WHAT YOU SHOULD KNOW  
ABOUT YOUR PRESCRIPTION:

# The investment behind it

Each year the drug industry invests millions of dollars in research to support the nearly one billion prescriptions filled yearly by pharmacists throughout the country. This investment results in new "wonder drugs" which let us live our lives longer, healthier. Of the 300 million dollars invested last year more than 150 million dollars went for quality control research. Improved precision measuring and compounding instruments were developed to make even more certain you receive exactly what your doctor prescribes. And the investment also went for developing improved methods of production. As the methods of manufacturing improve, the price of the bulk drug decreases. This saving is passed on to you in lower prescription prices. The "gold pill" of yesterday is purchased today for a nominal amount. Thus, a conscientious, developing industry works to improve the service and quality of the pharmaceuticals you receive today and tomorrow.

For the highest pharmaceutical standards, low prices consistent with quality and the personal attention you can always depend upon, bring your prescriptions to

# There's a future in it for someone.

Your son's education for instance.  
But by the time he's ready for college his education may well cost a small fortune.  
The kind you just don't have lying around under a bed.  
That's just the reason why your government has a great thing going. A U.S. Savings Bond.  
In themselves they're not a quick buck. They won't make you that fortune overnight. But in the long run they do pay off. Darn well at that. And at a guaranteed rate. Starting a savings plan is easy. You can join a Payroll Savings Plan where you work. Or get into a Bond-A-Month Plan where you bank. Then watch someone's future grow. Like your son's.
