### Washington, D. C. FURY IN THE AIR

U. S. air operations out of England are now by far the most extensive and toughest operations of the U. S. air forces. Fliers who have the Pacific, North Africa, and Europe-say the first three are child's play compared with the current flakand-fighter opposition of Germans.

The first flight a year ago was made without the loss of a single U. S. plane. The Germans were caught off guard by the daylight raid. But such things don't happen any more. It is no secret that U. S. losses on each raid over the continent are high enough to hurt badly, though not high enough to stop the operations.

War correspondents in Britain demissions are the greatest heroes of the war. They have to face more fighting fury, and face it with more war-whether fighting on land, sea or in the air.

### PARATROOP MIRACLE

There was one thrilling bit of untold history regarding the Allied landing in Sicily which only now can be revealed. A division of U. S. parachute troops actually stopped about two Nazi divisions which were dashing to the seacoast to await Al-

This occurred the night before the landing barges arrived. Had the paratroopers not succeeded in holding up the Nazis, U. S. troops might have landed literally in blood.

troopers, coming down mysteriousat night, not far from the Nazi divisions, fooled the enemy into thinking he was outnumbered. Actually, a paratroop division is far inferior in numbers to a division of ground troops. But the Nazis could not tell in the dark how many Americans there were, got the impression that the sky was packed with paratroopers.

So they decided to camp for the night and get ready for a fight the next morning. But by daylight U. S. landing barges were safely ashore.

### LUDWIG'S WARNING

Emil Ludwig, famous German author and biographer, recently had a unique session with the army's school for military government at Charlottesville, Va., as to what the

Allies should do with Germany after

Ludwig gave a series of lectures on how to prevent another Hitler from arising and plunging the world into another war 20 years hence.

Based upon years of studying Bismarck, Hindenburg and the Kaiser, the German historian urged that there be a strong army of occupation by all the United Nations for at least five years.

"The German people should know for the first time in 130 years," he said, "what a foreign authority looks to understand that they have been defeated."

Ludwig pointed out that German militarism always had come from Prussia, while Germany's culture had come from the south and west. Therefore he proposed splitting Germany up into two states: (1) Prussia, small and isolated; and (2) Bavaria, Saxony, and the smaller Catholic German states which are not militaristic and which would be joined with Austria. This would put the Catholics in one country and the Lutheran Prussians in another.

No 4Poor Misguided' Germans. "Leave to the Germans all that other nations have," Ludwig recommended, "but take away their weapons, supervise their education, and give them political guardianship. If you do not, and if you speak of the 'poor misguided German people,' then 20 years from now your sons will be fighting another war against them.

"What I fear," continued Ludwig. "is that on the day after the death of Hitler, the Junkers, the generals will kowtow to you and say, We love Americans. Come, let us be brothers again.' I fear that some of you will say, 'Now let us make peace. They are good people, these generals.

"But they are not. They are not one whit better than the Hitlers. They merely have better manners,' Ludwig declared.

Note: Ludwig paid tributes privately to the excellent job the army was doing at its school for military government. He said he had seldom met such an intelligent, progressive group of men, with such a grasp on the world's future prob-

### CAPITAL CHAFF

Quite a few Italian soldiers in Sicily undressed, hid their uniform put on overalls and went home to work to avoid becoming prisoners. When forthright ex-assistant secretary of war Louis Johnson got back from India his report was so, critical of the British that state department officials scarcely believed parts of it. But after Ambassador Bill Philips got back from his India survey. Undersecretary Sumner telles told Johnson that pro-British phillips was in complete agreement.

BOYCE HOUSE

A good story is told by Charles Dean, former prosecuting attorney of the Plainview district. In the 'good old days" of long ago, it was the custom of some defense to move a checker out into an attorneys, after a case had gone to the jury, for some one of them shove it forward with his foreto climb up over the actic rafters fincer and, at the same time, and try to hear what the jurors were saying. In one important case, the defendant's attorneys drew straws and the looser made his way to the "observation post." He came back, brushed of the cobwebs and, when asked what it looked like the jury would do, he

"I haven't the least idea. The only thing I heard was when one

itics, sneered a while back at Tex- like to be humbuged."

nation in the number of volun-teers, He said that the standard of living is so low down here that the army pay looks like a fortune. His statement is, of urse, a slander on our patriotic oldiers and sailors who are of\_ ering their lives for their country including such ingretes as the urrilous Eastern commentator, But he keeps on writing for the big city paper so the owner and e editor must approve of such slime, too, or else they would

have fired him.

Speaking of checkers (which we were some weeks ago) I once knew a man who had a crooked joint on the second finger of his left hand. If he was about to have unprotected position, he would would arag another checker along with that-wraped forefinger, his hand concealing this extra move, has been established at the Uni-His frenids were "on" to him and versity of Texas, so that this fall he didn't try this with them but stranger would look at him puzzled and say, "I could have sworn that checker was going to be out there by itself."

Referring to the Tennessee city, juror asked, 'How do you spell P. T. Barnum — prince of show-penitentiary.' " men — remarked, "There are more fools with half-dollars in One of the smart alecks of the Memphis than any other place in "You can fool some of the people East, who writes a column of mis- the world. And it was Barnum all of the time, and all of the peoinformation on the war and pol. who said, "The American people ple some of the time but you can't

as because our state leads the A similar remark, but much time,"

We proudly salute the members of our organization who are members of the armed forces of the United States.

more optimistic, was Lincoln's fool-all of the people all of the

"I'm Not Dreamin Utopia!"

Indeed, I'm not!" the soldier said, as he fifted his head high and looked into the future.

"I'm dreaming of something much more real and much more American than that! I'm dreamin' of an OPPORTUNITY" he continued, "of the chance to make a living the American way-working till I'm tired, but very happy, the way my Dad always has.

"That's what all of us soldiers are dreaming about. Honest, we don't want dole or charity. We just want to be back in our own home towns in the little yellow houses on Main Street making a living down at Joe's garage, while we're saving money to buy one

"This American way of living, this system of free enterprise, has certainly done a

wonderful thing for the war-take the electric indust y for example-90% of all the electric power surplying the munitions is being produced by companies like the one in my horse town. That same company serves lots or home towns, and it's doing a big job for all of us soldiers by perpetuating freedom of enterprise. /

"That's the opportunity we soldiers are dreaming about. It's bred into the very soul of American life. It means that any man or woman is free to create a business that fills a particular need in my town or any other community, just so long as they give the best possible service at the lowest possible cost to the most people.

"That's what I'm fighting for! "That's what I'm dreamin' about!"

## When Your Back Hurts ·

And Your Strength and

Energy Is Below Par It may be caused by disorder of kid-ney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the

icids and other washed blood.
You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.
There should be no doubt that prompt treatment is wiser than neglect. Use
