Hedley Schools Open

On Monday morning of this week the public schools opened the 1940-41 session with an assembly of parents, students and ex-students. The large crowd enjoyed the opening program on which appear Rev Biggs, Rev Mansard, Miss Ruth Richerson, Mrs Ray Moreman and Miss Dorothy Mathis. Mr Payne urged the parents to enroll in the 'Home Department' of the school and encourage their boys and girls to study hard and attend school regularly. An introduction of personnel was made and notice of the fact that few changes were made was called.

Approximately 250 have enrolled at this printing.

Next was a talk by Mrs. Mosley of rain needed badly, saying she wanted not only just light showers but that she wanted it to just pour and pour. Then the showers came, when it just poured over the honoree's head.

Gay Frock With Princess Waistline

WITH her big roll-brim hat and new patent leathers, she'll look charming as a spring morning, when she steps forth in a breezy little day frock made over pattern No. 1942-B. It's very simple, very smart, with pretty neckline and short sleeves outlined by two rows of braid, and with braid and buttons to trim the front and back panel. The waistline is fitted

and small, as princess waistlines are, and a big fluttery sash bow calls attention to the fact!

This dress is particularly pretty in plaid gingham because the front and back panels are cut bias. But it's also sweet in percale printed with red cherries or pink flowers, or in white pick, with bright ric-rac braid. Certainly your daughter will want it in more than one material, when she sees how nice she looks in it! The simple diagram design is so easy that lots of girls can make it for themselves.

Barbara Bell Pattern No. 1942-B is designed for sizes 4, 6, 8, 10 and 12 years. Size 6 requires 2½ yards of 25-inch material; 6 yards of ric-rac. Send order to:

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strains on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feet constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

Nazi Long Range Guns and Bombers Blast Southeast Coast of Great Britain; Mussolini Seeks Greek Naval Bases; Japan Pushes English Out of Shanghai

(EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper.)

Pictured above is the United States representation on the joint Canadian-American Defense Board now meeting in Ottawa and working out preliminary steps in planning hemisphere defense measures. This photo was taken as the board met with President Roosevelt before proceeding to Canada. Members of the group (reading left to right) are: (Back row) Capt. Harry W. Hill, Lieut. Col. Joseph T. McNarney; Capt. Forrest P. Sherman, Lieut. Gen. Stanley D. Embick, John D. Hickerson. (Front): Mayor Fiorello H. La Guardia of New York City, chairman of the board, and President Roosevelt, seated.

THE WAR: Long Range

Long-range German guns, posted in France along the channel shore, banged away at England, not so many miles away. These were the famous Big Berthas of song and story, but they failed at first to prove much. They shot at ship convoys, but their bore wore out quickly, and they were clumsy and expensive. In the last war, the famous German "Paris gun" was a waste of time, and these promised to be the same. Their objective, of course, was to cut across the channel, and close it tight as a drum. This maneuver failed to worry the increasingly cheerful British.

In their first air attack on Berlin, British bombers swooped out of a night sky directly over the heart of the city, were driven off by anti-aircraft fire and dropped their explosives on the city's outskirts.

The German aerial losses had been terrific, well over 1,000 planes, and maybe many more of them. The land invasion threat appeared to be "out"—for dictators cannot risk the chance of a bloody setback or repulse, especially one of so spectacular a nature. It seemed that the so quick-acting Germans were just a bit puzzled about what to do next. They continued to tighten their blockade of the British Isles by land and sea and air.

The British banged back, by bombing the Heinkel, Messerschmitt, Junkers and Dornier airplane works, and the Zeppelin works on Lake Constance, where the famous Mercedes-Benz air motors are manufactured. Other big industrial plants, in the Germanies, "got" it too, and German nerves (like those of the Americans) are nowhere near as good as stolid Britannic neurology. It began to look like a much longer war, which did not help Willie's chances for the presidency any.

