Plans Made To Rid Possum Kingdom Of Rough Fish

Plans for a selective kill of rough fish on Possum Kingdom Lake late this summer are progressing as rapidly as possible, it has been announced by the Director of Inland Fisheries of the Game and Fish Commission.

A biologist has been working there for a week with a recording fatometer to ascertain the depth of various areas. With this information, it will be possible to make experimental treatments. This will determine the amount of chemicals necessary to knock out the noxious fish, such as carp and buffalo.

The possibility of applying the chemical treatment to the lake from planes by experienced crop dusters also is being considered. Kenneth Jurgens, Aquatic Biologist, has been conferring with crop dusters who say they can do the job cheaper and more effective than can be done from power-equipped sprays on fast boats.

The Possum Kingdom treatment will be the largest ever attempted. A careful survey is being made of all details of the treatment program to make it most effective in eliminating the over supply of rough fish.

Yarborough Wants Letters On Tax Cut

U. S. Senator Ralph Yarborough today urged all Texans who believe a federal income tax reduction is needed to help end the recession to write his Washington office.

Senator Yarborough's request for an "expression from the people on this serious question" came after the Council of State-Chamber of Commerce had also asked for "a public outpouring of letters" on the subject.

A move by Senator Yarborough to cut income taxes for all Americans by raising exemptions from \$600 to \$800 to help end recession was defeated in the Senate at mid-March.

"Since that time, several economists and many individuals have told me that they strongly favor the tax reduction I am urging. I think if we are to have a tax cut, it should be a cut for all of the people and not another tax cut for a privileged few."

coming in cycles of two blasts with an interval of silence, then another two blasts will be heard. This procedure to be repeated five times will be used to alert the people that unfavorable weather conditions exist. No type of all-clear signal will be given. It will be up to the individual to decide when the danger is over.

There are 20 observation posts in the Merkel area that extends about 15 miles northwest and south and six miles to the east. Weather conditions from these posts are phoned in to the local control station which is also connected with the weather bureau in Abilene.

Waymon Adcock is in charge of the control center.

In a telegram directed to all Little Leagues Dwight D. Eisenhower, President of the United States, said "Little League baseball provides many opportunities to develop the principles of health, teamwork, and fair play. At the beginning of the 1958 season, it is a pleasure to send greeting to all 'Little Leaguers' everywhere and wish for them a happy period of participation in one of our great American sports."

Ray was found by his brother, Wayne, and Deputy Sheriff Raymond Spraberry. A verdict of suicide was returned by Justice of the Peace, Joe Mathis. Spraberry said Ray evidently attached a vacuum cleaner hose to the exhaust pipe of his car.

Mr. Ray formerly lived in Merkel and was employed at Bragg's Dry Goods. At the time of his death he was employed in the men's department of Thornton's Oak St. store in Abilene.

Funeral was held at 4 p.m. Sunday at the First Baptist Church in Anson. Burial was in Fairview Cemetery.

AIR zoning, in addition to land zoning, may be essential for American cities of the future.

This is the conclusion of Dr. Francois N. Frenkel, of the Applied Physics Laboratory of Johns Hopkins University, in a report published by the Smithsonian Institution.

Air pollution from factory smokestacks, automobile exhausts, smoke from bonfires and chimneys, and various other sources Dr. Frenkel points out, each year is causing deaths of a large but undetermined number of persons. Statistics are difficult to compile. It is estimated, however, that at least 4,000 died in London during the intense "smog" of the winter of 1952. This smog contained large concentrations of poisonous sulfur dioxide which probably was responsible, directly or indirectly, for most of the fatalities. This particular case was closely associated with peculiar local meteorological conditions and perhaps never will be duplicated.

There can be little question, however, that the air pollution problem for large cities is becoming more serious year by year. Much can be done to modify conditions. Many large industries in many places have largely eliminated the danger from their smokestacks, but only by quite expensive methods which probably would be beyond the means of individuals.

The only ultimate answer, Dr. Frenkel believes, is "air zoning" applied to both city extensions and clearance projects. Land zoning now is an established practice to prevent deterioration of residential neighborhoods, the growth of slums, etc.

Zoning air above communities, however, would be a much more difficult problem, involving knowledge of the possible sources of pollution, local geographic and weather conditions, chemical changes of pollutants in the atmosphere, necessity for applying purification methods, and several other factors.

