

WEEKLY SENTINEL
PRICE \$1.50 PER YEAR.

BY GILES M. HALTOM

DR. TIME WILL CURE US

In 1853 in place of a deficit and a monster bonded indebtedness this country had a surplus of one hundred and five million dollars; instead of being too high prices were too low, and instead of the abbreviated garments of today women wore skirts so long that they swept the ground. People were not any more satisfied then than they are today, either. Financialists agreed that the annual surplus was a menace to our financial stability, the farmers fumed because wheat was only fifty cents a bushel, and dress reformers clamored that the long dresses swept up disease germs and were unhygienic.

As we look at conditions today we note that Dr. Time has effected a complete cure of the ills of those days but we have collected a new batch, such as indebtment, shammy dances, H. C. L., profiteering, leg shows and joy rides. As for the annual surplus the invisible Dr. Time soon reduced that swelling and it disappeared entirely. Some may contend that the cure is worse than the disease, but that has nothing to do with the argument—the point is that he cured us.

He will cure our present ills, also. Thirty years from now many of us will still be alive and kicking, but our complaints will be different. The present ailments will all have gone and in their place we will have a new set that we do not now even dream of. We will perhaps have swapped both Japan and England, and father will be coming home and fighting on the roof in an auto up all night with some home brew.

So why worry and waste a lot of time listening to a quack economic physician who are constantly feeling Uncle Sam's pulse, worrying about his circulation and fuming about his diet? Entrust the matter to old Dr. Time, the only physician who never lost a case.

LOW GRADE COTTON

A recent issue of the Galveston News contained the following, which may be of interest to many of our readers who have a stock of low-grade cotton on hand for which they can find no market. The plan is worth investigation, at all events:

B. Witten, Galveston cotton man, has proposed a plan whereby the cotton growers who have held over low-grade cotton from last year's crop, can market it in the ports of Europe, where the demand for the lower grades affords a better price than that offered in this country.

It is pointed out by Mr. Witten that the sale of the lower grades at this time would enable the growers to hold their cotton of higher grade until such time as the market shall remain its former strength.

"I do not think it advisable that the farmer sell all his cotton at the present price," said Mr. Witten. "But with the expense of holding the product in the hands of the grower, the farmer is enabled to secure a price for the higher grade cotton which is well within the limit of his profits." Mr. Witten has already secured a partnership in the proposed venture with the firm of B. Witten & Co., and plans to hold his stake in the venture for a better part of a year.

TRACK IN THE DEEP

The "trackless deep" is about to be conquered. Navigators are now making final tests on radio pilot cables which will be laid in New York harbor, guiding vessels for over sixteen miles, out to the high seas.

This device has been stamped as "one of the greatest aids to navigation ever devised." The cable throws out magnetic waves that can be heard by wireless telephony receivers on a ship at the surface and within a 500-foot radius.

With a large receiver coil, like a four-foot ear, on either side of the vessel, the buzzing of the cable can be distinguished with equal ease in fog weather, fog or on a "hazy sea." If the buzz is equally loud in each of the operator's ears, then he knows the keel is over the cable, and all is well.

New York harbor is expected to see far fewer marine accidents than formerly. And the possibility of the discovery does not stop there. Transatlantic and Transpacific cables, marking paths that need not be varied from by a fathom from one shore to the other are in prospect.

In a few years the seven seas may be strung with these cables, and the ships of commerce, instead of clumsy and uncertain following of a course that must be trued up every hour, will be set upon the path over the cable the operator will adjust his ears and the ship will sail as the crew flies.

A CAST IRON NERVE

We admire a man with nerve, but there is such a thing as even overdoing that, and turning the nerve into downright "cheek." Everybody ought to know that the advertising space of a newspaper is the only merchandise it has to sell, and unless it sells it the paper is going bankrupt. Nobody who does not know this does not know very much. Yet, everybody seems to think that it is perfectly legitimate to ask the user of the space and the gift of this merchandise free. The average publisher gets that sort of stuff every day of his life, until at times he gets to looking at the world as composed of grafters to a large extent. No one who is going to be benefited financially by the use of the space has any right whatever to ask for it or to expect it free, and those who are continually doing so are exhibiting a cast-iron nerve that is not to their credit.

If a man is rich his fool notions are called eccentricities.

The trouble with many specialists in business is that they won't work.

Although high prices are general, it still costs nothing to be civil.

Organs of hearing are found in some butterflies and especially in those flying by day.

A fellow has got to go to the doctor's now whether he is sick or only thirsty.

A married man can't see much sense in paying attention to a lecture.

Nowadays a woman has the doubt as to whether a man is after her or her vote.

We suppose auto-intoxication means that these newfangled no-kick drinks ought to intoxicate but don't.

Don't be like a coroner, and wait until a fellow is dead before extending a helping hand.

The munitions worker got \$15 a day for making shells, and the soldier got \$30 a month for stopping them.

A lady of the Kingdom with which I only speak of a man's future should be clear when they speak of a woman's past.

If it was wrong to go to church on Sundays it would take all the police and fire departments to keep the crowds back.

One good way to keep the home fires burning is to chop enough wood and kindling for the wife before the winter sets in.

And now Sacramento comes to the front with a two-headed snake. This kind of proposition seems to have both barrels loaded.

Teaching girls four or five different kinds of languages in school is something to be admired. His-panics can testify that one is enough.

In Ireland zoloz go on hunger strike and starve themselves to death. In India zoloz sit for days at a time on sharp iron spikes. Some think such enthusiasts saints and martyrs, while others opine they are just plain dampfools.

Just why the ladies wear dresses cut clear down to the wishbone all winter and then get out their furs when summer comes is one of the many things mere man cannot understand. But then mere man don't know much, nohow.

Talk about the supremacy of man! Huh! From the time we were kids and played hockey from school to go wading in a mudhole until we are old and decrepit, we have to be eternally explaining to some woman why we did not come home earlier.

We never could understand why men have always fought each other, and do yet, over difference in religious beliefs. We do not care what brand of religion our neighbor has, only contending that most any kind is better than none.

What's the use of knocking the ladies because of what they wear or don't wear? They are pretty anyhow, with or without, and as they rig up to please us ungrateful men we ought to look pleasant instead of displaying our natural grouch. There is nothing on earth so nice as a well-groomed woman, whether the skirt is skin-tight, slit up one side, down the other, or both, cut bias, hobbled or sewed off.

