

NORTON FOX, 31 ENTERS RACE FOR GOVERNOR

Norton Fox is 31 Year-Old Candidate for Governor

Norton Fox, a West Texas lad, student of Baylor University, and a brother of the three Fox boys of Spur has thrown his hat into the ring of the coming gubernatorial campaign, according to the Baylor Lariat.

Norton Fox is a young man of highest integrity, and ability, a school mate of ours and one whom we admired and respected and feel is fully capable of discharging any duty that may come before the highest executive of this State, in a manner fully worthy of the respect shown him should he be elected.

While we may seem to take a personal interest in the campaign of Mr. Fox for the office of Governor, we will limit ourselves to facts. Norton Fox is a man who has worked his way through high school as well as college and is now in his second year law. And regardless of the traditions to the effect that a man must be wealthy and meekly desire the office as an honor in order to be able financially to make the race for governor, we maintain that a commonwealth should be given due consideration whether we have a million stickers and nickle cigars or no.

But speaking seriously, Norton's issues are promotion of aviation and the rewriting of the constitution of the State of Texas; and we might say that he is backed in his views by Hon. Pat M. Neff and many other prominent statesmen well known among us.

Further details of Mr. Fox's platform will be published in this paper. His campaign slogan is, "Vote for the Flying Fox."

Work on Spur and Dickens Highway Now Under Way

Work is now under way on the Spur and Dickens Highway, the work being commenced on that part of the changes in the route, thus not interrupting traffic more than necessary. A double bridge will be constructed over Duck Creek about one fourth of a mile north of the present bridge, and the entire roadway will be widened to one hundred feet, and topped with asphalt.

The present bridge over Duck Creek, which has been out of commission since the recent heavy rains, will be repaired for use until the new bridge is completed and the roadway opened to traffic.

A survey of the highway south and east out of Spur to the Kent county line is being surveyed, and very probably will be topped with asphalt by the highway department, upon the completion of the work now in progress on the Spur-Dickens link of the highway.

Secretary Patrick, of the Spur Chamber of Commerce, is also co-operating with other counties and chambers of commerce in securing the north and south highway routed through Spur, and which will mean much in turning traffic and travel this way.

Willie Bell Laid Up With Broken Leg in Recent Accident

Willie Bell, of Bell's Cafe, is now laid up with a broken leg and other injuries sustained last week when he fell down the basement stairs of the Sullivan building. His leg was broken between the knee and ankle, and other injuries were sustained.

The physicians and surgeons say that he will be incapacitated for at least two months.

J. L. Jenkins, of Prairie Chapel, was among the business visitors on the streets Tuesday. He reports a good rain and everything now in fine shape in the northeast part of the county.

Albin Resigns and Foreman Appointed Co. Commissioner

At a meeting of the County Commissioners Court Monday of this week H. O. Albin, Commissioner of Precinct Three, tendered his resignation and W. F. Foreman, of the Espuela community was appointed to take the place. Mr. Foreman immediately made the required bond to hold the office and assumed his duties following the appointment.

H. O. Albin has ably and efficiently served the county and this precinct as commissioner. His resignation of the place came as a surprise to his many friends.

W. F. Foreman is a good man for the place. He is familiar with the needs and conditions of the county and precinct, is conservative and progressive and will ably and efficiently carry on the work without interruption.

Girl Scouts Will Have a Big Carnival in Spur Halloween Night

The Spur Girl Scouts are now arranging to have a big carnival at some prominent place in the city Halloween night, and at which time a varied entertaining program will be given.

A contest for the best-looking baby will be one of the features of the carnival. In the contest ten cents per 100 votes will be charged, and a lovely gift will be presented the winner.

A contest for the ugliest man will also be had, the votes being ten cents per hundred.

In connection with the contests there will be a varied entertaining program, and the night will be made not only pleasant and entertaining, but interesting and beneficial to all who attend.

Mrs. Dawson Will Lecture on "Fallen Womanhood" Sunday

Mrs. Dawson, pastor of the Church of the Nazarene of Spur, will give a lecture Sunday afternoon at the New Palace Theatre at three o'clock. The subject of the lecture will be "Fallen Womanhood." In connection with the lecture a program of sacred concert music will be given by the Paul Smith Orchestra, songs by the Spur Quartet, prayer by Rev. Rogers, a solo by Mrs. Zachry, and benediction by Rev. Vaughn.

