## New Texas Law Sets "Slow-Pokes" Right

Under a law which went into effect Monday, Sept. 1, vehicles traveling at less than normal speed of traffic on divided highways must be driven in the right-hand lane or as close as practicable to the right-hand curb or edge of the roadway, except when passing.

In commenting on the new law, the safety association expresses hope that the traffic measure will be a practical solution to the mounting problem of slow drivers who tie up traffic on heavy traveled roads and are frequently a contributing factor in traffic crashes.

The new law should also ease the tension of drivers who use the high speed inside lanes on divided highways and not only find it mechanically difficult but also emotionally difficult to cope with such drivers, the Safety Association continued.

Many drivers become quite irritated when there is no safe way to pass a slow driver. They often take risks that they would not ordinarily take and wind up in trouble.

Another provision of the new traffic law calls for all moving traffic to stay right of the center line on roadways having four or more lanes of traffic, except when authorized to go to the left by traffic control devices, or when making left turns into or from an alley, private roads or driveways, regardless of whether there is a double yellow stripe or not.
