

THE HEDLEY INFORMER

VOL. XII

HEDLEY, DONLEY COUNTY, TEXAS, SEPTEMBER 15, 1922

NO. 43

MRS. S. N. BOND

Mrs. S. N. Bond of Wellington died at her home in that city last Saturday following a fifteen days illness, and was buried in the Wellington cemetery last Sunday.

Mrs. Bond was well known and highly esteemed in Hedley, the family having at one time resided here. Mr. Bond is a brother of our townsman, J. W. Bond.

J. W. Bond and family and Mr. and Mrs. Clark Latimer attended the funeral Sunday.

Mrs. Bond is survived by her husband and an adopted son. We extend our sincere sympathy to the bereaved ones.

D. Conner and wife, of Kansas City, have been here the past week on a visit to their cousins, Mr. and Mrs. Stanley Conner.

MILLINERY

The stock of the Hedley Millinery Co is now on display at my home. Ladies of the community are invited to call and inspect these Hats.

Mrs. S. L. Adamson.

BABY MENDENHALL

Little Kenneth, infant son of Mr and Mrs Harry Mendenhall, passed away at the family home last Saturday, and was tenderly laid to rest the following day. The sorrowing parents have our heartfelt sympathy.

For some unaccountable reason we failed to mention in last week's paper the return of M. J. Smith and family from Mercedes—in the Rio Grande valley—where they spent the past two years. We are glad to welcome them back home.

CANYON LADY HURT IN AUTO ACCIDENT

A serious auto accident happened a few miles east of Hedley Tuesday night, on the Wellington road, Dr. L. O. Rogers and family of Canyon being the victims.

They were en route to Wellington for the night, when their car lights went out, and they were running with the aid of a flashlight. They turned the light on the speedometer for a moment, which blinded the driver, the car swerving from the road and striking the sidewalk of a heavy cement bridge, near Mc Knight.

Mrs. Rogers was pretty seriously hurt, the others escaping with bruises and minor hurts. Her jaw was broken, her chin badly lacerated and several teeth knocked out. The car was badly damaged.

Grover Heath, on hearing of the accident, went out in his car and took the family to Wellington. At last report Mrs. Rogers was very sick and suffering considerable pain, but it is hoped she will improve real soon.

LOST—An Elgin wrist watch, without crystal. Finder please leave at this office.

The Panhandle Baptist Association is in session this week in Clarendon, and a number of Hedley people are in attendance.

You can get the Genuine Deering Binder Twine at Thompson Bros.

CARD OF THANKS

We wish to thank the many friends who were so kind and helpful to us during the trying ordeal before and since the death of our baby boy, Kenneth. We especially thank Mrs. McBride, the nurse, and Dr. Ozer, who labored so faithfully. We shall ever be grateful to all of you.—Mr and Mrs Harry Mendenhall

Mrs. A. F. Reator, from Wise county, is spending two weeks here with her daughter, Mrs. O. A. Heath.

COTTON BEGINS TO COME IN RAPIDLY

Something more than 400 bales of cotton have been unloaded to date at the Hedley cotton yard, and quite a few more are still on the gin yards or parked at the owner's home.

The fleecy staple is just now getting a good start in its movement to market. Fifty eight bales were brought in Wednesday, which was the banner day up to that time.

The price lingers around the 20c mark.

MRS. M. H. WISE

Mrs. Virginia Evelyn Wise, wife of M. H. Wise, passed away last Saturday at the family home in this city, following an illness of several months duration.

Mrs. Wise was born April 26, 1871, in Anderson county, S. C., and was converted and joined the Missionary Baptist church at the age of sixteen. She was married to M. H. Wise July 9, 1891. To this union were born three children, Frank, Carl and Lee, all of whom live in Hedley and were with her when death came.

Funeral services were conducted Monday afternoon at the First Baptist church by Rev. Cal McGahey, after which the remains were laid to rest in Rowe cemetery. Our deepest sympathy is extended to the sorrowing husband, children, and other loved ones.

Buy your Cotton Sacks from Thompson Bros. 9 foot sack for \$1.50.

BAKERY AND RESTAURANT

Fresh Bread and an abundance of Good Things to Eat at all times. Cold Drinks and Confections. Come to see us.

It's toasted. This one extra process gives a delightful quality that can not be duplicated.

MONEY TO LOAN ON FARMS

I have secured the Agency for a good Farm Loan Company and will be pleased to have applications from Farm Owners who are needing money. Prompt service and reasonable rates of interest.

L. A. STROUD,
Hedley, Texas.

R. L. Cornelius, a prominent stockman and farmer of Panhandle, died last Sunday in an Amarillo hospital. Rev. G. H. Bryant and the Masonic Lodge had charge of the funeral and burial services. Mr. Cornelius leaves three sons and one daughter. He was an uncle of L. L. and R. L. Cornelius, former Hedleyans, and had many friends in this community, he having visited here a number of times.

Marcelle Cold Cream

and
Marcelle Vanishing Cream

relieve the dry, parched condition of the skin which comes with exposure to the weather.

The cold cream is a cleansing and healing cream and leaves the skin soft. To do the most good it should be applied at night.

On dry skins it may be used as a foundation for powder.

Marcelle Vanishing Cream is the better cream for daytime use and as a foundation for face powder, as it is greaseless and cannot reappear through the powder in a shine.

The creams are on sale in both tubes and jars.

OLDEST AUTO IN UNITED STATES

America's first car, built by Elwood Haynes in Indiana and successfully tested out near Kokomo, Ind., on July 4, 1884, was recently taken from Smithsonian Institution back to Kokomo for the twenty-eighth anniversary on July 4. Photograph shows Congressman Fred Purnell from that district in America's oldest car in front of Smithsonian Institution. This is the first time any article on exhibition in the institution has been removed.

NEAT TRICKS IN GREASING AUTOS

Vexatious Problem to Insert Lubricant Through Plughole Larger Than Gun Nozzle.

CHEMIST'S CORKS ARE IDEAL

Special Guns Are Part of Equipment on Many of Most Modern Cars Having Lubricating Systems—Clean Out Yearly.

One of the most vexatious greasing problems is to insert grease through a plughole larger than the nozzle of the gun. To keep the grease from going everywhere but into the hole, obtain a cork about the size of the largest plug on your car. Bore a hole in this cork so that it will slide over the stem of the grease gun, and when you are filling a large hole simply push this cork down to fill the oversize opening. Chemists' rubber corks are ideal for this purpose. A rag or some string packing wound around the stem of the gun can be forced down to act as would the cork.

Cars Have Greasing Systems. Many cars now equipped with greasing systems using a special gun which connects with the nipples on the car. This makes it easy to do some advisable cleaning of the grease passages about once a season. Attach the empty gun, release the plunger so that it can be worked like a pump, and then proceed to force air through the grease connections. This will serve to clean out the distributing grooves in which grease residue has probably congealed during the winter. To make still more certain of perfect lubrication, precede the air pressure treatment with a similar treatment of kerosene to flush out the dirty old grease, which will be seen coming out on the opposite side of the spring shackle. Then use air pressure to force out the kerosene before applying fresh lubricant.

Other Places for Grease. Nor is greasing something to be put only into gun cups and other specified places. Wipe some grease on the wheel shoulders against which the demountable rim rests on the inside. Do this about as often as removal of the rim is required by tire changing. At the same time apply grease sparingly to the rim fasteners and to the rim bolts. By this practice, nearly all rim squeaks are permanently ended.

The chief objection, apart from engineering considerations, is the difficulty of making a double gasket absolutely leak-proof. An ingenious method has been devised to eliminate the extra gasket and accomplish the same purpose. It is necessary first, to equip the car with so-called priming spark plugs. The little petcock intended for injection of gasoline is removed. This leaves a threaded port in the spark plug. In this hole screw a tube three or four inches long, with the end of the tube tightly capped. The effect is apparently the same as if the cylinder content were enlarged by the content of the tube—the object sought in the use of an extra gasket.

PLAN TO CLEAN REFLECTORS

Douse Thoroughly With Stream of Water Without Rubbing, Then Polish With Rouge.

Headlight reflectors become easily scratched. To polish them clean thoroughly with a stream of water without rubbing, and then polish with rouge, as it is used by jewelers, applying rotary motion. Because of the silver plate, do not rub hard.

Welding Costs. Before sending in a broken part to be welded the car owner ought always to get an estimate; otherwise the repair is not unlikely to cost more than a new part. The welders always have an explanation of the excessive charge, but that doesn't help the payer much.

You Auto Know

That valve leakage is one of the most serious losses of economy in the operation of an automobile for, if the valves leak, it is almost impossible to get good compression in the cylinders, and this, in turn, exerts a powerful influence over the entire performance of the car, giving rise to knocks, loss of power and various other ills. Proper care of the valves and regular regrinding are therefore to be numbered among the "expenses" which are really economies, for they will pay big dividends in efficiency and mileage.

