

Ferocious Farwell Favored In Football Fray Friday

Hoping to break a six-year winless drought in football games with Farwell, but given little chance to do so, Bovina's Mustangs take on the always-powerful Steers here Friday night. The Steers are rated one of the top Class A teams in State.

It'll be second game of year for each of the Farmer County rivals.

For past few years, the Steers have been a Class A football power and this year is no exception.

The Class B Mustangs, whose season record is 0-1 after last week's loss to Springlake, are given little or no chance of upsetting the fast-running football machine from the county seat.

In their opening game last week, the Steers toyed with Class AA Friona Chiefs and came out of the game with a 20-0 victory.

Commenting on this week's game, Mustang Coach Hallie Gee says, "I wish I knew we

could hold them down to that low score."

Not since 1954 have the Mustangs managed a win over the Steers. Bovina lost 0-6 in '55, 0-13 in '56; 12-38 in '57, 8-39 in '58, 12-35 in '59 and 12-44 last year.

In last year's game, a determined herd of Mustangs played the Steers off their feet for three quarters before giving under to Farwell's superior weight, strength and depth. Score at halftime was only

14-12.

"Farwell is a lot tougher, we think, than the score of their game with Friona indicated," Gee says. "We just hope we can play them as good a game as Friona did." The Ponies were considered winners of a scrimmage session over Friona prior to season's opening.

Bovina's chances will be improving by return of two players who were out of last week's game because of sickness. They are Fullback Jerry Frazier and End Mac Glasscock. They are

both scheduled to be available for duty this week.

"We may get beat 40 points," Gee says, "but we'll be improved over what we were last week. Since we figure our chances of winning against Farwell are slim, we'll be doing a lot of experimenting this week in hopes of having best combination of players molded together by time Whitharral comes here the following Friday night."

One of few things concerning

the upcoming game to give Bovina fans hope is the possibility that Jerry Lovelace, Farwell's all-state fullback candidate, may see only limited action due to a hand injury and Steer coaches are taking few chances of having him more seriously injured until the going gets rougher for the Herd.

Bovina will be slightly outweighed by the Steers as they were by Springlake last week.

Figuring the probable starting line-ups, the Steers will

have an overall weight advantage of eight pounds per man. Broken down this show 13 pounds difference per man in the line and four pounds in the backfield.

Farwell's starting line average 172 pounds per man and the backs average 160. Mustangs tip the scales at 159 pounds in line and 156 in backfield.

Gee gave special praise to Halfback Rocky Hance for his fine play against Springlake last

week. Hance made some spectacular pass catches, did a creditable job of ballcarrying, and played a good defensive game.

The coach also said he was pleased with the play of Quarterback Don Cumpton and Halfback - Fullback Buddy Turner.

"We were disappointed in our line play, both offensively and defensively," the coach pointed out. "But we expect it to be improved against Farwell."

THE NEWSPAPER THAT WORKS FOR A BIGGER, BETTER BOVINA

WEDNESDAY, SEPTEMBER 6, 1961

BOVINA, TEXAS

VOL. VII, NO. 11

WHITTLIN'

BY DOLPH MOTEN

A couple of projects which we consider of great importance to this town are slow in getting started. However, we have been assured that both endeavors will be accomplished and reminded that all too often it takes longer-than-expected time to get things done.

Projects we're thinking about are:

1. Curbing and guttering of Third Street, Highway 86 and FM Road 1731 South.

2. Development of Ridgela housing area.

Though both projects are running behind "schedule" both are still up and coming, informed sources tell us.

Like other citizens who are interested in the community's growth we have a tendency to become impatient at times. These two projects, however, are still definitely on their respective drawing boards and, we think, it's just a matter of time until they both blossom forth.

J. T. Hammonds, the Dekalb grain sorghum man, had an opportunity to "rub it in" on us last week.

In Farm and Home section of this newspaper appeared a publicity picture for Tri-State Fair at Amarillo of a six-year old girl standing beside what appeared to be a gigantic head of grain sorghum.

The huge head was made by Hammonds himself, right here in Bovina. It was constructed of near-regular size sorghum heads and made to look like something you'd read about in a Texas' Brags book.

J. T. gave us an opportunity to make our own publicity picture of it shortly after it was completed several months ago. We declined.

Which all goes to show that "good copy" can all but run over us sometime and we don't recognize it. Really, though, we think Hammonds had more fun telling us about our missed opportunity than he would have if we'd handled the story right in first place.

Bovina Businesses Cotton Bowl Football Contest got off to what we considered a real good start last week. A total of 111 entries were submitted and it seemed that many more people told us they had theirs filled out, but they forgot to turn them in.

There were only two perfect entries among those submitted, however, and it seemed that the perfection percentage on those which weren't turned in was considerably higher than on those which were.

But, the contest still has 12 weeks to run and that's plenty of time for anyone with a reasonable knowledge of game of football to select enough winners to earn himself an expense-paid trip to the Cotton Bowl come New Year's Day. In total 13 weeks, there will be 130 games to pick winners from. According to our crude arithmetic, we figure that an entrant who can pick 100 winners from those 130 opportunities can win the trip.

That doesn't sound too hard, . . . not even if you're a week late getting started.

Neil Smith, last year's contest winner, had 81 correct selections out of possible 110. That's about 74 per cent.

Turn to contest page in this week's issue and try your luck.

Vandals Damage School Building

BURGLARY RASH CONTINUES--

Two Businesses Robbed Monday

A pair of break-ins of businesses on Highway 60 Monday night netted burglars roughly \$50 in cash and cigarettes. Businesses broken into were Three-Way Chemical Co. and Hartwell Machinery Co.

