Bovina, Texas

VOL. IX, NO. 48

WHITTLIN'

BY DOLPH MOTEN

Somebody once said about this country, no doubt, that all it needed was more water and better people.

If these half-inch rains, like Sunday night's, will continue on a steady basis as they have the past month or so, we'll have the "more water" and all we'll have to do is to have a perfect area to sit back and wait for that "better class of people."

Milt Fitts, Bovina High's basketball coach and assistant football coach, received some highly favorable publicity last week in a sports column which appeared in The Amarillo Daily News and was written by Sam Payne.

The part of the column which was especially interesting here had to do with Milt's younger brother, Mickey, who lettered on the West Texas State University basketball squad this past season.

Here's a part of what Payne wrote:

"Mickey (Fitts) should help the Buffs a great deal next year. The name Fitts is already a legend at Canyon since the days of Junior Fitts (that's Bovina's Milt), one of the greatest basketball players in the school's history."

Sports popularity can be extremely short-lived and we think it's still another feather in Milt's cap that he is still so well thought of since being out of school for these past few years.

Another WT basketball great has a sister who lives here. He's Price Brookfield, who played several years earlier for the Buffs. His sister is Mrs. Earl (Mary) Richards. Their original home was Friona.

Like Fitts, Brookfield is also a basketball coach. We understand that he tutors in the mid-West.

Fitts is enjoying success as a coach, too. His Fillies' basketball team won district honors back during last season, you'll remember, during his first year here. And it was his first year to coach girls' basketball, too.

Readers of area newspapers have noticed that the Bovina home of the A. M. Wilsons has been featured in regional advertising of Southwestern Public Service Company during the past month.

The advertisement points that the Wilson house is a "total electric home" and features pictures of all four members of the family.

We long ago noticed the personal-type advertising which SWPS uses and wondered when and if a Bovina home would make it. We're proud that it did.

Such publicity is good for our community, we think.

Well, we moved The Blade office last week to Second Street and Avenue A. And moving isn't a bit easier than it was the last time we moved, some five years ago. But it could have been worse. We've been moved just less than a week now and already we are beginning to find some of the things we moved.

We're about as systematic about moving as a whirlwind would be and that makes things extremely hard to find when you get relocated, we've decided.

We want to take this opportunity to invite both our friends and all our patrons to come by and inspect The Blade's new quarters. No plans have been made to have a special day for inspection of the new offices and we're not figuring to serve free coffee and Spudnuts.

That is, we're not if enough of you will come by without us extending that offer. So come on by -- we want you to see the place!

The remodeled place we have now give us a lot more room and we like it up to now. We may not like it so well when we find all the things we need to work with and have to go back to work.

A month or so ago, we were complaining about the tremendous number of activities which seem to get scheduled

(Continued on page 6)

AT BOVINA, OKLAHOMA LANE--

New Methodist Pastors Named

Methodist Churches at Bovina and Oklahoma Lane have new pastors beginning their duties this week.

The pastoral assignments were made at 56th annual meet-

More Rain Here

Another in a series of farmer-pleasing rains fell here Sunday evening.

Approximately half an inch of moisture was measured here with the amount increasing to as high as 1.2 inches southeast of town.

The rain fell slowly and caused little or no damage. Some wheat was blown down by winds which accompanied the rain. The wind blew the wheat over after the wheat had become heavy and wet from the rain.

All of it is expected to straighten back up and suffer no ill effects, however.

The moisture halted farming operations through part of Monday.

Visiting in the home of Mr. and Mrs. Travis Lloyd over the weekend were their son and family, Mr. and Mrs. Donald Lloyd, Mike and Pam of Canyon. They also visited in the home of her parents, Mr. and Mrs. R. B. Downs.

FAVORED TEAMS ESTABLISHED--

First Week Complete In Baseball Program

Bovina Gin-Generalgas is in a commanding lead in Little League play here with an undefeated, 3-0 record through Monday night's games.

The Gin-Gen team, coached by Wayne Spears, settled all first place disputes for the time being Monday night with an easy, 17-7, win over First National Bank-Lawlis Gin, which also has a perfect 2-0 record going into the game. The tilt was stopped at end of four innings because of 10-run rule.

Tied for the cellar slot (through Monday night and not counting Tuesday's action) are Bovina Wheat Growers-Bovina Insurance and Oklahoma Lane. They each have 0-2 marks.

Cicero Smith has established himself as the team to beat in pee-wee competition with a 3-0 mark, picking up wins over all three of the other teams in the four-team league.

Oklahoma Lane pee-wees are in second with a 1-1 mark. Suddeth's Giants and Bovina-Blade-Bovina Welding are both

winless through the first week of play.

Play in the Pony League, which is made up of four Friona teams, two from Bovina and one from Oklahoma Lane, began this week.

First game involving Bovina teams will be played here Friday night between Bovina Jaycees (Oklahoma Lane) and Sherry Grain. The game is sched-

uled for 7:30 p.m. at the Friona stadium.

(Continued on page 6)

FOR 30 STUDENTS--

Project Head Start Begins Here Monday

Monday is the launching date for Project Head Start in Bovina.

The program, financed primarily by the federal government, will consist of a 40-school day program for some 30 Bovina youngsters who will

be first graders here this fall. Mrs. Charles Corn, high school math and language teacher, and Mrs. Vernon Estes, elementary teacher, will be instructors for the program. This week they are attending a workshop in regard to it at Southern

Methodist University in Dallas. Children in the course are asked to report to the school Monday at 8 a. m. Transportation will be arranged at that time to deliver the children who live out of town to their homes that afternoon.

Bulk of the funds for the project will be provided by a federal grant in the amount of \$5,260 from the Office of Economic Opportunity. It is a part of President Johnson's war on

poverty. Two meals, breakfast and lunch, will be provided for the children in the cafeteria. Mrs. Helen Wassom and Mrs. J. G. Eubanks will operate the cafeteria.

Gary Cox, grade school principal, will supervise the program and will be one of the bus drivers. Other bus drivers are yet to be named says Superintendent Otis Spears.

(Continued on page 6)

TO REPLACE OLD ONE--

Charles Plans New Station

Construction on a new service station for Bovina is scheduled to get underway this week.

Announcement of the new building, which will replace a station building at the intersection of Third Street and Highway 60, was made by Harry J. Charles, Phillips 66 jobber here. He will own the new building.

The new station building will be built behind and to the right

of the present structure. Business at the old station will not be interrupted while the new one is being built, Charles says.

When the new building, which will be of metal construction and 30 by 50 feet in size, is finished, the old building will be torn down and moved away.

Contractor for the new station will be D.L. Gilmore of Starcraft Steel Buildings of

(Continued on page 6)

ERRANT DRIVING RESULTS --- Damages caused by a pair of minor driving mishaps are on display in Bovina. At left, City Employee Andy Gara and Mayor Boyd Gilreath are shown by a bubbling fire hydrant which was knocked loose from its pipe Monday afternoon by a trailer truck which was delivering

materials to the new fire station-city warehouse which is across the street from the damaged hydrant on west Main Street. At right is a kayoed school crossing sign which was damaged Friday afternoon by a trailer load of irrigation pipe which came loose from the truck which was pulling it down Third Street.

THIS WEEK--

Methodist VCS Enrolls 75

Vacation Church School at Bovina Methodist Church enrolled 75 workers and children Monday afternoon, according to Mrs. J. T. Hammonds, principal of the school.

Mrs. Hammonds says they expect more to enroll due to the fact that Monday was a holiday.

Methodist young people are assisting with classes and helping direct recreation activities.

Highlighting the school will be a sharing program Sunday evening at 7 p.m. at the Church. Parents are invited to share

with their children what they learned in Church School, says Mrs. Hammonds.

Immediately following the program refreshments will be served in fellowship hall of the church.

About 100 Work At Cemetery

Annual working of Bovina Cemetery was Saturday with approximately 100 people helping with beautification of the grounds.

Some of those who worked at the cemetery had a basket lunch at noon in fellowship hall of Bovina Church of Christ.

The cemetery working is an annual event. The basket lunch was added to the working a year ago. This was the second time for the lunch to be held in connection with it.

Billy Venable, who cares for the cemetery on a volunteer basis, had the cemetery ingood shape," according to a spokesman for the cemetery association and there wasn't a lot of additional work to be done. Most people had completed their work by noon Saturday.

Some 35 went to the church for the basket lunch.

Usually held on Memorial Day this year's cemetery working was on Saturday because Memorial Day was on Sunday.

Weather by Willie

We've still got more coming! It's not over yet.

---Willie

First and second graders look at a Bible Lecture at Methodist Vacation Church School. From left to right are April Wilson, Denise Clements, worker; Linda Ware, Mike Dixon, Bradley Owens and Arlene and Audrey Magness.

4-H Club Meets Mon.

Mrs. Cricket Taylor, home demonstration agent for Farmer County and Joe Van Zandt, county agricultural agent will present a program to members of 4-H Club Monday night, June 7, at a meeting at school cafeteria.