Worn valve stems also cause leaks which are quite as serious as those of the valves themselves. In this case the failure of the valve stem to fit snugly into the guide allows air to be drawn past the stem into the cylinder, thinning the mixture to such an extent that the engine fails to run regularly unless the mixture is made richer, while throttling down to less than ten miles an hour is almost impossible. The fact that valve stems need attention is usually apparent from the hissing sound characteristic of this trouble.

FACILITATE REPAIRS ON ELEVATED STAND

Portable Platform for Auto Work Is Illustrated.

Two Longitudinal Rails of Wood, Ten Feet Long With Center Support, Will Prove Entirely Satisfactory—How Made.

In the small repair shop it is not always convenient or practical to have a work pit or a permanent elevated platform for removing the automobile far enough above the floor to give free and easy access underneath. A stand that is portable and on which an automobile can be placed in an elevated position is shown in the accompanying illustration.

Repairs Are Made Much Easier if the Automobile Stands on This Trestle Above the Floor.

a hook to attach to the front axle of the automobile. Two fixed blocks on the forward ends of the rails with two swinging blocks on the rear ends rigidly support the automobile after it is pulled into place and the forward end lowered.

On account of the angle of the incline and the possibility of over-running, the winding drum should be the means of getting the automobile on the rails. Two wedges forward nailed in place will prevent the automobile from creeping to the front. Wedges are also placed under the rear wheels. When not in use, the parts are readily disassembled and placed aside.—Popular Science Monthly.

Mistakes Will Happen. Never misjudge the gear shift of the car for the emergency brake, nor the foot accelerator for the clutch pedal.

Daddy's Evening Fairy Tale by MARY GRAHAM BONNER

DOG AND CAT

"The collie dog and the angora cat were talking," said Daddy. "I must tell you what they were talking about," he added, and both Nick and Nancy said at once: "Oh yes, Daddy, please do!" "The collie dog was very beautiful. The angora cat was very beautiful, too.

"They both belonged to the same mistress and they had a very happy home. They got along very well together, too. "I saw such a strange thing today," said the collie dog. "Did you?" inquired the angora cat, in a most polite way. "Tell me, won't you, what you saw that was so strange?" "I'm merely hinting for an invitation to tell it," the collie dog grinned. "I'm waiting to hear," said the cat, "for then I have something I want to tell you."

"Good," said the dog. "Well, I will proceed. "What is that you are going to do?" asked the cat. "Proceed," repeated the dog. "And what may that be?" inquired the cat.

"That means that I will start," said the dog. "Oh, oh, me-ow, me-ow, now I see," said the cat. "Do proceed," the cat now asked with a grin. "I was out on the street today," the dog commenced, "and I saw two ladies. They weren't old and they weren't so very young.

"By that I mean they were quite, quite grown-up. But they were acting like children. "They were hopping on one foot and then on the other. They were waiting for a trolley car and they seemed to enjoy hopping a bit." "Well," said the cat, "I suppose their feet hadn't grown up as much as the rest of them."

"That must have been the reason for it," said the dog. "Anyway I watched them. I put my head on one side and then on the other and I said to myself: "This is very curious. How strangely they are behaving. This isn't just the thing to do—for grown-ups to be hopping like that."

"Well, they saw me as I was watching them. Of course then I looked away for I didn't want to be rude. "They laughed then and one of them said: "Did you see that dog look at us? He looked at us just as though he were a person and as though he thought it was his behavior was rather strange. But as though, too, he noticed look away when he saw we noticed him."

"They seemed much amused by the way I had been looking at them, but I was much amused at the way they were acting. "But now, cat, tell me your story. I have told you of my strange experience, for I do think it was a strange sight and I think it was amusing to see that the people thought it was so funny I should look at them as a person would. They evidently thought me lacking in any powers of observation."

DADDY'S EVENING FAIRY TALE

LARGE PRODUCERS EAT MUCH

One of the Important Points Brought Out in Department Bulletin by J. C. McDowell.

(Prepared by the United States Department of Agriculture.) Cows that produce milk and butterfat in large quantities have keen appetites and roomy paunches, but they bring in higher incomes over feed cost than the scanty producers, regardless of breed, age, weight, date of freshening, and geographical location. This is one of the important points brought out in Department Bulletin 1009, Relation of Production to Income from Dairy Cows, by J. C. McDowell, just published by the United States Department of Agriculture.

This Cow Ate More Than 11 Tons of Grain, Hay, Silage and Beet Pulp in a Year—She Made in That Time More Than a Half Ton of Butter and More Than 10 Tons of Milk.

The facts in the bulletin are based on a study of data supplied by 96 cow-testing associations in various parts of the country. Because of better feeding, better breeding, and better care, cows owned by association members are much better than the general run of cows. The estimated production per head of all the dairy cows in the United States is approximately 4,000 pounds of milk and 100 pounds of butterfat a year. The association cows are about 50 per cent better, producing an average of 6,077 pounds of milk and 248 pounds of butterfat.

According to figures based on 18,014 yearly individual cow records, as butterfat production increased from 100 to 400 pounds there was a regular increase of about \$16 in income over feed cost per cow for every 50 pounds of increase in average production of butterfat. As the yield of butterfat increased from 100 pounds to 300 pounds, the returns above the dollar expended for feed increased from 35 cents to \$1.52.

The cows having an average milk production of 3,270 pounds showed an average income of \$32.25 over the cost of feed, while those producing 13,250 pounds showed an average income of \$218.19 over feed cost. The cows in the latter group produced about four times as much as those in the other group, and their average income over cost of feed was nearly seven times as great. The increase in income above feed cost grew regularly with the increase in production.

A study of these records shows that it pays best to put feed into big producers, even though they are big eaters, says the department.

A copy of the bulletin may be obtained upon application to the Department of Agriculture, Washington, D. C.

KEEP COLTS IN ROOMY STALL

Young Animals Should Not Be Permitted to Run With Mares Which Are Working in Field.

If mares are being used for farm work, do not let colts run with them in the field. Keep the colts penned in a roomy, clean, cool, ventilated box stall in the barn. If the stall is screened to keep out flies, so much the better. Let the colts nurse morning, noon and night, and run with their mothers in the horse paddock at night.

CARE FOR FARM WOODLANDS

Keep Stock Out as They Injure Young Seedlings and Trees—Forest Supplies Timber.

Take care of the farm woodlands, advises the forest service of the United States Department of Agriculture. Keep the stock out—they injure the young seedlings and trees. Woodland and pasture land are most profitable when managed separately. The home forest, if well cared for, will supply all the timber which the farm needs for buildings, fences and fuel.

Animal Food Required.

Animal food is required for the best growth in chicks, as well as for large egg yields. Where bugs and worms are scarce, it is well to feed meat scrap, fish scrap, or any form of milk products.

Bad Time to Buy Cows.

Usually it is a bad time to buy milk cows any time during the middle of the summer unless they are dry and due to freshen some time during the fall or early winter.

Realizing Value of Silo.

Dairy farmers are realizing more and more the place of the silo in the successful feeding of dairy cows.

Plan to Build Silo.

Plan to build the silo and remodel dairy barn or build new one.

A PLEASURE TO PLEASE

THE HEDLEY INFORMER

PUBLISHED EVERY FRIDAY
ED C. BOLIVAR
Publisher

Entered as second class matter October 23, 1910, at the postoffice at Hedley, Texas, under the Act of March 3, 1879.

Four issues make a newspaper month.

Advertising locals run and are charged for until ordered out, unless specific arrangements are made when the ad is brought in.

NOTICE.—Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of The Informer will be gladly corrected upon its being brought to the attention of the publisher.

FOR SALE—A thoroughbred Jersey bull calf, 7 months old. This calf is out of the best milk and butter strain of Jerseys in this section. Will take pay in feed of any kind—either heads, bundle stuff or hay.

L. A. Stroud,
Hedley, Texas.

O. B. Battle is in town, from Chillicothe, looking after his business interests.

DEMONSTRATION CLUB NOTICE

The County Demonstration Agent meets the ladies of the Hedley community each third Wednesday afternoon at two o'clock.

All ladies of the community are urgently requested to attend these meetings. Miss Richmond is well up on Demonstration Work, the members get up their parts well, and our meetings are interesting and instructive.

In this Club, as in all others, we have a few rules to govern us. At our last meeting we adopted our By Laws unanimously. That the members not present may know some of the rules governing attendance, we publish the following:

- 1 A member who misses three consecutive meetings, without a good excuse, forfeits membership.
- 2 Any member who cannot attend a meeting shall phone the hostess by 9 o'clock on the meeting day.
- 3 Any member who does not make an effort to get up her part on the program shall pay a fine of 25 cents.