Stolen at Hartwell's were six cartons of cigarettes and about \$25 in cash, according to Elton Venable, who is associated with the firm.

Entrance to building was made by breaking a window in rear door and then reaching through and opening the door. Money stolen was in pop machine and an unlocked safe.

Entrance to Three-Way was

made by breaking glass in front door. "We didn't lose over \$5," reports Ed Hutto, co-owner of the business. This money was in pop machine and in a peanut jar. Nothing else was reported missing.

About 7 a.m. Tuesday, a car driven by two youths filled up with gasoline at Northside Service Station and then left without paying.

License number of the car was reported to sheriff's department and it was reported to be stolen from Amarillo. Deputy Henry Minter says he expects there is a connection between the gasoline theft and the two break-ins.

ANNUAL LIONS PROJECT--

Sale Fri.

Bovina Lions will stage their annual broom sale Friday, Lion Boss Tom Bonds announces. The promotion is the largest money-raising project the organization takes each year and proceeds from it are used to finance the various civic responsibilities the club undertakes.

The title "broom sale" is

Charged With Stealing Radio

Francis West was jailed in Farwell Saturday afternoon by Deputy Henry Minter after being charged with stealing a radio from Superior Electric Co.

The radio was of transistor-type and was valued at \$34.95. It was returned.

