THE NEWSPAPER THAT WORKS FOR A BIGGER, BETTER BOVINA

WEDNESDAY, JUNE 15, 1960

BOVINA, TEXAS

VOL. V, NO. 51

WHITTLIN'

BY DOLPH MOTEN

Roy M. Crawford, vo-ag teacher here, is attending summer school at Fightin' Texas Aggie land, down on Brazos River in Southeast Texas.

Temperature there is higher, as a rule, than it is here. However, R. M. was aware of that before he decided to invest six weeks of time gaining more knowledge at that great school.

In writing to us to give information as to where to mail his copy of the Blade, he mentioned said temperature in this manner:

"I had a very good trip 'down here,' and arrived on the campus without incident--none of the bridges were iced over and there was no ice hanging from the trees. They tell me that Saturday the temperature lacked one whole degree reaching the century mark and one day it was only 102."

No doubt, Mr. Crawford will have even better stories to tell about Southwest Texas temperature when he returns. Experience taught us that the longer the summer lasts there, the hotter it gets . . . and the bigger the mosquitoes get.

Having attended more than our share of summer sessions at the great institution, we have a "like yesterday" memory of the mosquito situation, especially. In an effort to keep the insects from eating on us, we have slept in pajamas, socks, gloves, a towel wrapped around our head and liberal doses of repellent all over.

When mosquitoes get that bad, folks, they're bad. And to make that situation even worse there were no city employees like Henry Minter or John Wilson to complain to. Or at least we didn't know to complain to city officials. We thought the mosquito situation was just one of the punishments you had to endure for busting a couple of courses during regular terms.

There's no connection between the above topic and the one which follows.

Simon Martinez, once Bovina's most popular loafer, was seen by this department in a neighboring town to the southwest recently.

Simon was in the post office of that town. He was clean shaven and was wearing clean clothes.

We walked by him and then realizing we had seen or known that fellow before, we looked back and figured out who he was. We spoke to him, and he to us.

To our inquiry about his health, he replied, "Just fine." And from the look in his eyes we judged he was glad to see somebody from Bovina. The words "just fine" were the first we had heard Simon say that we could understand in the some five years we had known him.

Simon, old readers will remember, was the object of a Blade feature story about a year ago.

A picture accompanied that story and since that time a couple of Bovina artists, Mrs. Art Mast and Mrs. Charles Hawkins, have been interested in borrowing the photograph so they could paint a picture of Simon. We're interested in seeing their finished products.

With Darrell Read, star Texas Christian University baseballer, serving as coach, Bovina Lions Club-sponsored Little League program is underway. Wet grounds hampered initial workouts, but the program, after a delayed start, is off the ground now and the little fellows will be in competition with neighboring teams soon.

There's a possibility, Read says, that we can have as many as four teams--one Pee Wee, two Little League, and one Pony League. That many teams will give more boys an opportunity to see competitive action. We hope enough boys are interested to justify this many teams.

Civic organizations, we understand, are still considering erecting a Little League ball park. Seems that the deal hinges on the cost of the project . . . or more important . . . what kind of financing plan will be offered by General Electric. GE is

(Continued on last page)

Baptists Plan Dedication Sunday

BUILDING FOR THE FUTURE--The product of several years of hoping and planning is finally complete. The ultra-modern design of First Baptist Church is exemplified on both outside and inside.

Dr. Neil Record Will Deliver Main Speech

Dedication ceremonies for First Baptist Church's new building will begin Sunday afternoon at 2:30, climaxing several

years of effort by the congregation.

Dr. Neil Record of Tulsa will deliver the dedicatory message. First meeting in the new \$104,687 structure will be held tonight (Wednesday).

Dedication program will consist of congregational singing, reading the church's history, recognizing visitors, former pastors and former members, special music and dedicatory prayer followed by open house.

"I feel sure I speak on behalf of the church in inviting everyone to our dedication services," said Bro. John Ferguson, pastor of the church.

"I would also like to personally express appreciation for all the persons, both members and non-

members, who have had a part in helping us get this building.

"I know that many people who don't belong to our church bought bonds and helped us in many other ways," the pastor said.

The building has a modernistic design with pitched roof, indirect lighting and laminated wood beams on the inside.

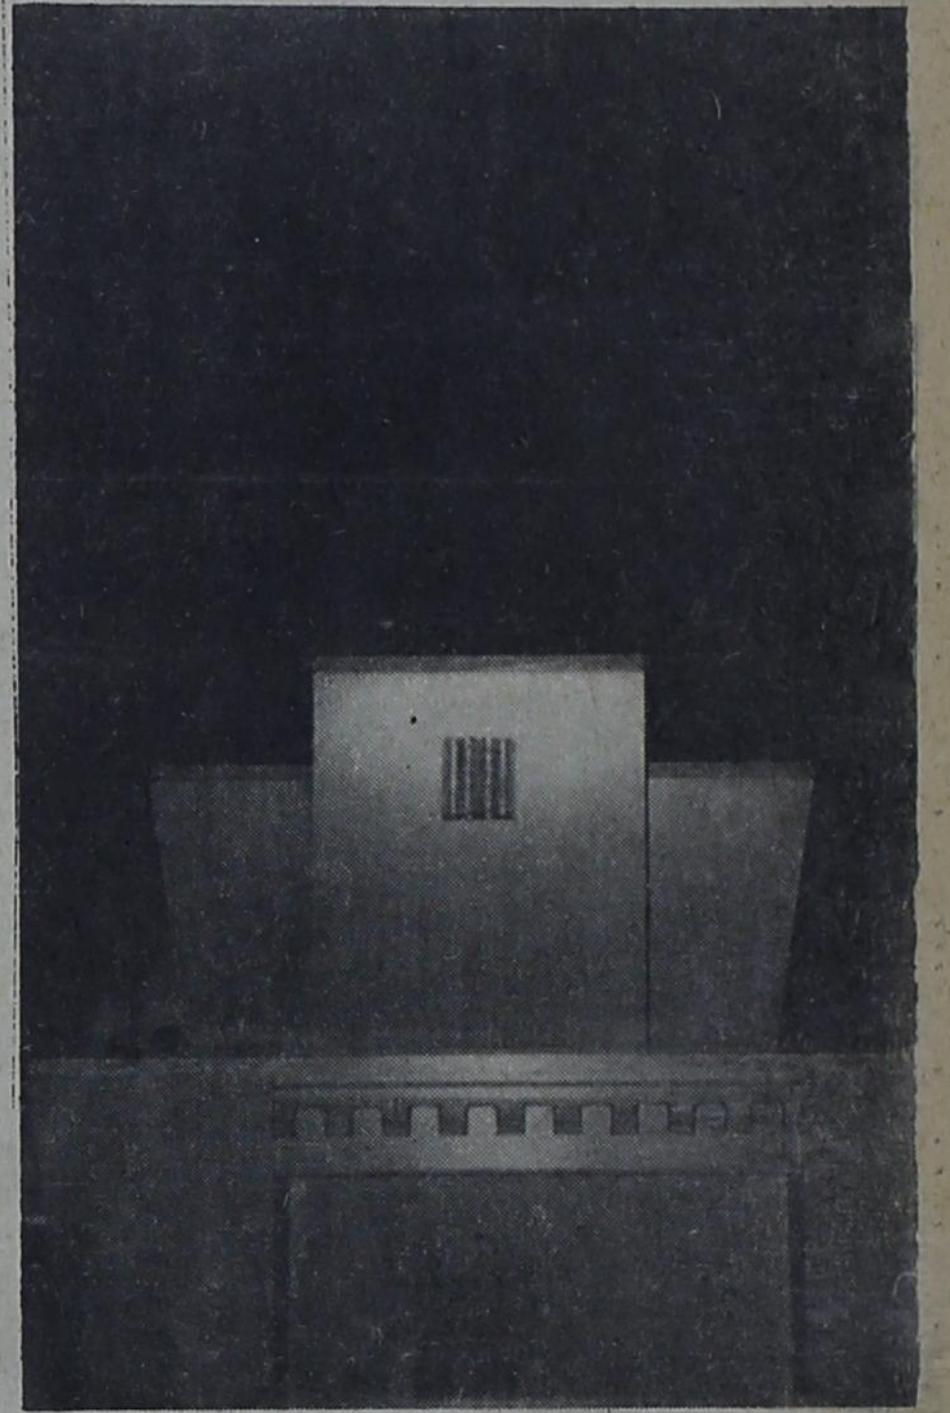

An elaborate system of public address speakers is included in the building, including special plug-ins for persons who have hearing defects.

Air conditioning may not be installed in time for the dedication due to a union strike.

The dedication day will be climaxed Sunday night by baptismal services with some 25 persons expected to be baptized. The Lord's Supper will also be observed.

Receives Degree From TWU

Donna Jean Hobby, daughter of Mr. and Mrs. A. P. Hobby former residents of Bovina, received a B. S. Degree from Texas Woman's University at Denton, Sunday June 5. Attending the ceremonies from Bovina were her sister, Mrs. B.W. Lane and children.

SOON TO BE FILLED--The Pulpit of new First Baptist Church building will be filled for the first time Sunday morning when Rev. John Ferguson will deliver the initial sermon. Behind the rostrum is the choir section and baptistry.

