Coming Year Is Bright For Area Egg Producers

Texas market egg producers should find the year ahead to their liking. This forecast comes from Professor E. D. Parnell, poultry husbandry department of Texas A&M College.

the eggs needed to supply the demand from the nation's increasing population. There also exists a shortage of frozen eggs as compared to past years and too, the demand for stored shell eggs has recently been heavy.

Another very important factor, says Parnell, has been the recent decline—it's been slight—in the price of some feed ingredients and a rise in egg prices resulting from heavy demands and a declining supply.

High egg prices in the spring, says the professor, no doubt will cause more orders to be placed for pullets and this will increase the number of layers for next fall and winter but that is six months away, he adds. In the meantime producers who do a good job of managing their laying flocks, can be cashing in on a favorable market situation.

Parnell offers a last suggestion and that is giving the laying flock the attention it deserves check the feeding program; use proved sanitation and disease control practices; use artificial lights if needed; be sure the laying house is properly ventilated and that the flock gets plenty of clean drinking water—warm it during cold snaps. These and other management practices when followed will put extra eggs in the basket now when prices are good.

'DESERT SONG' IS FEATURE AT FT. WORTH STOCK SHOW

The ever-popular operetta, "Desert Song," with a star cast, will be presented in Will Rogers Memorial Auditorium at the Southwestern Exposition and Fat Stock Show in Ft. Worth. Two of the stellar performers are Sterling Holloway, touse-headed comedian of the screen, and Jean Fenn, of whom the Los Angeles Times comments, "She not only is beautiful but she can sing and she can act." Already famous as leading lady in operettas, Miss Fenn last year made her debut with San Francisco opera with tremendous success. First performance of "The Desert Song" will be Monday night, Feb. 2, and nightly thereafter until Feb. 8, when there will be a matinee. Dates of the Stock Show are Jan. 30 through Feb. 8.

Gain In College Enrollments Is Due In Future

A tidal wave of school-age boys and girls resulting from the booming birthrate of World War II and since is sweeping through Texas' public schools. Administrators of Texas' state supported colleges and universities are studying with growing concern the problems they will have to face when the full force of this wave strikes their institutions.

Having just recovered from the effects of the veteran enrollment boom which followed the war, the colleges are aware of the problems sudden boosts in enrollment will cause.

Resource-Use Education Is Moving Ahead

Wildlife authorities in Texas are heartened by the action of the school administrators in embracing the idea of resource-use education for the schools and urging the Texas Education Agency to go forward with plans to implement the program.

The Director of Conservation Education and Departmental Publications for the Game and Fish Commission said the step "marks another important milestone in the march toward conservation education for the youth of Texas."

Heretofore, he said, the approach has been through teacher groups and through piecemeal contact with the classroom. The need is so great and teachers and students alike have responded so well that school authorities have realized that the subject deserves a definite place in the regular school program.

"This recognition from the school administrators," said the Director, "not only clinches the gains we have made through informal procedure, but it clears the way eventually to reach all the people of the State."

He added, "Since it is no longer debatable that the conservation of our natural resources is a matter of concern to us all, it seems logical then that the boys and girls should be given an opportunity for first hand study of the subject of conservation."

He said, "The Game and Fish Commission has taken an enthusiastic interest in resource-use education since wildlife itself is so closely linked with the forests, the water, the soil and the other elements."

"After all," he went on, "the goal of conservation is naturally the general improvement of the level of living for all the people."

March of Dimes Going By Storm In Cold Idaho

MELBA, Idaho, Jan. 19—The 203 residents of this fertile potato growing community have their dander up. Their civic pride, which hit a new high last January when they raised a record \$27 per capita for the March of Dimes through a community auction, has suffered a severe blow.

The 42 citizens of Izes, Ore., had the effrontery, last week, to raise more than \$1,451, or a per capita of almost \$35, at their annual basket social.

The upshot is that the people of Melba have set a goal of \$10,000 for their 1953 March of Dimes auction slated for Wednesday, Jan. 25. This would be an unprecedented average of \$50 for every man, woman and child in the community.

To make sure that everyone is on hand to bid on the handmade afghans, preserves, wickles, hams, butter, and potato diggers scheduled to go under the auctioneer's hammer, the day has been proclaimed a holiday by the city fathers.

