VOL. V

HEDLEY, DONLEY COUNTY, TEXAS, OCTOBER 1, 1915

NO. 43

### The Land of Hogs, Corn, Cotton, Kaffir, Maize, Feterita, Cane, Fruit and Vegetables, Good Soil and Climate

## C. F. DOHERTY'S FARM HOUSE DESTROYED BY FIRE

Tuesday the two story farm house of C. F. Doherty northeast of town was burned to the ground with all its contents. The fire seems to have originated from a defective oil stove, and was in a mass of flames in a very few minutes, and before help could arrive was too far advanced to permit saving anything. We understand there was no insurance.

## J. G. CULWELL DIED SUNDAY

J. G. Culwell died at the home of his son, O. R., in Hedley Sunday evening after a lingering illness. He was laid to rest in Rowe Cemetery Tuesday morning. Funeral services were held at the family home conducted by Rev. M. L. Story, assisted by Rev. C. W. Horschler and Misses Dilbeck and Sallee, and attended by a large crowd of friends.

Mr. Culwell was born Feb. 1, 1841, in Washington county, Ark.; served in the Confederate army; was a member of the M. E. Church and lived a consistent Christian life. He leaves four sons, O. R., of this place; A. G., of Weston, Texas; R. W., of Achillee, Okla.; and Paul of Altus, Okla. All were present at the funeral of their father.

The Informer and friends extend sympathy to the relatives of the deceased in their sad loss.

### Card of Thanks

We wish to express our sincere thanks to the neighbors and friends who so kindly assisted and sympathized with us in our late bereavement in the death of our father.

Words cannot express our feelings of gratitude and appreciation for the kindness and sympathy of these dear friends in time of need. There is a warm feeling in our hearts for you that never can be forgotten. It pleases our Father in Heaven so much for His children to show kindness to each other, and in the last day He will reward you for these kind acts. May God bless each of you.

O. R. Culwell and Family.  
A. G. Culwell.  
R. W. Culwell.  
Paul Culwell.

### DON'T FORGET

We still have all kinds of feed, and everything delivered within city limits. Get our prices before buying. Phone 86.  
Food & Plaster.

### CHANGING MEETING

...the revival meeting...  
...the natural home for the man of the soil...  
...the demonstrated certainty...

## ASSOCIATION ORGANIZED

The delegates from sixteen Baptist churches of Donley and Hall counties met at the Baptist church in this city at ten o'clock a. m. Monday to organize an association. After devotional exercises they went into a permanent organization.

J. F. Faulkner was chosen moderator and E. E. Walker secretary.

J. W. Hembree was selected missionary for the association. The next fifth Sunday meeting will be held at Estelline; the meeting being called for Thursday before the 5th Sunday.

The next annual association will be held with the Windy Valley church, three and one half miles from Lella Lake. There were about sixty delegates present and all were enthusiastic.

The Association will be known as "The Panhandle Baptist Association."

In connection with this association the Ladies Auxiliary was organized. Mrs. Mollie E. Gray of Clarendon was elected president. Mrs. J. G. McDougal of Hedley vice president. Mrs. Effie L. Houghton of Memphis corresponding secretary and treasurer. Mrs. Carrol recording secretary.

Their meeting will be held in conjunction with the Panhandle Baptist Association—same time and place.

A new office was created, that of "general organizer" and Mrs. Cora Oxher Johnson was elected to this office. Her duties will be to visit the churches and organize the various departments of Ladies Aid and Sunday School and such organizations.

The ladies of the Baptist church served an elegant dinner and supper in the dining room of the church to the delegates and friends.—Memphis Democrat.

## REVIVAL MEETING CREATING COMMUNITY-WIDE INTEREST

The revival meeting conducted by Evangelists Misses Dilbeck and Sallee has been growing in interest and many conversions to date. The tabernacle is crowded at every service, and the services are of the "old time religion" variety. Miss Dilbeck has been preaching some soul reaching sermons, and with the assistance of Miss Sallee's singing, many hardened sinners are caused to see the error of their way and turn to the Saviour. No such revival has been held in Hedley for a long time. The meeting will likely be brought to a close tonight.

Roy Kennemer left Thursday for Childress where he has accepted a position with a dry goods firm. Roy has been working for O. N. Stallworth the past few months and made many friends while here. He resigned his position to accept the one at Childress. L. C. Hall arrived last night from Dallas to take charge of the grocery department of Mr. Stallworth store, which he held a few months ago.

## BOLES OPENS A BRANCH STORE AT MCKNIGHT

Chas. Boles opens a branch store at McKnight tomorrow. He has built a nice store building there and will carry a line of groceries and staple dry goods. W. A. Pierce will be the manager of the new store. They will make special prices on their goods opening day. With a store, a sign and a new school building McKnight will be in the front rank of Donley county communities.

## TORNADO AND HAIL LOSSES ADJUSTED

Clarendon Ions, special agent and adjuster for the Saint Paul Fire & Marine Insurance Co., was here on Friday of last week and Wednesday of this week adjusting tornado and hail losses for that company. All were adjusted satisfactorily to the policy holders.

Coal—Plenty of it.  
Wood & Plaster.

## Naylor Springs

James K. Drinnon and family have returned from a very enjoyable trip to the plains.

Carl and John Naylor have returned from Amarillo where they visited relatives.

Messrs. C. L. Fields, T. N. Naylor, A. O. Hefner and Miss Ruth Fields attended the Baptist Association in Memphis Monday.

J. S. Hall and family have just returned from a several weeks visit with relatives, reporting an excellent time.

Some of the neighborhood have been attending church services at Hedley during the revival meeting there.

Glad to note Grandma Gant is improving.

Mrs. M. O. Barrett is enjoying a visit from the Muses and Mr. Langford of Lella Lake.

NELDA.

The City Council of Hedley has appointed J. M. Bozeman as City Marshal. The Council has received tags for dogs, and has instructed the Marshal to take up all dogs without tags after October 15. Pay your dog tax now and get a tag. Adv.

## G. W. B. M. MEETING

The G. W. B. M. meets with Mrs. A. N. Wood Oct. 6. Following is the program:  
Hymn, Nearer My God to Thee. Prayer.

Bible lesson. Comes of the Bible. The tent of Isaac and Rebekah.

Business period.  
The Out Going of True Life—Mrs. N. J. Allen.

Sketch of Missionary—Mrs. B. W. Moreman.

Hymn. Benediction.  
Mrs. R. E. Newman, leader.  
Press Reporter.

## FAIR AT CLARENDON PROMISES TO BE EXTRA GOOD

This is to remind you that the Donley County Fair is only a week off and to urge you to make your arrangements to attend the opening and spend the whole three days with us if possible. The Fair management has done all within their power to make this Fair the best one in its history and we need your co-operation and assistance.

We have secured a band of Cheyenn Indians that will be camped upon the grounds. This will be quite an attraction for the young folks as well as the older ones. Here you will see them living in their "Tepee" tents and in the open, carrying their Paopoo upon their backs and dressed just as they were in the long ago. To secure this attraction the Fair management went to quite a lot of expense, but they believed that the people would appreciate their efforts to secure something new.

In addition to running and novelty races each afternoon, the Indians will put on some thrilling stunts, and give their war at night. Thursday and Friday evenings we will have Motorcycle races and on Saturday evening an automobile race for Ford cars. We have secured some of the best riders in the Southwest for these events and they will be thrillers. This is something new and you will enjoy seeing them go. The farm exhibits will be worth going miles to see and you can always depend on the ladies to do their part in the Fine Arts department. Thursday is designated as "Key" or Opening Day. Everybody is expected to buy a Pass Key. It is also Clarendon Day and we are expecting the largest crowd in the history of the Fair this day. Panhandle Fair and Exposition.

### To Informer Readers

We have on file in the office of the Informer an extensive list of names and addresses of prospective home-seekers such as have been compiled by the Emigration Department of the Ft. Worth & Denver City Railway Company. In addition to this, we have access to more than two thousand names and addresses wherein detailed information concerning each prospect is available.

If you have land for sale, or land for rent, and desire to communicate with any of these inquirers the names and addresses will be furnished you free of cost by applying at this office.

Definite and detailed particulars as to the name, address, age, nationality, number in family, years at present address, number of live stock and general condition of all these prospects are also on file in the office of Mr. W. F. Sterley, general freight and passenger agent of the Ft. W. & D. C. Ry. Co. at the Denver Record Building, Ft. Worth, Texas, and such specific information concerning any particular prospective home-seeker may be obtained free of cost by enclosing self-addressed envelope to that office and marking inquiry.

# HEDLEY For The Homeseeker

To the man of moderate means who would like to farm on a moderate scale and who would diversify to the end of living at home for the home's sake, there is a section in the southeastern part of Donley county that holds out exceptional opportunities.

Hedley, a small but growing town on the main line of the Ft. Worth & Denver Railway, is the trade and business center of this favored agricultural district.

Hedley has a population of about six hundred. It is located fourteen miles southeast of Clarendon, the countyseat. It's altitude is 2800, and in many respects it is a modern little village. Surrounding Hedley there is a trade territory containing multiplied thousands of acres of fertile lands. This area is dotted with prosperous homes, productive farms and cattle pastures. The science of agriculture is comparatively a new enterprise in these parts, but the last few years has demonstrated beyond all question that it is the natural home for the man of the soil.