RATE IS LOWEST--

Tax Hike Enevitabile Administrators Feel

Bovina School District is faced with rising costs and decreasing state aid and must eventually alter local tax situation if it is to maintain operational funds.

This point was presented to members of the school equalization board Friday by trustees of Bovina Schools.

Equalization board members are L. M. Grissom, Durwood Bell, Wilbur Charles, Buck Ellison, Connie O'Brien and Johnnie Horn.

Trustees explained that each year the school's budget has increased and that if property additions and improvements do not maintain a pace equal to the budget increases, a hike in the tax rate will be necessary. Superintendent Warren Morton and tax accessor-collector Mrs. Pearl Dodson say that the

current 92 cents per \$100 evaluation is one of the lowest if not the lowest in Texas.

Morton said the administration wishes to maintain the low rate but that it appears a change is inevitable.

The district with a 12,200,000 evaluation, takes in about \$110,000 each year from local taxes. The remainder of the \$210,000 budget is supplied from state funds, which are decreasing each year due to new income figures affecting economic index of this area.

Trustees also discussed the band situation, which must be worked out before school starts this fall.

Earl Hise, who taught band last year on a part-time basis, has resigned and the board is trying to determine if there is enough interest in a band program to hire a full-time teacher.

Pre-registration in high school for next year indicated that only eight school students desire band in their curriculum next fall.

"The board would like to find out citizens feeling on the band question," the superintendent said. "We may have a committee of citizens try to find out how much interest there is in a band program and then to meet with the trustees and report."

"We don't consider it wise to put forth the expense of hiring a full-time teacher and buying new band uniforms without knowing if there is enough interest in a band to justify such actions," Morton concluded. (Continued on last page)

RESORT COUNTRY? -- Mr. and Mrs. Buck Ellison are shown boat riding on a lake on their farm Sunday afternoon. The lake, plenty large enough for pleasure boat riding, was caused by recent heavy rains. It is located three miles west of Bovina on Pleasant Hill FM Road.

NORTH OF TOWN--

Crop Hit Hard By Cloudburst

Turbulent black clouds dropped a cloudburst of almost four

inches of rain, mixed with hail north of Bovina Friday and set off a tornado alert in the city.

Damage to crops and farm land was heavy in areas where the storm directed its worst punch. Some cotton will be plowed up and not replanted because of the effects of hail and washing rains.

Wheat also took a beating from hail but swirling waters, which some farmers said were the highest they have seen in the area, caused the most damage.

Over an inch of rain fell in Bovina and run-off rushed through the city at the end of a week that saw water in some Bovina business establishments more than once.

More than eight inches of rain were gauged in Bovina from Sunday night to Friday of last week.

The tornado warning was turned in by Fire Chief Otho Hammonds and Boye Taylor who drove north of town to view the cloud.

No funnel was sighted and winds weren't too high.

WEATHER

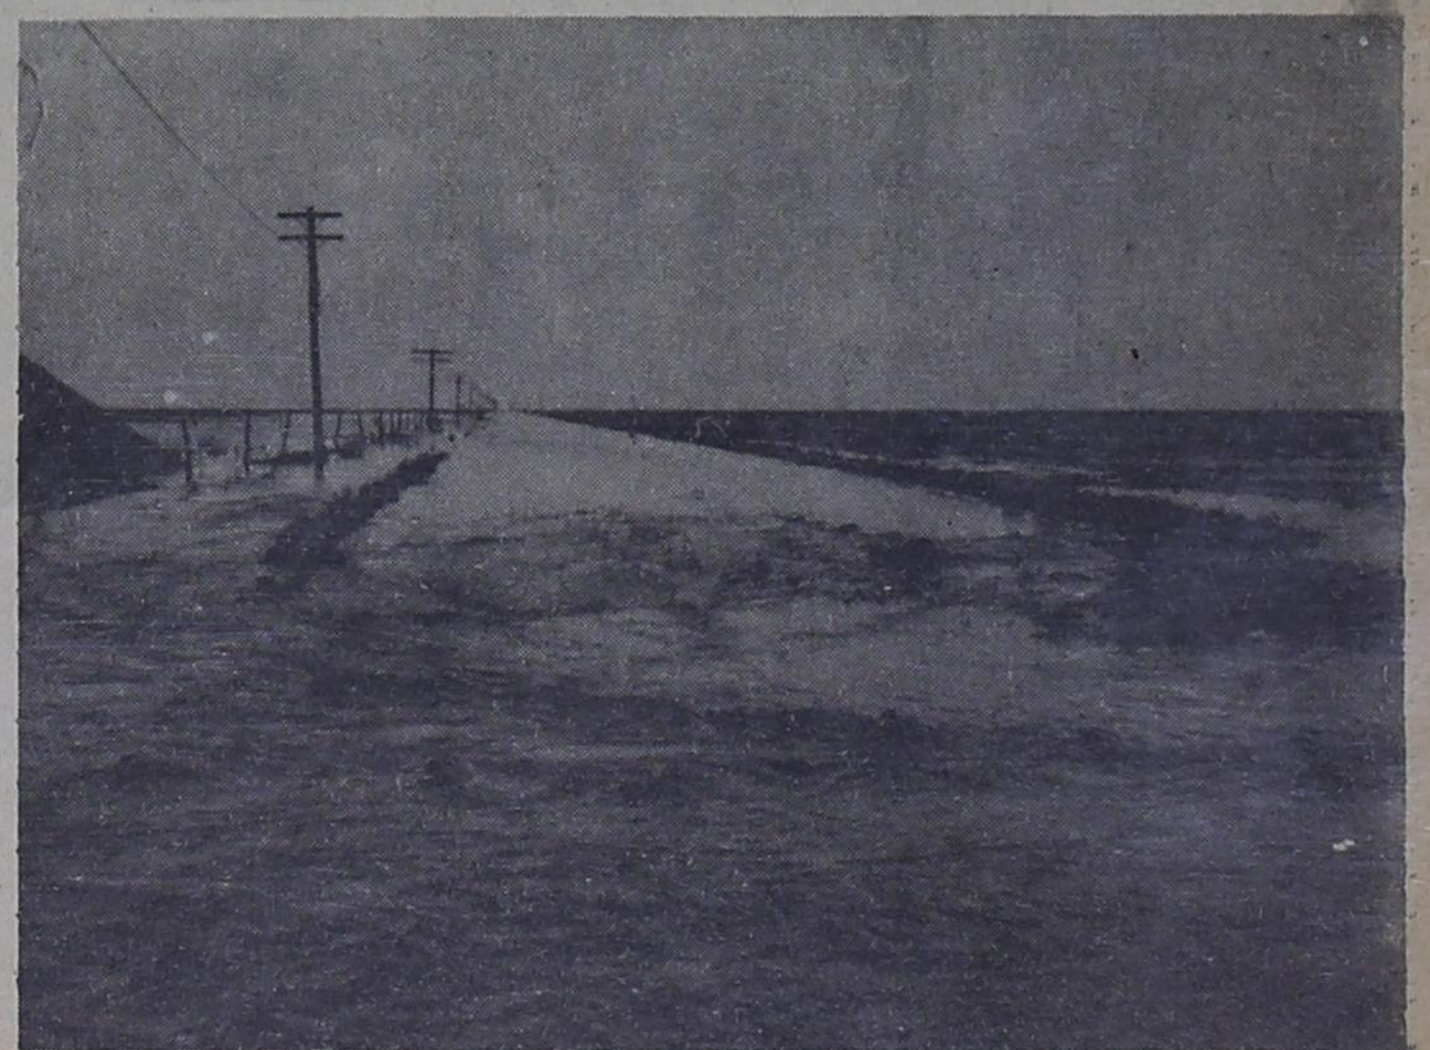

BY WILLIE

Looks like we will have a few more showers latter part of week.

--Willie

"MUDDY ROAD AHEAD"--A downpour some three miles north of Bovina Friday afternoon brought tremendous amounts of water swishing down Farm Road 1731. This scene is looking north on the FM Road. Ditches on each side of the pavement were swollen out of their banks.

WATER, WATER EVERYWHERE--Vast amounts of water swirled across roads and fields north of Bovina following Friday afternoon's downpour in that area. Water is shown coming down a section line road three miles north of town. The photograph was made looking east.

SPONSORED BY BUSINESSES--

Dr. Marquis To Appear Saturday

Under sponsorship of 10 Bovina businesses, Saturday afternoon will be a time of "sensationally strange" happenings here.

The amazing Dr. Marquis, who is billed as the greatest mystery man of our life and times, will appear here.

For more than an hour, Dr. Marquis will visit sponsoring business places in Bovina. He will read minds of some individuals and hypnotize others.

Highlights of the tour will be a feat whereby he will "defy death by mindreading."

Sponsoring businesses, where exhibitions will be staged, are Superior Electric Co., Bovina Dry Goods, Scooter's Five and Ten, Bovina Dairy Freeze, Williams Mercantile Co., Charles Oil Co., Bovina Recreation Club, City Cafe, and Super Saveway. First National Bank of Bovina also is helping sponsor the program.

