makes up for it.

SCROLL-PRINT SHEATH
Nelly Don cuts a good-looking town dress in lined cotton chiffon. The smart scroll pattern is one in a series of young, contemporary prints. Matching scarf softens the neckline where a button-detailed tab holds it in place. Self belt defines the waist without breaking slim-line silhouette.

MATERIAL: Scroll Print Cotton Chiffon.
COLORS: Black, Navy

The group was greeted at Fairview Farms by Mr. and Mrs. Perry R. Bass, foundation trustees, and Art Shahan, manager of the farms.

Ceremonies included presentation by Bass of a large plaque engraved with the laboratory's name. Also on the program was Bonsma's demonstration of selection of breeding cattle based on functional efficiency. Some of his subjects were Governor Connally's cattle.

The laboratory was organized by Cartwright. Wesell will be project leader. Both are specialists in animal genetics.

Pay of Teachers Exceeds Public Employee Average

Instructional personnel in education have the highest average earnings among public full-time employees, according to a release of the Bureau of the Census of State Distribution of Public Employment in 1964.

The United States average October earnings for full-time state and local government employees were as follows:

Education (Instructional personnel only) \$574, education \$518, local fire protection \$534, water transport in terminals \$523, local utilities \$508, police protection \$506, housing and urban renewal \$469, health \$462, welfare \$395, local libraries \$360 and hospitals \$342.

THE HIGH PLAINS FARM AND HOME

On The Farm In Parmer County

By JOE VANZANDT County Agent

This year's cotton crop is getting off to a slow start due to this cool, damp weather we have had. I was checking one of our cotton fungicide demonstrations for control of seedling disease at Charles Hough's farm last Friday and he had cotton still coming up three weeks after planting.

Cotton producers need to be ready to start spraying for trips as they can further slow down and hold back this young cotton.

Begin thrip control measures as soon as damage is apparent on young seedling cotton. Damage is characterized by wilted, wrinkled, blackened leaves and terminal growth silvering of the lower leaf surface is also common.

Apply sprays at 7-day intervals if infestation persists. Heavy thrips infestations on young cotton may delay plant maturity a few days to a few weeks.

Insecticides recommended for thrips and fleahoppers are listed and pounds per acre of actual insecticides are given in parenthesis.

- A. Dieldrin + DDT (.2 to .25 + .5)
- B. Guthion (.125 to .25)
- C. Strobane - DDT, 2 - 1 mixture, (1.25 to 2.25)
- D. Carbaryl (Sevin) (.5 to 1.0)
- E. Toxaphene - DDT, 2-1 mixture, (1.25 to 2.25)
- F. Heptachlor + DDT (.25 to .375 + .5)
- G. Endrin + DDT (.2 to .3 - .5)
- H. Bidrin (.1 to .25)

Cotton insect control guides are available at my office in courthouse. Every cotton grower needs a copy of this list of recommended insect control practices.

If you are having to replant your cotton, we recommend you not plant more than 30 pounds of seed per acre. This is especially true where seedling disease has been a problem. Thicker stands increase seedling disease problems.

WHEAT PRODUCTION

Many wheat fields are looking real good now. We invite you to go by and look at one wheat field in particular. It is located on the A.E. Redwine farm, 1 mile south and 1/4 mile east from the Oklahoma Lane Community Center.

As I was staking off different fertilizer rate plots last week, Henry Haseloff came by and said he had been wondering what was the matter with this wheat because it was so spotty and uneven.

This is a good opportunity to see first hand fertilizer rate research being conducted by the Agricultural Experiment Station. By stopping by for a brief inspection you can see for yourself the response from various fertilizer rates. Yield data will be obtained and published. Each

fertilizer rate is replicated four times in the research project. We have noticed a few field of wheat that have irregular spots, areas or rows in them. Most of the time, this can be attributed to fertilizer use or something else the farmer may have done a little different. Now is the time to figure out what caused any irregularity in your fields and make definite plans to eliminate this next year.

If you have problems with a non uniform looking field of wheat, I invite you to give me a call, 481-3619. We will try to help figure out what caused your problem and how you can improve your crop next year.

FERTILIZER AND CHEMICAL TRIALS

The Agricultural Chemical business is expanding and booming. Many new products are put on the market every year. The Experiment Stations and Extension Service try these chemicals out and come up with recommendations for their use. However, we don't have all the answers on how these chemicals or fertilizers will work on your farm here in Parmer County.

I believe farmers would be ahead in the long run if they would leave a few rows (4 to 8) as check plots or trial plots at different levels of application. Take fertilizers for instance where land has been fertilized good for several years. We know from soil test results and recommendations that we are apparently having some phosphate build up in soils.

It would not take much time or trouble to increase or decrease the rate of application on a few rows. You may find out you are not putting enough fertilizer or chemical or you may be putting on more than you need.

This is one of the best ways I know of to find how to increase your net profit. Does this product, method or rate give me, my biggest net return?

LOWER COTTON EXPENSE

The American Cotton Congress meeting at 9:30 a.m., Friday, May 28 at the Ko Ko Palace in Lubbock is a fine opportunity for producers and ginners to hear expert advice and council on cutting the cost of

Cost Cutting To Be Discussed At Cotton Meet

Parmer County cotton producers will have the opportunity to learn about the best methods for reducing production costs at this year's American Cotton Congress, according to County Agent Joe VanZandt.