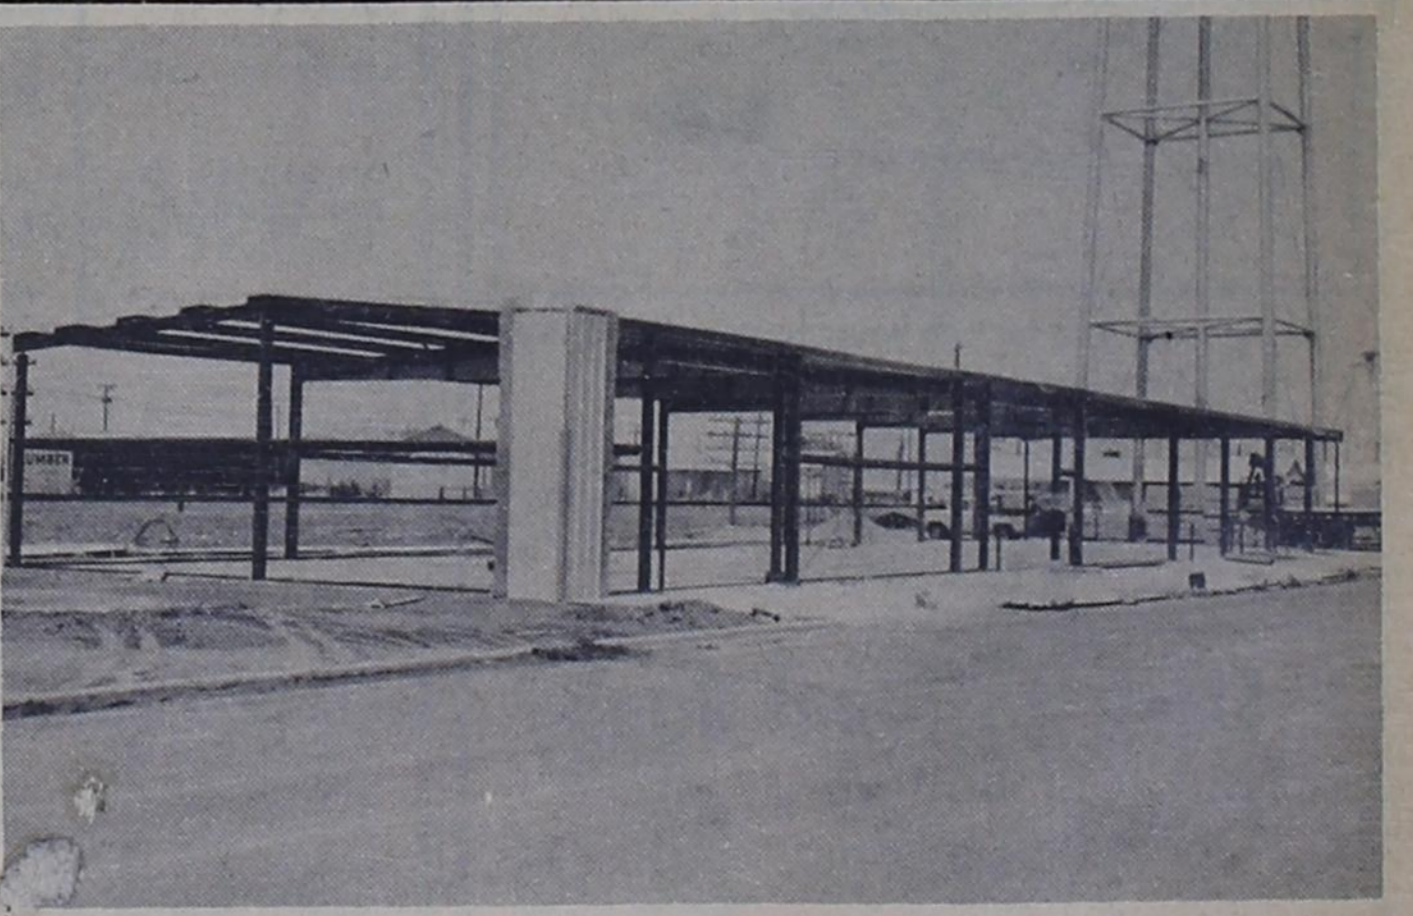

The meeting will begin at 7:30 p.m., according to Mrs. Earle Hise, a 4-H leader.

Rodriguez Boy Buried Saturday

Funeral services were conducted at Bovina Cemetery Saturday afternoon for Ernesto Rodriguez, one-year-old son of Mr. and Mrs. Uvaldo Rodriguez.

Fr. Claver Giblin, pastor of St. Ann's Catholic Church, conducted the services.

The infant was ill only a short time.

TAKING SHAPE --- The city's new building, which will be a combination fire station-warehouse is now taking shape and additional construction is expected to continue at a fast pace. The structure is located on west North Street near the city water tower which may be seen in the right background.

PARRISH HALL WORK --- Shown working on the foundation of St. Ann's new parrish hall which is now under construction are, left to right, S.A. Brito, Artemio Cano and George Cervantez. In the background is Antonio Gomez. The new hall is being built on St. Ann's property on Third Street.

AT HUB--

Gas Users To Meet Thursday

A meeting of Parmer County Irrigation Gas Users Association will be held next Thursday, June 10, at the Hub Community Center. The meeting will begin at 8 p. m.

The organization, which has had as its principal aim the securing of better and less expensive gas service for irrigation, will hear a report of farmers in the Black area who are to begin purchasing gas from Transwestern Gas Company.

The group, which formed a cooperative under the name of Plains Gas Farmers Cooperative, owns a total of 87 wells, and have requested that Pioneer Natural Gas Company, the present gas supplier for the entire area, cut off the service to their farms on June 15.

Also on the program, a report will be heard from the Tri-County Gas Co., Inc., a group of farmers from the southern portion of Parmer County, as well as parts of Bailey and Lamb counties, who are attempting to buy gas from El Paso Natural Gas Company, which has a line traversing their area.

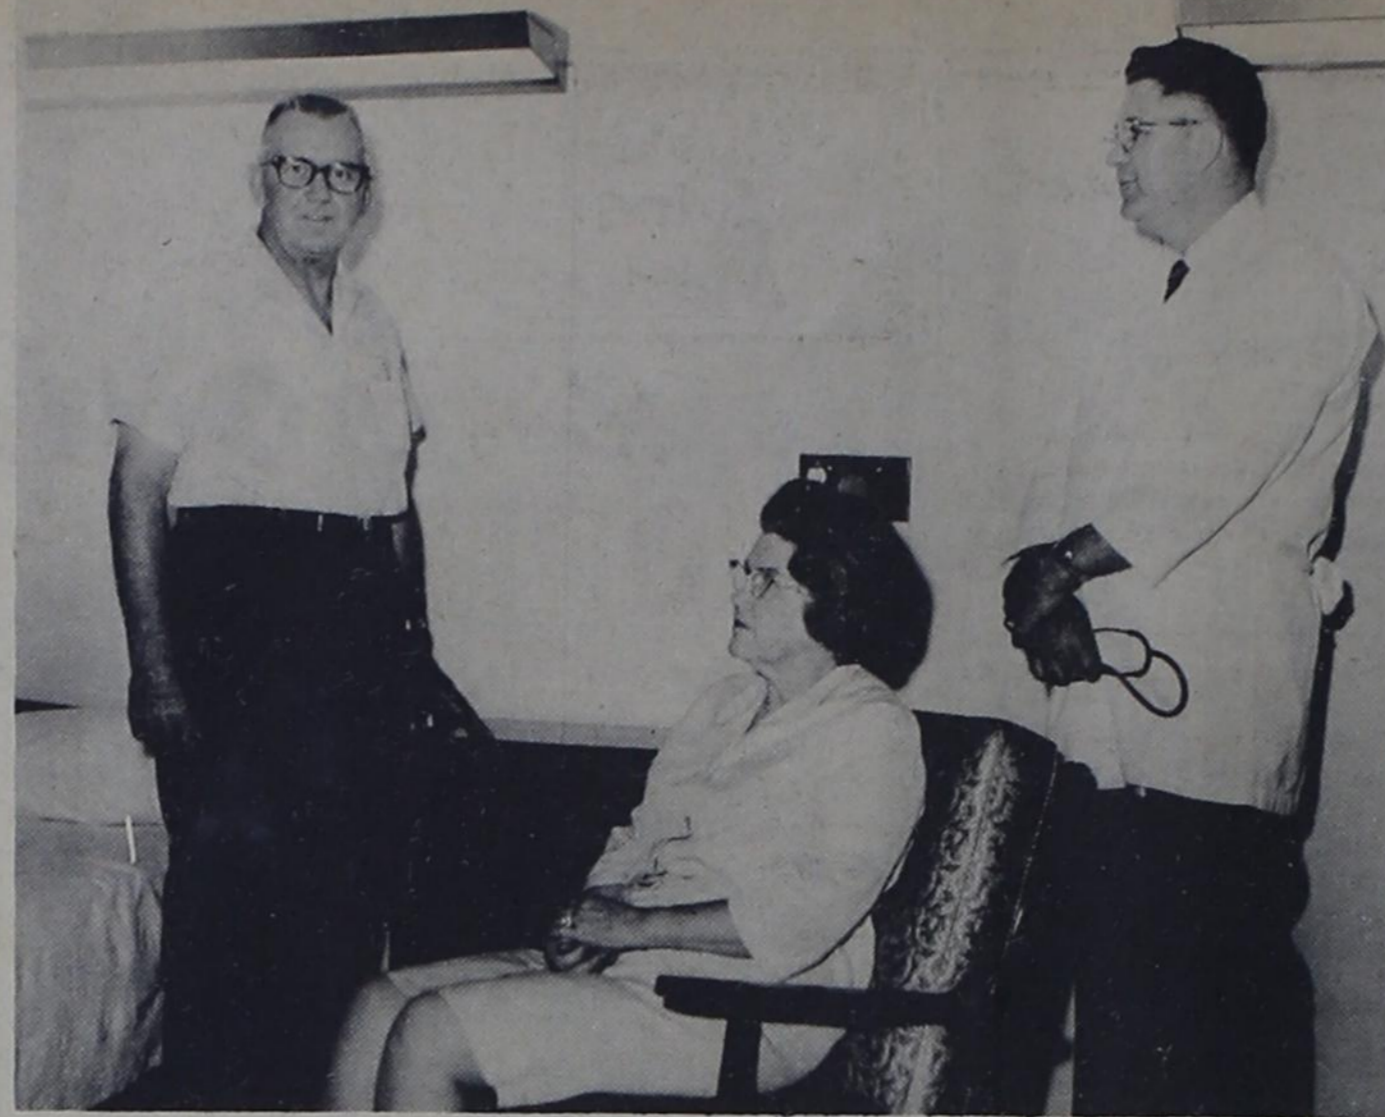

Directors of Plains Irrigation Gas Users Association will also attend the meeting.