More and more, the automobile exhaust is looming as a major offender. Most of the concentration takes place at points where there are necessary stops and many cars pour out their fumes simultaneously. One phase of air zoning may be to rearrange traffic patterns to eliminate as many such points as possible. It would be necessary, in planning for future expansion, to give careful consideration to location and limits of all industrial areas.

"Urban areas," states Dr. Frenkel, "must face the problem of reducing the degree of contamination without at the same time seriously affecting many of those human activities that are responsible for the contamination and which, as much as the clean air, are necessary to the population."

Get Out Those Golf Clubs -- Country Club Nears Completion

Construction on Merkel's new country club is nearing completion and opening of the club house is expected to be sometime during the first part of July, according to Nathan Wood, owner.

Mr. Wood said the club's nine hole golf course should be in condition by August 1.

The air conditioned club house, located one mile north of town, has large locker rooms with showers for both men and women golfers, and a 50x25 ft. club room complete with woodburning fireplace, TV set and snack bar. A complete kitchen will be added in the near future.

Interior walls of the building are of rock with the ceiling finished in pink tectone. Floors are red concrete and red trim is used throughout the building. Picture windows along the northeast wall of the club room, adorned with sunken planter boxes, will look out on a circular patio. Furniture has not been definitely decided on but will probably be wrought iron, Mr. Wood said. Drapes will be of matchstick bamboo.

Exterior of the building which is in modernistic design in trim-

med in red and will be flanked by a red shadow box fence. Shrubs and flowers will be planted in the center of the circular driveway featured at the front of the building.

The club is a private enterprise owned by Nathan Wood and his son, Don. They are offering memberships at a discount before the opening.

The Wheeler children had been using the trailer which belongs to a son who is overseas, to sleep in but the family had gone to Abilene and no one was in it at the time it was blown over.

When the Wheelers returned home about 6 p.m. they found the trailer overturned and about 30 feet from where it originally stood.

YEAR 'ROUND AIR CONDITIONER**

Scientists have known for years that enough natural heat exists in outdoor air, even in the coldest weather, to heat every home in the world. If this heat could be extracted . . . concentrated . . . and brought indoors — what a solution to everyone's heating problem!

But that's just what a summer air conditioner does . . . in reverse. It extracts and concentrates indoor heat and moves it outdoors.

The All Electric Heat Pump Air Conditioner is an air conditioner that can reverse itself automatically to cool or heat as needed to maintain indoor comfort at an even level. An improved reverse-cycle valve, sensitive to indoor temperature changes of even a few degrees, switches from cooling to heating and back again automatically . . . to maintain the comfort level at which you set the thermostat.

COMPLETELY AUTOMATIC

The Electric Heat Pump is completely automatic. During changeable weather, even if it is within the hour, the Heat Pump will switch from heating to cooling and or back again as the temperature changes require.

You do not need to change the temperature dial, you just set the thermostat for the temperature you desire and forget it. The Electric Heat Pump is the ONLY completely automatic Air Conditioner.

Low-Calorie Iced Tea Punch A Delight to Diet-Minded Guests

There's nothing more discouraging than to spend hours preparing refreshments for company—only to find that practically all of them are on a diet—or counting calories!

One way to beat the problem, and the heat as well, is to serve a low-calorie iced tea punch with fresh fruit. Fix a big platter of fresh fruit cut in bite size pieces such as oranges, fresh pineapple, and peaches, plus fresh berries.

Those who are not diet-minded will enjoy the chilled fresh fruit, dipped in honey, then shredded coconut!

To make an iced tea fruit punch, to serve 25-30 people, bring 4 cups of cold, fresh water to a full rolling boil. Add 1/2 cup loose tea. Brew, uncovered, five minutes. Stir and strain. Add either liquid or tablet non-caloric sweetener to taste. Pour into a gallon jar. Add 1 cup lemon juice, 2 cups orange juice, 2 quarts ice water, 1 lemon

thinly sliced, 1 orange, thinly sliced, 1 cup sliced strawberries and a few crushed mint leaves. When ready to serve, pour over ice cubes or circles in punch bowl.

It's a good idea to remember that iced tea leads in low-calorie beverages, when you choose a summer beverage for your family. Unsweetened or sweetened with a non-caloric sweetener, iced tea contains only 4 calories per six ounce serving. What's more, iced tea is a real thirst-quencher—doesn't leave you thirsty because it doesn't have a sweet, cloying after-taste. Another good thing to remember about iced tea is that it's just about the most economical beverage you can serve.

