WEDNESDAY, AUGUST 11, 1965

Bovina, Texas

VOL. X, NO. 6

WHITTLIN'

BY DOLPH MOTEN

As Bull Town days 1965 draw closer and closer, all the work which needs to be done seems to look larger and larger. There'll be plenty of places for everybody to take hold. Don't stand back and say no body asked you to do anything; there'll be plenty to do . . . for all the people in the community.

Frank Burnett honored this department with a sackfull of huge peaches produced on his farm northwest of Bovina. They were the largest we've ever seen grown in these parts; they were more like the size of apples, big ones.

They made real good peach ice cream, too, as well as being just good eating by themselves.

Decorating the counter at Digger's Cleaners is a highly appropriate sign for Bull Town Days. It's one of those fancy scenes featuring people and a street of an old Western town put out by a maker of blue jeans. The scene has been localized for Bovina and the Bull Town Days celebration. That's the part that makes it interesting, we'd guess.

You might get a kick out of looking at it.

Good, crop-making rains continue to fall here. While farmers or more or less non-committal about those of the past week, the moisture is bound to be of great benefit. Maybe farmers don't consider a rain really beneficial unless the total is enough that irrigation wells can be cut off.

This still looks like one of the best years ever from the standpoint of moisture. Maybe the yields will indicate that is the case. We, along with many others, are hoping so.

The first slow-pitch softball league ever for this community is completed. We think it was highly successful. Certainly it accomplished its purpose of keeping the ballpark concession stand in operation and earning money.

The league had eight teams. With an average of 15 players per team that's 120 ballplayers, which, we understand, is quite a few for a community with a population no greater than ours. From that standpoint, (the number of players), the program was successful, also.

Most of the players feel like the league is ending too quickly. And maybe it is. But with Bull Town Days almost here and football practice started, it's probably just as well that it's over.

Nothing succeeds like success, however, and next year's league should be even better.

That same theory works for community celebration, too. We mean the theory that nothing succeeds like success. And because last year's, the first one, was so enjoyable, this year's should be likewise, only more so, successful.

A few weeks ago we received a letter from a member of the staff of Old West, a magazine containing stories of days gone by in the Southwest. The letter pointed out that the featured story for the Fall, 1965, issue was written by a Milt Hinkle, who was born in Bovina in 1881, if we remember correctly.

Frank Hastings, the oldtimer's oldtimer in Bovina, says such just couldn't have been. "There wasn't any Bovina in '81," he explains, "so how could anyone have been born here then?"

We had hoped that the story would be about this area. Examination of the copy we received, though, proved otherwise. The story was interesting enough, but about as close as it came to Bovina, geography-wise, was Houston.

The story is about the author. And it's supposedly true. He's tough enough and mean enough to have been a native of Bovina. Perhaps he was born

(Continued on page 2)

BIG EVENT AUGUST 19-20-21--

Deadline Saturday For BTD Queens

DRIVE RIGHT IN! -- This pickup, at left, crashed into plate glass windows at Super Saweway on Main Street Monday afternoon about 5. Two large windows were knocked out by the accident. There were no injuries. Driver of the pickup was Jesus Mariano Perez. The brakes on the pickup failed to hold as Perez prepared to stop the vehicle in front of the grocery store.

TODAY--

Ponies Start Practice For Football Season

Bovina Mustangs begin limited practice for the 1965 campaign this (Wednesday) afternoon at 6.

Team candidates will report to Coach Roy Stone today. Shoes will be issued and the boys will begin running. Formal drills will get underway Monday, the coach announces.

Workouts will begin on a twice-a-day basis Monday. Practice sessions will be conducted two times each day from then until the beginning of school August 30.

The players will don pads for the first time the following Monday, August 23.

A scrimmage with Kress' Kangaroos has been scheduled for Friday, August 27, at 7 p.m. here.

Coach Stone expects 38 boys

to report to the practice sessions. Some 15 of these will be freshmen.

The Mustangs will be defending their district championship of '64.

Commenting on the team's chances, the coach says, "We'll be small, but we'll have better speed than last year and we'll have some experience. We're short on depth. We should be a contender for the district championship if we have no injuries."

Nine starters from last year's team are returning for another gridiron season. Four of these are backs and five are linemen.

Celebration Plans Nears Completion

Plans for Bovina's second annual Bull Town Days celebration, which is scheduled Thursday, Friday and Saturday, August 19-20-21, continued to take shape at planning sessions last week and this.

Sponsors of the celebration at Bovina Chamber of Commerce and Agriculture and Bovina Roping Club.

Chamber directors continued planning at a session Thursday noon in Bovina Restaurant. Roping Club members did likewise at a Monday night session at the same place.

A caravan, consisting of several vehicles, publicized the celebration with a tour of neighboring towns Saturday. Towns visited by the caravan included Friona, Black, Hereford, Dimmitt, Springlake, Earth, Muleshoe, Farwell and Texico. Those making the trip distributed posters advertising the three-day event. A public address system was used to inform listeners in the towns

about Bull Town Days and to invite them to attend.

More publicity is scheduled for this weekend when a group of BTD supporters go to Amarillo to appear on Cotton John's Farm and Ranch Show on KGNC-TV (Channel 4). The program will be presented Saturday or Sunday morning, according to Jack McCracken, general manager of Bull Town Days.

Those going to Amarillo for the TV show will leave Bovina Restaurant at 9 Saturday morning. The group is scheduled to be in Amarillo to present the program or to make a film at 11:15.

Deadline for entries in the queen's contest which will be on Thursday night, August 19, at the roping arena, has been set for Saturday.

Eligible to enter are all single girls between the ages of 14 and 21. They must have a horse to use in the contest. Horsemanship will count 35 per cent of the judging.

Girls interested in entering are requested to submit their names with Mrs. Bob Estes by Saturday. Some of the queen contestants are scheduled to go to Amarillo with the TV group Saturday.

Contestants are not required to have a sponsor this year, according to McCracken. They may enter on their own. During the judging, they will have five minutes each to demonstrate their horsemanship ability.

Other details of the planning decided on at the meetings include that the parade route will make a circle and will conclude at the point of origin -- east Main Street, the picnic scheduled for Friday noon at the city park is for everyone and especially old timers, fiddlers contest elimination begins Friday afternoon at 3 with the finals slated for that night.

Two slow - pitch softball games have been scheduled for Saturday night. Bovina Bull-towners, a group of players as yet unnamed which will be managed by Vernon Estes, will meet the KCLV-Air Force team from Clovis at 7:30 Saturday night. Hammonds Hotshots will play Oklahoma Lane in the nightcap

(Continued on page 2)

BTD CARAVAN -- This was a scene viewed by people in several area towns Saturday as a caravan advertising Bull Town Days made a 150-mile tour. Members of the tour included, front to back, Lynn Looney, last year's Bull Town Days queen, Bill Denney, Jack McCracken, Erith Hawkins, Sonny Spurlin, Rouel Barron, Harley Sherick, Cash Richards Big Nick Trienen and Don Stone.

FOR THREE GROUPS--

Band Camp Starts Monday

Band camp starts Monday for all of the band students of Bovina Schools.

Beginners band will meet at 3 p.m., Junior High Band at 4:30 p.m., and High School Band at 6 p.m., according to Director Joe Wayne Harper.

The Junior High School and High School Bands will play for football games this fall.

Other activities still in the planning stage are local concerts, marching contests, sight

reading and solo and ensemble. Also the band director is hoping the band will be able to attend the contest in Enid Okla., this year.

Harper encourages all students to attend the band camp this summer.

Weather by Willie

More showers in the offing. No general rains.

Selling Shave Permits

Bull Town Days shaving permits are on sale here by members of Bovina Roping Club.

The permits entitled the male citizenry of Bovina to shave during the Bull Town Days celebration August 19-20-21 and costs \$2 each.

Failure to have a permit or a full set of whiskers will result in a victim being submerged in a horse tank or a worse fate, according to Darrell Read, chairman of the roping club shave permit committee.

Proceeds from the sale of shaving permits will go into the general BTD fund and be used to pay expenses of the celebration.

FOR NEW FIRE STATION--

Council Talks Phone System

Discussion of a phone system for the new fire station highlighted an otherwise routine meeting of Bovina's city council last week.

The fire department's newest and largest truck has not been moved to the new fire station, which was completed several weeks ago, because there are no communications to the station.

A representative of General Telephone Co., Paul M. Farrar of Brownfield, met with the council, to assist in planning the telephone setup. Plans call for a direct line to be setup from the new fire station to the city hall and another location. Then, when the siren is sounded, firemen may go to the new station and be instructed immediately as to where the fire is.

The system is scheduled to be installed within the next few weeks, according to Mrs. Mary Ruth Martin, city secretary. Also, a new number will be installed to report fires on. This will be the only purpose for which this phone will be used. All council members were

present at the session which saw minutes of the previous meeting approved and approval of the past month's city bills paid.

IN REAR WINDOW--

Bank Building Glass Broken

For an undetermined reason, a rear window was broken out of the building occupied by First State Bank of Bovina on Main Street sometime Friday night.

Entrance to the building was not made and nothing was missing, according to Bob Estes, bank president.

The window which was broken was in the rear door of the building. It is covered by heavy screen making entry to the building difficult even though the glass was broken out.

The bank is using its present location as temporary quarters while its new home is under construction on Third Street.

"No money is kept overnight in the building we're in now," Estes pointed out. The money is stored in the vault located in the former bank building which is now occupied by S and S Dry Goods.

Interest in the broken bank window was probably increased because of the recent robbery of the bank in Texico.

Rogers Opens New Business

C and H Irrigation Supply is a new Bovina business.

Opened recently by Chester Rogers, the firm is located in the Davies Building on Main Street which was formerly occupied by H&M Garage and Bovina Implement Co.

The business offers automotive and irrigation repair work.

Rogers had been a mechanic in Bovina for the past five years. Until opening the new business, he was employed by Southside Motor Supply. He also formerly worked with H&M Garage.

Announcement of the new business is made in an advertisement in this issue of The Blade.

Lightning Hits Power Pole

Members of Bovina Volunteer Fire Department extinguished a fire on an electric power pole on Highway 86 near Lawlis Gin Sunday night.

The fire, which originated from lightning, was reported about 9 p. m.

The lightning blast also snapped one of the power lines on the pole.

Has Surgery

Durward Bell was admitted to Clovis Memorial Hospital last week for major surgery. His condition is said to be good.

Vacation Bible School

Reflections
 From
The Blade

A leak, or leaks, in plumbing under Bovina Public School building spilled 90,000 gallons of water into the nerve system basement during the weekend.