Mrs. Dawson, for eight years has been engaged in rescue work in connection with the Rest Cottage of Pilot Point. She is a good speaker, has had much experience in this work in the oil fields, and her lecture will not only interest but benefit those who hear it.

B. Y. P. U. Day Observed at First Baptist Church Oct. 20

Sunday, October 20, is set aside by the Spur Baptist Church as B. Y. P. U. Day. At 6:45 p. m. the regular B. Y. P. U., each Union and B. Y. P. U. of the entire training service will render an interesting and inspiring program. These programs will be a spiritual feast for the children as well as for the adults.

The purpose of B. Y. P. U. Day is to introduce the work of training service of the Baptist church to the hundreds of people who have as yet not become especially interested in it. Plans are being made for a record-breaking attendance of 500.

The Baptist Church cordially invites you, who will not be in other church services, to visit the Training Service at this time. There is place for every boy, girl, man and woman of every age. Come!

Mr. and Mrs. E. C. Edmonds left Tuesday morning for a trip and visit to Fort Worth where several days will be spent with Mrs. Edmonds' mother, Mrs. G. H. Connell.

The Little Mind-Reader

By Albert T. Reid

"I know what you are thinking—I know just exactly what that hat looks just as good as new, and you think you'll put it away. That's what you do each year at this time, and in the spring you throw it away. If we had all the storage space it has taken we would have a couple of new rooms on our place."

1760 Bales Cotton Ginned in Spur to Saturday Night

Up to last Saturday night the several gins of Spur had ginned the total number of 1760 bales of cotton for the season, the rains having delayed both gathering and ginning since that time.

It is estimated by those familiar with the cotton conditions and prevailing situation that the cotton crop of the country is now one-half gathered, and that not more than four thousand bales will be ginned in Spur this season.

Following is the number of bales ginned up to October 1st, in Dickens and other surrounding counties: Dickens county, 2,116, and 449 in 1928; Crosby county, 3,659, and 98 in 1928; Garza county, 1,353, and 50 in 1928; Fisher county, 4,413, and 1,546 in 1928; Cottle county, 4,461, and 2,480 in 1928; Kent county, 1,161, and 383 in 1928; King county, 464, and 289 in 1928; Stonewall county, 1,005, and 932 in '28; Motley county 1,826, and 862 in 1928.

Piggly Wiggly Gives Jersey Cow to Mrs. Bailey Saturday

Piggly Wiggly last Saturday afternoon drew an immense crowd to the band stand in Spur where they awarded a Jersey cow to one of their many customers, Mrs. E. C. Bailey, a widow lady, being fortunate in getting the cow.

During the time of the cow contest Piggly Wiggly issued more than twenty thousand tickets to customers of the business in Spur, and thousands of these customers were present when the award was made.

Usually in a contest everybody is dissatisfied and disgruntled but the successful contestant, but in this instance everybody, since they did not get the cow, was glad that Mrs. Bailey did.

Three Inches Rain Puts Spur Country in Fine Shape

Rain commenced falling Friday of last week over the Spur country, registering a total of near two inches by Saturday morning, continuing over Saturday and Saturday night, making possibly a total average rainfall over the entire country of approximately three inches.

The rain did immeasurable good to the wheat, barley and small grain crops recently sown on practically every farm in the country, and it is said that but little if any damage was done to the staple crop of cotton.

A season of some eight or ten inches is now in the ground, and with another good rain later the country will have a bottom season and ideal conditions for the beginning of another crop year.

Mr. and Mrs. Smith Leave This Week for Eastern Markets

Mr. and Mrs. J. Mort Smith, of the exclusive Smith Shoe Store, left Tuesday of this week for Dallas, Ft. Worth and other markets to purchase new stocks of shoes and hosiery for their business in Spur. Mr. and Mrs. Smith will spend several days in the markets, and during their absence Mrs. H. C. Perry will have charge of the Smith Shoe Store.

WANTED—Several girls for general housework in Amarillo, pleasant homes, good wages. Also business or Junior College girls who wish to work for board and room while attending school.—Mrs. G. Q. Saunders, 2406 Hughes Street, Amarillo, Texas.

Uncle Wash Roberson, of the Duncan Flat community, was in Spur last Monday, and while here paid us a very pleasant visit—recalling the 'olden days' in the early history of Spur. Uncle Wash stated that he had about a five-bale crop left from the hail storms earlier in the season, but was living easy in the prospect of more favorable conditions and seasons another year. We recall that in earlier days here, Uncle Wash, C. A. Jones and other good farmers would market fifty or a hundred bales in Spur, spend money freely and take several holidays in the city. Those were halcyon days—but conditions and opportunities are much better and more varied today—because everybody has worked to promote and advance the general interests of the country—and there is and should be greater opportunities, pleasures and prosperity than in the past.

