### Last of Humble Broadcasts To Be On Friday

Humble's long series of Saturday afternoon football broadcasts will come to a close this Saturday as the final games of the 1943 season are played. Though no conference championship is riding on

unusual interest as grudge fights, the outcome, both games will have. The Navy and the Marines square off as Rice meets Southwestern with broadcast time 2-2:30. Vern Tipton and Bill Michaels will report the game over stations KPRC, Houston; WOAI, San Antonio; WFAA, Dallas, Ft. Worth; and WTAU, College Stations. The annual T. C. U.-S. M. U. shieldy will be brought to listeners by Ves Box and Charlie Jor-

### Silver Star Is Awarded Sailor

Somewhere In The Southwest Pacific. (delayed)—Pharmacist's mate second class Joe T. Guthrie, U. S. N., of Sulphur, Oklahoma, has been awarded the silver star medal for "conspicuous gallantry and intrepidity" during the initial Solomon Islands campaign last year.

Son of Mr. and Mrs. Edna Guthrie, now of Littlefield, Tex., the navy medical corpsman was decorated for rescuing a United States Marine who had been wounded while trying to dynamite Japanese from cave hideouts on Tulagi, Aug. 9, 1942.

In the citation accompanying the medal, Guthrie was said to have pulled the fallen Marine from the mouth of the cave with "complete disregard" for his personal safety, even though Japanese guns were laying down a withering fire all around him.

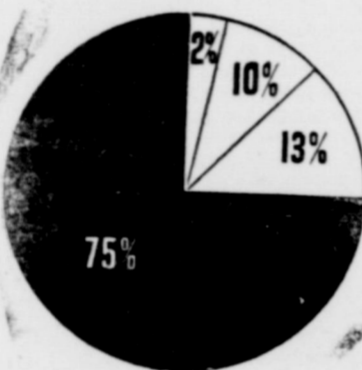

dan. Broadcast will start at 2:20 over stations KGGK, Dallas-Ft. Worth; KXYZ, Houston; KTFB, San Antonio; KRGV, Waco; and KRIS, Corpus Christi.

Knights of Pythias meet every Tuesday night at Castle Hall, South Side of the Square. Tom Lovelace, K. R. S.

### Where our Food is going ...

Your Government says that thirteen per cent of our total supply goes to our armed forces at home and abroad, ten per cent to our Allies and liberated peoples, and two per cent to our territories (Puerto Rico, Hawaii, Alaska, etc.).

The rest of the supply—the bulk—three-fourths of the total—stays home to feed the civilian population. This three-fourths, however, is about equivalent to the average amount of food produced in this country in the years 1935 to 1939. Not all of this supply is made up of "favorite" foods—but it is the type of food to give the citizen a healthful, balanced diet.

### One-fifth of all Food produced is wasted

## There's Plenty YOU can do to reduce this WASTE

Like all other managers' jobs, your job as general manager of the household is complicated by wartime conditions. The biggest part of your job is making the tremendous amount of food our farmers are producing go just as far as it will. So plan carefully your meals and shopping. Shop the first of the week and early in the day. Avoid careless handling of fresh foods, as this is a big cause of food waste. Department of Agriculture estimates that one fresh tomato out of every seven has to be discarded because of bruising by customers. If one-third of what is wasted can be saved it will add about eight per cent to our food supply.

#### CUT FOOD WASTE

##### Plan Right

1. Know the seven basic food groups and plan your meals from them.
2. Plan by the week so that two or more protein foods will not be included in the same meal.
3. Plan a vegetable plate or a nourishing soup as the main dish for several meals during the week.
4. Use fresh foods in season. Cook most vegetables in a small amount of water; using

##### Cook Right

only about one-half inch in a covered utensil.