UP THE CANYON

By TOM RUSSOM

Well so far the Canyon has missed the stormy weather and big rains. Row crops need rain while small grain is needing to be harvested. Wheat, oats and barley are yielding a bumper crop. Syria Swinney is recovering after having undergone surgery.

Harry Riney who spent several days last week in the Sadler Clinic is now at home.

R. E. Clemmer Jr., is a patient in the Hendrick Memorial Hospital, Abilene.

We talked with some good former Canyonites, Mr. and Mrs. Joe Weston and Rev. and Mrs. Lynward Harrison who are at the bedside of their mother, Mrs. W. M. Weston, a patient in Sadler Hospital.

Mr. and Mrs. Allen King Sr., and children have returned from a week's vacation with their son, Allen Jr., in Utah.

Rev. E. H. Martin, appointed by Northwest Texas Conference as pastor of the Pioneer Methodist Church brought an inspiring message Sunday morning. He with Mrs. Martin urges everyone to take advantage of the opportunity to worship and invite all visitors to feel welcome to attend.

Rev. Martin will also have charge of the Butman youth camp activities. This week there are 80 intermediates at the camp. Two of Mrs. Will Butman's sisters, Bobby and Jackie, are visiting here from California.

Excessive Speed Main Cause Of Fatal Accidents

"Excessive speed was the principal cause-factor in 57 percent of every rural fatal traffic accident, in Texas, during 1957."

J. O. Musick, general manager of the Texas Safety Association, stated this fact today as he sought public support for the Slow Down and Live program being conducted throughout the state between

new and Labor Day.

"Excessive speed does not necessarily mean violating a speed law," Musick said. "But, is driving at any speed which is too fast for conditions—such as may exist because of heavy traffic, rain storms, fogging, with a mechanically poor car, etc."

The safety expert said that one of the objectives of the Slow Down and Live campaign is to encourage people to maintain an even and prudent speed that will reduce congestion and danger by an even flow of traffic.

He said that this calls for the elimination of any speed—too fast or too slow—that disrupts the orderly movement of traffic.

"It is imperative that the public realize the dangers of improper speed, understand the speed laws, the meaning of speed signs and, above all, how to adjust their speeds to conditions of driver, vehicle, weather and roadway," Musick said. "A bit of common sense goes a long way in traffic safety. Every driver in the road must accept his responsibility and remember to drive safely."

STATE CAPITOL

By Vern Sanford
Texas Press Association

AUSTIN, Tex.—Texas Board for State Hospitals and Special Schools is working toward getting a gold star when an economy-minded Legislature hits Austin next year.

Launching a new tight-purse policy, the Board voted to prohibit superintendents of individual state institutions from (1) using leftover funds without Board permission and (2) making any expenditure of more than \$1,000 without Board approval.

Sometimes individual hospitals develop surplus funds resulting from smaller patient loads than had been expected, or other reduced costs. These lapsed funds could amount to as much as one million dollars, according to Board Member W. G. Kirklind of Odessa.

CHILL WIND — Hospital Board's move pinpointed the spot where the state's money shortage is expected to pinch hardest — administration of state's services.

A revenue shortage in excess of \$100,000,000 by next year has been freely predicted by various authorities for months.

A survey of the platforms of legislative candidates over the state shows a fairly consistent approach by those making statements on the revenue dilemma. General pattern of promises to voters:

(1) Continuation or, often, increase in state obligations for education, welfare payments, road building, soil and water conservation, etc.

(2) Opposition to certain new taxes or sometimes new taxes in general.

(3) Cuts in state spending by "elimination of waste, duplication and needless services by state agencies."

Actual achievement or near-achievement of this fiscal magic will put a real squeeze on every state department.

NOT ME—Likelihood that someone may draw the "black bean" of new state taxes has group after group telling the State Tax Study Commission how overburdened they are already.

A spokesman for the Texas Motor Bus Association told the Commission taxes on that industry are heavy and discriminatory. He said many smaller lines were having to go out of business.

A representative of retired people asked tax relief for people living on pensions.

"We are no longer concerned with saving the goose that lays the golden eggs. Our goose was cooked when we lost our ability to work and earn," said W. B. Wood of Port Arthur.

On behalf of the Texas Association for Tax Relief for Texans over 65, Wood asked for tax exemptions for the first \$3,000 of property owned by oldsters. He also opposed a sales tax.

Discrimination is charged because the law applies to wholesalers but not to producers who sell only the output of their own flocks. Suit also objects to the provision that makes violations a criminal offense and the requirement that eggs kept under refrigeration for 30 days or more be labeled "cold storage eggs."