The one-day congress will begin at 9:30 at the KoKo Palace in Lubbock, he said. A free lunch will be served at noon.

Theme of the session is "Reducing the Cost of Cotton Production." Host for the event is Plains Cotton Growers, Inc.

Among those who will speak at the congress are Charlie Scruggs, Editor of Progressive Farmer Magazine; Claude Welch, Division of Production and Marketing, National Cotton Council, and Billy C. Gunter, Extension District Agent.

Other speakers include an executive with a textile firm, a Federal Extension Service agronomist and a USDA economist.

Chairman of the morning session will be Dr. Gerald Thomas, Dean of Agriculture of Texas Technological College. V.G. Young, Extension Service State Agricultural Agent, will serve as chairman of the afternoon session.

producing cotton. If you can possibly attend, we feel you will hear an outstanding program. As good program on cutting cotton costs as you could hear anywhere. If you can make it to Lubbock Friday, we believe you will be glad you went.

There has been some confusion from Washington about the the clearance for Propazine and Atrazine for use on sorghums. We were advised on May 12 that as of that date it had been cleared for pre-emergence and early post-emergence use on both grain and forage sorghums at a rate of application not to exceed three (3) pounds per acre actual material.

The rates of application for Propazine here in Parmer County vary from 1 to 2 pounds per treated acre. The 1 pound rate is recommended on sandy soils and up to 2 pounds are needed on silty clay loam soils. Atrazine is recommended at rate of 1 pound per treated acre plus surfactant on emerged sorghum and weeds less than 2 inches tall.

It's 4-H Roundup Time In Texas

A record 274 wheat growers met Thursday in the L. M. C. Cafeteria for the annual roundup.

8 A Dur

There will be a month of Sergeant Patrol Summaries for persons in the first four of two persons mated pro 800.00.

The green and white of the 4-H Clubs will dominate the Texas A&M University campus June 1-3 when some 2,000 4-H members, leaders, county Extension agents and friends of 4-H assemble for their annual roundup.

The second annual 4-H Career Opportunity Fair will open Wednesday at 1:30 p. m. It will include exhibits of career choices offered through Texas A&M.

4-H Club work is conducted in the counties under the supervision of the county Extension agents with assistance from local voluntary leaders and friends of 4-H. 4-H'ers have been visiting the A&M campus annually for more than half a century.

The Texas 4-H Youth Development Foundation will recognize individuals and business concerns throughout the state for their outstanding contributions to the 4-H Club program. The Foundation also sponsors a "Chuck Wagon Barbecue" on the evening of June 1. The first general assembly of the Roundup will follow the barbecue.

Winners for 30 judging and team demonstrations contests will be named Wednesday, June 2, and honored at the final banquet that evening. A new division, Quarter Horse Judging, has been added this year. Those participating in the contests have already won county and district honors and have been training for many weeks. To be eligible to participate in the state finals, the team or individual must have ranked first or second in the district eliminations. Competition will be stiff, since more than 1,300 individual 4-H Club members will participate. Many will be trying for a chance to represent Texas in the national finals later in the year.

The Roundup will officially end with breakfast the morning of June 3.

Grain Price-Support Activities Through March 1965

Washington, April 15—The smallest quantity of corn in a decade has been placed under price-support loan as of March 31 for the 1964 crop, the U. S. Department of Agriculture announced today. The 207,508,105 bushels now under loan is the least since March 31, 1955, for the 1954 crop of corn. Today's report also includes support activities on other grains through the past month.

Of the 207.5-million-bushel 1964-crop corn total put under loan, 200,734,946 bushels were farm-stored

and 6,773,159 bushels warehouse-stored. It compares to 373,911,620 bushels of 1963-crop corn put under loan through March 1964 and 493,275,664 bushels of 1962-crop corn through March 1963.

During March 1965, farmers put 6,917,013 bushels of 1964-crop corn under loan, compared to 14,102,776 bushels put under during February.

Following are the quantities of 1964 crops put under loan through March as compared to totals put under loan through March a year earlier:

	Warehouse- Stored Loans	Farm- Stored Loans	Total Put Under Support through March 31, 1965	Total Put Under Support through March 31, 1964
Barley, bu.	2,057,785	12,769,052	14,826,837	23,696,424
Corn, bu.	6,773,159	200,734,946	207,508,105	373,911,620
Flaxseed, bu.	4,510,402	1,794,136	6,304,538	11,775,576
Oats, bu.	3,459,965	36,528,743	39,988,708	35,046,706
Rye, bu.	1,399,565	3,829,650	5,229,215	1,497,280
Soybeans, bu.	14,807,680	13,814,644	28,622,324	69,645,575
Wheat, bu.	94,941,396	99,735,723	194,677,119	160,570,095
Dry Beans, cwt.	1,046,011	82,071	1,128,082	2,827,850
Grain Sorghum, cwt.	38,069,348	8,147,761	46,217,109	77,677,494
Rice, cwt.	5,228,952	2,370,536	7,599,488	5,888,180

Soil Additives And Conditioners-Consider Carefully

As expected in a rapidly changing agriculture, new products such as soil conditioners continue to appear on the market. Jim Valentine, Extension Area Soil Chemist, The Agriculture Extension Service, states some may have merit while others are of questionable value or may be entirely worthless. Benefits to be derived from their use may be stated in vague or misleading terms and statements may be based on mere opinion or pure fancy.