Perhaps not more than fifty per cent of the land in the Hedley territory is now under cultivation.

which remains in its natural prairie state it is safe to assume that thirty percent is available for cultivation. The important feed crops of the community which have made good without fail are kaffir corn, milo maize and corn. And because of the certainty of one or all three of these feed crops, the territory about Hedley is developing into a very substantial poultry, dairying and stock farming section. The common soils of the country are sandy and dark sandy loam. Good water is available in an abundant amounts anywhere at a maximum depth of one hundred and sixty feet. Improved lands immediately contiguous to Hedley are now selling at prices ranging from \$20 to \$35, though unimproved lands at a distance of from six to ten miles are quoted on reasonable terms at prices between \$15 and \$20. The country about is a net work of rural telephones and rural mail routes. Good roads cross the country in every direction and ready and reliable markets for all lines of field and farm products are always found at Hedley, Lella Lake and Clarendon.

The demonstrated certainty

of diversified farming in the Hedley territory, the available markets already assured and the great acreage of virgin lands contiguous thereto should make the Hedley territory the mecca for the homeseeker.

The dairy business hereabout has just started. The poultry business is in its infancy. There are six firms in Hedley that handle annually thirty thousand pounds of poultry. The reports show that thirty five hundred bales of cotton were marketed at Hedley last season and that sixty cars of hogs exported from this point while milomaize, kaffir corn and other farm products amounted to approximately four hundred cars for the season. These statistics are most remarkable, considering the population is not near what it might be and considering also, that the agricultural enterprise of the country is in its infancy.

Investigation of the merits and possibilities of the Hedley territory will be, well worth the time of any man who wants a small home, a secure and profitable income in a land of good soil, a friendly society and future

# SEEING LIFE with JOHN HENRY by George V. Hobart

John Henry on Snapshots

WHEN Aunt Martha gave me a wife that new-fangled camera I had a hunch that the dealers in photographic supplies would be joyously shrieking the return of good times and hotfooting it to the bank with the contents of my wallet.

Peaches just grabbed that camera and went after everybody and everything in the neighborhood.

She took about eight hundred views of Uncle Peter's country home before she discovered that the camera wasn't loaded properly, which was tough on Peaches, but good for the bang.

Like everything else in this world, picture-pinching from still life depends entirely on the point of view.

If your point of view is all right, it's an easy matter to make a four-legged doghouse look like the villa of a Wall street broker at Newport.

Ten minutes after friend wife had been given the camera she had me set up as a statue all over Uncle Pe-

aches in exclaiming: "Oh, joy! John, I have developed two pictures!"

I wish you could have seen the expression on Peaches' face.

In order to develop the films a picturesque assortment of drugs and chemicals has to be used.

Well, friend wife had used them. A silent little stream of wood alcohol was trickling down over her left ear into her Psyche knot, and on the end of her nose about six grains of extract of potash was sending out signals of distress to some spirits of turpentine which was burning on the top of her right eyebrow.

Something dark and lingering like iodine had given her chin the double-cross and her apron look like the remnants of a porous plaster.

Her right hand had red, white, green, purple and magenta marks all over it, and her left hand looked like the Fourth of July.

"John!" she yelled. "Here it is! a snapshot."

"With Both Feet in a Slushy Little Snowbank Representing Nearly-the-north-pole."

ter's lawn, and she was snapping me like a Spitz doggie at a peddler.

I sat for two hundred and ninety pictures that forenoon, and I posed for every hero in history from William the Conqueror down to Doctor Cook, with both feet in a slushy little snowbank representing nearly-the-north-pole.

But when she tried to coax me to climb up on a limb of a tree and stay there till she got the picture of me looking like an owl, I swore softly in three languages, fell over the back fence and ran for my life.

When I rubbernecked it back that afternoon friend wife was busy developing her crimes.

The proper and up-to-date cover in connection with taking snapshots these days is to buy a developing outfit and upset the household from pit to dome while you are squeezing out pictures of every dearly beloved friend that crosses your pathway.

Friend wife selected a spare room on the top floor of Uncle Peter's home where she could await developments.

A half hour later glisty noses began to come from that room, and mysterious whisperings fell out of the window and bumped over the eaves.

When I reached the front door I found that the gardener had gone, the

My goodness, I am so excited! See what a fine picture of you I took!"

She handed me the picture, but all I could see was a woodshed with the door wide open.

"A good picture of a woodshed," I said; "but whose woodshed is it?"

"A woodshed!" exclaimed friend wife. "Why, that is your face, John. And where you think the door is open is only your mouth!"

I looked crestfallen and then I looked at the picture again, but my better nature asserted itself and I made no attempt to strike this defenseless woman.

Then she handed me another picture and said: "John, isn't this wonderful?"

I looked at the picture and muttered: "All I can see is Theodore, the colored gardener, walking across lots with a sack of flour on his back!"

"John, you are so stupid," said friend wife. "How can you expect to see what it is when you are holding the picture upside down?"

I turned the picture around, and then I was quite agreeably surprised.

"It's immense!" I shouted. "It's the real thing all right! Why, this is ace! I suppose it is called, 'Moonlight on Lake Champlain'?"

Did this come with the camera or did you draw it from memory?"

you holding Mrs. Mollvahn's baby in your arms, and I think it's perfectly lovely, even if the baby is the only intelligent thing in the picture."

When the exercises were over I inquired casually: "Where, my dear, where are the other 21,219 pictures you snapped today?"

"Only these two came out good because, don't you see, I'm an amateur yet," was her come-back.

Then she looked lovingly at the result of her day's work and began to peel some bicarbonate of magnesia off her knuckles with the nut cracker.

"Only two out of 21,219—I think you ought to call it a long shot instead of

"Where You Think the Door Is Open Is Only Your Mouth."

a snapshot," I whispered, after I had dodged behind a sofa.

She went out of the room without saying a word, and I took out my pocketbook and looked at it wistfully. (Copyright, 1915, by the McClure Newspaper Syndicate.)

### VICTORY RESTED WITH PAT

Lawyer Got Decidedly the Worst of Verbal Combat With Irish Jockey.

An Irish jockey was called as a witness in a trial, and the opposing counsel was doing all he could to invalidate his testimony.

"What are you?" he began in a bullying tone.

"Sure, I'm a jockey, same as my father was before!" was the reply.

"Ah!" said the barrister, thrusting his hands into his pockets and preparing to enjoy himself hugely with the witness, "and I suppose your father did a little cheating in his time, like the rest of the fraternity?"

"Troth, and I suppose he did now an' then," was the quiet response.

"And where do you suppose he is now?"

"In heaven, I hope, rest his soul."

"And what should such fellows as jockeys do there, I should like to know?" inquired the barrister, in a voice of thunder.

Paddy scratched his head. Then, with a sly grin, he replied—

"Troth, hosses for the angels, perhaps."

"And cheat them as they did their fellow mortals?"

"Maybe so," replied the jockey, still unabashed.

"Ah! they would be prosecuted then," exclaimed the barrister, triumphantly.

"Sorra a bit," answered the witness.

"And why?"

"Because they might search easier and over again, and no lawyer would find them there."

**Understood His Profession.**

The professor of jurisprudence in a western university was lecturing to a hundred embryo lawyers. He asked whether anyone in America could own property. One fellow answered, "No, a criminal can't own property."

But the professor said: "Suppose a man who owns a ranch gets into trouble with his neighbor, assaults him and is put into the penitentiary, does he still own the ranch?"

The class was unanimous that he did, says the Youth's Companion.

"If he did not continue to own it," went on the professor, "what would become of it?"

That was supposed to settle the discussion, but one boy called out, "The lawyer would get it."

There was a hearty laugh, of course, and the professor added:

"We learn two things from that apt remark: be a lawyer, and don't be a criminal."

**Not an Industrious Lad.**

Young Henry Biggs, the miller's son, who had been apprenticed to Farmer Grubbins, had not proved what might be described as a conspicuous success. And so, when old Biggs came along one day to ask what progress the lad was making, there came a certain dubious expression into the old farmer's eye.

"Well," he drawled, "'tisen't that I wish to discourage you nor your son neither. 'Tisen't that I wish to be grubblin' at him one bit. He don't do nothin' wrong—nothin' at all, if he can help it. But I will say, Miller Biggs, that it's my belief that if your son Harry had a little more in him, he'd want another pocket for it in."—London Tit-Bits.

**Call for Assistance.**

"So you want me to come and reform your son Gulch?" said the persuasively smiling caller.

"I don't exactly what we're after. Three Fingered Sam, after with the rest of the command you to come around to my place and sell us

"Where is Mrs. Henry?" I inquired.

waitress was leaving and the cook was telephoning for a policeman.

"Where is Mrs. Henry?" asked Mary, the cook.

"She is still developing," said Mary.

"What has she developed?" I inquired.

"Up to the present time she has developed your uncle's temper and she has developed your aunt's appetite, and a couple of bill collectors, developed a pain in the neck when she took their pictures, and if things go on in that way I think this will soon develop a h house!" said Mary.