REPUBLICAN — Texas Supreme Court is considering the question of whether a former Democratic candidate is entitled to a position on the Republican primary ballot.

Grover Cantrell, Dallas labor leader and onetime Democratic candidate for the Legislature attempted to file against Texas' only Republican congressman, Bruce Alger. He called himself a "Stevenson Republican," an apparent parody of Eisenhower Democrats.

A lower court ruled that Cantrell, as a member of one party,

was not entitled to seek nomination in another party's primary. Cantrell appealed to the high court.

Since there is usually only one nominee for each office, Republican primaries do not ordinarily attract a heavy vote. It is widely assumed that many Republicans cross party lines to vote in Democratic primaries where most state offices are decided.

Cantrell's candidacy is generally interpreted as a move to force Republicans to stay in their own primary.

DIESEL TAX CHANGE — Proposed revisions in the diesel fuel tax law are being planned by the State Comptroller's Department.

Next Legislature will be asked to change the law so diesel fuel taxes would be collected from the wholesale distributor rather than the user, said a Department official. This is expected to make it easier for tax agents to keep track of consumption and purchases.

Comptroller's Department staffers admit that there are some evasions of the state motor fuels tax, but contend that Texas collects more per vehicle than any other major state. They discount as too large Sen. Charles Herring's guess that some \$25,000,000 in fuel taxes went uncollected.

Senate investigating committee looked into records in the Houston area to discover if small staffs, vague laws or insufficient penalties were causing the state to lose revenue.

OVER THE HUMP — Texas' general revenue fund is back in the black, according to State Comptroller Robert Calvert.

During the spring, state expenditures got ahead of tax receipts. A month ago the fund was in the red by some \$1,250,000. But collections of corporation franchise taxes and insurance company occupation taxes during the month

put finances back on schedule. Now there's more than \$12,000,000 in the fund, said Calvert.

THINNING RANKS — Withdrawal of Joe Booker of Orange reduced to four the number in the governor's race. Alvis Vandygriff, Austin attorney, dropped out earlier.

Still opposing Gov. Price Daniel are W. Lee O'Daniel, State Sen. Henry B. Gonzalez and Joe Irwin of Dallas.

Nancy Vaughn of Rogers, Arkansas, is visiting her grandparents, Mr. and Mrs. D. H. Vaughn and relatives in Abilene.

Mrs. Lee Harris of Levelland is spending this week in the Ligo Harris home.

Pat and Stanley Harris are attending intermediate camp at Pioneer Memorial camp grounds this week.

Edward Denman Weds Lead Girl

Blue carnations and white gladioli graced the altar of Bethel Lutheran Church, Lead, for the recent double ring ceremony which united in marriage Roma Betty Burns and Pfc. Edward Milton Denman. Mr. and Mrs. Robert M. Burns of Lead are the parents of the bride, and the groom is the son of Mr. and Mrs. George Denman of Merkel.

Rev. Paul B. Pierson was the officiating clergyman. Traditional wedding music was played by the organist, Mrs. Mary Anne Beeber, who also accompanied Dixie Helmer as she sang "O Perfect Love" and "The Lord's Prayer."

Given in marriage by her father, the bride wore a beige lace sheath gown with tiny flowered hat to match and carried a bouquet of ivory roses tied with blue and beige ribbons. Her sister, Carole Burns, was maid of honor, attired in a sheath dress of blue and white, and carrying a bouquet like that of the bride.

Best man was Wayne D. Mahoney of Fort Pierre, and ushers were the bride's brothers, Robert D. and John D. Burns of Lead.

The social rooms of the church were the scene of the wedding reception.

As she departed with her husband for a Black Hills honeymoon, the new Mrs. Denman wore an orange sheath dress. She attended Lead High School. Her husband attended Merkel High School and is presently serving with the 531st AAA Missile Bn., Ellsworth Air Force Base. They will make their home at 931 1/2 Main St., Rapid City.

Mr. and Mrs. Frank Breaux and Janie are on a vacation trip to Carlsbad, N. M. and Midland, Texas, where they will visit their son and brother, Mr. and Mrs. Eddie Breaux. They will also go to Las Vegas, N. M. where Janie will remain for the summer at the Blue Haven Youth camp.

Mrs. Helen Robertson of Charleston, W. Virginia was a recent guest of her cousin, Mr. and Mrs. O. E. Harwell.

Wilma Smith of Abilene spent the weekend with her grandparents, Mr. and Mrs. Ford Smith, Sr.
