Incorporation Meeting Proves Highly Interesting

INDEPENDENT SCHOOL DISTRICT TO BE CREATED

INCORPORATION

On last Monday night some fifty Hedley citizens met at the Opera House to discuss the question of incorporation. It was one of the most interesting and enthusiastic meetings held here in many months. And the meeting next Monday night promises to be more interesting.

Reports were had from some of the committees, and they were instructed to make full report next Monday night, at which time every citizen of the town is urged to be present.

Talks were made, both for and against incorporation. It was conceded by most of those present that incorporation is the thing for Hedley.

Some of the arguments advanced at the meeting the other night it will help sanitation; it will lower rate of insurance; it will put streets and alleys in shape; it will prevent fire trap buildings being erected; it will give a better water system and fire fighting system; will help our school; will keep the town clean in more ways than one; will proportion the expense of putting the town in good condition according to the amount of property one owns; and it will put Hedley on the map as a live, well-governed, enterprising town.

Arguments against incorporation: It will touch a vital spot, namely pocket book that's all.

HEDLEY SCHOOL

During the session of citizens Prof. Meadows reported that he met the County Board of Education at Clarendon last Saturday, and in that meeting final steps were taken toward raising the standard of Hedley school to the second class, which gives it affiliation with Texas colleges and universities.

This report received applause, for all realize that a good school system goes far toward the up-building of town and community.

While discussing the school question it was suggested that our people were sleeping on their rights by not making this an independent school district, as it would give local control of funds, a school board of seven instead of three, and would give home banks the handling of the school money. A committee was appointed to circulate a petition to the State Legislature to change the Hedley Common School District—composed of 36 sections—to an Independent District.

A report will be made by this committee next Monday night. Let nothing ordinary stand in the way of your attending, for with two such important questions as the future welfare of the town and school, it seems that every citizen should be interested to the extent that he will lend encouragement to the movements by attending the meeting.

W. E. Stone of Bray brought a load of Poland China hogs to town Wednesday. He believes in diversifying, with hogs as the principal diver-sifier.

W. K. Kyser, son of J. K. P. Kyser of Bray, arrived with his car of household effects last week to make his home in this portion of the Panhandle.

Under Hedley Church Spires

REPORTED AND CONTRIBUTED

EPWORTH LEAGUE

Program for Sunday, Jan. 24.
Song. Prayer. Song.
Subject, How to Have a Conscience Void of Offense.
Leader—Travis Lively.
Scripture passages, Act 24:16; 1 Tim. 1:5-19; 1 Peter 3:15-16; Heb. 13:18—Rev. Story.
Song.
At how much do I value my conscience—Mary Helen Bain.
How do I prove my high valuation of conscience—Travis Lively.
Song.
League benediction.

W. M. AUXILIARY

Even though the wind was rather cold some nine or ten met at Mrs. Morrrows in the regular Bible study Monday. A very interesting lesson was enjoyed.

Monday January 25, business meeting, close with 30 minutes social. Mrs. T. R. Moreman hostess.

Publicity Sup't

On Friday evening January 8, Mrs. T. T. Harrison, and her Sunday School Class entertained the public at the home of Mrs. Harrison in South Hedley. Candy

Rev. McKenzie of Goodnight will preach at the Baptist Church next Sunday night.

B. Y. P. U.

B. Y. P. U. program Jan. 24.
Subject, The Safety of Believers.
Song, Saved. Prayer.
Scripture lesson, Rom. 8:1-11.
Song.
What the Doctrine Does Not Mean—Herman Horschler.
What the Doctrine Does Mean—Claude Bishop.
Scripture Quotations, John 15:1-10; Heb. 6:4-9—Lola Baker.
What Jesus Says Concerning the Security of Believers—Graham Brinson.
Scriptures Interpreted—W. D. Bishop.
Why the Believer is Safe—Mrs. W. E. Brooks.
Song, Blessed Assurance.
Leader—K. W. Howell.
Closing prayer.

was sold and a free-will offering was taken for which the proceeds goes to pay out the church pews. Punch was served to the crowd, and the greatest feature of the evening was the fancy costumes in which Miss Storm took first prize. Each person expressed themselves as having a good time.

MOVING PICTURES

THE BAPTIST AND METHODIST LADIES NOW GET PROCEEDS of the Picture Show each Tuesday and Saturday night until Jan. 30 at which time the Show will be discontinued.

4 REELS SATURDAY JAN. 23

4 REELS TUESDAY NIGHT Jan 26

Special pictures have been ordered for these shows and the public is invited to patronize them.

'The Passion Play'

Life of Christ from Birth to Ascension in beautiful colored motion pictures has been obtained for Friday and Saturday nights Jan. 29 and 30, also Saturday matine 2:00 and 4:00. Ascension 10:00.

This promises the greatest motion picture show ever in Hedley. You can afford to miss this great opportunity.

Saturday and Tuesday Night Shows

10 and 15 Cents

ENTERTAINMENTS

The Mystic Weavers held the first meeting of the new year with Mrs. J. S. Grundy Wednesday Jan. 13. Eleven members were present. After spending a very pleasant afternoon in fancy work and conversation the house was called to order by the president. After usual business was disposed of the semi-annual election of officers was held which resulted in the following being chosen: Mrs. T. T. Harrison re-elected President, Mrs. B. W. Moreman Vice President and Mrs. Ed Dishman re-elected Secretary and Treasurer. The meeting adjourned to meet with Mrs. T. T. Harrison Jan. 27 from 3 to 5 o'clock. Our hostess served delicious cake and hot chocolate.

A most enjoyable evening was spent at Mrs. Clint Phillips home Friday night. Several couples were present. Music and games were enjoyed by all. A nice two course luncheon was served. All unanimously voted Mrs. Phillips a charming hostess.

The Conference of Mothers held at the Wimberly home Thursday afternoon was attended by about thirty ladies of the town. The guests were met at the door by Mrs. J. L. Bain. The punch bowl was presided over by Mrs. T. T. Harrison. A unique as well as entertaining program was rendered. Representative characters of different countries outlined the different kinds of mothers in contrast to American mothers. Before departing the hostess served them hot rolls,

butter, jam and coffee. All went home thankful that that they live in a Christian land, and expressed themselves as having spent a pleasant afternoon.

TEXAS INDUSTRIAL CONGRESS

"Make Texas Farming Profitable" is the text of thousands of sermons preached in Bell, McLennan and other central Texas counties during the past week by Prof. Holden and a corps of lecturers including Texas bankers, merchants, business men.

Lecturers went into details as to how the farmer can grow other crops than cotton in profitable ways, following substantially the course outlined in "A Living at Home," a bulletin prepared by Prof. D. N. Barrow for the Texas Industrial Congress.

The Bulletin says, "The problem of the South today is how to live upon the farm with the least possible expenditure of cash, the least use of things the farm will not produce. Living means food and livestock, which furnishes a large part of our food, raises the question of feed. The cheapest meat on the farm, because it reproduces itself in relatively largest numbers, is poultry."

"The next most profitable farm meat animal is the hog. The average family throws away enough table scraps and slops to take care of a pig until fattening time. One pig, with the products of the poultry yard, will supply enough pork to keep a small family say a year.

"A half-acre garden can be

EDUCATION

EUNICE MORROW

Education requires extensive observation to enable us to even partly appreciate the wonderful extent to which all faculties are by mental cultivation. The nervous system grows more vigorous and active, the touch is more sensitive, and there is greater mobility in the hand. It has two values, value as knowledge and value as discipline, besides its use for guidance in conduct, the acquisition of each order of facts as also its use as mental exercises and its effects as a preparative for a complete living have to be considered under both these heads.

It is no advantage to a man to know much unless he lives according to what he knows, for knowledge has no other end than goodness.

The chief properties of wisdom are to be mindful of things past, careful for things present, and provident for things to come.

He that thinks himself the happiest man is really so, but he that thinks himself the wisest is generally the greatest fool.

By gaining a good education you shall have your reward in the rich stores of knowledge. You thus collect that which shall ever be at your command.

Pour into a glass a stream of water and at last it fills to the brim and will not hold another drop. But you may pour into your mind through a whole lifetime streams of knowledge from every conceivable quarter, on the contrary, your knowledge as you add to it, will itself attract still more as it widens your realm of thought.

The highest learned is to be wise and the greatest wisdom is to be good. The wise man looks forward into futurity and considers what will be his condition millions of ages from now as well as what is present.

School Paragraphs

Our school is still growing. New pupils are entering daily. The teachers are all doing noble work. Herman Horschler was absent from school this week. Prof. Meadows spent Saturday

made to produce vegetables the year round, and with a little expense in canning will practically cut out the grocery bill. Of course there will be flour, sugar, coffee and a few articles that the farm and garden do not supply, but their cost is not great and may be paid out of the profits from eggs, butter and garden products.