In addition to exhibitions at these places, an all-afternoon

display of hypnotism will be staged at Super Saveway, from 2 until 8 p. m. Dr. Marquis will hypnotize the mystery model, Miss Modjeska, who will remain in a state of "death-like rigidity" for six hours.

Dr. Marquis is making a tour of air force bases and army posts in the Southwest. He has recently staged a trio of programs at Cannon Air Force Base at Clovis.

The actor, world adventurer and man of mystery will serve as master of ceremonies for the Hollywood monster show which is coming in person to stage of Mustang Theatre Thursday, June 23, at 8 p. m.

As a special feature of the show next week, Dr. Marquis will escape from a wooden box constructed by Cicero Smith Lumber Co. The box will also be wrapped in 200 feet of cable, according to advance billing.

Further details concerning the show are in an advertisement in this issue.

Quilting With Mrs. Looney

Mrs. Reagan Looney hosted Bovina Quilting Club Thursday in her home.

Following a covered dish luncheon, the ladies spent the afternoon quilting for the hostess.

Attending were Meses. Mel Gunn, Will Parker, Tom Rhodes, Levi Johnson, Bill Bradshaw, J. R. Caldwell, C. P. Warren, and J. E. Owens.

Guests were Mrs. E. H. Ralls and children, Mrs. Bob McMeans and children, and Miss Dyaltha Bradshaw.

Next meeting is scheduled in July with Mrs. E. H. Moody.

Hawkin's Host Family Reunion

Mr. and Mrs. Roy Hawkins hosted a family reunion Thursday evening in their home. Guests of honor were Mr. and Mrs. Gordon Doherty from Birmingham, Mich. and Pat Norton of Arabia.

Those attending were Mr. and Mrs. Erith Hawkins and son, Mr. and Mrs. Jimmy Norton and family, Mr. and Mrs. N. E. Bonds, Harold Hawkins and girls, Mr. and Mrs. Buster Cocheran, Mr. and Mrs. Herman Garris, Mrs. Pete Davies and boys, Charles Hawkins, Miss Bea Hawkins, and Mr. and Mrs. Ernest Foster and family from Clovis.

MISS EILEEN WILLIAMS

Vows To Be Read

Rev. John Ferguson will read marriage vows July 10 at 3 p.m. uniting Miss Eileen Williams and Carroll Burnam.

The double ring ceremony will take place at First Baptist Church of Bovina. Parents of the couple are Mr. and Mrs. Dennis Williams and Mr. and Mrs. Bill Burnam of Bovina.

A reception will be in church annex following the ceremony. All friends of the couple are invited to attend both wedding and reception.

Methodists To Help Emergency Relief Fund

Father's Day is Blanket Sunday in Texas throughout the Texas Council of Churches. All members of the Methodist Church are asked to bring a blanket for the Refugee Relief Fund.

General chairman for this program is Mrs. Leon Ware, other committee chairmans are Blanket Collection Chairman Mrs. Oakley Stevenson, Packing and shipping Chairman, D. R. Bushnell, Publicity Chairmen Mrs. John Dixon and Mrs. Dolph Moten.

Places will be designated for the people to leave the blankets. They will be shipped immediately in order to reach the neediest persons in each category this winter.

Mrs. McCallum Hosts Circle

Mrs. D. R. Bushnell opened the program with a Devotional at Fellowship Circle meeting Friday morning at Methodist Church. Several members presented a program on "Mothers accepting the decisions of their children to do Missionary work."

Following the program a short business session was conducted. The group decided to light the church sign.

Refreshments of Cokes, coffee and sweet rolls were served by Mrs. Dean McCallum.

Present for the meeting were Mrs. Glendon Sudderth, Mrs. Jimmie Clements, Mrs. D. R. Bushnell, Mrs. Davis Edens, Mrs. Leon Ware and Mrs. McCallum.

Success makes a fool seem wise

Shower Fetes Delores Hoffer

Delores Hoffer was honored with a lingerie shower Wednesday evening in the home of Mrs. Joe Moore.

Mrs. Charles Embry and Mrs. Joe Moore were hostesses for the occasion. Refreshments of chips, dips, strawberries, Cokes, and coffee were served from a table laid with a white cloth graced with an arrangement of artificial spring flowers.

Attending were Mrs. Mike Carter, Mrs. Pat Kunselman, Mrs. John Wilson, Mrs. Glenn Hromas, Mrs. Frank Wilson, Mrs. Wayne Koehler, Mrs. Nicky Foster, Mrs. Gabe Anderson, Mrs. Dolph Moten, Mrs. Charles Vickers, Mrs. Sam Sudderth, Mrs. C. R. Brandon, Mrs. Scott Gober, Mrs. Jerry Bell, Mrs. Penny Anderson, Mrs. Thomas Rhodes, Mrs. Robert Read and Cindy, Mrs. Don Owens, Miss Arlene Clayton, Miss Dyaltha Bradshaw, Mrs. Charles Embry, Mrs. Joe Moore and the honoree Delores Hoffer.

Congratulations to Mr. and Mrs. H. N. Turner on the birth of an eight pound baby girl, named Lucretia, born Wednesday afternoon at Parmer County Hospital in Friona.

Senior Sunday School Class Has Party

Trampoline activities and bowling furnished entertainment for the Senior Sunday School Class of Bovina Methodist Church Monday evening at Clovis.

Following the activities the group had refreshments at a drive-in.

Attending were Billy Strawn, Verna Marie Estes, Carole Hammonds, Roy Dodson, Roger Ezell, Don Caldwell, Nita Beth Estes, Harriett Charles, Sonny Gentry, Janice Richards, Barbara and Virginia Rea, Mary Evelyn Vaughn, Joy Reddin, Carole Jean Hastings, Gary Stevenson, Delbert Morris, Ralph Kunselman, Penny Lloyd, Patsy Richards, Lawana Hastings, and Mary Nell Edens.

Sponsoring the party were Mrs. Gene Rea and Mrs. Dean Hastings.

Mr. and Mrs. Ovid Lawlis are visiting with her sister and mother, Mrs. J. I. Steed and Mrs. Paul Steed, of Dallas.

READ WILL COACH--

Baseball Will Start

A large group of boys gathered Saturday morning at the baseball field with Coach Darrel Read to organize summer teams.

Read reported that some 35 boys, ranging from Pee Wee classification to Babe Ruth age either attended the meeting or have asked to be included in the summer program.

Lions Club is sponsor of the project.

A Little League circuit including Farwell, Lazbuddie and Bovina has been organized.

Originally set up as a three team loop, five or six clubs may be participating before the season gets started. Farwell may have two instead of one team and Bovina may field two squads also.

Read has 20 Little Leaguers on his roster. Fifteen Babe Ruth boys have also signed up to play in addition to four Pee Wees.

The Saturday morning meeting had originally been planned as a combination organizational-practice session but heavy rains cancelled the practice.

Read scheduled another practice session Monday. League play was supposed to begin Monday with Farwell at Bovina but the game was cancelled.

Wednesday afternoon, Lazbuddie is at Farwell and next Monday Bovina will be at Lazbuddie.

Read says the schedule is almost certain to be altered by new teams joining the league.

The present slate will have Farwell playing 10 games between June 13 and July 27. Lazbuddie and Bovina will have nine games during the period. Farwell and Bovina will have five home games and Lazbuddie will be on home grounds for four contests.

Read says he will attempt to schedule games for the teen agers (Babe Ruth) with teams from Clovis and Muleshoe.

Pinner's Entertain Young People

An evening of entertainment was enjoyed by the Young Peoples Sunday School Class of Church of Christ Thursday evening in the home of Mr. and Mrs. Jon Pinner.

Preceding the sandwich supper the group played volley ball and sang songs. Homemade ice cream and cake climaxed the evening.

Rev. Alfred White presented a devotional to the group.

Those attending were Lavoyda Newbrough, Joyce Marshall, Elvenc Emfinger, Dennis and Olin Johnston, Jerry Davis, Rev. and Mrs. Alfred White, Billy and Ginny and the hosts Mr. and Mrs. Joe Pinner, Beverly and Tony.

Warming Honors Kirkpatrick's

Mr. and Mrs. J. D. Kirkpatrick were honored with a housewarming Friday evening in their new home, east of town.

Hosting the occasion were Mimes, Sam Sudderth, Ed Hutto, Don Murphy, Truman Gaines, A. M. Wilson, Connie O'Brien, Warren Embree, Lawrence Jamerson, Grady Sorley, John Ferguson, Earl Stevenson, Dick Sparks and T. C. Wiseman.

The hostesses presented the Kirkpatrick's with a copper canister set and a service of stainless steel flatware.

A centerpiece of gold mums graced a table laid with a turquoise cloth from which refreshments of punch, coffee and cookies were served to guests.

BOVINA

Supt. Discusses Band Program

BY WARREN MORTON,
Bovina Schools Superintendent

The local school board and administrative staff are in a position to invite suggestions or ideas as to what should be done about the position of the band in the local schools. In the near future a budget must be worked out for next year's educational program and a band instructor must be employed for next year's term. Now is the time that any expenditure of funds for next year must be incorporated into the budget. The school board is anxious to fulfill its obligation to local parents in providing the type educational program that will fit majority of students. On the other hand, the board is anxious to make available funds cover those activities that will do most good for the greatest number.