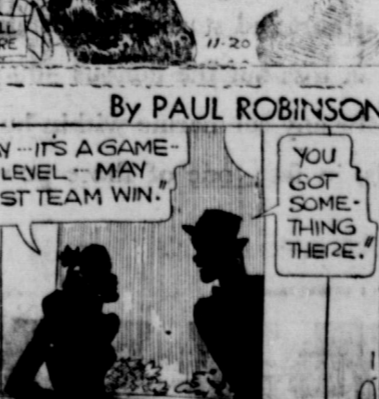

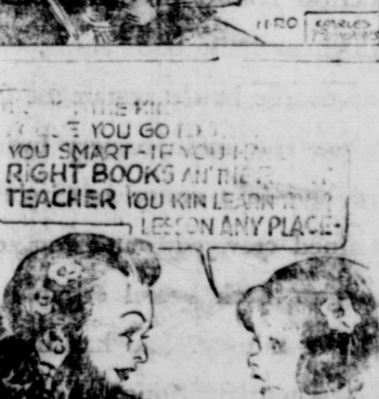

5. Cut down your grocer's waste. Don't pinch fruits. Don't handle vegetables.
6. Serve smaller portions with the provision for seconds. Establish a rule for eating everything served.
7. Don't buy rationed foods for the sake of using stamps. Don't give away or trade stamps.

##### Eat Right

### Texas Plant Will Boost Synthetic Rubber Output

Announcement of the approaching completion of a single plant at Port Neches, Texas, capable of making butadiene to produce one-seventh of the entire war time program of synthetic rubber is good news because it indicates that synthetic rubber production will be stepped up materially.

But the story behind this announcement is also good news because it is an interesting example of American ingenuity and unselfish accomplishment. It is a story of how a great industry turned all its resources and "know how" to a war project with no thought of compensation or profit in return.

When the Japs cut off the supply of natural rubber from the Far East, the United States faced the necessity of building a synthetic rubber industry almost from scratch and doing it before our stockpile of natural rubber was depleted.

The principal ingredient of synthetic is butadiene which can be made either from alcohol or petroleum. But while the process of making butadiene was not new, it had been produced only in small quantities in the United States and, overnight, there was a demand for enough to produce more rubber annually than the country had ever used before.

The Government moved immediately to build a number of plants, some of them to produce butadiene from alcohol and some from petroleum. A representative of the oil industry suggested that a plant be built at Port Neches in the heart of the Texas Gulf Coast oil region, and that it be supplied by nearby refineries of five companies. The companies agreed not only to supervise construction and operation of the plant, but to make available the services of management, advisory, technical and legal personnel and to pay their expenses. Furthermore other companies in the industry agreed to exchange technical information, trade secrets and "know how."

As a result of this cooperation, petroleum engineers developed a new process for making butadiene—one that yields twice as much from a barrel of petroleum as had ever been obtained before and that leaves the remaining refinery gases available for the production of high-octane gasoline and

other products. They built a small scale laboratory model, tested it, and found their theories would be interesting to the men in the service overseas who have been hearing so much about strikes and threats of strikes.

Then they, in co-operation with the Government agencies, went ahead with the building of the largest plant in the world for the production of butadiene from petroleum. Meanwhile smaller production units, using the new process, have been placed in operation at other points.

The Port Neches plant, which will begin partial operation in December, will have a capacity of 100,000 tons of butadiene a year, sufficient to make 110,000 long tons of synthetic rubber. Adjacent plants, operated by rubber companies, will combine the butadiene with styrene to make synthetic rubber.

This is just one example of the unselfish service of American in-

### Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

### KEEPING YOUR WASHER "ON THE JOB"

Don't let your laundry problem get out of hand. If you are the fortunate owner of an electric washer in good condition, keep it that way. You can't buy a new one these days and repair parts are so scarce that a major repair may require weeks of waiting.

- CHECK YOURSELF ON THESE POINTS**
1. Don't overload the washer. Fill the tub only to the water line and add clothes to the washer's capacity, and no more.
  2. When you finish washing, fill tub with clear water, remove the agitator, then drain tub and wipe inside clean with a soft cloth. Don't let dirty water stand in tub overnight.
  3. Don't overload the wringer. The rolls are rubber, and doubled-up blankets, buckles, and heavy buttons may damage the rolls.
  4. Clean and dry wringer after use and leave in neutral position so pressure is off the rolls.
  5. Empty drain hose thoroughly after each use. Avoid sharp bends.
  6. A noisy washer may be a washer in need of expert attention. Call a qualified service man if washer does not operate properly.
- Don't waste Electricity just because it isn't rationed—use what you need, but need what you use.