The Texas Industrial Congress will send this bulletin to each person entering its contests for prizes for the best yields of various farm and garden products—Texas Industrial Congress.

THE NEW GOVERNOR

Austin, Texas, Jan. 19—"Let us not lightly regard our duties. Let us not forget the solemn vows we have assumed. Let us labor to meet the expectation of the people."

Thus spoke Governor James E. Ferguson, on taking the oath

in Clarendon on business.

The school standard has been raised by the County Board.

Mrs. Meadows went to Memphis Friday night to have dental work done, returning Saturday.

Steps are being taken to convert Hedley Common School District into an Independent District. This means much to the school as a number of points in law favor independent districts.

We are glad to note the improvements that are being made in our school. Each and every pupil seems to be striving for more knowledge, and we are glad to say that our efficient teachers are doing all in their power for the advancement of each pupil.

Sunshine and Shadow

MISS WIGGINS

There is a tide in the affairs of men which if taken at time of flood, leads on to fortune.

Laugh and the world laughs with you; weep and—the laugh's on you.

True living is in being, not seeming; in doing each day that goes by some little good—not in dreaming of great things to do by-and-by.

There's a laddie who hailed from Deep Lake,

And got stuck in the ice up to his neck.

When asked, "Is you friz?" He replied, "yes, I is. But we don't call this cold at Deep Lake."

A touch of sympathy makes the whole world kin.

In spite of all, in erring reason's spite, One truth stands clear: "Whatever is, is right."

Farmer (to darkey in hen house) "Speak up, I say, or I fire."

Silence. F: "Speak, or here goes." Voice from within: "Boss, dar ain't nobody here but jes us chickens."

A little learning is a dangerous thing: Drink deep, or touch not the Pierian Spring.

Do not unto others as ye would not that they do unto you.

O, wad some power the giftie gie us To see oursels as ithers see us; And wha's the rub, sir, if by spells, We could see ithers as we see oursels.

of office today. He called upon the Democratic legislature to redeem their platform pledges. He promised to deal with this question in detail in his first official message which is to be read in both branches of the legislature tomorrow.

The new governor promises an efficient and economical administration and closed his brief inaugural address with an appeal to both branches of the legislature to "get acquainted with him."

The inauguration took place in the presence of thousands of persons, many of whom had come from distant parts of the state. Following the inauguration of Governor Ferguson, W. P. Hobby was inducted into the office of Lieutenant Governor.

The inaugural ball will hold attention tonight. Ex Governor and Mrs. Colquitt will remain over for the social event and then will go to Dallas where it is said the former governor will engage in the insurance business.

Educating the Boys in Feminine Pursuits

By C. G. ENTZINGER, Baltimore, Md.

To educate schoolboys in the feminine pursuits is nothing short of ridiculous, unless his ambition in life is to become a seamstress, or, more correctly speaking, a "seamster," or perhaps to pursue the vocation of "professor" of "mendology" in a "first aid to bachelors" home.

No one will deny that the accomplishment of properly plying needle and thread is to be desired by both sexes, but the necessary instruction could be just as well taught at home.

Possibly there may be some connection between the woman suffrage movement and this "industrial art" innovation. It would be unjust to accuse the suffragists of any selfish motive in educating our boys in feminine pursuits, yet anyone possessed of ordinary foresight can readily understand that with husbands trained in domestic pursuits the wife would have more time to devote to the duties which would be developed in the event of universal suffrage.

Allowing our "industrial arts" defenders the benefit of the doubt, we will add that possibly they are prompted by some philanthropic motive in teaching our boys to construct the many feminine accessories and adornments of which we have seen samples.

When Johnny has become sufficiently proficient in the manipulation of the crochet needle it will no longer become necessary for him to betake himself to the fancy goods department for a Christmas gift for his lady fair. All that he needs do is to purchase the necessary material and ply his trade, and, lo! on Christmas morning my lady beholds a man-made sweater coat protruding from her suspended hose! Wonderful foresight on the part of our twentieth-century educators, indeed!

Despite the publicity given the "industrial arts" plan and the rapidity with which the scheme is progressing, we have failed to notice any concern on the part of the manufacturers of bachelor buttons, shingle nails and safety pins, upon which men have always relied in emergencies during the absence of feminine assistance.

Chicago Has Disease Called "Rubberneckitis"

By WILLIAM E. MOONEY, Chicago

Curiosity seems to be an important characteristic of Chicagoans. It is peculiar that the people of the city that is noted for its hustle should be noted for their inquisitiveness. A person cannot very well travel a block in the busy section of Chicago without seeing a crowd of typical natives. What wonderful things are they looking at? Some one is selling perfumed toothpicks, a driver may be having trouble with a horse, or a policeman may be giving some information to a visitor. In most cases there is no good reason for the crowd.

Chicago develops the biggest crowd of "rubbernecks" in the world. Stand on any corner and take your watch out and gaze up abstractedly at some indefinite point. In about three minutes there will be about a hundred gaping sightseers grouped neatly about, and if you don't move on about that time you will either be arrested for blocking traffic or the crowd will mob you.

It is said the farmer is a rubberneck, but the true Chicagoan has the farmer beaten in endurance contests at low and lofty gaping and in ability to lose his thoughts and gaze nonsensically at nothing.

The farmer will gaze to learn, not because there is a crowd; but the average Chicagoan will stand before a window with a mechanical toy in it and actually push the small boy from a place of vantage.

This curiosity is not a desire for information. It is but a disease called "rubberneckitis," and it may or may not be caused by the hookworm.

Can the Chicagoan laugh at the interested farmer without having his laugh become a boomerang? It does not seem so.

Character Building Is of Importance

By ALLEN STEVENS, St. Louis, Mo.

Is there not a reflection cast upon an educational institution when one of its graduates goes wrong or becomes identified with fraudulent schemes of different kinds? From the college from which I graduated not one who has obtained a degree has turned out to be a criminal. I can truthfully say that young men who were given up as hopeless cases even by their parents were sent, as a last resort, to this small college, where they were given good moral characters as well as degrees.

Should not character building be as important a part of the curriculum as the degree itself? Educated rascals are the greatest menace to society, therefore why don't our good institutions of learning revoke diplomas and degrees when graduates, later in life, prove their unworthiness.

How are we to expect children to look up to our educational institutions when college heads set a poor example for them by refusing to revoke diplomas of criminals? Must the stamp of approval remain with rascals by the silence of college faculties when churches have their trials and throw out their undesirables, when lodges and societies expel members who are guilty of crimes?

It seems to me that college faculties or trustees owe something more to them than merely granting diplomas.

Telephone Nuisance Should be Abated

By N. McGOORTY, St. Louis, Mo.

There is one nuisance in this and other large cities which has become well-nigh intolerable, and something should be done to end it. I am referring to the "telephone hog," the person who will hold long-extended conversations on a party line, thus preventing others who really have occasion to use the line from doing so.

I had an experience of this sort a day or so ago. I desired to communicate with my wife on a matter of considerable moment. I tried to get my home phone for over twenty-five minutes. I appealed to the "central manager" of the telephone exchange. I kept ringing my number at intervals of a minute or two, all without avail.

I do not know the people who are on our line—it is a "two-story" line—but I do know that they are addicted to long conversations which, judging from such scraps as I hear when I pick up our receiver at home in an attempt to get the line, are of such absorbing moment as the discussion of a new waist, the latest scandal in their set, the charms of their male friends and matters of similar import.

I believe there is some rule of the company to prevent this hogging of party lines, but this rule appears more honored in the breach than in the observance. It is high time that something was done to abate the nuisance.

To educate schoolboys in the feminine pursuits is nothing short of ridiculous, unless his ambition in life is to become a seamstress, or, more correctly speaking, a "seamster," or perhaps to pursue the vocation of "professor" of "mendology" in a "first aid to bachelors" home.

Cape of Satin for Dressy Wear

A LONG and ample cape of black satin, lined with satin in a contrasting color, and interlined for additional warmth, develops a new idea in treatment of the neck. Here a wide ruff, like the body of the cape, makes an attractive finish and a protection for the throat at the same time. The plaiting of the ruff is graduated in width, growing narrower from the sides toward the front. But it is sufficiently wide to enfold the back of the head, the ears and the throat when the cape is fastened in the front.

A long silk-covered cord extends about the base of the ruff, terminating in two cabochons (made of the cord), one at each side. Long ends terminating in heavy silk tassels fall from the center of each of these silk ornaments.

A narrow ruching made of satin like that in the lining outlines the hem on the inside of the cape all around. It is a dainty finish, handmade and elegant.

This is one of the longest of capes and one of the few intended solely for evening or other dressy wear.

The cape, which occupied the center of the stage as the newest and most chic of wraps at the beginning of the season, did not capture the popular fancy, but was admired by a few as an attractive novelty.