Everybody was here during the fair—therefore it is impossible to mention them all.

Mr. and Mrs. G. W. Day, of the Elton community, were shopping in Spur Tuesday of this week. They report a good rain and everything in fine shape in the north part of the county.

Newt Kidd, of the Dry Lake community, was greeting his friends on the streets Tuesday of this week. He reports plenty rain and everything now lovely.

John D. Hufsteler, of the Dockum Valley Farm, was among the business visitors in Spur Tuesday of this past week.

W. D. Davis, of McAdoo, was in Spur Tuesday. He stated that rain had prevented cotton gathering the past week, but that little damage in comparison with the good was done by rain at this time. Many farmers of the Plains country have sown grain and the good rains at this time will push this grazing along to real and material advantage.

W. L. Lusk and daughter, of near Dickens, were in Spur Tuesday afternoon shopping and transacting business affairs.

D. G. Simmons, of Duck Creek, was in the city Wednesday.

Lee Watson, of McAdoo, was in Spur Tuesday. The big rains of the past week has slowed up cotton gathering, but at the same time has helped wheat and grain crops in every community.

J. I. Greer was among those here during the week, transacting business and meeting with his friends of the town.

We understand that M. Hargrove, who has been in a hospital at Temple the past several weeks has sufficiently recovered to return home during the next week. Mr. Hargrove has had a hard time the past year, having undergone several operations, and it is hoped that he will be completely cured by this last trip to Temple.

Ted Brannen has been spending several days here this week with Dr. M. H. Brannen and wife and other relatives and friends, from Oklahoma City. For a number of years Ted has been street car conductor for the Oklahoma City Street Railway Co., and very probably has a permanent place with them. Ted stated that in Oklahoma they had such a good system of street car service that the

bus cars and lines had interfered very little with them.

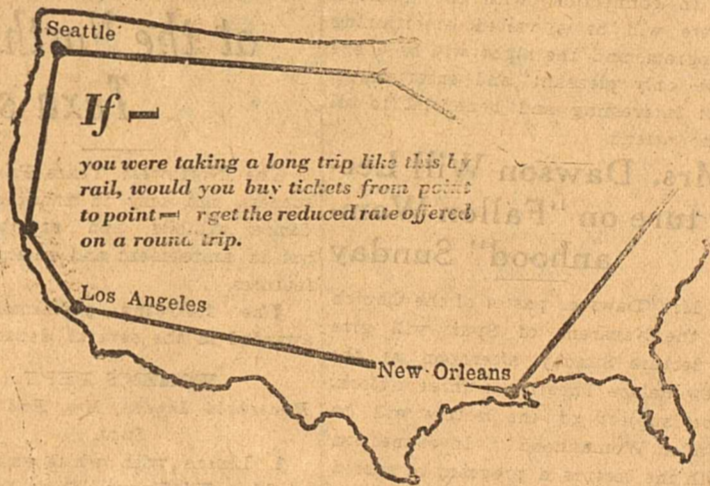

R. J. Bateman and daughter, of north of the city, were here Tuesday, shopping.

R. J. Hargrove, of the Dry Lake settlement, was in town Tuesday on business.

RAIN DOES PLAINS CROPS GOOD

Ward Harris came down last Tuesday from his farm home on the Plains near McAdoo, spending some time here on business and meeting with his friends. He reports good rains on the Plains, bringing out the wheat and other small grain crops of that section. Many acres of wheat, barley and other grazing crops have been sown in the country, and this rain came at the proper time to bring the crops on out.

G. W. Allen, of the McAdoo section of country, was among the business visitors in Spur Tuesday of this week. He reports a fine rain on the Plains, coming at the proper time to bring out the crops of wheat, rye, barley and other small grain and grazing crops. He added further that the rain would do little damage, if any, to the cotton crops, since it was already about half gathered and of such staple that rain would not cause injury.

If you were taking a long trip like this by rail, would you buy tickets from point to point—get the reduced rates offered on a round trip.