Italics

The Italians continued to bully the Greeks, in quest of Greek naval bases, to use against England in the Eastern Mediterranean. Greece was tied to Turkey, Russia, and England in one way or another, and all three of them expressed interest and sympathy. Would the war spread still further, the critics wondered? Would Greece turn into an Italic Finland? Meanwhile, the Italians took British Somaliland on the Red sea, in an effort to cut the ocean route between England and her treasure-house of India. The British garrison got away, by flight and skill, as it had done already at Narvik, Dunkirk, and elsewhere. They said it was another "moral victory" for the Bullmen. All England had had in Somaliland was some South Africans, the local camel corps (partly mechanized, partly camelled, partly horsed), and a section of the ubiquitous royal air force. The R. A. F., as usual, gave a good account of itself. Not so, the camellaries. The Italians-in-Africa didn't look so good either, although they were in there fighting and making the usual big noise (so the critics declared, en masse).

Chamberlain

Old Chamberlain was on the way out, in politics, and so were Duff Cooper, the stylish propaganda expert, Sir Kingsley Wood, the budget maker, and Cockney Herbert Morrison, the economic bigshot. (Lloyd George, who won the last war, was on his way in, they said.) Lord Halifax, a Chamberlain partner, the one-armed foreign minister, was fading away, and the Laborite Hugh Dalton was scheduled for his ticklish job.

CAMPAIGN: Squabbles?

Willkie found that his ardent supporters consisted of two groups: the independent Willkie clubs, and the dissident Willkie Democrats. His less ardent supporters were a good deal more basic. They consisted of the Republican party regulars, in and out of congress. The regulars were grumbling like Napoleon's Old Guard before Moscow.

Willkie himself is an ex-Democrat and very independent of the regulars in his ways and habits. He is disinclined to lean on the Old Guard, although the Old Guard begs to be leaned against. Old Guardists complained that the candidate was too casual about consulting—and obeying—them. Then again, many of the O. G. are isolation-minded, while the independents and Democratic refugees are inclined, like Willkie himself, to be interventionists. Despite all the Hoosier getup, Willkie definitely, they said, has an eastern outlook (and maybe he has).

Some of the regulars, too, thought that "their man" Willkie was too New Dealish. He did not denounce many of the Roosevelt reforms, but adopted them in principle. He merely promised to "improve" the administration of what the regulars thought was a racket. In fact, the New Dealers said that Willkie was, substantially, "their man," too. This made the regulars—the O. G.—huffer than ever.

F. D. Bonaparte

F. D. Roosevelt-Bonaparte found himself in the same position as Napoleon, in the decisive year 1815. Bonaparte proper had then served two terms, and he wanted a third one. His first term had lasted for 14 years. Then came Elba. His second term lasted 100 days. Then came Waterloo. But the point was this:

Bonaparte (like Roosevelt) depended on the proletariat, as against the economic royalists and Bourbons. The French proletariat hated the Napoleonic conscription like poison, and many American proletarians dislike the prospect of conscription, too. But regardless of their anti-conscription attitude, the French plebs rallied round Napoleon, because they feared the Bourbons would repeal all the Napoleonic social reforms. The American plebs, against conscription though they may be, have the same attitude. They fear that if the "Bourbons" recapture the White House, even though they would scrap conscription, they might also scrap the Roosevelt reformation. Hence, the man in the street is for Roosevelt-Bonaparte.

DEAD:

R. I. P.
They died like flies, the bigshots did. Sir Oliver Lodge of England was one of them. He was the great scientist, mental telepathist, and spiritualist. He was 89, and much beloved by everybody in all countries. Then there was Leon Trotsky, or Comrade Braunstein. He was the organizer of the Red army, the brilliant author, the mortal foe of Stalin, Hitler, Churchill and others.

He was pickaxed by a "good friend," down Mexico way. Everybody blamed it on Stalin and his dread secret Gestapo, but this was really rather unlikely. Trotsky was no longer of enough importance to pester, and Stalin is no fool, or time-waster.

There was also the notable Max Steuer that died. He was New York city's best-known lawyer—though not its best-loved legalist. Senator Wagner of New York indicated that he was such a philanthropist and humanitarian, but many people shook their heads.