"The idea of such a thing," friend wife snapped. "Can't you see that you're holding the picture the wrong way? Turn it around and you will see what it is!"

I gave the thing another turn.

"Gee whiz!" I said. "Now I have it! Oh, the limit! You wished to surprise me with a picture of the sunset at Governor's Island. How lovely it is! See, over here in this corner there's a bunch of soldiers listening to what's cooking for supper, and over here is the smoke from the stove that sets the sun—I like it!"

"Then my wife grabbed the picture and held it up to my hands and said: 'John, here it is!'"

"You try to dis-

### AGAIN TO BE FERTILE LAND

Building of Euphrates Dam Calculated to Restore the Prosperity of Old Mesopotamia.

With the completion of the Hindiyeh barrage on the River Euphrates, the first step has been taken which will ultimately turn Mesopotamia into the fertile land it was in Biblical times.

For ages the waters of the Tigris and Euphrates have run to waste in the desert, or accumulated in unwholesome marshes, and devastation and the decay of centuries have set their mark upon enormous areas that once blossomed as the rose. In the great Babylonian plain, tradition has placed the Garden of Eden, and the still visible ruins of the old dams and canals show how important a part was played by irrigation on the economic prosperity of Chaldea and Babylon.

After lying dormant for ages as the result of devastating wars, Tartar invasions and Turkish apathy, fertility is about to be restored to those desolate regions as by the wave of a magician's wand.

The magician is the modern engineer. In the person of Sir William Willcocks, who in 1909 was commissioned by the Turkish government to prepare an irrigation scheme. In its entirety Sir William Willcocks' plan entailed an expenditure of \$75,000,000, and it is the first portion of the works which were inaugurated.

The Hindiyeh barrage, 47 miles south of Bagdad, has been built just above the town of Hindiyeh and to the east of the present riverbed, and it distributes the waters of the Euphrates through regulators down the old Hillah branch, past Babylon to Hillah. It is 800 feet long and consists of 35 arches fitted with sluice gates 16 feet wide. The arches are supported by piers 19 feet high and four feet thick, with key piers measuring 11 feet. This structure rests upon a foundation of three feet of concrete and six feet of brickwork. Adjoining the barrage is a lock with a 25-foot opening for the use of the river traffic.

In the Society Islands.

Pigs represent a kind of concrete idea of position among most of the natives of the Society Islands. These animals, in fact, are just as carefully nursed as children. Only male pigs are esteemed, however, and are tied all their lives to a pole under a little roof, while the sows run wild.

"The pigs are carefully fed," writes Doctor Spelzer, "but this, their only pleasure, is spoiled by constant and terrific toothache, caused by cruel man, who has a horrible custom of knocking out the upper eyeteeth of the male. The lower teeth, finding nothing to rub against, grow to a surprising size, first upward, then down, until they again reach the jaw, grow on and on, through the cheek, through the jawbone, pushing out a few other teeth on the way. Then they come out of the jaw again and curve a second, sometimes a third, time, if the poor beast lives long enough."

**Pot and Kettle.**

"How ignorant that woman is," said Mrs. Gausp to her caller. "She and I went to the Zoo the other day and I thought I would laugh outright when she called the giraffe a 'carafe.' The joke of it was, the animal wasn't a giraffe at all, it was a camomile."

The more money a man has the more he is abused—and the less he cares.

Only a married man can fully appreciate the comforts of his club.

**Last, But First.**

Sir Thomas Lipton, whose good work for stricken Serbia is still bringing him unstinted praise from all quarters, is, in spite of his great wealth, a man of very simple tastes. Especially simple is he in the matter of dress, a fact which was once responsible for a very amusing incident.

Some years ago he advertised for a number of new assistants for his business, and he decided to interview them all himself. On a certain morning, therefore, he arrived early at his office to find a long list of applicants waiting outside.

"Ha, ha!" I chuckled, says Sir Thomas when he tells the story, "as I pushed my way to the door, 'Good strong men all of them! Just the fellows for—'

"Bash! I was hurried across the pavement, hit a lamp post, and found myself in the gutter, and then a deep voice said:

"'Wat's your little game, eh? You just line up behind and take your turn with the rest of us!'"—Pearsons.

**Easily Remedied.**

"Oh, George, you've broken your promise!"

"Never mind, dearie; I'll make you another."—Life.

Father Adam may have had troubles of his own, but at any rate, Eve never flashed his old love letters on him.

## CALOMEL WHEN BILIOUS? NO! STOP! ACTS LIKE DYNAMITE ON LIVER

I Guarantee "Dodson's Liver Tone" Will Give You the Best Liver and Bowel Cleansing You Ever Had—Doesn't Make You Sick!

Stop using calomel! It makes you sick. Don't lose a day's work. If you feel lazy, sluggish, bilious or constipated, listen to me!

Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with sour bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you feel "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour just try a spoonful of harmless Dodson's Liver Tone.

Here's my guarantee—Go to any drug store or dealer and get a 50-cent bottle of Dodson's Liver Tone. Take a

spoonful and if it doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it cannot salivate or make you sick.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.

### HIS WELL-CHOSEN RESPONSE

Old Frenchman's Words, in Acknowledging Gift, Were Certainly Short and to the Point.

In a certain country town there lived an old Frenchman named Le Blanc. One night some of his friends gave him a surprise party and presented him with a watch chain. That week the local paper printed an account of the affair, saying that in acknowledgment of the gift Mr. Le Blanc responded "in a few well-chosen words."

Curious to know what the old Frenchman said, someone asked the reporter who was present what those "well-chosen words" were.

"Well, I'll tell you," he answered. "When Charlie finished his presentation speech and held out the chain, the old man—who had been eyeing it greedily all the while—suddenly snatched it from his hand and exclaimed: 'Fy chee, dat was a good one!'"—Youth's Companion.

**Last, But First.**

Sir Thomas Lipton, whose good work for stricken Serbia is still bringing him unstinted praise from all quarters, is, in spite of his great wealth, a man of very simple tastes. Especially simple is he in the matter of dress, a fact which was once responsible for a very amusing incident.

Some years ago he advertised for a number of new assistants for his business, and he decided to interview them all himself. On a certain morning, therefore, he arrived early at his office to find a long list of applicants waiting outside.

"Ha, ha!" I chuckled, says Sir Thomas when he tells the story, "as I pushed my way to the door, 'Good strong men all of them! Just the fellows for—'

"Bash! I was hurried across the pavement, hit a lamp post, and found myself in the gutter, and then a deep voice said:

### HAD TO HAVE MORE ROOM

Wobbly Man Needed Extra Accommodation Before He Could Really Enjoy Seeing Play.

During the run of a play in New York last winter a wobbly person teetered up to the box office one Saturday night when the place was packed and demanded a good seat.

"Nothing left except standing room," said the box-office man. "Sell you standing room for a dollar."

The wavering one produced a dollar and went inside. But so many general admissions were grouped at the rear that over the intervening hedge of heads he caught only vagrant glimpses of what was going on upon the stage.

He foggly considered the situation for a spell. Then he rocked his weaving way back to the box-office window and put a second dollar on the shelf.

"Gimme none of them standin' rooms," he ordered; "can't see the show at all if you only got one."—Saturday Evening Post.

**Theory and Practice.**

Mrs. Blough—I don't try to suit everyone. I always want people to take me just as I am.

Caller—Glad to hear it, for we're in a big hurry. I'm the staff photographer for the Scarehead, and the Sunday editor sent me out to get a snapshot of you—

Mrs. Blough—Good Heavens! Wait till I run and frill up a bit and put on some more powder.—Judge.

**Rain on the Diamonds.**

Madge—Do you think Mr. Phan loves you more than he does baseball?

Maude—I really don't know. Last night he told me that my eyes were like diamonds.

Madge—That is a sign of affection.

Maude—Then a little later he said that when I cried it made him feel like a postponed game.—Judge.

**Tedious Business.**

"What is your attitude toward the belligerents in Europe?"

"Oh, the usual attitude."

"And what is that?"

"I'm just waiting for them to quit."

"Umph! You are evidently not rushed for time."

Occasionally a man makes a great hit by doing the wrong thing at the right time.

## Start Children to School Right

After the vacation rest, school children should quickly settle down to the task of learning. **Do your part!**

Parental responsibility does not end by sending them to school. The child must be equipped with mind and body at their best.

**And here the right food plays a most important part.**

Growing children need energy; the right kind and lots of it. And energy comes from well-nourished nerves and brain.

# Grape-Nuts

—a food made from wheat and barley, contains the vital mineral Potash, etc. (grown in the grains) which directly act with other up body, brain and nerves.

Statistics prove that much of the "backwardness" of a faulty nourishment.

A morning dish of Grape-Nuts and cream is good alike for the backward pupil. The latter needs the nutrition; the former sounder physical and mental health because of it.

**"Then on" for Gr**

### WHEN YOU NEED HELP

either for the Stomach, the liver, or the bowels, you really should try

### HOSTETTER'S Stomach Bitters

Its tonic qualities sharpen the appetite, aid digestion, and keep the liver and bowels daily active. For over 60 years it has been helping people to promote and maintain better health. Try it.