Bank, stores, and schools will be closed for the event, which, it is hoped, will restore the national March of Dimes scholarship to the people of Melba who have experienced five consecutive years of high polo incidence.

Dog Tired

MEMPHIS, Tenn. — Miss Hazel Davenport wondered if the dog was tired of music. It came out of St. John's Episcopal Church here with a song book in its mouth and buried the book in the yard.

A new type motor oil for the new cars

Your new car needs this new type oil

Prevents "4000-mile knock." Many 1952 and practically all the 1953 automobiles have high compression engines.

You've heard about these fine new engines. You know, for example, that they require gasoline with extra anti-knock performance . . . a gasoline like Humble Esso Extra.

Now, Detroit's automotive engineers have discovered that high compression engines need an entirely new type of motor oil. With conventional oils in the crankcase, the new engines have a tendency to ping, or knock, after four to eight thousand miles of driving.

This "4000-mile knock" is caused by combustion chamber deposits; these increase the compression ratio to a point where no commercial gasoline will give you anti-knock performance.

Humble Esso Uniflo, an entirely new type motor oil, prevents the formation of deposits that cause "4000-mile knock" in high compression engines if you begin to use it regularly in the first 1000 miles of driving.

Protects against friction wear and acid corrosion. Second, the engineers discovered that friction is the chief cause of wear in automobile engines. Moving parts in the new engines are so carefully machined that they fit very closely. This gives you much better performance from your car, but it also requires superior lubrication. Heavy oils and oils that "thicken" in cold weather don't flow readily between such closely fitting parts. The result is excessive wear from friction, and expensive engine overhauls . . . To minimize friction wear . . . again you need Humble's new Esso Uniflo Motor Oil.

Esso Uniflo has such an amazingly high viscosity index that it gives you the quick-flowing characteristics of an SAE 5W oil at 25° below zero Fahrenheit, and the tough, full body of an SAE 20 oil at 110° Fahrenheit.

Furthermore, the additives in Esso Uniflo are anti-acid—this new type oil cuts acid corrosion as much as 50%.

You Need Only One Grade of Humble Esso Uniflo. You use it year 'round. Esso Uniflo meets all the specifications for SAE viscosity classifications 5W, 10W, 20W and 20. It is a heavy duty, detergent oil, recommended for API service classifications ML (light duty), MM (medium duty), MS (severe duty) and DG (general diesel duty). Its viscosity index is amazingly high.

Premium Value—Premium Price

Humble Esso Uniflo costs something more than most motor oils. But you'll agree that the small extra cost—less than one-tenth of a cent for each mile of driving—is cheap insurance against "4000-mile knock," friction wear, and acid corrosion!

A Word to Owners of Older Automobiles

If you use an oil meeting SAE viscosity classifications up to 20—you will find it profitable to change to Humble's new type Esso Uniflo. It will protect your car against friction wear and acid corrosion; reduce starting drag and extend battery life.

If your engine has just been rebuilt—change to Esso Uniflo. It will prevent the deposits causing "4000-mile knock"; it will protect against wear from friction and corrosion, reduce starting drag and extend battery life.

If you use SAE 30 or SAE 40 oil—Humble continues to recommend Esso Extra Motor Oil No. 3, a high quality, heavy duty, detergent oil with a viscosity index second only to that of Esso Uniflo.

Sheep Raisers Give Tips On Ewes Disease

Sheep raisers were advised today that extra precautions taken now against pregnancy disease will pay big dividends at spring lambing time.

The American Foundation for Animal Health urged that bred ewes receive good rations and exercise during the winter. Neglect on that score now could mean loss of ewes and lambs in the spring, the Foundation said.

"Pregnancy disease is a toxic condition resulting from the extra demands on the ewe's system during gestation," says the Foundation's report. "It usually results from faulty diet or lack of exercise, which allows waste products to build up in the body. Ewes carrying twins or triplets are especially susceptible."

"First sign of pregnancy disease usually is noted a few days before lambing, when some ewes start lagging behind the flock as it is

driven. Affected ewes often grind their teeth, appear dull and weak, and tremble when exercised, and go down."

The Foundation emphasized that prevention is the best way to avoid pregnancy disease losses. Although veterinarians can save ewes in some cases, pregnancy disease has a high mortality rate, and the lambs usually are lost, too.

