Carnival

What promises to be the biggest Parent-Teacher Association carnival is now in preparation for Friday night November 3. Come and bring your friends and family and enjoy your biggest night of relaxation, fun and fellowship. The big show starts at 7:30. What will you find? Well, what do you like to do? Eat? Then try one of those delicious, yum may hamburgers made as only Mrs. Charles Rains and Mrs. Ted Dudley can make them. How about pie and coffee? No evening is complete without this.

Now perhaps you are more interested in games. In the Hedley High School auditorium you will find everything for a full evening of fun. You will want to play bingo and win some valuable prizes. There will be tables of 42. Bring your partner and play. Men! How about the cake walk? Take home a cake for the wife. Here's just a hint to the boys—girls like cake too.

Have you heard that there are to be boxing matches? A professional performance is guaranteed. And the side show—well, you'll just have to come and see for yourself how much fun and hilarity can be packed into one spot.

The high spot of the evening will come at ten o'clock with the coronation of the carnival queen. Remember—all this takes place Friday night, Nov. 3, at the high school auditorium. Admission to the auditorium is free to all, and if you don't go some maybe a trifle tired but very happy. The hard-working committees will be badly mistaken in their guess.

Baby Maddox

Baby Maddox, infant of Mr. and Mrs. G. B. Maddox, three miles north of Memphis, was buried in the Fairview cemetery last week under the direction of the Kelso Womack Funeral Home of Hedley.

L. L. Amason

Funeral services for L. L. Amason, who passed away Wednesday at his home in Channing were held Thursday at the Methodist church there. He is survived by his wife and two children, Luther Amason and Mrs. Ernest Roberts.

He was a former Hedleyan, moving from here to Channing about 22 years ago.

John Dudley Key

Funeral services for John Dudley Key, who passed away Saturday at Abilene, were held Sunday in King's funeral chapel at Memphis. Rev. M. E. Wells of Hedley conducted the service. Interment was made in Fairview cemetery at Memphis.

He was 42 years of age and was the son of U. G. Key of Hedley.

Just a news item to everyone else but a tragedy to you. That is what it would be if your home or business was destroyed. Hedley now has the lowest fire insurance rate since its existence, and for a little more you can be covered for windstorm, hail, gas explosion and other coverages. Why not drop in at the Bank and have O. L. Johnson insure your property.

Pigs For Sale—See Stanley Gerner

Shower

Miss Mattie Irene Mobley was hostess at a lovely shower last Wednesday evening in the home of Mr. and Mrs. Earl Tollett, honoring Mr. and Mrs. Jack Harris.

The guests enjoyed 42 and various games until a late hour. Little Miss Cherry Ruth Valance, dressed in overalls and shirt, brought in the gifts in a red wagon.

The honoree received a large number of lovely and useful gifts.

NOTICE

All those wishing to enter bids on preparing the food for the Senior banquet must submit their bids by Nov. 1. The committee includes Mesdames Ohas Rains and Harrison Hall and Miss Martha Sue Noel.

The menu will include ginger ale, chicken and dressing, gravy, cranberry sauce, creamed potatoes, english peas, rolls, coffee and sweet potato pie.

Kelso-Womack Purchases New La Salle Ambulance

The Kelso Womack Funeral Home has purchased a new 1940 La Salle combination hearse and ambulance. This new car symbolizes beauty and refinement. It is a new and distinctively beautiful side servicing car equipped with a new and more beautiful walnut cabinet table. The interior will be elaborately trimmed with the car color, black, with chromium trim. The car will be delivered the latter part of November.

Cotton Ginned

Up to Wednesday noon, the three Hedley gins had ginned a total of 1070 bales of cotton this season.

Census report shows that 1568 bales of cotton were ginned in Donley County, Texas, from the crop of 1939 prior to Oct. 1, as compared with 646 bales for the crop of 1938.

Lost—1925 Chevrolet spare tire and wheel. Reward.
B. A. Kyser

Farm for Rent

150 acres of raw land, rent in exchange for breaking out. Farm program allowed. House to live in. Seeks for particulars
W. P. Doherty

Mr. and Mrs. Leon Reeves announce the arrival of Thursday, Oct. 19, of a fine 9 lb son. The young man has been named William Echols, thus becoming the third W. E. Reeves.

The Hedley schools opened again Monday after a two week holiday for cotton picking.

Mrs. Douglas Tinsley and children, Theresa Nell and Dick, of Mt. Eden, Calif. are visiting in the O. H. Tinsley home.

Mr. and Mrs. Haskell Brygley of Sunray visited Mrs. G. B. Loggitt over the week end.

Mrs. M. T. Howard of the Howard ranch southwest of Clarendon visited the Informer family Tuesday.

Mrs. J. B. Stanley of Abilene visited here several days last week. Mrs. T. R. Moreman accompanied her home for a visit.

Modern Arm

Ingenious Color Patterns Deceive Aerial Observers.

LONDON.—Receiving the enemy by man-tricks of camouflage is rapidly becoming a major activity of modern warfare. All the military and naval organizations of the leading nations have developed streamlined camouflage corps and the principles of the "art" have been vastly improved in recent years.

As now practiced, the armies of the world try to outwit the enemy's eye and camera by conjuring up clever and ingenious systems of color variations, lights and shadows, shapes, movements and—most important—actual visibility.

In the World War of 1914 the British and French protected the positions of their troops by selecting acres of net tents on which were stenciled masses of color blending harmoniously with the surface of the earth. This worked well for a time, but the Germans perfected color filters which made it possible to distinguish pigment colors from those of natural verdure. In recent years considerable experimental work has been carried out and it is believed that organic dyes are available for net camouflage which will defy detection by filters used by either the human eye or the camera.