Cadet Billy C. Richards, 20, son of Cash Richards of Bovina, is receiving six weeks of training at Reserve Officer Training Corps summer camp at Fort Hood.

Opening of Mary Marr Shop in Bovina is set for Saturday morning at nine with approximately 110 dresses on sale at special prices.

Tammy Denise Hutto, infant daughter of Mr. and Mrs. Ed Hutto of Bovina, is in Clovis Memorial Hospital.

Gladys Dean, daughter of Mr. and Mrs. Elmo Dean of the Rhea Community, and Donney Spring exchanged wedding vows at the Congregational Church parsonage in Friona Thursday evening.

Cantaloupes on farms around Bovina lay at the brink of harvest as The Blade went to press with the first load expected in Gateway Produce's Bovina shed today.

Three starters and 14 lettermen from last year's Mustang football squad that won four and lost six will be among the expected 30 candidates that will begin workouts August 17.

Mr. and Mrs. Alfred Haney were honored with a farewell picnic Tuesday evening, August 4, at Highway Park.

THREE YEARS AGO, AUGUST 8, 1962

"Everything in America is air conditioned--even the cars!" That was one of first impressions of Elke Steffens, from Germany, who is Bovina's first exchange student.

Dean McCallum and Jimmy Ware have purchased Bovina Real Estate and Insurance from A. L. Glasscock.

Mr. and Mrs. Paul L. Lloyd announce the engagement and approaching marriage of their daughter, Penny, to James Lawlis, son of Mr. and Mrs. Ovid Lawlis.

Mr. and Mrs. C. E. Trimble returned recently from a vacation to Idaho.

Mrs. Paul Holcomb will be honored with a lullaby coffee Friday morning in the home of Mrs. Weldon Moody.

Two "new" opponents are listed on Bovina Mustangs 1962 football schedule which has been announced by Coach Hallie Gee, Friona, a class A club, and Meadow, a class B aggregation, from the South Plains, are teams on Mustang schedule which are different than a year ago.

As many as 150 horses are expected to be entered in Second Annual Bovina Quarterhorse Show here Saturday, August 18. Registration for students in Bovina Elementary School -- grades one through six -- will be Thursday, August 30 at 10 a.m., Robert Taylor grade school principal, announces.

BANK VAULT CONSTRUCTION -- Work on First State Bank's new building is progressing. Work on the vault for the new building is shown here. The vault will have 12 inches of concrete, steel-reinforced, around it. Left to right, are Jerry Webb, Willie Alcalá and John Adlong.

Plans Complete--
 (Continued from page 1)

of the doubleheader.

Arrangements for all the food for the free barbecue Friday night have been made. Gateway Produce will provide cantaloupes and onions, A.L. Hartzog has donated the pinto beans and Wilson's Super Market will furnish half the bread. The beef was recently purchased from Amos Steelman, has been slaughtered at Fuller and Son

Custom Processing here and the meat is ready to prepare for the barbecue.

Complete details of the celebration will be in next week's issue of The Blade which will be the largest edition ever published, and will have county-wide coverage.

Test Your Dry Fly
 Ever have bass ignore your fly, when it looks to you exactly like the live flies you see all around?

Well, the bass has sharper eyes than you and he can see the difference.

Make your own comparison by casting the imitation among the drifting "naturals" and observe how the colors and patterns differ from the living insects.

Mark Good Fishing Spots
 If you fish a lake often enough you get to know the most likely spots where lunkers lurk.

Fishermen with piscatorial savvy often mark such spots by daubing nearby stumps, trees, logs, or stakes with bright fluorescent paint. Occasionally they use the same sort of paint to brighten large fish net floats anchored to the lake bottom to mark such locations.

SHOW CALF -- Lowell Taylor, who will be a freshman student in vocational agriculture this year, is shown with his FFA project, a Hereford steer which now weighs 550 pounds. The steer is one of 12 which are to be led by FFA members in Bovina High this year. (This is the first in a series of pictures of FFA projects.)

MEET THE CHALLENGE!

Funeral For Mr. Freeman

Benjamin Franklin Freeman, 98, a retired farmer, died Saturday morning at Clovis Memorial Hospital after a lengthy illness.

Mr. Freeman is the father of former resident of Bovina, Mrs. E. C. Berry, who is now a resident of Canyon.

Other survivors include his wife, Sarah Lee; one son, Walter of Texico; two daughters, Mrs. Berry, and Mrs. Ester Moore, Albuquerque and 17 grandchildren.

Funeral services were held in the Prince Street Baptist Church.

Pallbearers were Tom Burnett, L. E. Singleterry, Michael Brown, Louis Singleterry, Lewie Paul and Larry Berry.

Burial was made in the Texico Cemetery.

Football Practice--

Cancel Board Meet

Regularly scheduled school board meeting for this month, which was set for Monday night, was postponed, announces Superintendent Otis Spears.

Reason for the postponement was three of the seven board members were unable to attend -- one is in the hospital, Durward Bell, and two are on vacation.

Business planned for the meeting will be attended to at a called session which will probably be next week, Spears says.

"Monticello," name of Thomas Jefferson's home, means "little mountain" in Italian.

Shakespeare's father made gloves.

The last Tasmanian native died in 1876.

SENATOR
Ralph Yarborough

Dear Fellow Texans:

The Housing Bill, one of the major measures in President Johnson's Great Society program, has been passed by both the House and the Senate.

The bill contains many beneficial provisions to provide good, suitable housing for all Americans, without regard to whether they are poor or wealthy.

Several programs which have already proven to be sound ideas were extended for four years. The Federal Housing Administration, under which millions of Americans have bought their homes, has been renewed. Assistance in building college housing to take care of the growing number of students (now about five million) was expanded, as well as urban renewal programs, which many of our big cities have used to improve our neighborhoods.

The bill also provides for housing for the elderly who cannot afford good housing in their old age, and loans for building better housing on our farms and ranches in rural areas. All of these programs have proved very helpful in the past to give this nation the best housed citizens in the world.

Three new programs were put in the Housing Bill this year. One such plan would give matching grants to our cities to build better water and sewage facilities. Every community should have adequate water and sewage facilities for their residents and the Housing Bill will help provide them.

Assistance is also provided in the bill to help communities improve their environment by providing for open spaces and cultural and recreational facilities. This will be helpful in beautifying our cities.

Another new part of the bill is financial assistance to build housing for the elderly and low income families who are living in slums or sub-standard housing. Under this program, people who live in public housing have their rent supplemented if their income is too low to allow them to pay for the public housing.

Adequate housing is essential to everyone, and I supported this bill because I believe it will give many Americans who are unable to find good homes the chance to enjoy better housing.

Mrs. Minter Has Surgery

Mrs. Henry Minter was admitted to Glavis Memorial Hospital for major surgery Wednesday afternoon. Her condition is said to be improved.

It was not known when she will be released.

Registration Day Set At School

Changes in the scheduling of classes since last year will make a pre-school registration day necessary for all high school and junior high students, Principal Alan Staley announces.

The registration day has been set for Friday, August 27. School is scheduled to begin Monday, August 30. Registration schedule calls for seniors and juniors to report from 10 to 11 a. m., sophomores from 11 to 12 and ninth, eighth and seventh graders at 1 p. m.

Everyone must be registered by Monday, the 30th, or they will be counted absent from school, the principal points out.

Plan Young Homemakers Organization

A meeting to organize a Young Homemakers Club will be held Monday night, at 8 p. m. in the homemaking cottage, according to Mrs. Alan Staley, home economics teacher of Bovina High School.

The club will consist of married women between the ages of 18 and 35.

Some of the Friona Club members will be at the meeting to answer questions and explain the functions of the organization.

All women interested in forming a club are invited to attend.

Of Interest To THE WOMEN

Boozer - Handley Wedding Here

Miss Drillma Yvonne Boozer, daughter of Mr. and Mrs. Zemery Boozer, became the bride of Stephen Van Handley, son of Mr. and Mrs. Joe Handley of 1506 East 2nd in Lubbock Sunday, July 25, in rites solemnized by Dr. John H. Traylor of Plainview in First Baptist Church of Bovina.

The couple was married before a background of greenery and baskets of white gladioli on either side of an archway of Cathedral windows and candleabras.

The bride was given in marriage by her father and wore a formal gown of lined silk organza featuring a scalloped Sabrina neckline of handclipped chantilly lace accented with pearls, and long petal-point sleeves. The controlled sheath skirt extended into a full chapel train, centered in the back with a large fabric bow. The veil of elbow length imported silk illusion fell from a queen's crown of pearls headpiece. A cascade of orchids and miniature white roses topped a white Bible with blue and white ribbon stream-

ers of love knots fell the length of the bride's dress.

For something old, the bride carried the same handkerchief the groom's mother carried at her wedding, her dress was new and something borrowed was the veil, belonging to Mrs. Lowell Boozer, sister-in-law of the bride.

Mrs. Paul Holcomb, sister of the bride, served as matron of honor, wearing a formal length dress of blue Peau de Sole, and a white circular veil attached to a Dior bow, white wrist length gloves and a single strand of pearls, given to her by the bride, accented her attire. She carried a single long stemmed white rose.

Bridesmaid was Miss Lou Ross of Lubbock; brides matrons were Mrs. Wyman Colley, Lubbock, and Mrs. Lowell Boozer. All wore identical dresses of the Matron of Honor.

Mrs. Doris Wilson and Mrs. Weldon Moody accompanied Mrs. Lowell Boozer as she sang "Whither Thou Goest," "Oh Promise Me" and "I'll Walk With God".

Miss La Rhea Minter, Lamesa, cousin of the bride served as flower girl and the bride's nephew, Gaylen Holcomb, was ring bearer.

Immediately following the wedding, the bride's parents hosted a reception in the Fellowship Hall of the Church. Miss Carol Beesinger, Lubbock, registered the guests during the reception and Mrs. Jack Minter, Lamesa; Miss Nellene Oliver, Lubbock; Miss Suzan Harper and Colleen Harper, both of Lockney, served white and blue wedding cake and punch from a table laid with a lace over blue cloth and crystal and silver appointments.

Following the reception the couple left on a wedding trip to points of interest in Colorado. They will make their home in Lubbock.

Miss Boozer is a graduate of Hale Center High School and attended Wayland College in Plainview. She is employed at Western Motor Parts in Lubbock.

Mr. Handley is a graduate of Lockney High School and will receive a bachelor of business administration degree in August from Texas Tech.