**Electric Plant in Arctic Circle.**  
The "farthest north" electric plant is being constructed at Mount Hope, 100 miles north of the arctic circle. There are 400 persons at this place, and the plant is being built by one of the missions.

The darkness at Mount Hope is intense during the long arctic night, and the electric plant will supply power for both light and heat. Engineers at the University of Pennsylvania will design the equipment.

The electricity will be generated by wind power, as the wind at Mount Hope is steady and seldom falls below 20 miles an hour.

Under the direction of an English engineer New Zealand plans to spend about \$2,500,000 to develop its water power resource.

**Roofing**  
No such thing as "rubber roofing"

**Certain-teed Roofing**  
It is made of the very best Roofing Felt thoroughly saturated in our property blended asphalt and coated by a harder grade of asphalt which keeps the soft saturation within—the life of the roofing—long drying out quickly.  
It is guaranteed 5, 10 or 15 years, according to the thickness is 1, 2 or 3 ply respectively.  
Your local dealer will quote you reasonable prices on our goods.

**Break it up**  
THE DAY OF THE WASHBOARD IS OVER

**Yes, Break Up Your Washboard!**  
Didn't it break your back, break your arms, break your health and break your clothes? Haven't the washboards ruined enough clothes to deserve breaking up?

**Magic Washing Stick**  
Finished Mr. Washboard.  
And by such gentle means. For, as you know, never settles things right. Magic Washing Stick is not soap, but is used with the regular soap. It is not washing powder, nor lye, nor alkali, nor acid, nor any other harmful thing. It loosens the dirt by gentle means, by natural means. It does not damage the finest texture, nor harden the woolens nor shrink the fabrics. The soft, snowy cleanliness of your fine linens, petty laces and dainty lingerie will be a continual delight.

**SEPARATION OF SOUR MILK**  
Pour From One Pan to Another, Breaking Up Curd as Fine as Possible—Prevents Clogging.  
Milk that has curdled will separate with difficulty. Such milk should be thoroughly mixed previous to separating, by pouring from one can into another. In this way the curd is broken up as finely as possible, so that it will not clog the machine. The separation of curdled milk finally clogs the skimming tubes, with the result that more skim milk passes through the cream outlet, making a thinner cream.

**Ordinary Cow Stalls.**  
The ordinary cow stalls should be five feet long from the stanch on back to the gutter. This is a sufficient distance and does for a stall. Many large or small stalls of the stall varies somewhat and size of the

### DAIRY IN ALL OUR NEIGHBORHOODS

### MISTAKE TO CHANGE BREEDS

**Start With the Kind Liked Best and Stick to It—Cull Poor Specimens and Buy Better Ones.**

To change breeds every now and then is poor practice. One should be very careful before the particular breed is chosen. To use a Holstein sire one year in order to obtain a large flow of milk, a Guernsey sire another year to secure richness of milk, and a Shorthorn sire the next time, is the wrong principle to employ in the breeding and raising of good cows.

Undoubtedly some good cows will be obtained in the herd from such methods of procedure, but there will be no uniformity of size, form, appearance and production, and the owner has no assurance of what he is going to get in the future. It is a case of too many in the mixture, and it is guesswork as to which one will come to the top.

Typical Dutch Milkster.  
already bought, and purchasing better individuals belonging to the same breed.

It is usually safer to try to improve within the same breed than it is to improve by changing to a different breed. There are good individuals and good strains within any of the breeds intended for a particular purpose.

### INFLUENCE COLOR OF BUTTER

**Markets Demand Yellow Tint Which Is Supplied by Use of Dyes or Character of Cow's Feed.**  
Although it is a fact that some dairy breeds give yellower milk than others, even though it may be no richer in fat, the thing of greatest influence in color is the kind of feed the cows are getting. Market demands call for a yellow butter, which is supplied in the creamery by the use of certain harmless vegetable dyes, the use of which dairy laws rightly permit.

The color also can be fed into the milk and make the use of dyes unnecessary. Carrots, for example, color milk and cream quickly. One of the natural coloring materials in milk and butter is called carotin, from carrots, and this material is found in many food materials. It is plentiful in fresh green grass, hence the milk color up well in early spring. Alfalfa hay, cured to have a bright green color, contains good supplies of carotin, which appears in the cream as a result.

Hay which has lost this green color, dry corn fodder, silage, straw, yellow corn and white, wheat, wheat bran, cottonseed meal and other milled feeds contain practically none, and cream from cows so fed will produce a light colored butter unless artificial coloring is supplied. The color adds nothing to the value or digestibility of butter, save in one's mind, but the market demands a yellow butter all the year round and the color must either be supplied in the feed or in the creamery.

### There Is Hardly A V Who Does Not Rely on Lydia E. Pinkham's Vegetable Compound.

**Princeton, Ill.**—"I had inflammation, hard headaches in the back of my neck, and a weakness all caused by female trouble, and I took Lydia E. Pinkham's Vegetable Compound with such excellent results that I am now feeling fine. I recommend the Compound and praise it to all. I shall be glad to have you publish my letter."

**There is scarcely a neighbor around me who does not use your medicine.**—Mrs. J. F. JOHNSON, R. No. 4, Box 30, Princeton, Illinois.

**Experience of a Nurse.**  
Poland, N.Y.—"In my experience as a nurse I certainly think Lydia E. Pinkham's Vegetable Compound is a great medicine. I wish all women with female troubles would take it. I took it when passing through the Change of Life with great results and I always recommend the Compound to all my patients if I know of their condition in time. I will gladly do all I can to help others to know of this great medicine."

—Mrs. HORACE NEWMAN, Poland, Herkimer Co., N. Y.

If you are ill do not drag along until an operation is necessary, but at once take Lydia E. Pinkham's Vegetable Compound.

### Constipation Vanishes Forever

**Prompt Relief—Permanent Cure**  
**CARTER'S LITTLE LIVER PILLS** never fail. Purely vegetable—act surely but gently on the liver. Stop after dinner—cure indigestion, improve the complexion, brighten the eyes. **SMALL PILL, SMALL DOSE, SMALL PRICE.**  
Genuine must bear Signature

### PARKER'S HAIR BALSAM

**A toilet preparation of merit. Helps to eradicate dandruff. For Restoring Color and Beauty to Gray or Faded Hair. 50c and \$1.00 at Druggists.**

**Their Conversation.**  
In the days of Henry Clay a Kentucky farmer went a servant to Lexington with a note for the president of a certain bank. When the man returned he said to his master:

"I met Marse Henry Clay in the bank and had a conversation with him."  
"Indeed! and on what topic did you and Mr. Clay converse?" inquired the master with interest.

The darky removed his hat and made a sweeping bow. . . . "Says Mr. Clay to me. . . . And another very low bow. "And I the same to Mr. Clay."—Everybody's Magazine.

**NEGLECT YOUR SCALP**  
And Lose Your Hair. Cuticura Prevents It. Trial Free.  
Cuticura Soap shampoos cleanse and purify the scalp of dandruff while the Ointment soothes and heals the irritated scalp skin. Dandruff and itching are hair destroyers. Get acquainted with these supercreamy emollients for the skin and scalp.

Sample each free by mail with Book. Address postcard, Cuticura, Dept. XY, Boston. Sold everywhere.—Adv.

**Keen Disappointment.**  
"Congressman Blowster says he didn't think much of the San Francisco fair."  
"I think I know the reason why."  
"Well?"  
"He hoped to launch a presidential boom while out there, but it failed to materialize."

**Whenever You Need a General Tonic Take Grove's**  
The Old Standard Grove's Tasteless Chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

**Sees Through Him.**  
"You're not so thick with Sam as you used to be."  
"No—because I'm not so thick."  
The theory that it is never too late to mend influences a lot of us to coddle our bad habits.  
A man may be as much a fool from the want of sensibility as the want of sense.—Mrs. Jameson.

### Invokes God's Reward For Pellagra Cure

Jumbo, Va.—J. H. Satterwhite writes: "I want to thank you for what you have done for me. You have cured my wife. God bless you in your work. I hope some day to see you; if I never see you I hope to meet you in heaven. God will reward you for your grand and noble work."

There is no longer any doubt that pellagra can be cured. Don't delay until it is too late. It is your duty to consult the resourceful Baughn.

The symptoms—hands red like sunburn, skin peeling off, sore mouth, the lips, throat and tongue a flaming red, with mucus and chinking; indigestion and nausea, either diarrhoea or constipation.

There is hope; get Baughn's Big Free book on Pellagra and learn about the remedy for Pellagra that has at last been found. Address American Compounding Co., box 2089, Jasper, Ala., remembering money is refunded in any case where the remedy fails to cure.—Adv.

**High Finance.**  
"Henry, dear," announced Mrs. Up-to-date. "I guess you will have to admit that I am a pretty good business manager after all. I took Willie with me to the movies this afternoon and as it was raining when we came out of the theater, I gave Willie ten cents car fare and had him hurry home and get an umbrella for me. In that way I saved my new hat from being ruined."

"Uh, huh," replied Mr. Up-to-date. "Yes, I see, my dear; but why the Sam Hill didn't you both ride home for your ten cents in the first place?"  
"Henry! You—boo hoo—you never give me credit for anything I do!"—Judge.