Valentine further states it is always hazardous to purchase a material that bears no guarantee as to its formulation. By not stating what is in the product the seller is in no way liable, and existing laws such as those governing fertilizers have no jurisdiction over the manufacturer or seller.

The primary soil conditioner for this area is organic matter and if your soil contains a modest one per cent organic matter this is equal to 20,000 lbs. per surface six inches. We have no known bacteria deficiency, and it is estimated that

there are 400 to 500 lbs. of live bacteria in an acre furrow slice of soil. The population rises and falls depending on the amount of residue returned, moisture, and temperature.

Soil structure is the result of the soil's physical and chemical properties and is influenced primarily by organic matter. Turf good residue management and by avoiding tillage

when soil is wet, favorable structural conditions can usually be maintained.

Valentine concludes by saying its your money - consider the products carefully before buying and do not expect non-fertilizer materials to substitute for the plant food elements commonly obtained through commercial fertilizers.

June Brings Abundant Dairy Foods, Fresh Vegetables, Broiler-Fryers

"Just because it's June..." might be the reason milk and other dairy foods are in such big supply now, according to the Texas Agriculture Extension Service.

June is the usual month when milk production is at its peak. That's why June is Dairy Month. When milk is especially plentiful, you also can expect a big supply of such other dairy products as cream, whipping cream, cheese, cottage cheese and ice cream.

Also reported plentiful during June by the U. S. Department of Agriculture's Consumer and Marketing Service are seasonal vegetables and broiler-fryers. Fresh vegetables always perk up mealtime. Right now, home and nearby commercial gardens are pouring forth a wide variety of vegetables to help brighten

your meals. Use them generously.

Broiler-fryers are ideal for popular early-summer cook-outs. Remember - June is National Barbecue Month. Broiler marketings are forecast heavier than last year when prices to producers were at a near-record low.

Keep June Dairy Month and National Barbecue Month in mind when you shop, and take special notice of the vegetable counter - for all the eating pleasures of June.

June Food Specials

Food-wise, June will be a bonanza for Texas families. Seasonal foods which have been in short supply such as tomatoes, asparagus, snap beans and others, will be back on the market in force and at a right price.

June, of course, is traditionally "Dairy Month". Milk production makes its annual production jump and all dairy products usually become "good buys". There will be a bounty of whole milk, buttermilk, skim milk, butter, yogurt, cheese, dry milks, cream, etc. It is an opportunity for Texas housewives to herald their menus in eye-appealing and taste-tempting ways.

The array of seasonal vegetables can be likened to a rainbow. Keep a close watch on your local market during the month. Nature can create an abundance of vegetables or reduce their availability - but this June is expected to produce a lot of sweet corn, tomatoes, celery, cucumbers, carrots, green peppers, cabbage and lettuce.

Broiler-fryers are expected to appear on the market in bigger supply also - a good product just right for the outdoor barbecue fan.

And don't forget Father's Day Sunday, June 20th. If Father is an outdoor cook specialist, give him this exotic recipe and let him work it on a fryer:

ALOHA BARBECUED CHICKEN (in the Hawaiian fashion). Split one or more 2 1/2 pound broiler-fryers into halves. Remove wings and save for other uses. Remove tail piece and break legs so pieces lie flat. Place pieces skin down on broiler pan and broil 10 minutes. Turn chickens skin side up, brush generously with melted butter and broil for 10 minutes.

To prepare barbecue sauce: Combine 3 measures of crushed pineapple for a single measure each of tomato paste, brown sugar, pineapple juice and lemon juice. Add just a dash of ginger and liquid hot pepper and bring mixture to boil over low heat.

Place broiled chicken halves in roasting pan, in single layer with skin side up. Top each chicken half with a generous portion of the barbecue sauce. Bake in a pre-heated oven, 350 degrees, for 20 to 30 minutes or until chicken is tender.

Here Are Some Food Dollar 'Stretchers'

There are several food dollar "stretchers" available this week to enable shoppers to shave costs on food budgets.

Mrs. Gwen Clyatt, Texas A&M Extension consumer marketing specialist, offers these suggestions for cutting costs. She also suggests that shoppers check with their local supermarkets for other "specials".

At the retail meat counters, look for best beef buys on ground meat, round steaks, chuck roasts and beef liver. Top pork values include ham portions and slices, picnic, shoulder roasts and steaks. Fryers remain in ample supply at reasonable prices. Turkeys continue to be moderately priced.

Grade A large eggs offer the most quality and economy.

Fresh fruit and vegetable items in good supply at pleasing prices include apples, watermelons, bananas, oranges, lemons, pineapples, mustard greens, sweet corn, celery, dry yellow onions, carrots, radishes, green onions, and a variety of leaf lettuce.

prices remain uneven. They've been late in maturing in many areas. The total estimated crop is below that of last year, yet fresh strawberries are expected to be available in fairly plentiful supply through June. This may be another record year for milk production, and the lineup of dairy products available continue to grow. There's a large variety of dips made from cheese, cream cheese and sour cream. These dairy products are good to have on hand for unexpected company, the specialist reminds.