There are many jeweled hair bands discriminating following among those who follow radical new departures in fashions.

The cape has been featured in combinations with other wraps, where it is usually short and suggests the cape of the cavalier type. Its best and most attractive development as a garment for protection is portrayed in the picture given here, where it is shown as a rich and graceful evening wrap.

Velvet Dresses With Tunics.

Although many dress skirts are in circular cut, this is rarely the case with velvet dresses, as the long tunic is especially good in velvet, says the Drygoods Economist. These long overskirts, as they may be called, require weight in the cloth to make them hang gracefully, and are, therefore, an attractive style for velvet. Circular skirts are very apt to hang unevenly in velvet, as the weight of the cloth drags down the skirt at the sides.

New Silk for Winter.

For more dressy toilettes the new fabric known as satin-regence, a soft silk that seems to have an almost invisible stripe in it, and the graceful amalgamation of tulle and fur and velvet will amply be exploited this winter. In the new claret or deep wine shade, satin-regence promises a flattering vogue.

Fancy Combs and Hair Ornaments

ALL sorts of fancy shell combs, or namental hairpins, hair bands and small barrettes, bespeak the return to favor of more elaborate styles in hair-dressing. The combs are shaped in so many different ways and made in so many different sizes that one concludes they are fashioned to be worn in any position on the head which suits the fancy.

A great variety in shell combs, pins and ornaments are set with rhinestones and sparkling colored stones. The combs and other ornaments are shown in tortoise colorings, amber, black, white, and gray. Besides white rhinestones there are settings in emerald, amethyst, garnet and topaz colors.

A popular comb, of which an example is shown in the picture, is made to wear when the hair is done in a French coil. It is long and the teeth are joined to a band which is sometimes narrower at one end than at the other, and sometimes pointed at the ends. This comb may be had with the teeth hinged on so that it can be adjusted to the head in different positions. A single row of stones, or a row extending all around the edge of the band, gives a pretty sparkle to this comb. Often the band is entirely encrusted with stones. This more than doubles the price of the comb without adding much to its attraction.

A very popular large shell pin is shown in the picture. One or two of these pins is thrust in the hair at the sides when it is coiled low. Or a pair is sometimes seen in a long French coil. The large Farrar comb is worn in

several different positions on the head and is a showy and splendid affair of many jewels. The teeth support a fan-shaped or scroll top which affords much surface for rhinestones.

A small ornamental pin to thrust in the hair coiled high on the head is shown in the picture, which is something between a comb and a pin, taking the place of either. It is of tortoise shell set with rhinestones, and made of filigree silver, ribbon and tinsel braid. And outside of ornaments of shell or metal are others of millinery and ribbon flowers.

JULIA BOTTOMLEY.

Rolled Pique Collars.

Rolled pique collars that are attached to vest fronts of the same can be added to any coat front, or will go with the one-piece dress that is always opened with a deep V at the neck. The pique in all these models is neither stiff nor limp; it has to be wired if it is to stand up about the neck. All the pique models are not plain; some of them are in very fancy weaves or have a little running spray of white mercerized embroidery along the edges.

Some pretty sets for dresses or coats are made of silk in gay bayadere stripes. The deep gauntlet cuffs are held together by cufflike buttons. The collars are of the same sailor shapes as the pique or the lawn.

Spring Colors.

Among the colors for spring are putty, greenish tans and grays, one tapestry blues and dark shades generally.

Wonderful Forests of Stone

REMARKABLE fossil forests exist in Yellowstone park, the most remarkable, it is believed, of the several fossil forests which have been discovered—there are others in Egypt, in California, and in Arizona—because in the Yellowstone most of the trees were entombed in their original upright position and not found recumbent and scattered about the ground, writes F. H. Knowlton of the United States geological survey in American Forestry.

In Arizona, for instance, the fossilized trunks have evidently been carried a long distance from where they originally grew. In the Yellowstone the trees now stand where they grew, and where they were entombed by the outpouring of various volcanic materials. Now as the softer rocks surrounding them are gradually worn away they are left standing erect on the steep hillsides just as they stood when they were living; in fact, it is difficult at a little distance to distinguish some of these fossil trunks from the lichen-covered stumps of kindred living species.

These fossil forests cover an extensive area in the northern portion of the park, being especially abundant along the west side of Lamar river for about twenty miles above its junction with the Yellowstone. Here the land rises rather abruptly to a height of approximately 2,000 feet above the valley floor. It is known locally as Specimen ridge, and forms an approach to Amethyst mountain. There is also a small fossil forest containing a number of standing trunks near Tower falls and near the eastern border of the park along Lamar river in the vicinity of Cache, Calfee and Miller creeks, there are many more or less

other material which entirely buried the forest, but so gradually that the trees were simply submerged by the incoming material, few of them being prostrated. On the raised floor of the basin, after a time, the next forest came into existence, only to be in turn engulfed as the first had been, and so on through the period represented by the 2,000 feet or more of similar beds. The series of entombed forests affords a means of making at least a rough estimate of the time required for the upbuilding of what is now Specimen ridge and its extensions.

On Amethyst Mountain. The fossil forest that was first brought to scientific attention is on the northern slope of Amethyst mountain, opposite the mouth of Soda Butte creek, about eight miles southeast of Junction Butte. The following account, by Dr. William H. Holmes, the discoverer of these fossil forests, shows the impression first made by them:

"As we rode up the trail that meanders the smooth river bottom (Lamar river) we have but to turn our attention to the cliffs on the right hand to discover a multitude of the bleached trunks of the ancient forests. In the steeper middle portion of the mountain face, rows of upright trunks stand out on the ledges like columns of a ruined temple. On the more gentle slopes farther down, but where it is still too steep to support vegetation, save a few pines, the petrified trunks fairly cover the surface, and were at first supposed by us to be shattered remains of a recent forest."

These trunks may easily be seen from the road along the Lamar river, about a mile away. They stand upright—as Holmes has said, like the pil-

TWIN TRUNKS ON SPECIMEN RIDGE

Isolated trunks and stumps of fossil trees, but so far as known none of these are equal to the fossil forest on the slopes of Specimen ridge.

Recently another extensive fossil forest has been found on the divide between the Gallatin and Yellowstone rivers in the Gallatin range of mountains, in Park and Gallatin counties, Mont. This forest, which lies just outside the boundary of the Yellowstone National park, is said to cover 35,000 acres and to contain some wonderfully well-preserved upright trunks, many of them very large, equaling or perhaps even surpassing in size some of those within the limits of the park.

One Forest Above Another.

One traversing the valley of the Lamar river may see at many places the faces of nearly vertical walls. These trunks are not all at a particular level, but occur at irregular heights; in fact, a section cut down through these 2,000 feet of beds would disclose a succession of fossil forests. That is to say, after the first forest grew and was entombed, there was a time with out volcanic outburst—a period long enough to permit a second forest to grow above the first. This in turn was covered by volcanic material and preserved, to be followed again by a period of quiet and these more or less regular alternations of volcanism and forest growth continued throughout the time the beds were in process of formation.

The area within which the fossil forests are now found was apparently in the beginning an irregular but relatively flat basin, on the floor of which after a time there grew the first forest. Then there came from some of the volcanoes, probably those to the north and east, an outpouring of ashes, mud flows and

lars of some ruined temple—and a closer view shows that there is a succession of these forests, one above another. In the foothills and several hundred feet above the valley there is a perpendicular wall of volcanic breccia, which in some places attains a height of nearly one hundred feet. The fossil trunks may be seen at this wall in many places, all of them standing upright in the position in which they grew. Some of these trunks, which are two to four feet in diameter and twenty to forty feet high, are so far weathered out of the rock as to appear just ready to fall; others are only slightly exposed; niches mark the places from which others have already fallen; and the foot of the cliff is piled high with fragments of various sizes.

One of the largest and best-preserved trees stands at the very summit of the slope. This trunk, which is that of a giant redwood, is 24½ feet in circumference without the bark and about twelve feet in height. The portion of this huge trunk preserved is the base, and it exhibits to a considerable degree the swelling or buttressing so well known in the living redwood.

CLOSING OUT SALE

On Buggies, Wagons and Farm IMPLEMENTS

Sale Begins Wednesday January 20----Closes Saturday February 6

WE ARE GOING TO CLOSE OUT OUR BUGGY, WAGON AND FARM IMPLEMENT BUSINESS. THIS IS TO BE A BONA FIDE CLOSE OUT SALE, NO MISTAKE. WE DO NOT EXPECT TO CARRY THEM IN STOCK ANY LONGER, AND WILL SELL THEM AT COST AND CARRIAGE EITHER FOR CASH OR GOOD NOTES DUE NEXT OCTOBER.