Christian Science Services  
Lamar and Plummer Streets

Christian Science Service "Ancient and Modern Necromancy, Alias Mesmerism and Hypnotism, Denounced" is the subject of the Lesson-Sermon which will be read in all churches of Christ, Scientist, on Sunday, November 28. The Golden Text is: "Be merciful unto me, O God: for man would swallow me up; he fighting daily oppresseth me. . . what time I am afraid, I will trust in thee" (Psalms 56:1,3).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "There shall no evil befall thee, neither shall any plague come nigh thy dwellings. For he shall give his angels charge over thee, to keep thee in all thy ways" (Psalms 91:10,11). The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Truth and Love come nearer in the hour of woe, when strong faith or spiritual strength wreath and prevail through the understanding of God" (page 567).

MORNING SERMON  
"The Invisible Ministry of Christians" will be the morning sermon subject Sunday. If you were not present last Sunday you missed inspiring music and if you are not there next Sunday you will be deprived of it again. We had a large congregation last Sunday morning and we expect to worship with another one next Sunday. Meet with us.

VESPERS AT FIVE  
We had a fairly large group for five o'clock vespers last Sunday. "Doing good to all men" will be our theme in this service next Sunday. You can attend in the sunlight, go home in the twilight, after adding your light to the service. It is a simple service. It is brief. We try to make it vital. You can improve it with your presence.

BASEMENT REPAIRED  
Our dilapidated and long neglected basement at last has been repaired. It has a new concrete floor and the walls have been replastered. It is an improvement of the first order. It adds to the beauty and usefulness of our excellent building. More than that, it adds something to our own self-respect. The cost has been approximately \$650.

MORE NEEDS  
We need three more things in the basement. First, it needs to be painted throughout. Second, the furniture in it needs to be improved extensively. Third, screens need to be put on the doors and windows. It occurred to us that classes or organizations in the church might like to take these needs as their service projects.

A CHAPEL  
We have available now a room at the east end of the basement, which could be made into a lovely little chapel. A rug could be placed on the floor. An altar, a pulpit, a worship center, could be placed in the south end of the room. It is possible by putting doors in one place to let the chapel remain open day and night. It would be used for private prayer and meditation. Small weddings could be held in it. It would add much to the atmosphere and tone of the church building. It would be of service to many. The cost of furnishing it would not be excessive. Would an individual have the honor of doing this for the church?

YOUNG ADULTS  
Three more new members were enrolled in the Young Adult Fellowship last Sunday. Few Sundays have gone without adding members to this group. It meets at 9:45 in what was the Booster Room. The Fellowship is for young adults under 35 years of age, men or women, married or single. The members selected a course for prayer for the current quarter and the pastor is leading it. Another course will be selected by them soon and a teacher will be chosen to teach it during February, March, and April.

BUDGET  
The operating budget of this church in the amount of \$5,400 is being subscribed. Some of the stewards have completed their assignments. As soon as all of them have done their work, the budget doubtless will be underwritten for the year. We deeply appreciate those who are responding with their pledges. Many new pledges are being received. Many of the pledges are being increased. This, too, is good news.

NEW MEMBERS  
We are pleased to have the following new members: Mrs. W. W. Eddleman, Bill Eddleman, Captain and Mrs. E. A. Peck, and Mrs. D. J. Baggett.

ALL-CHURCH AFFAIR  
On the evening of December 13 we shall have an all-church meeting at the church. The stewards will have a short session from six-thirty till seven. At seven we and multiply our obligations. A rehearsal will be held for the church choir and the first quarterly conference. We mention these things in advance so you can put yourself down for that evening.

JUNIOR CHOIR  
The youngsters in the junior church choir are getting excellent musical training under the direction of Mrs. F. L. Drago. Through its wilderness of the Red Sea and over its Red Sea. Things vor when they encourage them to attend the rehearsals at four o'clock on Thursdays and be regular in their attendance in the services of the church. The whole church appreciates the choir and those who make it possible.

