## MISS LOIS VIRGINIA SIMMONS WED TO MR. TED RHODUS

Miss Lois Virginia Simmons, daughter of Mr. and Mrs. Frank Simmons, was married to Mr. Ted Rhodus of Kansas City, on Monday, July 18, at ten o'clock, in the Church of Christ. The ring ceremony was read by the Rev. Clyde Riley of Wellington. The church altar was lovely in its decorations. Baskets of roses, mingling with ferns, formed a pretty background for the bridal group. Preceding the ceremony, Mrs. Charles Dean Jr. of Clarendon played "To a Wild Rose" by McDowell. As the pre-nuptial, Mrs. Alva Simmons, sister in law of the bride, sang "Oh Promise Me" by Clement Scott, which was followed by Mrs. Dean playing the Bridal Chorus from Lohengrin as the processional.

The bride, who was given in marriage by her father, wore a gown of white chiffon and lace over satin, and carried a shower bouquet of white roses and lilies of the valley. Her silk madeline veil was held in place by a lace crown and caught with orange blossoms.

Miss Lorraine Simmons, cousin of the bride, acted as the maid of honor. She wore a pink flowered georgette frock, with pink hat, and carried a bouquet of pink rosebuds. The lovely flower girl, Vivian Adamson, niece of the bride, was dressed in white georgette, and carried a basket from which she dropped rose petals. Walter Hammon Jr. of Ft. Worth, nephew of the bride, carried the ring in a large white rose. He wore a white linen suit.

Mr. Homer Simmons, brother

of the bride, acted as best man.

Mrs. Rhodus is the youngest daughter of Mr. and Mrs. Frank Simmons, and has grown to young womanhood here. She is a graduate of a business college of Wichita, Kansas, and at the time of her marriage was employed by a law firm in Kansas City. During the several years in which she has made her home in Hedley, she has been very popular. The charm of her personality has attracted many friends.

The groom is associated in a responsible capacity with the Decimo Co in Kansas City.

Following the wedding dinner was given by the bride's parents at their home for the wedding party and members of the bride's family. Following the dinner an informal reception was held. The wedding cake rested on the dining table, and was cut and served by the bride. Mrs. Hammon presided at the punch bowl. About forty guests attended.

Out of town guests included Mrs. Lyman McHan of Dallas, Mrs. Walter Hammon and son of Ft. Worth, Mr. and Mrs. Thornton Garrett of Kansas City, and Rev. Clyde Riley of Wellington.

Mr. and Mrs. Rhodus left immediately after the reception for a motor trip through Colorado, and on their return will live in Kansas City, Mo.

Dickie's best Work Clothes, union made and guaranteed, at Clarke's.

T. B. Lumpkin, prominent citizen of Clarendon for the past twenty five years, died Thursday of last week at his home in that city. His widow, one daughter and one son survive.

## IS A HEALTHIER STRONGER GIRL

Because She Took Lydia E. Pinkham's Vegetable Compound

The fertile valleys of Oregon help to supply the tables of America. This is possible through the magic of the humble tin can. In one of the canning establishments, Julia Schmidt was employed. It was complicated work because she did sealing and other parts of the work. It was strenuous work and she was not a strong girl. Often she forced herself to work when she was hardly able to sit at her machine. At times she would have to stay at home for she was so weak she could hardly walk. For five years she was in this weakened condition.

She tried various medicines. At last a friend of hers spoke of Lydia E. Pinkham's Vegetable Compound and she gave it a trial. "Everyone says I am a healthier and stronger girl," she writes. "I am recommending the Vegetable Compound to all my friends who tell me how they suffer and I am willing to answer letters from women asking about it." Julia Schmidt's address is 112 Willow St., Silverton, Oregon.

Girls who work in factories know just how Miss Schmidt felt. Perhaps they, too, will find better health by taking the Vegetable Compound.

**FRECKLES** can be removed. For real satisfaction use Dr. C. H. Berry Co's Freckle Ointment. It does the work. Ask your dealer or by mail prepaid. \$1.25 and 65c. **BEAUTY BOOKLET FREE** DR. C. H. BERRY CO. CHICAGO

### "Wild Boy" Beyond Reach of Science

The recent discoveries of children supposed to have lived their lives among animals, and who consequently developed animal habits, add interest to the "Peter the Wild Boy" exhibit at Berkhamstead School museum, although there is no reason to suppose Peter was a wolf-child.

Peter was found in 1725 in the woods near Hamelin, in Hanover, where he had subsisted on the bark of trees, leaves, and berries for an unknown period. When found he was apparently about twelve years old.

A year later he was brought to England, but even under skillful tuition he was incapable of receiving any instruction and never developed the faculty of speech.

He died in 1785, at Aster's End farm at North Cross, where he lived since his arrival in England, and on a brass plate in the church is a sketch of his head drawn from an engraving by Bartolozzi.—London Tit-Bits.

### New Air Vehicle

An aerial bicycle consisting of a cigar-shaped balloon filled with hydrogen, below which is suspended an aluminum framework resembling a bicycle with handlebars and pedals that will work the propeller, has been invented in England.

Many a would-be jolly good fellow might be really so if he would only stop telling jokes.

### Defining Them

"Pa," asked little Lester Livermore, "what is an optimist?" "An optimist, my son," replied sage Mr. Livermore, "is a man who lends his umbrella."

"And what is a pessimist, pa?" "The same man after he has lent his umbrella."—Kansas City Star.

Publisher

Entered as second class matter October 28, 1910, at the postoffice at Hedley, Texas, under the Act of March 3, 1879.

NOTICE.—Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of The Informer will be gladly corrected upon its being brought to the attention of the publisher.

### MISSIONARY MEETING

The Missionary ladies of the Methodist church are having a social meeting at the church next Monday afternoon at 4 o'clock. All the ladies of the church are invited.

### CITATION BY PUBLICATION

The State of Texas,  
To the Sheriff or Any Constable of Donley County—Greeting:

You are hereby commanded to summon Maud Bone by making publication of this Citation once in each week for four successive weeks previous to the return day hereof in some newspaper published in your county, if there be a newspaper published therein, but if not, then in the nearest county where a newspaper is published, to appear at the next regular term of the District Court of Donley County, to be holden at the court house thereof in Clarendon, Texas, on the third Monday in October, A. D. 1927, the same being the 17th day of October, A. D. 1927, then and there to answer a petition filed in said Court on the 15th day of July, A. D. 1927, in a suit, numbered on the docket of said Court as No 1551, wherein B. A. Bone is plaintiff, and Maud Bone is defendant, said petition alleging that plaintiff and defendant were lawfully married in the State of Oklahoma on December 28th, A. D. 1922, and lived together as husband and wife until June 1, 1923; that on the date last mentioned the defendant, Maud Bone, left this plaintiff with the intention of abandoning him, and that plaintiff and defendant have not lived together since the date last above mentioned, and that in addition to such abandonment the defendant, Maud Bone, has been unfaithful and untrue to the plaintiff, and that such conduct on her part, had she desired to return (which she has not) rendered the further living together of plaintiff and defendant unseemly and unthinkable. Plaintiff further alleges that he is now and has been for more than two (2) years next preceding the filing of this petition an actual, bona fide resident of the county of Donley and State of Texas, and that the place of residence of Maud Bone is to him unknown.

Plaintiff prays for citation and asks that on a final hearing hereof he have a judgment dissolving the bonds of matrimony existing between himself and the defendant and for an absolute divorce from her and for relief, general and special, legal and equitable.

Herein fail not, and have you before said Court, at its aforesaid next regular term, this writ with your return thereon, showing how you have executed the same.

Given under my hand and the seal of said Court, at office in Clarendon, Texas, this the 15th day of July, A. D. 1927.

F. G. White,

[Seal] Clerk District Court,  
Donley County, Texas.

### "HOME-COMING PARTY"

Miss Myrtle Reeves was hostess at a "Home Coming" Party Friday afternoon, honoring her guest, Mrs. Travis Lively of Amarillo, and Miss Lois Simmons of Kansas City, bride elect.

A very pleasant afternoon was spent reminiscing over old times. Memories of many happy incidents of bygone days were renewed, and for the passing moment each guest lived again in his school days. Mesdames E. R. Hooker, Rollie Brumley and Alva Simmons read some delightful musical numbers. Especially pleasing was the song Mrs. Brumley sang favoring the bride elect, "Felice, I Love But Thee."