Present interest and enthusiasm for elementary band is very good. Students in the fifth, sixth, seventh and eighth grades do a good job in learning band participation. Lack of continuation of this interest into the high school grades is the problem. Only half of last year's students in the eighth grade indicated an interest to continue working in the band and only one student in the upper three grades indicated an interest for band work. In order to justify the expenditure of funds for a full-time instructor, new uniforms and an operational amount for music and upkeep of instruments there is a need to foresee participation in band work of students in each grade in high school.

This does not mean that this participation is needed next year, but it is necessary to see that the trend is in that direction. There are no state funds available for teaching music in Texas schools; all the cost must be borne from local funds and approximately \$7000 per year is necessary to operate a good program. Local facilities are excellent for such a program; there is plenty of everything except participation of high school students. Full credit can be made available if it is felt that this would help.

The board is anxious to appropriate funds for this activity, but it would like to be assured that this service will be helpful to more students. In the near future a committee will be invited to meet with the board and discuss this problem with the view of arriving at a successful solution. You are invited to offer any suggestions by writing, phoning, or talking with me or any of the band parents or addressing your letter to the school. Your suggestions will be considered and will be appreciated.

by
Sue Moten

Had it ever occurred to you that petty pilfering amounts up into the millions. Heard the other day that millions of dollars worth of paper clips, rubber bands, and stamps are swiped by employees every year, however, no solution has been posed for this problem. Might make us stop and think every time we start to pilfer just one 11" ole stamp.

I am afraid I have personally offended one of the favored few bachelors, I apologize to Loy Harris for accusing him of being caught in the tender trap.

Wonder if Bovina doesn't need a parking lot. Every time it rains it presents a major parking problem since all the farmers come to town in their pickups and their wives in the family cars. Guess this is one advantage of obtaining water by irrigation, keeps said farmer at home and gives the ladies a place to park.

Speaking of weather I'll bet there are a lot of mothers who regret school being dismissed since their children are tracking the mud into their houses instead of the school building. Guess this is one rain Mr. Joplin, school custodian, is enjoying.

Seems the latest development in home improvements is the personalized trash-barrel. A neighbor of mine was painting her picnic table and had some paint left so she proceeded to paint "Charles" on her trash-barrel. However, I'll bet the neighbors still burn their trash in it if it is necessary.

"She's right here on the patio with me!"

No more bothersome running in and out to catch the phone—not when you've got a portable phone or an extension on the patio. The last word in outdoor living—it costs so little. This year, get an outside extension in a color to match your summer furniture.

JULY 4TH--

Barbecue Tops Celebration

Bovina's Annual Fourth of July Celebration will have most of the attractions of last year's event with one big addition--the firemen's barbecue.

The Volunteer Fire Department will give away a boat and trailer and furnish free barbecue as their part of the program.

Baseball games, ducking stool and visiting will be regular attractions of the Independence Day observance that will be maintained again this year.

Members of Lions Club met with firemen last week to lay

plans for the affair. No specific changes from last year were planned but may be made later, according to Pat Kunselman, who is secretary of both organizations.

Chances for the boat may be purchased from any member of the fire department.

Attend M.Y.F. Training Camp

Patsy Richards, Dixie Hartzog, Virginia Rea, and Carol Jean Hastings attended Methodist Youth Fellowship training camp at Ceta Canyon this past week.

Some of the activities the girls participated in were planning groups in which they learned the functions of the various offices and job groups in which they learned the function of their specific offices. Morning watch opened the day and vespers climaxed each evening.

Following the training the girls will be installed in their respective offices Sunday evening at the regular worship services at Methodist Church.

Wilson's Return From Vacation

Mr. and Mrs. A. M. Wilson, Suzanne and Pam, returned Friday afternoon from vacationing in California. Points of interest the Wilsons visited included Disneyland, Marineland, Knotts Berry Farm, and Los Angeles.

Couples Bridge Club With Don Sides

Mr. and Mrs. Don Sides hosted the Couples Bridge Club Friday evening in their home.

Attending were Mr. and Mrs. Jimmie Clements, Mr. and Mrs. Jim Henke, Mr. and Mrs. Oakley Stevenson, Mr. and Mrs. Leon Ware and Mr. and Mrs. Glendon Sudderth.

Guests for the evening were Mr. and Mrs. Mack Ragsdale and Mr. and Mrs. Durward Bell.

Sandwiches, cokes, coffee and pineapple pie were served to the guests.

CHARLES HOST BARBECUE

Mr. and Mrs. Mark Charles entertained several couples with a chicken barbecue Sunday evening in their home.

Attending were Mr. and Mrs. Scott Gober and children, Mr. and Mrs. Vernon Willard and children, Mr. and Mrs. Dolph Moten and son, Mr. and Mrs. Don Owens and son, and Mr. and Mrs. Jim Baldwin.

T and C With Mrs. Embry

Mrs. Charles Embry hosted the Town and Country Club Thursday afternoon in her home.

The regular business session was conducted by Mrs. Robert Read. Officers were elected for the term convening in September. Mrs. Charles Embry was elected president, Mrs. Charles Vickers, vice-president, Mrs. Joe Moore, treasurer, Mrs. Mark Charles, reporter, Mrs. Sam Sudderth secretary. The group discussed the possibility of a booth at the July fourth celebration with the proceeds being donated to the Little League fund, they also decided to help the Little League financially.

Following the business session refreshments of chips, dips and homemade ice cream were served, by Mrs. Embry.

Attending were Mmes. Wayne Koehler, Nicky Foster, Charles Vickers, Sam Sudderth, Wayne McCutchen, Glenn Hromas, Mark Charles, Don Owens, Joe Moore, Tom Bonds, Robert Read, David Haber, and Delores Hoffer.

Mrs Ruth Martin Presents Program To W. M. U.

Mrs. Mary Ruth Martin conducted a program entitled "The Children's Children" at the Royal Service program of the W. M. U. Wednesday evening at First Baptist Church.

Others taking parts on the program were Mrs. P. A. Adams, Devotional, Mrs. Bob Williford, Letters from Missionaries in Belem, Mrs. J. W. Gooch, Letters from Salvador, Mrs. Bobby Englant, Letters from Rio De Janeiro, and Letters from Porto Alegre by Mrs. Ovid Lawlis.

Those attending the service were Mmes. French Crook, Travis Lloyd, John Ferguson, Allan Cumpston, Ovid Lawlis, P. A. Adams, Bob Williford, J. W. Gooch, Bobby Englant, and Mary Ruth Martin.

THE HIGH PLAINS FARM AND HOME

Wheat Turns Swiftly Under Summer Sun

Parker County area farmers were beginning to get a little weary of all the wet weather--until Sunday. That day, the dark blue clouds which had shrouded the Plains for over a week suddenly vanished, and a brilliant summer sun ended the damp and cold.

The return of sunshine over the weekend ended one of the wettest spells of weather to

visit the area in many years. Nightly showers occurred around most farms, and the result after about ten days of rainy weather was from four to nine inches of moisture.

The average is somewhere between five and six inches, which is an abundant supply for this time of the year. Cotton, wheat, and grain sorghum all have plenty of moisture.

In fact, there has been quite a bit too much rain for the benefit of the now maturing wheat crop. The majority of farmers report that this is going to be one of the best years for wheat (irrigated) they have ever had, provided they can get the crop in.

The rain and winds that accompanied the moisture were pretty rough to quite a bit of the better wheat of the area. This "better end" of the 1960 wheat is susceptible to moisture and winds because it is tall, the heads are heavy, and in many cases the ground is soft from recent irrigations.

For those reasons, a large part of the best wheat has been blown down or twisted and matted together in the past two weeks.

To farmers who have suffered this damage, the return of the sunshine is welcome indeed. Their fields are yellowing rapidly, and just as soon as the ground dries out enough, the combines will be put to work trying to salvage the endangered grain.

Early cuttings of wheat were made the first of the week, and if dry weather holds, the harvest is expected to be underway generally by the first of next week.

WITH THE COUNTY AGENT

JOE JONES

Thrip are rather wide spread over the county and many farmers have already started their early season control program. All cotton farmers should give serious consideration to getting their early season control program under way

when the weather clears up and you can get in your fields. Below you will find a schedule of cotton insect meetings I am calling to go out in the field and look cotton over and discuss early and late season insect control.

Tuesday			
June 21	Lariat	8:00 A. M.	Cafe
June 21	Clays Corner	10:15 A. M.	Clays Corner
June 21	Lazbuddie	2:30 P. M.	In front of school
Wednesday			
June 22	Oklahoma Lane	8:00 A. M.	Oklahoma Lane
June 22	Bovina	10:15 A. M.	Farm Supply
June 22	Hub	2:30 P. M.	In front of school
Thursday			
June 23	Frlona	8:00 A. M.	Chester & Fleming Gin
June 23	Black	10:15 A. M.	Tri-County Gin
June 23	Rhea	2:30 P. M.	Parish Hall

Following a sound insect and watering program will pay off in early mature cotton at the gin this fall. With our present moisture we should not need any water on cotton until it starts blooming which in most cases will be July 10 to July 20 in most instances.