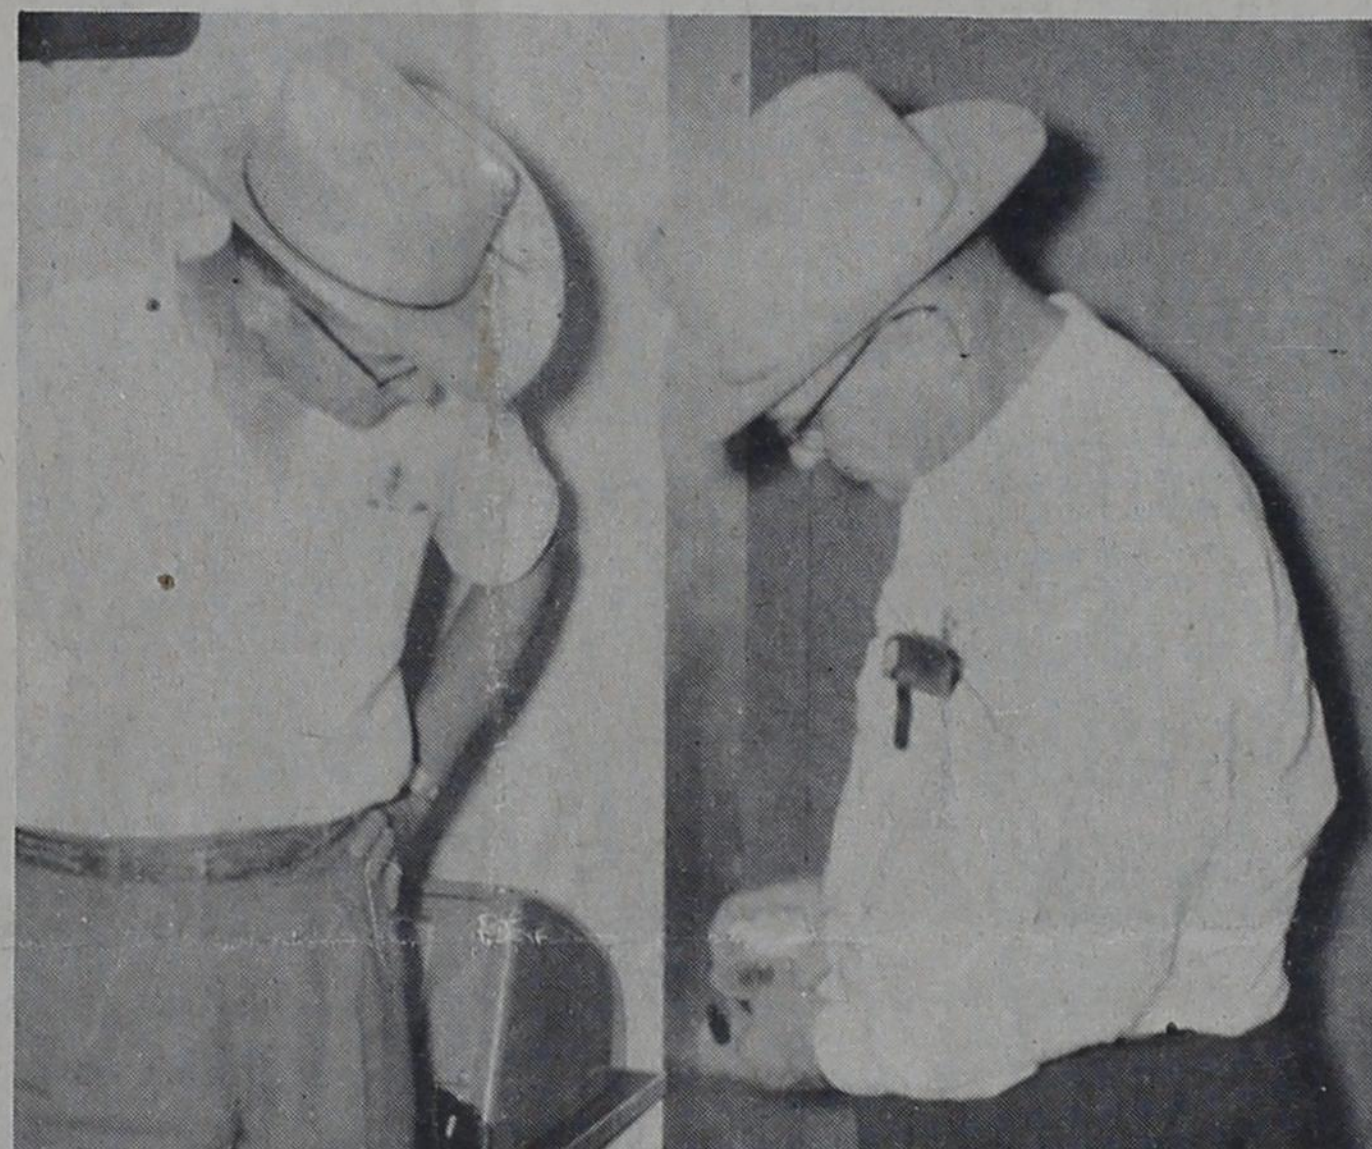

misleading in that a variety of merchandise, in addition to brooms, is sold. Other products include dish cloths, mops, brushes, floor mats, potholders and other household goods as well as several different kinds of brooms.

All products sold are manufactured by Texas Lighthouse for Blind.

The local club operates on a commission basis with remainder of the money going to the institution for the blind.

The broom sale has proven to be highly successful here in previous years. One year, in fact, the Bovina Club set a sales record for communities of this size.

Sale is scheduled to get underway in the morning and continue throughout the day.

INVESTIGATE--Deputy Henry Minter, left, and Sheriff Chas. Lovelace are shown inspecting combination from walk-in safe in superintendent's office Saturday morning following school break-in Friday night. Little cash was stolen since burglars were unsuccessful in getting the safe open, but considerable vandal-like damage was done to inside the building. Safe door may be seen in background. Lovelace believes the job was done by amateurs.

JAY HARRIS THE WINNER--

Football Contest Has 111 Entries

A total of 111 entries were submitted in opening round of Bovina Businesses Second Annual Cotton Bowl Football Contest which appeared in last week's issue of The Blade. J. W. Harris and Mrs. Keith Garner each submitted perfect entries except for the tie-breaker score. Harris was 18 points off on the score and Mrs.

Garner was 21 points off. Harris was awarded first place money of \$5 and Mrs. Garner second prize of \$3. Tied for third with nine out of 10 winners picked correctly were Joe Moore and John Wilson. They were each seven points off on picking the score of the Bovina-Springlake game. They each picked Springlake to win 13-6. Score of the game was 14-0. Moore and Wilson split the \$1 third place money.

In addition to Moore and Wilson, 11 entrants picked nine winners, but they were farther off on the tie-breaker score. Just out of the money were Buck

Ellison, Dean McCallum, Leon Grissom, George Douglas, Don Cumpton, Sam Sudderth, Grady Sorley, Sue Charles, Allen Cumpton, L. M. Grissom, and Mrs. H. J. Charles.

A total of 32 entrants picked eight winners; 31 had seven right; 17 picked six correct; 13 picked five of the 10 winners; two had four correct answers, and one had three right.

Entrant who picks most winners over 13-week course of the contest will win an expense-paid trip for two to Cotton Bowl in Dallas January 1, 1962.

Car Strikes PCFS Front

A car jumped the curb and crashed into front of Farmer County Farm Supply on North Street in Bovina late Saturday afternoon.

The car, a '58 Chevrolet, was driven by Mrs. P. O. Dixon. No official estimate was made to the damage of front of the automobile. A large window was broken in the building and a small portion of the wall was destroyed.

Baptist Revival Starts Sunday

Revival services begin Sunday at the First Baptist Church and continue through Sunday, Sept. 17.

Services will be conducted twice daily, at 11 a. m. and 7:45 p. m., announces Rev. John Ferguson, pastor.

Evangelist will be Phillip Goodrum of Lakeview. Song leader will be Bob Elmore of Kilgore. The public is invited to attend these services, the pastor says.

Legion Meeting Monday

Annual officer election will highlight a meeting of Bovina American Legion Monday night at 8 in Legion Building.

Announcement of the meeting was made this week by Odus White, an officer in the organization.

In addition to the election, general business will be conducted, White says.

All post members, as well as other veterans in the area are urged to be present.

Tom Hartwell was served as commander of the post during past year.

Refreshments will be served, White says.

Sp'lake Socks Mustangs, 14-0

Bovina Mustangs heard scoring opportunities knocking a couple of times Friday night, but were unable to open the door as they dropped 1961 football season opener to Springlake Wolverines here, 14-0.

The Wolverines, led by their big, talented quarterback, Hal Hudson, scored once in second quarter and again in third. Hudson scored the first TD himself on an eight-yard run and passed eight yards to Halfback Ronnie Kent for the second.

The Hudson to Kent pass combination was also good for two extra points following first touchdown.

Mustang offense was lead by passing attack of Quarterback Don Cumpton to Halfback Rocky Hance which clicked for good yardage on several occasions.

Mustangs' running attack was handicapped by Jerry Frazier, regular fullback, not being able to play because of sickness. The larger, stronger Springlake line held the Bovina running game down throughout the contest.

Bovina got within the Wolverine's 10-yard line three times but was unable to get the ball across the double stripe. The Mustangs lost the ball two

times on downs, once after two passes were dropped in endzone by intended receivers. On another occasion, Springlake regained possession of the pigskin by an intercepted pass.