Our dues are only ten cents a month, and all that is not used in our demonstrations will be used for the good of the community, and we are anxious that all the ladies of the community have a part in this work.

Our next meeting will be on Wednesday of next week at the home of Mrs. P. V. Dishman.

G. C. Heath and Howard Reast made a business trip to Wellington Wednesday.

PLENTY OF MONEY TO LOAN on farms and ranches. Best rates and best terms. See LEON O. LEWIS, over First National Bank, Clarendon, Texas.

Mrs. Clarence Piercy and two little daughters, from Estelline, visited the former's sister, Mrs. M. G. Whitfield, the past week.

T. G. Davis, a former Hedley citizen, instructs us to change the address of his paper from Isabella to Ava, Mo.

W. H. Steel, a hustling farmer from out on Route 1, was in town Wednesday on business. He informs us that we erred a couple of weeks ago in saying that he brought in the season's first bale of cotton, and Oscar Heath the second. Mr. Steel tells us he is responsible for both the first and second bales, beating Oscar in with the second bale by only a few hours. We stand corrected.

A letter from Mrs. G. W. Evans, who formerly lived here, contains subscription money—the paper to be sent to her at 2525 Myrtle St., Detroit, Mich.

COOKIES OF VARIOUS FLAVORS ALWAYS APPEAL TO CHILDREN

The Children All Know Where the Cookie is.

(Prepared by the United States Department of Agriculture.)

The proverbial cookie jar has a place in every household where there are growing children. While eating "between meals" is not to be encouraged, an extra afternoon lunch is often needed by children who spend a long day in school and come home tired and hungry. A glass of milk and a few cookies at this hour seldom interfere with the appetite for dinner, and are particularly good for children who cannot have a hot school lunch.

Or, if this meal is superfluous, the cookies can go into the regular lunch box, or supplement the dessert. If mother has some unexpected callers she will be inwardly thankful for a full cookie jar.

Any of these recipes will be found satisfactory. They are recommended by the United States Department of Agriculture.

Plain Rolled Cookies.

(About 60 cakes.)
1 cup sugar
1/2 cup shortening
1 egg
1 teaspoon flavoring extract
3 cups sifted flour
2 teaspoons baking powder
1/2 teaspoon salt
About 1/2 cup milk

Cream together the sugar and shortening; add to this the well-beaten egg, the flavoring extract, and the flour, sifted together with the salt and baking powder. Add sufficient milk (or water) to form a dough just stiff enough to roll on the board without sticking. Roll thin, from 1-8 to 1-4 inch in thickness, and cut into desired shape. Bake in a rather hot oven until delicately browned, about 10 to 12 minutes.

Plain Drop Cookies.

Add enough liquid to preceding recipe to make a dough which will barely drop from the spoon, but which

will spread slightly and form a smooth cookie. The dough should not be so soft, however, that the cookies lose their shape and spread over the entire pan. Drop by spoonfuls onto a greased baking sheet and bake in a moderately hot oven about 15 minutes.

Spice Cookies.

In the recipe for plain rolled or plain drop cookies omit the flavoring extract and sift with the flour 2 teaspoons cinnamon, 1 teaspoon allspice, and 1-2 teaspoon cloves, or 1 tablespoon ginger and 2 teaspoons cinnamon.

Chocolate Cookies.

In recipe for plain cookies add 2 ounces chocolate (melted) or 4 tablespoons powdered cocoa, with 1 teaspoon vanilla extract.

Raisin or Nut Drop Cookies.

In recipe for plain drop cookies add 3-4 cup seeded raisins or 3-4 cup chopped nuts dredged with flour.

Molasses Cookies.

(About 60 cakes.)
1 cup molasses
1/2 cup sugar
1/2 cup butter or butter substitute
1 egg
About 3 cups flour (more if necessary)
1/2 teaspoon salt
1 teaspoon baking powder
1/2 teaspoon soda
2 teaspoons ginger
2 teaspoons cinnamon
1 teaspoon allspice

Cream together the sugar, shortening, and molasses and add the well-beaten egg. Sift together the flour, salt, baking powder, baking soda, and spice. Blend the dry ingredients with the molasses mixture. For rolled cookies have the dough soft enough to barely drop from the spoon as directed for drop cookies.

In general these cookies will be more crisp if the molasses and shortening are heated together until the mixture boils.

RAISINS MAKE PLAIN DISHES ATTRACTIVE

Becoming More Popular in Almost Every Home.

Sugar Content is Practically Predigested and is Favored for Building Up Exhausted Energy—Flavor is Delicious.

Because of their valuable iron-content, delicious flavor and economy, raisins are becoming more and more popular in most every home. The addition of raisins to every-day foods makes them more tasty, and of greater health benefit.

Many housewives have discovered, too, that by flavoring with raisins they can popularize bread in their homes. The luscious sauce formed from the sugar of the raisins when they are baked in a loaf of bread, permeates the dough with a rich raisin flavor.

The sugar, in practically predigested form in raisins, is quickly turned into renewed vitality. When you are overworked and tired, it is because you have exhausted your energy. Then you need energizing nutriment, and a food like raisins, rich in sugar, will often revitalize you.

Organic iron, so plentiful in raisins, makes red blood. The blood assimilates it readily and none of the digestive organs are taxed. For building up enduring strength and energy, there is probably no food combining this function with such a delicious flavor as raisins.

Many plain foods that you serve regularly can be made more attractive to every member of your household, and more beneficial in a beautiful way, by adding raisins. This is especially true in warm weather, when the excessive heat saps so much of your energy. Try raisin bread. Its popularity in your home and its ability to replenish tired people toward the end of a warm day will surprise you.

TO CLEAN FEATHER PILLOWS

Placed in Hot Water in Boiler and Allowed to Remain Two Hours is Good Plan.

To clean feather pillows have about four inches of boiling water in the wash boiler. Place four baking powder cans at equal distances apart in the boiler. Place two small pillows or one large one on the cans. Cover the boiler. Keep the water hot enough to steam two hours. Turn pillows out and hang in a breezy, shady place until dry. They will be like new.

SMALL BASKET VERY USEFUL

Receptacle Will Be Found Real Convenience in Bathroom for Various Articles.

A small basket with a tall handle over which a scrubbing cloth can be hung to dry may contain a can of scouring powder and a brush for cleaning the bathtub. A small bottle of kerosene may be added by those who have tried this easy and sanitary cleanser. Kerosene cleans like magic, without hard rubbing, and quickly evaporates. In most bathrooms there is a little corner where such a basket can be set on the floor, and it will be found a real convenience for all concerned.—Good Housekeeping.

Corn-Meal Fish Balls.

2 cupfuls cold corn meal
1 egg
1/2 cupful shredded codfish

Pick over the codfish and soak it to remove salt, if necessary. Combine the ingredients and drop by spoonfuls into hot fat. Drain on clean, porous paper. These codfish balls compare very favorably in taste with those made with potato and are prepared more easily and quickly. The mush must be as dry as possible.

All Around the House

Salt and vinegar will remove stains from teacups.

A wooden potato masher is an excellent utensil for creaming butter and sugar.

White of egg applied to a burn will exclude the air and prevent inflammation.

To remove the odor of onions pour a little vinegar into the frying pan while it is still hot.

The vinegar from home-made pickles is more tasty than ordinary vinegar for making salad dressing.

Keep the hanging plants fresh and moist by putting a small funnel in the basket and filling it with water every morning.

If it is found necessary to keep a large piece of cheese for a length of time, try pouring melted paraffin over the cut surface.

Try dipping a small whisk into a pan of warm water and shaking it over the clothes. You will find it will sprinkle evenly and rapidly.

In Fall Undergarments; Handsome School Coats

WHEN the subject of undergarments comes up for discussion the first thing to be settled is what sort of material is to be used. The choice lies between silk and fine cotton. In silks crepe-back satin, radium and trepe de chine have won the confidence of buyers. In cottons there are fine smooth muslins, batiste, nainsook and cotton crepes to choose from and the last mentioned seems to be making an assured place for itself.

The tailored styles prevail, which means that trimmings, other than those

ous summer and journey contentedly collegeward, outfitted with a handsome coat like that shown at the left of the two illustrated. When the time comes to go, there is nothing more consoling to one of the younger generation than a piece of fetching millinery and a wrap that is impressive; and here is the limit of richness to be allowed the college girl. The coat has the hall marks of the season's styles in its low, bloused waistline, its trimming of very narrow silk bands and its loose straps. The duff

TAILORED STYLES IN UNDERGARMENTS

made of the materials are very sparingly used. Pin tucks in parallel rows and placed in groups, or box tucks are features of the decoration in the tailored styles. French knots, inserted cords and very narrow, sturdy edgings play excellent parts in them also. Chemise with step-in drawers, or with knickers to match, answer the demand for attractive and comfortable underwear.