All irrigation farmers are invited to attend.

Participants in the "Government in Action Youth Tour" will be furnished a set of colored slides for sharing with their communities upon their return.

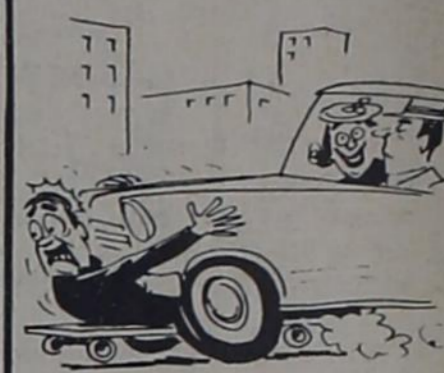

The youth tour begins officially with a Get Acquainted Dinner in Dallas on June 4th, and includes overnight stops in Memphis, Tennessee, and Covington, Kentucky, with arrival in Washington scheduled for 6:00 p. m. on June 7th.

The return trip will bring the group through Knoxville, Tennessee; Chattanooga, Tennessee; where they will tour Norris Dam; Birmingham, Alabama; Shreveport, Louisiana; and Dallas.

INSPECT NEW ROOM -- H. E. Barnett, left, administrator of Parmer County Community Hospital, inspects one of the hospital's 10 new rooms along with Mrs. Sloan Osborn, vice president of the hospital auxiliary, and Dr. Paul Spring. Open house for the new wing, which like the rest of the hospital will be paid for by citizens of the Friona and Parmer County area, will be held Sunday from 2 to 5 p. m.

Service - Toons

SPONSORED BY ELECTRIC CO-OP--

Area Youths Plan Tour Of Washington

Washington, D. C. is the destination of Maura McAndrews of Hereford and Tommy Sherley of Friona who leave June 4th, on a ten day tour sponsored by Deaf Smith County Electric Cooperative, Hereford.

Winners of an oratorical contest on the subject of the contributions of rural electrification to this area, Maura McAndrews and Tommy Sherley will meet in Dallas with winners of similar contests conducted by 29 other rural electric systems throughout Texas. From Dallas they will travel by bus through Tennessee and Kentucky arriving in Washington June 7th.

On their agenda are a breakfast with Texas Congressmen and tours of the Capitol, the Library of Congress, the Supreme Court, Department of

Agriculture, Federal Bureau of Investigation, Mount Vernon, headquarters of the National Rural Electric Cooperative Association, Smithsonian Institute and many other points of interest.

Accompanying the 60 youths in addition to chaperones will be Tonda Curry of Ropesville, Miss National Rural Electrification of Cisco; and Ann Howard of Moody, president of the Texas association of Future Homemakers of America.

Entertainment events while in Washington will include a

dinner of historical shrines, a dinner dance and a night cruise on the Potomac River. A surprise highlight of the trip is being kept secret.

Participants in the "Government in Action Youth Tour" will be furnished a set of colored slides for sharing with their communities upon their return.

Miss Roach, Mrs. Dobbs Tech Grads

Miss Judy Roach, daughter of Mr. and Mrs. James Roach, received her B.S. Degree in History and Government, Saturday evening in graduation exercises at Texas Tech.

Mrs. Nita Beth Dobbs, daughter of Mr. and Mrs. Vernon Estes, received her B.A. Degree in Education, also at Texas Tech in Lubbock.

Governor John Connally gave the principal address at the exercises at Municipal Coliseum.

Col. Ross Ayers Attends Course

FORT LEVENWORTH, KAN. -- Army National Guard Colonel Ross Ayers, attended an officer refresher course at the U.S. Army Command and General Staff College, Fort Leavenworth, Kan., May 17-22.

Colonel Ayers received instruction in applying new Army programs to his National Guard unit.

He is commanding officer of the 36th Infantry Division Artillery, an Army National Guard unit in San Antonio.

A 1933 graduate of Texas Technological College in Lubbock, he is engaged in farming in civilian life.

The colonel and his wife, Flora, live in Friona. He formerly farmed in this community.

Telephone District Has New Manager

General Telephone Company of the Southwest has announced three management personnel changes, naming new managers in the firm's Brownfield and Littlefield districts.

James H. (Jim) Fowler, manager of General's Littlefield district for the past two months will become Brownfield district manager. Named to replace Fowler as Littlefield district manager is Alan Waldrop, who currently serves as a communications consultant in General's Sulpher Springs exchange.

Fowler succeeds R. Rex Bailey, who moves to Bryan-College Station as South Texas division manager for Southwestern States Telephone Company, another operating subsidiary of the General Telephone & Electronics Corporation.

Waldrop has been with the General organization since 1960. A native of Frederick, Oklahoma, he joined the phone firm in Texarkana as a communications consultant and subsequently served in a similar capacity in Jacksonville, Dain-

gerfield and Sulpher Springs.

The new Littlefield district manager graduated from Frederick High School and received his B.S. degree in Business Administration from Austin College in Sherman in 1960. Waldrop and his wife, Patricia Ann, have three sons. They are members of the First Baptist Church of Sulpher Springs. Waldrop is currently a member of the Sulpher Springs Kiwanis Clubs.

H.B. Elam of Brownfield, manager of General's western

division, said the changes were effective June 1.

Blade Sawdust

By Sue Moten

Naturally President Johnson is always one step ahead of us, but when he declared war on poverty he was a great big jump ahead. We have been fighting poverty for years but never did get up the nerve to declare war on it. Perhaps this is the right attitude and denotes positive thinking.

The rat race of mothers cooking meals at home and making hot dogs to take to the ballpark for an after dinner snack has started.

However, Judy Fillpot was in somewhat of a predicament the other afternoon as she was trying to decide what to prepare. It seems that a run had been made at the grocer's on hot dog buns and she had to resort to other tactics.

Somewhere along the line we had been led to believe that after a good rain the winds were supposed to subside. Not so. The last good rain was followed so quickly by wind that it practically blew the water out of the ditches.

If you still ask your children if they want Kool-Aid you aren't too old for the draft but not far from it. Kool-Aid has become terribly outmoded since the advent of Funny Face drink. Have to admit the characters on the package are clever but when a three year old asks for "rootin'-tootin' raspberry" it leaves one rather startled for a few minutes.

Outdoor cooking has always been enjoyable to our family and they don't really mind the crusty black that sometimes appear on the chicken. However, we had a recent youngster to eat lunch with us and he remarked in a rather matter-of-fact voice that he didn't mind the burned chicken either. It usually was that way at home, too, he said.

Having been employed during the daytime for several years we weren't aware that there are so many soap operas on TV and now they have invaded nighttime viewing. It seems one is almost saturated with sadness if he watches TV.

Well, Pat Hawkins will be back with her patter next week and we will once again retire from the newspaper world. It is amazing that during our seven month absence we could think of all sorts of good column material but it is the same as always when one sits down to write; the mind can think of nothing.

Sorority Meets In Bonds Home

Mrs. Tom Bonds entertained Beta Sigma Phi Sorority of Clovis in her home Thursday night. Co-hostess for the occasion was Mrs. Roy Stone.

Presenting individual programs were Mrs. Eddie Gunnels who talked on the Dolly-Gram Service; Mrs. Ross Duke

gave a talk on color co-ordinated clothing and Mrs. End White, a native of England, presented a talk on her life in that country.

Following the program members revealed secret pals and exchanged gifts.

Refreshments of chili cheese roll, nuts, mints, cookies, Cokes and coffee were served to guests.

Attending were Mrs. Hubert Cochran, Mrs. Dave Dixon, Mrs. Marvin Baugh, Mrs. End White, Mrs. Eddie Gunnels, Mrs. George Milburn, Mrs. James Niebert and Mrs. Don Ware all of Clovis.

Miss Cano Returns Home

Arsenia Cano, daughter of Mr. and Mrs. Jesus Cano, of Bovina returned home for summer vacation after having been in school at St. Francis Convent in Amarillo for the past three years.

Miss Cano was welcomed home by the Guadalupe Society of St. Ann's Catholic Church in Bovina at a recent meeting. Miss Cano is Aspirant to the Franciscan Sisters.

Jahnkes Visit Relatives

Mrs. Henry Jahnke visited recently in Lubbock with Mrs. Claudia Raindl and Mr. and Mrs. Louis Brosch and family. She also visited with Mrs. Thomas Zilk and children of Ft. Benning, Ga.

Mr. and Mrs. Henry Jahnke spend Memorial Day weekend in Hobbs, N.M. with Mrs. Claudia Buford and children.