The latest form of cottage cheese to arrive in some markets is freeze-dried with a cultured sour cream dressing, packed in vacuum-sealed cans. Cool water is all that must be added to reconstitute it, says Mrs. Gwen Clyatt, A&M Agricultural Extension Service consumer marketing specialist.

Try flat-sided containers for freezing. They're more space-saving than cylindrical or tub-shaped ones, nutritionists say.

A DAY TO REMEMBER

Memorial Day

JOE BIERMAN

MEMORIAL DAY

The muffled drums sad roll has beat
The soldier's last tattoo;
No more on Life's parade shall meet
That brave and fallen few.
On Fame's eternal camping ground,
Their silent tents are spread,
And glory guards, with solemn round,
The bivouac of the dead.

THEODORE O'HARE
(1820-186)

Play as you GO

By Mary Whitman

The world of animals fascinates children. A child loves their diversity. A giraffe's neck, a cat's claws, an elephant's trunk, a lamb's wool or a bird's wingspread all bring up questions and encourage close observational powers.

Taxpayers Seen Footing Bill For Federal Red Tape

"The Internal Revenue Service is the world's largest paperwork agency, annually processing more than 400 million tax forms," said Rep. Richard Poff (R-Va.). "Each year it costs industry and the public \$20 billion to complete government reports, and it costs the taxpayer an additional \$7 billion to underwrite the cost of the federal government by processing its own paperwork."

Rep. Poff added that during 1963 a typical firm had to handle more than 2,700 different types of forms to be filled out for the various agencies of the local, state and federal governments.

"It is obvious," said Rep. Poff, "that many of these (government) agencies not only do not know the cost to the public in filling out form after form, but they do not want to know."

At Home In Farmer County

By CRICKET B. TAYLOR
County HD Agent

SENIOR CITIZENS MONTH

President Johnson has designated May as Senior Citizens month with this year's theme "Community Action for Older Americans".

As part of the U. S. Department of Agriculture the State Extension Service, through their County Agents has played a vital role in helping senior citizens the year round through technical assistance, research and educational services.

Studies conducted by scientists in food research has made information available to older people through County Extension offices.

Here are some facts pointed out through recent studies of food and nutrition for older people.

Older people - one out of two need better diets.

Overweight, inadequate diets and inappropriate use of extra vitamins are some of the major diet problems of older people. Calcium and vitamin C were most often found short in diets and about one-third were overweight-more women were overweight than men.

What does this mean? It is this - Senior citizens need fewer calories even though nutrient requirements remains the same.

Let us look at some nutrients found inadequate in older peoples diets (and many younger ones too).

First - Lack of Vitamin C in diets - (ascorbic acid) can result in: Tooth decay, bone-changes, bleeding and sore gums, weak blood vessel walls that break down, pains and swelling in joints and limbs and slow healing of wounds.

The other nutrient found lacking in diets - Calcium. This is highly important in maintaining good health. Here is why calcium is needed: It is essential for clotting of blood, the control of the passage of fluids through the cells walls, the right proportion of calcium in the blood is responsible for alternate contraction and relaxation of the heart muscle. Also, the irritability of the nerves is increased when the amount of calcium in the blood is below normal.

A good slogan for anyone to adopt especially the senior citizens - "Eat, not only to add years to your life, but to add life to your years."

Good health is more than freedom from pain and disease - it means individual efficiency at its peak-being radiant with energy and enthusiasm.

For bulletins now available from our office-free for the asking are: "Getting Enough Milk" and "Food for Older People". Another one is "Food

and Your Weight" that is good authoritative information for those with weight problems.

Come by the Home Demonstration Agents office on 2nd floor of the Courthouse in Farwell, and pick up a copy or call 481-3619 and ask for a copy to be mailed to you. Other helps and programs are available to both individuals and groups upon request.

"One Ingredient (soda) was omitted from the refrigerated muffin recipe carried in my column last week." The corrected recipe should read:

1 cup plus 2 tablespoons shortening
2 cups sugar
4 eggs
4 cups buttermilk
4 cups rolled wheat or oatmeal
1 Tablespoon salt
5 cups flour
1 cup raisins
5 teaspoons of soda

Cream shortening and add sugar and eggs. Beat well. Mix together dry ingredients and raisins. Add alternately with buttermilk. When mixed, this batter may be stored in refrigerator as long as six weeks. Spoon out as much as needed when you wish to bake them and put the rest back in refrigerator. Bake 15 minutes in 400 degree oven.

I believe that you readers, who might have tried the muffin recipe earlier, will have better results if you try it again using all of the ingredients.

MY apologies to each of you.

Texas A&M University's Agricultural Experiment Station has received a grant from the Sid W. Richardson Foundation of Fort Worth a grant for \$40,590 to establish the Fairview Farms Basic Beef Cattle Genetics Laboratory at A&M. Purpose of the lab is to investigate basic genetics of beef cattle and to cooperate with other experiment stations conducting similar studies.

Planning ahead for home maintenance and repair costs is good strategy to reduce budget revision, says Mrs. Wanda Meyer, A&M Extension home management specialist. Homemakers then will have funds to care for emergencies which may arise.

Emergency Planning Information Available From County Agent

What would you do if the radio station you're listening to suddenly signed off the air with the announcement that the President of the United States had declared a national emergency? It's a rather sobering thought, isn't it? Well, it could happen although everyone hopes it never will.

Radioactive fallout would be the big problem in rural areas, explains Joe VanZandt, county agricultural agent. That's why rural people need to consider preparedness plans now.

