His companion, Pvt. Charles D. Pinkston, 21, who was driving the car, was also killed in the crash.

Funeral services for Mr. Morton were held Saturday in Griggs Pioneer Chapel at Amarillo by Rev. Noland M. Kennedy, pastor of San Jacinto Baptist Church. Burial was in the Clarendon cemetery. Clean Up

At last week's meeting of the City Council it was decided to start a clean up drive starting the week of July 16th. They would like the aid of the Lions Club, American Legion, all ladies clubs, county, school, and all others to make this a real clean up and fix up campaign. They promise the support of the city employees, their trucks and equipment.

Flies, mosquitoes, and other insects followed by sickness will come unless we do have this campaign. One case of typhoid, even if not fatal, will cost more than the entire clean up. Let's give it our full support.

3 A.M. in a pharmacy...

It is 3 A.M. in a community pharmacy. The street is in darkness, yet lights are on in the pharmacy. Why? Because the pharmacist is faced with an emergency.

He received an urgent telephone call at 2:50 A.M. Mrs. Saxon, a sufferer from asthma, was having severe difficulty in breathing. Her husband told the pharmacist that she had run out of the medicine prescribed by her physician.

The pharmacist dressed quickly, rushed to his store, located the original prescription in his files, telephoned to Mrs. Saxon's physician, prepared and delivered the medication. Soon, Mrs. Saxon was breathing normally again, and a possible tragedy had been averted.

Such crises are frequent, yet your pharmacist meets them with speed and confidence as part of his complex professional duties. Today, a pharmacist goes to college for five years, spends many hundreds of hours in apprenticeship, and must pass a rigorous

state examination before he is licensed. He must stock thousands of dollars worth of health products you need every day—as well as those you may need only once in a lifetime.

It was not by chance that the pharmacist had the proper drug ready for Mrs. Saxon when she needed it. We call the complex process by which a drug moves from manufacturer to patient "the miracle of drug distribution."

The teamwork of manufacturer, drug wholesaler and pharmacist assures that you—as well as Mrs. Saxon—will always receive the medicine you need. This miracle of drug distribution—the fact that the medicine you need is ready when you need it—is just one reason why prescriptions are today's best bargains.

A. S. C. News

Summer Performance Work

Reporters have started measuring cotton, feed grains, soil bank base crops, diverted acreage and etc and you must assist the reporter when he visits the farm so that fields will be accurately measured.

Fields originally planted to cotton that have been flooded out should be designated so credit can be given for this acreage as cotton history if it is needed. As you know, if less than 75% of the cotton allotment is planted the history for future years will be reduced; therefore it is very important that we include all cotton acreage destroyed beyond the producers control. Acreage diverted under a Conservation Reserve or Great Plains contract contributes to cotton history; also cotton acreage released is considered as acreage planted. Most revisits to farms after the original measurements must be paid by the producer. The following rate will apply for revisits to farms to check disposition of cotton, feed grains, diverted acreage and soil bank base crops: \$4.00 per farm, plus \$2.00 for each plot over one. To have a farm remeasured for error will cost \$10.00 per farm, plus \$4.00 for each plot over one.

Diverted Acreage

Remember that all acreages designated as diverted under the wheat stabilization and feed grain programs must be planted to an eligible cover crop unless you have obtained approval from the county committee to summer fallow the land.

Again we wish to remind you that no crop can be harvested from the diverted acreage and no grazing will be permitted unless it is authorized later this year.