This is the first opportunity ever presented in this country where Hardware and Implements have been offered in a CLOSE-OUT SALE at Close Out Prices.

Also Low Prices On Dry Goods and Groceries

In view of the fact that we wish to close out the above lines, we take advantage of this sale to reduce our entire stock of Dry Goods and Groceries at a price that will save you money. Our entire stock will go at a sacrifice. We quote you only a few prices here so you may get an idea of the tremendous values we are offering. Every thing in the store goes at the same sweeping reduction.

Entered as second class matter October 28, 1910, at the postoffice at Hedley, Texas, under the Act of March 3, 1879.

Four issues make a newspaper month.

Advertising locals run and are charged for until ordered out, unless specific arrangements are made when the ad is brought in.

All Obituaries, Resolutions of Respect, Cards of Thanks, Advertising Church or Society doings when admission is charged, will be treated as advertising and charged for accordingly.

Mass meeting next Monday night You are expected.

There are some streets so bad that one dare not drive over faster than a walk. They will never be fixed until we incorporate.

Plant trees and be happy. Incorporate and be enterprising. Read the Informer and be informed. Advertise and be wise.

Be sure to attend the meeting of Hedley citizens next Monday night. A rousing time will be had, and if you are a well-wisher for Hedley and community you will be on hand.

Saturday, January 30, is Trade Day in Hedley. Let everybody come and bring somebody with you. Have a big day, meet your friends, swap horses, or any thing else you have. Make this a great day.

We know of no better way to try a man's faith in his town, or find how much civic pride and how much "boastiveness" that he has, than to start something for the public good and call for donation or support.

When Hedley people stand the filthy condition of the town long as they can most of them chip in and clean up. Some few do not. That few have closets that have never been cleaned and never will be until the city government steps in and makes the owners get busy.

When any item of news is not reported to the Informer it certainly is not our fault that it is not published. So, if you know anything, tell us. Don't wait until the paper is out, then look over it to see if we have the item, and if we don't have it, gloat over putting one by us.

When any improvement is to be made on the street or for any town improvement is to be made it is done by donation by enterprising citizens, and a few of big property owners do not donate one cent. Under city government every man pays according to what he is worth.

The useless and promiscuous scattering of paper and trash to blow over town, drifting against fences and otherwise making an unsightly town; lodging around and under buildings endangering them with fire; and other needless practices would be put out of business by incorporation.

Why not have a Free Planting Day in Hedley? Set some day and let every citizen plant trees. Should any citizen have all the trees he wants around his own place, then let him plant one, or more, in the city park or school yard. Hedley needs more trees. The Commercial Club ought to take this matter up.

There is a ravine running right through town that is called "Typhoid Draw" by the people who live on that side of town. Movement after movement has been started to straighten and drain it only to fall through for lack of encouragement. A city government would remedy it and do away with nine tenths of typhoid fever cases in Hedley.

The weekly newspaper promotes the interests of the town in which it is published to such an extent that it becomes impossible to place an estimate upon its worth. There is no enterprise that does so much for the corporation or the individual citizen as the paper. It stands opposed to the town knocker, the town kicker, the town fanatic and the town drones. It stands for action against dry rot. It stands for progress as against stagnation. It is ever ready to combat the schemes of visionaries and as ready to aid the constructive plans of the wise and level headed citizens. It is for the upbuilding of the community. The paper has not yet come into its own, however, because it is never appreciated to the extent of its worth by the people at large. Yet when battles are to be fought for town or country a rush is made to the newspaper office always to find the editor ready, frequently without hope of reward. Many other enterprises are encouraged by a bonus but rarely is the newspaper offered any such help and still more often not given the support it is entitled to. The editor and his paper stand as the bulwarks of defense against the attacks of evil or designing schemes effecting the good of the town or country. It works for the general public good.

WHAT HAPPENED TO THE COTTON LOAN?

FARMERS WANT TO KNOW.

Producers Tired of "Watchful Waiting."

By Peter Radford
Lecturer National Farmers' Union

The government officially estimates the 1914 cotton crop at 15,969,000 bales. This is the largest production in the history of the cotton industry. The 1911 crop held the record to the present year with a production of 15,690,701 bales. I estimate we have at least two million bales in the field, much of it deserted by the discouraged farmer and will probably never be gathered. The 1914 crop also ranks among the largest in production per acre, averaging 208 pounds per acre and reaches the low water mark in price. The price officially estimated for the 1914 crop is 6 cents per pound against an average price of 12 cents per pound in 1913 and a production of 182 pounds per acre.

Greatest Crop--Lowest Value.

The value of the 1914 crop is six cents less per pound, or \$480,000,000 less than the value of last year's crop. This is a greater financial blow to the South than the freeing of the slave and it has sent millions of Southern farmers and their families staggering down the thoroughfares of poverty, but the South is brave and can meet adversity. When the war was over we beat our swords into plow shares and we have the courage and ability to transform a calamity into a blessing.

The Farmers' Union asked Congress to meet the emergency by lending money on cotton so as to enable poor farmers to hold their crop, but the request was rejected, or rather modified by the government agreeing to join with bankers in providing a fund of \$135,000,000 for lending on cotton. The anti-trust law had a special construction placed upon it, the patriotism of bankers was appealed to and headlines full of hope were flashed across the columns of the leading newspapers of the nation for a few months, but where is the money? No farmer has ever seen a dollar of it. There is nothing quite so destructive to those in distress as false hope, and if this movement which has been so persistently heralded to the world has failed, we are entitled to know it.

I want to call attention to the fact that the farmer--the owner of the property involved--was never consulted in the transaction. The story was told him as children are told the story of Arabian Nights and the bed-time story of the rainbow with the pot of gold, and it seems to be about the same sort of literature. The farmers were never taken into the confidence or the councils of the business men and the government officials engaged in the transaction. We do not know why.

Farmers Have Squared Accounts Unaided.

It is perhaps sufficient to say that a business movement having or its component parts the most powerful forces on the American

continent made an honest and strenuous effort to help the farmer and failed, and the farmers of the South are now drinking the bitter dregs of that failure. Approximately three-fourths of the cotton crop is now out of the hands of the producer and the poor farmer who most needed the money has already squared accounts and has begun the struggle to overcome the deficit that has taken school books from his children, shoes off his wife and threatens the shelter of his family, and it is to his permanent relief that the government and the business men of the nation should now turn their attention.

The problem has three factors: the farmers, the business men and the government, and if all three elements will unite we can easily work out plans for relief, and the organized farmers of America are ready to do their share.

THE SEMI-WEEKLY FARM NEWS

Galveston and Dallas, Tex.
The best newspaper and agricultural journal in the South. Contains more state, national and foreign news than any similar publication. The latest market reports, a strong editorial page and enjoys a reputation throughout the Nation for fairness in all matters. Specially edited departments for the farmer, the women and the children.

THE FARMERS' FORUM
The special agricultural feature of The News consists chiefly of contributions of subscribers, whose letters in a place lend way voice the sentiment and experiences of its readers concerning matters of the farm, home and other subjects.

THE CENTURY PAGE
Published once a week, is a magazine of ideas of the home, every one the participation of a woman reader of The News about farm life and matters of general interest to women.

THE CHILDREN'S PAGE
Is published once a week and is filled with letters from the boys and girls who read the paper.

RATES OF SUBSCRIPTION
One year, \$1.00; six months, 50c; three months, 25c. Payment invariably in advance. Remit by postal or express money order, bank check or registered letter.

The blessings of her quiet life
Fell on us like the dew.
And good thoughts, where her foot-
steps pressed
Like fairy blossoms grew.

WHAT SHALL WE FEED THE CHILDREN?

We must remember in feeding growing boys and girls that food serves a double office—besides doubling the waste tissue lost in work and play, it must help the bodies to grow. That is the reason that a boy from twelve to fifteen years of age needs as much and as hearty food as a full-grown man.

Milk, eggs and meat are the foods that build tissue; cereals, fats and sugars give energy. Fruits and vegetables supply the mineral salts and materials which make good blood and bones.

The first foods mentioned are the most important, most expensive and most often poorly used. They can sustain life longer than any of the others.

Dietitians differ as to the time of introducing meat into the child's diet, but the most natural way is to give the child his energy foods in milk and combinations of milk and eggs until he has a good set of teeth to masticate the heartier meat.

Eggs should be given in various forms at least once a day. Scrambled with cold cooked rice will be a method which will economize with eggs, yet make a most palatable and sustaining dish.

Soft cooked eggs should be the rule for children, or when cooked in various ways, be sure that they are not cooked tough and hard.

The best meats for children are chicken, beef, lamb and bacon once in a while. Children should never be given meat oftener than once a day and then in small portions.