Highlight of game for Bovina fans was Cumpton to Hance passing combination with Hance making a couple of circus-type catches to put Bovina in scoring position.

A good crowd, estimated at 750, was on hand for the contest.

This Friday night, Mustangs meet their Farmer County rival, Farwell Steers, at Mustang Field at 8 p.m.

FIRST FOOTBALL CONTEST WINNER--Jay Harris was winner of round number one of Bovina Businesses Cotton Bowl Football Contest. Harris correctly picked 10 winners of same number of games. Mrs. Keith Garner also had a perfect entry but Harris was on tiebreaker score. Harris is shown here with the contest page and his check for \$5, weekly prize for first place.

Priest From Ireland Visits Bovina Parish

Visiting in Bovina recently was Father John R. Doyle of Dublin, Ireland. His Primary Mission to United States was attendance at

Dublin Diocesan Patrician Congress held in June.

Father Doyle was brought to Bovina for a visit by Father Declan Gilligan after they attended the Liturgical Conference in Oklahoma City, Okla. recently. He pointed out that he especially enjoyed his stay in Texas and that it was tremendously different from the movies they had seen about the state in Ireland. He enjoyed seeing the large graineries, as he put it, and the oil wells. One thing he particularly dwelled on was the spirit of the American people particularly in this section of the country. He compared the Mexican immigrants to that of the European immigrants who inhabit his land.

He concluded his thoughts with his impressions of the U.S. He was impressed with its vastness, wealth, potential power for good in our troubled world and its fine spirit of democracy.

School Faculty Complete

Faculty of Bovina Schools for current school year is complete, Superintendent Warren Morton announces.

Mrs. Harold Morris, who was signed to teach high school English on a temporary basis, has agreed to take the job permanently, Morton says.

Too, it is now believed that an additional teacher will not be needed in first or second grades. Earlier, Morton thought that enrollment would demand another teacher for one or both of these grades. There are two sections of each.

"If we add another teacher now, it will probably be in high school, the superintendent says.

County Agent Resigns

Joe W. Jones, Parmer County agricultural agent for the past 11 1/2 years, last week submitted his resignation to the Parmer County Commissioners Court.

His resignation will be effective Friday, September 15, at which time he will join the staff of Security State Bank in Farwell.

G. D. Anderson, president of the bank, says that Jones will learn the banking business and will be a special agricultural agent for the firm.

It is not known when a replacement for Jones will be named, but Loyde Brewer, county judge, says that "the district agricultural agent, W. W. Grisham of Amarillo, told the commissioners court that one would be named as soon as possible."

Grisham may have a replacement for Jones Monday, and if so, he will meet with the commissioners court at that time. "Naturally, we hate to lose Joe Jones as county agent," says Judge Brewer, "but we are happy if he is entering a job which has better opportunities, and we wish him well."

Mr. and Mrs. Charles Maxwell of Shreveport, La., were weekend guests in home of Mr. and Mrs. Paul Jones. Mrs. Jones and Mrs. Maxwell are cousins.

Mrs. Douglas Now At Home

Mrs. George Douglas was released from Clovis Memorial Hospital Sunday after a three-week stay. Her condition is improved, according to her husband, but she will be confined to bed for another three weeks.

Pentecostal Revival Set September 10

Revival services begin Sunday September 10, at Pentecostal Holiness Church and continue through the week.

Mr. and Mrs. N. E. Hembree of Okmulgee, Okla., evangelists, will conduct the meeting. Services will begin each evening at 7:30.

SCD Supervisors Meet In Friona

Soil Conservation District supervisors from Parmer and eight surrounding districts are scheduled to attend a leadership training meeting Sept. 12, at 10 a.m. in the community room of the Friona State Bank.

Ira Scott, Hereford, will begin the program with a discussion of fitting conservation into present farm practices following introductions by A. L. Black, master of ceremonies.

Gerald Thomas, dean of the School of Agriculture, Texas Tech, will address the group on the challenge of change following sessions by W. H. Graham, publisher, and Wade Mills, Dimmitt, chairman SCD 136.

Addresses by W. S. Gibbs, State Association of Soil Conservation Districts' president; A. C. Spencer, executive direc-

tor, State SCD Board; and Joe Jones, Parmer County Agent, will follow the noon recess. Bruce Parr, Friona, will moderate a group discussion on "Why more farmers are not carrying out conservation work and what can we as supervisors do to help?" This will round out the six hour program.

Parmer County, district 146, supervisors and their areas expected at the meeting are: A. L. Black, Friona; Robert Galloway, Farwell; T. O. Lesly, Lazbuddie; Dean McCallum, Bovina--Rhea; and Bruce Parr, Black.

Representatives from Castro, Deaf Smith, Bailey, Lamb, Carson, Oldham, Armstrong and Randall Counties will attend.

The testing of cattle in Parmer County for brucellosis, better known as "Bangs" disease, is scheduled to get underway Monday.

At a county-wide meeting in Bovina Tuesday night, Dr. J. B. Henderson of the Texas Health Commission explained to about 100 cattlemen how the testing operation will be carried on, and voluntary committees were lined up for assisting state testing crews.

The county has been split up into six sections and testing will start simultaneously Monday morning in four of these sections.

The four sections in which testing will start Monday are:

1) Northwest part of the county, the boundaries being the Pleasant Hill road from Bovina west to the state line, and on the Farm-to-Market road running north from Bovina through Rhea and on to the Deaf Smith County Line.

2) North-central part of the county, the boundaries being the farm road running from Bovina north to the Deaf Smith line, the Dimmitt highway east of Bovina to Hub, and the state highway from Hub north through Friona to the Deaf Smith County line.