Thrifty Club Has Annual Chicken Fry

Bovina Thrifty Club had its annual chicken fry in the home of Mr. and Mrs. H. H. Kelson Thursday night.

The group was served chicken, gravy, potato salad, tomatoes and green beans and pie.

After the meal the men played 42, and the women spent the evening visiting.

Those attending were Mr. and Mrs. C. L. Sisk and Royce, Mr. and Mrs. P. O. Dixon and their granddaughter, Mr. and Mrs. Wilbur Charles and Lesa, Lajuana Hastings, Mr. and Mrs. J. D. Stevens and Joe Don, Mr. and Mrs. Bill Bradshaw, Mrs. Earl Ware, Mrs. Zemery Boozer, Mrs. Frank Smith, Mr. and Mrs. L. M. Grissom, and Miss Lola Jean Grissom and the Kelsons.

Juniors To Ceta Canyon

Several young people of Bovina Methodist Church are attending Junior Camp in Ceta Canyon this week.

Ceta Canyon is the locale for the Methodist Camp Grounds in this area. Hundreds of youth go each summer for adventures in Christian living and for learning more of the meaning

of the Christian faith, according to Rev. J. B. Fowler, pastor here.

Those attending from Bovina are Kerry Lane, Steve Lane, Buddy Clements, Tony Foster, Lajuana Hastings, Danna Mann, and Lisa Charles.

Bob Wilson is attending as a counselor for the group.

PAT'S

By Pat Hawkins

Preparations are being made in full swing for the big celebration coming up next week.

It makes one feel real good to see so many people come to a neutral decision and follow through. Of course, there always has to be a leader for a success in anything and besides the follower there is the other person who can say "we" and never lift a finger.

Think, due to the effort of several interested energetic people in and around Bovina, this year's celebration will be bigger than ever.

If you don't have a good time this year and find something of particular interest to you as an individual then you didn't try.

Know of several ladies in town who have dresses for the occasion. Hope to see more at the celebration.

Mrs. Paul Jones was laughing about wearing her dress last year and leaving their service station to wait on customers needing gas. Think she was quite an attraction for tourist coming through and a real good advertisement for Bull Town Days.

There are fewer beads this year. Guess that just a threat of being dunked in the tank wasn't enough to scare anyone.

Notice that there isn't a tank in town. Surely everyone hasn't bought a shaving permit or could it be that no one wants the job of being the dunker?

Was told recently of how the churches are operating in the state of Wyoming.

It seems that the attendance during the summer months, particularly, was so low on Sundays that the churches decided to hold Sunday services on Thursday for the people who went fishing over the weekend. Think that this is a little too much!

See y'all in Bovina for BT.D.

Burnam's Have New Baby Boy

Mr. and Mrs. Carroll Burnam of Friona, have a new sonborn August 5, in High Plains Memorial Hospital.

Dennis Dewayne weighed 7 pounds and 9 ounces.

Maternal grandparents are Mrs. Jessie Williams of Bovina, Dennis Williams of Hereford and Mr. and Mrs. Bill Burnam

of Friona. The Burnam's have one other son, Randy, age 19 months.

Mrs. Wright Hosts Party

Mrs. Jimmy Wright hosted a products party in the home of her mother, Mrs. Earl Richards recently.

Those attending were Mrs. Mac Glasscock, Mrs. Robert Edens, Mrs. Cash Richards, Mrs. J. W. Wright and Mrs. Earl Richards.

They were served punch and cookies.

ing the time he administers the Government, as Governor, he shall receive in like manner the same compensation which the Governor would have received had he been employed in the duties of his office, and no more. The President, for the time being, of the Senate, shall, during the time he administers the Government, receive in like manner the same compensation which the Governor would have received had he been employed in the duties of his office."

Sec. 3. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of this State at an election to be held on the first Tuesday following the first Monday in November, 1965, at which election all ballots shall have printed thereon the following:

"FOR the Constitutional Amendment allowing an annual salary in an amount to be fixed by the Legislature for the Lieutenant Governor and for the Speaker of the House of Representatives and allowing a per diem for Members of the Legislature not to exceed Twenty Dollars (\$20) per day for the 140 days of each Regular Session and 30 days of each Special Session."

"AGAINST the Constitutional Amendment allowing an annual salary in an amount to be fixed by the Legislature for the Lieutenant Governor and for the Speaker of the House of Representatives and allowing a per diem for Members of the Legislature not to exceed Twenty Dollars (\$20) per day for the 140 days of each Regular Session and 30 days of each Special Session."

Sec. 4. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

PUBLIC NOTICE Proposed CONSTITUTIONAL AMENDMENT NUMBER EIGHT ON THE BALLOT

PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 2, 1965. HOUSE JOINT RESOLUTION NO. 57 proposing an Amendment to Section 1-a of Article V of the Constitution of the State of Texas, by adding to said Section as presently written, the following provisions: requiring automatic retirement of certain District and Appellate Judges at age seventy-five (75) or such earlier age, not under seventy (70), as may be provided by law; creating a State Judicial Qualifications Commission and providing for its composition and the qualifications, methods of selection and terms of office of its members; defining the functions and procedures of said Commission, including the duty to investigate, and hold hearings in respect of, disability and misconduct of District and Appellate Judges to make recommendations to the Supreme Court of Texas for involuntary retirement or removal of such Judges; empowering the Supreme Court of Texas, in its discretion, to retire such Judges for disability and to remove them for misconduct, upon recommendation of the aforesaid Commission; and consideration of the record made before it; defining misconduct for which said Judges may be so removed; providing that the proceedings of said Commission shall be confidential until filed in the Supreme Court with recommendation for retirement or removal; and providing that the removal provisions hereby established shall be alternative to and cumulative of those provided elsewhere in the Constitution.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS: Section 1. That Section 1-a of Article V of the Constitution of the State of Texas be amended so that said Section shall hereafter read as follows: "Section 1-a. (1) Subject to the further provisions of this Section, the Justices shall provide for the retirement and compensation of Justices and Judges of the Appellate Courts and District and Criminal District Courts on account of length of service, age and disability, and for their reassignment to active duty where and when needed. The office of every such Justice and Judge shall become vacant when the incumbent reaches the age of seventy-five (75) years or such earlier age, not less than seventy (70) years, as the Legislature may prescribe; but, in the case of an incumbent whose term of office includes the effective date of this Amendment, this provision shall not prevent

him from serving the remainder of said term nor be applicable to him before his period or periods of judicial service shall have reached a total of ten (10) years. (2) There is hereby created the State Judicial Qualifications Commission, to consist of nine (9) members, to wit: (i) two (2) Justices of Courts of Civil Appeals; (ii) two (2) District Judges; (iii) two (2) members of the State Bar, who have respectively practiced as such for over ten (10) consecutive years next preceding their selection; (iii) three (3) members, at least thirty (30) years of age, not licensed to practice law nor holding any salaried public office or employment; provided that no person shall be or remain a member of the Commission, who does not maintain physical residence within this State, or who resides in, or holds a judgeship within or for, the same Supreme Judicial District as another member of the Commission, or who shall have ceased to retain the qualifications above specified for his respective class of membership. Commissioners of classes (i) and (ii) above shall be chosen by the Supreme Court with advice and consent of the Senate, those of class (iii) by the Board of Directors of the State Bar under regulations to be prescribed by the Supreme Court with advice and consent of the Senate, and those of class (iii) by appointment of the Governor with advice and consent of the Senate.

(3) The regular term of office of Commissioners shall be six (6) years; but the initial members of each of classes (i), (ii) and (iii) shall respectively be chosen for terms of four (4) and six (6) years, and the initial members of class (iii) for respective terms of two (2), four (4) and six (6) years. Interim vacancies shall be filled in the same manner as vacancies due to expiration of a full term, but only for the unexpired portion of the term in question. Commissioners may succeed themselves in office only if having served less than three (3) consecutive years. (4) Commissioners shall receive no compensation for their services as such. The Legislature shall provide for the payment of the necessary expense for the operation of the Commission. (5) The Commission may hold its meetings, hearings and other proceedings at such times and places as it shall determine, it shall meet at Austin at least once each year. It shall annually select one of its members as Chairman. A quorum shall consist of five (5) members. Proceed-

Coke Party For Exchange Student

Linda Estes hosted a Coke party honoring Torild (Trudy) Skjerve, the new exchange student from Norway, in her home

Thursday afternoon. Those attending were Carol Cole, Carolyn Damron, Patsy Cumpston, Mary Dane, Karen Estes, Kathy and Elaine Minyen, Martha Snodgrass, Connie and Vickie Vaughn, Roxie Laceywell, Karen Beauchamp, Gale Boyd, Carol Jamerson, Nancy Pultz, Carol Kirkpatrick, Cecelia Denny, Judy Sisk and Linda Sudderth. The girls were served Cokes and chips and dips.

St. Ann's Group Hosts Supper

A buffet supper was served Saturday, by the parishioners of St. Ann's Catholic Church. The meal was in honor of the Graymoor seminarians who conducted the religion classes this summer.

Guests of honor were Fathers Justin, Maruis, Gerard, Audre and Mrs. Jim C. Kaim.

Approximately 60 people attended the supper. In the near future the seminarians will be leaving St. Ann's for Washington, D. C.

HOOVER SALE Lowest Price Ever

MRS. STEPHEN VAN HANDLEY

Mrs. Brock's Father Dies

Funeral services for Andrew Jackson Harp, 92, of Clarendon, who died at Adair Hospital there Thursday, were held Friday in Murphy Memorial Chapel. He was the father of Mrs. Aubrey Brock of Bovina.

Rev. W. R. Lawrence, pastor of the First Baptist Church, officiated at the services. Burial was in the Citizens Cemetery.

Mr. Harp, a resident of Clarendon for 30 years, was a retired farmer. He was born in Mississippi.

Survivors include five daughters, Mrs. Brock, Mrs. Kinch Leathers of Clarendon, Mrs. Betty Walling of Lubbock, Mrs. J. B. McDowell of Memphis and Mrs. Clyde Phillips of Gainesville; a sister, Mrs. A. L. Hutchins of Wichita Falls; a brother, M. B. Harp of Gainesville; 15 grandchildren, 22 great grandchildren and one great-great-grandchild.