SAVE THE ANCIENT GOVERNMENT PALACE

The Daughters of the Heroes of Texas and the Texas Historical and Landmarks Association are endeavoring to save to the people of Texas and America, the old administrative building of the Province of Texas, with walls four feet thick, and which bears over the entrance the ancient Aztec arms, and still has the old iron ring, near at hand to which stood hunched the commanding officer's Arabian steed ready for emergency. This building is connected with all the principal history of Texas, dating from its completion in 1749. It was headquarters for the Army of Texas after the capture of San Antonio in 1835, and after the Battle of San Jacinto. From its doors Seguin went with his small escort to collect the charred bones of his friends, the Aztec heroes. In this building, too, he lies guarded in solemn state until ready for burial.

All the great men of Texas were quartered in this building at one time or another, or were entertained there, as well as prominent visitors to the Province of Texas.

It will be a disgrace to the State of Texas to permit the destruction of so important a building! It is heavily mortgaged and must be sold or torn down to make way for a modern structure. These societies care not save it without assistance. It belongs to all Texas—To America—not alone to San Antonio—and all should gladly render what aid is possible.

Do you wish your name enrolled with the heroes of Texas for all time? If so, show yourself a hero by coming to the relief of the history of Texas. Assist the patriotic men and women of San Antonio who are trying to save the Ancient Government Palace, to make it a Texas Hall of Fame and a Museum of History, Art, Relics and Literature. As a memorial to the heroes who died in the late war as well as to the heroes of the early days. It is intended when the building is saved to devote it to the needs of the people and for the history of Texas, past, present and future.

To donate or preserve the walls of Texas. To the Government, State and National in the highest form, is the duty of the citizens. The building will also be used for a law library, Community House, and other suitable purposes. The plans are not limited, but unlimited service, where Highest Duty calls, where service is most needed, as in the building of those in charge.

The names of all contributors to the fund will be placed in a book to be inscribed "The Roll of Honor," and be placed in the building. All persons collecting or donating, as well as one thousand dollars shall be designated "Promoters," and their names or a name designated by them shall be placed on a bronze tablet on the outside of the building. Those donating or collecting ten thousand dollars shall be styled "Benefactors" and a room shall be called in their honor, or, as designated by them. The building shall be known as "The Ancient Government Palace, the Texas Hall of Fame and Museum of History, Art, Relics and Literature."

If there is someone living you much desire to honor, have a room named for him or her by contributing ten thousand dollars.

If you have lost a dear one, how much more appropriate and how much finer and more lasting will be the tribute of a room in the Texas Hall of Fame than a monument in a cemetery where, only a few go, and from a sorrowing journey of their own, to heart-broken to notice your first monument. Name a room for your dear one, and "there you will find it as long as Texas remains."

The rooms may be a testimonial to the living or the dead.

Help save the only one and the memories of the heroes of our own "war." Let all who read this notice send a donation, and send it to Mrs. A. J. De Zayas, Treasurer, Ancient Government Palace, Purchase Fund, 141 Texas Street, San Antonio, Texas. The donors are: Mrs. Mary B. Gaenslen, San Antonio.

HOBBY DECLINES TO ASK FARMERS QUIT GINNING

Austin, Texas, Oct. 28.—Governor Hobby today declined to join Governor Parker of Louisiana in requesting ginnermen to close down for thirty days or more. He declared that if the cotton was made it should not be wise to throw it away or allow it to deteriorate by not ginning it. He said he believed that by putting it in better shape for preservation by baling it would enable the farmers to hold their cotton for higher prices without impairing the grade.

A NASTY COLD

EASED AT ONCE

"Pape's Cold Compound" then breaks up a cold in a few hours

Don't stay stuffed-up! Quit blowing and sniffing! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken usually breaks up a severe cold and ends all gripe misery. The very first dose opens your clogged-up nostrils and the air passages of the head; stops nose running; relieves the headache, dullness, feverishness, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without irritation, cures also, coughs of various kinds and bronchitis.

J. M. Faulkner of Attyne was a business visitor in the city Thursday.

NACOGDOCHES TRADITIONS

The old-fashioned Methodist Camp Meeting is now numbered with things of the past, and good, old-time religion is ancient history. Few are the people now living who participated in these old joys. Simpson's Camp Ground is now seldom heard of. It was once famous, and its fame extended into the vague distance.

The location of this once famous point is ten miles southeast of the town of Nacogdoches, and a half a mile north of Woden. Why it was located right here, the Lord only knows. It has no conveniences as to accessibility. It was not on any road and it had no definite road leading to it. It was over on the far side of the impassable Atascosa Creek, or bayou. Atascosa means "muddy". The name fits this creek. It should be "red mud" as was near the Pontesuelos, another obstructive creek that had no crossing near except a primitive footbridge. The name Pontesuelos translated is footbridge. It was out in the bushes and had no pretty trees and nice landscape. It had only a slow and scanty flow of water from an old-time gum spring. Horses were often carried nearly a mile for water, and the spring water supply for human drink and Methodist baptism was limited.

The big meetings always occurred in the dry fall, when dust was abundant. The population of that locality was sparse, but the attendance from a distance was great and they verily kicked up a dust. The meetings were not wholly dry. The bad boys from town often had a bottle in one end of their saddle bags and a six shooter in the other end, both loaded for trouble, for fun, and other emergencies. However, disorder and disturbances were rare, because it was dangerous to start things if that sort of thing.

The preparations and operations of the big camp meetings were handled by the pious old pioneer Methodist brethren, far and near. Some of their names were as follows: Uncle Jim Jacobs who lived near; Davis King, Uncle Jim McKnight, John F. Pleasant, Milton Mast, Dan Atkins, I. Skillern, S. Yates, A. Rector, D. Muckleroy, Dan Pate and other teachers.

A large arbor or covered pavilion was erected for shelter during services. A pulpit was at the lower side, and a small vacant space was next in front, for special religious purposes. This was surrounded by seats made bench fashion, with four legs set in atger holes. When mourners were called the occupants of the front seats got away and the mourners knelt at these benches.

There were also seats of logs placed in order, and all other kinds of seats available, covering the entire space beneath the arbor, and saw dust and oat straw were spread over the bare ground.