Miss Reeves has been hostess to home comers a number of times, and it is hoped her hospitality will become an annual custom.

A delicious ice course was served to the following: Mesdames Travis Lively of Amarillo, Walter Hammon of Fort Worth, Thornton Garret of Kansas City, O. B. Stanley of Brownwood, Lyman McHan of Dallas, U. J. Boston of Clarendon, Rollie Brumley of Clarendon, W. A. Breining of Pampa, Miss Lois Simmons of Kansas City; Mesdames E. R. Hooker, Ed Kinslow, Alva Simmons, John Adamson, W. E. Reeves, Frank Simmons, and Miss Myrtle Reeves, Hedley.

### HOME ECONOMICS CLUB

On June 28th the Hedley Home Economics Club met with Mrs. E. R. Hooker. After the house was called to order, a short program was rendered by various members of the Club. The business was attended to, and then Mrs. Milner gave a splendid demonstration on lamp shades. The Club was dismissed and refreshments were served to the eighteen members and two guests present.

On Saturday, July 2, the Home Economics Clubs of Hedley and Giles went on a joint picnicking excursion to the Finch ranch. Each member carried a big basket of fried chicken, everything and a thermos jug of lemonade—and everybody present had a wonderful time.

They met the next week, July 12th, with Mrs. Jewell and the usual program was carried out, with the help of Miss Keys, the county demonstrator, who demonstrated the canning of meats in tin cans.

# John Stark and the Green Mountain Boys

HOUSE WHERE COL. BAUM DIED

MAJOR GENERAL JOHN STARK

BENNINGTON BATTLE MONUMENT

UNITED STATES-VERMONT SESQUICENTENNIAL COMMISSION

BY ELMO SCOTT WATSON

AMONG the many sesquicentennial celebrations which have already been observed or which are yet to take place there is none more interesting than the one which will be held at Bennington, Vermont, on August 16 of this year. It commemorates the victory of Gen. John Stark and his force of patriots over the British troops commanded by Colonel Baum, which had been sent by General Burgoyne to capture the large stores of supplies that had been placed in this little Vermont village. The sesquicentennial celebration of this American victory is of particular interest for more reasons than one. It is a high spot in the history of the Green Mountain state but its historical importance is far greater than that of an event in the history of one state, or of the three states, Vermont, New Hampshire and Massachusetts, all of which have a share in the glory of that victory.

For one thing, Bennington was an important event in the campaign which proved to be the turning point of the American Revolution. The defeat of Baum and the failure to capture the supplies which Burgoyne so sorely needed was the second blow that had been struck at the ambitious plan of this British general to split the colonies, by cutting off "the head" of the rebellion, New England, from the rest. The first blow had been struck ten days earlier when the expedition of Col. Barry St. Leger failed before Ft. Schuyler in western New York. Sesquicentennial celebrations of this part of the campaign—the Battle of Oriskany and the successful defense of Ft. Schuyler—and the one at Bennington are a preliminary to the one which will be held in October at Saratoga where was fought one of the Fifteen Decisive Battles of the World, and where the final downfall of Burgoyne took place. Since Bennington was one of the steps which led to Saratoga, the celebration there this summer has national-wide significance.

In recognition of that fact there was formed some time ago a United States-Vermont sesquicentennial commission of which President Coolidge is a member and this commission, co-operating with the Vermont State Sesquicentennial commission, headed by John Spargo, who is also president of the Vermont Historical society and of the Bennington Battle Monument and Historical association, will have charge of the dual sesquicentennial anniversary: that of the independence of Vermont, and of the Battle of Bennington. In honor of these events the United States government has issued a commemorative half dollar and early in August will issue a commemorative postage stamp.

In addition to these, the local association has issued another medal, designed by Charles Keck, reproductions of which are shown above. Five hundred of these medals in bronze have been struck off and they have already taken a high place among the rarities and are much sought after by numismatists.

On the medal shown above appears Fay's Tavern, which was the headquarters of the Council of Safety at the time of the battle, and there General Stark held his most important councils of war. The victory wreath of laurel surrounding the Tavern bears the names of some of the patriots prominently identified with the battle. Three names are especially notable since they represent the states of New Hampshire, Vermont and Massachusetts. New Hampshire is represented by the name of General Stark since that state had given him the rank of general and placed him in command of its militia. Vermont is represented by Col. Seth Warner, commander of the Vermont forces and said to be the real victor at the battle. The name Allen at the bottom in the center, stands for Parson Allen of Massachusetts. The other names are those of the captains of the local companies of militia and the local victims who perished on the field. On the reverse side of the medal is a Green Mountain Boy with his firelock poised, guarding the Stars and Stripes.

The appearance of the Stars and Stripes on this

medal is of particular importance because it represents some unknown history which has come to light during the preparations for the celebration of this anniversary. As a result of the investigations of John Spargo, whose qualifications as a historian are indicated by the positions which he holds, some of the history of the United States flag may have to be rewritten. According to the popular belief, the first American flag, composed of alternate red and white stripes and a field of blue with white stars upon it, to fly in the face of the enemy, was that which was raised over Ft. Schuyler on August 3, 1777. Historians generally have accepted this fact, even though the evidence was not absolutely conclusive. The researches of Mr. Spargo have developed the fact that the honor claimed for Ft. Schuyler in reality belongs to Bennington.

In an address on "Vermont and the Stars and Stripes in 1777" made before the Vermont Society of the Sons of the American Revolution a short time ago he presented the results of his investigations which demolished the tradition of the raising of a Stars and Stripes flag at Ft. Schuyler, at least, so far as the stars in the blue field are concerned. In the Bennington Battle museum visitors at the celebration this summer will see the flag which was raised by Stark's forces, 150 years ago, which so far as is now known, is the oldest Stars and Stripes flag in existence and which it is believed, as a result of Mr. Spargo's researches, was the first flag of its kind to fly in the face of the enemy and therefore takes that honor from the Ft. Schuyler banner. It is this flag which is shown on the medal reproduced above. This flag is of unique design, the stripes being in the reverse order, that is, the white stripe on top. The stars are seven-pointed and arranged in the form of a Masonic arch.

This Bennington battle flag has a romantic history. It is believed to have been present at the Battle of Saratoga and the surrender of Burgoyne and eventually came into the possession of Nathaniel Fillmore, grandfather of Millard Fillmore, President of the United States, who preserved it and handed it down to his descendants. For many years it was in the possession of members of his family who lived in Illinois, but eventually it was turned over to the Bennington Battle Monument and Historical association. Among the names on the victory wreath shown on the medal is that of Fillmore, which stands for Nathaniel Fillmore, who preserved for posterity this historic relic.

Just as Mr. Spargo, in connection with the plans for the Bennington sesquicentennial, has corrected some of the erroneous ideas about the first Stars and Stripes to be carried into battle. It is appropriate that some popular misconceptions about the battle itself be corrected. In the first place the battle itself was not fought at Bennington in the state of Vermont but at Walltown in the state of New York. Bennington was the headquarters of General Stark and so the battle has come down to us named after that town, even though it was fought six miles away. According to the popular idea the victory was won by "General Stark and his Green Mountain Boys," thus implying that Stark was a Vermonter. He was not. He was a native of Manchester, New Hampshire, and had served with distinction as a colonel at the Battle of Bunker Hill and under Washington at Trenton and Princeton. He had resigned from the Continental army because he had been passed over in the making of promotions and the people of New Hampshire felt that he had been discriminated against because he was a plain man of the people.

When Burgoyne's army captured Ticonderoga in July, 1777, consternation spread throughout Vermont and New Hampshire. Vermont had but a short time previously declared its independence as a state and it was felt that the capture of "Old

Ticonderoga" had laid the new commonwealth open to any punishment which Burgoyne might wish to inflict upon its people. Vermont called upon New Hampshire for assistance in repelling the invaders and urged that such forces as that state could raise be placed under an independent command instead of the regular officers of the Continental army, in whom they had no confidence. New Hampshire raised a force of militia and placed Stark in command with the rank of general. Officers of the Continental army resented this action by New Hampshire and congress on August 19 passed a vote of censure, three days after the victory at Bennington had been won and just a day before the news of the battle reached that august body!