Doleful Duo

These seven-year-old twin refugees from Brussels, Belgium, Johannes and Francisus De Baat Doleman, sit and survey the future after landing at Jersey City, N. J., from the child refugee ship the S. S. Exeter. Their trip from Europe was only the first leg of their journey as they expect to continue on to Java in the Dutch East Indies. Many refugee children from Europe are finding homes in the United States.

WHAT THEN? If and How

People began to wonder whether Russia might eventually enter the war on the British imperial side. Critics thought it may be likely, if the war dragged on long enough—and it might. Stalin fears Hitler and Mussolini in the Balkans, and wants to keep his rich Ukrainian province, the No. 2 Russian federal state. But if the Soviets helped England, whither America? It became a moot question.

For strong American business groups hated the communism of Russia, while even stronger religious groups hated the Soviet atheism. Would these people co-operate with an England that boasted a red, red ally. That was the point. Or, if Russia became an English ally, would we start to pamper the American Communists, who would also be the allies of Mr. Churchill?

Spain, Too

Then again—it appeared extremely probable that General Franco's Spain might go in on the German side. What then? Franco is the idol of the ruling class in Spanish America because he saved the Spanish church and crushed the Spanish reds. If our state department started to raze Franco, the ally of Hitler, the South Americans would be infuriated. Then, what would happen to Secretary Hull's "good neighbor" policy? Franco is also a special favorite of the Vatican. If Franco joined the Germans, what effect would that have on the American faithful? Would they not become increasingly isolationist? They would still dislike Hitler, of course, but they could hardly help but admire the great Spanish crusader of 1936-39—the conqueror of Moscow-in-Barcelona. The whole subject was worth detailed American pondering: From Washington to Wala Wala and Yonkers.

POLAND: Tyranny

There was more German tyranny in conquered Poland. The iron military heel was crushing down old Polish customs and ways of life. There came a new decree, of an unheard-of nature. It rocked the steppes, the towns, the metropoli. It was this:

Every taxicab driver in Warsaw and Cracow, Poland's No. 1 and No. 2 cities, must shave at least every other day. The edict declared that it was just as important for cab-drivers to curry themselves as for these cabbies to curry and groom the good old dobbins. Here was an example of the usual combination: German oppression and German cleanliness.

BIG: Bomber

The biggest airplane ever built is nearly finished. It will be the property of the army air corps. The Douglas air factory, near Santa Monica, Calif., has been at work on it for four years. The whole project is astonishing.

This giant plane can fly from New York to Europe, back to New York again, and then out to California—all non-stop. It will have four 2,000 horsepower engines, a wing spread of 212 feet, and 112 feet long.

SHOES:

In la France

La France nationalized all the shoes in the republic. It was done this way: oui, oui. The republic standardized and streamlined its totalitarian footwear. It was to be a standard shoe, manufactured in eight sizes, and it will be the only one permitted on the market. This will cut industrial production costs, lower retail prices, and speed up production. It will cut out all the foot-fripperies a la Parisienne, of yester-year.

It closes neatly with a zipper and may be opened with one hand. The zipper is applied in a curve to make an ample opening, and the bag is held in shape with a board in the bottom. Surely you will want one of these and will want to make one or more for gifts. Christmas is not so far away, and here is something for a man, woman or child.

Everything you need to know to make this bag is given in the sketch. These directions are not in any of the booklets, so be sure to clip them. They said 'Johnnie is smart as a whip' —but he made poor grades

Maybe your child is like that—"smart as a whip," but,
for some reason, doesn't get good grades. If so—well,
now that school is starting again, you might do something
about it. Suppose you try this:

Fix him up a study table and give him a lamp of his own.

You may find the result amazing. Many children, unknow-
ingly, suffer from poor eyesight. Unless they have proper
light for studying, they sometimes
lack interest and enthusiasm for
school work. . . The special shade on an I.E.S. study
lamp spreads the light where it is needed. Call

WHO'S NEWS THIS WEEK

By **LEMUEL F. PARTON**
(Consolidated Features—WNU Service.)