I have a real good bulletin on Spot-Spraying of Johnson-grass put out by the Texas Agricultural Experiment Station. This publication discusses the use of all materials put out for spot control of Johnson grass and tells how they should be used. Some of the more common materials discussed are C-56 and diesel, naphtha, naphtha and diesel, Dowpon, TCA, HOA, and maleic hydrozide. The Texas Jetgun many have asked about can be ordered from Gibson Machine Shop, 804 East 27th Street, Bryan, Texas. The cost is \$20.00 F. O. B.

Orders for quail are to be sent off on June 16, and before

very long these quail will be delivered to your place. It would be a good idea to use any time you have in improving your cover. I notice A. L. Hartzog and Walt Mabry have made tepees out of post which is an excellent way to provide cover. I have ordered blanks for ordering fish which some of you may need now that our water supply is in such excellent condition for fish.

Follar feeding of plants is applying plant food to the foliage and thus feeding plants in this manner. With the condition cotton is in following the cool rainy weather you are likely to hear that follar feeding will bring it out and cure its ills. Don't be misled by too much by this idea. What cotton needs now is dry hot weather, cultivation, and insects controlled. If you have plenty and plant food in the soil your cotton should over come the seedling diseases and be on its way if we have favorable weather.

Tatum Joins Association

Tommy Tatum of Black has been awarded a junior membership in the American Shorthorn Association, oldest purebred livestock organization in America.

Purpose of the group is to collect, verify, and preserve pedigrees of Shorthorn and Polled Shorthorn beef cattle and to promote greater use of the breed.

Shorthorns led the purebred movement to America, the first cargo landing at Virginia in 1783. The breed spread rapidly throughout the country eventually replacing the Longhorn cattle on the Western ranges.

The Polled, or naturally hornless, strain was developed after the Civil War. Shorthorns have received international recognition for improvements in today's beef animals.

Farmers Check With Court On Bindweed Kill

The county-wide bindweed eradication program in which the county has cooperated for years with individual landowners, has been changed some, according to announcement by County Judge Loyde Brewer this week.

Landowners who want county assistance in the county rights-of-way, have to meet with the Commissioners Court to gain approval for this aid. The Court meets on the second and fourth Monday.

Brewer adds that the county agent recommends the use of sodium chlorate, 5 lbs. to a square yard or about 800 lbs. per acre.

If a landowner wishes more information, he may contact Judge Brewer or check with his county commissioner.

And having thus chosen our course without guile and with pure purpose, let us renew our trust in God and go forward without fear and with manly hearts. --Lincoln

Scholarships For First-Rate 4-H Projects

A local 4-H club girl who really knows her way around the home may be the lucky winner of a \$400 Montgomery Ward college scholarship this year, according to the National 4-H service committee, Chicago.

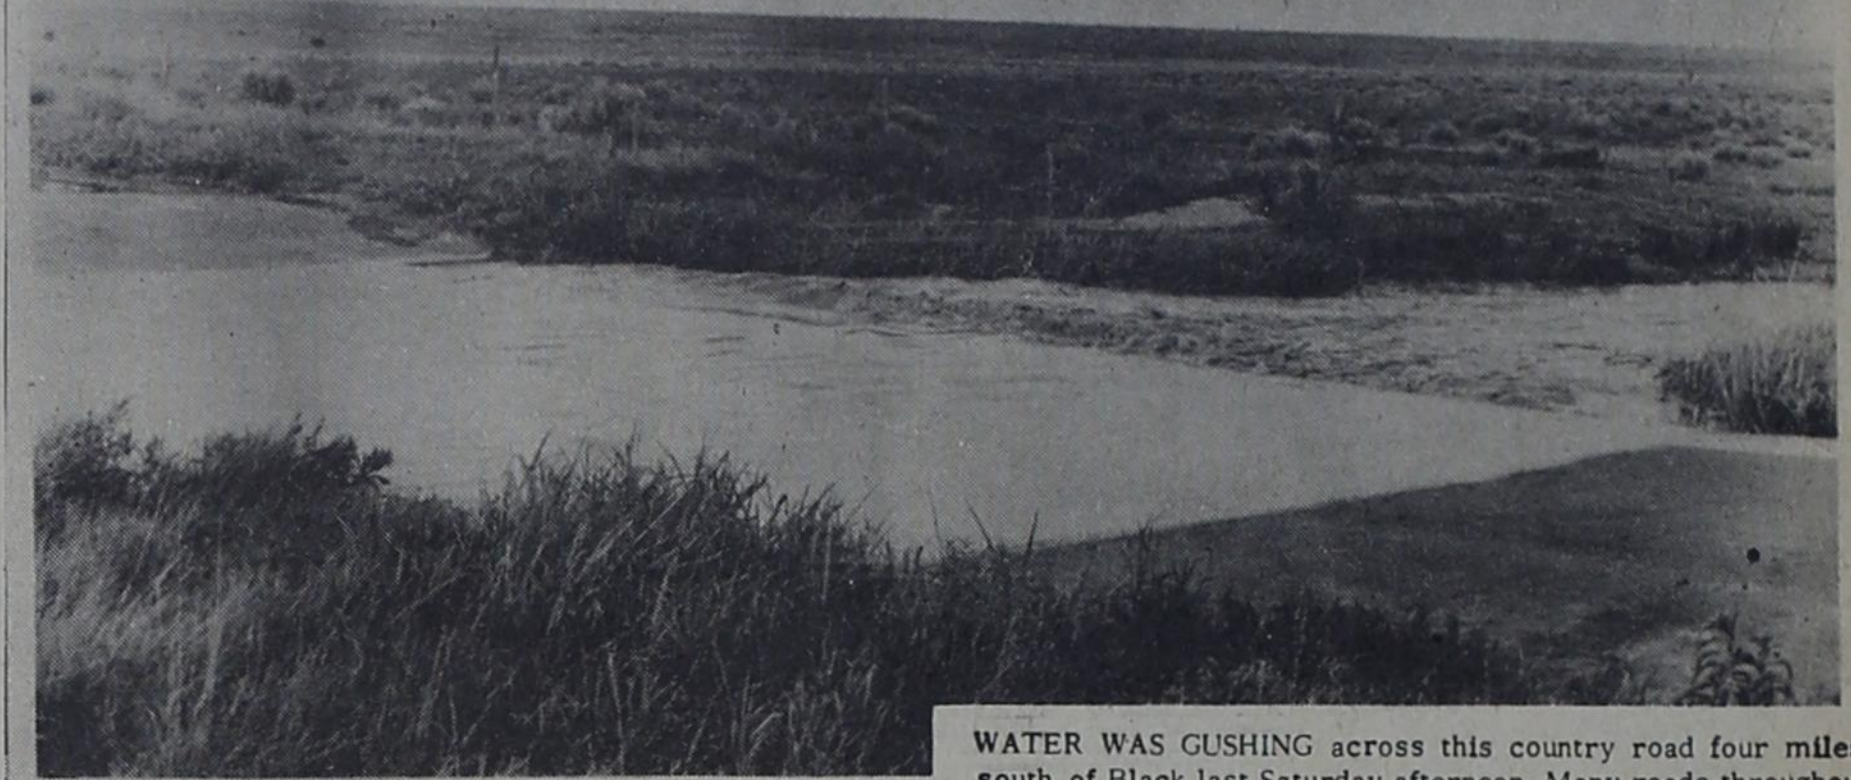

The young homemaker must be enrolled in the 4-H home economics program, have satisfactorily completed at least three years of club work, and be over 14 years old before she can compete for this top honor.

Work in the home economics project includes cooking, food preservation, sewing, meal planning, housekeeping, buying and budgets. Developing exhibits, displays and demonstrations are among the stated objectives of this genuinely useful project directed by the Extension Service and the USDA.

The national judging is done on the member's 4-H record book which is compiled during her club career. The comprehensive report contains not only highlights of the home economics projects and other 4-H achievement, but also evidence of leadership, community service, scholastic standing, and personal recommendations from 4-H Club leaders.

Work qualifications are high and competition keen since only six girls will be selected from all 50 states and Puerto Rico where 4-H Clubs are well established. Besides the scholarships, a trip to the National 4-H Club Congress in Chicago is waiting for the highest ranking member in the state.

Let us make haste to live, since every day to a wise man is a new life. --Seneca

WATER WAS GUSHING across this country road four miles south of Black last Saturday afternoon. Many roads throughout the area were covered by water during the heavy rains last week. The Frio Draw here was virtually a river, 15 feet across and two feet deep in the middle.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

We of Farm Bureau join all others in expression of sympathy for the families of John David Miller and E. C. Wilson who lost their lives by drowning last week. Our hall adjuster, Johnny Vinyard, and Mr. Miller were unable to help, even though they swam fifty or so yards out to the raft in a desperate effort to save the boys, as soon as they saw they were in trouble.

We would almost bet that all the dogs in Rhea Community got vaccinated last Wednesday afternoon at the Rhea Grain Elevator. Everyone was notified, and those people out there usually do things in a grand and complete way. And, if anyone has noticed many grasshoppers, they are probably

doomed, because Wednesday night they got together to make plans to get rid of them on a cooperative basis. Carl Schlenker was the one who notified us to notify all the Rhea people.