Charity Circle Slates Election

Charity Circle of Bovina Methodist Church as scheduled election of officers for its June 8 meeting.

Mrs. Jimmy Clements, spokesman for the group, urges all members to attend this meeting at 9:30 a.m. at church.

Mr. and Mrs. J. T. Jones visited recently in the home of his brother and family, Mr. and Mrs. Dan Jones of Bentonville, Ark.

New Yield Breakthru

DEKALB E-57 Hybrid Sorghum

Here's a fine "world beating" Yield Breakthru Sorghum that really fills the bill. E-57 is one of DeKalb's NEW Bronze colored numbers that has superior yielding, standing and drought resistance power. Recommended for either dryland or irrigation farming and in 8 DeKalb research trials, it outyielded E-56a by an average of 13.9 percent. Resembles E-56a in height and maturity.

BRENDA DILGER WORTHY ADVISOR--

Rainbow Officers Installed Saturday

Miss Brenda Dilger, daughter of Mr. and Mrs. Arlin Dilger, was installed as Worthy Advisor of Rainbow Assembly Saturday evening at Masonic Lodge Hall.

INSTALLED WORTHY ADVISOR OF RAINBOWS -- Miss Brenda Dilger, daughter of Mr. and Mrs. Arlin Dilger, was installed as Worthy Advisor for Rainbow Saturday evening at Masonic Lodge Hall.

Installing Officers were Mrs. Linda Sudderth; Worth Advisor; Mrs. Jimmy Clements, musician; Mrs. Harold Morris, recorder; Mrs. Clifford Leake, Mother Advisor; Mrs. Kent Glasscock, marshal; and Miss Linda Langston, chaplain.

Officers installed other than Miss Dilger were Myrna Ritchie, Worthy Associate Advisor; Sheryl Lane, Charity; Teresa Page, Hope; Camille Hobbs, Chaplain; Carmen Ward, Drill Leader; Karen Bell, Confidential Observer; Denise Clements, Outer Observer; Nancy Mitchell, Musician; and Sherril Hutto, Choir Director.

Color Stations are Pamela Grissom, Meridty Anderson, Cindy Crump, Carolyn Ward, Doris Corn, Kathy Estes and Suzanne Wilson.

Choir members are Jill Cathy, Brenda Cathy, Pat Reeves, Gilda Cathy, Kreta Morris, Sharon Hamke and Debble Edens.

Following installation ceremonies, Rev. Harold Morris presented awards to Brenda Dilger, Teresa Page, Myrna Ritchie, Doris Corn and Denise Clements.

Rev. Ralph Aday dismissed the ceremonies with the benediction.

Refreshments were served to guests and members in fellowship hall immediately following installation ceremonies.

Bible School Enrolls 267

A total of 267 enrolled at Vacation Bible School at First Baptist Church according to Rev. Ralph Aday. The school was Monday through Friday of last week.

Total enrollment for last year was 242, says Rev. Aday. Average daily attendance was 246.

Rev. Aday was principal of the school and Jack Boggs, music and education director for the church, served as his assistant.

Activities were climaxed Friday evening with a program at the church. Children and teachers showed their craft work and other exhibits to parents and visitors preceding a short program.

Visitors In Minter Home

Visiting last week in the home of Mrs. Henry Minter were her sisters, Mrs. L.S. Niskern of Stockton, Calif. and Mrs. P.O. Bell and daughter, Jerry Bell, of Tucumcari, N.M.

Visiting Sunday in the home of the Henry Minters were Mr. and Mrs. Joe Carpenter and girls also of Tucumcari. Cissy Minter, daughter of Mr. and Mrs. Henry Minter, returned to Stockton, Calif. for a visit with Mrs. Minter's sister. She plans to visit approximately two weeks.

Seniors Make College Plans

Several 1965 graduates of Bovina High School have planned to attend various colleges and universities in September.

Pat Hawkins In Hospital

Mrs. Pat Hawkins was hospitalized Wednesday night at Parmer County Community Hospital in Friona. She is improving and is expected to be released this week.

Mrs. Hawkins writes women's news for The Blade. She is expected to be back to work for next week's issue.

Woltmon Diesel Club Member

OKMULGEE, Okla. -- Conley Woltmon, a diesel mechanics student at Oklahoma State Tech, from Bovina, is among the active members of the Diesel Club at Tech.

The Diesel Club is a departmental organization open to all diesel mechanics students. It provides both social activities and informative programs about their field.

Reception For Pastor Family Here Sunday

A farewell reception in fellowship hall of Bovina Methodist Church honored Rev. and Mrs. Harold Morris and Mrs. C. O. Edens Sunday evening following church services.

Rev. Morris will move to Anson where he will be pastor of the Methodist Church there.

The Morrisses were presented with several farewell gifts. Refreshments of punch and cookies were served by members of Ladies Sunday School class.

Bookmobile Has Reading Club

High Plains Library Bookmobile has a summer reading program for all youngsters interested in joining the Texas Reading Club.

This reading program will be conducted from June 1 through August 1. A reading certificate from the Texas State Library will be awarded to each person who reads at least 12 books of their own choice and reading level.

Those interested may contact the librarian at the Bookmobile and ask for a Texas Reading Club Log to keep a record of the books they have read.

The Bookmobile will stop at West Camp, Thursday June 10 from 9 a.m. to 10 a.m. and at Lariat from 10:30 a.m. until 11:30 a.m.

Those planning to enroll at Texas Tech in Lubbock are Garry Beauchamp, Billy Jay Charles, Tonya Vee Ivy, and Judy Strawn.

Linda Estes plans to attend McMurry College in Abilene. Also attending college in Abilene will be Donnie Dyer, Ronnie Glasscock and Billy Minter. They plan to enroll at Hardin-Simmons University.

Those who are going to West Texas State University at Canyon are Jimmy Redden, Lynn Looney, Sandra Patterson, Gene Pruitt, Al Shamblin and Dorothy Bowman.

David Anderson will enroll at Southern Methodist University at Dallas and Patricia Crook will attend Amarillo Junior College.

Maureen Hammonds, E.L. McCutchan and Linda Sudderth plan to go to Eastern New Mexico University at Portales. Cecil Boothe will go to Harding College at Searcy, Ark.

Owens Parents Of Daughter

Airman First Class and Mrs. Jack Owens are the parents of a baby daughter, born May 26 at Anchorage, Alaska.

The new arrival weighed seven pounds and is named Janice Kay.

They also have a son, Michael, who is six years old. Maternal grandparents are Mr. and Mrs. Clifford Leake.

Courtesy Fetes OL Preacher

Rev. and Mrs. Douglas Gossett of Oklahoma Lane Methodist Church were honored with a farewell reception following church services Sunday evening.

The honorees were presented with a love offering and best wishes by members of the congregation. Refreshments of pie and coffee were served to guests.

The Gossetts will move to Hart where he will be pastor of the Methodist Church there.

Elementary three and four group plan to make space helmets at Methodist Vacation Church School.

A STRONG AMERICA with Rural Electricity...

Thanks to consumer-owned rural electric systems, more than 580 defense installations, from radar listening-posts to atomic missile sites, could be located in remote areas of the country. Without an ample supply of electric power, their strategic placement would have been much more difficult. Rural electric systems are helping to keep America's defenses at peak efficiency, and are contributing to our national security.

Mrs. Johnson's Sister Dies

Mrs. Gene Archer, 40, of Bula, sister of Mrs. E. O. Johnson of Bovina, died unexpectedly Monday afternoon in a Lubbock hospital.

Funeral services are pending.

WhittIn--

(Continued from page 1)

near the end of school each year. There's just more of them than almost anyone person can get around to, even in a small town.

Now, with school out for the summer, the shoe is on the other foot and the lack of activities kinda makes you lonesome for them. That's especially true when you're searching for news to fill a particular week's paper.

Even with a suddenly changed schedule because Texico-Farwell decided not to participate in the league here this year, the boys baseball program is well underway. Games are being played four nights a week and as best we can tell "a good time is being had by all."

Project--

(Continued from page 1)

Busses will deliver the children to their homes and to the gin labor camps in Bovina and at Oklahoma Lane. There will be no in-city bus service.

Children in the program will need smallpox vaccinations and polio shots, Spears says. However, if they don't have these, they will be admitted to the program anyway and arrangements will be made for the children to receive the shots.

Bovina is one of three towns in the 18th Congressional District to be included in Project Head Start at present. Tulla and Flomont are the others.

The project will last for 40 school days -- eight weeks.

New Station--

(Continued from page 1)

Amarillo. He is also building the new fire station-city warehouse here.

The new station will have two car stalls and an office. Out front will be one gasoline pump island, Charles says.

Construction, expected to get underway this week, will require an estimated 60 days, Charles says.

The new station will offer large areas of entrance-way, both from the highway and from Third Street.

The old building was once Bovina's most modern service station but it "has out-lived its time," Charles pointed out, making construction of a new building to replace it necessary.

Baseball Program--
(Continued from page 1)
uled to start at 8:30 following the Little League tilt. Charles Oil of Bovina plays Herring Implement of Friona Friday night also. That game will be at Friona and will begin at 7. Tuesday night has Charles Oil meeting Hub Grain in a tilt here.

In Little League games last week, Bank-Lawlis outran Oklahoma Lane in an extra inning tilt Thursday which has the football-type score of 41-24. The score was tied at 19-19 and 24-24.

Friday night Bovina Ginn-Generagas got off to an early lead and then had to squelch a late rally by Bovina Wheat Growers-Bovina Insurance to come out with a 14-13 verdict.