3) Northeast part of the county, the boundaries being the state highway from Hub north to the Deaf Smith line, and the Dimmitt highway from Hub east to the Castro County line.

4) Southwest section of the county, the boundaries being the Pleasant Hill road from Bovina to the Curry County Line, and the road running from Bovina through Oklahoma Lane south to the Bailey County Line.

Testing in the other two sections will start as soon as crewmen finish operations in other sections. These two sections are:

5) South-central part of the county, the boundaries being the farm road running south from Bovina through Oklahoma Lane to the Bailey County Line, the Dimmitt highway, running east from Bovina to the Hub, and the Muleshoe Highway, running south from the Hub to the Bailey County line.

6) Southeast part of the county, the boundaries being the Muleshoe highway, running south from the Hub to the Bailey County line, and the Dimmitt highway, running east from the Hub to the Castro County line.

Committeemen who will be lining up the cattle for each section are:

Section 1) Jack McCracken, chairman; Carl Schlenker, Durward Bell, and Bob Wilson.

Section 2) Jack Walton, chairman; Pete Buske, Bud Crump and R. T. Harbour.

Section 3) A. L. Black, chairman; Bruce Parr and N. E. Wood.

Section 4) John West, chairman; Leon Langford, and Gilbert Kaltwasser.

Section 5) Wes Long, chairman; J. W. Crim, Conrad Nelson and A. E. Redwine.

Section 6) Frank Hinkson, chairman; Shanks Ivy, Joe Jesko, and John Gammon.

Cattlemen who were not present at Tuesday's meeting and want the testing operation explained to them are asked to contact one of the committeemen in their section. The committeemen are charged with the responsibility of lining up the cattle and planning the work schedule for the state testing crews.

A portable laboratory is being set up in the Bovina area this week, and it is here that all of the blood samples of cattle in the county will be tested.

The testing crews will take

MAKING PLANS for the brucellosis tests, which are slated to begin in Parmer County Monday, is one of six line-up committees who volunteered Tuesday night to assist with the program. Here, three fellows from Section 3, the Northeast part of the county, are mapping out areas in which they will line up cattle for testing. Looking on are Dr. Wendell Tarver, state veterinarian, and Dr. J. B. Henderson, of the state health commission. From left to right are A. L. Black, Bruce Parr, Dr. Tarver, N. E. Wood, and Dr. J. B. Henderson.

the samples and will transport them to Bovina for the laboratory tests.

Cattle to be checked during the testing operation, which is expected to last for three weeks, are as follows:

1) All animals in purebred beef and dairy herds, with the exception of cattle under 8 months of age, and all steers and spayed heifers.

2) Commercial herds or grade beef herds. All cattle in herds of 50 or less will be tested. In herds between 50 and 250 in number, the minimum number to be tested will be 50. In herds over 250, 20 per cent or more will be tested. Also in commercial herds, all cattle under 8 months of age, and all steers and spayed heifers will not be tested.

In conjunction with the testing program, the testing crews will also vaccinate cattle against the disease if the cattlemen request it. "Vaccinations are the best weapon for control of the disease," Dr. Henderson said. The vaccinations will not be mandatory, however, and they will not cast the cattlemen.

Dr. Henderson said that all cattlemen will be requested to have their cattle rounded up and in an area suitable for testing. This would be in a corral with chute facilities, or if a chute is not available, the cattlemen will be requested to build a temporary chute. Owners of small herds can use someone else's facilities.

The testing crews will have portable head gates which can be fastened on any chute, it was pointed out. Also, each cattlemen will be requested to have a working crew of two or three people, or whatever number is sufficient to handle the cattle.

If a reactor is found in any one animal of a herd, all the remainder of the cattle in that herd will be tested. Also, owners of any cattle in which reactors are found will be required to dispose of the infected animal within 15 days.

After the first tests are completed in Parmer County, the crew will return between 60 and 120 days and retest herds in which reactors are found. During the period between the first test and second test, a herd in which a reactor is found will be placed in quarantine. A cattlemen will not be permitted to mix the herd with other herds.

The cattlemen will however, be permitted to sell any or all animals of the herd at an approved market, during that time.

If after the tests in the county are completed, and less than one per cent of the cattle and 5 per cent of the herds are found to have the disease, the county will then be declared a certi-

Barley Added To Feed Program

Though barley ranks well down on the list of feed grains produced in Texas, many growers will soon have to make a decision on whether or not to participate in the 1962 feed grain program. Winter barley has been added to the program and seeding time is not far off.

The feed grain program for 1962 is about the same as the 1961 plan, but with winter barley added. The purpose is to reduce the total barley acreage while protecting the farmer with price support and conservation payments, say economists for the Texas Agricultural Extension Service.

To participate in the barley program a farmer must divert

at least 20 percent of his 1959-60 barley base and at the same time not increase his corn or grain sorghum acreage. The diverted acres must be put to conservation uses, the economists say. Payment for the first 20 percent of diverted acreage will be figured on 50 percent of the normal barley yield on the farm. Additional acreage may also be taken out of production at a higher rate of payment.

If the producer chooses, he may plant all or a part of his diverted barley acreage to one or more of the following oilseed crops: castor beans, guar, safflower, sunflower or sesame by passing up conservation payments. He will, however, be eligible for barley support price.

The economists advise farmers who are eligible to participate in the winter barley phase of the 1962 feed grain program to check with their local county agent or Agricultural Stabilization and Conservation office for details on the program.