Aerial Photography.

Development of aerial photography has stimulated greatly the art of camouflage. Men throughout the world have been working valiantly to disprove the old saying that "the camera does not lie."

Aerial photographs, according to the "Better Vision Institute," record the earth's surface in masses of light and shadows. The camouflage artist aims to produce conditions that will deceive the camera. The perspective of aerial photographs is vertical. In ordinary life the eye sees objects in a nearly horizontal plane. A cultivated district is seen from the air as a check-board of fields divided by hedges. Conglomerate areas, containing demolition villages, shelled areas or patches of vegetation, present highly complex patterns, offering an excellent opportunity for the light and shadow camouflage technique. The camouflage artist studies the landscape from photographs and plans his work accordingly. It is important that the perspective lines of the work must harmonize with the contours of the deception will be in a photograph, one taken when objects throw shadows and must be made to appear as if a different

Develop New Tricks With Camouflage

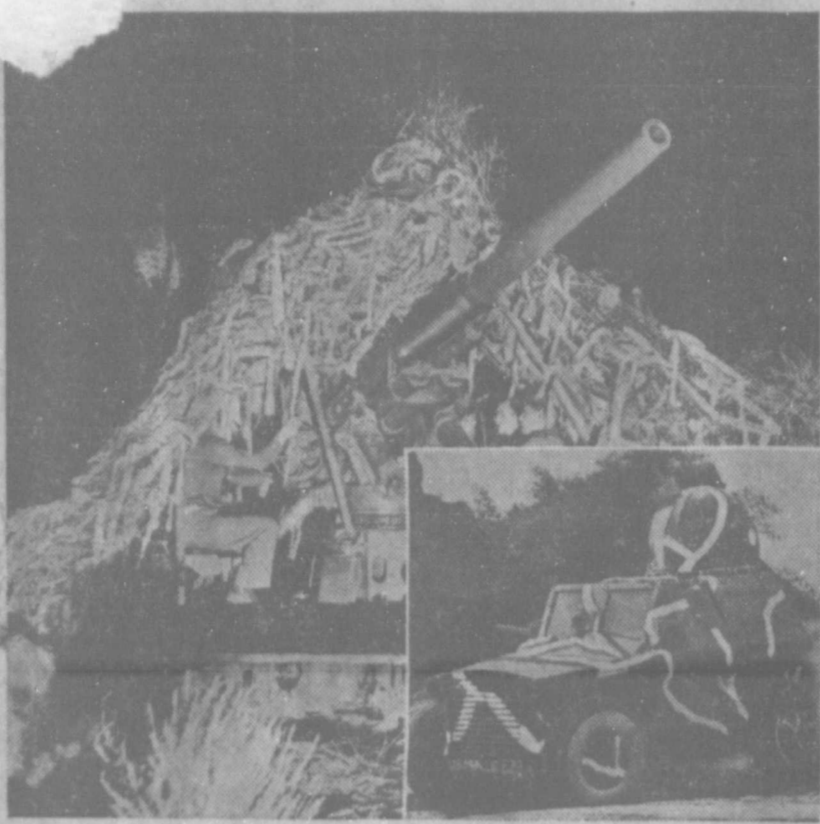

PHOTO ABOVE shows a huge anti-aircraft gun camouflaged, manned and ready for invading bombers. This type of camouflage has been developed by the 63rd U. S. Coast Artillery command post in California. INSERT PHOTO shows a high speed anti-aircraft tank built by a Detroit, Michigan, inventor, who carried the principle of color camouflage into his design. Intricate patterns such as these on the tank make it difficult for aerial observers to properly judge the speed and direction of the machine's movement.

be a flat surface; otherwise their shadows will betray the deception.

Stereoscopic Methods.

One of the European nations has developed a method for the detection of camouflage by the use of stereoscopic methods. Hundreds of aerial photographs have been taken of potential battle areas. When a photograph of a section is placed on one side of the stereoscope, and a recent photograph placed upon the other side, if the contour of the land has been disturbed by erection of works, it will show up as an irregularity to the eyes of the investigator. Thus has the optical plaything of a past and simpler generation been converted into a device of warfare.

Most familiar to the general public is the camouflage of ships. By painting irregular shapes on a ship's silhouette is blurred, thereby making accurate aim of missiles from submarine difficult. In the last European war the use of camouflage is said to have reduced materially the marksmanship of submarines. During the past 10 years considerable study has been given to the development of scientific principles of ship camouflage, with the result that not only can vessels be made very blurry in form and outline, but they can, through the clever use of optical illusions of line and mass, be made to appear as if a different

ent course than they actually are. The submarine commander, thinking the ship is about to turn from its course, aims his torpedo accordingly, and frequently will miss because of the optical illusion of the ship's movement.

Visibility Important.

Much camouflage is made to reduce visibility. A dirty gray battleship is less easily seen than is a black or brightly colored ship. However, recent experiments have disclosed that if a ship is painted in splashes of many colors, properly combined, at a distance the colors mingle into an indistinct gray which, it is asserted, is less visible than a ship that is completely gray.

This phenomenon of camouflage is explained by the fact that when a disc on which several colors are painted is whirled about, the resultant color as seen by the eye is gray. In the case of a ship, distance twirls the colors together and a dull, indistinct gray results, making it difficult to detect a ship so painted at any great distance.

Any Suggestions?

OVERSEAS FLIGHT to Ireland stopped by the U. S. Department of Commerce, Pat Johns, young Wisconsin flyer, is pictured at the controls of his plane "Screwball No. 1" ready to take off on any adventurous flight suggested.