This is no joke: A county Farm Bureau leader participating in one of the District VIII study committee meetings said that a cotton farmer in his county was forced by government officials to improve his farm house used to house Mexican Nationals to a point where the house built for the Mexican National laborers was in better condition than the house in which the farmer lived.

Your Farm Bureau hopes to remedy situations like this by passage of H. R. 12176 which the House of Representatives will soon vote on. Have you written your representative about this bill?

Human Events dated April 21, 1960, reports that a California judge has signed an order upholding the right of a

union to expel members who descend publicly from union policy. The judge said such men are disloyal and the union may properly protect itself by expelling them.

Tax the rich? According to the Foundation of Economic Education, Inc., federal income revenue collections would be reduced only about one percent if a limit of fifty per cent was placed on income taxing.

Do you know what your child is being taught in history, civics and economics classes? You should know. We believe that this area is still free of subversive text books and teachers, and we certainly hope so. This is not so in some schools in America. Let's know what our children are being taught when they are away from home.

CONSIDER THIS: "The king that faithfully judgeth the poor, his throne shall be established forever." Proverbs 29:14

Rate of Water Use in Relation to Plant Development

Cotton Moisture Now Sufficient

High Plains cotton farmers are in good shape moisture-wise as nature has recently dumped several inches of water over the area. For the time being, irrigation will not be necessary, says Joe Jones, Farmer County agricultural agent.

"The condition is now that we have plenty of subsoil and topsoil moisture," says Jones. He feels farmers will not need to irrigate until their cotton begins blooming.

"They need to keep the

moisture level high during the blooming period.

"A general guide would be to start watering when bloom period begins and stop when it ends.

"Farmers normally expect it to take two irrigations from July 10 to August 20." Cotton usually begins blooming about the middle of July and ends about the middle of August.

"Cotton uses very little water until blooming. Peak use of water occurs during the fruit-

ing period. When bolls develop, need for water drops off and supply should be cut off."

During the first 45 days after planting, cotton requires less than one-tenth an inch of moisture each day. Water usage reaches as high as four-tenths of an inch moisture during the peak bloom period about three months after planting.

By about the fourth month after planting, the first bolls should open. This is the time watering should cease, he says.

THE HAPPY HOMEMAKER

BY JUNE FLOYD

As warm weather approaches each year, outdoor cookery comes into the spotlight. Very closely associated with outdoor cookery is barbecue. Any kind of meat can be used for "Ham-WotAmBurgers." They are also very easy to prepare.

Toast your buns quickly on the grill, add your meat; then finish with salad dressing, lettuce, tomatoes and other favorite additions. Many people like cheese and others prefer pickles and olives.

A basic recipe for barbecue sauce for "HamWotAmBurgers" can be made as follows:

- 1 teaspoon Adams butter flavor
- 1/2 cup vinegar
- 1/2 cup catsup
- 1/2 teaspoon minced onion
- 1/4 cup Worcestershire sauce
- 1 tablespoon brown sugar
- 1/4 teaspoon black pepper
- 1 teaspoon paprika
- 1/2 teaspoon salt

Measure liquid then dry ingredients into saucepan. Stir well. Bring to a boil, but don't boil. Simmer 3 minutes. Refrigerate until needed.

Use this sauce to brush on your meat once or twice during the grilling period.

If you are a "winter bouquet enthusiast," try this method of

When using light, medium and heavy, the following should be used as a guide:

Light--When only an occasional green square is found to be punctured. (Less than 25 per cent)

Medium--When flared squares are readily noticeable while walking through the field. (25 to 50 per cent infestation)

Heavy--When numerous flared squares are noticed over the field. (Over 40 per cent infestation)

LEAFWORMS: Inspections should be made in several representative points in the field and the following used as a guide:

Light--When 1 or only a few larvae are observed per field.

Medium--When 2 or 3 leaves are partially destroyed by ragging, with 2 to 5 larvae per plant.

Heavy--When ragging of leaves is extensive with 6 or more larvae per plant, or if defoliation is complete.

preserving flowers now for arrangements next winter. It is easy to bake fresh flowers in the sun if you will follow these instructions.

Leave five or six inch stems on your flowers when picking. Be sure to pick them at their peak. There must be no dew or moisture on the petals. Pick the leaves from the stems.

Sift dry sand through an old sifter. Pour two or three inches of sand in a cardboard box or pan. Place blooms upside down on the sand, then pour more sand over them. It will take an inch to cover them. Space the blooms so they don't touch.

Set box or pan in the sun. If the sun is very hot, the flowers will dry in two days.

Remove flowers gently when no longer damp and brush petals with small brush to remove sand particles.

The sand may be used over and over. It may be kept in a covered box from one year to the next. Flowers baked in this manner will keep all winter.

For a simple easy to prepare main dish for a one dish meal, try this

- Hamburger Shortcake Ring
- 1/4 cup shortening
- 2 cups prepared biscuit mix
- 2 teaspoons caraway seeds
- 2/3 cup milk
- 2 lbs. ground beef
- 1 tablespoon instant minced onion
- 1 (10 1/2 oz.) can condensed cream of celery soup
- 1/4 cup catsup
- 1/2 teaspoon chili powder
- 1/2 cup sliced olives
- 1/2 teaspoon salt

To make ring: cut shortening into biscuit mix; mix in caraway seeds. Add milk; stir with fork to make soft dough; beat 15 strokes. Drop tablespoonfuls of dough onto greased baking sheet to form circle. Mix remaining ingredients and pour in circle. Bake in very hot oven ten to fifteen minutes.

For speedy barbecue ham sandwiches try this simple recipe.

Combine 1 1/2 cups hamburger relish with 3/4 cup water in saucepan. Add 3/4 pound ground spiced ham or other luncheon meat. Simmer five minutes. Serve in heated sandwich buns.

A discarded adhesive tape holder makes an ideal tape measure holder for your sewing box or basket. Just wind the tape measure around the spool and slip it inside the ring. Your tape measure never gets tangled up when cared for in this manner.

How Do You Check For Bugs In Cotton?

Each year the Texas Extension Service has volunteers in the Farmer County area to make periodic checks in cotton fields to determine the extent of insect infestation.

These reports are compiled regularly on an area-wide basis so that progress of the crop and control measures--where necessary--may be easily seen.

Farm and Home this week is reprinting the instructions used in such reporting in the hope that the methods employed may be of assistance to individual farmers who seek the same information for themselves.

THRIPS: Walk diagonally across the fields, inspecting many plants at several representative places, using the following as a guide:

Light--When the newest unfolding leaves show only a slight brownish tinge along the edges with no silvering of the underside of these or older leaves and only an occasional thrips is seen.

Medium--If newest leaves show considerable browning along the edges and some silvering on the undersides of most leaves, and thrips are found readily.

Heavy--If silvering of leaves is readily noticeable, terminal buds show injury, general appearance of plant is ragged and deformed, and thrips are numerous.

FLEAHOPPERS: While walking diagonally across a field, inspect 33 terminal buds approximately 50 feet from each of the 2 corners and 34 terminal buds at the center of the field, or inspect 100 terminal buds at several representative spots over the field for the fleahopper record. Count both adults and nymphs found in the top 3 or 4 inches of the cotton plants and record the total number. When using light, medium and heavy, use the following as a guide:

Light--Estimated 1 to 10 fleahoppers per 100 terminals

Medium--Estimated 11 to 25 fleahoppers per 100 terminals

Heavy--Estimated 26 or more fleahoppers 100 terminals

BOLLWORMS: Examine the terminal buds and several of the lower branches of 100 cotton plants and record the number of worms found as the percent bollworm infestation or examine 100 consecutive squares and bolls at each of several representative points in the

field and record the number of damaged ones as the percent damage.

When using light, medium or heavy, inspections should be made in several representative points in the field using the following as a guide:

Light--When only a few small squares show injury.

Medium--When injured squares and bolls are readily noticeable over most of the field.

Heavy--When numerous injured squares and bolls are noticed over the field.

BOLL WEEVILS: Reports of boll weevils on cotton before fruiting begins should be made on the basis of the number of weevils per 100 feet of row. After plants are squaring freely or have produced as many as 3 squares per plant, boll weevil reports should be based on punctured squares. The 100 squares examined should be 1/3 grown or larger and an equal number should be picked from the top, middle and lower branches of the plants while walking diagonally across the field or from several representative spots within the field. SQUARES FROM THE GROUND OR DRIED SQUARES HANGING ON THE PLANT SHOULD NOT BE COUNTED. Both feeding and egg punctures should be counted and the percent of punctured squares recorded in the proper space.

Present during a demonstration of bindweed killing done by the Santa Fe Railroad recently were, left to right, J. T. Jones, an unidentified poison spreader, Ronald E. Mock, division engineer with the railroad, and Vernon Symcox. The railroad has undertaken to poison all bindweed which grows along their right of way in Farmer County.