In peewee play, Cicero blasted Blade-Welding, 13-3 in Friday's game. Oklahoma Lane beat Sudderth's Gaints, 6-1, Thursday and Monday afternoon, the lumber yard boys kept their record intact with a 10-2 decision over Sudderth's team.

Forthcoming games are announced in a revised schedule which appears in this issue of The Blade.

People interested in the baseball program are invited to clip the schedule from the paper and use it throughout the season.

LEGAL NOTICE

SHERIFF'S SALE

THE STATE OF TEXAS COUNTY OF PARMER

By virtue of a Writ of Alias Execution issued out of the Honorable County Court at Law, Potter County, Texas, on the 5th day of May, 1965, by the clerk thereof in the case of HELBROS WATCH CO. vs. LOUIS A. MAROT, IND., & DBA GREAT WESTERN CO., No. 1738, and to me, as Sheriff, directed and delivered, I will proceed to sell, within the hours prescribed by law for Sheriff's Sales, on the First Tuesday in July, 1965, it being the 6th day of said month before the Court House door of said Parmer County, in the City of Farwell, Parmer County, Texas, the following described property in Parmer County, Texas, to-wit:

- (1) All of Block Number Seventy (70), O. T. Bovina;
- (2) All of Block Number Seventy One (71), O. T., Bovina;
- (3) Lots Nos. Nine (9), Ten (10), Eleven (11), Eighteen (18), Nineteen (19) and Twenty (20), Block Number Three (3), Gardner Addition, Bovina;
- (4) All of Block 72, O. T. Bovina.

Levied on this 5th day of May, 1965, as the property of LOUIS A. MAROT, to satisfy a judgment amounting to Four Hundred Fifteen and 30/100 (\$415.30) Dollars, with interest from the 21st day of December, 1959, at the rate of 6% per annum and all cost of suit in favor of HELBROS WATCH CO. GIVEN UNDER MY HAND THIS 17th day of May, 1965. Chas. Lovelace Sheriff, Parmer County, Texas 46-4tc

LEGAL NOTICE

THE STATE OF TEXAS To: The unknown legal representatives, heirs and assigns of H. A. Fuller, Deceased, Mrs. H. A. Fuller and her unknown husband or husbands, and if deceased then her unknown heirs, assigns and legal re-

presentatives, and all unknown claimants, Defendants, Greeting:

You are hereby commanded to appear by filing a written answer to the Plaintiff's Petition at or before ten o'clock A. M. of the first Monday after the expiration of forty-two days from the date of the issuance of this citation, same being Monday the 5th day of July 1965, at or before ten o'clock A. M. before the Honorable District Court of Parmer County, Texas, at the Court House of said County in Farwell, Texas.

Said Plaintiff's Petition was filed in said court, on the 13th day of May, A. D. 1965, in this cause, numbered 2581 on the docket of said court, and styled, T. W. Fuller, Plaintiff, vs. THE UNKNOWN HEIRS OF H. A. FULLER, DECEASED, ET AL, Defendants.

The names of the parties to the cause are as follows: T. W. Fuller is Plaintiff and The unknown legal representatives, heirs and assigns of H. A. Fuller, Deceased, Mrs. H. A. Fuller and her unknown husband or husbands, and if deceased then her unknown heirs, assigns and legal representatives, and all unknown claimants are Defendants.

A brief statement of the nature of this suit is as follows, to-wit: Plaintiff brings this suit in trespass to try title, alleging he is the fee simple owner of all of Lot 3, Block 88, of the Original Town of Bovina, Parmer County, Texas, and that on or about the first day of May, 1965, Defendants and each of them unlawfully entered upon said land and ejected Plaintiff therefrom and wrongfully withhold possession of said land from Plaintiff, and Plaintiff further alleges and pleads and invokes the 10-year statute of limitations as the same pertains to land titles in the State of Texas, claiming title by virtue of said limitation statute, as is more fully shown by Plaintiff's Petition on file in this suit.

If this citation is not served within ninety days after the date of its issuance, it shall be returned unserved.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Farwell, Texas, this 18th day of May A. D. 1965. (SEAL)

Attest: Dorothy Quickel Clerk, District Court, Parmer County, Texas. 47-4tc

SAYS COUNTY AGENT --

Emergency Broadcasting System More Efficient Than CONELRAD

Under the new Emergency Broadcasting System (EBS), formed after the abolition of CONELRAD in May, 1963, radio stations will stay at normal power on their regular frequencies when an emergency does arise, according to Joe Van Zandt, county agricultural agent.

Under the old CONELRAD system, all authorized radio stations were to broadcast emergency information on 640 and 1240 kilocycles.

Obviously, transmission on these two frequencies would have been coming from transmitters all over the country at the same time. This was done

purposely to confuse the guidance systems of enemy aircraft trying to follow radio beams to particular locations.

Missiles and bombers now use fewer, better, and more sophisticated guidance systems. Because of these increased capabilities, CONELRAD was discontinued by the Federal Communications Commission.

CONELRAD had some other serious weaknesses. Many rural areas were so far from a CONELRAD station that people could not hear emergency test instructions during the real emergency. Others, living near two or more stations, could not understand either station when

they both started broadcasting on the same frequency.

Under EBS, stations which hold National Deense Emergency Authorizations will stay on the air during emergencies. All others will close down. The EBS stations will identify themselves by area rather than call letters. These stations will cover more of the country than CONELRAD did and broadcasts will not interfere with each other.

The EBS stations will have built-in fallout protection and will be able to stay on the air 24 hours a day during an emergency. Most will have emergency generators in case their regular power supply fails.

Cricket

At Home In Parmer County

By CRICKET B. TAYLOR
County HD Agent

CORRECTION PLEASE -- Recently in this column the recipe of "Refrigerated Muffins," appeared. Through error, one ingredient was left out. This was the "5 teaspoons of soda." Add this and all will be well. Sorry this happened but as someone said "The biggest room in the world is the room for improvement" and it does seem that applies to this column too.

Foods & Medical Quacks -- Health hucksters are using "scare tactics," to sell their minerals, vitamins and herbal preparations and other medical quackery items to American Consumers.

One of the target audiences of these propagandists and "quacks" is the older American - those who are 65 or over. According to the Food and Drug Administration representative these food and medical "Quacks" are bulking American consumers "to the tune of a half billion dollars annually."

These "quacks" descend upon the public in the form of health food lecturers, mail order promotions, health writers and door-to-door salesmen. They are quite skilled at their trade, and generally just barely stay within the law-knowing full well that the public can be confused by pseudo-scientific double-talk. False ideas about food are their stock in trade and all too often, the older citizens are their victims.

The Food & Drug Administration carries on a constant

program to protect the public and combat such quackery, nevertheless even sophisticated people are often victims of these hoaxes.

Aging aches and pains and fear of what a doctor might say all work in favor of the mail-order capsule and the radio pitchman. Here is one thing one may do. Read the label on the product-- and it says what advertisements have said, then it must be true. But if the label is noncommittal on a product that is vigorously promoted-- then beware.

A reference list of good books on food for older people is available in the Home Demonstration Agent's office on the 2nd. floor of the courthouse and you are invited to come by and pick up a copy free or call 481-3619 or write in for these and they will be mailed to you.

Headway Against Insects

Ever hear of a housefly eating itself to death? Or a boll weevil starving itself to death in a cotton field? Or an ant colony killed off by enslavement?

Well, researchers are making it happen! And in the process, some of Texas' most pesky insect pests at last may be brought under control.

The breakthrough against the housefly may have been achieved by the recent discovery of a feeding stimulant. A chemical element was found that attracts the female fly and causes it to remain in one spot and eat voraciously on a treated substance, regardless of its food value. Scientists are now experimenting to see if they can cause the fly to feed exclusively on non-nutritive substances and literally die of starvation by overeating the wrong foods.

Another substance has been found which repulses that scourge of the cotton farmer -- the boll weevil. An extract of a plant relative of cotton, the Rose of Sharon -- or Althea, appears to drastically inhibit the boll weevil's feeding habits. Research is now being concentrated on a practical method of treating cotton fields with the substance and perhaps starve the weevil out of its usual feeding quarters.

The South American Fire Ant invaded Texas in force some 10 years ago. It builds hard mounds in fields that are capable of breaking plows and the sting of the insect can kill young cattle and wild life. Now a natural enemy has been discovered which may drastically reduce the colonies.

Down in Uruguay, entomologists noticed that some fire ant mounds were beginning to disappear. By digging in, they found the fire ants had been invaded by a parasite ant which lives entirely at the expense of the host colony. Parasite ants had captured and held the queen fire ant immobilized while the fire ant workers were forced to feed and keep the invaders. Life in the colony was so disrupted by the parasite that the ant population dropped sharply, although it never entirely disappears.