Cotton crepes and tailored styles will interest those who are providing outfits for young women and girls' school wear, for two good reasons. Laundering must be considered and silks require a little special care in washing—although it is very easy to do them. The other reason is that it is better for the school girl to have too little than too much of the luxuries in her wardrobe and, to many people, silk undergarments are still

fur—natural opossum—exactly suited to youth, makes enchanting collar and cuffs.

There are many deep-pile fabrics (with many new names) in coatings, made up into garments of the dressier sort. Coats are loose with full sleeves and fur trimmings are abundantly used, but some of them have deep rolling collars of the material, filled a little at the back. Linings are usually made of silk crepe, often in a color contrasting with that in the coat, and this gives the designer an opportunity to add a flavor of youth to a rich garment.

The pretty utility coat, at the right of the picture, reveals the fine hand of the expert designer of clothes for the young. It is a straight-line model that advocates the return of the normal waist line and accomplishes its purpose adroitly with a loose belt ir

TWO HANDSOME SCHOOL COATS

a luxury. At the right of the picture a chemise and knickers are shown, of pink cotton crepe, which answers perfectly for school wear.

A very practical slip is shown at the left of the picture. This has proved a very convenient garment, suited to the current styles in dresses, and is often made of saten. In the sheerer materials it usually has a hip-depth hem or double panels at the back and front, for shadow-proof devices. The slip pictured is intended to be worn under sheer dresses and the body is provided with a front panel of lace.

One may turn the back on a joy-

ful contrasting material. The raglan sleeves are emphasized with a novel trimming of the darker material that sets off the large cloth-covered buttons. The collar may be fastened up about the neck, and this coat looks very capable as a barricade against all kinds of winter weather. The hat of wool yarn is crocheted and trimmed with a braided band of the wool, ending in two short, full tassels.

Exercise for Sows. Exercise is necessary for brood sows. They should not be allowed to lie around all day, but given some grain at a distance from their sleeping quarters which will compel them to walk and thus keep fit.

Renew Interest in Sheep. Many farmers are now becoming interested in the rearing and feeding of sheep who never before took much interest in them. Most of them have a lot of highly interesting things to learn about sheep.

FARM STOCK

PRODUCTION OF SPRING PIGS

Average Cost of 100 Pounds of Marketable Pork Placed at \$6.08 by Department.

(Prepared by the United States Department of Agriculture.)

The average cost of producing 100 pounds of marketable pork in sections of Iowa and Illinois in 1921, was \$6.08, according to a cost of production study made by the United States Department of Agriculture on 3,574 spring pigs producing 853,140 pounds of marketable pork.

This pork was produced when corn was relatively cheap last year. The survey shows that 63 per cent of the hogs returned between 25 cents and 75 cents per bushel of corn fed. Costs ranged from \$3.76, in one drove, to \$10.80, in the drove showing the highest cost, 85 per cent of the pork showing a cost of \$7 or less per 100 pounds. An average profit of \$1.28 per 100 pounds of marketable pork is shown, or an average profit of \$3.05 for each pig weaned.

The size of the litters, the relative economies made in the use of feed and labor, and the quantity of pork produced per sow were the three principal cost factors. The entire herd was used as a basis for cost finding, all the expenses of the sow being divided among the pigs in her litter. The principal causes of high costs were the small litters weaned, heavy feed and labor expense, and slightly lower gain per head. Tankage formed an important part of the ration of the economical pork.

The average cost of the total quantity of pork produced, or 882,758 pounds, which included 27,612 pounds lost later through deaths, was \$5.88, with a range of \$3.76 on the farm making the cheapest pork, to \$10.48 on the farm showing highest costs. Thirty-nine of the 51 farms upon which cost figures were kept showed costs between \$4 and \$7.

The farm averaging the smallest litters, or two pigs to the sow, made 473 pounds of pork per litter in 200 days. The farm making the highest record made 1,750 pounds of pork per litter in 200 days from an average of 7.27 pigs weaned per sow. Two farms producing an average of eight pigs per sow produced 1,616 pounds

Pasture Crops Compel Hogs and Growing Pigs to Take Necessary Exercise.

and 1,435 pounds per sow respectively.

The average cost of producing a weaned pig, ten weeks of age, was \$4.50. Figures were kept on 700 spring litters. The cost of producing a weaned pig varied from \$2.73 in the breeding herd having the lowest cost per pig to \$10.16 per weaned pig in the drove having the highest cost. These costs included all feed and other expenses upon the mothers from the time of sorting the sows in the fall to be bred to the date of weaning; also the feed and other costs on the boar while on the farm.

While no attempt was made to find the cost of pigs at farrowing time, the report shows the influence that the selection of sows and condition of the farrowing pen have upon the size of litters, and the number of pigs brought through alive, the department states.

MARKETING EARLY LAMB CROP

Hot Weather Slows Down Gains Decidedly and It Doesn't Pay to Keep Them Back.

Experience has proven that it pays to market the lamb crop when it is ready rather than delay with the hope that additional weight may be had. As a matter of fact, hot weather slows down the gain very decidedly, and it doesn't pay to keep the lambs on after they are ready to go. Well-grown early lambs that weigh sixty to seventy pounds will soon be ready. Let them go then as soon as possible.

Exercise for Sows. Exercise is necessary for brood sows. They should not be allowed to lie around all day, but given some grain at a distance from their sleeping quarters which will compel them to walk and thus keep fit.

Renew Interest in Sheep. Many farmers are now becoming interested in the rearing and feeding of sheep who never before took much interest in them. Most of them have a lot of highly interesting things to learn about sheep.

CALOMEL GOOD BUT TREACHEROUS

Next Dose May Salivate, Shock Liver or Attack Your Bones.

You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into your blue like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tone for a few cents which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. No salts necessary. Give it to the children because it is perfectly harmless and can not salivate.—Advertisement.

Contemporary Corrected.

From Fashionable Dress—"When the gay Bard of Avon fondly inquired 'What is so rare as a day in June?' he was probably thinking of the smiles and tears and tenderness of the wedding day."

Not at all, brother, not at all! He was probably thinking: "That's a mighty good line. Wish I'd thought of it before Lovell did."—Boston Transcript.

Sure Relief FOR INDIGESTION

New Dodge. Willis—Didn't your wife haul you out last night when she woke up when you came home?

Gillis—No; I fooled her. I stood in the hall an hour, delivered a lecture on Civic Righteousness, told a bedtime story, and sang three grand opera selections, and she thought she had forgotten to turn off the radio.—Judge.

The use of soft coal will make laundry work heavier this winter. Red Cross Ball Blue will help to remove that grimy look. At all grocers.—Advertisement.

Return of the Native. Returning Native Son (to local character)—You certainly have changed a lot, Uncle Anderson.

Local Character (sourly)—Name ain't Anderson?

Native Son—What the d—uce is your name changed, too?—Kasper (Stockholm).

Something to Think About

By F. A. WALKER

CHARACTER BUILDERS

YOU may be filled with wonder at the number of disappointments that come into your life, frequently, too, at a time when you are least able to bear the shock.

Being afflicted with the common infirmitates of mankind, you fall to consider that others are as repeatedly beset by discomfures as you.

Some, it is true, run aground and are wrecked, swallowed up by the sea of despondency and swept away.

Others, more courageous by reason of their faith in a higher power, possessing a better judgment than their own, summon up new strength and sail bravely on, refusing to lose heart or to become discouraged because they have temporarily lost sight of their friendly star.

And this is what we all ought to do, quite irrespective of our many slips and stumbles, else in rebellion we lose hope.

An artist who imagines he has at last found the right color for what he decides shall be his masterpiece of tone and composition, is unspeakably disappointed when at the final stroke of the brush he is confronted with the palpable miscarriage of his plan.

And so is the singer with a pleasing voice who, after years of hard work, discovers a defect which cannot be overcome.

A disappointed child dries his tears and turns his attention to a new quest. In the novel surroundings he quickly forgets his old dismay and rises gayly to sunnier heights.

We older children, much harder to

please and decidedly less inclined to change our course, do not bear the chastisement with similar grace, being disposed to violent rebellion and shameful outbursts of passion which in our cooler moments, let it be stated charitably and with due regard to the various frailties of human nature, we occasionally regret.

To turn squarely about when defeated on the very threshold of success, though exceedingly difficult and humiliating, is the noblest thing to do.

In this one sublime act we unconsciously uncover the true base of character, and exhibit our unsuspected virtues.