Santa Fe Joins Against Bindweed In County

Continuous efforts to rid Farmer County of bindweed are effect as divisions of the State Highway Department, the Santa Fe Railroad Company and the weed committee of the Farmer County Farm Bureau work hand in hand with the county agent and county farmers to find and destroy isolated patches and crowded fields of this noxious and fast growing weed.

the farmers were aware of this weedy menace, the committee then began working on the highway department and the Santa Fe Railroad to begin a program along their respective rights-of-way that would destroy any bindweed in these particular areas.

want to be certain to destroy the weeds. The dry acid is applied with a PCB spreader, strapped to a person's shoulder. It will carry a 25-pound bag of the compound and will spread the acid in an eight to 10 foot area. The 25 pounds will cover 1/8 of an acre as a 200-pound bag is needed for one acre of ground.

be just as effective. The compound can be spread in winds up to 20 to 25 miles per hour so the possibility of wind carrying the acid away before the necessary water reaches it is remote.

Questions And Answers On "\$50,000 Limit"

Note: The following story is furnished in response to suggestions that farmers in some areas are not sufficiently aware of the \$50,000 price-support limitation.

Chairman Archie Tarter of the Farmer County Agricultural Stabilization and Conservation Committee reminded farmers that the 1960 crops of most of the major price-supported commodities are subject to a \$50,000 limit. Following are answers to some of the most frequently asked questions about this feature of the program.

Q. Just what is meant by a \$50,000 limit on price support?

A. It means that the amount of nonrecourse price support that may be received by an individual producer of one of

the surplus crops is limited to \$50,000 unless he cuts his acreage of that crop by at least 20 per cent.

Q. What is the meaning of "nonrecourse" price support?

A. Nonrecourse support means support in the form of a loan that may be settled in full by delivery of the commodity to the government. It also can mean support in the form of a purchase.

Q. How do we happen to have this \$50,000 limit?

A. It is required for 1960 crops by a provision of the Agricultural Appropriation Act for the 1960 fiscal year.

Q. To which crops does the \$50,000 limit apply?

A. It applies to wheat, barley, grain sorghums, upland cotton, extra long staple cotton, rice,

Jimmie Lou Waincott

SAVE COLOR AND FOOD VALUE IN VEGETABLES

Limp, over-cooked, drab-looking vegetables have little appetite appeal, and little food value. You will save color and food value by using proper cooking methods, reminds Frances Reasonover, extension foods and nutrition specialist of Texas A&M College System.

PLAN GOOD MEALS EVERYDAY

Your daily meals should supply you with many different nutrients, according to extension foods and nutrition specialists of the Texas A&M College System. You need protein for growth and for repair of the body; minerals and vitamins for growth and to keep the body functioning properly; and fat and carbohydrates for energy.

BUYING NEW FURNITURE

In the market for furniture? Charlotte Tompkins, extension home furnishings specialist, suggests you follow the rule of simplicity. Select the easy to live with, easy to look at, and easy to care for style.

DON'T SKIP BREAKFAST

When you skip breakfast, you miss a third of your day's energy—a very important third, say extension foods and nutrition specialists of Texas A&M College System.

NEW GUIDE FOR PLANNING FAMILY FINANCIAL SE-

supply a fourth to a third of the day's total food requirements and make a good contribution of most of the essential nutrients. That eliminates the doughnut and coffee type breakfast, which does not supply essential nutrients.

You need fruit, egg, meat and/or breakfast cereal, milk, bread and butter. Such a breakfast pattern is termed "basic" because it contains foods that should be included in every morning meal. It is a basis on which a breakfast of any desired size may be developed.

It's easy to combine foods into tasty, attractive meals, but it does take planning. Suggestions for doing this job are given in "GOOD MEALS EVERYDAY," a colorful bulletin written by foods and nutrition specialists.

Ask for a copy at your county home demonstration agent's office.

Research has shown that an adequate breakfast should

peanuts, tobacco, corn, rye, oats, cotton seed, flaxseed, and soybeans.

Q. What can be done to get a larger loan than \$50,000?

A. Loans can be made in excess of \$50,000 on a recourse basis, with the farmer agreeing to repay all amounts advanced in excess of \$50,000. Also if you reduce acreage of a crop at least 20 per cent below what it was in 1959, there is no limit on the amount of nonrecourse price support you may obtain on that commodity.

Q. Does the limit apply to all price support crops on the farm or to each crop individually?

A. To each one individually.

Q. What do I do if I want to get price support in excess of \$50,000 on a surplus crop?

A. Talk with your county ASC office. There is a special application form that will have to be filed in advance of harvest.

USDA Revises Standards For Sheep, Lambs

Revised standards for grades of live slaughter lambs, yearlings and sheep will become effective June 19, the USDA announces.

Changes made in the standards are similar in nature to those adopted for lamb, yearling mutton and mutton carcasses on March 1.

USDA market news reports for live lambs and sheep have been on the basis of the revised standards since March 1. Closely related grades for slaughter animals and the resulting carcasses are essential to meaningful market reports.

Both conformation and quality requirements for the prime and choice grades are reduced under the new standards.

Minimum conformation requirements are lowered by about one-half grade in each of these grades. Quality requirements, as evaluated primarily by considering external fat in relation to the age of the animal, are reduced from about one-half grade to as much as a full grade, depending upon the grade and age of the animal.

A WORKER tills a cotton field on the Hardy May farm four miles southeast of Friona. Tilling the field will loosen the soil to allow the small cotton plants to obtain maximum benefit from the next irrigation. Although the plants are about three inches high in May's field, they are not visible in the picture.

Halfway Station Expands Experiments In Cotton Research

Dr. T. C. Longnecker, director of the High Plains Research Foundation announced that the Foundation is increasing its cotton research 34% over previous years. Dr. Longnecker stated that the Foundation has 20 more acres of plot research with cotton this year than in 1959.

This accelerated program in cotton research is a result of a cooperative research agreement that has been worked out between the High Plains Research Foundation and the Texas Agriculture Experiment Station No. 8 at Lubbock and College Station.

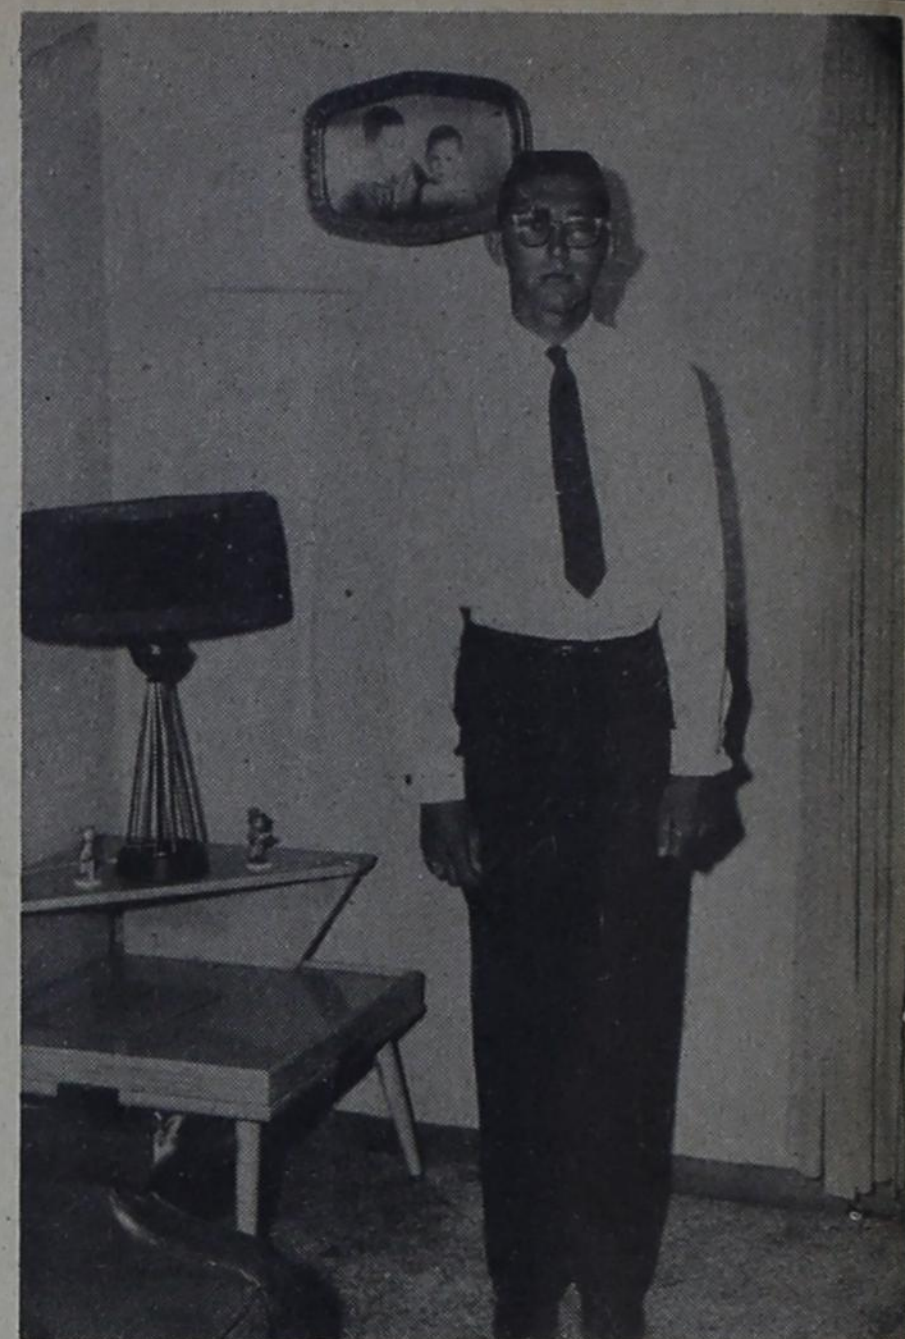

This cooperative arrangement in research will enable the Foundation to better serve the High Plains area. Personnel from the Agricultural Research Service of the U. S. Department of Agriculture, the Texas Agricultural Experiment Station, and the Foundation are cooperating as research teams in conducting the joint research projects.