Surrounding this central arbor was a quadrangle of temporary wooden buildings or hastily constructed shacks or shelters called tents. These occupied three or four sides of the square, at a distance of fifty yards from the arbor. Each tent was owned and occupied by a family called tenters, and by guests who had lodgings. Board and lodging was free to everybody. Invitations were lavish, and how the natives of the land did pour into these hospitable quarters. They came in all kinds of wagons, on horseback or any old way.

Bunches there were home, and they all came in good humor and fine spirits. The words spirits has various meanings. Yes, all sorts of best spirits abounded. Jolly young ladies came riding old-time sidesaddles, and wearing long riding skirts that almost reached the ground.

The camp grounds were lighted at night by numerous blazing lightwood fires mounted on scaffolds located at suitable points all around and over the grounds. Beneath the arbor the lights were tallow candles. Meetings, sermons and exhortations were dated twice or more a day. An old-fashioned cow-horn called meetings. Side meetings were held in secret parts of the adjacent woods. Night services at the altar under the arbor were leading features. There was where most of the mourners got religion.

"Professions" of religion was another way of expressing it.

These big camp meetings usually begun on Friday night and held eleven days, taking in two Sundays. The "get happy" brethren and sisters and the shouting converts and their associates were often loud and vociferous. The good old songs "Give Me Old-Time Religion," seems to point to such conditions, and especially to the good old-time Methodists who were, indeed, the salt of the earth. But those good old times and good old people are past and gone. Would to God we had multitudes of them today.

NACOGDOCHES COUNTY OIL NEWS

Smith & Goss unloaded their drilling rig Wednesday and will be in drilling on the Blount Ranch within two days, their first test to be on this ranch.

Mr. E. S. Martin, a Shreveport oil man operating here, gave out the information Wednesday that it was the belief of some geologist to whom he had talked that real deep oil could be found within the city limits of Nacogdoches. However, apparently no one has any intention of drilling within the city limits, most of the attention being attracted to the Oil Springs vicinity, although deep test drilling is going on at Appleby, ten miles north of here.

Dr. J. D. Ellington of this city has a rig on the way and is preparing to drill on his 4,000 acre lease in the Tolle community, thirty miles southeast of here. He will begin drilling for shallow oil within the next two weeks.

Mr. W. L. Mann of Fort Worth is here this week attending to business of the Mann Oil Company, which has an office in this city. D. E. Wolcott, of Wichita Falls, is also here for the purpose of making drilling arrangements. He is president of the Mann Oil Company of Wichita Falls. O. W. Dayton of Ohio is here also for the purpose of beginning extensive drilling operations. Leasing here is commanding the attention of a number of oilmen both in the city and over the state. Out of the state people are beginning to take interest in the big shallow pool in Nacogdoches county.

Father James P. McCarthy, late of St. Patrick's parish, Galveston, has been assigned to the Nacogdoches work and is in the city in readiness to assume his duties. Father McCarthy is a young man, energetic, devoted and able, and his physique and mentality will enable him to perform the hard work required of the priest in charge of the Nacogdoches Charge. We welcome Father McCarthy to our city.

A big box supper was given Trinity Friday, many people from Nacogdoches attending. Eighteen boxes were sold and the sum of \$40 was raised. Mr. G. B. Layton is the superintendent of the school, and he reports that the school is doing fine.

LITTELL'S LIQUID SULPHUR COMPOUND
It is a powerful and scientific combination of sulphur and other healing agents for the relief and cure of diseases of the skin. It is especially effective in the ITCHING VARIETIES; giving instant relief from the itching and smarting sensations and by its germ-destroying properties it exterminates the microbe which is the cause of the eruption, thus curing the disease completely.

R. B. Waltall, the present incumbent of the district clerk's office, is now busy in getting everything in readiness to turn the office over to Ivan Prince soon. It is understood that Mr. Prince is planning to go to Tyler, where he will take a business course which will enable him to do better work in the office.

I want to close down my gin on November 1 and can do it if my customers will bring their cotton promptly. If this is not done I will gin on Friday and Saturday only the balance of the season. W. J. Clevenger. 20-DW3w.

ITCH!
Money back without question if it fails to relieve itching, eczema, ringworm, tetter or other skin diseases.

WHEN A WOMAN IS NERVOUS—WORRIED

The lives of most women are full of worry. Men's troubles are bad enough, but women's are worse. Worry makes women sick. It pulls them down, and in their weakened condition they are subject to pains, aches, weakness, backaches, headaches and dizzy spells. Most women neglect their health, and for this they pay the penalty. Any woman will find that neglect does not pay. A little more attention to health would brighten up her life. If she asks her neighbors she finds that Dr. Pierce's Favorite Prescription benefits a woman's whole system. It not only acts upon the troubles and weaknesses peculiar to women, but is an all-around tonic that braces the entire body, overcoming nervousness, sleeplessness, headaches, dizziness and a run-down condition.

SAN ANTONIO, TEXAS.—"For about three years I have been in a run-down condition. I would be so weak at times I could scarcely get around. I was extremely nervous, could not sleep and I was in a miserable state when I was advised to try Dr. Pierce's Favorite Prescription. I have not taken all of one bottle but am feeling better than I have for a long time. I am going to continue its use for I know it is helping me more than any medicine I have taken."
—Mrs. H. T. KNIPPA, 913 Burleson St.

CAMPAIGN COM-

MITTEE RECEIPTS

New York, Oct. 28.—The total receipts of the Democratic National Committee to October 25 for the conduct of the present campaign amounted to \$878,831.34, according to an announcement today by Wilbur Marsh, the party's national treasurer. The sum collected, Mr. Marsh said, was constituted almost entirely of contributions to the campaign fund with the exception of \$150,000, which was borrowed.

Republicans Do Better

Chicago, Oct. 28.—The Republican National Committee's campaign to elect Harding will cost \$3,442,892.32, Fred Upham, national treasurer for the party, notified the senate committee appointed to investigate campaign expenditures in a report filed here today. Of this sum \$2,042,892.32 had been spent up to close of business October 24. Upham estimated the expenditures for the closing week of the campaign at \$100,000 additional.