FARM & RANCH LOANS Long Term--Low Interest Ethridge-Spring Agency, Friona Phone 8811

Farmers Favor Wheat Quotas In Referendum

Texas wheat producers and those in the other 38 commercial wheat producing states voted on August 24 to continue marketing quotas on their 1962 wheat crops. In the nation, 79.4 percent of those voting favored

quotas and in Texas, 78.9 percent voted yes, says C. H. Bates, extension farm management specialist. A two-thirds majority was needed to keep marketing quotas in effect, and to make operative the new wheat stabilization program.

Wheat producers will have to cut their acreage allotments by at least 10 percent for 1962 and may, if they choose, take out another 30 percent of their allotment, Bates says. Those who comply with their acreage allotments and conservation requirements will be eligible for \$2.00 per bushel price support and for wheat payments.

For the 10 percent acreage cut, the producer will be paid at the local price support rate for 45 percent of his normal yield. If additional acreage is diverted, payment will be based on 60 percent of the adjusted yield per acre, Bates says.

Farmers can get up to half of their payments when they sign up for the wheat acreage diverted to conservation uses, according to Bates. The balance will be paid after the farm has been checked for compliance.

Bates says that growers who need detailed information on the program should contact the local Agricultural Stabilization

Farm Facts

The production of U. S. hens exceeds 65 billion eggs a year. This is more than five times the output of their nearest rivals from the United Kingdom.

And production per hen continues to climb. The rate was 152 eggs per year in 1945. It was 206 per year in 1959. It's a good thing. Average civilian consumption in this country in 1960 was 334 eggs. Of the per person supply, about 29 eggs were broken commercially for use in manufactured products, including baked goods. Part of this "invisible" egg consumption is through dried egg solids bought by the Department of Agriculture for school lunch programs, etc.

More than 80% of our farms had chickens and produced eggs 15 to 20 years ago. But times have changed. The 1959 Census of Agriculture revealed only 2.2 million farms with chickens and only half of these as selling eggs. The 1.1 million selling eggs produce the salable supply of about 4.5 billion dozens annually--basis for the commercial table egg supply, the raw material for commercial egg breaking, and hatching eggs. USDA's Economic Research Service notes that less than a million commercial specialized producers are responsible for the bulk of the egg output. Egg production is no longer a "pin-money" enterprise.

The woman tourist posed for a snapshot in front of the fallen pillars of an ancient temple in Greece. "Don't get the car in the picture," she warned, "or my husband will think I ran into the place."

HD Agent's Notes

BY MISS ETTIE MUSIL

"Will my washing machine need replacing this year, and maybe the refrigerator, too?" "How much longer can we expect the electric range to last?" Questions such as these are important to the family interested in planning a fairly long-term budget. One question we would like to ask you is "How long does a 'life time' guarantee suppose to last?" Most consumers think of "lifetime guarantee" as the lifetime of the consumer buying the product or appliance.

"Life time guarantee" usually refers to the life time of service of the equipment or product. Now how long is the "life expectancy" or length of service for different pieces of equipment? When will replacements be needed for the equipment? How will these unexpected costs fit into the family spending plan?

Our Extension Service home management specialists offer some estimates for "life expectancies" for a few furnishings and equipment. Electrical washing machines that are automatic and semi-automatic have a 11 year life time. Wringer and spin-dryer electric washing machines should last 10 years.

Electric refrigerators should last 15 years. Electric or gas ranges have a 15 year life. Upright vacuum cleaners should last 18 years, but tank type should last only 15 years.

What about wool living room rugs? These should last 14 years. However, many factors enter in the upkeep of the equipment and furnishings.

Now, we can say, "Hm, my vacuum cleaner quit working within 10 years." Many times we do not follow the directions that come with the equipment in the operation or the care of the equipment. How often did you use the cleaner? How did you store it? How often did you empty the dust bag? How gently

did you handle it from room to room?

We could go on and on with questions to ask ourselves why an equipment did not last as long as it should have. Then we have homemakers that have electric or gas refrigerators that have "lived" 20 years or more. This would depend upon the care and operation, as well as the good working parts of the refrigerator.

Speaking of equipment in the home, we received news that the newest of new on the appliance market is a top loading dryer. They are available in either gas or electric models. Capacity is 18 pounds of wet wash and the price range is from \$129.95 to \$199.95.

Remember, a few weeks ago we mentioned the greaseless fry pan that was available on the market. The non-sticking feature is the result of a fluorocarbon resin coating on the inside of the pan. The coating does not contaminate or change properties of foods. The pans do not become discolored (supposedly) and since food does not stick to the pans, they are easier to clean.

Now, the other side of the story. Several U. S. fry pan manufacturers tried the idea of coating fry pans several years ago and discarded it as impractical. This information is according to consumer help from the home management specialists.

Because of the interest shown in the pans on the market, most companies are coming out with non-stick coated pans. Manufacturers say there are many drawbacks to marketing the pans. All it takes to ruin the finish is to use a metal spatula or scour the pan with an abrasive.

Just from experience how many homemakers are ready to throw away their spatulas or quit scouring their pans? In some instances, when cooking temperatures exceeded 450 degrees F, pans became discolored. In other instances, the non-stick coating was damaged. Some manufacturers and homemakers have adopted a "wait and see" attitude.

SILAGE IS DUMPED HERE after the 25-mile haul from the Friona-Hub area. This silo is one-quarter mile in length, 36 feet across and 14 feet deep. In all, 12,000 tons of ensilage will be dumped in the huge underground storage area.