PUBLIC NOTICE Proposed CONSTITUTIONAL AMENDMENT NUMBER NINE ON THE BALLOT

PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 2, 1965. HOUSE JOINT RESOLUTION NO. 8 proposing an Amendment to Section 24, Article III and Section 17 of Article IV of the Constitution of the State of Texas, to allow an annual salary in an amount to be fixed by the Legislature for the Lieutenant Governor and for the Speaker of the House of Representatives, and increasing the per diem allowance of Members of the Legislature.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS: Section 1. That Section 24 of Article III of the Constitution of the State of Texas be amended to read as follows: "Section 24. Representatives shall receive from the Public Treasury an annual salary of not exceeding Four Thousand, Eight Hundred Dollars (\$4,800) per year. Senators shall receive from the Public Treasury an annual salary of not exceeding Four Thousand, Eight Hundred Dollars (\$4,800) per year. The Lieutenant Governor and the Speaker of the House of Representatives shall receive from the Public Treasury an annual salary in an amount to be fixed by the Legislature. All Members of the Legislature, including the Lieutenant Governor and the Speaker of the House of Representatives, also shall receive from the Public Treasury a per diem of not exceeding Twenty Dollars (\$20) per day for the one hundred and forty (140) days of each Regular Session and for thirty (30) days of each Special Session of the Legislature. No Regular Session shall be of longer duration than one hundred and forty (140) days. This Amend-

ment shall be self-enacting and appropriations heretofore made in the General Appropriations Bill for the biennium ending August 31, 1967, for the salaries of the Lieutenant Governor and Speaker of the House of Representatives shall not be invalid because of the anticipatory nature of the legislation. "In addition to the per diem the Members of each House shall be entitled to mileage in going to and returning from the seat of Government, which mileage shall not exceed Two Dollars and Fifty Cents (\$2.50) for every twenty-five (25) miles, the distance to be computed by the nearest and most direct route of travel, from a table of distances prepared by the Comptroller to each county seat now or hereafter to be established; no Member to be entitled to mileage for any extra Session that may be called within one (1) day after the adjournment of the Regular or Called Session." Sec. 2. That Section 17 of Article IV of the Constitution of the State of Texas be amended to read as follows: "Section 17. If, during the vacancy in the office of Governor, the Lieutenant Governor should die, resign, refuse to serve, or be removed from office, or if he shall be impeached or absent from the State, the President of the Senate, for the time being, shall, in like manner, administer the Government until he shall be superseded by a Governor or Lieutenant Governor. The Lieutenant Governor shall, while he acts as President of the Senate, receive for his services an annual salary in an amount to be fixed by the Legislature and the same mileage which shall be allowed to the Members of the Senate, and no more; and dur-

BOOKS for the Christian's Library

"Study to show thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the Word of Truth." (2 Timothy 2:15)

TOOLS FOR THE WORKMAN

Nearly every skilled workman needs the tools required by his trade. The mechanic takes great pride in his tools which he has collected through the years. You will find his name plate reflecting proud ownership. Likewise the carpenter can almost be judged by the quality of his saw and hammer because good tools make the job go well.

So, the Christian workman has tools. The basic implement of his work is the Word of Truth. God through the Holy Spirit has given His Word and through providence has preserved it for us. Because it reveals the deep things of God and because almost 2,000 years have lapsed since its completion, the student of the Word must give diligence to his task of "rightly dividing the Word."

Of great value to the serious Bible student are those numerous aids compiled by scholars of the Book. Available to us are many good Bible Dictionaries, Concordances, Atlases, Commentaries, Etc. These are also basic tools for the Christian workman. Every Christian home should have a well-stocked library of good Christian literature built around these basic Bible study aids. Does your home have an adequate Christian library? Get your minister or some experienced Bible teacher for counsel about what books would be the best for you, then adopt a plan for building that library!

Star Righters Cancel Meetings For August

Bovina Star Righters, square dance club will not meet for its regular meetings during the month of August. Several couples plan to attend a square dance in Ruidoso, N. M. next week. Also plans are being made for the Bull Town Days celebration. The club will resume its meetings September 10, in the Legion Hall.

Tim Kelly Has Operation Sat.

Tim Kelly, son of Mr. and Mrs. Bob Kelly of Salinas, Calif. and grandson of Mr. and Mrs. Odie White of Bovina underwent surgery Saturday in Northwest Texas Hospital in Amarillo. Tim has been hospitalized some three weeks due to a blood clot in his leg. He is reported to be doing fine and will be released in a week or ten days.

Community Conversation

Mr. and Mrs. Norman Killough and children, Mike and Norma Jean, of Medford, Ore., are here for a two week visit in the home of his parents, Mr. and Mrs. Lloyd Killough.

Mr. and Mrs. Don Sides and family returned recently from Parsons, Kans. where they visited in the home of Mr. and Mrs. Jimmie Charles and family.

J. O. Combs was released Monday from Methodist Hospital in Lubbock after undergoing surgery last week. He will be at home with his daughter, Mrs. Gene Guyer in Lubbock.

Mr. and Mrs. Tom Ware spent last weekend in San Angelo visiting with her aunt, Mr. and Mrs. Robert Read visited in Fort Worth last week.

Mr. and Mrs. J.W. Wright spent last weekend in Burkburnett visiting with relatives. Mr. and Mrs. L. O. Depperman and Linda of Portland, Ore. have been visiting in the home of her sister and family, Mr. and Mrs. C.E. Trimble.

Mr. and Mrs. Bob Faulkner and family of Tyler spent some time in the home of Mr. and Mrs. A. M. Wilson visiting with Trudy. The Faulkners have an exchange student, also from Norway.

Mr. and Mrs. J. B. O'Hair of Odessa were here recently visiting in the home of her parents, Mr. and Mrs. Paul Lloyd. Mr. and Mrs. Bobby Fillpot, Brian and Bruce, returned Tuesday from a trip to Red River, N.M.

HOTSHOTS WIN IT!--

Softball League Ends

The Hammonds Hotshots are champions of Bovina's first slow-pitch softball league in history, but their record was blemished in a game with the host team, the Lions, last (Tuesday) night.

The Lions took a hard-fought, 13-10 verdict.

In the other game last night, Oklahoma Lane edged Gilreath's Bombers, 7-6.

The Lions moved themselves into undisputed possession of first place with the come-from-behind win over the Hotshots. The Hammonds team has a 7-0 lead at the end of two innings.

The Lions won all three of their games during the past week as they also downed the Sluggers, 12-8, Thursday, and Gilreath's Bombers, 10-5, Friday.

Oklahoma Lane and Barraza's Boys finished in a tie for third place with 4-3 records. Oklahoma Lane outran the Jaycees, 21-11, Tuesday of last week, and lost to the Sluggers Friday, 13-8.

The Hotshots kept their unbeaten record intact up to the final game with a close, 5-4, decision over Barraza Tuesday night of last week.

The Sluggers finished fifth with a 3-3 record. The Bombers were sixth with a 3-4 mark. The Sluggers won over the Jaycees in a Monday night game, 14-1, to help offset their two losses of last week.

Monday night's other tilt saw Barraza beat the Firemen, who were winless over the season, 21-2. Thursday night, the Firemen lost to the Jaycees, 13-8.

FINAL STANDINGS

Team	W	L	Pct.
Hotshots	6	1	.855
Lions	5	2	.714
Oklahoma Lane	4	3	.571
Barraza	4	3	.571
Sluggers	3	3	.500
Bombers	3	4	.428
Jaycees	2	5	.285
Firemen	0	6	.000

Corn's Farm Store is pleased to announce the association of **CLARENCE GAUNTT** as field representative. Clarence has had years of experience in our area, both as a farmer and as a fertilizer specialist. We invite you to call on him for help with all your fertilizer and chemical needs. He is qualified to be of service to farmers in our community and will be more than glad to assist you.

Automobile Costs Vary Widely

Automobile costs and maintenance expenses vary with each car and owner, says Mrs. Wanda Meyer, Texas A&M University Extension home management specialist.

Gasoline and oil costs for the same make and model may vary as much as 50 percent. This variation is caused by factors such as how a car is driven, the type of driving such as city, flat country, or mountain driving, the loads carried, the general condition of the vehicle and tire pressure. Oil consumption is equally variable.

Maintenance costs vary even more than gas and oil costs. The owner of a new car may have no more expense than a five or six lubrication jobs and a gallon of anti-freeze.

The type of driving and driver are both factors in determining tire costs. High speeds, warm climates, hard cornering, rapid acceleration and quick stops all contribute to fast tire wear. The motorist who must replace a set of tires every year may spend from \$60 to \$200 depending on the size and type of tires he chooses.

Most motorists carry insurance on their cars. Insurance premiums are listed under fixed costs because they do not fluctuate with the number of miles driven. To determine insurance costs, add the premiums of all policies you carry that are directly related to car operation.

License and registration fees should be treated in the same way as taxes. Determine what you spend for license and registration fees and add the total to your fixed costs.

Cucumber harvest has been made easier by the arrival of a cucumber harvester in Parmer County. While the machine does not do away with all hand labor it does make the harvesting chore much simpler. Workmen on the Wendol Christian farm

are picking cucumbers for the second time this year. The 15 acre patch of cukes are producing a yield of 500 bushels per acre and selling for \$3.50 per bushel.

Range Fires A Seasonal Hazard

Motorists beware -- range fire season is just around the corner as dry weather conditions persist over most areas of Texas.

Thousands of Texas' 100-million grassland acres go up in smoke every year because of carelessness, says G. O. Hoffman, Extension range specialist, Texas A&M University.

The grass you see when traveling along the highway is

Abuses and advantages of land annexation by Texas cities are evaluated in a new University of Texas Institute of Public Affairs publication, "Municipal Annexation in Texas." The author is Dr. Stuart A. MacCorkle, institute director. Copies are available at \$1.50 each from Institute of Public Affairs, University of Texas, Austin, Texas 78712.

The trouble with opportunity is that it only knocks. Temptation kicks the door in. Gaylord Newby Woodward County (Okla.) Journal.

Even though most rumors haven't a leg to stand on they have a way of getting around. Harold S. May, The Florence (Ala.) Herald.

the rancher's winter hay crop, like money in the bank to him. The stockman has worked hard to produce this grass, so help him keep it by preventing grass fires from a carelessly flipped burning match or cigarette.

Grass is more than just "cowfeed." Besides producing tasty steaks and lamb chops, grass produces food and cover for deer and quail, prevents muddy water from running into lakes and streams and killing fish and making water recreation unpleasant.

Not only is grass important to the rancher, but you also have a stake in it. Take a look at what it has to offer you. When hunting season rolls around, you want a fat buck to hunt or a large convey of quail for the dog to point. Without grass and cover these will not exist.

The ol' fishing hole offers some pleasant hours of fun to you -- unless a careless passerby caused a fire that filled the lake or stream with silt from an unprotected range area. Your favorite picnic spot can be turned into a charred wasteland by careless smokers or campers.