PONTIFICAL REQUIEM MASS CELEBRATED FOR MACSWINEY

London, Oct. 28.—A pontifical requiem was celebrated this morning in St. George's cathedral over the body of the late lord mayor of Cork, Terence MacSwiney. Church dignitaries, the lord mayor of Dublin, the deputy lord mayor of Cork, deputations representing the British Parliamentary Labor party, and various Irish political and civic organizations attended. Thousands of persons thronged every available space in the cathedral. The breastplate of the coffin bore an inscription in Gaelic reading: "Murdered by foreigners in Brixton prison, London, October 25, the fourth year of the Republic. Aged forty years. God have mercy on his soul."

CORN FOR FUEL

Omaha, Neb., Oct. 28.—Hundreds of thousands of bushels of corn will be used for fuel this winter by the farmers of Northern Nebraska. The high price of coal and the bounteous but low priced corn crop of this year is the reason, new corn, unshelled, now brings three-fourths of a cent per pound, or \$15 per ton. The cheapest soft coal is \$15 per ton and has to be hauled. The farmers claim unshelled corn makes a hotter fire and will last longer than coal.

COAL STRIKE SETTLED

London, Oct. 28.—The strike of coal miners throughout England and Wales was settled this afternoon, but the settlement is contingent upon a ballot of the miners, Frank Hodges, member of the miners' executive body, announced. "We have the terms from the government, which the executive body is submitting to a ballot of the men for their judgment. The executive body is recommending their adoption as a temporary measure until a national wages board is established."

WANT GOVERNOR IMPEACHED

Birmingham, Ala., Oct. 30.—The Alabama Federation of Labor, in convention here today, adopted a resolution demanding the impeachment of Governor Kirby for sending troops into the coal strike district. The vote on the resolution was unanimous.

MOUNTAINS AFFECT BIRD LIFE

Andes Said to Be Responsible for Number of Species Found in South America.

The richness of South American bird-life is due to the presence of the Andes more than to any other one thing. It is the absence of great mountain chains in Africa, which accounts for the comparatively small numbers of species of birds in that continent. From base to summit, four distinct zones of life—tropical, subtropical, temperate and alpine—are found in the higher Andes, and each zone has species which are confined to it.

It is not only the height of the Andes which affects bird life. In places, for hundreds of miles, this gigantic range may appear as two or three chains, each not less than 10,000 or 11,000 feet in height, and these climatic walls are as impassable to the species living in the tropical or subtropical valleys they inclose as though they extended to the zenith. Isolation is, therefore, added to the factors of climate and sedimentariness in the making of the species, and the three combined have produced a greater variety of bird life than is found in any area of similar extent in the world. The American museum of natural history inaugurated in 1911 a biological survey of the Andean region with particular reference to its bird life. As a result of the collections and field studies made, the museum is now in possession of large collections and data from the more northern part of the chain.

FAMOUS BELLS OF BOSTON

Not the Least in the Historic Old City is the One That Was Cast by Paul Revere.

A bell which was cast by Paul Revere still hangs in the belfry of King's chapel, built when Boston was in its infancy. This bell was the one hundred and sixty-first cast by Revere. Besides being a bell caster Revere also was an engraver, a goldsmith and a dentist. Rising above the modest houses is the old North church, from which Revere received his signal previous to his famous midnight ride. Christ church, the second Episcopal church of Boston, is situated in the north end, and is an off-shoot of King's chapel. Its spire, designed and built in 1723, has served as a landmark to guide ships into the harbor. In 1804 this spire was blown down by a great gale, and was shortened by 16 feet. The chime of bells, now silent, which hangs in the tower, was made in 1774, in the foundry of Abel Ruddall, of Gloucester, England. Each bell has engraved upon it an inscription denoting its history. The bells, as was common belief in that time, were supposed to possess the power to dispel evil spirits.

Stage and Movie.

To me the joy of the theater is in the attention forced by a skillfully constructed play acted by players of conviction and artistic power. I have often watched an audience coming from a moving-picture theater, and rarely have I seen a look of more elation or spirit upon the faces of the crowd than would result from the perusal of a newspaper. Whereas, after an evening at an interesting play, the audience pours forth in animation; and even though the play may have been a tragedy, emotions have been stirred and minds stimulated until the reaction shows on every face. So long as the human relation is preserved between actor and audience, so long will the acted drama retain its supremacy in any community.—Otis Skinner in the North American Review.

The Wonder of Eggs.

One cannot find among the multitude of wonders in nature anything more marvelous than the development of an egg. writes Elsa G. Allen in the American Forestry Magazine. Whether it be a butterfly which flourishes for a day only to die after depositing its eggs, or a reptile which lazes its eggs with only the warm sand to mother them, or a fish, like the salmon, which, with incredible strength, jumps the rapids to spawn in the upper reaches of rivers, or most appealing of all, a bird which builds a beautiful nest for its treasures, the egg in every case is structurally the same, and the miracle of life unfolds according to the same laws of cell division.

Reckoning Longitude.

Longitude in the United Kingdom and generally in the United States is reckoned from Greenwich, degrees being known as east longitude and west longitude from that point until they meet in the Pacific ocean at 180 degrees from Greenwich, the opposite zero point, Asia being in east longitude and the United States in west longitude. For the same reason the term Orient is applied to the East and Occident to the West. It may be said that Germany reckons longitude from Berlin, France from Paris and Spain from Madrid, while sometimes it is reckoned in this country from Washington, but, usually speaking, Greenwich is meant.

A Perfect Chesterfield.

"I had a little experience this morning with an extremely polite man." "Tell me about it." "I was standing near him in a barber shop while a dark attendant was briskly applying the whisk broom. The gentleman turned to me and said, 'Excuse my dust.'—Birmingham Age-Herald.

NOT SO TRAGIC, AFTER ALL

Fair Traveler's Emotion at Seeing Affecting Parting Was in Large Part Uncalled For.

The temperamental difference between a restrained and an emotional race occasionally brings about kindred effects through accident. A lady waiting for a belated train, witnessed a most affecting parting between an aged father and his son, both Italians. The old man seemed in a frenzy of woe. He moaned, raved, lifted his clenched hands toward heaven and shook them despairingly.

"Poor, poor souls!" she exclaimed, compassionately. "The young man going away to seek his fortune and the old man left behind. I suppose he fears they may never meet again. A common tragedy, but it grips one's very heart."