General Stark marched his troops to Manchester, Vermont, on August 7, and was met by General Lincoln with orders from General Schuyler to join him at Stillwater, New York. He was also met by the Vermont Council of Safety which urged him to disobey Schuyler's orders. The state government of New Hampshire upheld Stark and instead of going to Stillwater, he marched to Bennington, planning to strike Burgoyne on his left wing. On August 13, Stark received word of the approach of a force of British and Hessians under Colonel Baum. On the morning of August 14, Stark and his men, accompanied by Colonels Warner, Herrick, Brush and Williams marched out to meet Baum. At the same time he sent messengers to Manchester to summon Warner's regiment of Continentals which had been left there in charge of Lieutenant-Colonel Safford, and to rally the militia. He then set forth to meet the enemy, drew up his forces in battle array and awaited Baum's attack. Baum, however, took up a strong position and halted. So Stark drew back about a mile, and pitched his camp for the night within the present town of Bennington. That night a body of troops, commanded by the redoubtable "fighting parson," the Rev. Thomas Allen of Pittsfield, arrived from Massachusetts. The next morning, although it was raining in torrents and Warner had not yet arrived, Stark decided to attack. For an hour and a half Stark could make little headway against the entrenched enemy but at last about four-thirty in the afternoon, his men gained the crest of the hill and after a half hour of desperate hand-to-hand fighting, the enemy retreated, leaving in the hands of the victors their mortally wounded commander. The house in which Baum died a short time later is still standing.

After the flight of the British, Stark's undisciplined forces scattered over the field collecting the plunder. Suddenly another force of 500 British, commanded by Lieutenant-Colonel Breyman, who had been marching to reinforce Baum, appeared. Stark's men were taken by surprise and fell into line in the greatest disorder. At a critical moment Warner's forces appeared and Breyman was defeated. Stark's army was approximately 2,500 men, composed mostly of militia and volunteers. It outnumbered the enemy. It is true, but that enemy was composed of 1,400 disciplined and well-trained troops, among them the flower of the British army and their allies, the Hessians. In one day Stark's men fought two stubborn engagements with a loss of 30 killed and 40 wounded. The enemy suffered a loss of more than 200 killed, 700 prisoners, 4 cannon and 900 muskets, swords and pistols. The victory at Bennington did more than strike a blow at Burgoyne's plans. More important was the fact that it raised the morale of the patriots after a long, unbroken chain of discouraging events. The bells of Boston pealed forth in rejoicing when the news became known. The congress, which on August 19 had passed the resolution of censure, on October 4 voted its thanks to Stark and his men and made him a brigadier general in the United States army.

## THE KITCHEN CABINET

(© 1927, Western Newspaper Union.)

"The best aristocracy of which any man can boast is a long line of healthy, honest and industrious ancestors. He who prides himself upon his ancestry is like potatoes—all that is good of him is under ground."

### SUMMER MEATS

The perishable meats supply us a variety for summer which are enough to keep us from monotony. Sweetbreads, tongues, liver, brains, are all good foods when nicely cooked and served. Some people enjoy kidneys; even these may be so cooked and dressed that the uninitiated may dare to try them.

**Sheep's Kidneys en Brochette.**—Take six sheep's kidneys, cut through the center, remove the white veins and fat. Wash well, cover with boiling water and let stand five minutes, then drain and dry. Cut bacon into slices half the size of the kidneys, place on a skewer a piece of kidney and a piece of bacon, two pieces of kidney to each skewer. Place on a broiler, baste while cooking and serve when cooked five minutes.

**Smoked Beef Tongue.**—Wash and soak the tongue overnight. In the morning put on to cook in a kettleful of water, simmer gently for four hours or until perfectly tender. Add more water if needed. Let stand until cold, remove the skin from the tongue and serve sliced and garnished with parsley or serve sliced, heated in any well-seasoned sauce.

**Beef's Heart Stuffed With Veal.**—Soak the heart three hours in cold water to cover, remove the arteries and all tissue. Take one pound of uncooked veal chopped fine, one-fourth pound of salt pork also chopped fine, four tablespoonfuls of bread crumbs, a tablespoonful of onion juice, one teaspoonful of salt, one-fourth teaspoonful of pepper, one egg slightly beaten, a few mushrooms cooked five minutes in butter. Mix all these ingredients and stuff the heart. Wrap in a cloth and sew it. Stand in a small saucpan with the point down, cover with boiling water and just simmer for three hours, then remove the cloth and place in a baking pan in the oven for an hour, basting every ten minutes with sweet fat. Serve with a brown sauce either hot or cold.

**Potted Chicken.**—Take the meat from cold roast chicken, rejecting skin and sinews, chop fine and to every pint allow a half-cupful of chopped tongue or ham. Put the bones in a saucpan and cover with a pint of cold water, cook to less than a cupful. Strain and remove the fat. Pound the chicken to a paste with the tongue or ham, adding a little of the liquor to moisten, season with salt, pepper and melted butter. Put into glass and cover with melted butter. Cover with a paper moistened with the white of egg and keep in a cool dry place.

### Hints on Flavor.

Flavor is a subtle, alluring thing, and yet it is of utmost importance in cookery, as food must please the palate to give pleasure as well as nourishment. Flavor is that something which distinguishes really artistic home cookery from the nondescript boarding house variety, and it is what makes French cookery seem so very unusual and delicious to the average American who goes abroad.

The simplest of seasonings is salt, but to salt food properly is an art. Food too salty is flat and tasteless. The same thing is true of the peppers we use in seasoning; too much is annoying; just enough enhances the flavor.

The European cook not only uses onion and leeks freely, but knows how to use them in that suggestive manner with skill and delicacy that shows her artistry. A clove of garlic rubbed on the inside of the salad bowl will give that touch of flavor, and this is not considered by her too much trouble.

Spices and condiments are used by the Europeans with a great finesse, thereby gaining piquant flavors, so blended, that no one can be distinguished.

It is more a matter of taking infinite pains with cookery that produces these tasty foods than an extravagant expenditure of money for rare foods and flavors.

The careful cooking of meats, closely covered to hold in all the flavor, the cooking down to make the delicious brown sauce with which to serve it—all small details—but so important in food and flavor.

Puddings, custards, sauces, cakes and baked apples will all have a more mellow flavor if made with sugar that has been caramelized. Place the desired amount in a heavy saucpan or iron frying pan and stir over the heat until the sugar is melted and of the color of maple syrup. It is well to remember that caramelized sugar is less sweet, so some sugar should be used with it or more of the caramel used.

Nellie Maxwell

## FAMOUS MINING STRIKES

By THOMAS E. STEWARD

### San Luis Potosi in Bolivia

STORIES of such treasure strikes as those of the Comstock Lode and Goldfield, Nev., are events of but yesterday in the history of mining in the new world. As a matter of fact one of the richest mining strikes ever made in the western hemisphere took place before the founding of Plymouth Bay colony in Massachusetts by the Pilgrims in the year 1620.

Spain was not slow about seeking out the treasure houses of South America after the discoveries by Columbus showed them the way to a new world in which, they supposed, there was an endless treasure of gold and precious stones. The mountain heights, thin atmosphere and blasting winds of the upper Andes, where what is now called the republic of Bolivia lies, were no more left unexplored than were the hot and easily accessible coastal plains.

Historians of South America tell how in the Sixteenth century the Spanish mine a tremendous find of treasure in Bolivia, then part of Peru, and called the mine San Luis Potosi. This is a name that recurs at several places in Latin-America, but no other "Potosi" has been as great as that at San Luis in Bolivia. "Potosi" is a Spanish word meaning a sudden and unexpected endowment of wealth, the same thing that English or Americans would call a "bonanza."

And Potosi was the right word to describe the treasures of Bolivia.

Early accounts describe San Luis Potosi as a typical mining community. There was an exceptionally dazzling "fast life" in the place, as the isolation and hardships of life drove white men living there to seek forgetfulness of their exile and loneliness in dissipation. Whatever were the Sixteenth century equivalents of the western dance halls and drinking bars sprang up in profusion in the Bolivian Andes. Men who made wealth in the mines spent it like water. Yet the provisions of the Spanish government covering ownership of colonial mines were extremely strict, and there can be no doubt that most of it was borne home to Spain in the royal galleons.