Cereals are of such variety that one may have a different kind every day in the year, naturally. Oatmeal, the sensible food, if long and well-cooked, and served with thin cream or top milk and sugar, makes a most wholesome breakfast for any child. In all cooking of cereals for children or for anyone, in fact, the long cooking is an important point to emphasize.

FRUITS FOR THE CHILD.

The importance of fruits and vegetables for children cannot be too well emphasized. Stewed fruit is safer for young children, but after reaching the age of seven, fresh fruit, if ripe and clean, is the greatest addition to the dietary. Orange juice may be given to a very young child provided it is not followed or preceded by milk. A teaspoonful of orange juice is one of the best tonics to give a baby. Stewed prunes are wholesome, as well as figs and dates in moderation for the school child. A child who is fed dried fruits will not crave sweets and cake which are unwholesome, especially between meals.

Bananas are such a good, cheap fruit that we should have them served oftener in various ways. They contain starch, and in consequence should be thoroughly ripe to be wholesome. They may be ripened at home, and when the skins are quite dark they are best to eat uncooked. One of the things about bananas which cause digestive troubles is the astringent substance next the skin. Carefully scrape the banana after the skin is removed and the irritating principle will be removed.

Bananas sliced with sugar and cream make a most tasty dish for a child's lunch or supper. As a salad, with lemon juice and olive oil or sweet salad with oranges and pineapple they make a nourishing dessert. Cooked bananas are especially nourishing. Baked with butter and a little lemon juice they are both palatable and nutritive. The cooking furthers the digestion of starch in the fruit and thus makes them more digestible.

Children's food should be, first of all, simple. Too many kinds of combinations are upsetting to the delicate stomach of a child. So in serving fruits see that they have variety, but not more than two kinds at one meal. What is true of fruits is also true of vegetables. They should be fresh and in a good condition. All vegetables containing woody fiber should be well and thoroughly cooked.

A Diplomat.
Briggs—Does your wife ever let you have your own way in anything?
Griggs—Yes, but she doesn't know it. You see, whenever I want to do anything I pretend I want to do the exact opposite.

Rebuking a Poet.
Poet—I wrote that poem to keep the wolf from the door.
Editor—Well, if the wolf reads the poem you can bet that he'll keep away from the door. Good day.

Sure Enough!
"Some people," remarked Morton Musingham, "look the same whether going to a funeral or a wedding."
"Well," replied J. Fuller Gloom, who is cordially detested for his pessimism, "why shouldn't they?"—Puck.

In These Piping Times.
Salesman—Perhaps this French doll will please the baby.
Buyer—No, sir; I'm strictly neutral. Gimme a drum and a gun and a box of soldiers and a toy pistol.

DISHES FOR THE FIRELESS COOK STOVE.

Brown in a frying pan in a small amount of fat a piece of mutton cut in serving-sized pieces, add a cupful of boiling water and a carrot with a few diced potatoes, season well, and when boiling hot set into the cooker for three hours. At the time of serving take from the cooker and reheat to serve.

Hungarian Goulash—Cut a quarter of a pound of salt pork into dice and cook in a hot frying pan until crisp and brown. Cut two pieces of round steak into small pieces, roll in flour and brown slightly in the pork fat. Add two cupfuls of tomatoes, three minced onions, one bay leaf, two cloves, six peppercorns, and a half cupful of diced celery. Add seasonings and cook all together until boiling hot. Set in the cooker to cook for two or three hours. Serve with potatoes or potato pancakes.

Fowl in Cooker—Dress and truss the fowl as for roasting. Place it in a large vessel of the cooker, add boiling water to cover, an onion stuck with three cloves, two tablespoonsful of rice, and a little coarsely chopped celery. Bring very slowly to the boiling point. Cook until boiling hot, place in the cooker and let stand two or three hours. Remove and reheat, sometimes all day to have a tender chicken.

Corned Beef—Place the piece of meat in cold water to cover, bring to the boiling point, and if the water seems very salty discard it and add fresh boiling water. Put boiling hot into the cooker and let cook over night. If one desires vegetables with the meat they may be added while reheating the meat, then cook for another three hours. If the cooker is opened during the cooking it must be brought to the boiling point again, as the steam escapes, losing much heat. Cabbage, turnips, carrots and all vegetables which are cooked with the meat should be boiled before being put into the cooker. It must be remembered that a much longer time is needed to cook all foods in the cooker.

THE ROAD TO WEALTH.

Economy is said to be the good road to wealth, and one of the best possible ways of exercising that excellent quality is in saving food stuffs. Hardly one woman in a hundred would think it worth while to save the feet of two or three fowls. Yet there is a large quantity of gelatin in the feet and they add very materially to the stock pot. There should never be a bone, raw or cooked, thrown away until it has passed through the stock pot. The trimmings from meat and many vegetables are also an addition to the soup stock flavor. The tough end of steak, if cut in small bits and cooked with vegetables, will make a most tasty stew, or cooked with macaroni and gravy makes a most hearty supper dish for a chilly, cold night. A speaker prominent in household economics is quoted as saying "that no economical woman needs a garbage pail." The garbage pail is too often the little leak that sinks the great ship of household efficiency.

What would one say to the woman who removes the marrow from the bones of steaks and stews and puts it into the garbage? Yet this is a common occurrence in many homes. Bits of fat that are not liked when cooked or are left after serving may be rendered and clarified, then used for shortening. Fats from ducks, chickens and geese are by many considered much better than butter for the cooking.

The small bit of fat which seemed too small to save might have been used to brown the vegetable for the stew or chowder. Egg shells are useful to settle coffee and clear soup. Wash eggs as they come from the market and the shells will then be ready to use. A half cupful of potato or cabbage may be used to flavor a cream soup.

If a cupful of cold rice is left, add it to two or three beaten eggs and have a good, hot supper dish. Cold eggs, either soft or hard cooked, may be used for garnishing. The soft eggs should be further cooked until hard. Chopped egg added to a white sauce and poured over toast will make the children a good supper dish.

Nellie Maxwell.

COMBINED ICE HOUSE AND REFRIGERATOR

Fig. 1.—Longitudinal Section of a Combined Ice House and Dairy.

(Prepared by the U. S. Department of Agriculture.)

Even where for convenience and economy it is desirable to have the dairy under the same roof as the ice house it is not satisfactory to attempt to combine the ice storage with a cold storage. When it is necessary to use ice for chilling milk and other dairy products it is better to remove the ice from the ice house or compartment and place it in a specially constructed ice box or refrigerator, rather than to attempt to maintain a cold room by storing the ice about and in contact with it. The chief argument against the combined arrangement is that it prevents the storage of ice in a solid mass. As a result the waste is much greater. Again, the requirements of the storage room and the refrigerator vary from time to time. Advantage can be taken of these fluctuations to husband the ice supply when the two are separate. There are decided ad-

Fig. 2.—Transverse Section of a Combined Ice House and Dairy.

vantages in having the ice supply convenient to the dairy house or refrigerator; but it is poor economy to build the refrigerator or cold store inside the ice storage. The arrangement suggested in figures 1 and 2 is to be preferred.

Where an abundant supply of natural ice can be harvested annually it will be a simple matter to maintain high-class refrigeration by installing a brine-circulating system. The principle on which this patented system works is the same as mechanical refrigeration, except that the cold is secured through a freezing mixture of ice and salt in a tank in which the primary coils are located, as shown at B in figure 3. As the brine in these coils becomes chilled it passes out through the bottom of the coils and slowly flows through the cooling C, which are located in the room. The heat of this room is absorbed by these chilled pipes, and as the brine warms up it passes out and

Fig. 3.—Diagram Showing a Combined Ice House and Gold-Storage Plant.

up into the primary coils, and in this way a continuous circulation is maintained between the two pipe systems. For convenience, the ice house can be made a part of the structure, so that the ice can be elevated above the storage chamber and directly into the crusher, which can be located in the attic above the primary coils indicated at B. As the drawing shows, the space above the cooling room might be utilized as a farm shop or for a coopersage, if one were to be installed in connection with an apple orchard. It would not be advisable to attempt to install this system without having an experienced engineer calculate the piping necessary for any given storage plant as well as the cooling tank. The room as necessary for the cooling tank is a very important one, and should be carefully specified.

This construction is adapted to small or to very extensive plants. The department of agriculture used this system in a plant which has been installed at the Arlington experimental

farm. The cooling room in this case is 28 by 30 feet with eight-foot ceilings. Sufficient space is thereby provided to store 800 barrels of apples.

Detailed information regarding the storage of butter and cheese may be had by those interested in two bulletins of the United States department of agriculture. Bulletin 83, bureau of animal industry, gives information on cheese, and Bulletin 84, bureau of animal industry, on butter. These pamphlets will be sent free of charge as long as the supply lasts, after which they may be purchased for a small price of the superintendent of documents.

GOOD QUALITIES OF MANURE

All Growing Plants Require Certain Food Elements Which Must Be Secured From the Soil.