"Cheer up!" briskly advised her companion, who understood Italian. "The young chap is only going to the next town to visit his married sister and the venerable old person is worried because he loaned him his season ticket and wishes now he hadn't promised to do so. He says he knows the boy will lose it, but, anyway, if he does, he'll break every bone in his body when he gets home. That's all."

MONUMENTS OF VAST SIZE

That on Leipzig Battlefield, Though Higher, Less Costly Than Memorial to Italian King.

Leipzig possesses a monument which rises only a few inches short of 300 feet. "The Battle of the Nations" monument stands in the middle of the plain where Blucher routed Napoleon's army. One million cubic meters of earth were displaced to make room for its base. It is surrounded by an enclosure a quarter of a mile wide and nearly half a mile long.

Next to the Pyramids it is the highest in the world, but it is by no means the costliest. This distinction belongs to the national memorial to Victor Emmanuel II, erected on the Capitoline hill in Rome at a cost of \$20,000,000. It took 31 years to complete this huge pile of marble steps, covered with statues, bas-reliefs, and mosaics. Sacconi, the architect, who designed it, died long before the work was finished, but he left models complete in every detail, and his original plans were never tampered with.

Colors Save the Eggs.

We have heard a great deal about protective coloration in nature, and when we consider the advantages which accrue to protectively colored eggs we may wonder, why some eggs have remained pure white through the ages, why others are of the most conspicuous greenish blue, and why still others stand out by their spotted or speckled patterns, says the American Forestry Magazine. White eggs are for the most part laid by hole-nesting species of birds like the owls and woodpeckers, and since the eggs are well hidden in their dark cavities it has not been necessary for them to develop protective coloration. The bright greenish blue eggs of most of the thrushes, for example, must be hidden in nests which are concealed in dense vegetation and the speckled eggs of the ground nesting sparrows depend for their safety upon the good hiding of the grass-woven nest.

Modern Casablanca.

A fire guard in the Shenandoah national forest not so long ago found himself in a predicament similar to that of Casablanca, although his decision was not so silly. Discovering that there were three bears at the foot of the lookout tower in which he was stationed without arms of any kind, he telephoned for permission to leave at the first chance to get a gun. The district ranger replied that the forests were dry, that a fire might start anywhere at any time, and that he must stay where he was, bears or no bears; and the guard stayed. After a time some one who had "listened in" came to his rescue.—Youth's Companion.

Japs Eating Frog Meat.

Frog meat made its first appearance last month in the menu of one of the most popular restaurants of Tokyo, Japan. Frogs had never been considered as a food until very recently by the Japanese.

In 1918 Dr. Watanabe brought some edible frogs from the United States. They were kept at the infectious disease experimental station, where experiments were made in breeding and raising.

The government has taken steps to encourage the raising and eating of frogs.

World's Smallest Newspaper.

The smallest newspaper in the world is now being printed in New York city. Its pages are only about five inches wide and six inches long, but they contain short news items that are very easily and quickly read. Another odd newspaper published in this same city is called The Deaf Mutes' Journal, all of its editors and general staff being members of a deaf and dumb school. However, The Deaf Mutes' Journal is a real newspaper in size and contains four pages of interesting reading.

Definitely So.

"What is your idea of a practical joke?" "One I can sell for a dollar and buy a peck chop."—Cartoons Magazine.

REFUSED TO SIT AND MOURN

Elderly Lady a Shining Example of Those Who Can Rise Above Vicissitudes of Fortune.

There is a white-haired old lady in this city, totally blind and partially deaf, notes the Minneapolis Journal. In her earlier years she was a police matron, one of the uplifting, cheering kind, that take more than a jailer's interest in their wards. But in her later years she lost her eyesight.

It is generally supposed that about all that is left for a mortal bereft of sight after middle age, is to sit and mourn out the remnant years, cared for by those blessed with all five senses.

But not so with this woman. She learned that the state gives adult women four months of training in handwork at Fairbairn. She took the training in basket weaving. Now in her small apartment she makes baskets rapidly, enthusiastically, artistically, and lives hopefully and comfortably, adding to the world's sum of cheer instead of subtracting from it.

More than half the world's population can claim exemption from full days' labor by reason of physical inability. A large proportion do beg off and shift the load to others. There is a deal of grieving and self-pity among the physically imperfect; and the world always lugs a load of the leaning ones.

But who with good eyesight can much complain, when those doomed for life to grope, keep on smilingly self-supporting in the dark?

MINSTRELS' WORK IN WORLD

Troubadours Led Men's Thoughts to Gentleness Amid the Ferocity of the Middle Ages.

The troubadours, called trovatore in Italy, originated in Provence, France. These minstrels of the middle ages, together with the practice of chivalry, helping to keep the world human at a period when fighting and bloodshed occupied the minds of men. The troubadour was received with open arms in the castles of great nobles and at the courts of kings. He always knew there would be a place for him at the table, that he would have a generous portion of fowl roasted on the spit and as many goblets of wine as his thirst demanded. One can imagine the great hall lighted here and there with torches in scones, the huge fireplace ablaze; the lord of the castle with his family in rich attire sparkling with jewels, and in the midst of all, the most important figure for the moment, the slender young troubadour with his harp. He sings songs, words and air of his own composition. Some of them are old folk tales gathered up and put into verse, legend of surpassing feats of valor, of miraculous prowess. Or they may pulsate with the heart throbs of that old, old, yet ever new, subject of love, and perhaps the young minstrel may steal an occasional glance at his lordship's prettiest daughter meanwhile.

The Big Caliber Man.

The man who profits by the experience of others and by his own mistakes, who applies proven principles to the solution of his problems, will be better than the average—he will succeed. The keen-minded man, the fellow who really forges ahead, is the one who realizes that he must prepare himself for greater opportunities and larger responsibilities if he is to win success. He first of all adds to his store of knowledge. He is a 44 caliber man. The "average man" remains so because he will not make the effort required to lift himself above his fellows. He is a .22 caliber chap.

Are you a 44 or a 22? Analyze yourself and see what you can do to improve yourself. Pick out your weak spots, and then make an effort to strengthen them.—C. S. F. in the San Quentin Balletin.

Thoroughly Anglicized.

"The Mortons are a bit too English for us," remarked Elkins. "They take the London papers exclusively, talk mainly about Chesterton and Shaw, and even have their windows stained foggy so that when anyone looks out through them the streets appear like those in London. However, that isn't why my wife and I stopped calling there. When their Anglomania developed to such a degree that they kept a large wastebasket standing in the hallway, that settled it." "I don't see anything English about that," said Badger. "What was it for?" "Oh, visitors were expected to drop their hats in it on entering the house."—Boston Transcript.

