attend because of illness.

The members of the Hedley P. T. A feel that we have had a very successful year. We say suc cessful, not that all has been accomplished that we should like to have had accomplished, nor have things been done in a big way, but with a hearty good will fellowing Radio stars each member has put his shoulder to the wheel to do his part of the work at hand. The splendid ing cooperation within the body has indeed been gratifying

A goodly number of our earlier meetings of the year were held day in the evenings. As a result we had much better attendance, es pecially of the fathers, than we had when sessions were held in the afternoons.

We have 86 members, 36 of which were obtained by a special membership drive put on by the pupils of the grade school. A prize of a picture was given the room securing the most members Much friendly competi tion was engaged in with the re sult that the fifth grade was awarded the prize.

A Hallewe'en carnival was a grade school Xmas program al so brought a substantial amount into the treasury.

Rhythm band instruments for our new music department were purchased No one, knewing the genuine enjoyment as well as the educational advantage this item has been to the children. can say that the money could have been spent in a better was.

To insure better attendance at regular meetings a one dellar reparents in attendance for each

Other items paid for by the association were: Playground equipment, medicine cabinet supplies, 2nd grade lunch esbinet Interscholastic League fee of \$10 supplies for Centennial exhibit on March 2 at Clarendon, sup plies for high school library, contribution to Endowment Fund and Founders Fund.

The association is closing the present year with high hopes for the year 1986 '87.

THE SUNNY SIDE OF LIFE

Cran Comics That Will Amuse Both Old and Young

PUZZLE SCIENCE Why certain Indians of Mich!gan

PIERCED SKULLS OF DEAD INDIANS

bored neat holes in the skull and leg bones of some of their dead is a problem still without a good clew to the answer, Dr. W. D. Hinsdale, Museum of Anthropology, told the Michigan Academy of Science, Arts and Letters. He reported on several such skeletons found near Flat Rock and Farmington.

The leg bones from near Farmington are the first to be found showing this peculiarity having small holes bored near the joints. This gives some plausibility to the theory that skeletons of the dead were strung together like jointed dolls and used in some ceremonial fashion, at feasts of the dead. Some tribes, especially the Hurons, are known to have held such religious or magical ceremonies, Doctor Hinsdate

The skull holes, which have been found from time to time, were obviously bored after death. The holes average about a half inch at the surface and usually taper neatly inward. Apparently they were drilled with a stone instrument similar to an arrow head. They occur in the skulls of men, women and children, Doctor Hinsdale reports.

The skull openings were definitely not trephinings, which is a surgicat process ordinarily performed on living persons and involving the sawing out of a circle or "button" of bone, either for medical reasons or to secure a magical amulet. Trep-hining was done by the Indians, however, and Doctor Hinsdale has one such skull which shows that healing and progressed after the op-

eration Various theories have been advanced to explain the strange skull borings. One is that the holes were intended for strings or throngs, by which the skull could be carried about, but none of the openings show signs of wear to support this, while the holes are often in inconvenient places for such a purpose,

Onion Sold as a Lily Bulb Legally in New York City

An onion is a lily, not only bo-

tanically but legally.

A seed merchant tells that some time ago a bright young man loaded a pushcart with crimson bulbs, wheeled them to a New York ferry station, and did a lively business selling "allium cepa lilles" to homegoing commuters, relates the Milwaukee Jornal.

Somebody had him arrested; said he was peddling ordinary red onions. He admitted that, but the judge discharged him. An allium cepa lily, declared the court, is an onion

GIVES POINTERS ON HENS NOW LAY **FEEDING OF CALVES**

High Prices on Good Cows Puts New Value on Growing Profitable Heifers.

Losing calves or stunting their growth takes on a far more serious air today than it did a few years ago. Good milk cows can only be developed from thrifty growing helifers and to-day's higher prices for good cows has automatically put more interest and care into raising helifer calves.

In line with the trend of the times. W. R. Arends, well-known dairy authority of the Purina Mills, says, "It has long been known that vitamin A and D are extremely essential in the ration for raising the right kind of heifer. Now with the recent discovery of concentrated vitamin A, calf raising has become less hazardous. This concentrated vitamin A is being passed along to dairymen by the Purina Re-search Farm in the form of a new in-gredient called Pur-a-tene, added to every sack of Purina calf feed.

First Feed Should Ba Milk In makin, feeding recommendations for the first few days of a calf's life. Arends says that the first food should be calf's own mother's colostrum milk. This milk is laxative and performs the job of setting the digestive system in motion. If it is felt necessary to take the calf from its mother before nursing, and if the milk is fit, Arends advises milking the cow and feeding the calf by hand. He says a bottle and may be necessary although many dairymen teach the calf to drink from a pail the first feeding. If for reason of disease, the mother's milk cannot be used, milk from a cow that's in the first part of her lactation period

"Nature has taught the calf to look up for its milk," according to Arends, "yet when the dairyman teaches it to drink he expects the calf to hold its head down. Remember, the calf must be taught every step of the way. The earlier the calf is started, the easier it will be."

Overfeeding Milk Is Dangerous Another condition Arends points is that the baby calf has a very deli-cate digestive system and overloading with milk is almost sure to bring ouble. He advises starting with

about three pounds of milk daily for small breeds, and about four pounds daily for the larger breeds; gradually increasing the milk up to 8 pounds daily by the last day of the week for heavier breeds and 7 per day for the smaller breeds. Along with the milk the calf should be taught to eat dry feed as quickly as possible.

Easy Way to Get Calves Eating Arends. "Calf Chow in checker form is the easiest and safest dry feed on which to start the calf. A few checkers should be placed in the calf's mouth directly after feeding it milk With checkers and a grain ration in a trough before the calf at all times, it will soon get the habit of taking feed as it needs it. Fresh, clean water and good alfalfa hay should be available at all times. On this kind of feeding, it won't be long until the calf is well on its way to a profitable first-calf helfer."

"If interested, more information can be obtained on raising calves from the latest Purina dairy bulletin, available from all feed stores handling Purina feeds."

EGGS TO ORDER

Research Reveals Through Control Fee ling Poultry Raiser Can Get Egg Quality Wanted.

