# DON'T THINK CONSERVATION DO IT!

Sometimes we tend to feel that "the other guy" should be more careful about wasting energy. But if we're going to make energy conservation work, all of us...large

and small energy consumers alike... will have to keep working at it.

We usually stress all the ways that folks living in homes and apartments can save energy. But what about office buildings and industrial plants? Can't they help too?

Sure. And we'd like to suggest some simple steps for reducing energy consumption for businesses and industrial complexes. These suggestions are based on Lone Star's own efforts to reduce energy use by 11% in our own company.

#### Inside Buildings

1. Alter air temperatures to 68 when heating, and 77 when cooling.
2. Reduce elevator services between the non-peak hours of 9-11:30 a.m. and 2-4 p.m.
3. Reduce light levels in all areas below present levels.
4. Turn off floor lighting completely at 7 p.m., except for cleaning times.
5. When leaving, employees should close blinds and drapes and turn off lights.

#### Operation of Vehicles

1. Encourage employees to observe the state's maximum speed limit of 55 mph on both personal and company vehicles.
2. Establish employee car pools.
3. Print guidelines to distribute to employees who operate company-owned vehicles or machinery for proper use and care.

#### Industrial Complexes

Examine warehouses, plants and maintenance shops to find wasteful energy problems. This includes keeping doors closed when there is no traffic, and avoid overheating large plant areas from heating units located near large exits.

We can all contribute! With your help we can make an even larger contribution to America's energy conservation program in the next four months!

Lone Star Gas

Clean, efficient energy for years to come.

# They laughed when I bought my first Bond.

In my neighborhood everyone was poor. Most of us were lucky if we had enough food to eat or clothes to wear. So like most kids we spent a lot of time talking about the things we wanted out of life. Things like owning a big car, wearing fine clothes and going to all of the best places. Boy, we could hardly wait to grow up.

Like the other kids I had little odd jobs in grammar school but I got my first real job when I started high school. I was a junior clerk in a big department store. That's where I first heard about U.S. Savings Bonds. My boss asked me if I wanted to join the Payroll Savings Plan and I said yes. A month later I got my first bond.

When my friends found out they really had a good laugh. Imagine buying U.S. Savings Bonds when there were so many other great things to buy. Well, they kept laughing and I kept saving all through high school.

After graduation some of us wanted to go to college. And that's when my Bonds really came in handy. They not only helped pay my tuition, but also helped buy some books.

Well, I'm a senior now and looking forward to graduation. Unfortunately, a lot of my friends never even got started. And to think, they laughed when I bought my first Bond.

Now E Bonds pay 5 1/4% interest when held to maturity of 5 years, 10 months (4% the first year). Bonds are replaced if lost, stolen, or destroyed. When needed they can be cashed at your bank. Interest is not subject to state or local income taxes, and federal tax may be deferred until redemption.

## Greenbelt News

The January 1974 water purchases from the Greenbelt Water Authority showed an increase of almost 4 million gallons over January 1973. While the member cities of Childress, Quanah, Clarendon and Crowell showed a decrease in water consumption Hedley showed a slight increase. In January 1973 Hedley used 1,161,000 gallons and in January 1974 we used 1,199,000 gallons. The increase came from the Red River Water Authority, which covers the rural areas, and Bestwall at Acme.

The Red River Authority's water usage jumped from 3,191,000 gallons in January 1973 to 11,076,000 gallons in January 1974. Bestwall at Acme used 3,510,000 gallons in January 1973 and 5,453,000 gallons in January 1974.

Greenbelt water is now being used about 15 miles past Crowell. Rural water lines have been built or are being built along most of the line. One line will run almost to Turkey.

Next meeting of the Greenbelt Authority will be at the filter plant at 5:30 March 7. At this time a reserve reservoir on Lake Creek will be discussed. Hedley board members are Clifford Johnson director, and Vergil McPherson and Fred Stafford associate directors.

Mr and Mrs Jimmy Boliver were here from Amarillo last week end.

## Storm Warning

Since the tornado season is with us again, it is time to remind everyone of the signals sounded by the fire siren. One blast of the siren indicates a fire, two blasts are to call the department together, and three blasts indicate a storm.

Three blasts do not necessarily indicate that a tornado has been sighted, but they do mean that everyone should watch the clouds and take whatever action seems to be necessary.