A Pest.

The Mediterranean fly (karaiti capitata) has for several years caused considerable damage in Greece to the fruit and vegetable crops. Oranges, apples, pears, peaches, apricots, plums and tomatoes have been especially affected. No remedy has yet been discovered, but there seems to have been little attempt to prevent the spread of this pest.—Omaha Bee.

Which Was Right?

Little Mary (busy doing home lessons)—"Mother, is it right to say, 'Girls is' or 'Girls are?'" "Mother—'Girls are,' of course." Little Mary—But then, mother, it doesn't sound right to say: "Girls, are my hat on straight?"

CROP LOSSES RECEIVE ATTENTION

College Station, Texas, Nov. 1.—Authoritative estimates on Texas crops for the year 1918 valued at \$645,648,600 indicate the appalling loss of \$75,345,712 due to ravages of plant diseases. The years of 1919 and 1920 having been more seasonable, will doubtless show even greater losses. Heads of departments and members of staffs of Texas Experiment Station, the extension service and professors in the school of agriculture at A. & M. College, charging themselves with the commission to find remedies for just such glaring difficulties, passed vigorous resolutions looking to the alleviation of these losses, at the recent meeting of the Plant Industrial Council, through which organization these scientists co-operate in the launching and disposition of the various projects coming before them.

The discussion of this subject revealed that as against this crop loss of more than seventy-five million dollars, annually, there is at present, being supplied to the Agricultural Experiment Stations, by both state and federal governments, only about \$5,750 per annum which enables only the maintenance of a one-man division directing its energies toward finding measures for prevention of losses from plant diseases. In this connection it was observed that certain peculiar conditions in Texas call for direct research work such as cannot be supplied by research workers in other states and regions; and the pressing need of the plant pathologist for additional workers was emphasized.

A principal function of the Extension Service is to disseminate among the farmers, information assisting in combatting crop losses and the resolutions of the Council suggest that a special course in plant pathology should be supplied the county agents during the farmers' short course held at the college each summer. A desire was also expressed, that students be urged to take strong courses at the college in plant pathology and physiology.

CHRISTMAS SEALS

Austin, Texas, Oct. 30.—J. W. Butler, former president of the Texas Bankers' Association and well known in the Lone Star State business world, has accepted the chairmanship of the Texas 1920 Christmas Seal sale committee. This was the announcement made today by the Texas Public Health Association which will direct the sale of 20,000,000 Tuberculosis Christmas Seals in Texas during the Christmas holidays.

Mr. Butler, formerly of Clifton, is now active vice president of the Texas Bank and Trust Company of Galveston. He will direct the statewide fight for the raising of funds to fight tuberculosis through the sale of the little penny Christmas seals. Many prominent business men and women of the social life of Texas are members of the Texas Christmas Seal sale committee. Among them are: H. A. Wroe, Dr. E. C. Burwick, and Dr. Z. T. Scott of Austin; Dr. I. C. Chase, James H. Allison, W. E. Connel, A. L. Shuman and J. H. Mumbower of Fort Worth; R. H. Spencer and F. M. Law of Houston; Dr. C. M. Hendricks and G. Zork of El Paso; William A. Bowen of Arlington; Mrs. E. Tweed Pomeroy of Donna; Mrs. F. W. McAlester and Nat M. Washer, San Antonio; Judge William F. Ramsey, Dallas; Judge Howell Johnson, Fort Stockton; T. J. Record, Paris; and H. J. Lutcher Stark, Orange.

Over thirty counties in the state have begun their organization for the sale of Christmas Seals, and 20,000,000 of the penny stamps will be placed on sale. The intensive sale will be December 1 to 11th, but the seals will be sold until Christmas day.

DEATH IN HOTEL FIRE

Fort Worth, Texas, Nov. 1.—The McLain Hotel at Seymour, Texas, was burned early this morning. One man is dead and two others are missing. The building was a total loss. The man who perished in the flames was H. G. Whiteside, a real estate man of Seymour. Many had narrow escapes. The fire started in the Majestic Cafe from the explosion of a coffee urn under which a gas flame was burning. The blaze spread quickly, enveloping the entire structure, which was three stories high and of rock.

REASSURES JAPAN

Washington, Nov. 1.—Reassurances have been given the Japanese ambassador by the State Department, it was revealed in a formal statement today, that no anti-Japanese legislation in California will be acceptable to the country at large that does not accord with existing and applicable provisions of the law and with the national instinct of justice.

RELATIVES FIGHT OVER MACSWINEY'S BODY

Holyhead, Wales, Oct. 29.—When day broke this morning over the Irish Sea the steamer Rathmore, bearing the body of the late Lord Mayor MacSwiney, who died Monday in Brixton prison, London, was steaming southward off the Welsh headlands on its way to Cork. At the same hour relatives of MacSwiney, who refused to board the special steamer provided to take them and the lord mayor's body to Cork, were on their way to Dublin. The shipment of the body direct to Cork was preceded by a violent scene in which blows were struck and members of the lord mayor's family dragged from a railway coach at Holyhead station. They refused to assent to the government's plan to take the body to Cork instead of porary arrest that the body was taken had been placed under virtual temporary arrest that the body was taken from the train and hauled to the dock where the Rathmore was waiting.

Body Arrives at Queenstown

Queenstown, Oct. 29.—The body of Terence MacSwiney, late Lord Mayor of Cork, was landed here today from the steamer Rathmore. It was received by the urban council and thousands of the city's inhabitants. A draft of armed troops was present.

A Reliable Remedy for Colds and Croup

It would surprise you to know the number of people who use and recommend Chamberlain's Cough Remedy. Mrs. J. N. Rose, Verona, Pa., writes: "Chamberlain's Cough Remedy has been used by myself and husband for a number of years for coughs and colds. I also gave it to my little granddaughter, three and a half years of age when she had croup last winter. It broke up the attack at once. I have recommended this remedy to a number of my friends and neighbors who have used it with good results." Sold by Stripling, Haselwood & Co. c

RELIGIOUS DISCUSSION

Editor Daily Sentinel: Please say in your daily there will be a religious discussion at Swift, Texas, beginning the first day of November at 11 o'clock until 1 and from 7 until 9 o'clock at night. Disputants C. W. Ing, Christian preacher, and W. W. Eaves, Baptist preacher. Everybody come and hear the truth. To last six days. J. L. Hargis, Com.