OPERATION SILAGE begins at fields such as this one on the Billy Baxter farm near Hub. There are four machines cutting 600 acres of the feed, and 24 trucks hauling it to the Farwell Feed Lots.

WITH THE COUNTY AGENT

JOE JONES

Wheat land is being prepared and seeding will soon be in full swing. The feed grains diverted acreage program has given us a lot of good clean land on which to seed the 1962 wheat crop. Clean land that will keep our wheat free of foreign material is of utmost importance. I was reminded last week that far too much of our wheat contains a few grains of barley or other foreign material per bushel. We should all make an effort to keep foreign material to a minimum. When we select land for wheat we should plan to destroy all the volunteer plants other than wheat prior to seeding. The tolerance for foreign material such as barley is less than one-half one per cent. Wheat containing an excess of foreign material creates marketing problems for the elevator man, and of course, the farmer eventually loses by such farming practices. Plan now to keep your wheat crop free of foreign material that makes it less desirable and creates market resistance.

Cotton over the county still looks good and no damaging numbers of insects have been found by me or reported to me since back in the early season. Every week we get just a little nearer the end of the season when we can stop worrying about these insects. About all we have left, to be much concerned with, is the cotton bollworm and the cotton leafworm. Let me suggest you continue to check for these two pests and take the necessary steps to control them should they occur in damaging numbers. Conditions to date would indicate we are unlikely to have any serious infestation of bollworms, but we should continue to check on this insect every week.

Under the Act, Bates says consumers are assured of fair and stable prices and taxpayers will benefit from savings of as much as \$1 billion overall from reduced storage and support price activities. The increased farm income will be an aid to the nation's entire economy, Bates concludes.

Soybeans are in all stages from rather large beans down to only blooms. You should keep in mind good soil moisture is necessary for soybeans through September and early October. This will likely require one or more waterings in September and for some it may mean watering in early October.

"Operation Silage" Is Big Undertaking

12,000 Tons Being Hauled From Friona To Farwell

"Operation Silage" is what one might well call the huge operation now being carried on by Farwell Feed Lots. Charlie and Bill Baxter, owners of the feed lots, are out to make sure that they have enough roughage for their feeding operations this winter, and are transporting about 12,000 tons of ensilage from the Friona area to their feed pens five

miles south of Farwell. In what is probably the biggest operation of its type ever to be carried on in Farmer County, there are 24 big trucks on the road, and four ensilage cutters in several fields in the Friona-Hub area.

It is a family affair for the Baxters, with the silage being cut from 600 acres on the farms of Bill, J. W. and Billy Baxter, and Clarence and Larry Martin, all who farm at various locations around Friona.

The operation started last week, and when completed, probably by late this week or early next week, 12,000 tons of ensilage will have been stored in a mammoth silo, at the feed lots.

The silo is one-quarter of a mile in length, 36 feet wide, and 14 feet deep. Each day, the 24 trucks haul from 110 to 120 tons of ensilage--the average load being 8 tons.

The ensilage being stored in the big silo will all be fed during the next year, Baxter says. "Last year we put up only 7,000 tons of silage and ran out early this year," he says.

At the present time there are 4,000 head of cattle in the feed lots and this number will be increased to 6,000 by October. The 12,000 pounds of ensilage won't be too much for the number of cattle we plan to feed at their lots during the next year, Baxter says.

Baxter admits that hauling this ensilage 25 miles "isn't the best way," but that's where the family farm land is, and thus the reason for the big hauling operation.

Ag Act Of 1961 Reviewed

The Agricultural Act of 1961 is now on the books and the rush is on to explain its provisions to farmers and others, reports C. H. Bates, extension farm management specialist.

One of its major provisions, reducing the wheat surplus, will be voted on August 24. Wheat producers will vote yes or no on marketing quotas for the 1962 crop. If they vote yes,

a new wheat stabilization program will become effective, including higher support price, a mandatory reduction of 10 per cent in farm wheat allotments with acreage cuts up to 40 per cent possible and a saving of

\$258 million for the nation's taxpayers. The legislation extends the feed grain program which is now in effect and for the first time includes barley along with corn and grain sorghums. Current estimates indicate that feed grain production will be about 15 percent less than last year, says Bates.

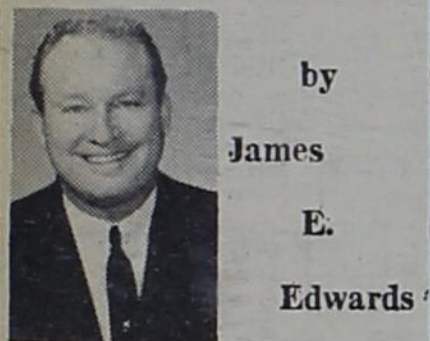

Marketing order programs--self-help in a true sense--are authorized on more commodities.

The Agricultural Trade Development and Assistance Act (includes food for peace) has been extended and strengthened; expansion and improvement of supervised credit services for farmers who lack sufficient private credit and an extension of the Wool Act, the Great Plains Conservation Program and School Milk Program should

FOOTSAVING EDUCATION

Is Going Barefoot Healthful?

Yes, nature has a plan for strengthening young feet but the scheme won't work if the feet are always protected by shoes.

Nature provides a foot bottom which thickens readily under the heel, the outer border, and the ball of the foot while the area under the arch remains sensitive. The sensitivity is due to the many nerve endings which make the arch ticklish.

When the arch receives uncomfortable stimuli, the walking child quickly rotates his foot to the outer border. To do this he must use the muscles that hold up the arch and we know that using muscles is the only way to strengthen them.