The storms of ages may beat against such character, but they can neither move nor destroy it, built as it was by disappointments for an eternity of sweet content such as mortal tongues cannot describe or imaginations picture.

KIDDIES SIX

By Will M. Maupin

SONGS O' CHEER

WHAT'S the use o' weepin'? Better days are comin' soon. Don't be cryin', but be tryin'. For t' lift a merry tune.

What's th' use o' moanin'? If th' day is dark an' drear? Clouds don't matter—they will scatter. If you sing a song o' cheer.

What's th' use o' grumblin'? If your plans go all awry? Keep on smilin' all th' while on. You will git there by an' by.

What's th' use o' kickin'? At your tough, untimely fate? On tomorrow shove your sorrow. An' keep hustlin' while you wait.

What's th' use o' cryin'? 'Cause all days ain't days o' June? Prick the bubble you call trouble. An' strike up a merry tune. (Copyright by Will M. Maupin.)

SCHOOL DAYS

ward whom the salt fell and to fasten it upon the spiller himself. It was doubtless this ancient Latin belief which caused Leonardo da Vinci to include the overturned salt in his painting of the Last Supper.

(© by the Wheeler Syndicate, Inc.)

The Only Place He Missed. Rystander (to boasting old salt)—You ought to feel at home in geography when you've been about so much.

Old Salt—Well, I've run past the ol' place a couple times, but I never planted me foot there.

Use Oil in Steam Tractor. A steam-driven tractor of the end-less trend type has been developed in which oil is the fuel used for its two engines mounted on opposite sides.

WHY?

IS THE SPILLING OF SALT UNLUCKY?

THE superstition connected with the spilling of salt during a meal has had the same origin as that concerning 13 people at a table—the Last Supper. But, unlike the latter belief, there is no foundation for it in history. None of the accounts of the Last Supper records any spilling of the salt by Judas and it is doubtful whether Leonardo da Vinci, in his famous fresco of Christ and His apostles, intended to attach any significance to the overturned saucular having been accepted as an historic replica of the Supper, it is only natural that the incident of the overturned salt should have been implanted in the public's mind as an integral part of the meal and that it should have been connected with Judas and his subsequent ill fortune.

The custom of throwing salt over the left shoulder in order to dissipate any evil influence has an origin which antedates Da Vinci by many hundreds of years. The pagan Romans considered that salt was sacred to the Penates, the household gods, and that to spill it during a meal would incur the wrath of these gods—not upon the spiller, but upon the person toward whom it was spilled. Casting a pinch of salt over the left shoulder—the shoulder of evil—was therefore an act of politeness, for it was supposed to lift the curse from the person to

Mother's Cook Book

For palates that must have invention to delight their taste.

THESE ARE GOOD

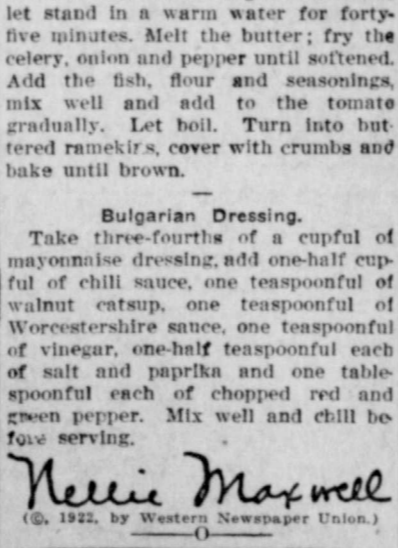

SUCH vegetables as the delicate pea are best served in the liquor in which they were cooked.

Deviled Herring. Take two cupfuls of smoked boneless herring, half cupful of diced celery, one-fourth of a teaspoonful of mustard, two tablespoonfuls of minced green peppers, one-fourth of a teaspoonful of Worcestershire sauce, two tablespoonfuls of butter, three tablespoonfuls of flour, two cupfuls of tomato juice and one cupful of buttered crumbs. Cut the herring into dice and let stand in a warm water for forty-five minutes. Melt the butter; fry the celery, onion and pepper until softened. Add the fish, flour and seasonings, mix well and add to the tomato gradually. Let boil. Turn into buttered ramekins, cover with crumbs and bake until brown.

Bulgarian Dressing. Take three-fourths of a cupful of mayonnaise dressing, add one-half cupful of chili sauce, one teaspoonful of walnut catsup, one teaspoonful of Worcestershire sauce, one teaspoonful of vinegar, one-half teaspoonful each of salt and paprika and one tablespoonful each of chopped red and green pepper. Mix well and chill before serving.

Nellie Maxwell (©, 1922, by Western Newspaper Union.)

ONCE IS ENOUGH

Be as you would seem to be.

Uncommon Sense . . .

By JOHN BLAKE

HERITAGE OF HONESTY

"I KNEW from a child that it was wrong to steal," said a very successful man who has made a fortune without being a crook.

"That is what saves the world," replied an editor to whom he was talking. "Thank Heaven, all boys are honest. They never become crooks till they are men."

That statement is in a large measure true. While children, if trained by scoundrels, will steal, they know instinctively that stealing is wrong. The theft of apples or watermelons or peaches committed by youngsters is mischief.

Show them that it is really stealing, that they are depriving someone else

of what is rightfully his, and there will be no more climbing over back fences for them.

One of the reasons that this is not a difficult world in which to live is that honesty is instinctive, and theft has to be cultivated.

The average schoolboy despises a thief, and will have nothing to do with him.

If he reads in the newspapers of an absconder or a forger or a man who misappropriates a trust, the lad is shocked and disgusted.

It is only when he becomes hardened by contact with the world, and learns that men often prosper, even though they are dishonest, that he becomes hardened, and justifies his own misdeeds.

Watch a crowd of boys at games, and you will find that the cheat is always marked and barred from the game if he continues to cheat.

The cheat himself was not a cheat always. He has learned cheating from another boy who in all likelihood learned it from a man.

As long as we start honest, as we do, the greater percentage of us are likely to remain so.

Only those who are weak fall from their standards, and even they, when the race is over, heartily regret that they ever were anything but fair and clean and open-minded in their dealings with their fellows.

Children Cry For

Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your ailing child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

A Presbyterian Next Time.

Little Mary Lou, aged six, had at Little Mary Lou, aged six, had always been an ardent Methodist, but was one day persuaded by a small playmate to visit a Presbyterian Sunday school. She was enthralled by the new surroundings and was especially infatuated with the charming young teacher who so cordially invited her to come again.

"I'd like to," said Mary Lou wistfully, "if I didn't have to go to my own Sunday school. But do you know, if I had my life to live over again, I just believe I'd be a Presbyterian."—Kansas City Star.

A Hard Lot.

"Madam," said the suave agent, I have here a book that will tell you how to live twenty-four hours a day.

"I haven't any use for it," said the hard-faced matron. "With a no-account husband and six children to support by running a boarding house, I'm already living twenty-four hours a day. What I need is a season pass to a movie house and a chance to use it."

CLIENT "SPILLED THE BEANS"

Altogether Too Truthful in Answering Question Put to Him by His Own Attorney.

"Were I giving advice to a young lawyer," said an attorney the other day, "I would advise him to be careful about placing his client on the stand. It is at least as well to know what he is likely to answer to his attorney's leading questions. Some time ago," continued the lawyer, "a case was tried in which the plaintiff's attorney certainly 'spilled the beans,' though actually it was a cargo of bread, rolls and cake that was upset. A baker's wagon had been hit by a train in spite of the 'Stop, Look, Listen' sign, and the driver sued. On the stand he was asked how he conducted himself when he came to the crossing, and he replied: 'I just trotted gently across, looking the other way and thinking about nothing in particular.' The attorney threw up the case on the spot, but it was really a lack of foresight on his part," continued the narrator.

Breezy. "Hello, old man, I see you have an electric fan." "Yes; I thought I'd blow myself."

Bathers Took to Raincoats.

The White Star liner Majestic, the world's largest steamer, arrived in New York the other day from Southampton and Cherbourg on her third voyage to America.

Voyagers described the weather on the other side as wet and cold. One passenger said that at Brighton on the English coast, where a carnival was in progress, the bathing belles paraded in oilskins, sea boots and sort'westers. The reporter solemnly averred that the king and queen of the pageant were supplied with hot frog to ward off the dangers of an attack of pneumonia in the petting rain.

Some folks think castor oil should follow a dose of Vermifuge. Not necessary with Dr. Peery's. It's a "Dead Shot" for Worms and Tapeworm. One dose cleans them out. If it does not, we refund your money. 312 Pearl Street, New York City.—Advertisement.

Don't Kill Bullsnakes.