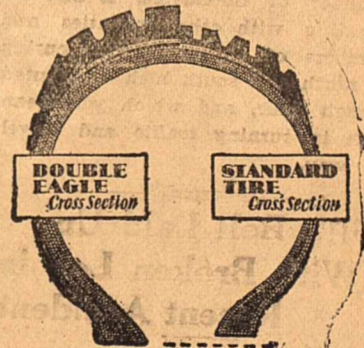

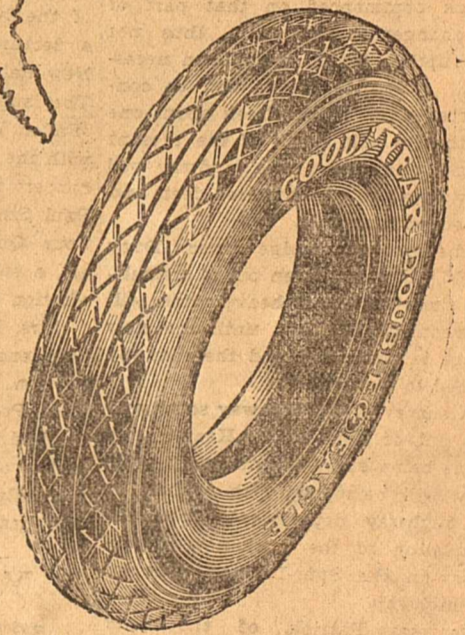

Reduced "Rates" on High Tire Mileages

IT WILL save you money, time, bother—if you intend rolling up high mileage on your car—to buy Goodyear Double Eagle Tires.

As in the case of round trip tickets, they cost more to purchase but much less than one-way fares in the end.

Originated by the world's largest rubber company—built, without limit as to cost, to be the longest lasting, most comfortable, safest in the world—Goodyear Double Eagles not successfully imitated. We stand ready PROVE this fact to you!

Inquire about our attractive Change-over proposition this week.

GIBSON GROCERY

GIRARD NEWS.

Mrs. Gertrude Pursley and daughter, Miss Thelma, were in Girard on business last week.

Mrs. Ted Darden and daughter, Miss Viola, visited Mrs. Kerley Sunday afternoon.

Joe Turner, who has been working near Seminole, is back in Girard.

Girard people are feeling better after the good rain last Friday night. Sam Graves shipped a car of cattle from Girard this week.

Dunk Teague has gone to Brownfield to join his mother and sister who are working out there.

Mrs. Jinks Cooper and Mrs. Joe Turner visited Mrs. Harris Harwell Monday.

Arol Kerley, Crockett Turner and Red Long, left Monday for other parts to hunt work.

Miss Lena Langford, who has been visiting at the home of J. W. Langford, returned Saturday to Littlefield.

There was a singing Sunday in the high school auditorium. Those present enjoyed it.

Many Girard people went to the Spur fair this week, and all seemed to enjoy it. We hope some day to have a big fair at Girard.

A new stucco building is being now erected in Girard for the central telephone office. We are proud to see this building constructed in the city of Girard.

School was dismissed Friday at noon because of the fair in Spur.

We are very proud to see that the streets of Girard have been worked, although the work will have to be done over since the rain.

One of the vacant rooms in our school has been cleaned and the door facings and windows varnished to make a special assembly room for high school girls. Curtains have been made for windows, and towels, soap, wash rags, mirrors, wash pans, buckets, needles and thread have been provided for the use of those who meet them. We have pictures and rugs to make the room attractive.

Chapel exercises of school create much interest for pupils. Monday we have simple but sincere devotional exercises. On Wednesday we have what is called our "pep" meeting. Much is expected of our leader, Bonnie. On Friday there is always a program given by some teacher and pupils. These programs are given for parents and they are expected to come. They are then invited to the rooms to inspect school work. Please do not judge us until you see what we really can do.

Miss Bonnie and George Spradling went to Flomot Saturday to visit their sister. They returned Sunday night.

Clay Beaver has been visiting his parents. He is now living in Sweetwater.

Mrs. Goss D. Cobb, of Gorman, is in Spur visiting her mother, Mrs. Kate Senning.

Wants To Tell His Friends of Sargon

"I've seen Dallas grow from a small town to a great city and I have many friends in Texas. I want them all to know about Sargon, and what it did for me.

WM. D. VAUGHN

"My stomach was out of order for a long time. Although I ate very little, I was often in misery after meals and smothering spells would frequently wake me at night. I was constipated, my blood was thin and my color was as yellow as gold. I had severe pains in my back and sides and my kidneys would get me up all during the night.

