Vehicle Registration

Austin—The Texas Highway Department reported today that more than 6.7 million motor vehicles will be registered in Texas in 1967 and urged car owners to buy their license plates early.

The new license plates may be purchased during February and March at county tax assessor-collector's offices or at authorized sub-stations. New license plates must be displayed after midnight April 1.

A Highway Department spokesman said motorists can help shorten waiting lines and speed up registration by buying license plates early and by presenting proper ownership documents.

Car owners are required by law to present certificates of title and last year's license plate receipts when renewing vehicle registrations.

Hedley Informer:

There is a sadness in parting with the friends we have made during the twenty-five years we lived in Hedley. There will always be a pleasant memory and a warm feeling in our hearts for these people. In leaving we could not see them all. Many came by and expressed their regrets that we were going. We deeply appreciate the interest shown.

Our trip to Alabama was made without mishap, though fog and mist made it hazardous from Paris, Texas, where we spent the night, all the way to Memphis, Tenn. and driving was cautious and as slow as twenty miles per hour over this part of the journey. We were glad to reach our journey's end. Friends and relatives were waiting to welcome us.

Alabama thanks the farmers for letting him wolf hunt on their land.

News From Our County Agent

Donley County stockmen are being advised by County Agent Ronald Gooch to be on the lookout for lice on their livestock. These pests can reduce profits and increase feeding costs for the winter unless they are controlled. Research indicates that heavy infestations of lice can increase the winter weight loss in weaner heifers by 300 percent and nearly double the weight loss in mature cattle, if the lice are not controlled.

Livestock producers are reminded that copies of MP-691, "Texas Guide for Controlling External Parasites of Livestock and Poultry" are available at your County Agent's office.

The publication contains information on insecticides formulations and how to use them for controlling external livestock and poultry parasites. It contains a dilution chart for mixing sprays and dips and outlines control programs for all kinds of livestock.

Lice infestations spread more rapidly when livestock are confined to smaller areas, and if allowed to multiply, can materially affect the general well-being of the herd, points out the county agent.

Any qualified citizen may run for this office. Deadline for placing a name on the ballot will be March 4.

THE WATT *and* THE KILOWATT

Producing power is a gigantic battle with nature. The windmill produces enough power to pump water from the ground—something a few watts of electricity can do. But the huge generating plants which produce the power transmitted over the vast network of WTU transmission lines which reach from the Red River to the Rio Grande are measured in kilowatts—hundreds of thousands of them. Power enough to serve 166 cities and towns in 50 West Texas counties. You can live better electrically—West Texas Utilities provides the kilowatts.