Business and Bustle Bow is Charming Princess Dress

Your own charm—the new in your dress and accessories—difficulties, even to beginners. An explicit step-by-step sew chart shows you just what to do.

Send for it at once! Make it up in thin wool, flat crepe or faille! How proud you'll be of your own handiwork, and think of the money you'll save!

Barbara Bell Pattern No. 1834-B is designed for sizes 12, 14, 16, 18 and 20. Corresponding bust measurements 30, 32, 34, 36 and 38. Size 14 (32) requires 4 1/2 yards of 36 or 39-inch fabric with full length sleeves; with three-quarter length sleeves, 4 1/2 yards.

Send your order to The Sewing Circle Pattern Dept., Room 1324, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each. (Bell Syndicate—WNU Service.)

Disease Causes More War Time Deaths Than Submarines and Bombs Combined

CHICAGO.—The assembling of great masses of men under conditions in which sanitation is difficult, if not impossible, and the movement of great numbers of men across wide areas of country where they come in contact with new populations invariably mean the spread of disease.

The louse that spreads typhus fever, the rats concerned with plague, and many another insect and animal carrier of disease still exist, ready to demonstrate, when the favorable opportunity comes, that man is but a morsel in the great cosmic scheme and that when he seeks to destroy himself nature stands cynically ready to assist him.

In practically every war for which accurate records are available, disease has always caused more deaths than military maneuvers and engagements, according to American Medical Association. Typhus, plague, cholera, typhoid, dysentery, pneumonia and influenza do more damage under military conditions than can be brought about by dynamite, torpedoes, gun powder and poison gas. As Dr. Hans Zinsser has said, "Epidemics get the blame for defeat; generals the credit for victory. It ought to be other way around."

War Time Deaths and Bombs Combined

epidemic has come to terminate the conflict. According to Lieut. Col. Nelson Mercer, the Persians under Xerxes were defeated in their invasion of Greece by plague and dysentery. In 1741 the French captured Prague because of a typhus epidemic among the Austrian defenders. Napoleon's campaign failed in Russia because of typhoid, typhus and pneumonia. In the Mexican war of 1846-1847, 100,000 soldiers went to Mexico; of these 10,986 died of typhoid, dysentery, smallpox, malaria and tropical diseases—only 1,549 were killed or died of wounds. In the Civil war the Union army lost more than 200,000 men by disease and approximately 112,000 from battle wounds.

The records of the Spanish-American war and of the World war are so recent that they linger in the memories of many of us. In the Spanish-American war deaths of American troops in battle were 379, but 4,795 died from disease, most of them never reaching Cuba. In the camps in this country typhoid caused 20,204 cases and 2,188 deaths. During the World war, Mercer points out, our losses were 58,119 from disease, 50,285 killed or died of battle wounds. A large percentage of deaths were caused by influenza.

Chinese Trucks Are Now Using Old 'Silk Route'

Motor Transport Shows an Increase on Marco Polo's Road.

CHUNGKING, CHINA.—The Chinese government's land communications development program in southwestern China is actually tracing Marco Polo's footsteps along the ancient "silk route."

Communications ministry circles say that in the field of motor-car highways, China plans to make full use of its two major "continental doors," one of which leads to Lashio in Burma and the other to Semipalatinsk in Soviet Central Asia.

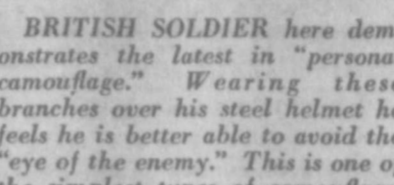

These two routes sometimes have been referred to as China's "fire escapes" or "back door entrances." Under present conditions, with the entire seacoast of China blockaded by the Japanese navy, the ancient imperial highway through Sinkiang province is beginning to regain its former importance.

Route of Silk Trains.

For centuries, before the arrival of European traders by sea, caravans carried Chinese silk into the Near East and thence to the cities of Europe over this route—hence its name, the "silk route."

Communications ministry circles said this 4,000 kilometer highway is now in good usable condition and is being utilized to the fullest extent by the Chinese government for transportation of supplies, military and otherwise, from abroad.

They said the Kunming-Lashio highway was opened to traffic months ago and it is being used more and more frequently. Foreign Christian missionaries have been arriving in South China by this route, thus retracing the steps of Marco Polo, who came to China in the Thirteenth century.

BRITISH SOLDIER here demonstrates the latest in "personal camouflage." Wearing these branches over his steel helmet he feels he is better able to avoid the "eye of the enemy." This is one of the simplest types of camouflage.

Airplanes are painted, like birds, with dark upper surfaces and light under surfaces. When viewed from the earth, planes are seen against a blue background, and for that reason lighter colors lower their visibility. By the clever use of colors an airplane can be made virtually invisible at high altitudes. When viewed from overhead by pursuit planes, aircraft are against a brown and dark green background. Their visibility is lessened when the upper surfaces are painted with colors that blend with the surfaces of the earth. Bomber planes, which usually operate at night, are painted a dull black to deaden the reflection of searchlights.

EDITH BARBER SAYS: Iodine in Food Is Needed

Iodine is essential for adequate nutrition. The amount which we need daily is minute, but without it, the thyroid gland will not function properly.

Even in the foods which contain a relatively high amount of iodine the quantities are so small that it is difficult to measure. It has been found also that foods which are grown in various regions and water which comes from different sources contain varying amounts of this essential mineral. The reason for this is the fact that sea water is our source. Early in the history of the world sea water covered all of our land. Much later the northern portion was covered with glaciers, which when they melted, took with them the supply of iodine which the sea had contributed to the earth.