It was upon the ships from San Luis and other South American treasure houses that the English privateers, such as Morgan and Sir Francis Drake, preyed in the period of Spain's splendor. And it was in a battle between such men as they and Spain's proudest fleet, the Armada, that Spanish grandeur was destined to start on a downward path, while English sea power began the rise which carried it to its present eminence.

### South African Diamond Strike

IN ABOUT the year 1870 a black herdsman in the Orange Free State of South Africa picked up a handsome yellow stone which he gave to the child of his Dutch employer as a plaything. Eventually it was proved to be a diamond of unusual worth. This is one of three stories told of the early discovery of diamonds in the Orange River country. A trader saw what he felt sure was a remarkable diamond in the hands of a Kaffir medicine man. The fellow had been working some marvelous "cures" with it, according to the stories told by the black folk of the countryside. It was so valuable in his eyes, for that reason, that the trader, for quite another reason, had to pay him many cattle, sheep and sundries, to get possession of the stone. It proved to be the famous "Star of Africa," which was later sold for \$125,000.

Another story tells how a child at a Buitfontein farm picked from the stucco wall of his father's home a diamond of some worth. This is commonly given as the episode that set all the world to paying attention to the tremendous diamond wealth of South Africa.

Working the diamond mines, which are deep shafts of blue earth, containing the diamonds as scattered deposits here and there, became an extremely expensive process, and only companies of large means were able to carry on the work successfully. From this situation arose the famous competition for control of important diggings between Cecil Rhodes, the colossus of South African development, and Barney Barnato. Eventually the Rhodes faction came out on top, but Barnato retained enough interest in the South African fields to become the center of a group of tremendously wealthy and influential men.

In addition to the blue-earth diamond deposits, South Africa has diamonds on alluvial sand beds, which the miners wash and pan, much as placer gold is sought. From time to time, even to this day, tracts of these alluvial diamond lands are opened to the public, and a great rush ensues. Those who wish to file are held back a distance of two miles from the land that is to be opened until the word is given for them to start. Then they race with all speed for the site of their claims. Claims are restricted to tracts 45 feet square, and one person can take up only one claim on the first day. Thereafter, additional claims can be taken. The price of the claims is only nominal, but it is said that less than 2 per cent of those who stake claims ever get any adequate returns from their searching.

# CORNS

**Ends pain at once!**

In one minute pain from corns is ended. Dr. Scholl's Zino-pads do this safely by removing the cause—pressing and rubbing of shoes. They are thin, medicated, antiseptic, healing. At all drug and shoe stores. Cost but a trifle.

**Dr. Scholl's Zino-pads**  
Put one on—the pain is gone!

## WINTERSMITH'S CHILL TONIC

For over 50 years it has been the household remedy for all forms of Malaria Chills and Fever Dengue

It is a Reliable, General Invigorating Tonic.

### Suspicious!

The loyalty of a magician's assistants is frequently put to the test by people who would like to learn his secrets, but the helpers are usually equal to the situation.

George White has been with Thurston ever since the magician started around the world with his show. One day an inquisitive busybody slipped George a cigar and said to him: "How does Thurston make the woman float in the air without any support?" "I don't know," George replied, "but I think there must be some trick about it."

### Swat as Usual

A scientific expert says that fish kill mosquitoes. But who wants to keep a fish in his lap when he's reading on the piazza?—Boston Transcript.

Fresh, sweet, white, dainty clothes for baby, if you use Red Cross Ball Blue. Never streaks or injures them. All good grocers sell it.—Adv.

A successful man forms a plan and sticks to it, working like a gimlet to a point.

## CHILD'S BEST LAXATIVE IS CALIFORNIA FIG SYRUP

MOTHER! Even if cross, feverish, bilious, constipated or full of cold, children love the pleasant taste of "California Fig Syrup." A teaspoonful never fails to clean the liver and bowels. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

## Ugly Pimples

Nature's warning—help nature clear your complexion and paint red roses in your pale, hollow cheeks. Truly wonderful results follow thorough skin cleansing. Take NR—Nature's Remedy—to regulate and strengthen your eliminative organs. Then watch the transformation. Try NR instead of mere laxatives.

Mild, safe, purely vegetable—

**NR TO-NIGHT**  
TOMORROW ALRIGHT

At Druggists—only 25c

## PILES TREATED and a Cure Guaranteed

Any form of Piles (itching, bleeding or protruding) are dangerous if neglected. Every Druggist sells FAZO OINTMENT with the understanding that money will be refunded if it fails to cure. In tubes with pile pipe, 75c; or in tin box, 60c.

## CARBUNCLES Cause DEATH

Balls and carbuncles cause agony, sometimes death. Take no chances with human positions or expensive operations. One application of CARBOLL (a scientific antiseptic) quickly stops pain and draws out core. Get a generous dose from your druggist today and keep it on hand. Money back if not satisfied. Don't accept substitutes—ask for CARBOLL, by name, SPURLOCK-NEAL CO., NASHVILLE, TENN.

# What's the Answer?

Here is a new feature that will provide profitable entertainment for all of our readers. In each issue we will print a series of twenty questions covering such subjects as history, science, geography, literature, arithmetic, religion, sports, economics, famous sayings, natural history and other things. In this issue we start the series with the first twenty questions. Our next issue will carry the answer to these questions and another set of twenty, and so on over a period of several months. Try to answer these questions as they appear in each issue. To do so, to search for the answers that you do not know, will add materially to your store of valuable information. This new, "What's the Answer" department is an educational feature of unusual value. Cut out the questions, keep them until the answers appear in the next issue and then see how near correct your own answers have been. Follow it from issue to issue and you will find it fascinating.

### Questions—No. 1

- 17—Which of the continents has the most regular coast line?
- 18—Who was the first lyric poet of France?
- 19—Who said: "D—n the torpedoes! Go ahead!"?
- 20—What is America's greatest undeveloped resource?

### Accidents That Have Made Big Industries

A piece of cheese tossed by one workman at another during the luncheon hour missed its mark and dropped into the plating bath used in the production of copper disks from which wax phonograph records were stamped. Later the disks from that bath were found to be far superior to the others, and an investigation revealed that the casein in the cheese had done the trick. This disclosed a possible improvement worth thousands of dollars to the manufacturer. Telephone engineers discovered that an alloy of nickel and iron, when produced in the form of a narrow ribbon and wound around the copper core of a submarine cable, would increase the speed of the cable six times. The only trouble was that no one seemed able to find a flux that would weld the ends of the ribbon into a solid piece. One day a workman jokingly said: "Let's try salt." Picking up the shaker from his luncheon pail, he started to sprinkle the salt over the flux, when the cover fell off the shaker and the salt poured over the weld. This started a chemical action that united the ends, and the problem was solved. A scientist in France, while experimenting in his laboratory, inadvertently opened the wrong valve. Before he could rectify his mistake several drops of moisture settled in a glass tube that was part of the apparatus. His elation knew no bounds, for here at last was the end of the long search for liquid oxygen. Again an accident created an industry and gave us an explosive far safer and mightier than dynamite.—Floyd W. Parsons in the Saturday Evening Post.

### Prophecy Fulfilled

There are several lakes or streams in different parts of the world with which are connected strange stories. One is Lake Chrissie, four miles from Ermelo, in the eastern Transvaal. When the Dutch emigrants from the Cape first settled in the Transvaal an old Kaffir medicine man predicted that some day the lake would become dry and then the Boers would lose their independence. This prophecy was fulfilled when the Boers were subjected by the British.

# PARIS SAYS VELVET HANDBAGS; FROCKS OF ALL-OVER LACE

COMES now another thrill into the scheme of summer accessories, both beautiful and fashionable—the velvet hand bag. These chic envelope purses and hand bags, styled of velvet in all-black or in enchanting pastel shades, lend an entrancing note to the midsummer costume.

It was a stroke of genius on the part of an artist-born creator of things lovely, who one day in Paris set the fashion of carrying a black velvet hand bag with the summer blowed

ed for, this almost unprecedented popularity of lace, when we remember that the present-day trend in the fashionable world is frankly toward a more feminine styling than has existed for many a season. So there we have it—lace and the eternal feminine—which is ever and for all time a truism of the mode.