Sugar solutions injected into the bloodstream are most commonly used to treat the stricken ewes.

Population Of U. S. May Climb 160,000,000

The population of the United States will pass the 160,000,000 mark before the close of 1953, Metropolitan Life Insurance Company statisticians predict.

Last year's increase was about 2,675,000, bringing the population total by year's end to more than 158,400,000. This gain, a result of the sustained high level of births, a low death rate, and a sizable immigration, establishes a new high mark, exceeding the 1951 increase by a small margin.

"It is doubtful whether a gain of equal magnitude will be experienced for many years to come, partly because of the new restrictions on immigration," the statisticians comment. "Also, some slackening in the rate of growth of our population must be expected in the near future because the

3 Texas 4-H'ers Win National Honors

HIGHEST HONORS were accorded 4-H Club members recently when they were named national winners in their respective programs. Pictured here are Texas' national winners in Farm and Home Safety, Food Preparation and Beautification of Home Grounds.

Donald Bayer, Irene Polasek, Elwyn Ellis

Donald Bayer, 17, Muenster, Texas, a national winner in the 4-H Farm and Home Safety program, completed five years of safety work under the leadership of his father, Martin Bayer. He made a safety survey of his town, posted crosses on hazards, checked his own farm and home and assisted fellow members in their surveys. During Farm Safety Week he gave two talks, made four posters for display, and distributed 600 farm safety sheets. He is chairman of the safety committee in his club and has presented 19 demonstrations on this subject before 1,596 people.

Irene Polasek, 19, Corpus Christi, Texas, a six-year member, prepared 4,165 meals and baked 181 dozen rolls, 295 dozen biscuits, 474 dozen cookies, 236 cakes and 274 pies, won national honors in the 4-H Food Preparation program. Since her mother's death two years ago she has planned and prepared the family meals. She is the junior leader of her club. Irene has given numerous demonstrations, and baked many cakes, pies, cookies and biscuits for church suppers, parties and picnics. Last year she was foods chairman for the 4-H

All these programs are conducted under the direction of the Cooperative Extension Service.

young people now approaching the marriageable ages are those who were born during the depression years when the number of births was low."

The statisticians point out that since the census in the spring of 1950, the country's population has gained about 7,275,000, a figure which is not much less than the combined populations of Chicago, Los Angeles, and Detroit.

ATTEND CHURCH SUNDAY

Billion Feet Of Gas Daily Record For Gas Co.

Lone Star Gas Company, delivered its first billion cubic feet of gas in a 24-hour period, as of 7 o'clock Saturday morning, to more than 620,000 customers in

387 cities and towns in Texas and Oklahoma, according to reports from the firm's Dallas headquarters.

The record breaking consumption resulted from Friday's sledge of cold weather combined with growth of the company's operating territory, the report said. It followed on the heels of another record set this winter which witnessed a period of 54-straight days when temperatures averaged below 65 degrees and required constant heat.

The stretch of heating weather started in mid-November and continued through December and into January over most of the Lone Star system.

The total send-out through Saturday morning was 1,060,400,000 cubic feet of gas. On Wednesday, the day before the cold wave struck, total consumption was about one-half of Friday's peak. The previous high for a 24-hour period was 496,700,000 cubic feet recorded at 7 a.m. on January 30, 1951.

During early stages of the cold sledge the company ordered minimum curtailment in gas consumption by a few large industrial plants. This was done to protect the gas supply for homes and was in line with regular contractual agreements.

The company's ability and delivery capacity to meet these record requirements, officials said, is represented by a continuing construction and enlargement program which, since 1945, has called for more than \$100 million in new capital and hundreds of new employees.

NOT SO SMART

DETROIT—Terry, a pet monkey, escaped from his cage and led Humane Society employees a merry chase, but had only himself to blame for his return to captivity. His pursuers tried to throw a blanket over him. He jumped aside, grabbed a corner of the blanket and rolled himself up in it.