"Since taking Sargon, I'm in better health than for years. I eat like a hungry school boy and can digest anything. There's not a pain in my body and I sleep good all night. Sargon Pills toned up my liver and ended my constipation. Now my skin has a good healthy color and I feel like a new man."—Wm. D. Vaughn, 1910 S. Akard St., Dallas. Red Front Drug Store, Agents.

Austin Bell and wife returned last week from an extended trip and visit in Waco, Sonora and other points. It is said that while in Sonora Austin acquired the "sheep-herding habit", and is charged with being anxious to return and take up sheep herding as a permanent profession. The Sonora country is said to be in fine shape and general prosperity prevails.

WE NEVER EXPECT HARD LUCK

But it will, and it may come to any of us.

Unemployment, sickness unexpected expenses—these are misfortunes that come to all of us—they are what we must expect in life

And when they come how fine it is to have a bank account that you may be able to fall back upon.

Save a little each month. Keep it in a savings deposit at this bank. And then you are prepared to meet the unexpected.

The Bank of Friendly Service

LARGE ENOUGH TO SERVE YOU—SMALL ENOUGH TO KNOW AND STRONG ENOUGH TO PROTECT YOU

THE NATIONAL BANK
 CITY NATIONAL BANK
 SPUR, TEXAS

E. C. EDMONDS, President **JAS. B. REED, Cashier**

Newt Cravey, of the Red Mud section of country, was in town Tuesday afternoon of this week. He reports a good rain out that way, adding that it sure was fine on his wheat crop, which old wheat men had stated was as good crop as they had seen in this section. Newt stated that he had already commenced plowing for his next year's crop—and that he had plenty of vacant lands to plow at this time.

Mrs. Will Marshall was in the city the past week, and while here called in and had the Texas Spur sent to her daughter, Mrs. Delma Brown of Pomona, California. Mrs. Brown was reared in the Spur country, and during the course of her subscription term no doubt will read of many friends and acquaintances of the past.

J. L. Lattimer, of Waco, has been here several days this week, visiting with Mr. and Mrs. Austin Bell and other relatives and friends of the city.

Will Marshall, of Duck Creek, was on the streets Tuesday of this week, meeting with his friends.

Informed motorists say, "Buy an EIGHT"

The informed demand today is unmistakably for the Eight. This swing of public preference is developing with unprecedented rapidity. Nobody can predict what chance a Six will have in next year's used car markets.

Consider the facts: During the first seven months of this year, in 43 states,* registrations of new cars over \$1000 showed a 94 per cent increase in Eights—and an 18 per cent decrease in Sixes. Every high-priced American car is an Eight. In fact, over 41 per cent of all American makes of cars are Eights.

And Studebaker, enjoying its seventy-seventh successful year in business, sells more Eights than any other manufacturer in the world.

So why pay as much or more for a Six when you can have a champion Eight by Studebaker—holder of 11 world records and more American stock car records for speed and endurance than all other makes combined? A Studebaker Eight, brilliant with the power, the smoothness, the flexibility that only an Eight can deliver. An Eight as economical as the thriftest Six. And styled with a notable smartness all the way through.

Remember what happened to the Fours in the medium and high priced fields. Sixes today are succumbing to Eights the same way. Now that it costs no more to own and to drive one—get a champion Studebaker Eight!

* 5 states do not compile registrations by engine types.

POULTRY

CULLING METHODS QUITE IMPORTANT

Much Money Lost Each Year by Unskilled Manner.

All the good methods in building a profitable poultry flock may be followed but if culling is not practiced, the results are disappointing. "Culling is one of the most discussed phases of poultry work," says C. F. Parrish, poultry extension specialist at the North Carolina State college. "There is a great deal of money lost each year on unskilled and ill-timed culling. Most poultrymen are elastic in their culling practices, leaving weaklings, short and round backed birds, deformed or undersized chicks with the hope that these may develop into profitable birds. This is bad. Such birds are always costly. Culling must start with the baby chicks and space may be saved and disease eliminated if the baby chicks are rigidly culled."

This culling needs to be followed on through the growing stage and when the pullets are transferred to the laying house in the fall, the good poultryman will pull out the weaklings that may have been overlooked earlier. If egg production drops suddenly, it may be a case of poor feed or disease but when birds have gone eight months and have not laid, it means that they are from low-producing stock and should be disposed of.

The laying flock should be culled at least once each month, says Mr. Parrish. Then when egg prices drop in the spring, another rigid culling should take place with only the best hens in the flock kept in the laying house. The virtue of this plan is that the hens are marketed as they become culls and no birds are kept that are not paying their way in egg production. In such cases, also, the hens are not all dumped on the market when prices may be low.