Between many laces, choose the loveliest, this is the complex conroning fashion's followers today. It requires a fine gift of discrimination to be able

A MESSAGE FROM PARIS

frock. And now there is every promise of a hue and clamor for velvet handbags throughout the fashion centers of the world—and the vogue is only at its beginning.

Elegance is the keynote to the velvet bag which has become a part of the summer ensemble. These new envelope purses and hand bags are 100 per cent exquisite even unto the slightest detail of their finely wrought metal finishings. And their linings! To see within one of these soft-shirred bags is like looking into the heart of a flower so dainty is its coloring and all that goes toward achieving an esthetic effect.

The vogue for matching the bag to some detail of the costume and especially to millinery is charmingly interpreted with the veer as the medium. With the sheer midsummer frock there is nothing prettier than the picturesque pastel-colored crin capelines banded with velvet ribbon of the same

to select one from among a galaxy of lace gowns, each of which seems prettier than the other. There are the modish all-black lace transparencies which pose so alluringly over pink silken slips, competing with delicate beige lace frocks, filmy as a fleeting summer cloud, and—glory of lace gowns—those pastel-tinted lace gowns, which have just recently entered the list.

The fashioning of the lace gown is about as varied as are the types of lace from which to choose. A model which is as practical as it is charming, follows the redingote silhouette. The beauty of this version of the lace dress is that it can be worn over any colored slip, being detachable and an entirely separate proposition. See the winsomeness of this style in the picture to the right. Such a garment made of ecru or beige chintilly lace is effective over either a self-colored underfrock or over one of pale pink

TWO PRETTY AFTERNOON FROCKS

color, the velvet hand bag repeating the identical shade.

A combination extremely flattering to the lace or chiffon frock is that of the velvet hand bag matched to the velvet shoulder flower. Other clever accessory sets include a velvet sleeveless jacket with a velvet-banded hat. Recently narrow pastel velvet belts have made their appearance.

The importance of velvet as a summer item is very apparent. According to the prophecy of fashion seers, its present favor is but a prologue to the prominent part which it will play in autumn styles.

The mode is reveling in lace. It is lace for the frock, and lace for the blouse, wraps all of lace, hats of lace, too, and if you please, lace parasols for this summer. It is easily account-

ed for, this almost unprecedented popularity of lace, when we remember that the present-day trend in the fashionable world is frankly toward a more feminine styling than has existed for many a season. So there we have it—lace and the eternal feminine—which is ever and for all time a truism of the mode.

# KEEP AWAY FROM CALOMEL!! IT IS QUICKSILVER—MERCURY

Never take calomel. It is mercury—a dangerous drug. If you are constipated, bilious, sick, headachy, stomach sour, meals don't taste right, hot days make you drowsy and lazy, take Dodson's Liver Tonic. That's all you need.

Calomel salivates. That's why you have to take salts the next day to get it out of your system so it will not eat your bones. You have to stay at home a day to recuperate from the shock it gives you. No wonder Dodson's Liver

Tonic is so popular. All you do is take a spoonful at night. By morning you are cleaned out good, head is clear, you feel as light as a feather; you are not sick, no danger of salivation, and you can eat anything you want. Think of that.

Get the big bottle of Dodson's Liver Tonic from your nearest store. They all have it. Keep it in the house so you will have it handy to take nights before going to bed.

### Preachers' Pay Raised

Every clergyman in Rhodesia is to have his annual allowance raised. The minimum pay is to be \$1,000 a year. This will be for bachelors, while a married man will be allowed \$500 additional for maintenance of his wife and \$150 for each of his children. These innovations were decided upon at the recent diocesan synod held at Salisbury. During the discussion the bishop of southern Rhodesia, who presided, asked: "If these attractive conditions, which I wholeheartedly endorse, come into force, what guarantee have you that all the bachelor clergy in the diocese will not be married by this time next year?" None could answer, but the step was voted.

### Fresh Fruit

"Poor Alice! And her husband used to tell her she was the apple of his eye."

"What's happened?"  
"He's discarded her for a peach."—Boston Transcript.

"O Happy Day" sang the laundress as she hung the snowy wash on the line. It was a "happy day" because she used Red Cross Bull Blue.—Adv.

### Not a Matter of Mind

"There's one time when a man's brains don't count."  
"When is that?"  
"When he's punching an adding machine."—Good Hardware.

Inset on having Dr. Peery's "Dead Shot" for Worms or Tapeworm and the druggist will get it for you. 372 Pearl St., N. Y. Adv.

Money isn't everything, but it reduces earthly fears one-half.

### No Mating for Her

Nanette—Has Tom a nest ready?  
Annette—Yes, he thinks I'm cuckoo enough to marry him.

Chance is a word void of sense; nothing can exist without a cause.—Voltaire.

**BABIES LOVE MRS. WINSLOW'S SYRUP**  
The infants' and children's regulator. Pleasant to give—pleasant to take. Guaranteed purely vegetable—absolutely harmless. It quickly cures colic, diarrhoea, flatulency and other like disorders. The open published formula appears on every label.  
At All Druggists

W. N. U., DALLAS, NO. 28-1927.

### Colors by Wireless

Pictures in three or more colors can now be transmitted by wireless and reproduced with delicate shading. Engineers have been experimenting for a year on colored telephotos on the same principle as black and white photos. Separate transmitters are necessary for each color.

DR. W. B. CALDWELL AT THE AGE OF 83

To Dr. W. B. Caldwell, of Monticello, Ill., a practicing physician for 47 years, it seemed cruel that so many constipated men, women, children, and particularly old folks, had to be kept constantly "stirred up" and half sick by taking cathartic pills, tablets, salts, calomel and nasty oils.

While he knew that constipation was the cause of nearly all headaches, biliousness, indigestion and stomach misery, he did not believe that a sickening "purge" or "physic" was necessary.

In Dr. Caldwell's Syrup Pepsin he discovered a laxative which helps to establish natural bowel "regularity" even for those chronically constipated. Dr. Caldwell's Syrup Pepsin not only causes a gentle, easy bowel movement

# Constipation! How to Keep Bowels Regular

## Dr. Caldwell's SYRUP PEPSIN

but, best of all, it never gripes, sickens, or upsets the system. Besides, it is absolutely harmless, and so pleasant that even a cross, feverish, bilious, sick child gladly takes it.

Buy a large 60-cent bottle at any store that sells medicine or write "Syrup Pepsin," Monticello, Illinois, for a FREE SAMPLE BOTTLE and just see for yourself.

No hope! He's gone!

"Flyosan ALWAYS kills," says Doc Fly

DON'T kill flies and mosquitoes one at a time.

Flyosan—the first and only effective fly and mosquito spray (non-poisonous)—kills all the flies and mosquitoes in your house in only a few minutes.

But use Flyosan itself. Don't take chances with inferior imitations. Rid your home quickly, thoroughly, not only of flying pests but also of the filthy, deadly germs which each one carries.

"Swatting" only scatters these

Peterman's has the right insecticide for each insect. On sale wherever drugs are sold.

millions of disease-bearing germs.

Here is the right insecticide for each insect:

FLYOSAN, Liquid Spray—kills flies and mosquitoes.

PETERMAN'S ANT FOOD—exterminates ants.

PETERMAN'S DISCOVERY, Liquid—exterminates bedbugs.

PETERMAN'S ROACH FOOD—exterminates that cockroach army.

PETERMAN'S MOTH FOOD—protects against moths.

You must have a specific insecticide for each insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We know that is true.

Peterman's

## STORY FROM THE START

Garth Guthrie, Canadian war veteran, having to live in the open on account of weakened lungs, is factor of a Hudson's Bay post at Elkwan. He came back from the conflict with a permanently scarred face, which he realizes cost him the love of his fiancée, Edith Falconer. Sir Charles Guthrie, his brother, is a millionaire war profiteer.

## CHAPTER I—Continued

In the autumn Garth had been sent north with Etienne Savanne, a veteran servant of the company, to winter at the fur post at the mouth of the Elkwan. When the Christmas mail from Albany was sighted on the white river trail, the mingled feelings with which Guthrie watched the approach of the dog-team bringing word from home—from her—were the cause of puzzled self-analysis through the months to follow. In July when he sailed into Fort Albany in his York boat with his fur packs, his year on the silent west coast was up. The mail he found waiting his arrival brought the news that he was now brother of Sir Charles Guthrie; announced the decision of Ethel and Clara for an August wedding on the return of the exile; dwelt at length on the rise in Guthrie's steel; and disposed of his health in the casual surmise that it had been fully restored by the year in the open.