The housewif who has a backyard flock can have her eggs to order, according to C. S. Johnson, head of the Poultry Department of the Purina Mills. He points out that the backyard her can be made to lay eggs

PREMIUM QUALITY EGG. (FIRM , UPSTANDING)

with the uniform light lemon-yellow yolks which stand up high and round, in the center of thick, clear whites. The eggs will have that delicate, rich flavor, that go so far beyond mere freshness. They will be made richer vitamins, too.
"Kitchen testing has brought out a

marked difference in the quality of eggs," says Johnson. "Any housewife knows that eggs having a superior body of white give an added rise, fluffiness and smoothness to the body of a cake. She knows, too, that qualky of eggs shows up in many other ways of eggs shows up in many other ways of cooking. Take poached eggs, for instance. Those with thin whites separate from the yolks and about all that is left are poached yolks. When the eggs have thick whites, clinging to the yolk, there is a globular, meaty portion of poached white around the yolk. yolk-a pleasing, appetizing appear-

Quality Determined Before Laying

In discussing the matter of getting hens to lay eggs to order. Johnson says it's a matter of controlling the feeding of hens. He adds, "The real quality of an egg is determined before it is laid. If the hen doesn't get in her feed just what is needed to build a quality egg, you simply cannot expect the production of a quality egg. Frankly, if you want your hen to lay eggs to order, you have to give them. eggs to order, you have to give them the things in their feed to make eggs

"After years of research at the Purina Experimental Farm, testing this and that ingredient, a combination has been developed that gives bens what they need to lay eggs to order. The yolks are light lemon-yellow and stand up high and round in the center of thick, clear whites. Not only are they rich in vitamins but they have a delicate, rich flavor when

"This special feed to get hens laying eggs to order, called Layena, is water. Contrary to what might be ex-pected, it does not cost any more to feed hens on this special feed. a matter of fact, considering the quality of the eggs and the increase in the number of eggs produced by the feed, 4t really costs less."

STAR DUST

Movie · Radio *** By VIRGINIA VALE **

ARMIDA, the fascinating little Mexican girl who has made a name for herself on the screen, the stage and the air (at present she's heard from coast to coast on the "Paris Night Life" program), recently returned from Hollywood to New York with a lot of information about the radio programs which screen stars like best. She'd been making shorts in the movie center, but she checked up on the broadcasts between

She found that Charlie Chaplin doesn't listen to the radio comedians; he likes the broadcasts

Chaplin

dette Colbert, Ginger Rogers and Fred Astaire .arely fail to listen to Major Bowes' amateur hour.

every time. And Clau-

Marlene Dietrich got what she wanted again. After fussing with Paramount over "I Loved a Soldier," and announcing that she'd go to Europe as fast as she could get there, to make a picture, she stayed in Hollywood. did some effective talking, and landed the role of leading lady in "The Garden of Allah," which Merle Oberon was supposed to make. Which means that now there's even less love lost between the two. Miss Oberon probably will do "Dark Victory" now.

-*-Doris Dudley, whom you'll see before long in an R K O picture, believes that you've got to be goofy if you're going to get along either on the stage or on the screen. As she's a remarkably clever actress, (though she has had very little experience) she is likely to become one of our most important movie stars-so don't miss her first appearance on the screen if you like to be in on film history.

Ann Sothern had a grand time m New York, where she once appeared in musical comedy as Harriet Lake. Like all new arrivals from Hollywood, the one play she wanted to see was "Queen Victoria," Helen Hayes' current success. And like all the others, she

She is so pretty that people turn on the street to stare at her; they don't recognize her, as a rule, but she has no iliusions about her own greatness so that, doesn't bother her-and unlike some of her co-workers, she doesn't go in for dark glasses and other similar invitations to be recognized as a celebrity.

Fred MacMurray seems to be the fair haired boy on the Paramount lot

these days - perhaps because Gary Cooper seems inclined to sign with Samuel Goldwyn when his present contract expires Fred has a new seven-year contract, and is slated to make three pictures that were originally intended for the la conic Mr. Cooper.

people; she was honeymooning with her bridegroom, a young newspaper man, before most people realized that she knew him. If you want to congratulate her, address her as Mrs. George E. MacDonald.

They have four pictures lined up for Eleanor Powell when she feels well enough to begin work again, and how she dreads them! She feels that she gave everything she had in her first one, and doesn't see what she can do now that will interest those of us who sit out front.

Frank Parker, whom you've heard on the air in any number of programs, is said to receive more proposals than any other radio star. He claims that they're attracted not by his romantic tener voice, or by his personality, but by his salary; it runs into four figures each week

ODDS AND ENDS . . . Dolores Del Rio is on her way to England to make a n picture for Douglas Fairbanks, Jr. . . . Grace Moore also sailed, still talking about having to work with a cow in her latest picture . . . Walt Disney is still searching for amateur artists whom he can train to work for him . . . Stoopnagle and Budd will take Fred Allen's place on the air this summer . . . If you like "The Ghost Goes West" you're in good company; Ex-King Alfonso of Spain sate It in Paris, and liked it, too . . . Harold Lloyd is a bowling enthusiast . . . And his "The Milky Way" is one of the funniest pictures he ever made.

FLOOD CRISIS MADE NEW HEROES

"Backstage" Scenes Revealed Courage and Resourcefulness of Relief Workers in Rescuing Sufferers.

By ALWYN W. KNIGHT

HE sound rose to a wail: "Where's Mummie?" It was an unmistakable cry for help, shrill with mounting hysteria.

The woman paused, wheeling toward the abandoned house from which the sound had come. An arm brassard bearing the emblem of the Red Cross identified her, told her business here in the deserted street running knee deep with muddy water. This entire section of residential Pittsburgh looked as though it had been floated out to sea.

"Where's Mum-mie!" It was a scream now; there was no time to lose. The relief worker plunged to the rescue and reappeared a moment later with a parrot, a badly scared talking parrot, in her arms.

Behind scenes with America's relief @ agencies changes the complexion of a flood. The human little incidents tell the real story. Humor, pathos and inevitably a quiet heroism do not penetrate the daily barricade of headlines. This is especially true of this spring's great eastern floods which have taken a toll of nearly 200 lives, caused property damage scaling to one half biltion dollars, and driven hundreds of thousands from their homes in 13

states. The runoff from unseasonal snow banks started it. Ice floes, gorging miles of the East's great waterways, broke, froze and broke again. The Potomac, the Androscoggin, the Ohio

years with a broken hip, the flood meant lasting peace.

Red Cross workers, evacuating familles from the city's danger spots. reached their home. The woman would not budge. Her husband, grimly determined, stood guard before her, barring the way.

It was necessary to knock the husband out to get the woman into the rescue boat. After she was taken to a hospital she went on a hunger strike. The husband, meanwhile, had disappeared, fearing arrest for resisting reseue.

Several days passed and the woman

Red Cross Volunteers House, Feed and Care for Homeless Children in Pitts burgh Flood Area.

and the Susquehanna-these and other | began to weep for her husband. For of rivers and floods at the United States weather bureau, Washington, spent a lot of time on the phone answering questions.

JOHNSTOWN THREATENED

And then the rain came, deluging the northeastern watershed, converting melting snow into runaway water by the ton, smashing river ice free of banks. Surcharged rivers from Maine to Virginia and from New Jersey to Ohlo, broke bank and leveled out, an ever-widening stain which brought desolation to all it touched.