### HOW TO HEAL STUBBORN TORMENTING SKIN DISEASES

A Baltimore doctor suggests this simple, but reliable and inexpensive, home treatment for people suffering with eczema, ringworm, rashes and similar itching, burning skin troubles.

At any reliable druggist's get a jar of resinol ointment and a cake of resinol soap. These will not cost a bit more than seventy-five cents. With the resinol soap and warm water bathe the affected parts thoroughly, until they are free from crusts and the skin is softened. Dry very gently, spread on a thin layer of the resinol ointment, and cover with a light bandage—If necessary to protect the clothing. This should be done twice a day. Usually the distressing itching and burning stop with the first treatment, and the skin soon becomes clear and healthy again.—Adv.

**New Broom.**  
Mrs. Bacon—Do you believe a new broom sweeps clean?  
Mrs. Egbert—It does if a new girl's got hold of it.

Every woman's dresser drawer is full of things "dashed off" at odd moments, which she hopes to be able to sell to the magazines.

### WELL AND IN GOOD HEALTH

### Since Taking Cardui. After Seven Years of Suffering, Says South Carolina Lady

Columbia, S. C.—Mrs. L. M. Heilmann, of 331 Washington St. of this city, says: "I have received so much benefit from Cardui, I feel like speaking a good word for it to every lady I come in contact with, that I think needs it, hoping to help some one to get well, as I did."

I had been sick in bed for a long time with the change of life. The doctor tended me all along, and finally one morning when he came he said he believed I would have to go to the hospital yet, I said No. I then read all of the testimonials in the Ladies' Birth-day Almanac and then I picked up a bottle of Cardui and commenced taking it. I began to improve from then on. I took five bottles continuously, then off and on for awhile, and I was well . . . and have had good health ever since. I am glad to say, I have recommended it to a lot of my friends. I was troubled for seven or eight years before I took Cardui. I think it is the best medicine on earth for female troubles . . . If this testimonial will help some one else you are at liberty to use it if you like."

Begin taking Cardui today! It may be the very medicine you need. Your druggist sells it. Get a bottle from him today.

**Avoiding Complications**  
"I understand Doppel is neutral."  
"And strongly entrenched, too."  
"How does that happen?"  
"His favorite barber is a Frenchman and his favorite bartender is a German."

"How about his favorite waiter?"  
"He doesn't have to be on his guard while eating. His favorite waiter is a waitress, hailing officially from Kansas City."

**LADIES!**  
—Take CAPUDINE—  
For Aches, Pains and Nervousness.  
IT IS NOT A NARCOTIC OR SLEEP-GIVER—Gives quick relief—Try it.—Adv.

**A Benevolent Retusal.**  
"Senator, I wish you would give me a job as your private secretary."  
"Oh, my boy," responded the oily senator, "don't get mixed up with the government service. Nothing to it. Ruins a young man. Besides, I have promised that position to my son."  
Louisville Courier-Journal.

A mouse scares a woman almost as badly as a milliner's bill scares a man.  
Getting even seldom results in an even temper.

### Backache is Discouraging

Nothing is more discouraging than a constant backache. Lame when you awaken, pains pierce you when you bend or lift. It's hard to work or to rest. Backache often indicates bad kidneys. If the urine is disordered, passages too frequent or scanty, there is further proof. Delay is dangerous. Prompt use of Doan's Kidney Pills now may spare you serious trouble later. Doan's is the world's best-recommended kidney remedy.

**A Texas Case**  
"Every Picture Tells a Story" E. D. Wert, Fort Aransas, Tex., says: "My kidneys acted too freely and the secretions were painful in passage. My back ached all the time and I could hardly stoop. I had a dizzy and nervous spells and my sight failed. Doctors said I had but a short time to live. On a friendly advice, I used Doan's Kidney Pills and they restored me to good health. The cure has been permanent."

Get Doan's at Any Store, 50c a Box  
**DOAN'S KIDNEY PILLS**  
POSTER-MILBURN CO., BUFFALO, N. Y.

**So Paw Says.**  
Little Lemuel—What's a bachelor maid, paw?  
Paw—A bachelor maid, son is a spinster who still has hopes.

**Not a Desirable One.**  
First Grad—Have you found an opening yet, old man?  
Second Grad—Yes, I'm in a hole.

### For Thru and Foot Diseases

### HANFORD'S Balsam of Myrrh ALINMENT

### THE HEDLEY INFORMER

I. CLAUDE WELLS, Ed. and Pub.  
Published Every Friday  
\$1.00 Per Year in Advance

Entered as second class matter October 28, 1910, at the postoffice at Hedley, Texas, under the Act of March 3, 1879.

Four issues make a newspaper month.

Advertising locals run and are charged for until ordered out, unless specific arrangements are made when the ad is brought in.

All Obituaries, Resolutions of Respect, Cards of Thanks, Advertising Church or Society doings when admission is charged, will be treated as advertising and charged for accordingly.

The Informer acknowledges with thanks the receipt of a seasons ticket to the Donley County Fair October 7-8-9. They have added new attractions to the fair, such as motorcycle and auto races.

This is a favorable time to increase the livestock. There is an abundance of feed in the country. Why not feed this on farms instead of shipping it to other localities where the feeders will make a profit at your expense. You need the fertility in the manure, the cost of hauling and shipping. By feeding the crops the soil may be built up at the least expense.—Farm & Ranch.

"On what do you base your assertion that country people are brighter and more intelligent than city people, Hy?" asked the summer boarder.

"Why right here in my alma nac" replied Farmer Hyberbole Medders, "it says in the cities the population is a lot denser than in the rural districts."—Judge.

Advice can be borrowed any time and without security and the lender will remain your friend unless you pay it back.—Ex.

We need more sheep in the Southwest. No animal can graze more economically than sheep. The animals can utilize close pastures and rough land to a great advantage. Almost every farm could support a few sheep and the extra feed would scarcely be missed. The money derived from a few would go a long way in keeping up the expenses of the farm home. Get a pure-bred sheep and begin sheep raising.—Farm & Ranch

E. L. Lewis of Hedley was in Clarendon the past week on business, he called at the News office and left us a nice order for printed matter.—Clarendon News

Another instance where the home printer was passed up. There was no excuse for this act for we know full well that the printing office at Hedley is properly equipped to turn out most any class of work at prices to compete with those of Clarendon. Then how does a man expect for his home paper to continue to talk for his home country when work, the means by which the newspaper makes a living is sent to other points to be printed. A poor principle of citizenship.—Memphis Democrat.

The Informer knows of no E. L. Lewis at Hedley. Evidently he is a stranger here and didn't know Hedley was an up to date town with an up to date printing office, and for that reason can be excused. We are glad to state that Hedley people are loyal, as a rule, to their home paper.

The prettiest tablets in town can be found at Hedley Drug Co.

**New Names for Old Initials.**  
British soldiers at the front are applying new significations to old initials. For instance, the R. F. A.—Royal Field Artillery—is being called the Ready for Anything. The men of King Edward's Horse say that K. E. H. means Kill Every Hun.

The unkindest interpretation is that put upon the letters R. A. M. C.—Royal army medical corps. Some wounded soldiers have complained of missing belongings after their things have passed into the keeping of the R. A. M. C., so they declare the initials really now stand for Rob All My Comrades.

**War Influences Paris Veil Styles.**  
The war veil is the latest freak of fashion in Paris. Though quite grotesque in appearance, it is popular in the sense that it expresses the patriotism of the women.

The two designs most frequently seen are those of a black canopy woven in the mesh just where it rests on the cheek, and a "beauty spot" woven to the shape of the Red Cross, but done in white on a black background.

**Heavy Guard for N. J. Gov.**  
J. P. Morgan's estate is still under guard until the end of the war. Three men are on duty by day and four by night. One is on post at the bridge connecting East Island with the mainland, and not even a year ago, the post was held by a single man.

### ONCE A RIVER VALLEY

PROCESS OF FORMATION OF BAY OF SAN FRANCISCO.

Not Always the Magnificent Landlocked Harbor That It Is Today—Report Made by the Geological Survey.

Few people in viewing the Bay of San Francisco think of it as other than a magnificent landlocked harbor about which has grown the commercial metropolis of the Pacific coast of the United States. Yet this harbor did not always exist, according to a report on the geology of the region recently published by the United States geological survey, for at one time through the depression now occupied by the bay ran a great river that drained the Sacramento and San Joaquin valleys.

This river probably flowed between the Tiburon peninsula and Angel Island, and then through the gorge of the Golden Gate, where at present the greatest depth of water is 400 feet. After the river valley was formed the coast steadily subsided and the ocean entered through the Golden Gate, flooded the valley, and formed the present bay.

Thus the valley occupied by the bay is really not so very different from Salita Clara and Santa Rosa valleys, and should the Pacific coast sink a few hundred feet lower, these fertile valleys would form great additions to the present bay.

But the change from a river valley to a bay happened very slowly, for great earthquakes as a rule do not move large areas of the earth more than a few inches, and it is likely to be thousands of years before the outlines of the present bay are greatly changed in nature.

The region is particularly interesting for it is one of the newest parts of our continent. Some of the rocks belong to the geologic period known as the Jurassic, but many of them are much younger and were laid down on the floor by the ocean long after the Appalachian mountains were formed.