To cull properly, Mr. Parrish suggests giving attention to the comb, health, eyes, molt, pelvic bones, flexibility of the abdomen, shank and beak, vent color and weight.

Rape Sometimes Used as Green Poultry Feed

Rape is sometimes used as green feed for poultry and the field will probably be all right as a goose pasture. In the fence corners and possibly throughout the field, there will be more or less other green plants and pasture grasses which will serve to vary the ration.

Some poultrymen have cut rape and used it for green feed for penned flocks on limited ranges. They plant it in drills and do not cut below the crown so the green feed can be harvested several times during the summer.

Geese will thrive on almost any kind of pasture grass that a cow will eat and will eat almost any grass or vegetable or growing plant that chickens will eat. Most goose breeders do not use rape for pasture, however, but keep the geese on clover pasture land or on low grassy areas not used for crops.

Profitable to Market Cockerels as Broilers

Those who have been advocating putting the cockerels off as broilers rather than keeping them longer in order to get more weight on them will be interested in the findings of the New Hampshire Agricultural college. After numerous experiments, they have satisfied themselves that it takes but seven to eight pounds of feed to produce a broiler weighing two pounds, while it takes anywhere from 12 to 20 pounds of feed for each succeeding pound up to six pounds. It is self-evident then that it does not pay market poultry men to hold their cockerels to get the six pounds in weight.

The poultry editor has always been advising you to get rid of your cockerels long before they eat their heads off, so to speak.

Gains for Chicks

Chicks make the cheapest and most rapid gains when they are young. It is therefore essential that an ample amount of good wholesome food be kept constantly before the birds. Mash hoppers should be of sufficient size so that a large majority of the chicks can eat at the same time, thereby avoiding the constant fighting and crowding for room to eat. The outdoor mash hopper of adequate size is very desirable for developing the young stock. All feeding utensils should be kept clean.

Grasshopper Control

Turkeys are a great aid in keeping grasshoppers under control. They require little feed and little investment in the way of buildings. Their need of a wide, free range makes it somewhat difficult to grow them in thickly settled countries. Grown turkeys are extremely hardy, but young pouls need considerable care. A little water on the feathers, cold feet, a bit of spoiled food, or even one louse, will kill them at this stage. Pouls should be watched until well feathered.

How to Play BRIDGE
1929-30 by Wynne Ferguson
Author of "PRACTICAL AUCTION BRIDGE"

Copyright 1929, by Hoyte, Jr.

ARTICLE No. 3

One of the hands that seem to hypnotize average Bridge players is one containing 100 aces. They bid one or two no trump with this type of hand, irrespective of distribution and of the possible chance of game. Here are two example hands that illustrate the point:

Example Hand No. 1

Y :
A B :
Z :

Hearts—A, 9, 7, 6, 3, 2
Clubs—A, 4
Diamonds—A, 7
Spades—A, 10, 3

No score, rubber game. If Z dealt, what is his proper bid?

Here is a hand of unusual strength, and yet one of such unbalanced distribution that it does not warrant a no trump bid. With two suits, each of five cards or more, the player always should prefer the suit bid to the no trump. In this case, therefore, Z's proper bid is one spade; and then, if overbid by an opponent or by partner, Z should show the diamond suit. Bid in this way, Y Z should score a sure game; while at no trump, with a club or heart opening, game is not at all sure.

In this particular hand, as a matter of fact, two odd only were scored at no trump, while six spades or diamonds it was possible to make five odd. Be on the lookout for hands of this type and don't let 100 aces influence you to make an unsound no trump bid.

No score, first game. If Z dealt, what is his proper bid? Is it one no trump, in deference to the 100 aces; or is it one heart?

If Z bids one no trump with this hand, his chances of going game are very slight. He has only one stopper in three suits; and the fourth suit, hearts, is far from being set up. On the other hand, a bid of one heart offers much better chance for game. Such a bid eliminates the chance of a long suit making; and two or three tricks in the partner's hand make game very possible. Game also is possible even though partner holds only two or three hearts; therefore the proper bid with Z's hand undoubtedly is one heart.