Preparedness is all the things you do in daily living plus a little extra, just in case. It's just do-it-yourself insurance, says

VanZandt. Like auto insurance, you hope you won't need it, but if you do, you may need it awfully bad.

There are so many little things that could make such a big difference in any emergency, whether enemy attack, storm or flood. For instance, families should expect to have their water supply cut off or contaminated and to lose their electricity. They might not be able to get extra food for several days or more.

Emergency generators can provide heat and light, points out the agent. A food stockpile will be used eventually, so it doesn't actually cost any-

thing extra. Normal water supplies may not be any too safe in a disaster area; thus, storing plenty for any emergency is just good common sense.

"So are most emergency preparedness," says VanZandt. "Natural disasters and war aren't pleasant subjects, but it's better to be safe than sorry." Information on emergency planning is available from county Extension offices for the asking.

SUGAR BEET CROP -- Hoe hands were busy on Friday clearing any and all weeds from the fine sugar beet crop of Paul Skaggs, located one mile north of Texico on F&M 108 in Curry County. The crop was planted on April 1. "Our first try with the sugar beet crop (last year) was a failure", said Mrs. Skaggs,

"however, we are expecting to make it up this year with the way this crop is shaping up," she continued. Skaggs has 25 acres of beets, which are among the prettiest in Curry or Farmer counties.

AMMO NOTES
By W. F. "Bill" Bennett
Agronomist
Western Ammonia Corporation

Wheat has headed out in most areas. Wheat is at a stage of growth which will provide you an opportunity to see what kind of job you did fertilizing last fall and whether sufficient nitrogen and phosphorus was applied last fall.

Tell-tale symptoms for nitrogen deficiencies are evident now. Nitrogen deficiency symptoms first show as a light green color on the lower leaves. These lower leaves eventually turn brown. Small heads and poor growth may also be due to a shortage of nitrogen. Urine spots in grazed fields usually indicate a nitrogen deficiency and may be indicative of a phosphorus shortage.

Plan For Home Repairs

Home repair and maintenance bills -- when considered together -- cost American families a tidy sum each year. Mrs. Wanda Meyer, home management specialist at Texas A&M University, says that the outlay for single-family homes alone comes to \$2.7 billion a year, according to the latest estimate released by the U. S. Department of Commerce.

While nails and paint are included in this rather astronomical figure -- and the homeowner doesn't mind paying for such items out of her weekly household budget -- consider what can happen to the budget when the furnace suddenly breaks down or the water tank springs a leak.

"A sudden major emergency can point up the need for families to establish a fund for home repairs and maintenance. Then if an unexpected expense develops, it will not cause a financial crisis," Mrs. Meyer emphasizes.

She suggests that home owners set aside a specified amount of money each week or month to take care of home maintenance emergencies. As the fund builds toward the goal that the family has set it will reach the point that there will be enough to cover emergencies of larger proportions, she added.

Homemakers who follow a savings plan for home maintenance costs then will have funds allocated for small expenses which occur in the regular process of getting the house into shape for the summer months. Consequently, a new coat of paint for the bookcases won't be a problem the specialist says.

Robert L. Newton, Lark, Texas, has reported this sale of one registered horned Hereford cow and five registered horned Hereford bulls. One cow went to Shelley Ray Friemel, Groom. One bull went to each of the following breeders in Texas: S. L. Beaver, Fritch; H. M. Bredlove, Clarendon; and Clinton E. Williams, Panhandle. Two bulls went to O. H. Ingram, Pampa.

Tribute Through Red Cross

Today, Memorial Day, the nation pauses to honor those who served and died in its service -- a solemn annual tribute by millions of Americans.

During the past year, these same Americans, many without realizing it, have been paying another kind of tribute to our military people, through their American Red Cross. A tribute in the form of material aid, counsel, and financial assistance.

During these days of limited peace, the Red Cross job continues to grow. Throughout the world, wherever servicemen are stationed, Red Cross field directors are also assigned. Of these 1,200 field directors, about one-fourth serve overseas in such locations as Vietnam, the Dominican Republic, Korea, Turkey, and Ethiopia.

For instance, last year the Red Cross helped an average of 80,000 servicemen each month at military installations and hospitals around the world, and served more than 118,000 servicemen and veterans and their families each month through chapter Service to Military Families. A total of \$11,632,000 was given in financial assistance to servicemen and their dependents and \$401,000 to veterans and dependents.

In addition to the many services provided servicemen, including financial aid and counseling, the Red Cross assisted thousands of veterans in preparing and presenting claims to the Veterans Administration for government benefits.

At overseas locations selected by the Department of Defense, the Red Cross meets special recreational and morale needs of American servicemen. In Korea, clubmobile workers, traveling in teams of two, cover more than 14,000 miles each month to meet schedules planned with the military. They bring to even the most isolated military units weekly recreation programs full of American flavor. Only 50 young women, all college graduates, are chosen each year for this unique

By Dawn's Early Light

On the major national holidays of summer and fall, Old Glory will be run up in front yards around the country on new-type flag poles made of sturdy, weather-resistant galvanized steel. Here, a patriotic youngster hoists the flag on a 22-foot steel pole in his yard. Between holidays, these three-sectioned, strong but light poles can be taken down, disassembled, and stored in their shipping container.