Although these rocks are relatively young, yet they are hundreds of thousands of years old and have been raised out of the sea and tilted until in places they stand nearly on end.

The forces which have raised these rocks and have folded and broken them are still active, yet their effects are so gradually accomplished that for the most part they are inappreciable.

### NEW HOME

"I'll get it for my wife"

NO OTHER LIKE IT. NO OTHER AS GOOD.

Purchase the "NEW HOME" and you will have a life saver at the price you pay. The elimination of repair expense by superior workmanship and best quality of material makes the "NEW HOME" a money saver. Invest on having the "NEW HOME".

WARRANTED FOR ALL TIME.

Knows the world over for superior sewing qualities. Not sold under any other name.

THE NEW HOME SEWING MACHINE CO., ORANGE, MASS.

In a generation or even in several centuries. Sometimes, however, their effect is more apparent, as for instance when they cause earthquakes. Earthquakes are due to slight movements along what geologists call "faults," which are really broken places in the earth's crust where the rocks on one side of the break or crack move past those on the other side. Some of these faults may be traced for miles—not, of course, as open cracks, for to anyone but a close observer the rocks seem as unbroken in most places along the fault lines as they do in any other part of the region.

Most of these breaks are fortunately old, and it is to be hoped that movement along them has ceased, but two are alive, and along one of these occurred the movements that resulted in the earthquake of April, 1906. Only once in several generations are serious earthquakes to be expected.

**War Aids Jap Woolen Industry.**  
The army clothing orders received in Japan since the outbreak of war have stimulated the flagging ambition to make Japan a great wool manufacturing country. The Mafuchi (Osaka),

points out truly enough how the industry had subdivided itself in Europe, where England, Germany and Austria each had its own specialties and manipulated the fiber in different stages of manufacture. Seeing that Australia is the great country for the supply of the raw material, the Osaka paper thinks it would be much more rational for Japan to receive the wool and manipulate it in all stages before it was passed on to Europe than it is for it to go the round on to Europe and then come out to Japan in the manufactured state. It therefore exhorts the Japanese manufacturers to put the necessary energy into the task of building up a trade which European competitors will not be able to take away again after the war.—Japan Chronicle.

**Journey Into the Unknown.**  
The University of Pennsylvania Amazon expedition has made another journey into the unknown and is now exploring the frontier regions of Brazil, Peru and Bolivia. The expedition expects to spend six months in that region and to return to civilization at Para.

# SUITS TAILORED

## TWO FOR A

# QUARTER

## "There's A Reason"

Two  
Tailored  
Suits  
FOR  
\$25.00

Two  
Tailored  
Suits  
FOR  
\$25.00

OUR Tailoring House, as is their custom, bought in advance of the season their stock of Woolens to supply a big demand; at the time of buying prospects were unusually bright for a large season's business; they bought woolens accordingly ----- unusually heavy.

### You Know The Rest

The unusual, even the normal, demand failed to materialize. Conditions in our country, of which you are well aware, have not warranted the free spending of money; people have held back, they have been slow to buy, and prudently too; but now conditions are becoming better, farm products are selling more readily and for better prices--money is more plentiful.

### THEY MUST UNLOAD

The season is too far advanced for a large tailoring house to hope to close out an unusually large stock of woolens at normal prices.

### They Must Create An Unusual Demand

They must offer something unusual for your money. They do this by offering to tailor two suits to one measurement for only \$25.00. Think of two tailored suits, regular \$20 to \$25 suits, for \$25.00. Think of it \$12.50 a suit.

### How Can They Do It?

They require two suit orders for each measurement, though you may select different woolens for each suit; in doing this they save the time of their cutters, who are extra high-priced men. Instead of having to cut two sets of patterns, then two sets of woolens and trimmings, the cutter cuts one set of patterns and two sets of woolens and trimmings at one cutting--a big labor saving is made. They give us this saving; they give us the benefit of their early before-the-war purchasing power; they give us the benefit of their loss in moving a large stock quickly

### By Giving You TWO Suits for the PRICE of ONE

We don't know what they make, or what they lose, but we do know this is the BIGGEST TAILORED SUIT VALUE it has ever been our pleasure to offer. These suits are guaranteed all-wool, guaranteed to fit, and guaranteed to please OR YOUR MONEY BACK. Sale lasts until these woolens are gone--no longer. Early buyers will get the best to select from--everybody will get their money's worth. These Garments are Hand Tailored by HARRY R. CLANCY, Wholesale Specialty Tailors, Chicago

You can order your Suits now and take them out at your convenience. Only \$5.00 deposit required to send in with order.

### Universal Demand Is for Experience

By ED T. CLEZOW, Columbus, Ohio

—and profoundly desiring to avert this calamity, I have sought in vain for an opportunity to enter, specialize and develop in the automobile industry. With this end in view I have planned with sincerity of purpose, enthusiastically and systematically to devote my leisure moments to the acquisition of knowledge and skill with the object of enhancing the value of my services both to my employer and myself, and with the ultimate aim of becoming a sales representative.

One of the mountainous obstacles impeding the realization of this aspiration is the universal demand for experience and the seeming equally universal lack among employers of volunteers to contribute to the novice the first opportunity for its acquisition. Wending his way from door to door in a futile and discouraging search, the prospective specialist must soon accept employment of whatever nature to sustain himself and possibly some dependence. With this acceptance of uncongenial employment his opportunity for further search is curtailed. His enthusiasm damped, indifference finally results.

Vocational training is an obligation which society owes its younger members because of the highly technical and complex nature of modern industry. Well organized federal employment bureaus co-operating with such schools would solve this problem at least partially.

One cannot blame the young man, whether, as one contributor expresses it, he is "cozzant or not" of the danger of just floating through life, and the gainfulness of planning with his own God-given bent in mind a life-work. At least not until we offer a "fair field and no favor." Opportunities when made available will find no want of eligible applicants.

### Help Rather Than Hinder One Another

By J. F. KNOX, Birmingham, Ala.

But, nevertheless, the people of Birmingham and other communities are well disposed and usually wish to help rather than hinder one another. For example, I was recently employed in taking a time view of one of the downtown show windows. It was a rush order and the work had to be performed in the busy part of the day.

In taking a picture of this kind it is necessary to have an exposure of ten minutes without interruption. The camera was stationed at the edge of the sidewalk so as to have the correct distance, and a friend politely requested pedestrians not to pass before the camera. One would be surprised at the number of people who will pass a given point when business is brisk. I suppose there were several hundred. But with the exception of two instances there was ready acquiescence to my friend's request.

This incident, I think, will go to show that by far the greater portion of the people of Birmingham, at least, are to all practical purposes considerate and kindly disposed and prefer to help rather than hinder the worker.

### Superficiality Is Greatest of Sins

By C. C. Reynolds, Dayton, Ohio

and things, the joke of it, that engage the universal attention. This situation is destructive of character and sacrifices understanding, which is the basis of wisdom.

Many think this is no offense; that one is innocent if he is only superficial. We take to the frivolous and laughing side of things, just as we take to narcotics and intoxicants, because it is pleasant and tends to relieve one from the anxieties and duties of the hour. A person thus slips away on a faldelta from the realities of life.

The Bible enjoins upon us to be sober-minded. This admonition is as wholesome and exacting as any part of the Decalogue. It is based upon the idea that superficiality is destructive of mind and soul.

The frivolous person has no character, no purpose in life, no respect for wisdom and understanding.

The evil effects are everywhere shown—in church, in school, in court, in legislative hall, in shops; there is no insistence upon truth.

### Siberian Pea Tree of Early Origin

By J. P. MEYERSEN, Chicago

In a recent article on "City Gardening" the Siberian pea tree is mentioned as a late introduction by the United States government. The tree—or, rather, large shrub—is an old acquaintance. The date of its discovery is given in Nicholson's "Dictionary of Gardening" as the year 1752. No doubt it has been cultivated in Europe since about that time, being introduced to this country not much later.

In 1910 we planted seeds of it in the city nursery at the Gage farm and have them at present, about five thousand plants, besides a few sent us a couple of years ago from the government.

It is a rather beautiful plant, one of its good qualities being its hardiness. But, though I have handled it for the last twenty years in the Chicago parks, I don't believe I have ever seen a flower on it here, although in Europe it flowers very freely.

Its botanical name is Caragana arborea.

### Many Have Strange Ideas of Liberty

By C. R. RICHOW, Brooklyn, N. Y.

How many who "hawl for freedom" confound it with license!

A republic presupposes a high state of morals, but how can this be possible without the habit of subordination and respect, and now can these exist without humility?

Some are not only jealous of his own rights, but resentful of the rights of others, and is indignant when any man is denied the freedom probably.

Keenly...  
tragic fate...  
gulf the purposeless...  
ing and subsequently unskilled individual—a consciousness bred of personal experience and observation

One of the mountainous obstacles impeding the realization of this aspiration is the universal demand for experience and the seeming equally universal lack among employers of volunteers to contribute to the novice the first opportunity for its acquisition.

Vocational training is an obligation which society owes its younger members because of the highly technical and complex nature of modern industry.

One cannot blame the young man, whether, as one contributor expresses it, he is "cozzant or not" of the danger of just floating through life, and the gainfulness of planning with his own God-given bent in mind a life-work.