The southern portion and the northeastern portion of the United States are still comparatively well supplied with iodine. Often, however, both water and vegetables come from some distance and for this reason we may need to add an extra supply from such a source as iodized salt, which is available. By its use the incidence of simple goiter has been greatly decreased in sections where formerly it was prevalent. Adolescent children are particularly susceptible to this form of goiter and for this reason the use of sea food and iodized salt is recommended even on the seacoast.

Panned Oysters.

1 pint oysters
4 tablespoons butter
2 tablespoons lemon juice
Pepper
Salt
Lemon wedges

Drain oysters, place in a heavy frying pan and cook over a low fire until the edges curl. Add butter, lemon juice and pepper and salt to taste. Bring to a boil. A dash of Worcestershire sauce may be added if desired. Serve on hot toast and garnish with lemon.

Creamed Codfish.

1 1/2 cups codfish
4 tablespoons butter
3 tablespoons flour
Pepper
Paprika
2 cups milk
1 egg, beaten

AWFUL CASE of ugly surface PIMPLES

We want to help! No matter what you've tried for disfiguring surface pimples and blemishes without success—here's an amazingly successful Doctor's formula—powerfully soothing Zemo—which quickly relieves intense itching and starts right in to help nature promote FAST healing. Results from few days' use of Zemo should thrill you! Pleased just as EFFECTIVE. Liquid or Ointment form. Used in best homes yet costs only 35¢, 60¢, \$1.

Cover dish with cold water, bring to boiling, drain and repeat if necessary to remove salt. Melt butter, stir in flour and seasonings and when well blended add milk. Stir over fire until smooth and thick. Stir a little of the sauce into the beaten egg and beat this mixture into the sauce. Add fish, heat and serve garnished with parsley or slices of lemon dipped in minced parsley.

Rough and Tough
C. C. Coe, principal of the grammar school at Hooper, Wash., spends his spare time busting broncos, says the American Magazine. He holds three championships for his skill in the rodeos.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to loosen germ laden phlegm, increase secretion and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. No matter how many medicines you have tried, tell your druggist to sell you a bottle of Creomulsion with the understanding that you are to like the way it quickly always the cough or you are to have your money back.

CREOMULSION for Coughs, Chest Colds, Bronchitis

Pull the Trigger on Constipation, and Pepsin-ize Acid Stomach Too

When constipation brings on acid indigestion, bloating, dizzy spells, gas, coated tongue, sour taste, and bad breath, your stomach is probably loaded up with certain undigested food and your bowels don't move. So you need both Pepsin to help break up that rich undigested food in your stomach, and Laxative Senna to pull the trigger on those lazy bowels. So be sure your laxative also contains Pepsin. Take Dr. Caldwell's Laxative, because its Syrup Pepsin helps you gain that wonderful stomach relief, while the Laxative Senna moves your bowels. Tests prove the power of Pepsin to dissolve those lumps of undigested protein food which may linger in your stomach, to cause belching, gastric acidity and nausea. This is how pepsinizing your stomach helps relieve it of that distress. At the same time this medicine wakes up lazy nerves and muscles in your bowels to relieve your constipation. So see how much better you feel by taking the laxative that also puts Pepsin to work on that stomach discomfort, too. Even finicky children love to taste this pleasant family laxative. Buy Dr. Caldwell's Laxative—Senna with Syrup Pepsin at your druggist today!

Sanitary Toilets

For some months past a WPA
 Community Sanitation Project
 for the construction of Sanitary
 toilets has been in active opera-
 tion over the county. In the
 work the government provides
 free labor for the construction of
 the units and any individual who
 wishes the service provides the
 necessary material. The worker
 will utilize any salvage material
 available. If the individual wishes
 all of which keeps the actual cost
 of the material at a minimum and
 well within the reach of everyone.
 The sanitary toilets are con-
 structed according to the speci-
 fications of the State Department
 of Health and approved by the
 U. S. Public Health Service. An
 average unit properly taken care
 of should last a family from five
 to eight years until the pit is fill-
 ed up, and at that time a new pit
 is dug and the entire unit skid-
 ed over the new hole and the useful
 uses can go on indefinitely.

This is part of a gigantic pro-
 gram being conducted over the
 entire nation and the citizens of
 Hedley are urged to do their part
 in keeping pace with the rest of
 the country. We all know that
 the old, open-back surface pit
 is an unsightly and filthy place
 at best and more in particular is
 directly attributable to the
 spread of typhoid fever and
 other diseases. The work,
 while county-wide in scope, is of
 course more beneficial in places
 where a great number of people
 live closely adjacent to each other.
 The City of Hedley being with-
 out a sewer system, is of course
 desperately in need of this work.
 Everyone is urged to have a
 sanitary toilet constructed while
 free labor can be secured and
 take this step for the protection
 of his own family and that of his
 neighbor. Let's give our child-
 ren the chance to grow up into
 healthy men and women without
 having to go through some ser-
 ious illness that may weaken and
 impair their activity for the re-
 remainder of their lives.

Monday evening at a call meet-
 ing of the city council a plan was
 worked out whereby a convenient
 means of financing the material
 over a period of 12 months, if ne-
 cessary, was made available to
 the worthy citizens of Hedley.

In this way nearly everyone in
 the city can have this conven-
 ience without placing themselves
 in a financial strain. P. O. Thomp-
 son, employed by the county,
 will gladly contact the public and
 explain the conditions—or if con-
 venient, the citizens may leave
 their names with the Mayor or
 City Secretary. Thompson's
 mailing address is P. O. Box 682
 at Clarendon. Let's everyone
 give this matter his close atten-
 tion and bear in mind that this
 is one government project that
 any individual can have the bene-
 fit of in his own back yard.