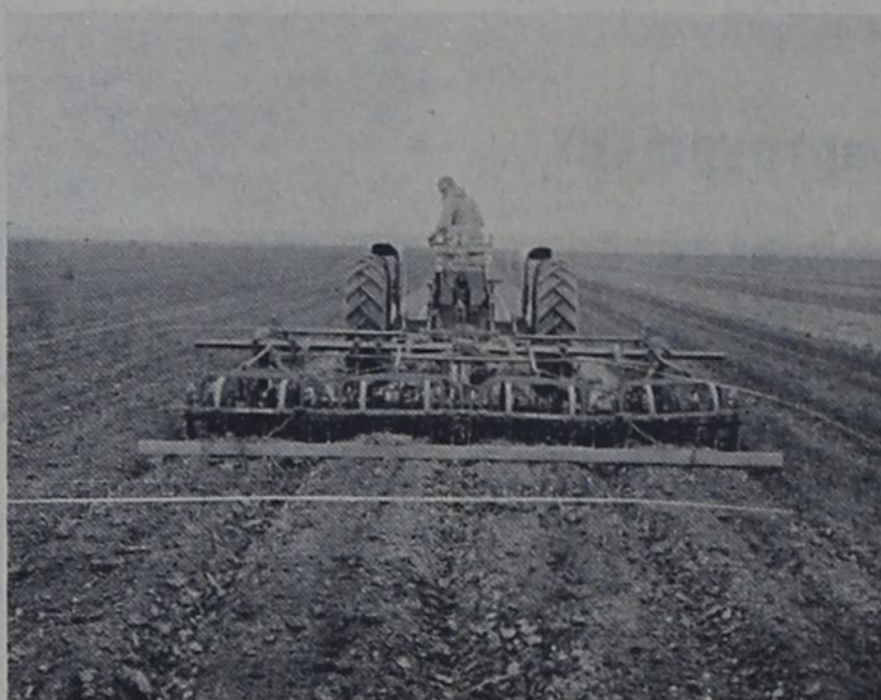

Although this discovery is an interesting commentary on ant life, scientists are hesitant to import the parasite until more is known about its habits. There is always the danger that an imported control insect may become as destructive as the original pest.

But research goes on! And man is constantly seeking that "extra margin" which will give his mastery over insects.

The mines of Guadacanal, Spain, were reopened in 1951 with 200 German miners and metallurgists in charge.

THE HIGH PLAINS

FARM AND HOME

READY FOR PLANTING -- A workman on the R. G. Sparks farm in the Bovina area runs a rotary hoe, sweep attachments and a drag to rid the land of weeds, in preparation for planting of maize, soon to begin. Planting in the area is later than usual.

On The Farm In Parmer County

By JOE VANZANDT
County Agent

All the wind we have had since our rains have sure helped dig things out. We are coming down the home stretch on this year's wheat crop. In a matter of 2 or 3 weeks we should be hearing the hum of combines.

Several farmers asked me what I thought about watering some of this wheat the later part of May. There is not one sure-fire, cure-all answer as I see it. There are several considerations and the safest alternative would probably be not to water again. That is providing there was enough moisture to make your wheat crop.

If you watered, it might rain also, or you might get it on too late and have trouble getting the land dried out to get combines in.

GRASS MANAGING
Deferred grazing is one of the best practices available to stockmen for improving the condition of native grass pastures. It is nothing more than the removal of livestock from a pasture for a part or preferably the entire growing season to allow the grass plants to resupply food reserves in the root system, make top growth to produce food, and produce seed for natural reseeding.

Native ranges in the county have declined to condition during the past two growing seasons due to lack of moisture. Most range grasses need an opportunity now to reestablish themselves and deferment will give them that chance.

Coupled with deferment, attention should be given to the balancing of cattle numbers with the forage being produced in order to get the best use from the forage. Proper use of the forage results in an accumulation of litter on the soil surface which is not wasted forage but an aid to more efficient water use, soil stabilization and improved soil fertility. Call the County Agent if you would like assistance on planning a deferred grazing program.

COTTON INSECTS
Cotton growers need to be checking their cotton for thrip damage. We can expect to see some thrip damage in cotton about now.

Good cotton insect control just doesn't happen. It must follow a plan. The planned program must include use of the right insecticide at the right time, in the right amount, and in the right way. Then when you are right all the way, you can't be wrong.

In order for cotton producers to have the latest available information on insect control methods and recommended insecticides, Experiment Station and Extension entomologists at Texas A&M University working with their U. S. Department of Agriculture counterparts annually provide this current information.

The information was recently released by the Texas Agricultural Extension Service as L-218, "Texas Guide for Controlling Cotton Insects." Also, in order to further localize the recommendations, guides have been prepared for our High Plains area.

Copies of the publications

iciency.

When non-portein nitrogen is excessive in the plant, it may combine with other elements to produce poisons that add to the complexity of the nitrate poisoning. One of those compounds is nitrogen dioxide, a brown or yellowish-red gas, heavier than air, which form in silos when high nitrate plants are ensiled.

In the past 10 days several wheat fields have turned up with dead or dying spots in them. Samples from some of these fields have been identified as having Foot-rotor Root-rot.

We suspect that other fields we have heard about have this same Foot-rot problem.

Affected plants may occur singly, in small circular spots, or in large areas in the field. Roots, crown and lower stalks are rotted. Plants mature early and are usually stunted with little grain.

Near maturity, affected plants are killed and appear as "white heads" in the field. These "white heads" may be in spots, scattered throughout a field, or a combination of both.

In West Texas Foot-rot is caused largely by soil-borne fungi.

Crop rotation with non-grass crops is desirable. Get rid of crop residues as fast as possible by plowing under straw so it will rot quickly. Summer fallow infested fields is a good practice to follow. Probably cotton should be the next crop grown on infested fields and it will be better if this is grown after leaving the ground fallow for a season. We suggest you plant cotton because it is a low residue crop. Grain sorghum would not be a good crop to follow with.

NITRATE POISONING
For the next week or two in my news column I am going to discuss different topics on nitrate poisoning.

Nitrate poisoning in animals is usually caused by their consuming fertilizers or water or feed (including plants) that contain nitrogen compounds in abnormally high concentrations. One such compound is potassium nitrate. Potassium nitrate is much more toxic than the nitrate. Moisture and heat may change the nitrate to nitrite, but most of this change occurs in the gastro-intestinal tract, and is thought to occur in the rumen in ruminants.

The condition is characterized by sudden death, abortion, reduction of milk flow, or signs of vitamin "A" deficiency.

Anyone needing assistance with a field that has dead spots in it should contact the County Agricultural Agent, Joe Vanzandt, in Farwell.

Texas farmers and ranchers sold crops, livestock and livestock products during March for \$116.7 million. The Texas Crop and Livestock Reporting Service said this was 5 per cent below sales for the same month in 1964.

Corn on the William Grownosky farm (the R. D. Rule place) west of Hub on the Dimmitt Highway has grown like a weed in the past week. The picture above shows the crop on May 21 (corn can hardly be seen above the tiller ridges); Lower picture shows the same crop one week later (May 28). The crop was planted during the last week of April says Grownosky.

Foreign Markets Important To Plains Cotton Growers

Mills in the Cotton Belt's Southeastern region account for 90 per cent of the U. S. domestic cotton consumption, but the region produces only 13 per cent of the crop. Other regions supply the needed cotton, and, says Fred C. Elliott, Extension cotton specialist at Texas A&M University, the Southwest region—Texas and Oklahoma—supply the smallest percentage.

He says a U. S. Department of Agriculture study of destinations and types of transportation used to move raw cotton during the 1961-62 season showed that 47 per cent of the total season movement was to Southeastern mills. Also that 29 per cent went to ports for export or reconcentration, 13 per cent moved in intrastate traffic, 4 per cent was shipped to interior concentration points, 3 per cent went to Canada and 1.5 per cent to northern consuming centers.

Practically all cotton produced in the Southeastern region moved to mills within the region. Nearly three-fourths of that from the South Central region moved to Southeastern mills with about 10 per cent going to New Orleans for export.

Almost half of the Western region crop went to the Southeastern mills and most of the remainder was exported from California and Texas ports. Japan received about half of the region's exports.

The Southwestern region moved 55 per cent of its raw cotton to Texas ports with Japan

the leading export destination. Only about 30 per cent of the crop went to Southwestern mills.

Elliott says this study further emphasizes the importance of foreign markets as major outlets for Texas and Oklahoma produced cotton. Also that staple length is an important quality consideration.

Improvement Conference Set On Beef

More than 400 persons from 25 states will attend the Coordinated Beef Improvement Conference here July 19-20.

The session, to be held at Texas A&M University and the nearby Ramada Inn, is a combination of A&M's annual Livestock and Meat Marketing Institute and the Beef Cattle Shortcourse.

Ed Uvacek, Extension livestock marketing specialist in the A&M Agricultural Economics and Sociology Department, said the general theme is "Economic Opportunities in a Changing Market for Cattle and Beef."

The conference is sponsored by the American National Cattlemen's Association, Texas and Southwestern Cattle Raisers Association, and Texas A&M.

Uvacek said a special feature is a series of five workshops dealing with coordination of marketing volume and quality and its effect on price, reducing cost and waste in cattle and beef marketing, education of and meeting consumer needs, coordination of market information, and alternative systems for marketing cattle and beef.

Three noted economists will head a speaking lineup of more than 25 beef industry leaders. The economists are George L. Mehren, assistant secretary of agriculture; Raymond J. Doll, vice president and senior economist of the Federal Reserve Bank in Kansas City; and Paul L. Farris, project leader in meats and poultry for the National Commission on Food Marketing.

Another special attraction, Uvacek said, is a cattle futures forum.

APPLYING FERTILIZER -- Workmen on the farm of Roy Allen in the Rhea community are applying dry fertilizer and liquid fertilizer in one operation, 200 lbs. of dry fertilizer and 125 lbs. of the liquid preparation is used per acre. Possibly cotton will be planted on the land when the fertilizing operation is finished, said the workman.

Not long ago Donald A. Johnson, Executive Vice President of Plains Cotton Growers, Inc., pointed out that this year's increase in carryover of cotton was the result of a drop in exports. And further stated that: "The level of cotton exports is set largely by administrative policy, not by the cotton program in effect at the time."