Kansas farmers find that a bullsnake in an alfalfa field is worth at least \$2.50 a month, says the Scientific American, for an acre harbors, on an average, six gophers, which damage the crop to that extent. One adult bullsnake keeps an acre free of the pests. The bullsnake is harmless, feeds also on rats and mice around barn or granary, and deserves the protection of the farmer.

SHERIFF'S SALE

The State of Texas.
To Whom These Presents Shall
Come, Know Ye:

That, whereas, in the District
Court of Donley County, Texas,
on the 18th day of July, 1922,
Walter Darlington as plaintiff
recovered a judgment against
W. C. Lyle and wife, Lucy Lyle,
for the sum of \$3,143.25, togeth-
er with a foreclosure of a deed
of trust lien as the same existed
on the 15th day of August, 1919,
against W. C. Lyle and wife,
Lucy Lyle, T. O. Whitwell, J. D.
Harvey, C. D. Akers, J. B. Pick-
ett, trustee for the Hedley Oil
Lease Association, U. J. Boston,
J. F. Lyle, R. E. Newman, Hed-
ley Oil Lease Association an un-
incorporated joint stock associ-
ation, J. B. Fickett director and
general manager, and Walter
DeBord, on all of the following

described property, to wit:
All of the Southeast quarter
(14) of Section No 66 in Block
21 in Donley county, Texas,
known as the W. C. Lyle place,
containing 160 acres of land, ly-
ing about eighteen miles north
east of Clarendon.

And, whereas, on the 5th day
of September, 1922, W. E. Bray,
clerk of the District Court of
said county, did issue an order
of sale directed and delivered to
me as sheriff of Donley county,
Texas, requiring me to seize and
sell said premises and all the in-
terests that any of the above
named defendants and Ryan
Brothers as Interveners had in
said lands at public vendue for
cash as under execution.

Now, therefore, know ye: That
I, J. H. Rutherford, sheriff of
Donley county, Texas, shall, be-
tween the hours of ten o'clock a.
m. and four o'clock p. m. on
Tuesday, October 3rd, 1922, at
the court house door of Donley
county, Texas, sell at public ven-
due the said premises, they hav-
ing been seized upon by me on
the 5th day of September, 1922.
Such sale will be made to the
highest and best bidder for cash
after a publication of said notice
as the law in such cases requires.

Witness my hand at Claren-
don, Texas, this the 5th day of
September, 1922.

J. H. Rutherford, Sheriff
Donley County, Texas.

SHERIFF'S SALE

The State of Texas.
To Whom These Presents Shall
Come, Know Ye:

That, whereas, on the 5th day
of September, 1922, pursuant to
a judgment rendered in the Dis-
trict Court of Donley county,
Texas, on the 18th day of July,
1922, in cause No 1217, wherein
John Ryan was plaintiff and J. S.
Morgan and others were defen-
dants, W. E. Bray, as clerk of
the District Court, did issue his
order of sale to me directed re-
quiring me to seize and sell all
the interests owned in the West
half of Section 49 in Block C 7 in
Donley county, Texas, contain-
ing about 320 acres of land and
lying about seven miles north-

east of Clarendon, and known as
the Humphreys place, on the 7th
day of June, 1919, and since by
John Ryan, George Ryan, B.
Younger, W. H. Peters, Gal-
braith Foxworth Lumber Com-
pany, I. H. Miller, Claude Mc-
Allister, O. D. Ardrey, Carl
Parsons and Sam Braswell in
satisfaction of a judgment in fa-
vor of John Ryan and against J.
S. Morgan for the sum of
\$9,614.83 and costs of suit and
costs of executing this writ.

And, whereas, said order of
sale was to me, a sheriff, deliv-
ered and I did on the date of the
issuance thereof seize said prem-
ises; Know Ye, therefore, that
on Tuesday, October 3rd, 1922,
between the hours of ten o'clock
a. m. and four o'clock p. m., I as
sheriff shall, at public vendue at
the court house door of Donley
county, Texas, sell said premises
to the highest and best bidder
for cash and will execute a prop-
er deed conveying the same to
such purchaser, after having
given notice thereof herein as
the law in such cases requires.

Witness my hand at Claren-
don, Texas, this the 5th day of
September, 1922.

J. H. Rutherford, Sheriff
Donley County, Texas.

SHERIFF'S SALE

The State of Texas.
To Whom These Presents Shall
Come, Know Ye:

That, whereas, the Jefferson
Standard Life Insurance Com-
pany, a foreign corporation, did
on the 19th day of July, 1922, in
the District Court of Donley
county, Texas, in cause No 1221
recover a judgment against
George W. Taylor for the sum of
\$585.82, together with a fore-
closure of a deed of trust lien on
all of lots Nos 18 and 19 in Block
65 of the original town of Claren-
don, in Donley county, Texas,
as the same existed on the 2nd
day of July, 1921, and also fore-
closure of a chattel mortgage
lien on one Ford coupe, model
1921, engine number 4223582, as
the same existed on last said
date.

And, whereas, on the 5th day
of September, 1922, W. E. Bray,
clerk of said Court, did issue
and deliver to me as sheriff of
said county, his order of sale re-
quiring me to seize said prem-
ises and chattels as under exe-
cution and sell the same at pub-
lic vendue as the law requires.

Now, therefore, know ye: That
I, as sheriff of Donley county,
Texas, shall, between the hours
of ten o'clock a. m. and four
o'clock p. m., on Tuesday the 3rd
day of October, 1922, at the court
house door of Donley county,
Texas, sell at public vendue to the
highest and best bidder for cash
all of lots Nos 18 and 19 in Block
65 in the original town of Claren-
don in Donley county, Texas,
and the above described auto-
mobile in satisfaction of said
judgment. You will therefore
govern yourselves accordingly.

Witness my hand at Claren-
don, Texas, this the 5th day of
September, 1922.

J. H. Rutherford, Sheriff
Donley County, Texas.

SHERIFF'S SALE

The State of Texas.
To Whom These Presents May
Come, Know Ye:

That, whereas, in the District
Court of Donley county, Texas,
on the 25th day of July, A. D.
1922, J. M. Plaster recovered a
judgment against H. Cook, Van
Boon and F. M. Osborne, for the
sum of \$3,835.70, with interest
from July 25th, 1922, at the rate
of 10 per cent per annum, and
costs of suit, together with a
foreclosure of a vendor's lien on
the following described prop-
erty, to wit: A part of Section No.
94, in Block 20, H. & G. N. Rg.

Co Survey in Donley county,
Texas, described as follows:

First Tract: Beginning at an
iron pin in the ground, 1050 feet
south and 30 feet east of the NW
corner of said Section 94, as the
place of beginning, same also
the NW corner of this tract;
thence East 700 feet, thence
South 500 feet; thence West 700
feet; thence North 500 feet to
the place of beginning.

Second Tract: Beginning at
the NW corner of the above tract
as a place of beginning. Thence
South 500 feet; thence West 10
feet; thence North 500 feet;
thence East 10 feet to the place
of beginning, lying adjacent to
the first described tract of land,
the two tracts containing 8 acres
of land, more or less.

And, whereas, on the 5th day
of September, 1922, W. E. Bray,
clerk of the District Court of
said county, did issue an order
of sale directed and delivered to
me as sheriff of Donley county,
Texas, requiring me to seize and
sell said premises and all the in-
terests of any of the above nam-
ed defendants in said lands at
public vendue for cash as under
execution.

Now, therefore, Know Ye: That
I, J. H. Rutherford, sheriff of
Donley county, Texas, shall, be-
tween the hours of ten o'clock a.
m. and four o'clock p. m. on
Tuesday, October 3rd, 1922, at
the court house door of Donley
county, Texas, sell at public ven-
due for cash the said premises,
they having been seized by me
on the 5th day of September,
1922. Such sale will be made to
the highest and best bidder for
cash after a publication of this
notice as the law in such cases
requires.

Witness my hand at Claren-
don, Texas, this the 5th day of
September, 1922.

J. H. Rutherford, Sheriff
Donley County, Texas.

SHERIFF'S SALE

The State of Texas.
To Whom These Presents May
Come, Know Ye:

That, whereas, in the District
Court of Donley county, Texas,
on the 25th day of July, A. D.
1922, J. M. Plaster as plaintiff
recovered judgment against W.
T. Clifton, J. G. Clifton, Mrs. E.
J. McQuestion, — McQuestion
and C. D. Akers for the sum of
\$7,486.16, together with a fore-
closure of a vendor's lien on the
following described property,
to-wit:

All of Section No 99, in Block
No 20, H. & G. N. Rg. Co. Sur-
vey in Donley county, Texas.