NEW YORK—After 20 years they still tell, in Moscow, how bold Semyor. Konstantovich Timoshenko, then a cavalry chief, led a Red Russian Politician regiment of horse up to **Fixes Up Jobs** Wars a w's **For Commissars** After another 20 years; no doubt, they will still be telling how, in 1940, the same Semyor, then commissar of defense, led more than a regiment of his followers back to the payrolls from which they had been briefly booted.

When Russia blundered to victory over fallen Finland her armies obeyed a double-barreled leadership. Alongside the orthodox military commanders marched as many political commissars, all with the power of veto. Thousands of dead Russians proved the weakness of this command system, and this week Moscow announced that the commissars were out on their various ears.

Overnight, however, they got back—in the army, still. Now they are assistant commanders for political affairs. The old power of veto is gone, but the pay check will be the same. Timoshenko fixed it all up as briskly as any ward boss ever drummed up jobs for the faithful.

Timoshenko has been fixing things up ever since Lenin got a stranglehold on imperial Russia, for himself as well as his party. He is rough and tough, and on the record he has what it takes to get ahead under Communism. His jaw is wide and hard. His eyes have a "See you!" glint. His thin hair grows close to a hard poll, offering no purchase for an enemy's hand.

He got his first real boost in 1937 when he was made commander of the North Caucasian Corps area. His last and best, however, came in May of this year. Then he reached his current job. He is pretty high up now. And in Russia, under Stalin, the higher they go the harder they fall. So those fellows may not be permanently on the payroll after all.

A PLUMP, pleasant middle-aged lady, who likes pink dresses and an old-fashioned hair-do, has the job of seeing that we don't turn too much butter into cannons **Consumer Adviser Assigned to Watch**—or at any rate that we get the butter. As consumer adviser for the national defense advisory commission, Miss Harriet Elliott calls a national conference of retailers to lay the foundation of co-operation in the maintenance of living standards as a bulwark of defense.

She has long maintained that health, housing, recreation, child welfare and general public well-being are bedrock essentials of any defense program. With the above appointment she became the first woman to be "drafted" in the current mobilization of human and material resources.

Miss Elliott is a Quaker and college professor—dean of the woman's college of the University of North Carolina. For 21 years she has been professor of political science at this college and has achieved unique distinction in her daily classroom take-off from the morning newspaper, rather than a text book.

Her theory of education is to proceed from the particular to the general; she thinks Mill and Adam Smith should be left on the shelf until the student can generalize from every-day facts as they come to him in the news. She is wary about theories.

One of her main jobs as consumer adviser is to watch prices. While she has fought profiteers, she is no alarmist about gouging, and believes that all elements in producing and marketing processes will be co-operative if they are sensibly and fairly mobilized. However, she has at hand a portfolio of pretty stiff laws, with the department of justice standing by, if she finds it necessary to invoke them.

Miss Elliott is a native of Carbondale, Ill., where her mother and sister still live. She is an alumna of Park college, Parkville, Mo., and Hanover college, Hanover, Ind., and holds a master's degree from Columbia university. In the first World War, she was a member of the women's council of national defense. It was her work in this post which projected her into her long-continued studies of public well-being as basic requirement for defense.

Star Dust

STAGE-SCREEN-RADIO
By **VIRGINIA VALE**
(Released by Western Newspaper Union.)

IT SEEMS that those year-old twins, Beverly and Barbara Quintanilla, are to play just one baby instead of two in Warner Brothers' "Four Mothers," and all because William Keighley used his head.

The script called for Priscilla Lane to be the mother of a one-year-old child. One of the laws that give directors gray hair is that an infant can't be kept under the lights for more than 20 minutes, and can't work more than two hours a day. So Keighley did some arithmetic and engaged twins for the role. He claims that the scheme has two advantages—it doubles the shooting time, and though one baby isn't in the right mood at the big moment, her sister may be full of ambition.