Johnstown was threatened with a duplication of the debacle of '89. Pittsburgh was isolated overnight, its light and power disrupted, its airports suddenly vast lakes. Wheeling, W. Va. was struck with such devastating suddenness that 10,000 marooned men, women and children were trapped as water pyramided to the second floors of homes. Other towns, other cities, leaned against the invader's sweeping current.

Organized relief took the field, led by the American Red Cross, which quickly deployed 300 trained disaster workers to key points of flooded areas. The United States Coast Guard sent a fleet of power boats to churn up and down the main streets of America's most densely populated centers. Countless other organizations and groups pooled resources to avert a major

But the press of the nation has already given a composite picture of flood details. Day after day headlines paced the southward flow of each crest and told vividly of new areas threatened. The public was brought to the river bank to "view with alarm," but the very breadth and scope of the catastrophe made it impossible to bring this public to the individual home, show a closeup of a Red Cross refugee camp, portray the interior of a crowded rescue boat plying from house to house in the half light of a sleet-brought dawn.

The real story, however, has been told. It has come in snatches from the lips of the men and women who were there, who still are. It has been told in part by volunteer workers, by trained workers; by the rank and file of the great army of rescue and rehabilitation.

WANTED TO DIE

It happened at Springfield, Mass. Rising water trapped a family of three. There was a woman who weighed 250 pounds, her ninety-sixyear-old grandfather and her husband. The circumstances were unusual in this way: these people had had time to move out. But they wanted to Ge. To the woman, bed-ridden three

turbulent giants began to shake them- the first time she was receiving mediselves loose and come alive. Without | cal care, and life was worth holding saying much about it, people began on to. The Red Cross located the missto wonder what would happen if it ing husband and a touching reunion should rain hard, and the department | took place at the side of the cot in the hospital ward. The woman will be give a new start in life . . .

Sometimes the line between drama and melodrama is drawn with a sure. bold stroke. This is true in the following instance, A Red Cross nurse who is a war veteran set out for Washington for much needed hospitalization. Second Lieutenant Mary Scanlon was trapped by rising water in Bellaire, Ohio, enroute. For 48 hours she washed dishes and tended frightened children at a refugee center, putting the need of others before her own pressing need for rest and medical care . . .

During the first flood crest the Coast

They had lost everything, yet they could joke about their "strays" . . . A section of Winchendon, Mass., was isolated when a wooden bridge was shaken loose and floated down-river. Residents of the section took to boats and chased the bridge, gaining slowly but surely. Bank watchers hooted en-

their dwellings and spent the better

part of a day stalking service stations

and sheds in mid-stream. The forti-

tude of these people was remarkable.

couragement. The bridge was caucht, towed back and moored over its foundations. When the water receded it dropped into place so accurately that traffic immediately crossed Two residents of Wheeling, W. Va., are dead. They contracted pneumonia while engaged in rescue work. They voluntered their services to aid the plight of their neighbors, these men; and paid for their heroism with their

also be reckoned in terms of its after-THOUSANDS NEED HELP

math

lives. The desolation of a flood must

With flood crests receding, loss to the individual family becomes more apparent. It is no longer colored by excite ment, by terror. There may be some thing almost majestic about a house, immersed to its gables, gallantly straining against raging torrents. But a home has a ghost-like, a half buried high-and-dry look when the water has drained away.

Furniture is warped and broken Mud and silt are piled feet deep over once choice belongings. Plaster has flaked away, pyramiding the soggy mess below. Walls have buckled; plumbing and electrical fixtures must be relegated to the junk pile. The home is dead with its mouth agape. and its window eyes have been poked out, and it is no longer a home at all. Small wonder that flood sufferers without resources must be helped to face the future. The Red Cross reports that in Wheeling alone, 15,000 families will require some form of household goods or home repair assistance . . .

An expectant mother at Powhatan Point, Ohio, was in desperate need of essential supplies. She lay on a mattress in a dance hall in the midst of 75 other refugees. Lamplight flickered dimly and couples moved about the floor-not in the dance but to keep warm. The Point was practically iso lated.

Somehow a relief truck fought through from Wheeling carrying the essentials for the stricken woman. little later she gave birth to a child, both lives doubtless saved by the dogged persistence of relief workers who traversed impassable stretches of what had once been roads .

The United States Coast Guard rescued 10,000 persons from Wilkes-Barre and Kingston homes. The Susquehanna loops here, and flood waters spilled across at right angles, closing the loop. There resulted some of the swiftest and most treacherous currents ever encountered by small craft.

The Red Cross chapter at Wilkes-Barre, Pa., established a first aid station in a trolley car placed at the end of the Market street bridge. This made light and heat possible. sicians were in charge, aided by Red Cross nurses and the Chapter First Ald crew of 45 men. As Coast Guard boats Guard cutter Kenosha, under Capt, brought refugees to the bridge, they

When flood waters sideswiped Hadley, Mass., homes and outbuildings were swept downstream. Sheds and roadside stands were tumbled end over end for nearly a mile. Citizens of the community formed a posse to bunt

hospital or treated on the trolley if requiring medical attention . . .

The flood is over. Rivers in practically all affected areas are homeward bound for their banks. Mass feeding and shelter stations are caring for com paratively few these days.

But rehabilitation has just begun. For long, weary months relief agencies will interview individual families and survey damaged homes. This, the heartbreaking aftermath of catastrophe, is the version of the flood tale which will live longest in the memories of families who have lost the bulk their possessions. The rest of the

The Weight Reducing Drug

HEN a drug will reduce weight without the individual having to cut down on his food or increase his exercise, naturally it is going to become very popular. The fact that skin eruptions, digestive disturbances and even death in a few cases has occurred from its use has apparently not less-ened the demand for the drug.

Dr. W. W. Boardman, San Francisco, in the Journal of the American Medical Association states,

"I have used the drug with success in a number of cases. At the present time dinitrophenol is quite generally accepted as an adjunct or help in the treatment of overweight, although among the more conservative physicians it is used cautiously and

with a certain degree of fear. I myself used it in several cases with satisfactory results. However, in the last two weeks I have seen two cases of rapidly developing cataract in relatively young women and have had reports

of four similar cases." Doctor Boardman then records these

The first case used dinitrophenol for 20 months, reducing her weight from 237 to 161 pounds. Within one week after the dimness of the eyes appeared only light and dark could be distinguished.

The second case used dinitrophenol for eight months, reducing her weight from 217 pounds to 165. Dinitrophenol was discontinued for eight months and the weight went up to 198 pounds. The drug was given again for two months, when an eye examination showed beginning cataracts. Vision failed rapidly so that within a month there was almost complete loss of vision in the right eye.