And, whereas, on the 5th day
of September, 1922, W. E. Bray,
clerk of the District Court of
said county, did issue an order
of sale directed and delivered to
me as sheriff of Donley county,
Texas, requiring me to seize and
sell said premises and all the in-
terests of any of the above nam-
ed defendants in said lands at
public vendue for cash as under

CHAPTER VII—Continued.
—17—

AUGUST

Well, of all the topsy-turvy worlds, this is the topsy-turviest, I am sure. What do they want me to do, and which do they want me to be? Oh, I wish I was just a plain Susie or Bessie, and not a cross-current and a contradiction, with a father that wants me to be one thing and a mother that wants me to be another! It was bad enough before, when Father wanted me to be Mary, and Mother wanted me to be Marie. But now—

Well, to begin at the beginning. It's all over—the love story, I mean, and I know now why it's been so hard for me to remember to be Mary and why everything is different, and all.

They don't want me to be Marie. They want me to be Marie. And now I don't know what to think. If Mother's going to want me to be Marie, and Father's going to want me to be Marie, how am I going to know what anybody wants, ever? Besides, it was getting to be such a beautiful love story—Father and Cousin Grace. And now—

But let me tell you what happened. It was last night. We were on the piazza, Father, Cousin Grace, and I. She got up and went into the house for something—Cousin Grace, I mean—and all of a sudden I determined to tell Father how glad I was, about him and Cousin Grace; and how I hoped it would last—having him out there with us, and all that. And I told him.

I don't remember what I said exactly. But I hadn't anywhere near said what I wanted to when he did stop me. Why, he almost jumped out of his chair.

"Mary!" he gasped. "What in the world are you talking about?"

"Why, Father, I was telling you," I explained. And I tried to be so cool and calm that it would make him calm and cool, too. (But it didn't calm him or cool him one bit.) "It's about when you're married and—"

"Married!" he interrupted again. (They never let me interrupt like that.)

"To Cousin Grace—yes. But Father, you—you are going to marry Cousin Grace, aren't you?" I cried—and I did "most cry, for I saw by his face that he was not.

"That is not my present intention," he said. His lips came together hard, and he looked over his shoulder to see if Cousin Grace was coming back.

"But you're going to some time," I begged him.

"I do not expect to."

I fell back in my chair, and I know I looked griefed and hurt and disappointed, as I almost sobbed.

"Oh, Father, and when I thought you were going to!"

"There, there, child! He spoke stern and almost cross now. "This absurd nonsensical idea has gone quite far enough. Let us think no more about it."

"It isn't absurd and nonsensical!" I cried. And I could hardly say the words, I was choking up so. "Everybody said you were going to, and I wrote Mother so; and—"

"You wrote that to your mother?" He did jump from his chair this time. "Yes, and she was glad."

"Oh, she was!" He sat down sort of limp-like and queer.

"Yes, she said she was glad you'd found an estimable woman to make a home for you."

"Oh, she did." He said this, too, in that queer, funny, quiet kind of way.

"Yes," I spoke, decided and firm. I'd begun to think, all of a sudden, that maybe he didn't appreciate Mother as much as she did him; and I determined right then and there to make him, if I could. When I remember all the lovely things she'd said about him—

"Father," I began; and I spoke this time, even more decided and firm. "I don't believe you appreciate Mother."

"Eh, What?"

He made me jump this time, he turned around with such a jerk, and spoke so sharply. But in spite of the jump I still held on to my subject, firm and decided.

"I say I don't believe you appreciate my mother. You acted right now as if you didn't believe she meant it when I told you she was glad you had found an estimable woman to make a home for you. But she did mean it, I know, because she said it before, once, last year, that she hoped you would find one. Yes, and that isn't all. There's another reason why I know Mother always has—has your best interest at heart. She—she tried to make me over into Mary before I came, so as to please you."

"She did what?" Once more he made me jump, he turned so suddenly, and spoke with such a short, sharp snap.

But in spite of the jump I went right on, just as I had before, firm and decided. I told him everything—all about the cooking lessons, and the astronomy book we read an hour every day, and the pink silk dress I couldn't have, and the self-discipline. And how she said if she had self-discipline when she was a girl, her life would have been very different.

I talked very fast and hurriedly. I was afraid he'd interrupt, and I wanted to get in all I could before he

did. But he didn't interrupt at all. He did not even stir until I said how at the last she bought me the homely shoes and the plain dark suit so I could go as Mary, and be Mary when Aunt Jane first saw me get off the train.

When I said that, he dropped his hand and turned around and stared at me. And there was such a funny look in his eyes. Then he got up and began to talk up and down the piazza, muttering: "So you came as Mary, you came as Mary." Then, after a minute, he gave a funny little laugh and sat down.

Mrs. Small came up the front walk to see Cousin Grace, and Father told her to go right into the library where Cousin Grace was. So we were left alone again, after a minute.

It was "most dark on the piazza, but I could see Father's face in the light from the window; and it looked—well, I'd never seen it look like that before. It was as if something that had been on it for years had dropped off and left it clear where before it had been blurred and indistinct. No, that doesn't exactly describe it either. I can't describe it. But I'll go on and say what he said.

After Mrs. Small had gone into the house, and he saw that she was sitting down with Cousin Grace in the library, he turned to me and said: "And so you came as Mary?"

"I said yes, I did."

"Well, I—I got ready for Marie."

"But then I didn't quite understand, not even when I looked at him and saw the old understanding twinkle in his eyes.

"You mean—you thought I was coming as Marie, of course," I said then.

"Yes," he nodded.

"But I came as Mary."

"I see now that you did. Well, Mary, you've told me your story, so I suppose I may as well tell you mine—now. You see, I not only got ready for Marie, but I had planned to keep her Marie, and not let her be Mary—at all."

And then he told me. He told me how he'd never forgotten that day in the parlor when I cried and he saw then how hard it was for me to live

room and shut the door. I heard it. And he was still there when I went up to bed afterward.

How do you suppose Mother's going to feel when I tell her that after all her pains Father didn't like it at all. He wanted me to be Marie. It's a shame, after all the pains she took, But I won't write it to her, anyway. Maybe I won't have to tell her, unless she asks me.

Oh, dear, dear me! Why couldn't Father and Mother have been just the common live-happy-ever-after kind, or else found out before they married that they were unlikes?

SEPTEMBER

Well, vacation is over, and I go back to Boston tomorrow. It's been very nice and I've had a good time, in spite of being so mixed up as to whether I was Mary or Marie. It wasn't so bad as I was afraid it would be. Very soon after Father and I had that talk on the piazza, Cousin Grace took me down to the store and bought me two new white dresses, and the dearest little pair of shoes I ever saw. She said Father wanted me to have them.

And that's all—every single word that's been said about that Mary-and-Marie business. And even that didn't really say anything—not by name. And Cousin Grace never mentioned it again. And Father never mentioned it at all. Not a word.

Father's been queer. He's been awfully queer. Some days he's talked a lot with me—asked me questions just as he used to, all about what I did in Boston, and Mother, and the people that came there to see her, and everything. And he spoke of the violinist again, and, of course this time I told him all about him, and that he didn't come any more, nor Mr. Easterbrook, either; and Father was so interested! Why, it seemed sometimes as if he just couldn't hear enough about things. Then, all of a sudden, at times, he'd get right up in the middle of something I was saying and act as if he was just waiting for me to finish my sentence so he could go. And he did go, just as soon as I had finished my sentence. And after that, maybe, he wouldn't hardly speak to me again for a whole day.

And so that's why I say he's been so queer since that night on the piazza. But most of the time he's been lovely, perfectly lovely. And so has Cousin Grace. And I've had a beautiful time.

CHAPTER VIII

Which is the Real Love Story.

BOSTON. FOUR DAYS LATER.

Well, here I am again in Boston Mother and the rest met me at the station, and everybody seemed glad to see me, just as they did before. And I was glad to see them. But I didn't feel anywhere near so excited, and sort of crazy, as I did last year. I tried to, but I couldn't. I don't know why. Maybe it was because I'd been Marie all summer, anyway, so I wasn't so crazy to be Marie now, not needing any rest from being Mary. Maybe it was 'cause I sort of hated to leave Father.

And I did hate to leave him, especially when I found he hated to have me leave him. And he did. He told me so at the junction. He asked me had I been a little happier there with him this year than last; and he said he hoped I had.

He said I would never know how he missed me after I went last year. He said you never knew how you missed things—and people—till they were gone. And I wondered if, by the way he said it, he wasn't thinking of Mother more than he was of me, and of her going long ago. And I told him I loved him dearly, and I had loved to be with him this summer, and that I'd stay his whole six months with him next year if he wanted me to.

He shook his head at that; but he did look happy and pleased, and said I'd never know how glad he was that I'd said that, and that he should prize it very highly—the love of his little daughter. He said you never knew how to prize love, either, till you'd lost it; and he said he'd learned his lesson, and learned it well. I knew then, of course, that he was thinking of Mother and the long ago. And I felt so sorry for him.