PRESENTING THE NEW CLASSIC FOR 1953

"ROCKET" OLDSMOBILE

Ninety-Eight

Ladies and gentlemen, here is Oldsmobile's candidate for the best-looking, best-driving car of all for 1953. It's the glamorous new Ninety-Eight—the last word in "Rocket" engineering and Classic styling. That distinctive, long rear deck is balanced by a new, longer "power" hood. The front-end is new, more dramatic. The chrome trim is new, more distinctive. The whole silhouette is new, more exciting. The interiors have been enhanced and "entranced" by new upholstery and Custom-Lounge Cushions. Even the "Rocket" Engine is NEW—with higher power (165 hp), higher compression (8 to 1), higher voltage (12-volt ignition). And to match this super performance, there's a new Power-Ride Chassis, new Pedal-Ease Power Brakes, Power Steering, and even Frigidaire Car Conditioning! We invite you to inspect the new Classic Ninety-Eight—in our dealership now.

KNOCK-DOWN WELCOME—Delirious with joy, the children of Lt. Cmdr. Vernon Binion, of Jacksonville, Fla., knock their father down in their eagerness to greet him, as he steps from his plane at Cecil Field. Commander Binion had served for five months aboard the Carrier Wasp, in the Mediterranean.

1953 FARM PRODUCTION GOALS ARE ANNOUNCED FOR TEXAS

The 1953 farm production goals for spring-seeded crops in Texas reflect the need for more grain and forage crops and less cotton and wheat. If the goals are attained, says B. F. Vance, chairman of the State Agricultural Mobilization

Committee, total agricultural production must continue at a high level and would equal or exceed last year's output. The largest increase—92 per-

cent—is for grain sorghums for grain. The acreage goal is 5,150,000 acres, says Vance. The goal for all sorghums which includes those used for forage such as hay and silage and for grain has been raised 22 per cent above last year's figure to 7,385,000 acres. The corn goal has been increased to 2,500,000 acres or 9 percent above the 1952 acreage. The goal for tame or planted hay crops has been increased by 5 percent and stands at 1,400,000 acres.

These increases, points out Vance, are urgently needed to restore the depleted stock of grain and roughage feeds because of the drought and reduced plantings in the state during the past two years. Usually large quantities of hay have had to come from other states, says Vance, to help meet the demands for roughage feeds.

Texas producers below the July 1 acreage of last year. The 1953 goal, according to Vance, has been set at 9,945,800 acres. It is hoped that much of this reduced acreage will be planted to grain sorghums. Producers in the state of extra long staple cotton are asked to plant no more than 14,200 acres or a reduction of 89 percent from plantings. This type of cotton is produced in the Pecos-El Paso areas.

In commenting on the 1953 goals, Vance emphasizes that the goals program, as worked out by

the State Mobilization Committee and approved by the USDA, recognizes that the demand for farm products will probably remain high because consumer income and expenditures are expected to exceed those for 1952. At the same time, he adds, exports of some of our important crops are dropping due to increased supplies of agricultural products in other countries and a shortage of dollar exchange. Cotton and wheat are two mighty important Texas crops affected by this export situation, says Vance.

In commenting further, he says, the purpose of the goals program is to give farmers information on expected demand for their products and what acreage will be needed to meet this demand. If farmers make the necessary adjustments suggested by the goals program, he continues, they will reduce the possibility of building up burdensome surpluses and depressing prices which may in turn necessitate acreage allotments and marketing quotas.

The goals are carried to the farmers through the State and County Mobilization Committees.

Other 1953 goals for Texas spring-seeded crops include rice 550,000 acres, a decrease of 1 percent from last year's 560,000 acres; seed, 27,700 acres, an increase of 32 percent and sweet potatoes 38,000 acres.

Vance urges farmers to plan their spring planting schedules in accordance with the goals program and to utilize abandoned wheat acreage—should moisture deficiencies make this necessary—for growing grain sorghums and pasture or hay crops.

CANNON BALL IN TREE—John Overton, cutting through a sypress log, found a Civil War cannon ball buried in the 50-inch trunk.

Cabinet's Gift To Harry Bad News For Thugs

It's safe to say that burglars will not like the gift President Truman has just received from his cabinet.

As a going-away token for the president, members of the outgoing cabinet have presented him with an unusual personal gift—a Mosler secret safe.

The secret safe was custom-made by the Mosler Safe Company, builders of the Fort Knox gold storage vaults. The firm also constructed the giant safe which

protects the original copies of the Declaration of Independence, Constitution and Bill of Rights in the National Archives building. Truman's secret safe "looks good to decorators—but to thieves," said Edwin H. Mosler, Jr., president of the 105-year-old safe-making firm.