Squalus Disaster Again Focuses Attention On Submarine's Value as Weapon of War

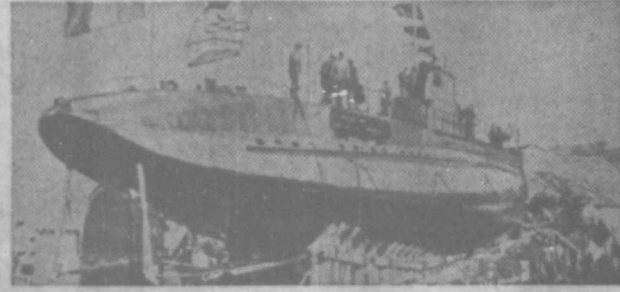

UNITED STATES—The submarine Saury, sister ship of the ill-fated Squalus. The U. S. has 106 U-boats, including 19 under construction as of November 15. Sixty-seven of them are over-age.

BRITAIN—The Sunfish pictured aground at Isle of Wight after dragging her anchors. Britain has 60 subs, plus 13 under construction. Only 14 of these are listed as over-age.

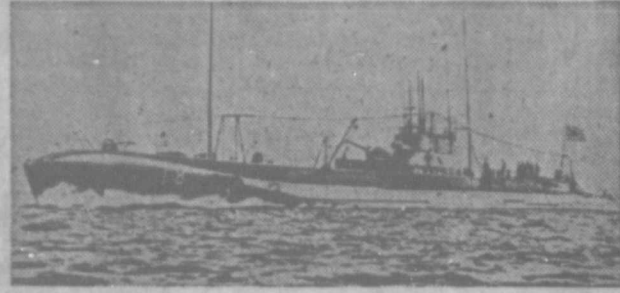

ITALY—Photo shows Mussolini's submarines going through a remarkable series of formations during maneuvers. The No. 1 sub power, 83 of Italy's 90 boats are under age and she is building 39 more.

FRANCE—The new Ceres is launched at Rouen. Third among world submarine powers, France has 76 craft, all under age. In addition she has approximately 20 new U-boats under construction.

GERMANY—Nazi submarines. All of Germany's craft are under age and 20 more were being built of last November 15. Since then the naval limitations treaty with Britain has been broken.

JAPAN—The first class submarine I-55, pride of a small but efficient U-boat fleet. Of 57 craft, 41 are under age. In addition the Nipponese have three boats under construction.

Anti-Sub Devices Are Perfected But U-Boats Also Gain New Power; Italy Has Biggest Fleet.

By WALTER P. SHEPPARD
Battleships parade the might of nations. Submarines are hidden might, forgotten peacetime as they sink through the deep. It is the reason why the Squalus disaster off Cape Cod has attracted such interest. Between wars men have not forgotten the havoc with shipping, how one tiny submarine can smash a mighty fleet.

Combat them? Navies have perfected detectors which sometimes spot a submarine engine at close range, but even so the craft may be defenseless against this sausage-shaped phenomenon that can dive and zigzag at will. Patrol boats and destroyers sometimes corner them, however, and in shallow water subs can be sunk with depth bombs or cornered with nets and mines. Sometimes, as when a phantom submarine attacked a British destroyer in the Mediterranean, these playful fellows pretend they're "dead" and confound the enemy. After a few depth bombs are dropped an oil slick and pieces of debris appear on the surface as evidence that the U-boat is no more. While the destroyer steams proudly away the U-boat captain chuckles to himself, for all he did was shoot out a lot of loose junk in a torpedo tube.

Italy Leads the Way.
Last November 15 a report from the United States navy department revealed that Italy is the world's No. 1 submarine power, boasting 929 such vessels when her current building program is completed. Of these, 39 were under construction last November and 83 were under way, leaving only 7 obsolete. Germany's submarine fleet, while one of the world's smallest, is significantly efficient. Every one of her 43 working craft last November 15 were under age, and 28 new U-boats were under construction. Since Reichsfuehrer Hitler denounced the British-German naval pact in April, the Nazis are expected to push full steam ahead on their submarine program.

This is an entirely fitting offensive measure, because Germany knows her probable enemy in the next war would be Great Britain. Means colonies herself, self-sufficient and with no shipping to protect, the Reich can devote all her marine earmarking to preying on boats of her enemies.

Only 26 U. S. Subs Under Age.
America ranks near the bottom of the scale as a world submarine power, though numerically she is second. As of last November 15, only 20 of her subs were under age, fewer than any of the other great powers. When all new boats are completed, however, and when over-age craft are counted in, the nation has 106 submarines. Since the Squalus disaster was the first American U-boat mishap in 12 years, during which other nations have suffered repeated accidents, the United States fleet is apparently in pretty fair shape. Veteran submarine fighters will recall World War experiences when the possibilities of the weapons, once known as "tin cans," were not so obvious.

They can—as the German U-boats did—patrol off naval bases and harbors to keep the high command informed on ship movements. Their information probably led to the sinking of commercial and war craft.

There's little chance of escaping a torpedo. This weapon, first perfected in 1865 by an English naval officer, can travel several thousand yards, carry hundreds of pounds of explosives and can be set on any course at any depth. It will go straight or along a circular path and is sure to spell disaster if it strikes a ship below the water line.

Combat them? Navies have perfected detectors which sometimes spot a submarine engine at close range, but even so the craft may be defenseless against this sausage-shaped phenomenon that can dive and zigzag at will. Patrol boats and destroyers sometimes corner them, however, and in shallow water subs can be sunk with depth bombs or cornered with nets and mines.

Sometimes, as when a phantom submarine attacked a British destroyer in the Mediterranean, these playful fellows pretend they're "dead" and confound the enemy. After a few depth bombs are dropped an oil slick and pieces of debris appear on the surface as evidence that the U-boat is no more. While the destroyer steams proudly away the U-boat captain chuckles to himself, for all he did was shoot out a lot of loose junk in a torpedo tube.