(TO BE CONTINUED.)

His Time.

There is a story told of Mark Twain's boyhood. He was staying with his brother, who was a model Christian. One morning, shortly after the family were seated at breakfast the voice of the young boy was heard from upstairs: "Has the Scripture lesson been read?" he shouted. "Yes," they answered. "Family prayers over?" "Yes." "Grace been said?" "Yes." "All right, I'll be down in a minute."

Horrid Thing!

"We had a splendid time in the country," said Mrs. Newrich, "and my husband has turned out to be a good shot. The men went out one day to do some shooting, and my husband got what they call a bull. And some mean old farmer made him pay for it."—Seattle Post-Intelligencer.

"And So You Came as Mary?"

room and shut the door. I heard it. And he was still there when I went up to bed afterward.

How do you suppose Mother's going to feel when I tell her that after all her pains Father didn't like it at all. He wanted me to be Marie. It's a shame, after all the pains she took, But I won't write it to her, anyway. Maybe I won't have to tell her, unless she asks me.

WINTER STORAGE FOR POTATO CROP

Properly Built Warehouse Holds Tubers at Right Temperature.

VENTILATION IS NECESSARY

Losses in Storage Can Be Largely Prevented by Proper Construction and Intelligent Management of Storage Houses.

By WILLIAM A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 187 Prairie Avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Potato growers in the northern section of the country use different methods of storing their crops through the winter. Some employ the old method of a straw-lined trench with a straw covering and earth thrown over it. Others have built of timber or concrete underground storage cellars. In some sections, notably Maine, where huge crops of potatoes are grown, the tubers are carried through winter, or until such time as they are marketed, in warehouses which are provided with artificial heat. In view of these facts, investigators for the United States Department of Agriculture say, an intensive study of the subject has not been made, and not much reliable data available.

The reason for this lack of intensive study are given by William Stuart, of the federal department in Farmers' Bulletin No. 847 on "Potato Storage

the northern section of the country, where the principal Irish potato crops are grown, there usually must be provision for artificial heat, as well as storing the potatoes in a water-tight building, with insulated outside walls.

It was with this idea in mind—holding an even temperature in the storage house—that the building shown in the accompanying illustrations was designed. Also it will be noted from the cross-section and detail drawing of the exterior wall, and from the floor plan, that good ventilation has been provided.

The warehouse shown is 24 feet wide and 40 feet long. It is constructed of first-class lumber, such as may be secured at almost all lumber yards. The foundation is of concrete, on which are set sills of 2x10-inch timbers, the floor line being 3 feet above the ground. The cross-section of the building in the left of the drawing and the detail of wall construction in the upper right hand corner, show the materials used and the method of construction.

It will be noted that the exterior walls of the building are covered with drop siding, nailed to the 2x4-inch studs. Ship-lap sheathing is nailed to the inside of the studs, providing a 4-inch air space between the interior and exterior walls. This acts as an insulation against heat and cold and also provides means for air circulation. A 2x2-inch timber nailed to the inside wall provides nailing space for the walls of the storage bins, which are of crib siding, permitting a circulation of air through the walls of the bins. The floor of the building is laid of 1x6-inch matched flooring.

The building provides space for seven bins, each 8 by 9 feet, inside measurement. It is considered the best practice to extend the walls of the bins up only six feet, to permit ease in filling and emptying and to provide plenty of air space above. These dimensions give a capacity of 450 cubic feet. Through the center of these bins runs a vent shaft, which is perforated. The shaft runs through

and Storage Warehouses." "When potatoes are plentiful and relatively cheap," says the bulletin, "little attention is given to such wastage and loss as usually occur in storage; in fact, a considerable loss was considered inevitable. With high prices and scarcity of supply the need of conserving the entire production for seed and food purposes is of the utmost importance."

However, it has been demonstrated, the bulletin continues, that losses in storage can be largely prevented by the proper construction and intelligent management of storage houses. When it is considered that potatoes are one of the most important food crops in the United States, it is sheer economic waste to fail to provide proper means of conserving the crop.

The primary object of storage is to hold potatoes, which are more or less perishable, in a salable condition throughout as long a period as may be economically desirable. The main, or late crop of potatoes is intended for winter use, and must be stored, the early or truck crop being disposed of direct from the field as harvested. The factors provided by the storage warehouse must be of such a character as to protect the potatoes from extremes of heat and cold and from the light. Other facts of less importance perhaps, are humidity and aeration and the size of the pile or bin in which the potatoes are stored.

Various notions are current regarding the best temperature at which to hold potatoes in storage. The temperatures which are generally recommended are between 32 and 45 degrees Fahrenheit, the freezing point of potatoes being between 26 and 28 degrees. To hold this temperature in

the ceiling to the attic space and to the roof ventilator. With the draft provided by the air space in the walls and through the air shafts, a circulation of air through the stored potatoes is assured. The outside air vents in the concrete foundation may be opened or closed, as the temperature of the house demands.

For use in extreme weather, space at one side of the building is provided for a heating plant, the floor of the heater room being on a level with the ground. Flues from the heater are run to the space under the floor, so that the warm air may be carried through the ventilators.

As stated in the beginning, the success of this building as a storage warehouse for potatoes depends upon good materials and construction, and, after the potatoes are stored, upon watchfulness to maintain an even, low temperature.

Some More Psychology.

"Do you think Mrs. Peckton can be elected?"

"Just confidentially," said Mr. Peckton, "I believe she is going to be defeated. In that event I'm prepared to spend a considerable sum of money for clothes, articles of personal adornment and perhaps a trip to the seashore. The reaction is bound to make her take a keener interest in strictly feminine pursuits."—Birmingham Age Herald.

In Real Life.

"I don't think so much of current humor."

"What now?"

"I advertised for an office boy."

"Well?"

"And no college graduate appeared."

ALWAYS TIRED NO AMBITION

Nervous and Dizzy, Everything Seemed to Worry Me. How I Got Well

Larwill, Indiana.—"My back was so bad I could not do my washing. I was

ways tired out and had no ambition, was nervous and dizzy and everything seemed to worry me and I had awful pains in my right side. I felt badly about four years and could not do my work as it should have been done. I saw Lydia E. Pinkham's Vegetable Compound advertised so much and it did so many people good that I began to take it myself. I am feeling fine now and everyone tells me they never saw me looking so well. I live on a farm, do all my work, and have three little girls to take care of. I am recommending this medicine to my friends and know it will help them if they use it like I do." — Mrs. HERBERT LONG, R. R. 3, Box 7, Larwill, Indiana.

Many women keep about their work when it is a great effort. They are always tired out and have no ambition. When you are in this condition give it prompt attention.

Take Lydia E. Pinkham's Vegetable Compound, for it is especially adapted to correct such troubles, as it did for Mrs. Long.

TOO LATE

Death only a matter of short time. Don't wait until pains and aches become incurable diseases. Avoid painful consequences by taking

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles—the National Remedy of Holland since 1696. Three sizes, all druggists.

Look for the same Gold Medal on every box and accept no imitation.

Not a Laxative

Nujol is a lubricant—not a medicine or laxative—so cannot gripe.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it. Try it today.

Nujol

111 cigarettes

10¢ They are GOOD!

For the Gum Chewers. In 1921 the Orinoco valley exported 640,000 pounds of chicle, all for two gum manufacturing companies in the United States.

BABIES LOVE MRS. WINGLOW'S SYRUP

Lincoln's Climatic Paint

There's nothing that adds more to the value and appearance of that home than a nice coat of paint. There is no paint that will give you a better or more lasting coat than Lincoln's Climatic. It has been tested for each climate, and only paint suited to the individual climate will be sold there. There is a wider difference in paint than in any other commodity. You can buy cheaper paints than Lincoln's Climatic, but when it comes to amount of surface covered and the lasting qualities, it can't be excelled. Let us give you an estimate on your paint bill.

Reporter.

Mrs. S. L. Adamson was called
to Amarillo the past week to be
with her daughter, Mrs. George
Tomberlin, who underwent an
operation for appendicitis. We
are glad to hear that she is do-
ing well.

FOR SALE—A 24 Mitchell
wagon, bread tires, low wheels
1 good heavy set of wagon har-
ness. See I. B. Parrott, or call
J. R. Ayers farm, phone 4 L28

F. M. Osborn has our thanks
for subscription renewal a few
days ago.

Frank M. Clark was here the
first of the week from Plainview,
where they now reside. Frank
showed his hogs at the Randall
County Fair in Canyon the other
day, and came near taking all
the money, as follows: 1st litter,
1st, 2nd and 3rd junior gilts,
junior champion sow, grand
champion sow, 1st produce sow,
1st get of sire, and 1st young
herd.