NUT CRESCENTS
1/2 lb. butter or oleo
3 cups flour
3 egg yolks
1 yeast cake
1 tsp. sugar
8 tsp. cream or milk
2/8 tsp. vanilla
Mix flour and butter thoroughly, add beaten egg yolks, and yeast that has been dissolved in warm cream or milk. Add sugar and vanilla and knead well. Roll out thin and cut in wedges. Place small amounts of nut filling on each wedge and roll in crescent shape. Place on greased cookie sheet and allow to stand for 20 minutes. Brush tops of crescents with beaten egg. Bake in moderate oven at 350 degrees until light brown.

CHEESE CAKE
20 single graham crackers
1/8 lb. sweet butter
1 tsp. cinnamon
1 tsp. powdered sugar
Roll crackers into fine crumbs and combine with other ingredients. Press firmly into bottom of cake pan.

FILLING
Beat the following for 15 minutes with electric beater.
3 large pkgs. cream cheese
3 eggs
3/4 cup sugar
1 tsp. vanilla
Pour into crust and bake at 350 degrees for 25 minutes.

Timing is the magic word in haymaking, according to New Holland's Grassland News. Forage should be cut at its most nutritive stage, then put into storage as quickly as possible. Once forage is cut, nothing can be done to improve its quality.

DID YOU KNOW THAT:

5 FOREST FIRES EVERY 24hrs.

Each year, for the past 5 years, over 2,000 fires occurred annually in the pine-hardwood area of East Texas, burning 47,000 acres of valuable timberlands. In addition, improvements such as homes, barns, fencing, and improved pastures were destroyed. These fires were man caused, for the most part, and could have been prevented if someone had used care with firebrands out of doors. Your Texas Forest Service urges you to take every precaution when doing any outdoor burning.

The All-American
Do only exotic cats need special attention? Certainly not. The most well known breed of cat, the family short hair, requires a little different treatment than a long hair.

When grooming, use rubber and plastic combs and brushes instead of steel. If he objects strenuously to being brushed, try moistening the palms of your hands and stroking firmly. A piece of chamois leather or silk makes a good polishing cloth.

Start grooming him this way when he's a tiny kitten, even though it may not seem necessary. In this way, your cat will become accustomed to and even enjoy, the daily routine of combing and brushing.

As the experts at the Purina Pet Care Center point out, short haired cats, like all cats, should be bathed only when absolutely necessary. Bathing tends to dry the coat and remove the natural oil. Most of the time your cat will keep itself clean and a bath is unnecessary. If your cat becomes dusty, wipe him off with a damp towel and then brush and comb until he is quite dry. On the rare occasions when your cat gets into tar or some other toxic substance, give him a warm water bath with a mild, unscented soap.

If you'd like to own a cat, see a reliable breeder or pet shop. You may find one who is your's for the asking at the nearest Humane Society or city shelter. Or you may know someone who is trying to find homes for a litter of kittens. They come in every color including the striped tabby.

It's Time For... EYE CARE

Dr. Newton K. Wesley

BLINDNESS

All is not lost when one is blind. Of course everything should be done to prevent blindness, and if there is a pronounced lessening of vision, every possible means should be employed before the condition is certified by competent eye specialists. When it is certain that vision is gone and cannot be retrieved, it seems that all is lost and life is over.

This need not be so. Many people have adapted to this new condition and have surmounted impossible handicaps. In working with the blind, we find the first and most difficult problem is to get the newly blind person to accept his condition. They must be made to feel they can do almost anything that any one else can do--and this is practically true. Blind people operate lathes, teach, become doctors and lawyers. Many jobs in offices and factories are today filled by blind people and the records prove that the work is done, in many cases, more accurately and efficiently than with sighted workers.

The greatest obstacle, by far, in getting people to accept the blind person as a normal worker is the sighted public themselves. They do not understand the problems and handicaps of the blind and, they tell themselves there is "nothing I can do about it."

The blind want understanding, not sympathy. They want an opportunity, not charity. They want an education in as normal an environment as possible, and not a white cane. I have seen many transitions from the world of the discarded blind to the life of usefulness and independence. According to the National Eye Research Foundation, a great number of potentially useful citizens are lost each year because we do not recognize and face this problem as we should.

Hart Packaging Bill Seen Hiking Consumer Food Bill

Over \$100 million would have to be invested by American industry to comply with the provisions of the proposed Hart packaging and label bill in new and converted machinery to produce the variety of containers called for by the weight regulations and the preparation of conforming labels, according to the National Association of Manufacturers.

"This would be paid gladly if it meant product improvement, but there is nothing in the bill that would make a product better or safer," the NAM maintains.

Nuclear Science In Agriculture

COLLEGE STATION — Dr. Ruble Langston of Texas A&M University's Plant Sciences Department, described recently how nuclear energy is becoming a major tool to investigate production problems in American agriculture.

He said nuclear science is proving especially valuable in research on crop and livestock losses from bugs, disease and weeds which are costing the United States about \$22,500 per minute or \$12-billion a year.

Langston was the lead-off speaker at a special "Nuclear Science in Agriculture" program for visiting representatives of press, radio, television and magazines from throughout the state.

Langston told the newsmen that nuclear energy is often used as a tracer to mark movements of chemicals, insects, nutrients, hormones and other items. It is something like a farmer bellows his lead cow to keep track of herd movements.