Keep these things in mind when you start to throw that next cigarette or match out of the car window. Help the rancher and help yourself. He put those fire precautions there to protect his most valuable natural resource -- grass.

On The Farm In Parmer County

By JOE VANZANDT
County Agent

COTTON IRRIGATION

It is time to start planning on cutting off cotton irrigation water.

A cut-off date of August 20 is recommended for this area. Based on research results, application of irrigation water after August 20 has several bad effects. One of these is lowering of quality -- that results in a decrease in net returns per acre. In some years total yield per acre may be increased with late irrigation. However, the resultant lowering of cotton quality usually means decreased net returns, plus added cost of the late irrigation.

Late watering increases boll set which normally haven't matured by frost. This is likely to be a case where the highest yield does not necessarily make the most net profit. Over the years, we believe farmers will be ahead to settle for the crop they can make by cutting off water August 20 and get more dollars per bale on possibly a little less cotton.

SORGHUM MIDGE

So far this season Parmer County has had very few midges. However, if your sorghum has not headed out yet, we recommend you keep a close watch on it. You should check for midge as soon as heads start to emerge. The adult midge is an orange-colored fly about 1/12 inch long. Adults are more noticeable in the early morning crawling over spiklets of developing grain heads.

Insecticides recommended are: Sevin, Toxaphene, Endrin, Ethion, Parathion, Trithion, and Diazinon. Insecticides must be applied soon after head emergence. A second application, 3 to 5 days after the first spraying is good insurance during prolonged periods of adult

activity.

ABNORMAL TREE GROWTHS
Galls or abnormal growths are often found on ornamentals and shade trees.

Certain species of insects and mites cause the distinctive deformity which develops on the leaves, twigs or stems of the plant. Immature stages of pests can often be found within developing galls.

Mites, midges, plant lice, Cynipids (tiny wasps) and jumping plant lice are some of the more important gall-forming insects. Control of the abnormality cannot be accomplished after it has formed since it contains and protects the pest from insecticidal contact.

Applications of DDT plus malathion, beginning with the new growth and continuing at weekly intervals until the leaves are fully developed will help prevent formation of galls.

4-H NEWS

Milton Lee Walling and his family left Wednesday for the State 4-H Horse Show to be held in Dallas at the State Fair Park Coliseum. 311 contestants are expected. We know the competition will be rough, but feel like Milton will be there giving the best lots of competition. The County Agent and his family are also attending the show which lasts thru Friday.

There were 27 boys and six men who returned last Thursday from the 15th Annual Boys 4-H Camp in Holy Ghost Canyon, New Mexico.

Those attending the camp were: David Sides, Mike Fred, Kevin Kaltwasser, Derek and Dexter Garner, Mike Doshier, Steven Kaltwasser, Roy Don Coker, Danny and Loy Dale Clark. Others present were: Nel Christian, Mark Ramage, Randy Barrett, Raymond and Manuel Quintana, James and Floyd Schlenker, Danny Carthel, Larry Cox, Nick Collier, Rusty Lindeman, Gary Phipps, Joe Mark Milloy, Tony and Kenny Keith, Benny Kent and Glen Cannon.

This made the 15th consecutive year that James Mabry

THE HIGH PLAINS FARM AND HOME

Farming Becoming Hazardous Work

Farming as an occupation is getting more hazardous each year. Although the Texas farm population is declining, farm accidents are on the rise.

Increased mechanization is a big factor. Machines allow the farmer to do much more work than previously, but they also increase his work load. And as fatigue sets in, the accident potential rises.

The number of Texas farmers decreased some 45 per cent in the last 15 years. But accidents have jumped an alarming 66 per cent.

On the national average, death rates from farm accidents varied by age groups. Increasing rapidly after age 49, the rate was more than double the U. S. average for those farmers who were still active at 75. Highest farm accident death rate for any group under 50 is among those 15 to 24 years of age.

The leading cause of accidents on farms is machinery, followed by drowning, then firearms, falls, blows, burns, electricity and poison. Machinery accounted for 37.6 per cent of the more than 9,000 fatal accidents on U. S. farms in the last three year period. This makes farming more dangerous than work in mines, quarries and industrial factories combined.

February through July is the most hazardous part of the farming year. Machinery accidents are highest during plant-

ing and harvesting season. Firearm fatalities increase throughout the summer and fall, then decline steadily from January through May.

Texas Agriculture Commissioner John C. White recently joined the National Safety Council in urging greater safety factors to be built into farm machinery.

"Automobiles are claiming a lot of attention among safety-minded engineers," White pointed out. "We'd like the same attention to be directed towards farm equipment."

Don't Turn A Weapon On Yourself

Pesticides are weapons against a farmer's natural enemies but, like all weapons, they must be used with caution.

Agriculture Commissioner John C. White warned recently, "The summer months are times of heavy pesticide use -- and time of danger when chemicals are not properly handled."

"Read the directions on the label," Commissioner White urged. "Private and government researchers spend millions of dollars determining proper use of chemicals but no power on earth can keep the user from accidents unless he follows instructions."

Full and explicit directions for maximum safety and effectiveness are required by the Texas Department of Agriculture to be printed on the container. Much time and many dollars are also spent by state and federal authorities in checking to see that these products react and can safely be handled according to the printed directions.

"Pesticides are an indispensable tool of modern farming," White said. "Not only can the farmer no longer afford to give room and board to pests, but the number of pests has increased. Modern rapid transportation has introduced many new insects and pests unheard of in this country 50 years ago. Also, modern intensive cultivation practices invite insect infestations."

"But farmers must remember that pesticides are a weapon against his natural enemies and should be 'pointed' only at those enemies -- never at himself or users of his production," said White. "Residues from pesticides improperly applied to crops can result in those crops being taken off the market."

WHY FUSS WITH WOOD?

NEW Panl-Frame GIVES YOU MORE FOR YOUR MONEY

If you're in the market for a low-cost, "do-it-yourself" farm building structure...

You can draw up some plans, go down to the lumber yard, fiddle around with siding, rafters, poles -- round up a crew -- and then pound, cut, trim, hammer and paint until you're blue in the face. And still wind up with just an ordinary wooden building.

Or you can buy a factory-made Butler Panl-Frame from us. An all-metal building that goes up fast and easy, because all the components are pre-cut and pre-punched to exact dimension. For about the same total cost.

Panl-Frame is a brand new kind of metal building, with only a bare minimum of inside supports. How

NO BULKY FRAMES
NO TRUSSES
The Panel is the Building

come? Because the panel is the building -- big, strong wall and roof panels that function as both cover and frame. Panl-Frame suits almost any farm need. And you get a fireproof, weathersafe, practically maintenance-free building to boot -- one that won't sag or rot.

If you can put a nut on a bolt, you can build a Panl-Frame. We can build it for you, at a low turn-key price. Or we can do it together. Why not come in for some free Panl-Frame building plans now? Low-cost financing available.

COTTON TALKS

FROM PLAINS COTTON GROWERS, INC.

According to Donald A. Johnson, executive vice president of Plains Cotton Growers and other PCG officials, there are too many farmers who view the "Cooley" cotton proposal as the only possibility for new cotton legislation.

"Statements by the Secretary of Agriculture notwithstanding," Johnson says, "this just ain't necessarily so". It is widely held among cotton industry leaders that the administration has "ordered" passage of new cotton legislation. If this be true, defeat of the cotton program which now has the Secretary's blessing might well lead to his acceptance of a new plan.

This is the thinking behind the steadfast opposition to Cooley's proposal by cotton producer organizations from 14 states and their efforts to defeat it on the House floor. They call attention to the fact that the Senate Agriculture Committee has yet to take action on a cotton bill. Most think the Senate Committee will make recommendations considerably different from those in the House and much more acceptable to producers. And, given defeat of the House draft, the Senate's version would have a much better chance of being finally enacted.

An outline of such a program has already been proffered by producer groups and has met with some favor. Briefly, the producer plan would (1) effectively maintain the 16 million acre minimum allotment, and temporarily reduce production through a truly voluntary acreage diversion process, and (2) retain the loan level at 29 cents and provide for flexible equalization payments (the amount to be determined by market fluctuations) both in domestic and export markets.

The equalization payment, made to allow American cotton to meet world prices on a continuing basis, would to anyone

who assumed the obligation of consumption or export during the life of the program. Flexibility would be incorporated into the price of American cotton by settling the amount of payments as the average difference between the U. S. and the world price at the end of the marketing year. Advance disbursements would be made on an interim basis pending final determination of the difference between these average prices.

In this way, cotton would move into the market because the market price would at all times be above the loan price. An effective merchandising system and a market for all cotton produced would be guaranteed. Exports could be increased and foreign production expansion stemmed by not giving advance notice of the price at which U. S. cotton would sell. Producer income would not be dependent on a direct appropriation from Congress each year. And, to cap it all, statisticians estimate the cost to the taxpayer would be below the cost of the current proposal.

Cotton Producers Legislative Committee, representing a huge majority of cotton producers, believes this program will satisfy all segments of the industry and the Administration. If given a chance.

And the best guess is that it will get a chance only if and when Mr. Cooley's proposal is beaten in the House.

Cotton producers across the belt have been so embroiled in the controversy over cotton legislation there is danger almost equally important legislation dealing with farm labor and workers in allied industries may be overlooked. This is the opinion of Ed Dean, Field Service and Labor Relations Representative for Plains Cotton Growers, Inc.

A prime example of the legislation Dean referred to was reported from a House labor subcommittee August 3 and is expected on the floor of the House by the end of the month. The bill H. R. 10275, would raise the minimum wage a whopping 40 per cent from \$1.25 to \$1.75 and would extend minimum wage coverage for the

A workman on the Vernon Willard farm, in the Oklahoma Lane area displays the size of the cabbage which are being harvested at this time. Willard has 110 acres of cabbage in various stages (slips to harvesting size). The cabbage now being harvested

are producing 30 tons per acre and are selling for \$30 per ton (good price according to Charlie Flynn, one of the largest producers of vegetables in Parmer county).

first time in history to farm labor.

For farm workers, the minimum would start at \$1.15 per house an go to \$1.25 in two years. All migratory workers, tenant farmers, sharecroppers and the hired hands on farms employing five or more workers would be covered. According to Representative James Roosevelt (D-Cal.), chairman of the labor subcommittee, about 40 per cent of farm employment falls in these classes.