Serious Results from Colds

Colds not only cause a tremendous financial loss but also serious injury to every one who contracts them because they lower the vitality and prepare the system for the more serious diseases. It is not at all unusual for people who have serious lung trouble to say "I had a hard cold last winter." Why not take Chamberlain's Cough Remedy and cure your cold why you can. Sold by Stripling, Haselwood & Co. c

NACOGDOCHES OIL NEWS

Two deep tests are being made in Nacogdoches county, one at Appleby, ten miles north of here, and one at Poe Switich, eleven miles south of the city. Other deep tests, it is understood, are to be made in the county soon. Intensive drilling in the shallow pool still continues.

For a Disordered Stomach

When the stomach fails to perform its functions the bowels become deranged, the liver and kidneys congested. The important thing is to restore the stomach and liver to a healthy condition and for this purpose Chamberlain's Tablets are excellent. Give them a trial. They cost only a quarter. Sold by Stripling, Haselwood & Co. c

TORTURED BY CAPTORS

St. Louis, Mo., Oct. 30.—A man who says his name is Joseph Alexander, a stock raiser of Fort Smith, Ark., reported to the officers of St. Louis county that he had escaped early today from a farmhouse in the county where he had been held a prisoner since last Monday. He asserted his captors tortured him and compelled him to sign a check for \$25,000 on a bank in Fort Smith.

If It is a Bilious Attack

Take three of Chamberlain's Tablets and a quick cure is certain. Sold by Stripling, Haselwood & Co. c

CHARGED WITH ATTEMPT TO POISON LITTLE BOY

Gainesville, Texas, Oct. 30.—charges of assault with intent to murder were filed yesterday against H. W. Moore, who is alleged to have attempted to have fed poison in a cake to J. D. McCracken, aged 12, a son of Mrs. Vera Taylor, at whose home Moore boarded.

WEEKLY SENTINEL

PRICE \$1.50 PER YEAR.

BY GILES M. HALTOM

INDUSTRIAL GROWTH OF THE SOUTH

President Fairfax Harrison of the Southern Railway reports to the board of directors of that company that during the last three years a total of 508 new industries were established and put into operation, and 294 old industries enlarged, along the lines of the Southern.

The total investment involved in new and old projects was \$225,000,000. Mr. Harrison also shows the great variety of industries that are springing up, and declares the tendency is toward the complete conversion of raw material into the finished article.

The statement of the Southern's president is not only instructive, but timely, in view of the fact that the lower prices of cotton and the protests that have gone up over the decline, have tended to undermine confidence in the South's prosperity. It is evidence from a high authority concerning the other sources of Southern wealth.

The South was for so long an almost exclusively agricultural section that it has become the custom to appraise Southern prosperity by agricultural conditions. As Mr. Harrison says, the South produced raw materials at low prices for Northern manufacturers, and brought back the finished article at high prices, but an end is rapidly being made of that system.

The South today is manufacturing more and more of her own raw material and distributing the finished products, not only throughout the South, but throughout the nation and all parts of the world. Agriculture still plays an important part in Southern life, but the South's other industries are affording greater relief from the tyranny of one industry, and a higher and more permanent prosperity is the result of this emancipation.

There will be no return to the old days in the South when producers were kept in a continual state of poverty because of that isolation, their lack of organization, and their dependency upon organized bodies of capital in distant sections of the country.

More education, a greater variety of opportunities for the people that have come through the development of resources other than agricultural, better roads and transportation facilities, and a generally higher standard of living are making the South economically independent.

The probabilities are that the South will come through the period of readjustment in equally as good, if not better condition, than any other section of the country.—Houston Post.

ARMISTICE DAY

November 11th, one week from today, is to be a holiday throughout the United States. All the business houses in Nacogdoches and schools throughout the country will be closed for this occasion. The local post of the American Legion will have charge of the exercises on this day.

At 11 o'clock there will be memorial exercises in the form of an oration delivered by Major Ike Ashman of A. & M. College if he is unable to be here, which to date is undecided, we will have an able man to make this address. At 12:30 all the ex-soldiers will be served with a plate lunch on the postoffice square, prepared by the Domestic Science Class of the Nacogdoches High School under the supervision of Miss Robertson, head of this department.

At 3 p. m. there will be a football game between Houston Heights and Nacogdoches High School. This is scheduled to be a fast game and perhaps the strongest team the local champions have gone up against, but not any of the local boosters are uneasy but that they will be able to take care of themselves with the city team.

Promptly at 7 o'clock there will be a street dance for the pleasure of everyone here. This will take place between Mayer & Schmidt's and the Redland Hotel. Music for this occasion and all during the day will be furnished by the Nacogdoches Band.

Those ex-soldiers who do not care to dance, through the courtesy of Mr. Brantley, the picture show man, will be admitted to the Queen Theater free of charge during the day.

We trust that every person in the county will consider this a holiday and refrain from all kinds of work and come into Nacogdoches that we may pay due respect to the soldiers who were lost in the World War and to others who participate.

Come prepared to open the entire day with us.

SQUALID PORTO RICAN TOWN

Beside Superb Scenery, Ponce Would Seem to Have Little to Attract the Tourist.

Ponce, a city on the south coast of Porto Rico, gives the false impression of being a larger city than the capital, loosely strewn as it is over a dusty, flat plain and overflowing in hovels of decreasing size into the low foothills behind. It is the most extensive town in Porto Rico, and, like many of those around the coast, lies back a few miles from the sea, for fear of pirates in the olden days, with a street-car service to its shipping suburb of Ponce-Playa.

Airplane festoon its telephone wires, and its mosquitoes are so aggressive that to dine in its principal hotel is to wage a constant battle, while to disrobe and enter a bathroom is a perilous undertaking, according to Harry A. Franck in the Century.

Puerta de Tierra, once nothing more than the "land gate" its name implies, is almost a city of itself, a pathetic town of many shacks built of tin and dry goods boxes, spreading down and across the railroad to the swampy bay. Naked babies play in the mud, and mothers with pitifully small cups scurry to milk shops in an effort to get the precious feed for their infants.