Members of the company of "Virginia" were sitting around on location, waiting for the shooting to start; off at one side, a young lady

MADELEINE CARROLL

was crocheting. She seemed to be so expert that one of the extras, a local girl, asked if she'd teach her. The pretty crocheter was most affable about it; when the director, Edward H. Griffith, called the players together at last the pupil thanked her. "By the way," she said, "What's your name?" The crocheter replied "Call me Madeleine—Madeleine Carroll."

Maybe this is bribery—but Director Mitchell Leisen has told Ray Milland and Claudette Colbert, co-stars of his picture, "Arise My Love," that if they complete their roles ahead of schedule he will buy each of them a tailored suit. Director Sam Wood also became clothes-conscious and sent little Betty Brewer two sweaters and a plaid skirt for being such a good girl when Claudette's husband, Dr. Joel J. Pressman, took her tonsils out. Not to be outdone by all this generosity, Claudette is working between scenes on a blanket which will be a gift for the Ray Milland heir, little David Daniel.

Paulette Goddard danced three numbers with Fred Astaire for scenes in Paramount's "Second Chorus" and set a record that probably won't be broken in Hollywood for many years to come. Though she has never danced for films before, she did it so well that every dance photographed perfectly in one take, thanks to working like a dog at rehearsals.

Frank Capra seeks realism in his pictures. When Gary Cooper had to protest a decision to a baseball umpire in "Meet John Doe," Capra asked Pat Flaherty, former major league pitcher, what players usually say in such a case.

"You've never seen it printed, have you?" asked Flaherty. Capra shook his head. "Then you wouldn't want to use it in the picture, would you?"

So the protest will just sound like an angry speech by Donald Duck.

"The one, the only, the original Professor Quiz," who recently celebrated his 200th consecutive week on the air, has been broadcasting for four years—during that time he's received almost 2,000,000 letters, containing more than 12,000,000 questions—and has paid out more than \$25,000 in prize money. He's not superstitious, but he refuses to go on the air without the battered old felt hat from which the questions are selected at the broadcast—it was borrowed years ago from a station manager in Charlotte, N. C., and is looked upon as the good luck charm of the show.

Donna Woods' fine soprano voice was going to waste in a mediocre girl trio, and the "Collegians" were a male trio that wasn't getting the breaks, not so long ago. But when they joined talents and became the "Smarties" things began to happen—they auditioned successfully on a Boston station, won several shows, then Horace Heidt heard them, hired them—and now they're known as "Donna and Her Don Juans," and featured with the Musical Knights on the Pot o' Gold and Treasure Chest programs.

Keep the sifter holes on spice boxes closed, otherwise the spices will lose much of their flavor.

When separating the yolks from the whites of eggs, break them over a funnel. The whites will pass through, leaving the yolks in the funnel.

See how oranges help!

Fully half our families are getting too little vitamins and minerals to feel their best, says the Department of Agriculture.

It's easy to get more of these essentials—merely by making oranges your family's daily refreshment!

Feel and eat them. Keep ready a big pitcher of fresh orangeade. Or better yet—Have big, 8-ounce glasses of fresh orange juice with breakfast daily. This gives you all the vitamin C you normally need. Adds vitamins A, B₁ and G and the minerals calcium, phosphorus and iron.

Schoolwork Causes Greatest Eyestrain, Report Shows

Of all the activities carried on in the home under artificial light, schoolwork causes the greatest strain on the eyes if the home is improperly lighted.

This is the opinion of many hundreds of men and women interviewed in an extensive survey conducted in eight midwestern and southern states including Texas.

In discussing the survey, Ted Dudley, local manager of the West Texas Utilities, said that 7 out of 10 persons named reading or schoolwork when asked what activity in the home calls for the best lighting.

Sewing and mending ranked as a strong second in the survey, while cooking, shaving, and similar tasks were considered by others to impose a considerable strain on the eyes in poorly lighted homes.

"Our lighting department," he said, "is glad to make free lighting tests whenever requested. It often is possible to improve light at little or no expense. Our lighting advisors are equipped with a light meter which scientifically determines the proper candlepower for study, reading, mending or any of the various eye usages made in the average home."