THANKSGIVING  
When we start calling off the dogs to go on and dedicate ourselves to those forces which make us an endless chain. Most of us have overdrawn our accounts in the Bank of Life. We ought to count our blessings but not the courage to open his wife's mail.

It looks like we are going to have a great fight over the peace. When your wife tells you she wants you to drive her downtown to do some window shopping, you ought to know the drive will be followed by a counter-attack. The man who has to buy hats for seven daughters is sure to hold the view that there ought to be only one head for every family. If you had three happy years as a freshman in college you ought

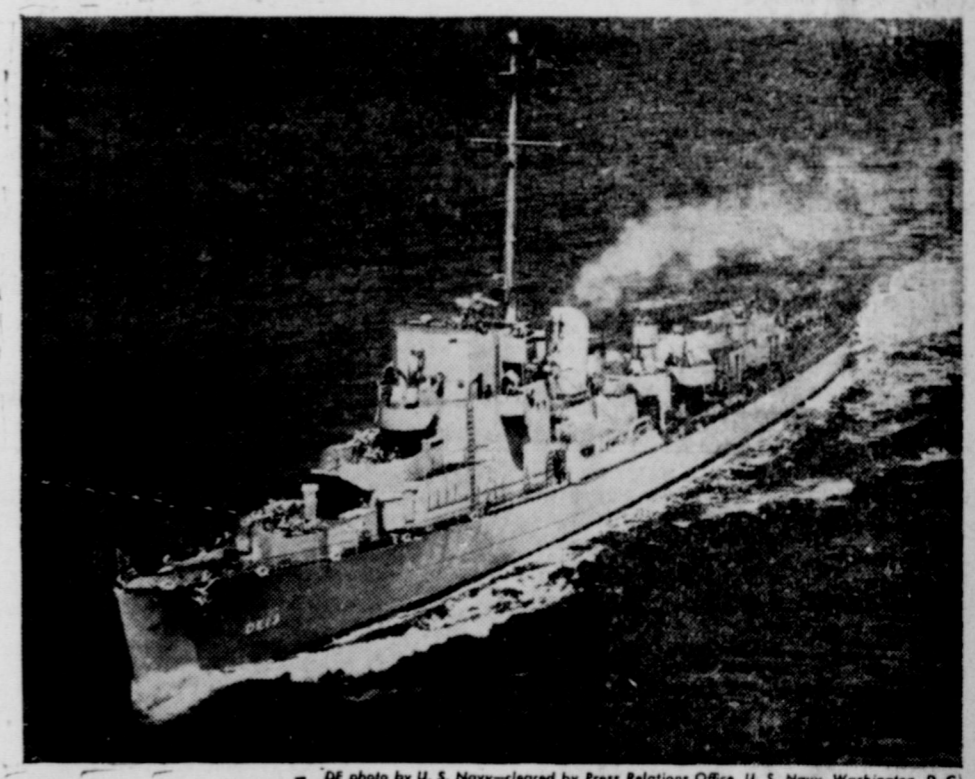

QUICK RELIEF FROM Symptoms of Distress Arising from STOMACH ULCERS DUE TO EXCESS ACID

# DESTROYER-ESCORT BUILT IN 25 DAYS

## NEW WORLD'S RECORD IN SHIP CONSTRUCTION

### Beats World War I Destroyer Time of 45 1/2 Days—Bethlehem Set Both Marks

#### Has Large Gun-Power for Both Offensive and Defensive Service; Equipped for Surface, Depth Bomb and Anti-Aircraft Combat

Destroyer-escort designed by U. S. Navy has wide range of fire-power and fast speed. DE Reynolds was built by Bethlehem-Hingham Shipyard in record time of 25 days.

Beating all prior records, the destroyer-escort Reynolds was completed and delivered Nov. 3 to the U. S. Navy, by the Bethlehem-Hingham Shipyard just 25 days after keel laying.

The Reynolds is a hard-hitting, fighting unit with great fire-power and speed, a bigger, more powerful ship than the destroyer Reid, which held the previous production record of being built in 45 1/2 days, during World War I. Bethlehem built both ships.

