## Receives Certificate

The Texas State Health Department has awarded its official certificate of competency for the oldest ecology oriented profession in Texas to Monte O. Weatherly of Hedley, Texas.

Mr. Weatherly is employed by the City of Hedley. To practice water ecology in Texas, he has been taught effective ways for producing safe drinking water and treatments to make wastewater into clean streams for public use.

Because of this training, through the Texas Water Utilities Association, the largest water and wastewater training school in the U S, there are cleaner streams and better operated facilities here than any other section of the country.

He received the certificate only after completing a formal and specialized education accumulated a prescribed amount of actual work experience, and passed the examination given by the State Health Department's Sanitary Engineering Section.

Our growing concern over clean water makes the water ecologist one of the most important workers in the community. Though his efforts are not seen by those he serves, his results are visible every time one turns on a tap.

J B Yates was here from Memphis last Wednesday.

Misty Clendennen underwent surgery in Amarillo last Wednesday.

Question:

# Will you have enough natural gas for your home this winter?

Answer:

# Yes!

Let's lay this question to rest once and for all. Lone Star Gas Company has enough natural gas reserves under contract to adequately supply our residential, commercial and other higher priority customers for many winters.

To be sure we have enough for these consumers, we will make some extensive curtailments of service to our large volume customers during extreme cold weather this winter. In fact, our contracts with large volume customers anticipate the need to curtail up to 100% of their needs during these cold periods. This allows us to assure service to residential, commercial and other higher priority customers.

We're taking major steps to make sure you have gas for the future. New gas we're buying costs more than *four times the price* we paid just a few years ago. This is an astonishing amount of money! But it's the price all of us must pay for a continuing supply of natural gas energy.

This winter, and in the future, natural gas from Lone Star will continue to be your best method of home heating, water heating and cooking...just as it has been for more than 40 years. But we all must remember to help conserve this precious energy fuel.