This incident, I think, will go to show that by far the greater portion of the people of Birmingham, at least, are to all practical purposes considerate and kindly disposed and prefer to help rather than hinder the worker.

I have often heard it remarked that people of the new South were not so courteous as was the case in antebellum days, and perhaps this is true.

In taking a picture of this kind it is necessary to have an exposure of ten minutes without interruption.

Many think this is no offense; that one is innocent if he is only superficial.

The Bible enjoins upon us to be sober-minded.

It is a rather beautiful plant, one of its good qualities being its hardiness.

It is not because peaches are not good nor a fine crop to grow, sometimes hear it said, "There is no money in the business."

What strange ideas many persons have of liberty! What an amount of mischief has been done to society by such "rabble charming words," as South calls them—words "which have so much wildfire wrapped up in them"—as liberty, equality and fraternity!

How many who "hawl for freedom" confound it with license!

A republic presupposes a high state of morals, but how can this be possible without the habit of subordination and respect, and now can these exist without humility?

Some are not only jealous of his own rights, but resentful of the rights of others, and is indignant when any man is denied the freedom probably.

### POINTS IN MAKE-UP OF BROOD SOW

Feeding, But...

(By H. M. COTTELL.)  
A young sow should be selected whose mother and grandmother have eight or more good pigs at a time. They should be heavy milkers and quiet mothers. The strain should be selected to thrive on pasture. The young sow should be thick, and lengthy and should have not less than ten good teats.

The sow pig intended for a brood should be pushed for the first year and given feeds that will make her grow, but that will not fatten. She should be fed on a ration of grain, such as wheat, peas, barley, clover, and shorts. She should weigh from 300 to 375 pounds at twelve months of age when in thrif condition, but not fat. Ample exercise every day is necessary for health to develop muscles and lungs. If a sow has made good growth, she should be bred to drop her first litter when she becomes twelve months old. She should be in perfect health and good flesh when bred. The gestation period for the sow is about 112 days. As soon as the pigs have been born, the sow should be fed on a ration of grain, such as wheat, peas, barley, clover, and shorts.

Good sows improve for several years in the number and size of the litters they have at a litter. The United States department of agriculture compiled the records of over six thousand sows and found yearling sows averaged 6.65 pigs per litter, and five-year-old sows averaged 8.4 pigs per litter. At the Wisconsin experiment station one year-old sows averaged 7.8 pigs per litter, with an average weight per pig of 14.2 pounds, while sows from four to five years old averaged nine pigs per litter with an average weight of 26 pounds. The common practice of farmers selling their old sows each year and reserving mature ones for breeding is a bad practice, as the older sows are much better mothers and their pigs have an advantage in greater vitality.

Of the most profitable sows the one that has ever handled had a choice litter when she was nine years old.

### SAVE ALL OF GOOD BREEDING ANIMALS

Desirable Pigs, Lambs, Calves and Colts Should Receive Best of Attention.

The importance of saving all of the breeding animals that would make desirable sires and dams will certainly be apparent to those who think of the subject seriously. There seems to be a strong demand for breeding animals to place at the head of herds. Many who have never given animals a place on their farms are now beginning herds or wish to get breeding stock for the purpose of making a beginning with animals. Let every man who has desirable pigs, lambs, calves and colts take care of the animals so they may be of use to the people who need them. The man who raises breeding stock for those who need them deserves credit. He is making it possible for his neighbors to raise better stock. By his diligence in breeding live stock he helps his neighbors and is making it possible for farms to produce more wealth. Every breeder who has animals that are desirable for breeding owes it to his neighbors and friends as well as to the country to advertise his animals to so others who need breeding stock may buy. Poor animals should not be used and it is useless to advertise them. Successful breeders recognize this and cull out the undesirable. They offer only those that are valuable breeders. Every registered animal not suitable for breeding stock. Many are not. These undesirable should be slaughtered. It takes more than registration papers to make a desirable sire or dam. The animals must be of type and conformation, with a good blood.—Farm and Ranch.

### VENTILATION AND LIGHT IN STABLE

Filth and Darkness Almost Invariably Go Together—Put in More Windows.

Provide plenty of light. A dark stable is an abomination, regardless of what kind of stock it contains. Filth and darkness almost invariably go together. Procure some saw (old or new) for use as a window. It should be made of a single pane of glass. When there is only one window there should be two or three. Three square feet of glass is none too much for each ten square feet of siding.

The windows may be made to slide, or be hinged at the lower edge, and held in place with a catch, providing for a method of ventilation which, while crude, is better than none.

### VISIT SHEEPFOLD DURING THE NIGHT

No Better Way of Judging Needs of Animals Than to Let Dogs Bring in Lambs.

Did you ever go to your sheepfold at night? Go not, you have missed one of the joys of your life. In no other way can you come so near judging the needs of your sheep. If one of them is in discomfort it is bound to show it. The dogs do not want to go in there. Many a shepherd has missed a lamb because he did not go to his sheepfold at night.

### YOUNG PIGS NEED A GROWING RATION

Feeding Must Be Tempered With Judgment—Avoid Too Much Fattening Materials.

The hog grower of the future is pork production as a business proposition and not using hogs merely as scavengers in the feed lot, must take cognizance of the fact that the young pigs up to the age of six months need a growing and not a fattening ration, and that their feeding must be tempered with judgment.

### Trouble With Peaches

It is not because peaches are not good nor a fine crop to grow, sometimes hear it said, "There is no money in the business."

Soil Characteristics. Although a soil may be rich because it contains plant food, it may be unproductive. The fertility of the land is its productive power; tillage is one of the means by which this productivity may be increased.

### ECONOMICAL WAY TO STORE CORN PLANT

Silage Cutter at Work, Showing Connection With Engine.

(By A. F. KIDDER, Louisiana Experiment Station.)  
The silo is a large cisternlike construction for preserving green forage crops that may be put away in the summer to feed during the winter months. We all enjoy eating fresh vegetables and do not realize what it means to have to live on dried materials. Live stock prefer green food, and the silo is simply a means of keeping it as nearly as possible in that condition. There is no method so economical of storing the whole corn plant; not one bit need be wasted if cut above the ground.

Wood, metal and cement are the materials used in constructing this live stock pantry. At first silos were built underground, but the extra work of removing the material and seepage

water soon showed that it would be better to place them above ground. Good silos have been built of 2 by 4-inch timbers that were carefully planned, for a temporary building that will serve the purpose, provided the anchoring is well done. One can purchase the wood silos already set up, and for permanency this is better than using ordinary timbers, as they are more certain to be air-tight. Forms for concrete may be quite easily constructed of heavy sheet iron and some "two by fours." Steel rods or wire fencing may be used for reinforcing. This kind is permanent if carefully put up. Metal silos are a comparatively new experiment, but they are recommended by their owners. Investigate the advantages of the various makes.

### BUSINESS OF BREEDING HOGS

Much Better for Beginner to Start in on Modest Scale and Gradually Increase His Herd.

(By E. L. JORDAN, Louisiana Experiment Station.)  
It is much better for the beginner in the business of breeding hogs and other animals to start in on a modest scale and gradually increase his business. It is usually impossible for him to purchase extremely high-priced foundation stock, and, in fact, it would be unwise for him to do so. He can afford to put a considerable sum into his herd sire, which must be up to the standard, but he should be content for a time to be classed as a multiplier of numbers of animals of the

### FEEDING HORSE MUSTY OATS

Likely to Produce Intestinal Troubles and Possibly Blind Staggers—Use Much Care.

(By W. P. SHULER, Oklahoma Experiment Station.)  
A good deal of care must of necessity be taken this fall in feeding musty oats to horses continuously, because of the likelihood to produce severe intestinal troubles and possibly blind staggers. Blind staggers is caused by molds which thrive on stunted corn, dampened barley, oats and spoiled feed of all kinds. If it is necessary to feed grain in this condition, give a couple of teaspoonful doses of common salt with it at all feedings.

Watch the bowels of your animals carefully, and whenever they show any tendency to constipation administer one-half ounce of fluid extract of aloes or one-half pound of epsom salts as a drench. This kind of grain can be fed if care is taken that too much is not given and the animals have plenty of good, clean hay, fresh water and salt to go along with it.

### IDLE LAND LOSES FERTILITY

Less Organic Matter and Plant Food Lost When Soil Occupied by Crop Than When Resting.

Southern land should be kept at work. In the North land is usually left idle during a part of the year. No particular harm comes there from such practices if it does not wash, but there is another consideration for the southern farmer. Repeated soil analysis at various times have shown that less organic matter and plant food are lost when the land is occupied by a crop than when it is idle.

On idle land the plant food leaches away, especially in loose sandy soils because it has no plant there to use it as it becomes available. Then, the sun beams down unimpeded, the soil and burns out the organic matter which would otherwise be protected by a growing crop. The University of Florida experiment station is advocating that the land be planted to catch crops between seasons for the foregoing reasons.

### KEEP HOGS FREE FROM LICE

Crude Oil Is Best and Most Reliable Vermin Eradicator—Drive Animals Into Corner.