Some farmers used to have the notion that the only reason they had for hauling manure onto the fields was to get it out of their way. This class of men would have thrown the fertilizer into a hole had one been handy. Of late it is difficult to find a farmer who does not believe in the fertilizing qualities of manure. Manure is the cheapest and most efficient fertilizer which the farmer can use upon his land.

Growing plants require certain food elements which must be secured from the soil. All plants require the same ingredients; but the amounts vary in different plants. The farmer who puts his land in good shape during the fall and winter by fertilizing it with manure will raise the big grain crops the following summer.

Live stock manure contains about 80 per cent of the plant food elements contained in the food eaten by the stock. This food was taken from the soil; so it is only reasonable that if it is not returned in some form the soil will become depleted. Barnyard manure is mixed with bedding, which contains the plant food elements taken from the ground that produced its growth. Naturally this combination is not as strong in fertilizing elements as pure manure; but it has immense value as a fertilizer. The bedding absorbs the liquids, which would otherwise be a loss. The organic portion of a load of manure is just as valuable for fertilizing purposes as the nitrogen, potash, acid, etc., contained in the manure. Before the organic portion is of value as a fertilizer it must pass through a process of rotting. This process turns it into humus—some of the elements in which many soils are most lacking.

Safest Kind of Farming.
The safest kind of farming is that which makes it possible for the farmer and his family to live well. Even if large crops which must be turned

CALOMEL SICKENS! IT SALIVATES! DON'T STAY BILIOUS, CONSTIPATED

I Guarantee "Dodson's Liver Tone" Will Give You the Best Liver and Bowel Cleansing You Ever Had—Don't Lose a Day's Work!

Calomel makes you sick; you lose a day's work. Calomel is quicksilver and it salivates; calomel injures your liver.

If you are bilious, feel lazy, sluggish and all knocked out, if your bowels are constipated and your head aches or stomach is sour, just take a spoonful of harmless Dodson's Liver Tone instead of using sickening, salivating calomel. Dodson's Liver Tone is real liver medicine. You'll know it next morning because you will wake up feeling fine, your liver will be working, your headache and dizziness gone, your stomach will be sweet and your bowels regular. You will feel like working. You'll be cheerful; full of vigor and ambition.

Your druggist or dealer sells you a 6-cent bottle of Dodson's Liver Tone

under my personal guarantee that it will clean your sluggish liver better than nasty calomel; it won't make you sick and you can eat anything you want without being salivated. Your druggist guarantees that each spoonful will start your liver, clean your bowels and straighten you up by morning or you can have your money back. Children gladly take Dodson's Liver Tone because it is pleasant tasting and doesn't gripe or cramp or make them sick.

I am selling millions of bottles of Dodson's Liver Tone to people who have found that this pleasant, vegetable, liver medicine takes the place of dangerous calomel. Buy one bottle on my sound, reliable guarantee. Ask your druggist or storekeeper about me.

WORMS.

"Wormy", that's what's the matter of 'em. Stomach and intestinal worms. Nearly as bad as diphtheria. Cost you too much to feed 'em. Look bad—are bad. Don't physic 'em to death. Spohn's Cure will remove the worms, improve the appetite, and tone 'em up all round, and don't "physic." Acts on glands and blood. Full directions with each bottle, and sold by all druggists. SPOHN MEDICAL CO., Chemists. Cochen, Ind., U. S. A.

Put to the Test.
I believe that those who get His Daughter's Balm—Yes, I'm a Sober benefit from the labor should be made to perform the labor.
The Old Man—Fine! You might begin by setting up the parlor stove for the winter.—Town Topics.

DON'T TAKE CALOMEL

when your liver gets sluggish, and you suffer from Headaches, Biliousness, Constipation or Dizziness, get a 25c bottle of BOND'S LIVER PILLS, from your dealer. They are small, mild, safe, effective and inexpensive and they will relieve you.—Adv.

Density of Population.
By density of population is meant the number of persons to each square mile of land area. Excluding the District of Columbia, Rhode Island, with 508.5 persons per square mile, is the most densely populated state in the Union, closely followed by Massachusetts, New Jersey and Connecticut. In the order named, the only states which have more than two hundred persons per square mile.

CARE FOR YOUR HAIR

By Frequent Shampoos With Cuticura Soap. Trial Free.

Precede shampoos by touches of Cuticura Ointment if needed to spots of dandruff, itching and irritation of the scalp. Nothing better for the complexion, hair, hands or skin than these fragrant supercreamy emollients. Also as preparations for the toilet.
Sample each free by mail with Book. Address postcard, Cuticura, Dept. XV, Boston. Sold everywhere.—Adv.

Lapsus Linguae.
"I shall be awfully stupid now," exclaimed a wife who had returned from a visit to her dentist.
"Why so, my dear?" queried her husband.
"Because I have had all my wisdom teeth pulled out," replied the lady.
"Oh, my love, the idea that wisdom teeth have anything to do with wisdom is a foolish one! If you were to have every tooth in your head pulled it couldn't make you any stupider, you know!"
Curtain.

STOP EATING MEAT IF KIDNEYS OR BACK HURT

Take a Glass of Salts to Clean Kidneys if Bladder Bothers You—Meat Forms Uric Acid.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authority, because the uric acid in meat excites the kidneys; they become overworked; get sluggish; clog up and cause all sorts of distress, particularly backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders.
Jad Salts cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.—Adv.

Clean Field for Ducks.

Those who keep ducks should often place them in a new run, and the one just vacated should be sown to rye. Rye is an excellent crop for disinfecting the runs and, besides, it furnishes considerable green feed.

Get Rid of Roosters.

It is a good plan to get rid of the roosters, old and young, as soon as possible. The old ones are eating their heads off and the young ones should not be kept long after they reach marketable size.

All There Was for Him.

A poor shoemaker's apprentice was sent to his master's home with some work. It was early in December, and when the lad arrived at the house he found the good wife engaged baking the special bread ready for Christmas.

The smell was delicious, and sniffing strongly, the apprentice exclaimed heartily:

"Eh, missus, but your spice-loaf smells grand."
"Ah, well, lad, there mun tak some good smells, for it will be all thou wilt get."—Tit-Bits.

ERYSIPELAS AND CHILBLAINS
Alleviated and cured by the use of Tetterine. It is an old established and well known remedy for Eczema, Tetter, Ground Itch (the cause of Hookworm Disease), Infant Sore Head, Chaps, Chafes and other forms of skin diseases.

J. R. Maxwell, Atlanta, Ga., says: "I suffered agony with a severe case of eczema. Tried six different remedies and was in despair, when a neighbor told me to try Shuprine's Tetterine. After using 12 worth of your Tetterine and soap I am completely cured. I cannot say too much in its praise."
Tetterine at druggists or by mail 5c. Soap 1c. J. T. Shuprine, Savannah, Ga., Adv.

Extreme Devotion.

"Mrs. Gadders is all wrought up over the plight of the Belgians."
"Indeed, she is. Why, she even neglects her poodle to attend meetings of relief committees."

Pneumonia? Apply Hanford's Balm. Rub it on and rub it in thoroughly, until the skin is irritated. Adv.

It's Nature.
"I've got work with a circus, tending to the animals."
"What a beastly job!"

Dubious.
"Your wife is out of danger then?"
"I shall think so unless the doctor comes back."

—Take CAPUDINE—

For HEADACHES and GRIP. It's Liquid—Prompt and Pleasant.—Adv.

It is hard for a woman to hold her husband's love when she can't even hold her tongue.

Finest tobaccos, skillfully blended—that's the source of that rare flavor which has made FATIMA CIGARETTES famous.

FRUIT LAXATIVE FOR SICK CHILD

"California Syrup of Figs" can't harm tender stomach, liver and bowels.

Every mother realizes, after giving her children "California Syrup of Figs" that this is their ideal laxative, because they love its pleasant taste and it thoroughly cleanses the tender little stomach, liver and bowels without gripping.

When cross, irritable, feverish, or breath is bad, stomach sour, look at the tongue, mother! If coated, give a teaspoonful of this harmless "fruit laxative," and in a few hours all the foul, constipated waste, sour bile and undigested food passes out of the bowels, and you have a well, playful child again.

The Washington Star relates that Mayor Baker of Cleveland, in defense of a political movement that had been attacked, said the other day:

"It's an honest movement and a straightforward movement, and they who attack it are as censorious as the Seabright old maid."

"A Seabright old maid was talking to a sunburned college boy on the beach. A pretty girl passed and the old maid said:

"There goes Minnie Summers. You took her to the hop last evening, didn't you?"

"Yes," said the college boy, and he added politely: "As I was taking leave of Miss Summers after the hop it dawned upon me—"

"It dawned?" said the old maid. "You kept her out till dawn! That's what these new dances lead up to!"