Other Cases Similar.

The third case used dinitrophenol from time to time for eight months with a satisfactory loss of weight. However her vision became dim and within 30 days had progressed to almost complete blindness and with fully developed cataracts.

The fourth case had been taking dinitrophenol without a physician's supervision, for several months. She also has shown rapidly developing cataracts.

Doctor Boardman comments as fol-

lows: "As the occurrence of cataract at this age is extremely rare and the one common factor in all four cases has been the use of dinttrophenol, it would certainly seem that until the question of the relationship between the dinitrophenol and the rapidly developing cataracts in young women is

settled, the drug should not be used." In the same issue of the Journal of the American Medical Association, Drs. Warren D. Horner, Richard Barr Jones, and W. W. Boardman, San Francisco, report three cases of cataracts following the use of dinitrophenol. The case were women aged, fifty,

thirty-seven, and forty respectively. They report that the age of the patients and the absence of any other cause suggest dinitrophenol as the cause of the formation of the cataracts and loss of vision. However just how dinitrophenol causes the "drying" process in the lens of the eye is not definitely known but is being investigated by these physicians. The overheating of all the body tissues, loss of water in the tissues, the lack of some food in the patient's diet, are all under consideration as causes.

Advise Discontinuance.

"Under the circumstances, further use of dinitrophenol should be discontinued pending further study of its effects upon the body, aside from the reducing of weight."

Now, the above information and comments do not mean that dinitrophenol passes out of the picture as a weight reducer. As the Journal quite properly states that as dinitrophenol has not been standardized some of it may centain impurities. Also the cataracts may have resulted from an unbalanced diet which often occurs when the food intake is reduced greatly.

Thus it has not been established whether the cataracts occurred be cause of the dinitrophenol or because of some other undetected cause.

The point then is that dinitrophenol as at present manufactured and used must be considered a "dangerous"

X-Ray Shows Up Appendix

Patients may sometimes wonder why their physician recommends an X-ray examination of the stomach and intestine when the trouble is likely to be in just one or the other and not in both. They feel that the physician should be able to locate the trouble exactly and not put them to the expense of the X-ray examination, reasonable though it may be.

As a matter of fact, when there is trouble in the abdomen, in addition to the X-ray of the stomach and intestine, an X-ray examination of the gall bladder by means of a dye and the X-ray is really what the physician would like to have done to enable him to learn more as to the cause of the

Swagger Knitted Coat Done in Simple Stitch

She's mistress of all she surveysand you're certain to be, too, if you elect this swagger knitted coat for easy making and all-round wear this spring and summer. So easy to knit in a simple loose stitch, with stockinette stitch for the contrasting border, you'll find Germantown wool knits up very fast.

In pattern 5534 you will find complete instructions for making the swagger coat shown in sizes 16-18 and 38-40; an illustration of it and of all the stitches needed; material

requirements. Send 15 cents in coins or stamps (coins preferred) to The Sewing Circle. Household Arts Dept., 259 West Fourteenth Street, New York, N. Y.

Whitens, Clears The Skin Quickest Way

HOW CARDUI HELPS MONTH AFTER MONTH Where there have been severe pains every month from functional

disturbances resulting from poor nourishment, Cardui has helped thousands of women to obtain relief. "I suffered a great deal with pair.

in my side and a weakness in my back," writes Mrs. Walter Page, of Evansville, Ind.

"Each month I would suffer all over and would have to go to bed. One of my neighbors told me how Cardui helped her, so I took it and it helped me. After taking eight bottles, I was better. I surely can recommend Cardui for weakness and pain."

Of course, if Cardui does not benefit YOU, consult a physician.

Cultivating Poise

Polse is fostered by cultivating a good deal of "don't care."

Wherein the Fabulous Past of Louisiana Lives Again

JAPOLEON 'III, messing around Germany with the Franco-Prussian war, an experiment in arrogance that cost him his crown, annihilating the Second Empire, while making a reconnoissance on German soil, halted at the house of a farmer and put up for the night, occupying the guest room. Came the dawn. Out rolled his majesty, crying aloud for coffee, which the granger, Herr Cook himself, served, courteously declining all offers of French gold in payment. Thereupon, the visiting Emperor drew from his waistcoat a silver full-jeweled watch, made a sedate bow and handed it to his host.

Following Sedan, Napoleon III abdicated. The German and his frau sailed for the United States, settled in Wisconsin and raised a family, consisting of two sons and one daughter, removing to Morehouse parish, Louisiana, while the children were yet in shorts, Albert the eldest son, famous as one of the finest horsemen and best pistol shots of his time, died in his twentyseventh year. Hermann, the second son, after running the gantlet of frontier activities through his early youth, finally went into the lumber business, penetrating regions where virgin forests of eyprus, until his coning, swamp-guarded against invasion, finally fell to his ax and saw.

Brave Pioneer Days.

Here in Houma, in the midst of ais family, enjoying the well earned repose that is his due, I came upon the conquerer of the cyprus swamps, heard his stories of the brave old days when the pioneers trekked into new places and grappled with nature in the raw and marveied that so dramatic an era could be reviewed with such casual unconcern. Indeed, Hermann Cook, for all the emotion he displayed, lolling on an easy chair, recording these heroic yesterdays, might just as well have been chatting about a new way to boll eggs. But to me it was like having an interview with Marco Pelo or Daniel Boone,

"When my brother Albert and I were kids up in Morehouse parish," he said, "it was a country set in a wilderness not yet explored; a dominion crawling with wild game of every sort indigenous to that zone. The men were giants in stature and in spirit and the women fit mates to share with them the ordeals of life. We shot deer on our front porches, bear in the backyard, squirrels, quail, fox, coons, possum and the like, by the cartload. Horsemanship and the use of firearms was second nature. My brother Albert, mounted, could run down a deer at full gallop, seize the creature by the antlers and cut its throat. No better pistol or rifle shot than he ever lived. Without apparent aiming, he was deadly from any position.

Gigantic Wild Boars.

"The swamps in Morehouse parish were literally alive with wild hogs. I have seen razor backs in countless numbers wallowing and swimming the bayous, the surface of the water broken as far as the eye could reach. Some of these animals, especially the boars. weighing close to 750 pounds. In my boyhood. I saw one that weighed at least 1,500. It is a curious fact that a swimming wild hog, if suddenly stricken with panic, will lash out its front feet with such violence and rapidity as to cut 22s own throat into ribbons, and bleed to death. Many times I have witnessed this swamp tragedy. I know of nothing more terrific than a stampede of terrified, snorting razor backs through under brush. It was sure death to be caught in their path, even when mounted.