The last had drawn a bitter smile from the man who read. Pages for the personal affairs of the writers, and a line for the lungs he had brought back from the Hun drive for the Channel ports. So they were waiting in Montreal, were they, for his return, to bend him to their petty ways—shape him into a business machine, like Charlie—when he had breathed the stinging air off the ice-fields of the bay; seen the caribou drift across nameless lakes at dawn; camped under a canopy of stars while the aurora blazoned the north; wakened to the raucous chorus of the Canadas and watched the "waves" rally their legions in the autumn? How blurred, after this, the once poignant memory of Ethel Falconer was growing! How petty seemed the obsession of Charles Guthrie for money and power to the man who had found in the peace of the west coast an oplate for his doubt and disillusion!

With no attempt at defense of his decision to remain for another year, Guthrie wrote home, and without regret, had sailed out of the delta of the great Albany with Etienne, bound for Elkwan.

The man who had lain beside his sleeping dog with his thoughts while the wind roared through the aids, hammering the anchored tent, and the rain beat its intermittent tattoo, sat up, and placing the candle lantern at his elbow, drew a letter from his pocket and read:

"Dearest Garth: "I don't know what to say—I'm simply stunned. Either you are still ill—are deceiving us, or take this method to humiliate me before your family and the world in the hope that I shall voluntarily give you up. Of course, if you no longer love me, there is nothing to be said. Do you love me still, Garth dear? So long as you do, I shall wait.

"Devotedly—until you wish it otherwise, ETHEL."

This had been her answer to the burning of his bridges—utter abandonment of her pride, and he had once thought her proud. Nevertheless, each new reading of the letter brought to Elkwan by the fall packet a fortnight before, had quickened the memory of what this girl, vibrant with life and physical charm, had meant to him—this girl whom he had humiliated. Often, standing before her vivid likeness in his quarters, he had gazed at the alluring face, the faultless modeling of neck and shoulders, and marveled at the spell which held him in the north while such loveliness waited his return. She still had power to stir him, but his moods of self-censure and remorse were short-lived. The north had won.

## CHAPTER II

At daylight the challenge of the alre-dale waked the sleeping man. With hair erect on mane and back, the dog squeezed through the lashed tent flap to break into furious barking.

"Shut up, Shot! Etienne's dropped in for breakfast," called Guthrie.

Presently, weighted down with his load of wet geese, a bent figure pushed through the aids accompanied by the leaping alre-dale.

"Good morning, Etienne! You had a bad night of it in the bush?"

The wiry half-breed caked his load on the platform above his head, and grinned. "I mak good camp een de spruce wid beeg fire, an' roast some goose."

With difficulty the men boiled their tea and a kettle of goose; then, to avoid the flying sand, went into the tent to eat.

"We ought to be starting for Elkwan, Etienne. I don't like to leave her too long, sick as she is."

The smart face of Etienne Savanne grew grave as he nodded.

"She nevalre see de snow once more."

"That's why I hate to leave her alone with old Anne. I'd never forgive myself if—" Guthrie paused to stare at the tent wall.

The black eyes of his companion softened. "You ben good man, m'sieu. Dat girl die long ago een de bush."

"Yes, the condensed milk has kept her alive—but she should have gone to the mission at Albany."

The other shook his head; then struck a match and lit his pipe before replying.

"You are new man in dees country. You don't know Injun squaw. At Albanee—widout you—she not be happy."

Guthrie reddened under his deep tan. He knew only too well. "But they would have taken better care of her," he protested.

Etienne slowly shook his head. "Too late, m'sieu. She live more long here dan at Albanee."

All day while the norther flayed the west coast, Guthrie and Etienne dressed and salted geese. Deep in the winter, when the caribou had drifted back from the coast, the geese, freed

Sailed Out of the Delta of the Great Albany.

from the salt by boiling, would be a welcome change from the fat bacon of the company's stores. The wind held into the night, but when the men turned out of their blankets at sunrise the blow was over.

At noon the goose hunters lunched the canoe and driving her through a quarter sea, pushed down the coast for the shelter of Akimiski Island. They were rounding the low headland of Elkwan point when Garth, slaving in the bow, was aroused by an exclamation from the stern man.

"Look! A boat!" Etienne pointed his dripping paddle across the yellow strait to the shore of the island.

"Shipwrecked—somewhere! Dey use de oar."

In the distance, crossing to the mainland, Guthrie made out a boat.

"Dey wave to us!" cried Etienne. "Dey see de canoe!"

From the craft, still miles away, showed a flutter of white.

"We'll come up with them on the lee side of the point," and Guthrie, whose thoughts were at Elkwan, whose arms were driven by fear—fear that in his absence tragedy had had its grim way, lunged viciously with his paddle.

In the quiet waters beyond Elkwan point, the two boats approached within halting distance. In the ship's dory four men were rowing, while two figures sat in the stern. The crew of the boat rested on their oars.

"Hello, canoe!" Guthrie answered the hail, and shortly the Peterboro came up with the larger craft. "You've lost your ship?" he began.

The black-bearded figure in the stern of the boat, ignoring the question, demanded: "You're Hudson's Bay people?"

"Yes, we're bound to the Elkwan just below here. You've lost your ship? Where did you leave her?"

that blow," said the surprised Guthrie. "Your boat must have got a pounding on those flats."

"It did, but we struck at high tide and managed to get most of our stuff off her. Then, this morning, we fell into the hands of a pirate."

"Pirate!" Guthrie exclaimed.

"Oh, Archie," protested the girl, "that's hardly fair. He paid for what he took, and helped with the last of the stores."

"Who were they—where from?"

"They were in a little sixty-foot power schooner, the Ghost, St. Johns, and the leader was a red-headed ruffian with a mutilated face—horrible!"

The black eyes of Etienne Savanne snapped as they met the backward glance of his chief. "McDonald, Ha! Ha!" said the half-breed with a grin that mapped his swart face with lines.

"What?"

"Yes," nodded Guthrie. "Your pirate was undoubtedly the famous Laughing McDonald. The Indians call him 'McDonald Ha! Ha!' because of the grin—from that scar."

As he spoke, Guthrie was aware that the grave eyes of the girl were curiously studying him—the second man with a scarred face she had met since her shipwreck on the west coast. Instinctively he got the impression that those sober eyes had themselves looked on suffering—tragedy. The blood rose to his forehead as he went on: "They think he's sort of a super-man—the Indians. He's hypnotized them; but, and he met the girl's straight look, 'you say he treated you fairly?'"

"I think he did," she said, and, as she tucked the loose lock of chestnut under her cap, while the color showed faintly at her temples, he wondered if she had read his thoughts.

"Treated us fairly," exploded the bearded man. "Well, I call that—"

"How many men were with him?" roughly interrupted Guthrie.

"Four. There was an Eskimo, too."

"One a big bearded chap?"

"Yes! The others I took to be sailors."

Guthrie nodded to Savanne. "That's the Newfoundland whaler who brought him into the bay last year," he said; then continued to the stranger. "You had the honor, sir, to meet the man who has stampeded the fur trade from Whale river to Fort Churchill. He took fifty thousand dollars' worth of fox out of the bay last year."

"Hum! Why didn't you drive him out—arrest him?"

Guthrie laughed. "Arrest him for what? He has as much right here as we. Then, you know, there are not many who would relish the job."

"Relish the job! Bah! I thought you fur men were—"

The speaker was interrupted by a voice suddenly grown hard with impatience. "It's getting late. My name is Guthrie—is this my assistant, Etienne Savanne. You'd better step that mast. You'll need the sail or you won't make Elkwan before dark."

"I'm Dr. Archibald Quarrier, sir, geologist. We've been prospecting for iron and copper on the east coast," snapped the other, visibly annoyed.

"This is my sister, Miss Joan Quarrier. How far did you say we were from Albany?"

Guthrie smiled into the amused eyes of the girl, who seemed to enjoy the discomfiture of her brother.