IF HAIR IS TURNING GRAY, USE SAGE TEA

Don't Look Old! Try Grandmother's Recipe to Darken and Beautify Gray, Faded, Lifeless Hair.

Grandmother kept her hair beautifully darkened, glossy and abundant with a brew of Sage Tea and Sulphur. Whenever her hair fell out or took on that dull, faded or streaked appearance, this simple mixture was applied, with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Hair Remedy," you will get a large bottle of this old-time recipe, ready to use, for about 50 cents. This simple mixture can be depended upon to restore natural color and beauty to the hair and is splendid for dandruff, dry, itchy scalp and falling hair.

A well-known druggist says everybody uses Wyeth's Sage and Sulphur, because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and abundant. Adv.

Full of Spirit. "Your cousin, Sarah, is such a volatile creature."

"Yes; we call her Sal Volatile."

Delicate Point. "There are ladies on the jury."

"They ought to favor a lady defendant."

If some men had their lives to live again they probably wouldn't leave so many dollars for their heirs to scarp over.

Backache Warns You

Backache is one of Nature's warnings of kidney weakness. Kidney disease kills thousands every year.

Don't neglect a bad back. If your back is lame—if it hurts to stoop or lift—if there is irregularity of the secretions—suspect your kidneys. If you suffer head-aches, dizziness and are tired, nervous and worn-out, you have further proof.

Use Doan's Kidney Pills, a fine medicine for bad backs and weak kidneys.

A Texas Case

"My dear Mr. Doan, I suffered intensely from backache, caused by my kidneys and the attacks were worse when I was on my feet. Sharp twinges darted through me and I was distracted by headaches. Doan's Kidney Pills were just what I needed, giving me a complete cure. I am glad to say that it has lasted."

Get Doan's at Any Store, 50c a Box. **DOAN'S KIDNEY PILLS** FOSTER-MILBURN CO., BUFFALO, N. Y.

BLACK LEG LOSSES SURELY PREVENTED by Cutter's Blacking Pills. Lotion, cream, brush, rubber, preferred by Western stockmen because they protect their horses' legs from frost, rain, mud and other annoyances. Write for booklet and testimonials. 10-cent price. If you order, order from THE CUTTER LABORATORY, Berkeley, California.

THE KITCHEN CABINET

No one can live happily who regards himself alone, who turns everything to his own advantage. They must live for another if they wish to live for themselves.

ICY DESSERTS.

The fact that ice and snow surround us does not deprive us of the taste for frozen dishes and the convenience of freezing water to make ice helps to make the dessert a very reasonable one. Put a pail or pan of water outside over night and have a block of ice for the freezing of the dessert.

Frozen Fig Custard.—Beat the yolks of six eggs until well broken, add to a quart of rich milk and a cup of granulated sugar. Cook until the spoon is coated and set away to cool. When cold, flavor with lemon and add a cup of steamed, finely chopped figs. Then add a pint of whipped cream, the whites of the eggs beaten stiff and turn into the freezer. Open and stir the fruit that has settled to the bottom after it is half frozen.

Frozen Chocolate.—Melt four ounces of chocolate by putting into a pan over hot water, add one and a half cupsful of granulated sugar and stir until this is melted; then add a cupful of rich milk or thin cream and boil for one minute. Meanwhile, have a tablespoonful of gelatin melted in a quarter of a cupful of cold water, and when softened, add to the hot mixture. When cold add a teaspoonful of vanilla, a pinch of salt and three cupsful of cream, whipped. Pour into a mold and pack in ice and salt. Four parts of ice to one of salt.

Coffee Ice.—Make a quart of strong, clear coffee, sweeten it with six tablespoonfuls of sugar, cool and partly freeze. When it is like brappe add the whites of two eggs, beaten stiff, and finish freezing. Serve in sherbet glasses with whipped sweetened cream on each glass.

Fig Charlotte Russe.—Have ready six or eight figs cooked tender in boiling water, sweeten with three tablespoonfuls of sugar and add two tablespoonfuls of lemon juice. Soften a fourth of a package of gelatin in a fourth of a cupful of milk, add three-fourths of a cupful of hot milk, one-fourth of a cupful of sugar, the figs cut in bits and the syrup in which they were cooked. Turn into glass cups lined with ladyfingers; decorate with strips of figs.

SAVORY SAUCES AND GRAVIES.

The making of a savory, well-seasoned sauce, is an art. The commonest dishes, when dressed with an appropriate sauce, become dignified dishes.

A touch of garlic, a dash of tabasco or Worcestershire, a teaspoonful of mushroom sauce and a jar of spices and herbs will give variety to a score of sauces. One of the methods so commonly used that gives a flat, stale and colorless sauce or gravy is the one of stirring milk with flour and turning that into the roasting pan with the gravy. A rich brown sauce may be made by using the very same materials, but combining them differently. Put the flour, a tablespoonful or two, in the hot fat in the pan, stir until well browned, then add the liquid, whether milk or stock or water.

By adding caramel or kitchen bouquet to a gravy the color is made richer or by browning the butter and flour and keeping it on hand to use for thickening sauces and gravies, the same results obtain.

Flavoring Spices.—Take a fourth of a pound of black pepper, two ounces of ginger, one ounce of grated nutmeg, the same of allspice, cinnamon and cloves, all ground, and a half pound of salt. Put these ingredients through a fine sieve several times, to be sure they are well mixed and blended, and keep closely covered to keep the salt dry. It is a good plan to thoroughly dry the salt before it is mixed with the other ingredients. Add in small quantities as needed to season sauces.

For the plain white sauce, which is so much used for fish, meat and vegetable sauces, prepare by melting two tablespoonfuls of butter, adding two tablespoonfuls of flour when the butter is bubbling hot, then when well mixed add a cup of rich milk. The sauce is varied by the amount of flour and butter, as well as the amount of liquid added.

This same sauce may be used, with a quart of milk, for an oyster stew, or with chopped, cooked oysters in it, for a fish sauce; with capers, for a mutton sauce and with any kind of fish for fish croquettes.

Nellie Maxwell.

Automobiles and War. The automobile industry is one of the few lines of American manufacture which will get more permanent good than harm out of the European war. The purchase of motor trucks by Britain and Russia is only one incident of this advantage. The big fact is that for years to come American manufacturers will have almost a monopoly of the home market, and an "edge" on the market of South America as well. It will take European makers many years to repair the ravages of conflict in their own lands.

I Took Cold It Settled In My Kidneys.

I Used Peruna. Am all Right Now. I owe my Health to Peruna.

Mrs. Anna Linde, R. F. D. 4, Dassel, Meeker Co., Minn., writes: "For two years I suffered with that terrible disease, chronic catarrh. Fortunately, I saw your advertisement in my paper. I got your advice, and I took Peruna. Now I am well and the mother of two children. I owe it all to Peruna. I would not be without that great tonic for twice its cost, for I am well and strong now. I cannot speak in too high terms of its value as a medicine."

TAKE Tuff's Pills The first dose often establishes the bowels, giving elasticity of mind, buoyancy of body. **GOOD DIGESTION,** regular bowels and solid flesh. Price, 25 cts.

ARMORED CAR IN WARFARE

European Armies Have Found it of the Greatest Value in Their Operations.

Although an engine new to warfare, the armored motor car has proved extremely useful, especially for outpost and scouting duty. Fast, silent, and mobile, it covers a vast amount of ground on the splendid roads that crisscross the field of war in western Europe. Most of the cars are incased in a light frame of tough steel plate that ranges in thickness from three-sixteenths of an inch to a quarter of an inch, and that is impervious to rifle and machine-gun fire. All the vulnerable parts of the motor, such as the radiator and steering gear, and in some of the newest cars the wheels, are protected by the steel covering. The wheels, both wood and wire, are said to withstand the roughest sort of usage. Accidents to the tires are much less common than anyone would expect. The cars carry a light armament—one or two machine guns so mounted that they can be swung through a complete circle—and a large supply of ammunition. The crew, which may number from four to eight or more men, are armed with rifles and revolvers. Some of the cars have a steel superstructure that rises from the chassis frame high enough to enable the crew to stand upright, and that is capped with a domed roof, from which bullets and shrapnel usually fly off at a sharp angle without even denting the steel.—Youth's Companion.

ENDS DYSPEPSIA, INDIGESTION, GAS

"Pape's Diapepsin" cures sick, sour stomachs in five minutes—Time It!