Dean said Plains Cotton Growers, Inc. is vigorously protesting this bill along with others in both the Senate and House. The "others" have not yet been reported from committees, but are firm proposals soon to be considered. They would remove agriculture's restrictions under the Fair Labor Standards Act with regard to minimum wages and overtime; extend collective bargaining coverage to farm workers by amending the Labor-Management Relations Act, and give the Secretary of Labor authority to set up a recruiting system patterned after the bracero program. Under the recruitment plan, the Secretary, at farmer

Wildlife Unharmed In Control

In a pitched battle to halt the spread of the boll weevil into the rise South Plains cotton fields last year, some authorities feared extensive damage to wildlife and fish. Recent studies have revealed, however, that proper applications of the insecticide malathion caused no injuries.

The spraying program involved treatment of some 300,000 acres of cottonland in the vicinity of Lubbock. A 90 per cent kill of the overwintering population of boll weevils was achieved.

In addition to the absence of any adverse effects on fish and wildlife, the study also revealed that although the late-season treatments depressed populations of beneficial insects in cotton fields, the effect was not considered significant.

Cotton land was treated 4 to 6 times with undiluted malathion

expense, would furnish recruits with physical examinations, emergency medical care, transportation to and from areas of employment, food and housing during such transportation and while they await transportation.

In the Senate, these proposals are contained in bills filed by Senator Harrison Williams (D-N. J.) and numbered consecutively from S-1864 through S-1869. On the House side in addition to H. R. 10275, there is H. R. 8109 by Congressman Roosevelt, which is an omnibus type farm labor bill covering minimum wage, child labor, unionization, recruitment and a few minor matters, and H. R. 8259.

Over and above the implications for farm workers, these bills seek to eliminate all minimum wage exemptions and narrow all maximum hour exemptions granted to gins, compresses, warehouses and crushing mills. And, over a four year period, would increase the overtime rate for all non-exempt work over 45 hours per week from time-and-a-half to double-time.

Testimony presented in opposition to these proposals by the National Cotton Council, PCG and others points out they would add about two cents per pound to the farmer's cost of ginning and marketing his crop. And, extending the minimum wage to farm workers at \$1.25 per hour would make the cost of hand chopping and hand harvesting in some sections of the cotton belt prohibitive.

Letters to Congressmen, Senators and Committees from Plains Cotton Growers emphasize that such legislation would deprive older workers and other sub-par efficiency workers of the opportunity for farm employment. Many of these are the industrially unem-

plied at rates of 12 to 16 ounces per acre. The chemical was applied by aircraft using the new low-volume method approved by research scientists. Agriculture Commissioner John C. White pointed out that malathion is the only pesticide presently registered for undiluted use in low volume spraying. No other pesticide should be applied in this manner because of potential hazards in-

volved, White warned. The Texas Department of Agriculture cooperated with the U.S.D.A., Plains Cotton Growers, Inc. and Texas A&M University in the insect control program. The boll weevil has only in recent years been able to overwinter in the Plains region. The extensive spraying operation was put into effect to hold the line of the pest below the caprock.

ployables traditionally utilized by agriculture, and they would have no choice but to become a part of the nation's welfare rolls.

High Plains cotton producers will be asked to contribute some \$200,000 less toward carrying out the Diapause Boll Weevil Control Program in 1965 than in 1964 assuming a two million bale crop. That is the result of action taken August 3 by the Areawise Boll Weevil Committee of Plains Cotton Growers, Inc., reducing per-bale contributions from 50 cents to 40 cents.

Although the numbers of boll weevils emerging from hibernation were some 90 per cent less this spring than the previous year, the infested area was only reduced by about 25 to 30 per cent. And, changes are being made in the program which will increase the number of chemical sprayings so that substantially the same number of aggregate acres will be sprayed. Reduction of the contributions needed by \$200,000 is largely the result of economies effected in the 1964 spraying program which permitted a carryover of approximately that same amount.

The changes, recommended by a panel of the nation's finest entomologists, call for beginning the spray program on September 7 this year instead of starting on September 17 as was done last year. The first three applications of insecticide are to be flown on at from five to seven day intervals, with the remaining four to be applied 10 to 14 days apart. The first three doses, in addition to killing weevils which might prepare themselves for hibernation early, will be designed to kill weevils before eggs are laid, thereby breaking the pest's reproductive cycle.

Dr. Perry Adkisson, Texas A&M Department of Entomology, said: "Reducing weevil populations by 90 per cent with three applications, then killing 90 per cent of those surviving before they go into hibernation, will give us a ninefold increase in efficiency." He explained that in this way only one in 100 weevils will reach the hibernation stage, whereas about 10 per 100 escaped into

WORTH TALKING ABOUT

"Profit is the measure of your effectiveness in managing resources so as to produce more than you consume. A good profit indicates that a business is successfully meeting the wants and needs of customers at prices they are willing to pay. Sound marketing recognizes there is no long-term advantage to anyone in profitless volume."

J. Stanford Smith
Vice President
General Electric Co.

"We need the experts, all right, no question about that. But we cannot turn them loose to determine how the business shall perform. Along with them, and just as much, we need the participation of managers in all departments. We need the hard-headed down-to-earth men of the line who know the traditional score, so that we will have a mixed team and a give and take, a creative dialogue, that develops in all members of the team a better understanding of the goals we want to reach and of the means for getting there..."

Frederick R. Kappel
Chairman of the Board
American Telephone and Telegraph Company

hibernation last year. As was the case last year, the Plant Pest Control Division of USDA will be paying half the cost of the program and producers on the Plains will pay the other half, with the exception of Texas Department of Agriculture funds which were \$42,000 in 1964.

Donald Johnson, Executive Vice President of PCG said: "We now know much more about what must be done and how to go about doing it, and there is no reason to suspect that the job cannot be completed within the original three-year schedule."

Uses Of Soil Surveys Conducted By The Soil Conservation Service

Soil maps are a basic tool for selecting a system of soil management. The maps show the kinds of soil in a field, a farm, or in a city or town. Currently, about one-half of the land in the Texas Panhandle has been surveyed. In the local Parmer County Soil Conservation District, about 25 per cent has been completed to-date and it will be completed as manpower becomes available. The ultimate goal of the United States Department of Agriculture is to have a soil survey or map of every acre of land in the Nation.

What then does a soil map predict about a piece of land? In the Nationwide system now in use the soils are classified and named, just as plants and animals are. For example, plants are identified and named by such features as the structure and the shape of the leaf. Likewise, soils are identified and named by their main characteristics which are its texture (proportions of clay, silt, sand), color, depth, kinds and sequences of layers or horizons, and any other feature that is important to its use and management.

These soil traits or features can be determined in the field by the Soil Scientist making the map. The names of the soils are taken from towns or localities near the place where the soil was first defined. Examples of soil names from this area are the Amarillo series, Pullman series, Dalhart series and Randall series. After the features or characteristics of a soil have been studied and determined, predictions can then be made about how it will respond to various kinds of management or use.

Some of the questions that a soil survey and its interpretations can answer are: Is this land suited to cultivation? What kind of crops can be grown? How much erosion has occurred on it? What practices will be needed to maintain or increase the soil's fertility? Is the soil suited to irrigation and what kind of system will I need? What kind of native grasses will it grow? Does the soil swell and shrink, creating a hazard to structural

foundations? Does it flood often, and many others.

The principal users of soil surveys are those involved in producing agricultural products, - farmers, ranchers, dairymen, etc. Special interpretations have been made by Soil Conservation Service Technicians to assist agriculturalists in the use of the surveys. This is the land capability classification system. Soils are placed in eight classes, all of which do not normally exist on any single farm or ranch. Class I through IV are suited to cultivated crops. Class V through VII are suited only to grazing and wildlife. Class VIII land is suited only to wildlife.

Through the soil survey, this land capability system provides the basic facts with which the Soil Conservation Service Technicians and the landowner or operator develop the conservation plan for the cultivated land on his farm. For rangeland, the soils are grouped into range sites. Each site is composed of a group of soils that respond similarly to kinds of grazing and that grow the same kind of grasses.

Soil maps are made by experienced Soil Scientists who are graduates of Agricultural Colleges and Universities, where they were trained in the soil sciences, crop sciences and related subjects. Ordinarily the Soil Scientists use aerial photographs as a base for plotting the soil boundaries. He goes over the land with a spade, auger or power sampler and digs as often as necessary to determine the kinds of soil and to mark their locations.

Soil maps may have other uses. They are of use to prospective landowners, land appraisers, students of natural sciences, road builders, pipeline companies and others. In some urban areas, corrosion of underground pipe is a problem, thus soil maps are used as a guide for rerouting their pipelines around these salty areas, thereby saving these cities much expense. Soil surveys are also being used more and more by counties and school districts as a basis for re-evaluation of their tax structures.

The Active Life by Dan Eams

SURFING
THE EXHILARATING SPORT OF SURFING WAS POPULARIZED BY THE LEGENDARY HAWAIIAN SURFER, DUKE KAHANAMOKU. THIS MASTER OF THE ANCIENT POLYNESIAN PASTIME, WAS THE FIRST TO DEMONSTRATE SURFING IN CALIFORNIA WATERS WHERE THIS FAST-MOVING SPORT ORIGINATED IN THE U.S.

"THE CRY OF 'SURF'S UP' IS BRINGING GROWING NUMBERS OF NEWCOMERS WHO WANT TO GET IN ON THE FUN. SKILLED SURFERS CONTINUE TO LIVE THE SURFING LIFE - COMPLETE WITH CUT-OFF-AT-THE-KNEES BLUE JEANS, THEIR OWN LINGO AND THE SPECIAL SURF-BEAT MUSIC."

Quick Rainy Day Party

When a rainy day keeps your pre-schooler from going out to play—and he doesn't know what to do—why not ask a few of his friends over for a quick party?

A tempting and hearty beverage can be made in a matter of minutes if some cans of baby's strained fruit juice are on hand. For something to chew on, pass a plate of Animal Shaped Cookies with enriched icing.

Fruit Juice Creme

- 1 small scoop vanilla ice cream
- 1 can Gerber Orange-Apple-Banana Juice*

For each serving, place small scoop of ice cream in sturdy low glass or mug. Fill each glass with fruit juice. Serve with straws.

Fruit Nog

- 2 eggs
- 2 cups cold milk
- 2 cans Gerber Orange-Apple-Banana Juice*
- 1 tablespoon sugar

Beat eggs lightly, add other ingredients and blend thoroughly with rotary beater. Serve the drink in small punch cups so the youngsters will have fun of calling for seconds. Serves four.

*Try other Gerber juices and let the children pick their favorite flavors.