"Not, however, until engaged in lumbering cyprus logs did I come to appreciate the mighty forces of nature or the vastness of the outdoors. With a crew of negroes numbering eight or nine hundred I felled and brought out of Morehouse and Terrebonne parishes. 12,000,000 feet of logs per annum for a period of 11 years, building hundreds of miles of canals and clearing end less bayous; a continuous battle with the omniverous swamps.

Cypress King's Loss.

On one occasion, while hauling 80 60-foot trees through the swamps on a 3,000-foot cable running over a drum under steam power, the logs stuck and started to sink. Powerless to save either the logs or the cable, there was no alternative but to let go all holds and give up. Within the hour, those 80 logs and 3,000 feet of 114-inch cable, the latter weighing about six tons, had completely disappeared, the end vanishing into the mud like a mighty angle worm returning to its lair. Total loss \$2,000. That was in Terrebonne parish where I cleared a cyprus stand 17 miles long by three wide. It was there that we captured with the steam shovel a 750pound loggerhead turtle from which ten men over a period of five days had three meals a day. We didn't know monster was concealed in muddy depths until he came up in the jaws of the scoop. Some fishing, I'll say. And those were days when one man could stow two pounds of meat at every meal, which means 300 pounds mmoth terrapin out of one shell." Copyright.-WNU Service

How an Expert Handles Bees,

two weeks are lived almost exclusively

within the hive, but thereafter the bees

pass most of the daylight hours in the

fields when the weather is good, in

search of pollen and nectar. Since the

beekeeper rarely opens the hive more

than once a week, there is little oppor-

tunity for the bees to become acquaint-

Some persons are so constituted that

ed with their owner.

Prepared by the National Geographic Society.

Washington, D. C.—WNU Service. THERE are some 800,000 bees in the United States, producing about 100,000 tons of marketable honey annually. And yet the

bee is not a native. There were no bees in North America when the Spanish explorers arrived. Settlers coming in later expeditions brought them, and at first the In-dians called them the "white man's fly." Since then they have followed man in his migration and settlement of every part of the United States and

Until recently these insects' chief usefulness to man was their production of honey and beeswax-no mean service, since for centuries honey was virtually the only available sweet. But now, as pollinating agents, they perform a far more important duty.

In the pioneer stages of American agriculture, bumblebees and other native pollinating insects that fed upon nectar and pollen were plentiful everywhere. But the planting of vast areas which once were forests, prairies, and swamps with fields of grain, orchards, and gardens upset the delicate balance of nature.

Widespread cultivation of single plants in huge acreages brought about an abnormal condition of insect population. Injurious species, afforded an enormous food supply, prospered and multiplied until now serious insect pests menace almost every important

Insecticides must be used to protect farm crops, particularly fruits. Unfortunately, these materials kill not only harmful but beneficial insects. The toll includes honeybees and other wild bees, as well as the efficient bumblebees-all the insects that carry pollen from one blossom to another.

Plants Need Pollination.

Even yet we scarcely realize the dependence of many plants upon insects to effect pollination. The cutting of wood lots and the clean cultivation of our fields have added to the difficulty of survival of our useful insects, with the result that more and more fluence upon this part of her family. dependence has to be placed upon the honeybee, the only pollinating insect

that can be propagated and controlled. Some plants bear only male flowers, which produce pollen but no fruit, and female flowers in the same species occur on a separate plant. To set fruit, pollen from the male plant must be carried to the female flower.

Some plants simultaneously bear both male and female flowers, but still require cross-pollination to set fruit. Then there is a third class in which both sexes occur in the same blossom. Some of these plants can set fruit with their own pollen. But in many plants pollen from another is necessary to set a full crop of fruit or seed.

Although the honeybee is by no means domesticated, it is easily controlled. Consequently, millions already are being moved from one section of the country to another and placed in orchards and on farms. Bee men in the South even offer for sale a pollination

package, a wire cage filled with bees. The grower distributes the requsite number throughout his orchards, opens the cages, and leaves the rest to the bees. Hundreds of full colonies are rented to orchardists during the peak of the blooming period. The bee has also largely replaced the camel's hair brush in pollinating cucumbers under

Were it not for the work of the honeybee, most of our apple, pear, plum. and cherry orchards would bear poor crops, the growing of certain forage crops would be unprofitable, and the variety and quantity of our vegetables

would be materially reduced, Found in Nearly All Countries.

Honey and beeswax are produced over a wider geographical range thun any other agricultural crop. There is scarcely a country in which honeybees are not kept. They inhabit the Tropic and Temperate zones, they are found in the deserts, on the mountains, in the plains, and in swamps, and as far north as Alaska.

Scattered over the world are several distinct races, such as the Italian, Carniolan, Caucasian, and Cyprian. All races, everywhere, react in almost the same manner. A skillful beekeeper can succeed in Australia as well as in Ohio. provided he keeps an eye to the veather and studies the local flora.

If honeybees are properly handled. mere is no more danger in caring for them than in raising chickens. However, the belief that bees learn to know heir master and will not sting him is

During the active season the average life of a bee is six weeks. The first egg-laying machine.

Monkey Is Able to Reason, Says New York Scientist

Can monkeys reason? Without taking sides in the man-monkey hypothesis, Dr. Raymond L. Ditmars, curator of reptiles and mammals at the New York Zoological park, offers this story in "Strange Animals I Have Known" about a small ringtalled monkey from South America who shared a cage with a young Brazilian wild dog and a coati, which is a consin of the raccoon:

An old lady visitor to the Broax zoo used to feed the trio lumps of sugar daily. The wild dog and the coati, with their strong teeth, could eat a lump three times as fast as the monkey. In this way they got by far the largest share of the sugar.

The monkey got mad. But before with wide contrasting cuffs and a long and by his own quick wits, he solved the problem. He dipped his sugar lump in the water trough, then swallowed it with a few sharp smacks of his tongue, and was back at the wire asking for more long before his two rivals had been able to down their dry morsels!

IN THE NEW KELVINATOR refrigerator Values have been made

Visible

For the first time, users of old electric refrigerators will be ready to replace them, when they see the new 1936 Kelvinator. For Kelvinator has stepped so far ahead that it has made millions of refrigerators obsolete ... especially as regards real refrigeration at any kitchen temperature; cost of operation; and long life of the mechanical unit.

With Visible Cold, you know the new Kelvinator gives you safe refrigeration, because you can see it-every time you look at Kelvinator's Built-In Thermometer

With Visible Economy, you know it's economical to operate, because Kelvinator is sold with a Certificate of Low Cost of Operation

With Visible Protection, you know it's dependable, because you will be given a Five-Year Protection Plan.

Come in and see this new Kelvinator. Find out how low it is priced - how easily you can buy it. You, too, will say it's your next refrigerator!