Designed for home use, the safe contains a plaque inscribed with the names of all members of the retiring cabinet.

For security reasons, Mosler will not reveal any details about the secret safe's unusual appearance or construction.

However, even if a crook were to find the Truman safe, it would take him one million years to exhaust the lock's possible combination changes, according to Mosler.

Free Paris Trip Offered In New Fashion Sewing Contest

You have a chance to sew your way to Paris, if you enter McCall's Easter Dress-Your-Best contest, and the contest is based on fashion know-how not on how well you can sew.

All you have to do, says the February McCall's Magazine in announcing the details of the contest, is choose a spring outfit, make it up, using the McCall's Pattern of your choice, in the fabric of your choice, fill out the official entry blank available at any McCall's Pattern counter, and send the entry blank in. You may substitute as many entries as you like.

The contest is open to any woman resident of the United States and Canada, twelve years old or older, and prizes are awarded in two groups. Top winner in the senior group (twenty years and over) wins a two-week, all-expense trip to Paris for two via TWA luxury Constellation, plus two costumes for her journey, and an allowance of \$150 for household help if needed while she is away. A second prize of \$500 and a third prize of \$250 will also be awarded in the senior group.

Top junior winner receives a one-week, all-expense trip for two to New York or Hollywood, with second-prize winner receiving \$250 and third-prize winner receiving \$100. 50 prizes of \$10 each will be awarded in the junior division and 50 prizes of \$25 each will be awarded in the senior division.

Three senior prizes of \$100 each and three junior prizes of \$50 each will be awarded for the best entry made of cotton or cotton-type fabric; wool or wool-type fabric; silk or silk-type fabric. Fabrics may be made of natural fibers or any of the synthetics or blends.

A special prize of one \$100 Series E Defense Bond will be awarded to the home-economics teacher, if any, who assists the first-prize winner of the junior division in planning her entry.

Entries will be judged on good taste, fashion appropriateness, and general merit, by an independent judging panel.

Last year's winner, Mrs. Robert Herriek of Arlington, Va., was greeted by the Mayor of Paris, visited by the Mayor of Paris, and was guest of honor at a reception given by the French Tourist Bureau.

Don't Carry Containers Away From Cafes And Drug Stores

Have you noticed the little coin containers placed in the cafes and drug stores?

They are placed there by the March of Dimes workers for the convenience of the public in dropping nickles and dimes.

The committee are asking that special care be taken of them and that they not be carried away by some thoughtless person as the committee plans to use them from year to year.

The group is also asking that you drop a nickel in the container each time you drop one in the juke box. "The music you hear will soon be gone, but the nickel in the can will go on to help some child walk again," Mrs. E. E. Garner, co-chairman, with Mrs. Clyde Young said.

Who knows, your child may be next!!

"Bobby Turner was the first to drop a coin in one of the cans," Mrs. Garner said.

Mrs. Howard Green has been added to the list to help with the drive in the schools; Pete McCoy, VFW, Burl Lee, American Legion,

Breckenridge high school. She attended Baylor University and graduated from Texas Technological

College, majoring in Sociology and Psychology. She has been a Girl Scout for many years and throughout her college years, served as Counselor in Girl Scout Camps every summer.

Two years before going to Houston she served as director in the West Texas Area Council at Abilene. She has had experience in the Cerebral Palsy Clinic in Lubbock and since moving to Houston she has worked with the Orthopedic troop at San Jacinto High School.

She is the granddaughter of Mrs. Frank Lovett, 709 West Patterson Street, and the late Mr. Lovett.

and Willys Smith, Country Club.

Eastland Couple Plan February Wedding Here

Mr. and Mrs. S. B. Jones, 202 North Ammerman announce the engagement of their daughter, Joy Beth Jones to Bobby Hanson, son of Mrs. Alice Hanson, 117 North Walnut.

Miss Jones is a graduate of Cisco High School and attended Cisco Junior College. She is presently employed at Pipkin Grocery Company.

Mr. Hanson attended Eastland schools, before entering the Navy where he served for four years.

He is at present employed by the Victor Cornelius Printing Company. He is attending night school at Cisco Junior College.

Miss Jones and Mr. Hanson plan to be married the latter part of February.