On commenting about the scope of the increased program of cotton research, Dr. Longnecker stated that the following

cooperative projects are being conducted at the Foundation this year.

- (1) Regional cotton variety test;
- (2) date of planting experiment with cotton;
- (3) a climatology study involving different varieties, moisture levels, dates of planting, fertilizer levels, and varieties;
- (4) an in the furrow fungicide experiment;
- (5) a cotton harvesting study involving different varieties and various methods of harvesting;
- (6) planting equipment test using different types of planting equipment;
- and (7) a cotton irrigation experiment consisting of a detailed evaluation of different varieties, fertilizer treatments, and irrigation methods on the yield and quality of cotton.

Dr. Longnecker emphasized that the cooperative research program is just one phase of the Foundation's over-all research program with cotton. In this regard, the Foundation is conducting additional cotton research involving different varieties, fertilizer treatments, irrigation methods, and cultural practices.

Cooper Young

Local Boy Is Named Delegate

A Farmer County boy has been elected 4-H Extension District 1 delegate to the annual State 4-H Council meeting.

He is Cooper Young, son of Mr. and Mrs. J. B. Young, who farm five miles east of Lariat. Young, who will be a junior at Lazbuddie High School next year, is also active in FFA work. He has been active in 4-H work for seven years.

Young was elected at the District Council Meeting held at Camp Don Harrington near Canyon on May 31, and June 1 and 2, by the 44 county delegates attending from 22 counties in this district. One boy and one girl attend from each county. The state meet is attended by

one boy and one girl from each district.

"I have held the district vice-presidency also," says Young. He held the office in 1958. Presently, Cooper is raising five acres of maize and five of cotton as his 4-H project.

The 16-year-old plans to enter college and, after finishing his education, work in the Baptist Foreign Missions program. Time and place has not yet been announced for the state meeting, at which Young will represent his district.

Dutch Quickel, Representing MUTUAL Life Insurance Company Of New York

have no ration cards. Were it not for CROP and similar organizations, these children would have little or no food except that given them by adults from their meager rations.

Those wishing to contribute wheat can do so at any grain elevator in their area. Elevator managers not now supplied with transfer blanks and receipts can receive them by contacting H. M. Nichols, Asst. Texas CROP Director, Box 518, Panhandle, Texas.

President, Congressmen Have Different Viewpoint On Sugar Import Problem

Farmer County area farmers are watching with interest the volatile sugar problem of America. There are some sugar beets grown here (and profitably) and farmers would like to have a chance to produce them, but markets are tangled up in international affairs.

The biggest problem is what to do about Cuba as a supplier of sugar to the U. S.

Highlight of the week's hassle over extension of the Sugar Act was an indirect slap by President Eisenhower at Congressman Harold D. Cooley (D., N. C.), Chairman of the House Agriculture Committee.

The Sugar Act, which allocates the U. S. sugar market among various domestic and foreign sugar producers through a system of quotas, is due to expire at the end of this year.

Main point of issue is whether a renewal of the Act should include authority for the President to cut a foreign sugar quota, particularly when Congress is not in session, should such action be in the national interest or be necessary for assuring adequate sugar supplies for American consumers.

The quota-slashing authority is viewed here as a possible tool for dealing with the Castro government in Cuba, which now has a U. S. sugar quota of more than 3.1 million tons, larger than any other supply-

ing area, domestic or foreign.

Although proposals to give this discretionary power to the President are sponsored by Democrats and Republicans in both houses of Congress, Congressman Cooley has bitterly opposed them.

At an executive session of Cooley's Agriculture Committee on Wednesday, the House group voted 20 to 13 to report Cooley's own sugar bill, which would extend the present Act for one year with only one minor technical change and without any Presidential power over quotas. One Democrat joined the 12 Republicans on the committee in opposition to the bill, which falls to equip the President with power to deal with Castroism.

Within 24 hours the President released an exchange of letters between him and Senator Wallace F. Bennett (R., Utah) in which the President said he attaches "particular importance to the recommendation that the President be given appropriate authority to adjust certain foreign quotas when he finds such action is called for -- either in the national interest or to insure adequate domestic supplies of sugar."

Senator Bennett had called the President's attention to an imminent automatic increase in Cuba's 1960 quota of about 160,000 tons--which would result from reallocations, under the present law, of expected deficits in the Hawaiian and Puerto Rican quotas.

"Moreover, there is every indication that the same situation will occur again next year, so a law extending the Act without change will not only confirm this year's windfall, but guarantee a similar one in 1961," Senator Bennett wrote to the President.

Informed sugar trade sources here estimated that the 160,000 ton "windfall" to Cuba would

net the Cuban sugar industry, now largely controlled by the Castro government, about 16 million dollars.

"It would be like handing Castro 16 million dollars on a silver platter--on top of the 310 million dollars the Cuban sugar industry will get from its present quota," one sugar trade expert said.

Following a White House conference, Congressman Charles B. Halleck (R., Indiana), House Minority leader, said the Cooley bill "is a pro-Castro bill which would give Cuba a better quota position than in the past."

The next battle over the Cooley bill is expected this week in the House Rules Committee, which schedules bills on the house calendar.

There is no profit in farm accidents. It is often hard to place a dollar value on a farm accident, points out the Texas Farm and Ranch Safety Council, because of the indirect as well as the direct costs which must be taken into account. But, they add, most accidents are preventable and farm profits can be increased by keeping accidents from happening.

How much of your food dollar gets back to the farmer? Economists say it is about 38 cents. The remaining 62 cents goes for the costs of getting the food in the form you want it, at the time and place you want it. Food costs less now in terms of minutes of work necessary to buy what you need to eat than ever before in history.

Texas Agricultural Extension Service Dairy Husbandmen say research shows that improper feeding and management of the dry dairy cow can reduce milk production as much as 20 to 30 percent during the following lactation period.

Farm tractors can be killers. If you don't think so, points out the Texas Farm and Ranch Safety Council, watch the reports on farm accidents. The next fatal accident, they warn, could involve you. Don't take chances that could lead to disaster.

THE FARMER

By W. H. Graham Jr.

This is the season of transformation for the Plains. Transformation from a flat, treeless, dusty plain to a horizon-to-horizon panorama of gold and green.

We think that from June 1 through July 1 there is a bigger change in the farmland of this part of the country than any other comparable 30 days.

The green wheat turns into waving seas of yellow grain. The milo, cotton, sesame, sudan, and other crops almost spring from the ground. It seems that they grow inches each day.

In a 30-day period, fields can transform themselves from sallow lister furrows to a cloak of verdant foliage. It is truly remarkable how fast the changes can come.

The weather has proved again that we are never satisfied. When our fields were dry and dusty through the spring, we wished that every little cloud that floated over would just open up and dump out some rain.

Until this weekend, when the sun began to shine once more, we moaned about all the wet weather. And it had been wet less than 10 days!

We're all happy the sun has come out again, but ere long, we'll be pulling for the clouds--just wait and see. People just weren't made to be happy.

Farmer County in a nutshell: population 9500, school enrollment 2459, farm families 1000, farms 1300, gross farm income \$30 million, land available for cultivation and grazing 540,000 acres, in cultivation 450,000, irrigated 400,000, irrigation wells 2400.

Farm tractors 3700, trucks and pickups 3000, irrigation motors 2550, combines 700.

In an average year we have 240,000 acres of grain sorghum (irrigated) that yields 18 million bushels, 10,000 acres of dryland that yields 160,000 bushels, 42,500 acres of cotton that yields 53,125 bales.

Our irrigated wheat will produce 3,040,000 bushels from 80,000 acres, and the 15,000 acres of dryland will account for 120,000 bushels.

It looks like the farmers of this part of the High Plains have finally developed the "touch" for getting huge yields of wheat under irrigation. For several years it was thought that fertilizing and wheat was not a paying proposition. And look how things have changed.

Just six or eight years ago about the only folks getting over 50 bushels an acre were a few farmers in the "hardlands" part of the county. Today, you will find big yields all over the county, on both tight and sandy soils. It is amazing what technology has come to our irrigated wheat production.

If we were still depending on Mother Nature to produce a wheat crop for us, we are afraid that 1960 would be a very disappointing year.

Texas Panhandle Will Remember CROP With Wheat

Farm families, elevator managers, ministers, bankers and others of the Texas Panhandle are working together for CROP during the 1960 wheat harvest.

As the wheat comes into the local grain elevators, many producers have a share of it put aside for the Christian Rural Overseas Program. Following

the harvest local CROP officers will check these elevators and arrange for the movement of the grain to those in need overseas.

Many refugees from behind the iron or bamboo curtain are kept alive by bread from wheat contributed thru CROP. Children born in refugee camps