Accent on Health

J.E. PEAVY, M.D., Commissioner of Health

Summer offers its own brand of fun—outdoor recreation, cook-outs, get-togethers and the like.

But summer enjoyments, like others, have their hazards or pitfalls.

Take sunning for example. It's practically an all-American sport. For those who participate, a beautiful tan is a status symbol well worth baking for.

Too much roasting, however, results in a burn. Everyone reacts differently to the sun. But, no matter how easily you tan, follow the rules for even baking.

First, take it easy. Ten minutes on a side is enough for the first day. Increase the time by about five minutes on each successive day. And, don't be fooled by a cloudy or hazy sky. You can burn on cloudy days, too.

Be choosy about where you sun. If you are near reflections from aluminum, water or sand, the sun's rays are intensified.

Keep your defenses up while you sun. Suntan creams and lotions contain chemical sunscreens which help prevent sunburn by absorbing ultraviolet rays. One coat of lotion is not enough for a day at the beach. Apply it as directed after each swim and whenever it seems to have rubbed off. Since eyes and hair need protection too, wear sunglasses and don a hat.

And, don't forget that continual exposure ages skin prematurely. Year-round exposure or excessive summer tanning can cause a permanent leathery look. The correlation between continual exposure and skin cancer indicates additional danger.

The back yard barbecue is another traditional part of summer fun. But barbecuers would do well to restrict all cooking over charcoal to the outdoors. Bringing a grill full of coals into the garage, basement, back porch, or kitchen—in case a sudden rain comes up—can be deadly. Charcoal briquets can produce the deadly, odorless carbon monoxide as long as they are giving off heat.

Campers have been asphyxiated by trying to heat cabins, tents and even cars with charcoal briquets. Carbon monoxide is especially treacherous since its presence cannot be detected by the senses.

Early this fall more than 240,000 young Texans will be entering public schools for the first time.

Even though the opening of school is still some weeks away, parents are busy making preparations to insure their child makes a smooth adjustment to his new environment.

The child's adjustment will be more rapid and satisfactory if he starts his school life in good, sound health.

Have your family physician or local clinic give your child a complete physical examination including an eye check. His teeth should also be checked by the family dentist. If these examinations show there are ailments or defects that can and should be looked after, then follow the doctor's and dentist's advice and have them corrected, if possible before you enroll him in school.

It's likely that your child has already been immunized against certain of the childhood diseases such as diphtheria, whooping cough and smallpox. If not, have it done immediately either by your doctor or by the local health clinic. If all immunizations have been done previously, make sure your child gets the necessary booster dose.

Insist on your child's getting regular and sufficient hours of sleep to help him enjoy school. He needs ten to twelve hours of sleep in a quiet, darkened room with an open window to build up his energy and offset his tiredness.

Proper nutrition is very important. When school starts, allow enough time for a wholesome breakfast. A good breakfast includes citrus fruit or juice, milk, whole grain cereal or bread, eggs or bacon or both.

Lunch and dinner should be a leisurely meal. The new adventure of school is a pretty fast pace, but mealtime offers an opportunity for the family to pause and relax together.

Also, nearly every school district in Texas requires proof-of-age for first year students in the form of a certificate of birth.

You may obtain a copy by sending a dollar and a half plus the name of the child, the date of birth, the place of birth, and both the father's and mother's names to the Records and Statistics Section, Texas State Department of Health, 410 East 5th St., Austin, Texas. (A weekly feature from Health Education Division, Texas State Department of Health).

At Home In Palmer County

By CRICKET B. TAYLOR
County HD Agent

4-H Information:

A total of 48 girls turned in record books for judging last month. This means that each one who turned in a record book will receive a year pin for 1965 at the county 4-H achievement banquet. Those girls who entered the various awards events in the county and scored in the upper 10% will be eligible for other awards provided by donors of 4-H awards.

A total of 74 girls started working in the clothing project groups. Out of this number 41 completed and participated in the county dress revue. Some girls fell by the wayside, others completed their work, modeled in the community groups, but failed to turn in their record books. This was true also of those in food projects. We hope this does not happen next year. We want each one to enter in county events and gain the experience of competing in project events. A record is evidence of the girls' project work and gives a chance for county awards and recognition.

CAMP AND VACATION TIME:

4-H camps and picnics have been the main activities in 4-H clubs this month. It will soon be time to start a new year in 4-H. We will be needing project leaders to train these girls and boys. Do you know that in Palmer County only three out of 10 youth under 18 are enrolled in or participate in any volunteer youth development programs for training citizenship, leadership and skills? Our modern day conveniences have taken away many opportunities for youth to learn responsibility. What better way can parents spend their time than

helping to preserve human resources than working in programs to train youth? We appreciate the adult leaders in the 4-H program. They spend much time and effort working with 4-H members, but there is need for more leaders.

FREEZING IRISH POTATOES:

There have been numerous requests for directions for freezing Irish Potatoes.

Preparation for freezing new potatoes:

Select potatoes the size of walnuts. Scrub well in cold water to remove skins, or wash and scrape. Preheat in boiling water five to eight minutes, depending on size.

COOLING: cool in cold running water five to eight minutes. Pack: pack dry with water in air-tight containers.

Preparation of French Fried Potatoes for Freezing: Use mature potatoes suitable for French frying. -- Wash, peel and cut in sticks, 1/4" square. --pre-heat sticks in boiling water for two minutes. -- Cooling: Cool in cold running water three minutes. -- pack dry, without water.

Another method for French fries:

Select potatoes suitable for French frying.-- Fry in deep fat to a light golden brown. Drain thoroughly on absorbent paper, cool to room temperature. -- Pack in moisture - vapor-proof frozen food containers.

Thawing and heating: Remove from package, place on baking sheet, reheat in hot oven (400 degrees) for five minutes.

This is potato digging time in the area. Many will want to preserve and use the small imperfect ones that are not suitable for marketing.

Lots of good eating in this 80 acre field of cantaloupes on the Wendol Christian farm. However, it seems that brother Troy Christian, who searches diligently for just one of the melons ripe enough to eat is destined to wait the allotted two weeks

for harvest before sampling the fruit. Estimates indicate that the field will produce a yield of 200 crates per acre, which is good or more than average yield.

Storage Space Use Can Date Your Home

The use of your storage space within the home can tell others how the building is, says Mrs. Elsie Short, Texas A&M University Extension home management specialist. Shelves that can be adjusted make the best possible use of available space, emphasize housing specialists at the U.S. Department of Agriculture. As a family's needs change members can simply change the shelf arrangement.

Besides adjustable shelves, step-shelves and other storage devices can make storage space more usable. Some of these devices can be found in hardware, variety or department stores.

Study your storage needs, then shop for the resources to up-date your storage, suggests Mrs. Short. There are sliding shelves of different widths on nylon rollers, which may be stacked; pull-out lid or pan storage; lazy susan shelves of various sizes which may be used separately or stacked depending on the space and needs. These devices make the storage in the corners and at the back of the cabinets more usable.

When planning for storage, these principles will assist you with decision-making: Store heavy equipment where it will be used. Store items used most often in easy-to-reach places. Let use determine storage placing of other equipment.

Health And Safety Tips

Is your family planning a summer automobile vacation trip soon? If so, it's time to make certain you have ready in the car first aid supplies and the necessary equipment for safety measures in case of an emergency, says Today's Health, the magazine of the American Medical Association.

Small commercial first aid kits are all right for minor scratches, bruises and sunburn. Additional supplies are needed to care for more serious injuries.

Here are some suggestions from Today's Health for supplies for your auto trip --

- Keep in your car a first aid guidebook, such as the AMA Manual.
- Be well supplied with wood splints, several 4x30 inches and several 3x14 inches, for use in fractures.
- Pack at least six triangular bandages, and a supply of large and small sterile dress-

sings for use in emergency treatment of wounds.

• A blanket is useful as a covering to keep an injured person warm, or in fashioning an improvised stretcher.

• Have a supply of note pads and pencils. Reports to the police and insurance companies must be made following an accident.

• File with the first aid supplies directions on what to do and specific information to be recorded in a traffic accident.

• Keep in your car a flashlight with new batteries, and warning flares or signals for use of car is stalled on the highway.

Self-Help Clothing Builds Child's Confidence

Self-help clothing for nursery-schoolers can do much to build a child's confidence, says Lynn Parks, Texas A&M University Extension consumer education specialist.

Proper clothes for tiny pupils need not be expensive or even "fashionable." They are clothes that a child can handle himself without having to ask

the teacher for help.

Easy-care, washable fabrics are important for the small fry. When little garments can be put through the washer and dryer quickly, mother needs to buy fewer of them, points out the specialist.

Self-help features that mothers might look for when clothes shopping or buying patterns to make garments for a child are elastic banding instead of buttons or buckles wherever logical, a few larger buttons and buttonholes instead of a dozen very tiny ones, and no complicated sashes on little girls' dresses which teach has to tie.

The self-help features will encourage the tiny pupils to take care of themselves, and will save considerable effort on the part of teachers and busy parents.

Women IN THE KNOW

By Jean Kinkead, Women's Consultant, The Travelers Insurance Companies

Home Vacations

One of the keys to leading a healthy—and a long—life is a real, annual vacation.

What is a vacation? Depending upon your point of view, it might be a family fishing trip to the wilds of Canada, or a plush second honeymoon in Paris.

Still, when finances or unavoidable conditions make a vacation away from home impossible, women in the know can arrange an altogether delightful vacation right at home!

There are two basic musts for home vacations: a complete change of routine and a temporary respite from responsibility.

There are all sorts of ways to change your routine. First, vary your eating habits. Have a late brunch and an early gourmet supper. Or, enjoy a meal a day at a restaurant and have fun discovering a different place each day.

Take up something entirely new during your vacation. Learn how to play tennis or golf or begin studying French. And, you'll have all the time in the world for that nearby summer theater, outdoor concerts and sporting events that you ordinarily just read about in the newspaper.

To lighten your responsibilities, hire temporary help to cook, clean, baby-sit and cut the grass. Export the small-fry to kind grandparents or make reciprocal agreements with good friends. If you're really brave, you won't even answer the telephone!

A backyard vacation will make you feel so refreshed and healthy that you'll want to keep up the system on all the lovely summer and Indian summer weekends to follow.

Have their hope set . . . on God, Who giveth us richly all things to enjoy. —(1 Tim. 6:17)

His will for us is abundant supply of all that we need to make life happy, secure and complete. God's supply is not limited to time or place. We need to know that God's law of increase is constantly active in our life and affairs, and we are richly and bountifully prospered.