Ag Extension And Rural Areas Development Relations Explained

The Texas Agricultural Extension Service, along with other State Cooperative Extension services of the nation, has been assigned the responsibility for providing the educational and organizational leadership for carrying out the U. S. Department of Agriculture's Rural Areas Development Program.

This assignment, said Director John E. Hutchison, was spelled out in Secretary of Agriculture Orville L. Freeman's memorandum to all USDA agencies and in which he also emphasized that the effort would have priority over all other Department programs. Extension's responsibilities are specifically to provide organizational and educational leadership in organizing local leaders, private groups, state and local government and their instrumentalities in setting up active, broadly-representative state, area, and county rural areas development committees; and educational and technical assistance to local leaders and private groups concerning farm improvement and off-farm employment opportunities, and in cooperation with various state, area, county and community agencies.

Director Hutchison said the Texas Service would carry out the responsibilities by informing the people concerned of the provisions of the Federal laws involved; creating an awareness of problems and motivating people to analyze these problems and where the interests and desires of local leaders warrant, provide leadership in organizational and educational phases of rural area development.

Also guidance in inventorying area resources; assist in analyzing and explaining social and economic relationships and projecting area economic growth; assist local groups in planning and starting projects to reduce under and unemployment; provide educational and training assistance in leadership development; provide

counseling and assistance to get maximum benefits from other programs and help rural youth explore career and job opportunities both in and out of agriculture.

The director pointed out that the program is an expansion and re-organization of the earlier Rural Development effort which operated on a pilot basis. Experiences gained will be used to strengthen the program now getting underway.

The Rural Areas Development Program, he added, aims to reorganize, revitalize and even rebuild the community, county or area economy in order to achieve a balance between agriculture, business and industry. Therefore, the program is long range and the concern of both rural and urban residents, Hutchison said.

USDA's Rural Areas Development Program is applicable to all counties and should not be refused with activities which will be conducted under the Area Redevelopment Act (Public Law 87-27) which provides loans, grants and technical assistance to a limited number of urban and rural areas of the nation. It should be pointed out, Hutchison said, that 47 Texas counties have been designated to participate under the rural provision (Section 5b) of the Act.

Shower Fetes Recent Bride

Homemaking Cottage was scene of a bridal shower honoring Mrs. Robert Hughs Saturday afternoon.

A miniature bride and groom adorned with wedding bells complemented the serving table which carried out the brides chosen colors of pink and white. Punch, cookies, nuts and mints were served from silver and crystal appointments.

Those calling during the afternoon were Mr. and Mrs. Wilbur Charles, Nellie Bea, Crook, Mrs. Owen Burnett, Mrs. Dale Berggren, Patricia

Crook and Mrs. Don Stone. Hosting the occasion were Misses Linda Gilreath, Judy Meachum and Floye Smith.

Visit Daughters

Visiting here from Pierre, S. D. are Mr. and Mrs. Fred Roberts former residents of Bovina.

They are visiting with their daughters and families, Mr. and Mrs. Wayne McCutchan and Mr. and Mrs. Sammy Sudderth.

Harris Escapes Serious Injury In Accident

J. W. Harris, co-owner of Three-Way Chemical Co. here, escaped serious injury Monday afternoon in a two-vehicle collision three miles north of Texico.

Harris' pickup, a '60 model Chevrolet, was demolished, according to reports.

The collision occurred at a blind corner. Driver of the other vehicle, also a pickup, escaped serious injury also.

Hit And Run Accident Does \$100 Damage

An estimated \$100 damage was done to a parked car on North Street in Bovina early Tuesday morning by a hit-and-run driver.

The damaged car, a 1956 DeSoto, was parked in front of Super Sawayay. It is owned by Jim Young, shed manager at Gateway Produce Co. here.

Highway Patrolman Fred Lenz, who investigated, said that someone living in apartments above the grocery store told him they heard a collision about 7 a.m.

Reception Fetes J.J. Spurlins

Mr. and Mrs. J. J. Spurlin of Texico celebrated their Golden Wedding Anniversary Saturday afternoon with a reception in their home.

Hosting the affair were their daughters, Mrs. Val Baumgart and Mrs. Jack Chambliss of Clovis and their son, Rev. J. J. Spurlin of El Paso.

The serving table was laid with a white cloth and centered with an arrangement of gold spider mums in a crystal bowl. Traditional wedding cake and punch were served from silver and crystal appointments.

Guests from Oklahoma, Texas, New Mexico Colorado called throughout the afternoon.

Gary Beauchamp Has Surgery

Gary Beauchamp, son of Mr. and Mrs. Thomas Beauchamp, underwent surgery Saturday at Methodist Hospital in Lubbock. He is reported to be in fair condition.

Mrs. J.T. Jones Hosts Party

Mrs. J. T. Jones hosted a ceramic painting party Friday in her home.

Mrs. Lewis Jureak of Plain-

view presented the demonstration.

Cicero Smith Changes Name

Name of Cicero Smith Lumber Co. has been changed to Cicero Smith Home Center. Change became effective first of this month, J. E. Sherrill, Bovina manager, announces. Corporate name to be the pioneer West Texas Company will still remain Cicero Smith, but to better describe its current operations, it will be advertised as Home Center. In announcing the name change, Sherrill said the new name was a result of changing times. Addition of such varied items as carpeting, appliances, kitchens, remodeling and completely engineered component homes makes the name Home Center an appropriate one to describe the current Cicero Smith operation, he said. In Bovina, the firm is located at intersection of Third Street and Highway 60.