Example Hand No. 2

Y :
A B :
Z :

Hearts—A, 6
Clubs—A
Diamonds—A, J, 9, 8, 5
Spades—A, K, J, 9, 4

Problem No. 2

Hearts—J, 10, 9, 7,
Clubs—7, 6, 3
Diamonds—Q, 10
Spades—A, 8, 2

Y :
A B :
Z :

Hearts—A, K
Clubs—A, K, J, 10
Diamonds—K, 9, 3
Spades—J, 10, 9, 3

No score, rubber game. Z dealt and bid one no trump. All passed and A opened the deuce of clubs, Y played the trey, B the nine and Z won the trick with the ten of clubs. How should Z plan the play from now on so as to be sure of game, irrespective of the position of the cards and of his opponents' play? An analysis of this interesting hand will be given in the next article.

Problem No. 3

Hearts—9, 2
Clubs—Q, 7, 5
Diamonds—8
Spades—K, J, 10, 9, 6, 5, 4

Hearts—8
Clubs—J, 10, 9, 6, 3, 2
Diamonds—K, 10, 5, 3
Spades—Q, 3

Y :
A B :
Z :

Hearts—6, 4
Clubs—A, K, 8, 4
Diamonds—A, Q, J, 7
Spades—A, 8, 2

Hearts—A, K, Q, J, 10, 7, 5, 3
Clubs—none
Diamonds—9, 6, 4, 2
Spades—7

Rubber game, A B—20; Y Z—0. Z has the deal. Give the proper bidding of all four players. After you have decided on the final bid, give the correct opening lead and subsequent play of the hand. An analysis of this interesting hand will be given in the next article.

Problem No. 4

Hearts—J, 8, 7
Clubs—A, Q, 9
Diamonds—6
Spades—none

Hearts—none
Clubs—none
Diamonds—Q, 8, 7
Spades—Q, 8, 7, 6

Y :
A B :
Z :

Hearts—9, 6
Clubs—K, J, 10
Diamonds—10
Spades—J

Hearts—none
Clubs—7, 6
Diamonds—J, 5
Spades—9, 5, 4

There are no trumps and Z is in the lead. How can Y Z win four of the seven tricks against any possible defense? Solution in the next article.

Why Eggs Are Good To Eat

Richness in Food Value Makes Eggs A relatively Inexpensive Part of the Meal Even at Higher Prices.

Whenever I have occasion to discuss the food value of eggs, I am reminded of a story told me some years ago by a New York social service worker. A group of children from the congested Bowery District were making their first visit to the country. One typical little gamin was asked how he liked the nice fresh country eggs. "Aw, dey ain't no good," was the reply. "Why, what's wrong with them?" "Well," explained the youngster, "dey ain't got no smell and dey ain't got no taste!"

However desirable those two elements may be in most foods, most of us will be perfectly willing to dispense with them in eggs. There are, however, numerous other qualities of such value that we cannot afford to be without them. Practically all the elements which contribute to the building up and maintaining a health condition of the human body are present in eggs. Statistics show that the American people consume but little over one-half an egg each per day per capita for all users. This is not nearly enough. We should eat and use more eggs.

Compare them with beefsteak, for instance. At 40c a dozen, twelve eggs give you more food value, penny for penny, than a pound of steak at 45c, and don't forget there are no bones in the eggs. On a weight basis eggs compete successfully with meat in almost every report. They have at least as great protein content, and are more valuable sources of iron than any meat except perhaps liver.

As for those much discussed but little understood food elements, the vitamins, eggs compare most favorably with other foods. Nobody knows what vitamins are, but what they can do is fairly well understood. Weight for weight, eggs contain ten times as much vitamin A as milk. While it is true we use much more milk at a time than we do eggs, their great vitamin A content makes them a valuable addition to milk. As vitamin A is credited by competent investigators with helping prevent diseases of the lungs, the importance of eggs in the diet is readily appreciated. Eggs and milk have long played an important part in the diet of tubercular patients.

Eggs are quite as rich as milk in vitamin B. This member of that mysterious family is the one which aids bodily growth and gives protection against neuritic disorders. Getting on down the vitamin alphabet, we find eggs comparatively rich in vitamin D, the one which prevents rickets. Generally speaking, they have less value in this particular than cod liver oil. They contain quite enough of this element, however, to make them valuable substitutes for the oil for people whose stomachs refuse to retain it. A daily ration of egg yolks will prevent rickets and, in many cases, heal rickets that have already started.

Having justified our title in one sense by showing the value of eggs as food, it would not be amiss to show that eggs are good to eat in still another sense. While few of us would care for the racy tang demanded by the youngster quoted in the beginning, it cannot be denied that eggs are ever popular because they have a most agreeable flavor all their own. Served in the simplest manner, they are always acceptable. As a garnish for various vegetables, salads and other dishes, they are both attractive and palatable. But what would we do for cakes, pies, pastries of all kinds, and other dishes were it not for eggs?