Ford - FOR ECONOMY

"The Ford V-8 uses less fuel and oil for the power it gives than any other car we have ever made

AND ITS UP-KEEP COST IS THE LOWEST"

ENTHUSIASTIC sales talk often begins and ends with gasoline mileage. Some salesmen would like you to believe it is the whole story of automobile economy. But drivers ought to know better. For, the fact is, it's way down the list.

The big items of car economy are low first cost, low up-keep cost and low depreciation. Savings here can make a great deal of difference in cost per mile. Gasoline mileage is more of a talking point than an economy factor.

Check up and you will find that the difference between 17 and 19 miles a gallon is less than \$10 for a whole year's average driving (8400 miles at 18 cents a gallon). Here are the big items that make the Ford the most economical car:

More value for every dollar you pay. Lower cost for repairs and service. Long life. Slow depreciation.

Quality means economy and the 1936 Ford V-8 gives you more real quality than any other low-price car. No other car under \$1645 has a V-8 engine. No other low-price car has Center-Poise Riding, safe, sure mechanical brakes and Safety Glass all around at no extra cost.

\$25 A MONTH WITH USUAL LOW DOWN-PAYMENT, BUYS ANY NEW FORD V-8 CAR ON NEW UCC 1/8 PER MONTH FINANCE PLANS.

SYNOPSIS

The Duke, a pleasant, likable youth of twenty-three, jobless and broke, enters an unoccupied summer home in Southampton, seeking shelter from a terrific rain storm. He makes himself at home, Six years ago his father had died in China, leaving the lad Barry at home. Six years ago his father had died in China, leaving the lad, Barry Gilbert, to fight his way back to the States. He did not recollect ever having had a mother. Dozing at the fire-side, he is startled by the arrival of a butler, Willetts; a chauffeur, Evans; a cook and a maid. He learns that the son of the owner of the house, Jack Ridder, whom the servants had never seen, is expected. He decides to bluff it out. His supposed parents have left for Germany. Next morning he is given a letter for his "mother." He opens it and finds a message from the real Jack, saying he could not come, and returning a hundred-dollar bill. The boy's father had pensioned him into obscurity. Barry pockets the money, intending to rery pockets the money, intending to re-turn it later. He orders Evans to take him to Montauk, intending to disappear there. On the way he assists Judge Hambidge and his daughter, Patricia. Hambidge and his daughter, Patricla-whose car had broken down. Believ-ing he is Jack Ridder, she invites him to dinner the following Thursday. Barry returns to Southampton, decid-ing to stay a bit longer. Mr. Ridder, Sr., through his newspaper, the Globe, accuses Judge Hambidge of taking or-ders from Tammany Hall in a con-demnation proceeding.

CHAPTER II-Continued

On Wednesday-eighteen days after his advent at Southampton-the Duke got a letter from Mrs. Ridder.

"My Own Dear Boy: I write this as we are leaving Cherbourg, and shall try to post it at Southampton. How I rish it were our Southampton, and that were about to see you. Your radio nessage arrived duly. I understood, of message arrived duly. I understood, of course, and it made me happier than I have been in years. Don't laugh, but I have slept with it under my pillow. Think how long it has been since I have had any word from you, save for that hurried, worried talk at the hotel. I wanted to write you at once, but it has been hard to get a minute away from your father. He really is very ill, and a little irritable, and the doctor mays any shock might prove serious.

from your father. He really is very ill, and a little irritable, and the doctor says any shock might prove serious. Of course, I want to tell him about you, but perhaps it's as well that I can't just yet. We shall be away until the end of July, at least, and perhaps longer. By that time, I shall have had such good news of you as will enable me to win him over. He does care for you, dear. As much as I do. Perhaps more, and that is why his pride has been hurt, and he has seemed so hard.

I do hope you have given up drinking. That has been your real enemy. And I do hope you will find work. Nothing else will go so far in persuading your father, And we must persuade him soon. He must change his will. It isn't the money I'm thinking of so much as its bitterness. I could bear your being 'cut off,' but I have begged him for years to take out the paragraph forbidding me to help you, and giving his reasons why. I shall never forget the night he read me that, He has taken care of the household expenses at Southampton. (Did I tell you He has taken care of the household expenses at Southampton. (Did I tell you that we were going to open the place, anyway? We've had Willetts ever since we've had the house, and our agreement is that his winter lay-off agreement is that his winter lay-off isn't to last over six months.) Your father gave him his check when he came to the hotel the morning we sailed, and will send him one every month, to pay servants, etc. I am enclosing another hundred dollars for you. er low now. That's all, except that I am counting the days to your letter at Nauheim. It's perfectly safe to write me there, as I shall arrange with the porter. I want that letter, dear. You can never know how much I've wanted it, and how long, and how I pray that nothing may happen now. One false step on your part—one foolish exploit like that at college — if he knew, would end everything forever. And he would know. Ill as he is, he still has his newspaper sent him, and he still reads every word.

If I seem over-anxlous, you will understand. You are almost all I have.

Mother. That's all, except that I

P. S. Don't fail to write."

For the first time since he had in

serted his knife blade under the dry putty of that window, the Duke felt ashamed of himself. Deeply and thoroughly ashamed. "What can I do?" he said. "I can't

write. And what would be the use! One letter, and then silence. Some day, she's sure to find out that her never came near Southampton. I wish to God I could find that

Thursday's evening paper was full of Judge Hambidge. "Hambidge Decision Due." the head-

line read, "As Civic Association Links Holding Corporation with Boss Kelly." The link didn't seem very strong. Kelly, who evidently was some potatoes in Tammany hall, had once employed one of the "alleged dummy directors" of the corporation that owned the property to be used in widening Jefferson street. "In the face of this sensational disclosure," the paper asked editorially, "will Supreme Court Judge Hambidge have the courage to give these men the fabulous sums they ask for their rookerles? Judge Ham-bidge insists that he has never even met Mike Kelly. 'I have never spoken a word to him in my life.' Judge Hambidge's decision is long over-due. When it is handed down, the city's voters will know whether Boss Kelly

has ever speken to Judge Hambidge." After that, Barry wasn't surprised to find the Judge absent from the next night's dinner party at his house. Evidently, the pack was in full cry. Friday's evening paper had a headline that ran clear across the street. Still unfolded, Barry had left the paper lying on the library table, with Boss Kelly's name filling most of its visible

Naturally, Patricia was disturbed. "Father spoke at a banquet last night at the Astor," she explained. "And

By Channing Pollock he wouldn't let me stay in with him. train out in the morning,' he said. An hour ago, he phoned that he'd been unavoidably detained.'

"I fancy he didn't feel quite up to the trip," Peter Winslow added to Patricia's apology. "The speech must have taken it out of him, and then, afterward, he saw a woman killed by taxi-cab."