He cited the screwworm eradication program in Texas as an outstanding example of the atom at work for agriculture. Five years ago, screwworm infestations were common. Today, they are relatively rare.

He said radioactive materials are being used in research on fertilizer efficiency, effects of pesticides, feed conversion efficiency, herbicidal activity and air pollution.

Another speaker, Dr. Page W. Morgan of the Plant Sciences Department, described a number of ways radioactivity is used to track hormone movements in plants.

He said hormones are "chemical messengers that scurry about the plant telling buds, leaves, branches and roots to grow or not to grow, to mature or to die."

Especially significant research is underway on better ways to control brush, such as mesquite. A team of scientists led by Dr. Howard Morton is applying "hot herbicides to plants, which are then subjected to varying climatic conditions. Later, the plants are placed on film and radioactivity determined.

"Using radioactive 2,4,5-T, one promising lead has already turned up," Morgan said. "Addition of ammonium thiocyanate to the herbicide gets more of it to the mesquite root, resulting in better kill. Based on these isotope-assisted findings, a combination-of-ingredients mesquite killer should soon be on the market."

Morgan emphasized that radioactive-labeled hormones are research tools, not the solutions themselves.

"The isotope serves as a 'handle' that the researcher can follow," he said. "Many advances in our knowledge would have been impossible without these 'molecular cowbells' that excite the Geiger counter."

Soil moisture probes, a new and more accurate way of measuring soil water through atomic energy, was explained by Dr. J. R. Runkles of the Soil and Crop Sciences Department. Conventional methods require expensive equipment and many man hours of labor.

The new system involves measuring the soil moisture content by determining density of a "cloud of slow neutrons after a source of fast neutrons is placed in the soil." If soil moisture is low, the density of the slow neutron cloud will be less than if moisture content is high.

the contents of all packages were alike, the Hart bill's provisions for packaging in even-ounce or pound weights might permit the consumer to make price comparisons more easily—but the fact is, they are not all alike, it was pointed out.

Lee S. Bickmore, president, National Biscuit Company testified before the Subcommittee on Antitrust and Monopoly of the Senate Committee on the Judiciary as follows: "Suppose we were required to pack each of these four varieties (cookies) to a standard weight of eight ounces. We would then need three additional sizes of packages. Each different size

cost us over \$1 million to equip just one oven with the packaging equipment needed to put out these four varieties."

Lloyd E. Skinner, president, would require an additional 4,800 square feet of plant area to house it. If we had the land available on which to construct that plant, it would National Small Business Association told the same committee that in the event of restricted package weights and measures industry would be faced with as much as 25 per cent increased costs.

"While the avowed purpose of this regulation is supposed to allow the consumer to compare prices more easily, one thing is sure," the NAM said, "prices the consumer will compare, will be higher ones."

"Plains Cotton Growers, Inc. strongly opposes provisions of the new Cooley cotton proposal which call for direct payments to producers and 14 million acre minimum national allotment."

This was the substance of a telegram sent May 15 to Representatives and Senators in Washington by PCG. The wire pointed out to officials that a "two million acre cut in acreage together with recent price reductions and rising costs would be disastrous to growers." The new proposal was made in a bill introduced in the House of Representatives May 13 by Chairman Harold Cooley of the House Committee on Agriculture. Representative Cooley called his measure "A bill to extend for two years the provisions for cotton equalization payments and domestic acreage allotments with modifications..."

The same day the Cooley's bill was being dropped into the Washington hopper directors of Plains Cotton Growers were adopting a nine-point legislative policy almost at the opposite pole. Both Cooley and PCG agree that cotton should have a competitive price to both foreign and domestic mills. But here the agreement ends.

Cooley advocates in his bill that payments be made directly to producers. Point number one of the PCG policy states that the Plains producer organization will support a cotton program which "maintains the traditional concept of producer income protection through a non-recourse loan at or near the U. S. producer's income level of 75 per cent of parity." Also, point number three states that cotton should be made competitive in domestic and foreign markets through a trade-incentive payment "in the channels of trade to other than the producer."

The first "modification" as set forth in the Cooley proposal would reduce the national minimum acreage allotment from 16 to 14 million acres—just over a 12 per cent cut. Point number two of the PCG program states flatly that producers on the Plains support a program that "maintains the 16 million acre base national allotment." By the same token, PCG opposes any program which does not maintain the current allotment.

In addition to setting up the machinery for direct compensatory payments to producers the bill also states that "... if the Secretary is unable because of lack of funds or for other reasons to provide the levels of combined support authorized under this section for any crop of upland cotton, price support loans shall be made available for such crop at such level not more than 90 per cent nor less than 65 per cent of the parity price therefor." And in an explanatory news release from the House comes this statement: "Under the bill introduced today a farmer could have the choice of selling his cotton at the world market price and accepting the equalization payment or placing his cotton under loan at the current price support level."

According to Donald A. Johnson, Executive Vice President of Plains Cotton Growers, this is an obvious attempt to allay producer opposition to direct payments stemming from a fear of inadequate appropriations.

Johnson said the legislative principles adopted by the PCG Board were guidelines under which this or any other cotton proposal will be considered. He continued that: "Unless and until further action is taken by the Board, we will be obliged to actively oppose any proposed legislation which violates any of the nine points set forth."