Crude oil as it is naturally pumped from the ground is the best and most reliable lice eradicator. Crude oil have used. Crude oil is purchased practically anywhere. Crude oil is purchased from five-cent barrels.

Crude oil as it is naturally pumped from the ground is the best and most reliable lice eradicator. Crude oil have used. Crude oil is purchased practically anywhere. Crude oil is purchased from five-cent barrels.

ECONOMY

Locals

G. O. Wood was in from Quail Thursday.

J. T. Bain made a business trip to Fort Worth this week.

Have a Fit with Clarke. The Tailor.

Mr. Rothfus of Dallas county was here this week prospecting.

Now is the time to buy Coal. We have it. Wood & Plaster.

Mrs. C. C. Mosely came Monday from Paris, Texas, to visit her son, M. W.

Don't forget that School Books are Cash. Hedley Drug Co.

Will Shadle of Wise county came here Thursday on a prospecting trip.

A full line of School Tablets, Pencils, Ink, etc., at Hedley Drug Co.

Clyde Morrow left Thursday for Higgins where he will teach school this winter.

Lay in your Winter supply of Coal now while it's cheap. Wood & Plaster.

Willie Masten of Chillicothe is here to assist his uncle, D. C. Moore, in the cotton yard.

Miss Myrthal Parker is visiting her brother, H. M., and friends in Clarendon this week.

I have moved my Undertakers Supplies to rear of the Reeves building. S. P. Hamblen.

Mrs. A. E. Wilkes and sister Miss Dollie Hill of Dodsonville stopped off on their return home from the Fair at Amarillo to visit Mrs. W. Nippert.

Farm loans, quick on the red tape T. B. Norwood, Memphis, Texas.

A. L. Miller and family moved Tuesday into the Reeves dwelling recently vacated by W. W. Gannon.

Mrs. A. B. Cloninger has been very sick the past few days, but we are glad to report she is improving.

Monroe Smith and family arrived Sunday from Jacksboro and will work on John Blankenship farm.

Good clean shaves, hair cuts, and first class laundry work can be had at my shop J. B. King.

Mrs. S. F. Parker is visiting her daughters, Mesdames O. Griffith of Childress and F. E. House of Knox City.

Mrs. Ellery Lynn is quite ill at the home of her mother, Mrs. W. M. Dyer. We hope for her a speedy recovery.

Get your School supplies early and avoid the rush at Hedley Drug Co.

Mrs. W. G. Brinson has been very sick several days. We trust she will soon regain her usual health.

Mesdames Stallings and Parr came up from Memphis Wednesday to visit Evangelist Sister Miss Sallee.

Come to my shop when you are in need of pleasing barber work. J. B. King.

Stop at Mrs. W. M. Dyer's Private Boarding House on Oak East of Woodridge lumber yard. Nice clean beds and good meals for 25c. Board per week \$1.00; per month \$16.00.

Mrs. W. M. Dyer, Prop.

The FLORSY... IM Shoe. Come in and see our... best and most service... latest in style. They... when you were the... then wear no other brand.

Remember that if it is anything in Men's and Boys' Furnishings you want, LITTLE has it.

Mrs. Hugh Brown and daughter, Miss Marion, came down from Clarendon Tuesday to visit Mrs. J. B. Masterson.

While work is being done on the Hornsby building I will do blacksmithing at the Kendall stand, and invite my friends and customers to bring their work to me there. J. M. Bezman.

W. R. McCarroll L. Duchworth left Thursday for Poolville to visit parents who will celebrate Golden wedding anniversary October 5.

Before buying your new hat call and see us at the home of Mrs. Boyd in East Hedley. Everything new and up to date, and prices the lowest. We also do plain and fancy sewing Dress making a specialty. Mrs. Boyd and Grace Bozeman.

Gene Dishman went to Amarillo yesterday to accept a position as bookkeeper for a business firm there. Pearl Boston took the position vacated by Gene at Moreman & Battle's.

We don't believe there is a larger assortment of trimmed hats in the Panhandle than we are showing. Out of 500 hats more than half are patterns. Prices \$1.50 to \$15.00. Greene Dry Goods Co. Memphis, Texas.

A large force of men have been busily engaged this week in rebuilding the Woodridge shed, which was blown down two weeks ago. The workmen are making considerable headway on the building.

SACRIFICE SALE. 1 Davenport, 1 section bookcase, 1 library table, 1 dining table, 6 dining room chairs, 1 rocking chair. All high class stuff—good as new at second hand prices—cheap, and five acres of maize. G. C. Meadows.

FOR SALE—15 acres joining incorporated town of Hedley, on public highway, good improvements, good cistern, most all fenced with hog and poultry wire. Would consider some trade in good stock; right price. Call on or write J. A. Morrow, 43 tf Hedley, Texas.

FARM FOR SALE. A splendid small place—34 acres well improved with a good orchard. Will sell farm alone or include crop. Good time on most of the payments. 27-4t See C. W. Horschler.

Killing an Exact Science. Said a man who knows mechanics as an open book: "The acme of precision and the perfection of all mechanism known to the human race is devoted to the art of killing men." He was talking to me about the extreme exactness of range-finders for big guns—of which he has been asked to construct 100. "I know of no other thing in the wide domain of mechanics," said he, "that is worked out with so great care as these range-finders."

One might almost be tempted to say that killing men in war has become an exact science.—Philadelphia Ledger.

The Ultimate Condition. A soldier of the allies was dodging German shells; it couldn't have been hotter along the Dardanelles. The gun which did the business was somewhere on the Rhine, but every time it thundered it hit the allies' line. The soldier burrowed deeper into his little trench; he watched the greater missiles responding from the French. The range was something awful for shooting on the air, and shells as big as barrels were coming through the sky. The soldier thought of General de Gail, he thought of Napoleon before the Trojan wall. He thought of the progress in artillery and in the day of battle he laughed.

White House. The White House has no private code department needs to be seen on the rarement telegraph, and the president's name of the recent stance, being, and cement code.

IDENTIFYING THE DEAD

HOW MEN SLAIN IN BATTLE ARE RECOGNIZED.

Turkey the Only Country Which Refuses to Make Use of Any Contrivances by Which Its Dead Defenders May Be Known.

"A dead man is of no use to the sultan; why, therefore, trouble about him?" replied a Turkish pasha (general) when asked why Turkey, of all the warring nations, omitted to supply some sort of identification means for its lost men.

Every other nation in the present conflict provides means of identifying the dead, and these tags or identification slips are usually sent by the victors to the vanquished after a battle, as a courtesy of war, although it has been noticed that "courtesies of war" are going into the decline just now.

The British and Japanese systems are the most elaborate. Each English soldier has a small oblong card stitched inside his tunic. On it are entered the man's name, regiment, next of kin and other similar information. Besides this, every article of his clothing is stamped with a number which corresponds to one written opposite his name in the regimental records as well as the county depot of his battalion.

The Japanese system is very similar. Each man has three disks—one round his neck, another on his waist belt and a third in his boot—on each of which are three numbers corresponding to the wearer's name, corps and brigade respectively.

Russian soldiers wear a numbered badge shaped like an "ikon"—sacred picture image—which is formally blessed by the priests.

Germany's soldiers carry a metal disk bearing a number, which corresponds with a number at the Berlin war office. After a battle numbers, not names, are telegraphed and certified. And the effectiveness of this system may be judged by the fact that after the fighting around Metz in 1870, when the casualties exceeded forty thousand, complete lists were posted in the capital two days later.

The United States government uses a simple cloth tag woven into the shoulder strap of the tunic. Italy uses a small zinc plate affixed to the trousers at the waist, on which are embossed the soldier's name, place of origin, number and date of enlistment, while the Portuguese cavalry soldier has a number stamped on the leggings.

The French who formerly used little aluminum name plates, which in war with savages seemed an irresistible attraction to the enemy, now use little cards; but Austria still has an ornate identification badge of gun metal, shaped like a locket, with inside all particulars inscribed on little parchment leaves.

Wear Khaki Uniform. The Belgian army is now clothed in khaki instead of the dark colored and conspicuous uniform of the earlier months of the war. It has been a popular change, since the khaki of the British soldier has been much admired by the Belgians as both smarter in a military sense and more business-like than their own dark blue and green.

The sanitary situation along the Belgian front is excellent, and the sick report is exceedingly small. The bodies of dead horses and men floating in the area covered by water have been fished out and destroyed, and the country in general cleaned up back of the lines.

Belgian officers have established little chicken yards back of the trenches for fresh eggs, and raising for carp in the canals is one of the chief recreations of officers and men when off duty.

Forge Giant Chain for Panama. One of the largest chains ever made has been produced by the Woodhouse Chain company of Trenton, N. J., for use at the Panama canal locks. The chain is 900 feet long, weighs 12 1/2 tons, and the links are ten inches long, 6 1/2 inches wide and wrought from 1 1/2-inch iron.

It was made at a single forge and completed by three men in three days. The cost of the chain is \$1,000. It is one of five to be made by the Woodhouse company for the government. The resistance of the chain is 195,000 pounds, while the government specifications called for at least 172,260 pounds. The other four chains will each be 700 feet long.

White House. The White House has no private code department needs to be seen on the rarement telegraph, and the president's name of the recent stance, being, and cement code.