Now, from Congressman Jamie Whitten (D-Miss) comes proof he is not alone in that sentiment. Whitten, Chairman of the House Subcommittee on Agriculture and member of the Committee on Agricultural Appropriations, sent the following on exports along with the Agricultural Appropriations bill for 1966:

"For the past 15 years, the Committee has done everything possible to encourage and require exportation of U. S. agricultural commodities and has continued to insist that such commodities be offered continuously in world markets on a competitive basis. During those years when U. S. commodities have been kept competitive, export sales have increased substantially and the pressure of surpluses has been removed from the domestic markets. "Despite unlimited authority

to sell competitively in world markets, the Department's failure to sell competitively in the early 1950's caused CCC commodity inventories to increase from \$1 billion as of June 30, 1952 to \$5 billion as of June 30, 1955. During this period, CCC holdings of cotton increased from \$418,000 to \$1.2 billion.

"In 1955, at the insistence of this committee, the first cotton was offered for sale abroad for dollars on a competitive basis and one million bales were sold in a few weeks. Subsequently seven million bales were sold soon after offered. Then in 1956, despite this most satisfactory experience, the Department took steps to again hold U. S. cotton off world markets. This caused Congress to enact the Export Sales Act of 1956 requiring sales for dollars to regain and retain the U. S. historical share of world markets.

"Notwithstanding this legislation, the Department in 1958 again refused to offer cotton at competitive prices, which the Comptroller General ruled to be a violation of the 1956 Export Sales Act. Cotton exports again dropped — from 7.6 million bales in 1956 to 2.8 million bales in 1958. This action cost the CCC and the American taxpayers hundreds of millions of dollars and did great damage to U. S. cotton producers.

"In 1959, under increased pressure from Congress, competitive sales were reinstated and exports again increased to a level of 6.5 million bales in 1959. . ."

"The export sales act of 1956 referred to above also requires the Secretary of Agriculture to establish an export goal at the beginning of each year and, in the opinion of the Committee, requires him to announce such figure to the public. No such goals have been announced in recent years, despite the provisions of the law. This has had a depressing effect on U. S. exports. While the historical U. S. share of world cotton markets is around 6 million bales annually and while the law requires the export of this amount, cotton exports dropped to 3.3 million bales in 1962, 5.6 mil-

lion in 1963 and 4.4 million in 1964. If the U.S. had maintained its fair share of world markets for the last three years supplies on hand would be almost 5 million bales less."

The Appropriations Committee report continued by saying: "In view of these factors, the Committee insists that the Department (1) return to offering commodities for sale on a competitive bid basis, (2) make 'payment in kind' payments from commodity stocks in lieu of cash payments, and (3) conform to the Export Sales Act of 1956 by announcing to the world the quantity of cotton the U. S. will sell each year on world markets." The report also said exports should be made from private stocks and handled through private channels where possible and from Government stocks when necessary.

The other day Secretary of Agriculture Freeman said Congressman Cooley's new cotton bill would "not encourage any substantial increase in cotton exports." In view of the success of past sales of cotton on a competitive bid basis and the Department's long standing unlimited authority to sell competitively in world markets, many will view this as curious comment.

If the Secretary is truly concerned about raising the level of U. S. cotton exports, perhaps he should consider (1) taking the Appropriations Committee report seriously, and (2) complying the provisions of the Export Sales Act of 1956.

Ice cream may be stored in the refrigerator for a short time, usually from one to four hours; in a refrigerator-freezer combination for longer storage, ranging from several hours and up to one week or more; and in the home freezer for still longer. For refrigerator storage, transfer the ice cream from its carton to a clean, dry ice cube tray. Cover tightly with foil or plastic film, then turn temperature control to the coldest setting. In a refrigerator-freezer or home freezer, store the ice cream in cartons as it comes from the store. The ice cube tray method can be used in the refrigerator-freezer unit also.

A cellulose sponge makes a good clothes brush, and it can be washed clean.

DRILLING STATISTICS FOR APRIL

During the month of April 232 new wells were drilled within the High Plains Water District; 8 replacement wells were drilled; and 10 wells were drilled that were either dry or nonproductive for some other reason. The County Committees issued 265 new drilling permits.

Listed below by counties are permits issued and wells completed for April.

County	New Wells Drilled	Permits Issued	Replacement Wells Drilled	Dry Holes Drilled
Armstrong	0	0	0	0

Many Factors Involved In 'Good Food Buymanship'

Good food buymanship covers many factors.

It means shopping carefully and using all the food knowledge you have available, says Mrs. Gwen Clyatt, Texas A&M University Extension consumer marketing specialist. It also involves keeping in mind the likes, dislikes and nutritional needs of your family, she adds.

"Food buymanship also includes an honest assessment of the value of your time for both cooking and shopping. Reading food product labels and taking time to do a little calculation to determine cost per pound and cost per serving are other aspects of good buymanship," Mrs. Clyatt says.

To qualify as a good buyer of food, you may need to get bet-

ter acquainted with your food store in order to determine the best days and times for shopping, the store layout, and the brands that are carried.

Good food buymanship actually doesn't stop at the store, but follows you home with your purchases. "It means getting home quickly after you buy -- and storing the food items properly as soon as you get there. These practices will help you to get the most from the food dollars you spend," says the specialist.

This week, check retail meat counters for best beef values on arm and blade pot roasts and steaks, round steaks and roasts and ground beef. Pork values include end-cut pork chops, picnics, smokes hams and shoulder roasts. Fryers are the biggest value in the poultry department, and Grade A large eggs are good buys.

Fresh fruit and vegetable items in good supply at moderate price levels include bananas, apples, oranges, some strawberries, watermelons, pineapples, sweet corn, mustard greens, new red potatoes, carrots, squash, green peppers, radishes, green onions and turnips and greens. Head lettuce supplies have increased slightly.

Increased milk supplies provide for plenty of between-meal treats and mealtime drinks.

Handbook On Insect Control Available

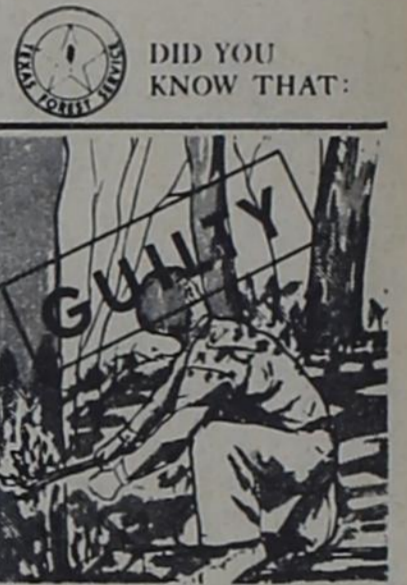

The control of insects attacking vegetables is often made more difficult because of improper identification of the pest. Their control, points out County Agent Joe VanZandt, is very important since even minor damage may lower the crop's value or render it unfit for sale.

In order that vegetable growers may have a ready reference for identifying the more common insects attacking vegetables, a research and extension entomologist of Texas A&M University have prepared a handbook on the subject. Van Zandt said the publication, B-1019, "Insects Attacking Vegetable Crops," is available without cost from his office.

Specific control measures for the different insects are included in another publication, MP-675, "Texas Guide for Controlling Insects on Commercial Vegetable Crops," which lists the recommended control measures.

Persons interested in these and other publications on many agricultural subjects are invited by the county agent to contact his office for copies. "They are free," he said.

Your dreams will never come true by over-sleeping.

It is a violation of the law to either carelessly or deliberately set on fire the lands of another. In 1951 the Legislature made it a felony for a person to deliberately set fire to grass or forest land owned by another. They also enacted a law making it a misdemeanor to negligently set, or cause to be set on fire, the lands of another. The Texas Forest Service is primarily responsible for enforcing these statutes.

The residence of the president of the U. S. was first called the White House in 1811, but not until Theodore Roosevelt put the name on stationery in 1902 was it made official.

HAY BALING OPERATION -- The hay raking and baling operation on the George Jones farm, three miles north of White's elevator in the Hub community, was halted temporarily on Friday due to drying out of the alfalfa. Baling operations were resumed early on Saturday morning when the feed was moist. Jones has 25 acres of the fine hay (his first attempt at raising alfalfa). The hay is used for feed for cattle and horses.

Wardrobe Planning Is Program

"Planning A Wardrobe" was the subject for a demonstration given Wednesday, May 26th in the Oklahoma Lane Community Center building. Cricket B. Taylor, Home Demonstration Agent of Parmer County gave the demonstration to 4-H members and Clothing Leaders of Oklahoma Lane, Lazbuddie and Farwell. Twenty members, six leaders and two visitors were present.

Group work has started in Clothing projects. "Wardrobe Planning" is part of the subject matter to be studied, Mrs. Taylor said.

To have clothes appropriate for the occasion, and suitable to the individual, requires knowledge of color, line and design, Mrs. Taylor pointed out. Another point given emphasis was that clothes to suit the occasion must not only make the individual attractive but functional and comfortable.

Those 4-H members attending were: Irene & Bessie Bowery, Carolyn Herrington, Lynn & Joyce White, Maxine & Patience Broyles, Delyne Steinbock, Ann Blackstone, Kathy

Outdoor Look Is Popular This Summer

The outdoor look is "in" this summer, and women's fashions are capitalizing on many aspects of this trend.