Thus in hundreds of ways the egg insinuates its health giving and body building values into our daily menu. Unlike other foods that are good for us, the egg is something that can appear in some form or other at every meal without making us tire of it. This is good, for the egg is one of the most valuable of all the many things used for human food. We can hardly eat too many eggs. Let us, therefore, endeavor to make every week and "eat more eggs week" by finding more attractive ways and a greater variety of ways to serve these valuable and very tasty food products.

(Copyright, 1929, by Dr. L. D. LeGear, V. S.)

George F. Harris, of McAdoo, was in Spur during the first of the week, trading, greeting friends and transacting business affairs. He reports the Plains in fine shape, making comparatively good crops with fine prospects prevailing for a good small grain crop later on.

DANKS SAYS COWS
NEED BLOOD TEST

Efficient Method to Find
Contagious Abortion.

The lack of isolation stables and proper quarantine facilities is the most serious difficulty in getting rid of abortion disease from dairy farms, said J. R. Danks, superintendent of the Wintertur farms, Wintertur, Del., at the New York State College of Agriculture at Ithaca.

When as many as 15 or 20 per cent of the herd is infected with contagious abortion, it is advisable to separate the positive reactors from the negative ones, and this separation should be complete. It is not enough to place the infected animals in one end of the barn and the noninfected in the other end. Where only a relatively small proportion is infected a system whereby the positive reactors are removed from the herd at calving time has proved satisfactory.

Blood testing appears to be the most efficient method of determining which animals are infected, says Mr. Danks, but a knowledge of the limitations of this method is needed to obtain best results. The typical veterinarian is not yet sufficiently posted about the details of the blood-testing plan to advise his clients, so great progress in eliminating abortion by the blood-test method will not be made until the veterinarian, and through him the stockman, is better informed on the subject.

In most herds where blood tests have been made and the best-known principles of segregation and quarantine have been followed, the abortion rate has rapidly declined to approximately 5 per cent or less, although in a few herds abortion has not declined much below 10 per cent. The cause of abortions in animals free from the Bang bacillus is not fully understood and should be made the subject of further investigation. It is generally considered that a variety of causes are responsible, such as improperly developed reproductive organs, and accidents.

Navel Cord Should Have
Very Careful Attention

Immediately the calf is dropped the navel cord should be tied with twine that has been prepared for the purpose by being kept in a bottle containing either a 5 per cent carbolic acid solution or methylated spirits. The twine should be tied about one and one-half inches from the navel and it is advisable to squeeze out any blood that may be in the cord before tying. The hands of the person who ties the cord should, of course, have been well washed with soap and water and rinsed in disinfectant solution, otherwise the handling and tying the cord may prove positively dangerous and the purpose of it be defeated. After being tied, the cord, navel and surrounding parts should be painted with a solution of iodine in methylated spirits (35 grains of iodine dissolved in two pints of the spirits), and a second application should be made as soon as the first one has become dry. As an additional safeguard, the cord and navel should then be covered with Stock-holm tar.

Undesirable Flavors

Undesirable flavors are sometimes noted in milk when cows are first turned to pasture, particularly on sweet clover pastures. The flavors are usually accompanied by digestive disturbances in the cows. The trouble usually may be prevented by supplying the cows with good supplemental feeds, such as hay and grain, each morning before turning them to pasture and by keeping a supply of dry roughage like oat straw, in a rack.

Dairy Hints

Dry pastures too frequently mean dry cows.

A good system of barn ventilation usually means healthier cows and purer milk.

Enlarge crops are best if planted early. Here again only the best tested seed should be planted.

When farmers come to think of salt and water as food their animals will be more profitable and healthy.

Good pasture grass holds a place in the list of delicacies for dairy cows which no other feed can quite fill.

The feed bill is the largest direct change in the production of milk. Hence economical feeding is of great importance in the production of cheap milk.

Calves receive, in addition to the milk and grain, limited amounts of alfalfa or clover hay after they are one month old. After they are three months old, alfalfa hay is kept before them at all times. Small calves are likely to eat more hay than they can digest, especially when it is fine and leafy and of good quality.

SPECIAL PRICES SATURDAY & MONDAY

Bologna Sausage, per lb.22c

Wrapped Bacon, best grade, .22c

LARD 1.10

Dill Pickles, per gal. 67c

Peant Butter, pe lb.17c