"You're ninety miles from Albany. Your boat can't be beached like a canoe. It would depend on the wind." Then, as he glanced at the sun, dread of what he might find at Elkwan led Guthrie to finish abruptly: "Follow me into the river mouth. Our accommodations are limited, but you are welcome." And delivered of this lie, with a sweep of his paddle, he separated the boats.

"How about my stuff over on the island; it's very valuable!" called Quarrier after the retreating canoe.

"You can send men for that and bring it to Albany?"

But the paddles of the now fast-moving Peterboro lunged and swung in unison, the question ignored.

Beyond the river valley the musk was smothering a sun veiled in haze when the Peterboro approached the log landing below the huddle of buildings on the high shore, which was Elkwan. The problem of caring for the guests which the storm had brought Guthrie had been swiftly crowded from his thoughts by solitude for those he had left at the post, a week before, when the necessity for beginning the hunt of their winter supply of geese had compelled his absence. He was overdue, and Anne was old and ignorant. He would never forgive himself—never cease to be haunted by the eyes of the doomed girl he had left in the care of the Cree women. If—But no! It was unthinkable—too hideously tragic that it should have come to her, alone with old Anne. Fear of the thing had depressed him on his summer trip to Albany—had harassed him through the last two days, a prisoner to the wind. The ache of his own loneliness through the first weeks at the sanatorium had lent him deeper understanding of the frightened look in the eyes of the girl whenever of necessity he had left her, even for a few hours, in the care of old Anne. But always he had returned to find her, and the joy in her wistful face had been fit recompense for his haste to turn back—to keep his word to a wife of a half-breed, that he would be with her at the end.

Guthrie leaped up the cliff trail to his quarters. Opening the door, he announced his coming in a voice that belled his fear.

"Back again! How's all my family?"

A squat Indian woman shuffled into the living room, her wide mouth splitting a swarthy face in a grin of delight.

"Allo! We glad you come!" Guthrie expelled a deep breath of relief. A voice from an adjacent room called faintly:

"Nia! nia! You come back! It es long tam!"

"Yes, Ninda." He bent over the cot where lay the wreath of a girl in whose face thin to emaciation, great dark eyes glowed feverishly as she smiled up to him in her joy.

Guthrie drew a chair to the bedside and took in his the hot hand which lay on the coverlet. The fever was worse.

"It was the storm, Ninda—the wind. We could not travel."

The blue-black hair, heaped in braids on the pillow, accentuated the pallor of the dusky skin, shot over the high cheek bones with the flush of fever. She had failed rapidly since he left, but in her hour of extremity she would not be alone.

"You go—no more?" she whispered searching his bronzed face.

He shook his head. No more, Ninda. Anne came in with some hot condensed milk. The girl sipped a little, then smiled at the pitying face of the man with its scar furrowing the right cheek.

"You here all tam now, Ninda sleep." With a sigh her eyes closed. As Guthrie left the room, he looked back on the pinched oval of her face bowed a smile.

"Where the boat, Etienne?" he asked, huskily, entering the trade-house, which stood in the clearing outside the dog stockade.

"She come slow along the shore—not far now."

Guthrie went down to the landing to meet his guests. The lack of space at his quarters—at first thought embarrassing—was now a source of satisfaction, for there would be room for Miss Quarrier, only. Her pompous brother and the rest would sleep in the trade-house. He would take Quarrier in to meals and the others could eat with Etienne.

"You can send men for that and bring it to Albany?"

And then, there was Ninda.

(TO BE CONTINUED.)

## Glory Long Departed From Ancient Karnak

Karnak is a village in upper Egypt with a population of about 15,000. The village has given its name to the northern half of the ruins of Thebes on the east bank of the Nile, the southern part being known as Luxor. The Karnak ruins comprise three great enclosures built of crude brick. The most northern and smallest of these contained a temple of the god Mont, built by Amenophis III, and restored by Ramesses II and the Ptolemies. Except a well-preserved gateway, little more than the plan of the foundation can be traced. The southern enclosure contained a temple of the goddess Mut, and is almost as ruinous as the east, but on a much larger scale. The third or central enclosure is of vast dimensions, forming approximately a square of 1,500 feet; and it contains the greatest of all known temples, the Karnak temple of Ammon. Thebes became the royal residence, and Ammon of Karnak was the great god of the state. Different kings added to the temple of Karnak

and to Thebes. Alexander the Great of the Grecian conqueror of the East, restored a chamber in the festival hall. The walls of the buildings throughout, as usual in Egyptian temples, are covered with scenes and inscriptions, and many record the annals of kings and of battles and campaigns.

## Wasps That Eat Metal

An insect known as the steel wood wasp can do considerable damage to lead.

A piece of pine wood infested with larvae of this wasp had been used as a core on which to roll some sheet lead. When, on reaching maturity, they attempted to escape, they cut through the lead instead of traveling lengthwise through the wood.

Each sheet of metal was one-tenth of an inch thick, and the insects penetrated 15 thicknesses of lead before escaping.

The man with a grievance is a grievance to others.

## TRY THIS

By EDNA PURDY WALSH

## Using Old Phonograph Records

OLD or cracked phonograph records become quite numerous in a family of children. One of the ways of using them to advantage after they are cracked or too worn to play, is to keep one on the ironing board to keep the iron polished. It is handier and quicker than a piece of beeswax that is too small.

There are other uses of old records which enable the children to learn the properties of wax and to construct things from it. The wax may be melted away from the other ingredients in the records by putting them in

oil of turpentine, or by heating in boiling water. The other ingredients form a residue, leaving the wax on top. The wax can then be used for modeling various animals and toys. It can be used for waxing floors and furniture by adding turpentine to the desired consistency.

Articles that are exposed such as floors and doors will not warp or crack under the heat of sun or radiator if they are frequently treated with wax. A good floor wax is composed of two parts of wax and three parts of Venice turpentine.

## An Inexpensive Favor

COMBINING the practical with the novel and beautiful, the hostess may surprise her feminine guests with this bouquet made of the small articles every woman needs.

The small paper dillies used for ice cream service are made the base of the bouquet. The rest of the items may be purchased at the local variety stores. Spread next to the paper are ten artificial leaves with their wire stems running through the center of the paper to form the bouquet holder. A deep rose ruffle of crepe paper is next sewed to the leaves. A spool of thread is wound in a lighter shade of

rose paper. A thimble is also covered in this shade. A paper of hooks and eyes is rolled into a pale green shade of crepe paper cut like a poinsettia. Lingerie tape, black pins, a rolled package of needles and a few colors of embroidery floss are likewise partially covered with pale rose-colored crepe paper.

At first glance the favor looks like a bunch of small flowers.

(© 1917, Western Newspaper Union.)

## More Than One Way

Mrs. C. R. N. writes: "Our neighbor's little boy was visiting us and he spotted a candy box on the table, but I was busy at the time and overlooked offering him some. Finally, glancing at the coveted sweets, he remarked: 'My mother don't let me ask for anything, so you will have to offer me anything you want me to have.' He got the candy."—Boston Transcript.

## Truth About Diogenes

The author of "Mistakes We Make" refutes the story that Diogenes lived in a tub, and says it "had no better origin than a comment by his biographer, Seneca, who was not born till more than three hundred years after the cynic's death.—A man so crabbed ought to have lived in a tub like a dog."

## Druggists' Mortar Old

The druggists' mortar, which has come down to modern generations almost unchanged in shape, can be traced back to prehistoric times. The mortar in its present shape was several centuries before medicine was known as an art, and was used to crush bodies. It was used by savages as well as civilized peoples.

# POULTRY

## CULLING CHICKENS AIDS BUILD FLOCK

It seldom pays to raise a weak or crippled chick. One of the secrets of successful poultry culture lies in discarding weaklings as soon as found. Often the owners of chicks are too "chicken-hearted" to kill weak chicks but they should consider that such action is really more humane than nursing sick or crippled ones along, letting them die later after they have consumed a lot of feed and a lot of labor has been spent on them.

Generally speaking, weak chicks are the result of some specific trouble. Often it is a disease such as white diarrhea or coccidiosis. Both these diseases spread through droppings, and leaving weak chicks in the flock invite further spread of disease. If the trouble is caused by some fault in management or feeding, it is usually best to cull out the weak birds and try and correct the fault.