Young and active looks are found in every sportswear category, says Lynn Parks, Texas A&M University Extension consumer education specialist.

"You may be a surf-watcher instead of a surf-rider, but you'll find the nation's newest beach sport is an important influence in swim wear designs. The surfing look is reflected in many tailored two-piece suits," Miss Parks says.

These suits feature such surfer design notes as flap pockets, lace-up ties at the waist, and boy leg trunks banded with white fabric trim. Suits come in sturdy cotton denim, madras plaid, and duck.

Because real surfers like their suits to look faded, one new swim wear fabric is an all-cotton twill with a special weather-faded look.

During the past 25 years Texas Forest Service tree nurseries have produced almost 400 million pine seedlings. Such a quantity is sufficient to plant a strip of land 100 feet wide, almost twice around the earth at the equator. Both pine and hardwood seedlings are sold to Texas landowners at a nominal cost each winter. They are made available only for reforestation and windbreaks.

Outdoor Look Is Popular This Summer

Another popular trend in sportswear is the nautical look. Both sailors and non-sailors will take to one trim-fitting sports outfit -- bell-bottomed pants and blazer jacket in cotton sailcloth.

For riding the range -- on horseback or on the seat of a bicycle -- there's the ranching look. It's interpreted in cotton stretch wrangler pants and Western-tailored shirts. And, whether you're a golfer or not, you'll like the casual comfort of stylish new golfing culottes, worn with cotton knit T-shirts.

"Just For A Smile" "I'm sorry we're so late getting home," said the husband to the babysitter as the couple returned home later than expected.

"Don't apologize," replied the frazzled sitter. "If I had a kid like yours I wouldn't be in a hurry to get home either."

Special for new gardeners: The nicest thing about growing a first year garden of annual flowers is that any mistakes you make will wipe out by frost. More permanent plants need to be moved if set in the wrong place -- not so annuals.

Bigger and better crops of muskmelons result when the plants are kept mulched with black plastic. Try it!

Baking Part Of Research On Radiation Effects

A Texas Aggie has been baking angel food cakes in modified coffee cans as part of his graduate research work on radiation effects.

Hershell Ball, a 23-year-old graduate student from Burlington, Texas, is studying the effects of gamma radiation on the physical and functional properties of egg whites.

"Very little bacterial contamination occurs in fresh eggs," Ball explains. "However, when the egg is removed from the shell, chances for contamination increase several fold."

Eggs, either the whites, yolks, or blends, can be pasteurized by heat, similar to the process used to pasteurize milk. Scientists have recently discovered that gamma radiation can also be used effectively for pasteurization of eggs.

The poultry science student is trying to determine the effects of radiation pasteurizing on egg white performance by baking miniature angel-food cakes. He has baked over 200 of the coffee-can-cakes in his studies.

Ball checks the volume of foam when the radiated egg whites are whipped. The stability, viscosity, surface tension and other characteristics of the egg whites, radiated and non-radiated, are checked to determine the effects of radiation pasteurization on their functional ability. The volume,

height, and texture of each cake baked are measured. The graduate student feels gamma radiation has a bright future in the field of pasteurization.

When it comes to home management, many homemakers of all ages rate "lack of time" as their biggest home-front problem.

This was revealed in a recent government survey, where three of every five women polled listed the element of time as their major concern.

A poorly manufactured hook has a point which won't hold its sharpness and rusts easily. When you buy a cheap hook you get just what you pay for -- a hook that will lose its sharpness after one or two fishing trips. And unless you inspect the point periodically, dullness may cause you to miss fish.

For example, when angling with live minnows you should use a thin-wire hook, preferably one with a wide bend. A heavy-shanked hook wounds the bait, often mortally. On a thin-wire hook the minnow will remain alive much longer.

With a wide bend hook, the point extends farther beyond the minnow and allows easier hooking of a fish that might take the bait.

Most common hook is the ordinary round bend hook. But hooks with a more oblong shape, like the Eagle Claw, are very popular among Texas fishermen.

Two of the more common hooks are the Aberdeen and the Carlisle. The Aberdeen (a style of hook and not an exclusive brand name) usually is made of thin wire with a large bend. The Carlisle has a long shank and a round return bend and is made of regular wire.

Basically, hooks come in three shank lengths: short, regular and long.

Size of the hook is important. A general tendency among fishermen is to employ hooks that are too large. Even a small hook will catch big fish if the fisherman plays the catch properly and knows how to handle his equipment efficiently.

A perch or bream fisherman, for instance, might select a No. 6 hook when a smaller No. 10, would be far more appropriate.

What goes with this numbering system? Largest numbers for smallest hooks? Well, hooks are graded according to different sizes, designated by numbers. In the smallest sizes, hooks range from No. 1 to No. 22 (the latter is the tiny one kids catch minnows on). The larger sizes run from 1/0 up to about 20/0. The difference between a No. 1 and a No. 1/0 is four sizes, so don't confuse the two.

Basically, hooks have one of three different bends--round, parabolic and square, or variations of the three. The Aberdeen, as an example, is slightly square, while the O'Shaughnessy is parabolic.

You don't see extremely square hooks anymore since

By--Vern Sanford

Least understood, yet the most vital piece of equipment for the fisherman, is the hook.

Most anglers are casual in their selection of hooks. Yet the hook is the primary link between fisherman and quarry. More fish are lost because of inferior hooks than any other piece of equipment.

In any sporting goods store there will be countless bins of different hooks. Offhand, most of them look pretty much alike. But upon closer inspection you'll find that all differ in one or several respects. A seemingly insignificant thing like the point can distinguish whether or not a hook is run-of-the-mill or quality merchandise.

A poorly manufactured hook has a point which won't hold its sharpness and rusts easily. When you buy a cheap hook you get just what you pay for -- a hook that will lose its sharpness after one or two fishing trips. And unless you inspect the point periodically, dullness may cause you to miss fish.

For example, when angling with live minnows you should use a thin-wire hook, preferably one with a wide bend. A heavy-shanked hook wounds the bait, often mortally. On a thin-wire hook the minnow will remain alive much longer.

With a wide bend hook, the point extends farther beyond the minnow and allows easier hooking of a fish that might take the bait.

Most common hook is the ordinary round bend hook. But hooks with a more oblong shape, like the Eagle Claw, are very popular among Texas fishermen.

Two of the more common hooks are the Aberdeen and the Carlisle. The Aberdeen (a style of hook and not an exclusive brand name) usually is made of thin wire with a large bend. The Carlisle has a long shank and a round return bend and is made of regular wire.

Basically, hooks come in three shank lengths: short, regular and long.

Size of the hook is important. A general tendency among fishermen is to employ hooks that are too large. Even a small hook will catch big fish if the fisherman plays the catch properly and knows how to handle his equipment efficiently.

A perch or bream fisherman, for instance, might select a No. 6 hook when a smaller No. 10, would be far more appropriate.

In the smallest sizes, hooks range from No. 1 to No. 22 (the latter is the tiny one kids catch minnows on). The larger sizes run from 1/0 up to about 20/0. The difference between a No. 1 and a No. 1/0 is four sizes, so don't confuse the two.

Basically, hooks have one of three different bends--round, parabolic and square, or variations of the three. The Aberdeen, as an example, is slightly square, while the O'Shaughnessy is parabolic.

You don't see extremely square hooks anymore since

they have a tendency to break at the abrupt bends.

A hook is composed of the eye, where you tie the line, the shank, the bend, the barb and the point.

That protrusion which prevents a hook from slipping out is the barb. That part of the hook from the barb to the tip, and probably the most important feature on the hook, is the point. One with a bad point is practically worthless.

Quality hooks come with hollow-ground points. These feature razor-sharp points and curved barbs which insure maximum penetration and holding power. The "claw" point, a feature of the Eagle Claw hook, curves in slightly. This cuts down on penetration a bit but it holds better once imbedded.

Straight spear points generally are found only on cheap, inferior hooks. They won't hold their edge very long.

Hooks come in several different finishes--bronze, bright, gold-plated, nickel finished, tinned, japanned, and blued. The bronze hook is perhaps the most common. But finish-wise it is a poor choice since it tends to rust easily if not kept dry and away from moisture. Bronze hooks usually are cheap hooks.

Nickel-finish hooks are found on salt-water lures. They resist corrosion and stay sharp. Almost as good as the tinned hook. Hooks with these two finishes are the most expensive.

Third in quality is the japan-finish, which is a lacquer finish of blue-black. This hook has fair resistance to rust and runs slightly cheaper in price than the nickel plated or tinned.

Gold-plated hooks are very popular, but they have a tendency to tarnish easily.

Wise fishermen know and understand hooks. In that moment of truth, when a fish strikes, it may mean the difference between adding something to the stringer or just a story to tell about the big one that got away.

Safe Driving Starts At 35, Years That Is

Life may begin at 40 but safe driving starts at age 35.

That was the conclusion of a survey of the Illinois State License Division, which showed that the safest automobile drivers are those between the ages of 35 and 75.

Illinois drivers in the 20-through-24 age bracket had a higher percentage of accidents than any other age group.

FOREIGN AID--Our government will be disbursing some type of foreign aid during 1965 in 99 foreign nations and 9 territories, stated Rep. Otto Passman (D-La.) "and this program in its present form is uncontrolled and apparently uncontrollable."

POST OFFICE--"How can we explain a Post Office Department," asks Rep. Frank Bow (R-Ohio) "that costs the average family over \$80 a year in addition to the postage it pays every time it wishes to use the service, and how explain why so costly a service is so consistently unsatisfactory?"
