### FIRST AERIAL COACH.

The first acrial coach has been tried and found successful in Etampes, France. It is an ordinary aeroplane, to which a limousine body, capable of holding four passengers comfortably, has been fitted. The aerial coach made a flight of about an hour across country, but it carried no passengers. The place of passengers was taken by four bags of sand, weighing in all about forty stones, supposed to be the average weight of four tourists. The aerial coach leaves nothing to be desired as country over which they travel, and the only drawback as yet is the safea railway carriage.-Washington

Achievements of Past Twelve Years Not Equaled in Any Similar Period in History.

Though in days pre-eminent for man's conquest of Nature by science and engineering, says World's Work, Amundsen's journey to the South Pole, like Peary's to the North Pole, was made with only the appliances of previous generations. The poles were discovered by the endurance of degs and men, spurred on by the old spirit of adventure and the lust for difficult and dangerous tasks that stirred the adventurers of old. In another century or two the era of the pole discoveries will be hailed as the good old times when men were still men and civilization had not made the world effete.

The twelve years ending with the discovery of the South Pole are as full of dramatic achievement as the days of Drake and Raleigh, for not even in those times was there a more extraordinary series of discoveries and conquests packed into a dozen

In 1900 only one man had been the length of Africa by land, and the Cape to Cairo Railroad was but a dream. There was not a railroad across South America. A great part of Siberia was without rail or road except the old caravan trails. China was practically without railroads. Lhassa was unknown, forbidden to the white man. During a century and a half men had tried to reach the South Pole and failed, and the North Pole had be fled the efforts of four hundred years. Within a dozen years white men

visited Lake Chad, made a protect rate over Timbuctoo. The days of the Mandi at Khartum are ended and ary tourist may travel there comfortable by rail. The Cape to Cairo Railron 1 is an assured fact. The heart of Arrica is now no more remote from the popular imagination than Oklahoms City was in 1900.

In South America the Trans-Andean Railroad is in full operation across th > continent as the Trans-Siberian 14 across Asia. Even China has her ra' roads. Lhassa has been visited by t British army and both poles are the common property of every fireside that boasts of books, magazines cr newspapers.

Such a record may fustify a feeling of pride that the spirit of conque t and adventure is as alive as ever and accompanied with all the courage and hardihood that blessed any earlier gan-

> PANTRY CLEANED A Way Some People Have.

Before marriage my wife observed in summer and country homes, coming in touch with families of varied means, culture, tastes and discriminating tendencies, that the families using Postum seemed to average better than those using coffee.

"When we were married two years ago. Postum was among our first order of groceries. We also put in some tea and coffee for guests, but after both had stood around the pantry about a year untouched, they were thrown away, and Postum used only.

"Up to the age of 28 I had been accustomed to drink coffee as a routine habit and suffered constantly from indigestion and all its relative disorders. Since using Postum all the old complaints have completely left me and I sometimes wonder if I ever had them." Name given by Postum Co., Battle Creek, Mich. Write for booklet, "The

Road to Wellville." Postum comes in two forms.

Regular (must be boiled).

Instant Postum doesn't require boiling but is prepared instantly by stirring a level teaspoonful in an ordinary cup of hot water, which makes it right for most persons.

A big cup requires more and some people who like strong things put in a heaping spoonful and temper it with a

Experiment until you know the amount that pleases your palate and have it served that way in the future. "There's a Reason" for Postum.