Culling chicks helps to rid a flock of weak vitality. On several occasions we have had letters from our readers telling about white diarrhea in their chicks this year, and later in the letter they mention that they had a little trouble last year. They have saved birds that recovered from the disease, and they have spread the disease to chicks this year through the egg. These diseased chicks have, in turn, spread the disease to their mates with heavy loss.

Good feeding and management must be combined with culling. Even the best chicks cannot make a satisfactory growth if they do not have the proper feed. Culling helps owners who practice proper feeding and management.

## Duck Eggs Incubated in Much Same Way as Hens

Duck eggs are incubated in much the same way as are hen eggs. The temperature of the machine should be kept at 101 to 102 for the first five days, after which it should be kept as near 103 as possible. After the first five days the eggs must be turned and watered daily. A great deal of water is used, many people sprinkling so much on that it runs out of the bottom of the incubator. The period of incubation is 28 days.

A good feed mixture is the following: 200 pounds corn meal, 100 pounds low-grade flour, 100 pounds bran, to which is added 10 per cent of beef scraps. If milk is available, the beef scraps may be reduced. Plenty of sand and green feed should be provided at all times.

## Of Much Importance to Keep Chick Rations Dry

Each year finds an increasing number using a factory-mixed or home-mixed mash in the starting and growing of their chicks. The use of a feeder or mash hopper is a part of this method of feeding. If the feeder is placed outside the house it is very important to see that the top and sides of the feeder are tight. Keeping the mash or starter dry is very important. There is nothing worse for young chicks than sour wet mash. It is frequently a cause of digestive trouble that stunts the growth of a large number of chicks, even if no death loss results.

## Chick Precautions

Do not crowd at any time.

Avoid moldy litter or feed of any kind.

Kill all weak, crippled or deformed chicks.

Get chicks out on the ground as soon as possible.

Feed sparingly, but often, during the first two weeks.

Be sure chicks are not chilled while being transferred to brooder.

Be sure the house and all equipment is thoroughly clean and kept clean.

Do not remove chicks from incubators until they are at least thirty-six hours old.

Remember that crowding means losses with the youngsters. See to it that they have ample room at all times in their brooders or hovers.

Do not feed chicks before they are forty-eight hours old. They will eat, and may appear hungry, but they are better off with no other feed than that provided by nature for at least 48 hours after hatching.

Be sure your brooder stove is regulated before chicks are placed under hover.

New ground is far safer for chicks than ground where poultry has been previously grown.

Plenty of green feed and milk are essential for the natural and normal development of the baby chick.

Don't allow the chicks to become chilled. Keep them growing by feeding wholesome rations.

### The Mystery Brand

Another of his wild and wooly Westerns. Also Good Comedy. 10c 25c.

Rev. Joseph E. Eldridge and family, the J. B. Masterson family, Mr. and Mrs. R. G. Strickland and Miss Harris of Dallas, and O. R. Alexander and family of Amarillo left Monday for a ten days fishing and recreational trip in the New Mexico mountains, around Taos.

Come and see our new Printed Voices and Bats. Adams Dry Goods & Notions.

E. D. Whiteside and family left Wednesday for Amarillo where they will make their home. We regret to see these good people leave Hedley.

STRAYED—One black horse mule, white nose, unbranded. Finder please notify P. H. Crozier.

Mrs. J. A. Pirtle went to Chillicothe Wednesday to visit her mother.

### Field Seeds and Feed

All kinds. Call on me for anything in this line. In back end of Postoffice building. P. H. Crozier.

### HONORING MRS. TRENT

Mmes. J. A. Pirtle, A. T. Simmons, L. E. Thompson and W. H. Moffitt gave one of the most delightful parties of the year at the home of Mrs. Pirtle on last Friday afternoon, honoring Mrs. Trent, who is soon to leave for Claude where she will reside.

During the few years Mrs. Trent has lived in Hedley she has been prominent in our church, school and club life. The high esteem in which she is held was shown by the expressions of appreciation given by Mrs. Vinyard from the P. T. A., of which Mrs. Trent is president; Mrs. Ed Dishman from the 1919 Study Club, of which she was a loyal member; and Mrs. P. T. Boston from the Baptist Missionary Society, who commended her ever present, prepared and prayerful attitude at their meetings.

Mrs. Thompson rendered a beautiful piano solo, and accompanied Mmes. Moffitt and Simmons when they sang "The End of a Perfect Day," which was very much enjoyed.

The guest book was presented to the honoree with appropriate remarks by Mrs. Pirtle.

A delicious ice course was served to the following: Mmes. Acord, Adams, Adanson, Armstrong, Beaty, Blankenship, Boston, Coffey, Ed Dishman, P. L. Dishman, Goin, Booker, C. L. Johnson, Kendall, King, Kinzey, Reeves, Richey, Scales, Sherman, Trent, Vinyard, Westberry.

Come in and see our new Chiffon Hese at the lowest price in town. Adams Dry Goods & Notions.

Mrs. I. N. Collins and her two daughters, of Claude, visited the Tom Trent family one day the past week.

J. C. Doneghy and his nephew, James Doneghy, were here the past week looking after business interests.

Mrs. R. E. Mann and daughters, Oleta and Roberta, accompanied by Mr. and Mrs. Archie Hallmark of Clarendon, visited Mr. and Mrs. R. D. Kuteh at Childress Sunday.

A letter from our good friend, J. K. Shelton, requests that we send the paper to him for a while at Harlingen, Texas. He is kind enough to say that he misses the Informer when it doesn't show up, and we retaliate by informing him that Hedley folks miss him during his absences. Don't make it too long, J. K.

Don't Play Suits for boys and girls. And the price is right. At Clarke's.

### Another Community Singing Next Sunday

at the Hedley Methodist Church next Sunday night, July 24. Everybody invited. Come and let's have some more good singing. The other singing was well attended and enjoyed by all. So let's have another "Get Together Singing" and have a good time. Bring your song books. Begins at 8:30. Everybody be on time, and we can go home earlier. W. H. Huffman.

### LAUNDRY WORK

I will do fancy laundry work at 50c per dozen. Would appreciate your work. Mrs. M. C. Burgett.

Rev. E. A. Hardee, of Jasper, Mo., was a pleasant visitor at the Informer office Tuesday. He is spending the summer here, at the W. H. DeBord home, in the interest of a throat affliction, which he says is showing much improvement. Bro. Hardee is a great booster for his home town, which is in the edge of the Ozark country. He says Jasper is fast becoming a splendid town, due largely to its live chamber of commerce, diversified farming, and the cooperative spirit between town and country. If his throat continues to improve, Bro. Hardee will accept urgent requests to conduct some revival meetings in this vicinity before returning home.

Men's Dress Pants fit better, look better and wear longer. At Clarke's.

Mrs. Lloyd Acord of Clarendon has been back at her old place in the Security State Bank the past two weeks, during the absence of J. W. Noel and family.

Mr. and Mrs. D. C. Moore of Pampa were here Saturday and spent the night at the home of their daughter, Mrs. H. M. Horschler. Sunday they went to Memphis to attend the funeral of a niece, Mrs. Ora Mae Baker, age 29, who died of heart trouble Saturday morning. Mrs. Baker is survived by five sisters and two brothers.

### WANTED, LAUNDRY WORK

I will do your fancy and plain laundry at 25c per dozen. Your work appreciated very much. Mrs. Deal.

Mr. and Mrs. B. L. Pollard, of Mountain Park, New Mexico, are visiting the lady's parents, Mr. and Mrs. W. J. Luttrell.

Misses Velma and Mollie Newman came in last Saturday from Canyon, where they have been attending the summer session of W. T. S. T. G.

FOUND—One lady's glove, tan colored, extra long cuff. A good glove. Owner call at The Informer office.

H. A. Bridges and family have returned from a recreational trip to Marlin, Texas, and Sulphur, Oklahoma.

E. Mergan and family left one day this week for a visit to relatives and friends in Jack and Wise counties.

Born, to Mr. and Mrs. L. A. Wall, Tuesday, July 19, a fine boy baby.

Mrs. T. R. Moreman and Mrs. O. B. Stanley have gone down to Crowell for a visit with their daughter and sister, Mrs. Cleo Shultz.

Don't forget that good tailoring. At Clarke's.