"Oh-Peter!"

"Yes. The Judge called me, early this morning, about his decision in this condemnation proceeding. He'd just sent it to the county clerk's office. And his voice sounded rather shaky. He'd gone for a walk after the dinner was over, he said, and the taxi dashed out of a side street, jus: as the woman stepped off the curb. The driver jammed on his brakes, and skidded right up onto the sidewalk. The usual hit-and-run business."

"What did the Judge talk about at the dinner?" Barry asked, chiefly to change the subject.

"I don't know. I haven't seen a pa per today."

Winslow seemed preoccupied, Barry thought, but a mighty fine fellow. A famous criminal lawyer, but so simple and kindly. He was a big chap, loosely put together, and his graying hair was loosely brushed back from a face that was square in every sense. The two men clicked at once. Barry loved Peter's manner to his wifesoft, round, pink little woman, with worried eyes. Peter was always jollying her - gently, whimsically, protectively. "My yes-man," he said of her. "Anything I do is right."

"That's only my move to make the decision unanimous," smiled Mrs. Winslow. She had wit, in her own quiet way.

"I never met your father," the at torney remarked to Barry, in the drawing room, after dinner. "You work on his newspaper, I suppose."

"Don't you want to do anything?" he asked.

"Very much." "What?

"Anything."

"That won't get you far. Can you write?"

"Like the lady who was asked if she could play the plane, I don't know -I never tried."

"You should be able to write-with your father's gift of trenchant expression. You've got it, too, in conversation. My brother owns a big advertising agency. I'd like to have you

"I'd like to," said the Duke. "I do want to work." He hesitated. "I've been in town almost every day this week, looking for a lob." He caught Patricla's surprised

glance. "Come in and see me." Winslow

suggested. Just his damned luck! Here was a ob-a career, probably-for the ask-

John Clarke Ridder, Jr. But Patricia's eyes were still on him, so "I'll be

When he had made his adjeux to the Winslows, Patricia accompanied him to the door.

"I owe you an apology." she de clared. "You're not just a rich man's son. You're something quite different. And I'm-glad!"

"Some girl!" When he reached home, Willetts was waiting in the hall.

"There's a lady to see you, sir." "At midnight?"

"She got here around eight o'clock And she wouldn't go. She's upstairs.

"What kind of a lady?" "Sort of glittery, if you ask me," the butler replied. "Did she come in a car?"

"One of the station taxis, sir." "How's she going to get back? Never mind! I can rouse Evans, if we no

him. You go to bed." Very much on guard, he climbed the stairs to the upper rooms.

Willetts was right; her eyes were "gilttery." And hard. A woman who knew her way around, Barry would have said. And yet there was some-thing tender about her, too. She had a sharp face, with a slightly protu-berant chin. Her lips and brows and lashes were heavily made-up, but her hair, nondescript in color, escaped in soft waves from beneath her cheap lit-tle red beret. She wore a shabby

worn.
All this, Barry observed in the long

moment before she spoke. "You're not Mr. Ridder," she said. Her voice was hard, too. Like the girl, hard and yet pitiful. It seemed

on the point of breaking.
"Yes," Barry answered. "I am."

"Not John Clarke Ridder. Not the old man.

"Not the old man, of course," he said. "My father's in Europe. I'm John Clarke Ridder, Jr." The girl stared at him. You mean you're John Clarke Rid

"Of course." She kept on staring.

der's son?"

The Duke breathed again.

'Somebody's crazy," she said. It had come, then. It was bound to come. Was Willetts listening in the hall? What would Patricia say? "Somebody's crazy," the girl repeated, "and I don't think it's me. somebody's a liar, and I don't think

And, suddenly, she began to laugh. "No," she shrilled; "it's you! It's written all over your face! And it's funny, because you've walked into a pretty mess."

"If you're John Clarke Ridder, Jr., I'm your wife." "My wife?" She stopped laughing, as suddenly

as she had begun. "That's it," she said, and her voice was harder than ever. "I'm your wife, and you're under arrest for killing a guy !"

"Under arrest?" Barry echoed. 'What are you talking about?' For answer, the girl reached across to the library table, and handed him the newspaper she had been reading

when he came into the room. "That's what John Clarke Ridder did-last night," she said. "Killed a guy. That guy. That damned skunk. Mike Kelly. Boss Kelly, of Tammany Hall!"

CHAPTER III

After all, she wasn't such a "glit-

For, as Barry glanced at the news-paper headlines unfolded before him, she crumpled suddenly, and dropped into the big chair. "Steady!" the Duke admonished her

'Wait a minute; I'll get you a drink.' He poured the girl a stiff hooker ot brandy, and she drank about a third "Knew her way around," undoubtedly, he thought, and yet there was something helpless and appealing about her.

"Thanks; I'm all right now."

To give her a chance to pull herself together, the Duke went back to those headlines. "Boss Kelly Murdered," they read. "Body Found by Servants. Skull Crushed. Midnight Caller Hunted by Police."

"Was your husband the midnight caller?" he asked. The girl nodded, wearily.

"And he's John Clarke Ridder, Jr.?"

She nodded again. For some reason he never quite understood, the Duke had stopped wondering whether Willetts was listening outside. Instead he was thinking of a letter that lay in the drawer of the library table; a letter from a hearthungry old woman, who had written away, "I am counting the days to your letter. You can never know how much I've wanted it, and how long, and how I pray that nothing may happen now."

Well, something had happened. Something that would end that old woman's efforts to make it up with the boy's father; something that might well be the end of them both.

"Why did your husband kill Boss Kelly?"

"He didn't." "You said-"

"I said, 'That's what John Clarke Ridder did.' Well, that's what they say he did, and it isn't going to make much difference whether he did it of

But you don't think he did it." "I know he didn't. He had reason enough, and he's done a lot of crazy things, but Jack wouldn't hurt a fly. 'Why did you come out here?'

"Well," the Duke said, "maybe I can help you. God knows, I'd like to. Anyway, let's see where we stand." He crossed the room, and sat opposite her, on a little library chair.

"Go on," he urged. "What's your name?" "What's yours? Your real name?" "Barry Gilbert. I'm a bum. I took shelter in this house, one rainy night a couple of weeks ago, and everybody thought I was young Ridder, so I let 'em think so. That's my story. What's

She actually smiled. "You've got your nerve," she observed. "Well, that's what we need now. My name's Peggy O'Day."

yours?"