Dice Thrown for Bibles At St. Ives, England

Dice were thrown for Bibles at St. Ives, England, when six children received a Testament each. The ceremony was in accordance with the will of Rev. Robert Wilde, of Uundle, made 200 years ago. He left \$250 to St. Ives and stipulated that the interest be used in the purchase of Bibles, to be disposed of by the minister and church wards to the children of the parish.

U. S. Disguises Testing Device To Spy on Automobile Drivers

A black rubber tube laid across the highway and connected at either end with a simple instrument staked at the side of the road forms the basis for analysis of how the motor public behaves in its use of the highways. This special study is being made by the public roads bureau.

The tube is inconspicuous and looks much like an expansion joint—one of its good features. Most motorists will not see the tube and will not be aware of making a record. Other devices, such as checking by observers, or by motion-picture records, are less useful because they are likely to make drivers self-conscious and cause them to slow down for fear of a speed trap. A record of natural driving on a representative stretch of road is what is wanted. The tubes are placed at 50-foot intervals on the stretch of road under study—a half mile, perhaps. When an automobile crosses a tube, a wave or puff of air is forced into the roadside instrument and moves a diaphragm which causes an electrical contact. The tubes are disconnected at the middle of the road

President Restates All New Deal Theories and Convictions

Retail Federation Speech Seen as His Political Philosophy For 1940 Campaign; Insists on Continued Spending; Would Hold Down Business Profits.

By WILLIAM BRUCKART
WNU Service, National Press Bldg., Washington, D. C.

WASHINGTON.—As the days go by, it appears more and more that President Roosevelt's speech before the American Retail Federation here, May 22, amounts to a declaration of greatest political importance. It may be, indeed, that the Chief Executive's pronouncements before the retail merchants that night will eventuate as the cornerstone of his political philosophy for the campaign of 1940.

In Mr. Roosevelt's speech before the retail businessmen, it will be recalled upon examination that he restated virtually all of the New Deal theories and convictions. That was important. But more important was the emphasis with which he offered, in new language, the general assertion that there will be no backtracking. More important to the country, as a whole, was his determined adherence to the principle of virtually unlimited government spending, because his renewed insistence in that direction came at a time when there is considerable fear that the country faces further inflation of its currency.

There seems to be quite a general agreement that the retail speech should be examined in the light of 1940. As far as I can learn, that is the view taken by New Dealers, by old line Democrats, who are antagonistic to spending policies of the last five years, and by cautious Republican observers who are anxiously looking for signs indicating whether Mr. Roosevelt, himself, will seek a third term in the office of President. While the views of the three segments converge, their reasons differ. The New Dealers who want Mr. Roosevelt to run for a third term desire to consider the speech as a preliminary statement, a charting of the future course; the old line Democrats who desire to get the party back in Democratic hands, rather than in the hands of the radical wing, entertain fears which force consideration of 1940, and the Republicans secretly are hoping that Mr. Roosevelt will try to break the third term precedent.

Speech Sought to Court Favor With Retailers

There is another reason, apparent to some observers, why the speech that sought to court favor with the retail dealers should be thought of in terms of a year hence. It will be remembered that the annual meeting of the Chamber of Commerce of the United States was held here only two weeks in advance of the speech which is the subject of so much discussion. Now, I never have thought that the Chamber of Commerce represents very much of the country's sentiment. It is made up, of course, of business interests that are representative, but as a matter of cold fact it is dominated and managed and directed by the really big business of the nation. Thus, it speaks the big business viewpoint to the extreme, and likewise in these columns before that the Chamber of Commerce usually can kill off projected legislation by the simple expedient of supporting it.

But the recent chamber meeting took no notice of Mr. Roosevelt beyond damning his program and policies lock, stock and barrel. The President, it seems, took advantage of the opportunity to tell the retailers about his innermost thoughts as an offset to the vials of poison scattered about by the big business representatives. He reasserted his views on every point to which the chamber had taken opposition and about which there had been fighting speeches made. I suppose if one's sense of humor could be sufficiently detached from the gravity of the situation, they could describe the circumstance as similar to two small boys who were sticking out their tongues at each other as proof of their anger.

A third factor might be brought into the picture. You will recall that it was only a week or so prior to Mr. Roosevelt's speech that he spent an afternoon in conference with some of the legislative leaders. Among them was Senator Pat Harrison, the old-line Mississippi Democrat, who occupies the post of chairman of the powerful senate committee on finance. That is the committee which handles tax legislation in the senate. Included in the conference also was Chairman Doughton, of the house committee on ways and means, also a tax committee.

Harrison Tells President Tax Revision Is Necessary

No further review of that conference is necessary than to relate how Mr. Harrison told the President there must be tax revision in order to lift and readjust some of the unfair taxes on business, and he said there would be tax legislation in this session of congress. Chairman Doughton appeared to join in rather timidly, but I believe it is not going to be important whether the Doughton heart is with Harri-

son or with Roosevelt. The fighting Pat Harrison is going to obtain some tax legislation if it is possible, and Mr. Roosevelt will have an opportunity to veto the bill if he likes.

So, in his speech, Mr. Roosevelt took a sideswipe at the proponents of tax changes. Their reasons for demanding tax revision, you see, are based upon a belief that business will not go ahead until government gives more consideration to the burden that is on business. Senator Harrison, along with many other old line Democrats, feels that business can not re-employ workers as long as taxes are unevenly distributed. That is to say, the Mississippi senator is seeking ways by which business will take on workers and the federal treasury will be free from the enormous appropriations for relief spending.

