**Defensive Driving**

The following is suggested by the Dept of Public Safety:

Defensive driving is the ability to recognize an accident producing situation far enough in advance to compensate for it by your own driving. In other words, drive ahead of yourself and be prepared for the other man's actions.

One of the greatest faults of the American driver today is hiding behind the false security of having the right of way. Give the right of way, don't take it, and you will greatly assist in the reduction of traffic accidents

Epitaph:

Here lies the remains of John O. Day  
 Who died defending his right of way,  
 Now John was right as he sped along  
 But he's just as dead as if he'd been wrong