The Reynolds has terrific battle armament for surface, depth bomb, or anti-aircraft combat. Her main battery has guns mounted in three turrets which can revolve in a complete circle to follow a target, and can be fired by a trained crew with amazing accuracy and rapidity. Aft is a 40-mm. Bofors gun, each barrel capable of firing 120 rounds of 2-pound projectiles per minute. She has numerous 20-mm. Oerlikon machine guns with a potential fire-power of nearly 400 shells every 60 seconds. Also, along port and starboard rails aft of amidships are a flock of K-guns which can toss out the famous 300-pound "ash cans" which make it unhealthy for any submarine within hundreds of yards.

The Reynolds is, in fact, one of those powerful, swift, sea-panthers

designed by the Navy to drive the Nazi subs from the Atlantic and protect American convoys. She can deliver a terrific curtain of fire effective at 2500 yards against air or surface targets. Like some of her sister ships, she is one of Uncle Sam's contributions to the British fleet. The first group of ships in the destroyer-escort class were built in 302 days. The next group in this class were built in 206 days. Now the Reynolds has set the mark of 25 days. And she is but one of hundreds of warships steaming out of the shipyards of America to speed the day of Victory.

# BETHLEHEM STEEL

WORLD'S LARGEST SHIPBUILDER

A.E.F. In Britain Reports Cures With Penicillin

By Leo S. Disher United Press Staff Correspondent A U. S. ARMY GENERAL HOSPITAL, England, (UP)— American Army doctors reported today that by using penicillin, the new, scanty "miracle drug" they had cured gonorrhea cases unaffected by the powerful sulfa drugs and in some cases effected apparent complete cures of the venereal disease within 12 hours.

Penicillin, however, was available in only minute, costly quantities and its use by the Army was almost solely on an experimental basis.

At the same time the hospital, staffed largely by New Yorkers, was doing advanced research on frost bite, one of the plagues of airmen and was performing what the fliers themselves called "big and little miracles" in surgical and skin-grafting work on the wounded.

In this hospital there are 2 un-

written rules for treating men shattered in combat. One is, save limbs. The other: Save the man.

"It doesn't help much," an Army specialist said, "if we turn out a man patched up in his body and sick about it all in his mind."

Therefore, as much attention is given to the physical treatment and sick cheerful and hopeful as is given to the physical treatments.

For soldiers convalescing shakily but able to remain in Europe and eventually return to Army duty, the way out of the hospital leads to a "rehabilitation center," where the men start gently to exercise under the eyes of Army specialists and end up in six weeks doing a rugged "commando course"

Still others, if better treatment can be given at home, are returned to the States.

The Army has another consideration in treatment of soldiers: It has to have speed. Sick soldiers, generally, don't do much to win the war.

In that direction research here is constant: Take penicillin.

The men are not used as guinea pigs. The effects of penicillin first noticed in a mould by a London researcher, were applied to human beings by other English-

men. Research was taken up in the United States. A general hospital was the first American Army hospital in England authorized to deal with the drug.

Penicillin now is being produced from mould growth slowly and at great cost. Attempts to produce it synthetically are continuing. The possibilities, both as to future venereal cures and application of the penicillin to other ailments, are regarded here as enormous.

A paste is being made of the drug and applied to burns with much success in preventing infection.

Penicillin, it was said, is being used in osteomyelitis—bone infection—cases, and "was dramatically"

In this hospital one case of bone infection—usually very prolonged, lasting months, even years—was believed cured in two weeks.

Another case, that of an air-gunner hit by flak, possibly has been cured in less than 21 days.

Miss Mary Faye Beskow, attending NTSTC at Edenton, will spend the Thanksgiving holidays with her parents, Dr. and Mrs. E. A. Beskow.

Mrs. L. C. Hail and son, Joe, have returned from spending a week with Mr. Hail who is employed in the shipyards at Houston.

Miss Nellie Lee Miller, employed by the Texas & Pacific railroad in Dallas, is spending the holidays here with her parents, Mr. and Mrs. J. W. Miller.