With reference to the Harrison position, however, it should be said here that congress has shown a dozen yellow streaks about cutting down in spending. It started out talking economy in a big way. It acted, however, by way of voting money out of the treasury wherever a new method for spending it was proposed. The individual representative and senator, excepting those boldly aligned with Senator Harrison, displayed the usual cowardice of a political more interested in holding his ten-thousand dollar job than in serving his country.

Determined Business Profits Must Be Held to Minimum

When Mr. Roosevelt said in his speech, therefore, that he would demand only that the present distribution of tax levies and rates should remain the same, he was answering Senator Harrison's group. In other words, the President has budgeted from the position and viewpoint he long has held only to the extent that he now says he will not quibble about details; he wants corporations to bear as much tax as heretofore and he will insist upon it. He is determined that business profits must be held to the minimum and there are indications that he will carry such a fight "to the country."

Regardless of the tax question and the over regulation to which so many government agencies are addicted in dealing with business, Mr. Roosevelt expressed his whole thought in one sentence: "You can not expect this administration to alter the principles and the objectives for which we have struggled the last six years."

That declaration encompasses in one sentence germs of great trouble for the Democratic party. Some observers here described it as stubborn statement. It is known, of course, that Mr. Roosevelt can be positively bull-headed in his determination when he wishes. Because of this trait, therefore, some of the old line Democrats again are fearful of a wide open split in the party.

The President laid the greatest stress on federal spending, and he made the rather startling statement that there can be no balanced budget either this year or next. Which can mean only that there must be more borrowing by the government which now is paying an annual interest charge of more than \$1,000,000,000 on the public debt that is well over \$40,000,000,000. In defense of this condition—there has been an increase of more than \$20,000,000,000 since Mr. Roosevelt took office—the President asserted there should be no particular concern about the debt or the interest. What of it, he said, in effect; if there is that interest to be paid by our children, it will be paid to our children.

Smacks Much of Old Argument for Pump Priming

In pooh-poohing the public debt and the great interest charge to be met every year, Mr. Roosevelt said the government had to continue spending and creating debt because, otherwise, there would be no business for the retailers or any other type of commercial endeavor. It smacked very much of the old argument for pump priming and certainly bore out many reports that Marriner S. Eccles, head of the federal reserve banking system, has great influence with the President, who used to get his advice on financial matters from Secretary Morgenthau, of the treasury. Mr. Eccles may be regarded, I believe, as one of the inner circle of New Dealers. In any event, he has preached spending, spending and more spending by the government as the means of lifting the country out of the depression by its own bootstraps.

It is on this public debt matter that attention is likely to center more earnestly later on. The debt has been growing and growing and the general condition of the country may be said fairly to have advanced not one bit in the last several years. (Released by Western Newspaper Union.)

Home Sewn Aids To Summer Beauty

ADD variety and color, as well as smartness, to your summer wardrobe by making the charming accessory set in gay printed cottons like linen, pique or gingham. It's very easy to do—even the gloves, which have the new, roomy, blunt fingers. Your pattern (1643), includes a step-by-step sew chart that tells you exactly what to do.

This princess dress for afternoons is exactly what you want for hot summer days. This style (1752) is refreshingly simple, and it has a beautifully smooth, slim figure-line, upped sleeves, and a square neckline dipped in the front to make it more becoming.

The frills at the neckline, sleeve edges and foot of the skirt, make this dress very feminine and flower-like. And it's so easy! The dress itself practically puts itself together, and the frills can be sewn in, in no time! Linen, voile, silk print organdy or flat crepe are pretty materials for this.

The Patterns.
No. 1643 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 2 1/2 yards of 36-inch material for jacket; 3/4 yard for gloves, and 1/4 yard contrast; 1 1/4 yards for scarf; 3/4 yard for bag.
No. 1752 is designed for sizes 12, 14, 16, 18 and 20. Size 14 takes 4 1/2 yards of 39-inch material; 4 1/4 yards of pleating or ruffling.

New Spring-Summer Pattern Book
Send 15 cents for Barbara Bell's Spring - Summer Pattern Book! Make smart new frocks for street, daytime and afternoon, with these simple, carefully planned designs! It's chic, it's easy, it's economical, to sew your own. Each pattern includes a step-by-step sew chart to guide beginners.
Send your order to The Sewing Circle Pattern Dept., Room 1324, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Pull the Trigger on Lazy Bowels, and Also Pepsin-ize Stomach!

When constipation brings on acid indigestion, bloating, dizzy spells, gas, coated tongue, sour taste, and bad breath, your stomach is probably loaded up with certain undigested food and your bowels don't move. So you need both Pepsin to help break up that rich undigested food in your stomach, and Laxative-Senna to pull the trigger on those lazy bowels. So be sure your laxative also contains Pepsin. Take Dr. Caldwell's Laxative, because its Syrup Pepsin helps you gain that wonderful stomach-relief, while the Laxative-Senna moves your bowels. Tests prove the power of Pepsin to dissolve those lumps of undigested protein food which may linger in your stomach, to cause belching, gastric acidity and nausea. This is how pepsinizing your stomach helps relieve it of such distress. At the same time this medicine wakes up lary nerves and muscles in your bowels to relieve your constipation. So see how much better you feel by taking the Laxative that also puts Pepsin to work on that stomach discomfort, too. Even finicky children love to taste this pleasant family laxative. Buy Dr. Caldwell's Laxative-Senna with Syrup Pepsin at your druggist today!

Supply the Mind

Once Sports Headliners; Now They're in Uniform

War draws no distinction between the famous and the forgotten. At left, Len Harvey, English pugilist well known in the United States, goes walking with a buddy in his new sergeant's uniform. At right, Sidney Wooderson, famous British mile runner attached to the auxiliary fire service "somewhere in Norwood."