The average American eats 44% more beef, 65% more chicken, 33% more cheese, and 23% more canned fruit than he did 15 years ago. He's cut down on wheat products 15%, fresh fruits 40%, eggs 18%, veal 49%, and pork 5%.

Recreation BRAHMAN NOT COWED BY POPCORN

When did you first hear the ancient cliché "All work and no play makes Jack a dull boy?"

Setting aside time for recreation is becoming increasingly important in leading a healthful and productive life.

For most people, the national result of modern conveniences and increased automation is a sedentary existence.

The National Recreation Association annually sponsors National Recreation Month each June to alert Americans to the need for wise use of leisure time. Special events of interest to all age groups are planned by recreation departments, civic groups, citizens' organizations and other recreation-minded agencies across the country.

Modern society has become what someone has called "flipped." The executive now works long hours instead of the laborer. Yet, like everyone else, physicians, executives, and other professional people need the refreshment that enjoyable recreation offers.

Leisure time can be used to regain a healthy balance of suitable physical activity and relaxation. Whether through a trip to the opera or an hour or two of quiet fishing, the ability to "lose oneself" in recreation provides personal fulfillment and relief from life's tensions.

Recreation is personal; to be satisfying, the hobbies and other activities chosen should be meaningful to the individual. What may be enjoyable to one person may be boring to another. Fortunately, a wide variety of opportunities is available and every person should be able to find some that bring satisfaction. Interesting family activities, another important but often missing part of modern life, can evolve from personal recreation interests.

Whatever a person may choose as hobbies, some physical recreation should be included daily. The health benefits from regular suitable physical activity, such as weight control, relief from stress, and a sense of well-being, are now well established. On the other hand, the potential ill-effects of prolonged inactivity, such as obesity, metabolic disorders, loss of movement capacity, cannot be considered helpful for enjoyable living.

The broad benefits attributed to recreation are not automatic outcomes. Every activity carries some risk, whether from the nature of the activity itself or from the demands on the participant. One national survey showed 18,000 disabling golf injuries in 1962. Most of these were sustained by persons struck by golf balls. However, heat prostration accounted for 10 per cent and over-exertion another 7 per cent of the total. These statistics should not cause a rush to the golf cart, which produced 7 per cent of the casualties. Rather, golfers, should respect the safeguards that judgment and conditioning will offer.

To capitalize on recreational opportunities:

- (1) Learn your capabilities and limitations through periodic medical examinations, and plan your activities accordingly.
- (2) Practice habits of healthful living faithfully in order to have the ability to do effectively the things you must and want to do.
- (3) Understand the risks involved in your activities of choice and the preventive measures to be followed.

READY FOR SALTY STATE FAIR — At last year's State Fair of Texas, this Brahman found something better than a saltlick; a hole with some salt, but the salt was popcorn. Undaunted and un-cowed, the Brahman won — everybody knows that eating popcorn is part of "going to the fair." The 1965 State Fair of Texas will run October 9 through 24 in Dallas, with the internationally significant Pan-American Livestock Exposition the major attraction of the first nine days. The Pan-American will feature the Premier Angus Show of the Americas, along with excellent shows of Hereford, Brahman, Brangus, Charolais, Santa Gertrudis and Shorthorn cattle. During the exposition, a superior dairy show also will be presented, with the Regional Holstein Show, State Jersey Show, and shows for Ayrshire, Brown Swiss and Guernsey cattle. In addition, there will be shows for purebred swine, sheep and goats.

Plums For Everyone

Plum upside-down cake for dessert — halves of plums stuffed with cream cheese for appetizers — plums for out-of-hand snacks. Plums can easily fill these and many other uses in the coming weeks.

- They're in abundant supply
- They come in a variety of colors, flavors, shapes, and sizes.
- They're convenient to use.
- They're an apt candidate for specials in coming weeks.

Plum production has been expanding — more trees and more varieties — in recent years. The 1965 crop is the third in a row in which the harvest has been abundant — more than a third above average. Plums are marketed fresh mainly — only about 10% go to the processors. They move largely from tree to market. Plums have a relatively short storage life.

Plum varieties change almost weekly at the market place:

- **Santa Rosas**, often referred to as the "Queen of Plums," come to market early and stay late due to early, regular, and late strains, and locations of orchards. More than one third of California's plum production is Santa Rosa. The conical shaped fruits have a purplish crimson skin. The flesh is yellow to dark red near the skin. A rich, pleasing tart flavor and juicy texture make the Santa Rosa a favorite for serving and for jellies and jams.
- **Nubianas**, one of the newer varieties in local markets, have colorful black-red skins, light amber, and firm flesh, and good flavor. They're excellent shippers.
- **Larodas**, also a new variety are large plums of attractive medium red over yellow skins, yellow flesh, and good flavor.
- **Mariposas** are in light production. Red-fleshed, nearly round in shape, they have a red skin with a heavy cover of gray bloom which becomes a dark red-purple as the fruit ripens.
- **Tragedys** are medium in size, oval shaped, have a dark blue-purple skin and yellow-green, firm flesh. They are sweet and well-flavored.
- **Elephant Hearts**, large, red-fleshed, freestone plums, excellent for dessert or snacks. Limited in supply.
- **Queen Anns** will come to market later in July. These have a deep mahogany skin and light amber flesh that, when fully ripe, is rich and honey-like in flavor. They are good shippers, store longer than most.
- **Kelseys**, good shippers, Kelsey plums are often called "green" though they ripen to a yellow splashed with red. An excellent dessert plum.
- **Presidents**, These dark purple plums are very colorful in salads and on a fruit plate. Large, firm-fleshed, and good flavored, they are good shippers.
- **Standards** help close the plum season, starting to market in mid-August. Dark blue skins, yellow fleshed, medium-sized, they are excellent for fresh eating, cooking, and canning.

Select plums that are well formed, clean, well-colored for the variety, free of decay, broken skins, growth cracks, and hail damage. A ripe plum yields to gentle pressure when given by the palms of the hands.

Plum puree is an excellent topping for ice cream, puddings, cake, waffles, and pancakes.

Plum Puree
Select fully ripe fruit. Wash, cut from the pits. Add 1 cup water for each 4 pounds of

fruit. Bring to a boil, cook for 2 minutes; cool and press through a sieve or food mill. Depending on the tartness of the fruit, add 1/2 to 1 cup of sugar for each quart of puree. Store, covered, in the refrigerator until ready to use. To freeze: Turn into containers, leaving 1/2 inch head-space. Cover tightly, label, and freeze.

Plum Ambrosia
Oranges
Plums
Honey
Flaked coconut
Sour Cream

Peel and slice oranges. Wash plums, cut in quarters and remove pits. In your best clear glass bowl arrange alternate layers of orange slices and plum quarters, topping the plums with a drizzle of honey and a sprinkle of coconut. Serve chilled with a dollop of sour cream on each serving.

Hot Plum Cake
Put a layer of fresh plum quarters in a well-greased baking dish. Add yellow cake batter. Baking according to cake instructions. Then serve cake warm with a whipped cream accent.

Nearsightedness

The nearsighted or myopic eye is usually longer than the average normal eyeball. Rays of light from a distant object focus in front of the retina, or seeing coat inside the eye, instead of on it. Vision for near objects is clear but distant objects are blurred.

There is no cure for nearsightedness usually increases during the most active growing period because the eyes also grow larger. After full growth is attained there is usually further reduction in vision for distance.

Today's Health, the magazine of the American Medical Association, says that activities that are good for the normally sighted child are good for the healthy myopic child — plenty of fresh air, routine play and exercise to the point of normal fatigue working in well-lighted rooms and eating a sound diet.

Some cases of myopia are seriously progressive and may be associated with disease. Fortunately, seriously progressive nearsightedness is now rare in the United States.

Myopia is corrected with concave lenses. These glasses are thin in the center and thick at the edges, causing the rays of light which focus in front of the retina to diverge and stroke the retina, thus making the image clear. In middle or old age nearsightedness may improve slightly because the eye usually becomes a little more farsighted. Rarely does this change make a nearsighted eye normal.

A frequent change of prescription for glasses usually is necessary for nearsighted persons until about the age of 25. It is important for nearsighted individuals to have annual eye examinations.

With the approach of another school term in the fall, eye examinations for the family are important. Many children are nearsighted without realizing it. Sometimes the defect is first discovered by a teacher who finds that the pupil cannot read the blackboard.

See your eye doctor (ophthalmologist) or if you do not know an eye specialist, ask your family doctor for a recommendation.

Questions And Answers On Rural Civil Defense

Q. What areas of Texas are safe from atomic fallout?

A. None. Fallout from a nuclear explosion, accidental or enemy, could be dangerous in any area of Texas from El Paso to the Louisiana border and from the Panhandle to the Rio Grande Valley.

Q. What determines the fallout area?

A. There is no simple answer to this question because of the many variables such as size of weapon, materials used, wind and weather conditions, height of explosion, terrain, etc.

Q. How does size of bomb affect fallout area?

A. It is believed that the height of the explosion, wind and weather conditions, and other factors may have more effect on the size of the fallout area than the size of the weapon. However, size certainly is an important variable.

Q. What are the effects of a nuclear explosion?

A. They are heat, blast, and fallout. Fallout contains the radiation that we need to protect ourselves from. Planning and preparation will give us the tools to do the job.

Q. What does fallout look like?

A. Larger fallout particles near the blast might look like sand or ashes. Further downwind it would be like pepper or just dust.

Q. How can I tell if dust is radioactive?

A. You can't see, feel, hear,

taste or smell radiation. Geiger counters or other monitoring devices are necessary to detect and measure radiation.

Seems to me there's been an unusual amount of discussion recently about college educations. Not only the rising costs, but the lack of facilities to meet the needs of increasing numbers of youngsters who want to go.

Some time ago the Treasury Department printed a leaflet on how to save for a college education through regular purchase of United States Savings Bonds. A main point was that the Federal income tax due on the interest that accumulates can be reduced — or even wiped out entirely in most cases — by having the bonds issued in the child's name. Then a special income tax return is filed for the child, reporting the first year's interest as income. Since the interest will be well under \$900 in most cases, the tax liability will be satisfied without paying anything.

Now another question has come up. Can the parent's old bonds be transferred to the child, and accomplish the same thing? The answer is "Yes", it can be done, BUT the parent must pay tax on accumulated interest up to that point; and the child is responsible from then on.

And, remember, SAVE ALL TAX RETURNS as proof of intention.

"Step on the gas—or I'll be late for my sewing club."

And, remember, SAVE ALL TAX RETURNS as proof of intention.