The Cooley proposal would authorize the Secretary to offer an additional support, up to 25 per cent above the general price support, to small farmers and to larger farmers who agree to plant within their domestic allotments. In 1964, with a 16 million acre national allotment, a farmer's domestic allotment was considered 65 per cent of his total, and additional support payments were limited to 15 per cent above the general support.

Shop for a loan just like you would for a piece of farm machinery. Don't be deceived by seemingly low interest rates. Some lenders quote monthly rates on the unpaid balance. Be sure to figure the true interest rate before signing a contract.

THE EASY WAY — Sorghum grain lay-out land is being cultivated by Bill Johnson, son of Mr. and Mrs. Kenneth Johnson of the Oklahoma Lane Community. The federal government pays the farmer, in proportion to what the acreage would have produced had it been planted. The farmer must keep the land plowed and free of weeds to comply with the government program.

"WHERE YOU ALWAYS BUY THE BEST FOR LESS"

GIBSON'S DISCOUNT CENTER

111 Park HEREFORD Em 4-2630

By—Vern Sanford

Like to take a camera along when you go outdoors? Here are a few tips that should help you get better pictures.

To begin with, don't be discouraged. Professionals don't always get perfect prints, either. They just don't show you the inferior ones.

First step is to load your camera with film. This is no special trick. But you must remember to get the film in straight so it will run smoothly on the spool. Otherwise it will jam. Also be sure to perform the loading operation in the shade. Should any light reach the film it will be ruined for picture-taking.

If you are outdoors where there is no shade, shield the camera and film from the sun with your body.

Equal caution, as to light, should be taken in removing the film from your camera after it has been exposed. Unloading is simple as you doubtless know when you use a box camera. But if yours is a 35mm job, you have to rewind the film, back on the original spool, before you unload. That's because 35mm film has no backing paper. It is protected from light solely by the metal magazine in which it is packed.

You can take fine snapshots with a box camera. Its advantage is that it doesn't cost much. It is adequate for ordinary picture-taking. In the hands of an expert it can turn out pictures good enough for any magazine cover. And that goes for color photos, as well as black and white.

With flash, you can take pictures at night or indoors with a box camera. Also you can improve some of your daylight shots by employing flash. It will eliminate shadows that fall on your subject.

You suspect, if you are a box camera user, that the fellows who have adjustable cameras, which cost a good deal more, can do things with their rigs that you can't do. And you are right! But don't bother about it. They also have to know a great deal more about it than you do.

Users of adjustable cameras have three adjustments to make: time of exposure, shutter opening and distance. With a box camera you don't concern yourself with these because they are already set for you.

Your shutter opens and shuts at the rate of 1/50 of a second. Your camera aperture is f/22, and your distance is "infinity."

That's exactly the kind of setting the operator of an adjustable camera might use. Sticking to fundamentals, and first things first, any photographer must try to keep his camera steady when he pushes the button. Otherwise he will get a blurred picture.

One way to achieve this steadiness is to hold the camera firmly against your cheek, or body, when snapping. You can steady yourself by leaning against a tree, telephone pole, rock, or other available object.

When the time comes to snap don't jab at the tripper. Squeeze it, just as you would pull the trigger when trying to hit the bullseye on a rifle range. How fast or hard you push the button doesn't affect shutter speed. With a box

camera your shutter is going to expose the film for one-half a second (1/50th), no matter how you make the thing operate. But camera movement will greatly affect results. Hold it steady, trip it smoothly.

Okay, so what about action shots? You are not going to stop a whole lot of action with 1/50 of a second shutter speed. But there are some things you can do to improve the pictures you take where there is motion.

For example, let's say you are trying to shoot a moving boat. When the craft is moving directly toward you, or directly away from you, there is a very good chance of your getting a sharp, clear picture. But if the boat is coming directly across in front of you, nearby and at good speed, it is more difficult. But not impossible!

To get this kind of picture, we violate the rule about keeping the camera still, and we "pan" with the movement of the boat. That is to say, we follow it in its course, moving the camera to keep the boat sighted in the finder, and shoot when ready.

In this way we are keeping the camera in line with the motion of the boat. This reduces the motion insofar as the exposure is recorded on the film. If we work this right, we will get a good, clear, sharp picture of our moving boat. The background will be blurred because of the camera movement. But we don't care about that. The boat picture was what we wanted anyway. And that blurred background simply centers attention on the main subject of the picture.

On the water, there is more light than on land, because there is more reflection of the sun's rays. But you don't consider that with your box camera. Allowance for a certain amount of variation in light conditions inherent in the film will take care of it.

We suggest Verichrome Pan film.

If you are in the deep woods, even on a sunny day, there will be much less light than out in the open. Here you'd better think about using your flash rig.

When you use the flash attachment, you have to consider distances. This because the farther away your subject is from the flash, the less potent the light.

When you buy flash bulbs, you will find on the package a chart showing how far away from your subject the camera may be and still produce enough luminous quality to expose the film properly to make a good negative. I might suggest six feet as a normal working basis as to distance.

With your box camera, where distance is set at infinity, there is no limit to the distant things you can get into the picture. But there is a limit as to proximity. When your subject is less than six feet you are going to get a blur, and the nearer the subject the more blurred it will be.

Read this column over once again, then load up and go picture taking. We'll bet you come up with some good pix. Power to you!