"Really does" put bad stomachs in order—"really does" overcome indigestion, dyspepsia, gas, heartburn and sourness in five minutes—that—just that—makes Pape's Diapepsin the largest selling stomach regulator in the world. If what you eat ferments into stubborn lumps, you belch gas and eructate sour, undigested food and acid; head is dizzy and aches; breath foul; tongue coated; your insides filled with bile and indigestible waste, remember the moment "Pape's Diapepsin" comes in contact with the stomach all such distress vanishes. It's truly astonishing—almost marvelous, and the joy is its harmlessness. A large fifty-cent case of Pape's Diapepsin will give you a hundred dollars' worth of satisfaction. It's worth its weight in gold to men and women who can't get their stomachs regulated. It belongs in your home—should always be kept handy in case of sick, sour, upset stomach during the day or at night. It's the quickest, surest and most harmless stomach doctor in the world.—Adv.

Effeminate. Gabe—Why do you say he is effeminate? He doesn't act that way. Steve—He always wants the last word.

There Ain't That Much. "Pop, what's a ptoerat?" "A man who has as much money as I'd like to have."

YOUR OWN DREGGITY WILL TELL YOU Try *Washo's Eye Remedy* for Red, Weak, Watery Eyes and Greenish, Itchy, Stinging, Burning Eye Sore. Write for Book of the Eye 50c and 75c. *Washo's Eye Remedy* Co., Chicago.

You seldom hear of a man marrying a woman to reform her.

"MY HEALTH IS PERFECT"

So Says A North Carolina Lady In Telling What She Owe To Cardinal, The Woman's Tonic.

Mt. Airy, N. C.—Mrs. Ada Hill, of this place, says: "About six years ago I got in very bad health. I suffered terrible pains in my abdomen and back. I dreaded to see the sun rise and I dreaded to see the sun set and I suffered such agony. No one except myself will ever know how badly I suffered. The doctor said I was suffering as a result of the menopause."

As nothing gave me any relief, I asked the doctor if I hadn't better try Cardinal. He said, "It might help you," and told my husband to get me a bottle. At this time I was so weak I could not lift my head, and my voice was so weak, people had to lean towards the bed to hear what I said. I looked so sad and had such a dark color that I looked like a dead woman, and my relatives thought I would never get up again.

I took one bottle of Cardinal and it relieved the pain and suffering so much that my husband got another bottle, and that improved me still more. I began to strengthen and gradually got well. I have now had better health for six years, than I ever had in all my life. I have taken no medicine since, and my health is perfect. Cardinal is the best medicine a woman could use."

Try it. At drugstore.—Adv.

TEXAS PROUD OF THIS MILL

Takes in Raw Cotton at One End and Turns Out Finished Product at the Other.

There is only one mill in the world where cotton is grown at one end of the plant, ginned, put through the different processes of manufacture, bleached at the other end, and shipped out as a finished product—sheets and pillow cases—direct from the factory to the dealer.

Texas has this unique mill, and is mighty proud of it, for it is an evidence of the state's greatness in the great cotton industry. There are plenty of mills and businesses scattered all the way from Maine to Georgia, but nowhere is the significance of the complete cotton mill which the late C. W. Post established in Post City, Garza county, Texas, down in the "South Plains," and whenever a Texan sees goods bearing the brand "Post" and "Garza" he feels a bit puffed up. Also he shows a decided preference for these goods grown and made in his state, which is only self interest, after all, for every dollar spent for them goes back in a Texas payroll for Texas labor, or to Texas farmers for Texas cotton at a time when they surely need it.

Mr. Post spent part of his early life in West Texas and the Panhandle, and he grew to know the country well and to love it and believe in its great future. So when he grew wealthy he bought a quarter of a million acres on the edge of the Llano Estacado, the land of Spanish and Indian swamps, and there built a shaded city of brick and iron and timber to surround a cotton industry that should be the pride of the state. He provided ample capital and insisted that the employees should be well paid and well housed and the product of the mill should be comparable with the best turned out by any plant in the country. The manager adopted a plan that has been especially pleasing to the dealer, by which any quantity of goods is shipped direct from the mill to the purchaser, freight prepaid. This means much, for railroad tolls to the extent of about 10 per cent of the value are tucked away in the price of similar goods manufactured in the East.

One great lesson the European war is teaching America is self support and self containment. We will soon be making the velvets we used to get from Belgium, the fine stuffs and chemicals we obtained from Germany, and so forth, and this mill is evidence of what a state like Texas can do in the same line. The Fort Worth Record said recently:

"Garza county does not offer the only opportunity in Texas. There are a hundred other counties where the same thing can be repeated—yes, two hundred. And if there were two hundred other cotton mills in Texas they would still take but a fraction of the staple the state produces annually, and they would put fifty thousand more people at work and keep some millions of money in Texas that now goes away."

Hicks' CAPUDINE CURES HEADACHES AND COLDS—Easy To Take—Quick Relief.—Adv.

'Twas Ever Thus! The Elm—What was your ambition? The Oak—As an acorn I planned to grow up to be a Christmas tree.

For frostbites use Hanford's Balsam. Adv.

The average boarding house chicken is a great help to the dentist.

Have Druggists "Harris, I am beginning to believe the lady looks like you." "Are you, dear?" "Yes, I notice it more and more every day. It's so glad." "Do you really want him to look like me?" "Of course I do. I've been sorry ever since we had him christened that we didn't give him your name."

Sometimes Apply It Lightly. For cuts, burns, scalds, sores and open wounds always apply Hanford's Balsam lightly, but be sure that it covers and gets to the bottom of the wound. A few light applications are generally all that is needed to heal this class of difficulties. Adv.

The Office Boy's Gossip. "Hey, why did you give me the signal to duck out of my office yesterday afternoon, did you not know that the lady was my wife?" "Yes, sir, that was why."

That Would Be Plenty. "Well, my good woman," said the stammerer, "I must be going. Is there anything I can do for you?" "Only that," responded the embarrassed one wearily.

There isn't much hope for the bride who can't learn to sew by the time her husband's wedding garments need patching.

READ THIS
SUCCESSFUL YOUNG AUTHOR
Remarkable Sale of "The Call of the Cumberlands," Written by Charles Neville Buck.

Although only thirty years old, Charles Neville Buck, author of "The Call of the Cumberlands," has traveled far and done much. Although a lawyer by profession, it was newspaper work that brought him into connection with the lawless feudists of the Kentucky mountains and that is to a certain extent responsible for the plot of his story.

It is rare for a man of Mr. Buck's youth to be the author of a hundred thousand seller, but "The Call of the Cumberlands" has already passed that amount.

The story has been dramatized and the play has met with unusual success throughout the country.

We have secured "The Call of the Cumberlands" as our next serial and the first installment will be run in

SOME GOOD ROAD WORK BEING DONE

A stretch of road from the northeast corner of the Clark plantation south to the railroad has been undergoing some badly needed work lately. It was the worst stretch of road on the Colorado to Gulf Highway in Donley county. It has been plowed and graded from one end to the other, steep places cut down and in the ravines, culverts have been put in. E. R. Clark is overseeing the work, and he knows how. Good roads add to the value of Donley county real estate.

NEW BUILDING BEING BUILT

Mesdames Ozier and Franklin let the contract to J. C. Marsalis this week for a building just north of Dr. Ozier's office which they will occupy with millinery and millinery accessories. Mr. Marsalis began work Wednesday and is going right up with the building. Watch Hedley Grow.

ENTERTAINED AT DINNER

Mr. and Mrs. W. E. Reeves entertained a few friends with a six-o'clock dinner Thursday. After the guests had partaken of a sumptuous dinner they retired to the parlor where splendid music was rendered. It was voted a most pleasant event.

Dr. J. B. Ozier and W. G. Brinson went to Dallas Saturday night to see Uncle Bill Brinson who was in a critical condition. Dr. Ozier returned home Monday, and W. C. stayed in Dallas with his father. Latest reports do not hold out much hope for Uncle Bill.

Does a saving of \$150 appeal to you? I have a \$350 piano that I must sell. Will take \$175 cash, or \$200 part cash and trade. This instrument is as good as new, been used about 9 months. Call or write Art Jaynes, Memphis, Texas. 6tf

Read the advertisement of the Moving Picture Show on front page. For Friday and Saturday night of next week the noted drama "The Passion Play" has been obtained and will be a feature of merit, the lack of which has never before come to Hedley.

Clarendon had a ten thousand dollar fire last week. Among the losers were the Light & Power Co., the Southwestern Telephone Co., Denver railroad, Galbraith-Foxworth Lumber Co. and Bennett & Sims Elevator.

Modern Priscilla, Pictorial Review and Ladies World, all three \$3.00, and Informer \$1; all four for the extraordinary price of \$2.65.

Texas Senator comments

The Gov. of Oklahoma said the Ex-Gov. of Ark. told him the Atty. Gen. or La. stated that the Treas. of N. Mex. overheard Lucindy tell Safrony that Jeems heard Senator Culberson assert in the Senate that J. B. King's place is the most up-to-date, modern equipped, and gives the best service of any in Hedley. (adv)