What Will History Name Latest War?

WASHINGTON.—A war without a name is raging in Europe. What will history call it?

It is pretty much a matter of guesswork, for history has been somewhat erratic in naming its wars. A two-country war frequently uses the names of the belligerent countries connected by a hyphen, as in the case of the Franco-Prussian war, the Spanish-American war and the Russo-Japanese war.

But there are exceptions. The war between the United States and Mexico in 1846 has come to be called merely "the Mexican war." Sometimes a date distinguishes a war, as in the case of "the War of 1812," sometimes a restricted region furnishes the name, even though several countries are involved. This was true of "the Crimean war."

Closer home, the conflict in the United States in the 1860s was at first "the War of the Rebellion" to Northerners and merely "the war" to many Southerners. Later it came to be called both "the Civil war" and "the War Between the States."

The "World war" of 1914-18, despite its wide sweep, hardly merited its grandiose title, for dozens of countries and hundreds of millions of people managed to stay neutral. The present conflict is still confined to Europe as far as land warfare goes. But the sinking of ships in the Atlantic and preparations for moving French colonial troops from Africa to France, already make the term "European war" too narrow.

Science Sees Farm Crops as 'Mines of Tomorrow'

WASHINGTON.—Mankind may be faced in a "measurably near future" with finding substitutes for coal and petroleum as sources of power. Investigation of the possibilities of farm-grown supplies of starch and cellulose as supplements to or substitutes for "irreplaceable natural resources" will be one of the long-term research efforts of the four regional laboratories of the bureau of agricultural chemistry and engineering now under construction.

"To an extent not commonly realized," Dr. F. A. Wells, director of the eastern laboratory, said recently, "the broadening range of human wants has been supplied from irreplaceable natural resources—the mineral or fossil products of our mines and deep wells.

"So far as we can now foresee, civilization will never be free from its dependence upon some of these essential minerals. But the conviction is growing that to some large degree—how large it would be foolish to guess—many of our present requirements can be shifted to a less precarious basis. The most fundamental problem of all, mankind's rapidly growing utilization of heat energy, is an outstanding illustration.

"To all but a minor extent, civilization today rests upon the rapid utilization of fossil forms of solar energy—coal and petroleum. Use of the current supply of solar energy, stored as starch or cellulose by living vegetation, may become a vital matter in the measurably near future. Long before exhaustion of

mineral reserves approaches, technological advances in the one field, or increasing difficulty and cost of extraction in the other, doubtless will lead to an increased dependence upon agricultural products for many other than their traditional uses."

Sour Grapes Don't Always Stay Sour

By BARBARA ANN BENEDICT

LUCIEN HARDY had far more reason than any other young man in Bartlette to be conceited. He possessed a college degree, was an adept at both tennis and golf—two sports which occupied the greatest attention from the Bartlette summer colony—and was extremely good looking. Too good looking for his own good, a great many said.

But if Lucien was conceited, he was careful not to betray that fact. Secretly, he was well aware of his attractive qualities; he knew he could have most any girl any time he wanted, so why hurry? Why tie yourself down until you were absolutely sure that the girl was the real stuff, one of whom you wouldn't tire?

At least, that's the way Lucien felt until he overheard the conversation between Kathy Norton and Dot Priest. It wasn't Lucien's fault that he eavesdropped. He'd been sitting, quite innocently, in the dark at the far end of the clubhouse veranda, waiting for Bob Truesdale, when Kathy and Dot came out of the lobby.

"I simply wouldn't marry a man as good looking as Lucien Hardy under any circumstances."

Dot's reply was equally distinct, though tempered with amusement. "That's hardly a reason to condemn a man—just because he's good looking."

"It's the very best reason in the world," Kathy said. "For one thing, a man as good looking as Lucien is never very bright, and for another, any woman fool enough to marry him would never have a moment's rest. She'd be too occupied fighting off other women. Why, a girl would be an absolute idiot."

A desire for vengeance awakened in Lucien; a resolve to prove to Dot Priest and everyone else that Kathy Norton's bold statement was provoked by nothing more than sour grapes.

On the following morning, Lucien confronted Kathy Norton on the clubhouse veranda. He smiled at her pleasantly and benignly. Or so he thought. Unknowingly, his smile contained a suggestion of patronage, the result of having believed him-

Briefly: Your Home

By PATRICIA GOULD

Now that the children have settled into another year's routine of attending school it's a good time to give some thought to the school lunch-box. Children will look forward to the noon-hour with pleasure if ample care has been taken in planning and packing their lunch boxes. A permanent lunch box that can be scrubbed and aired each day is better than the paper-bag as it keeps the food so much fresher.

It's time or past time to stock up on potatoes for the winter. Remember when you buy your supply that the potato is the first vegetable to buy when a low-cost health food is being considered. Serve potatoes once or twice a day. Potatoes baked or boiled in their skins save money and health, because the part of greatest health is nearest the skin.

If you are lucky enough to be able to furnish your home this fall remember that greatest care should be used in choosing and arranging accessories and furniture. These are the "spokesmen" of your personality and character. Everybody sees them. Everybody comments regarding them.

When preserving fruits and vegetables it isn't always the smart thing to rush in and can everything you can get your hands on. Consider what fresh fruits and vegetables your own community will have these coming winter months. Buying them fresh may represent a saving.

Shirtwaist Dress

HERE IS a double-breasted version of a shirtwaist dress in black and white check. Collar, cuffs and buckle are of black velvet. The blouse is cut with a hollow yoke and front fullness, while the skirt has four gores.