"Actorine?" "Sort of. I was a chorus girl in Blossom Time' when I met Jack 'n Florida. He was a bum, too. Living under a fake name. We still live under that. Jay Rogers, Everybody calls The old man paid him him 'Jack.' fifty dollars a week for not using his We've got a little boy, now, and he doesn't even know his name's Ridder. He thinks he's Jay Rogers, Jr. The old man doesn't know what name we took, and he doesn't care." (TO BE CONTINUED)

Jacket Costumes Lead Fashion Parade OF INTEREST TO

By CHERIE NICHOLAS

two words and about the most important chapter in the story of the new spring and summer fashions is told. The consensus among style creators who know whereof they speak is that becomingness, femininity and individuallty are the keynotes of women's fashions this season.

The new costume with its inevitable jacket (if not a cunningly devised cape) does just that. It flatters, it feminizes and being in a widely versatile mood, it tunes to type at the will of its ingenious designer. So it is that the colorful spring parade is mostly i matter of just one jacket costume after another.

Trekking along in the procession, bo leros of Spanish extraction hobnob with jackets that have gone obviously Chinese. Hosts of smart Etons vary the program together with a goodly showing of stylish fingertip jackets. The new "baby reefer" and the just as new and important "baby swagger" are likewise keeping step to the springsong of fashion.

The new redingote, Eton and bolero costumes in navy or black which are considered fashion "firsts" on the style program form intriguing alliances with prints that pride themselves on their gay coloring. Jacket linings, sleeve facings, blouses and innumerable trimming details of bizarre print in contrast to monotones challenge designers to work out stunning effects.

Jackets of bright print or embroidery worn with gown or skirt in a solid color are outstanding. This is true not only of silk and woolen ensembles but swanky printed linens and colorful peasant-print cottons are especially attractive styles, according to this formula.

styles presented by the Chicago Wholesale Market district to an audience of fashlon enthusiasts who had gathered from far and near to witness this significant event, the idea of the jacket costume was dramatically stressed for both daytime and evening dress. The jacketed models herewith illustrated were selected from this showing of surpassingly chic clothes as being not only practical but also flatteringly wearable.

The model to the right features swank bolero type. The brief jacket is lined, cuffed and collared with the same print that fashions the frilly blouse pictured with bolero removed in inset. The fine pleatings, the peplum tabs below the very wide belt, the straight narrow silhouette of the skirt and especially the huge full-at-top sleeves are highly significant style details.

The perfectly stunning spectatorsports costume to the left eloquently bespeaks the "reason why" jacket ensembles are at the top o' the mode. A style so breathtaking as this will coax a burst of enthusiasm from even the most blase. The dress of voguish sheer white woolen is topped with a jacket of unique cut that is handsomely allover braided with soutache. The original model is done in bright navy but Which leads us to tell you that some of the smartest costumes going this season are white worked with black soutache or made up with effective touches of black-and-white print. Note the scroll of soutache finishing the skirt hemline. It tells you that designful hemlines are a very important style

PLEATED SLEEVES By CHERIE NICHOLAS

Designers are doing interesting things with sleeves. Pleated sleeves are very high style this season. frock of dusty pink moss crepe makes appeal because of its sophisticated simplicity. Its pleated sleeves give an air of distinction. The belt, tiny collar and felt beret are in the popular Dubonnet shade. Suggestive of spring and employing all the modern touches is the lovely petit point bag in pastoral design by Madame Jolles of Vienna This charming bag with its dark ground and subdued colorings with jeweled clasps at the side of the gold frame makes a striking contrast to the gown.

If you are having a number of buttons covered for a suit or dress have a few extra ones made and drop them in your mending basket. No doubt you will be very grateful for them later on. light.

LACE NOW INVADES WHOLE DRESS FIELD

The new summer collections in Paris are always eagerly awaited. This year they have brought more in novelty and charm than could have been anticipated. Femininity characterizes the fashions offered by all of the great designers, and in achieving feminine charm, the couturiers have chosen the preferred medium-lace. This return to favor of a material so long overlooked by the mode is outstanding, and it has come back not only in the classic varieties of lace to which we have become accustomed, but in many new and fascinating forms, which seem very definitely fabrics

These new types are being employed widely for street dresses and summer suits, definitely tailored in effect. The prominence given lace in this type of clothes has also called attention to the practicalness and charm of cotton nets and tulle as a material for tailoring. Suits of these materials are shown and the new laces are utilized for long redingotes which veil evening frocks in an alluring mist.

Hand-Knit Silk Ensembles Are New Fashion Offering

Import collections show a number of hand-knitted silk ensembles. Anny Blatt, first to create a hand-knitted evening gown, has launched a handknitted silk wedding gown and a fine, sheer hand-knit veil. Her collection also includes knitted silk suits, dresses and blouses in daytime, cocktail and

New pure silk yarns have been de-veloped for both hand-made and machine-knit costumes. They are easy to work with, wash like lingerie and arr dressy enough for afternoon and bridge wear. The new silk yarns, which are the latest word to knitters, come in a wide range of colors both dark and

four days in a mechanical refrigerator if placed stems down in a shallow pan.

If your floors are worn and will not hold wax, try touching up the wern places with white shellac and then wax. The floors will be much improved by this treatment.

If the pan in which chocolate is melted is lightly buttered, it will pour more easily.

House plants will have to be watered more often now than they were during early winter months. A warmer temperature and brighter sunshine will dry the pots out much more rapidly.

Grated orange rind and two teaspoonfuls of orange juice added to fudge while cooking gives it a delicious flavor.

String and butter beans will cook more quickly if salt is not added to the water in which they are boiled until a few minutes before removing from the fire.

THE METHODIST CHURCH

A. V. Hendricks, Pastor Sunday School Sunday morn ing at 9:45. Clarence Davis, Supt. Epworth League at 6.80, Sybil Holland, Pres. Church service morning and evening each Sus-

is the one and ONLY publication with the knowledge, experience and courage to give you every week the first-hand, inside information which is positively necessary for you to have. It is the ONE publication which is under no obligations to the big moneyed interests or Czars of trade—none of those fatal tie-ups with the selfish cliques who gamble in the very life blood of the people. That's why the Pathfinder is in a position to tell you the unvarnished facts in the plainest possible English. You can depend on every word it says—and there is no substitute for reliability.

EVERY WEEK FROM WASHINGTON, D. C. Washington is now the news center of the entire world. It is the one place in the country where a strictly unbiased and reliable publication can be issued. That is why the Pathfinder is located there. The same clear sighted vision which led to the selection of the National Capital as the home of the Pathfinder over 40 years ago is the backbone of every single issue of the Pathfinder today.

It is our privilege for a limited time to offer you at a greatly reduced bargain price the greatest and most popular national weekly—The PATHFINDER—together with THIS PAPER, both a full year—52 weeks—for

Coffee Early Bird, 1 lb. pkg. Lunch Meat, Ib. with spoon 19e Sausage, Ib. Matches, 6 boxes 19c Steak, forequarter, Ib. Salt, 25 lb. 29c Rib Roast, 2 lb.
