Card of Thanks

I'd like to take this means of saying Thank You to everyone for everything they did for me and my folks while I was in the hospital and since I've been home. The money cards, and letters, visits, and maybe most important the prayers, were all appreciated.

Hopefully I'll be up on crutches soon and can see some of you and thank you in person. God's blessings be on you.

Are you going to live longer than your money?

Maybe you're having a pretty good life now. Your credit is good, you've got a few nice clothes and a good dependable car. And if you're lucky, maybe you own your own home. But that's because you're working. What happens when you retire? You can't live on memories. It's still going to take money. Lots of money. Money that you should be saving now.

And one of the easiest ways to start putting away a few dollars for those retirement years is by joining the Payroll Savings Plan where you work and buying U.S. Savings Bonds.

That way every time you earn a little money for today, you save a little for tomorrow.

Then when the time finally comes to retire, you'll have something put away to retire to.

How it works: Buy \$100 U.S. Savings Bonds every month. If you don't have \$100, you can buy \$25 bonds every two weeks. Bonds are insured by the U.S. Government. They cannot be stolen or destroyed. When needed they can be cashed at your bank. Interest is paid either to your bank or to you. All federal tax may be deferred until redemption.

ON ELECTRIC COOKING

- ★ Don't be an oven-peeper. Every time you open the door, you lose 20% of the heat.
- ★ Plan oven meals to accommodate more than one dish at a time, or time your baking for multiple dishes. Most recipes can stand a 25° F. temperature variation.
- ★ Get foods for baking into the oven the moment it reaches the right temperature. Remember, you don't have to pre-heat the oven for broiling or roasting.
- ★ Use the high setting to bring foods to steaming then switch to the lowest heat needed to complete cooking. Turn off surface units before cooking is complete and let the retained heat finish the job.

There's a future in it for someone.

Your son's education for instance.

But by the time he's ready for college his education may well cost a small fortune.

The kind you just don't have lying around under a bed.

That's just the reason why your government has a great thing going. A U.S. Savings Bond.

In themselves they're not a quick buck. They won't make you that fortune overnight.

But in the long run they do pay off. Darn well at that. And at a guaranteed rate.

Starting a savings plan is easy.

You can join a Payroll Savings Plan where you work. Or get into a Bond-A-Month Plan where you bank.

Then watch someone's future grow. Like your son's.