FEW ESCAPED TAX GATHERER

In Old "Merrie England" His Net Was Wide and Its Meshes Set Especially Close.

The Bulgarian bachelor who now groans under an annual tax, equivalent to \$8 4d a year, has less cause to grumble than many a British Celt who shied at the altar a couple of centuries or more ago.

During the 13 years from 1695 to 1708 the man over twenty-five who shirked his matrimonial duty was called on to pay £12 10s (\$62.50) for a duke, a tax which yielded to the revenue about £1,000 (\$5,000) a week.

More than this, in those good old times the Briton had to pay a tax when he took himself a wife, and another every time he qualified as father. Thus, a duke's nuptials cost him £50 4s (\$252); his heir, £30 3s (\$152), and for each later male addition to the family his joy was discounted by a payment of £25 2s (\$127).

The benedict whose income was less than £50 (\$250) a year had to pay 2s 6d (9 cents) for his bride and 2s (9 cents) every time he became a father.

Musical Street Criers. In Charleston, even the chimney sweeps are musical, and as their tiny faces appear at the top of the chimney they are sweeping, you hear: "Roo roo" sung out over the sounds of the street below. Also to this tribe the charcoal boy belongs. He drives into town a tiny donkey hitched to a tiny two-wheeled cart. The cart and load are black, the donkey is black, the boy is black and the only other color that you can see in the whole outfit is the whiteness of the boy's eyes as he rolls them around and calls the eerie, long-drawn-out "Char-coal!" You wonder which is the sadder and blackest, the driver, the cart, or contents, as they wend their solitary way onward, crying ever that sad, minor wall of charcoal.—Charleston News and Courier.

Oldest Confection in the World.

The greater part of the black stick licorice consumed is derived from Spain, where it is made from the juice of the plant and mixed with starch to prevent it from melting in hot weather. The licorice plant is a shrub that attains a height of three feet and it grows wild where its roots reach the water. It flourishes especially on the banks of the Tigris and Euphrates rivers. Since the valley of the Euphrates contained one of the earliest civilizations in the world, the probability is that licorice is about the oldest confection in the world, and the taste which the boys and girls of today like so well was enjoyed by the youngsters of 3,000 years ago.

Armenian an Ancient Tongue.

The Armenian tongue, however, much it has changed in the course of centuries, is descended from the language that Priam and Hector spoke. The Armenians hail, like the Homeric Trojans, from Thrace, which subsequently became incorporated in the Byzantine or eastern Roman empire. Erzerum, capital of Armenia, has retained the deathless name of Rome. It was founded in the year 415, by Theodosius, a sebastos, that is, emperor, of eastern Rome. He called it Theodosiopolis; but its native name is Erzerum, or Armenian Rome.—Ernest Hartwitz in Asia Magazine.

A Fix Indeed.

She—I'm in an awful fix! Just fancy! My husband has received an anonymous letter informing him of something I did before marriage!

He—The best thing you can do is to confess.

She—That's just it! He won't let me read the letter—and I don't know what to confess!

Not a Matter of Relief.

"Music speaks a universal language," said the enthusiast.

"I have heard so," replied Mr. Cumrox. "But judging by the programs the words of a universal language are just as hard to spell and pronounce as any others."

TOOK TIME TO DO THINGS

In "Ox-Cart Days" Men of Genius Did Their Literary Work Leisurely and Well.

How did they do it, those old fellows? Take a novel by Thackeray, for example. It is monumental. Looks as if one of them would be a life work. The mere penning of it appals a modern man. Yet Thackeray turned out volume after volume as if time and energy were interminable. And his work was practically perfect. No slovenliness, no carelessness, no haste, no guess-this-will-do-ness. Today we have every accessory to speed, every time-saving device, all knowledge classified and commoditized and ready in convenient libraries. But where are the Thackerays? Or the Goethes, Dickenses, Hugos and Balzacs?

Men of their day were compelled to waste time. A journey of a few miles took all day, or several days. A dinner involved sitting up all night and drinking one's self under the table. A message to a friend was not a ten-word telegram, but a beautifully penned and excellently expressed essay. Such letters were preserved and handed down. Later they were put to print. How many letters have you written which will be handed down? And how would you like to have the best letter you ever wrote put into print? Chances are that if you write more than two pages you apologize. And you sign it, "Yours hastily."

The men of the ox-cart days did things thoroughly and well. In the days of the wireless, we "have no time."—Lyons (Mass.) Item.

NEW YORK GOAL OF PILGRIMS

Their Original Intention Was to Found a Colony There, but Plans Were Frustrated.

The Pilgrim Fathers might have founded New York if it had not been for the bribing of the Mayflower skipper by the Dutch, who persuaded him to keep the Pilgrims from the mouth of the great river, which they planned to settle with a colony of their own.

The ancient charter of the Pilgrims gave them land which probably included New York. The patent was granted to them after they fled from the Virginia company. This grant was not exactly the instrument the Pilgrims wanted, because of its religious provisions. The Pilgrims wished to get a patent that would permit them the fullest liberty of worship, but the king refused to give them a charter in which a definite stipulation of religious freedom was contained. So they were forced to content themselves with the Virginia patent, it being suggested by their sympathizers that in the wilderness they would probably not be disturbed.

Little Known of Frogs.

Along the rivers and streams in some parts of Texas, and around the margins of ponds and lakes, we meet with great beds of the water hyacinth, says the American Forestry Magazine. Their delicate white flowers and dark green leaves present a picture of floral luxuriance not very easily forgotten. Where they grow, one should be on the lookout for various species of reptiles or batrachians, and their habits and appearances in nature carefully observed. We know very little about some of the forms, and science will welcome any new facts in regard to them. Some of the frogs and toads, for example, are not only very rare in collections, but we are practically lacking in any field notes upon their exact distribution and habits.

Modern Cereals Superior.

The wheat and barley of today are much larger and finer grains than the wheat and barley which have been found in ancient Egyptian tombs and in the buried cities of Greece. As for rice, which feeds more than one-third of the human race, there are now a number of varieties, developed chiefly by the Japanese which are far superior to any that were known even half a century ago.

All of our grains, excepting maize, seem to have originated in southern Asia. Consumption of rice, the great Asiatic cereal, is now growing rapidly in the United States, most of our people having learned only recently to appreciate it, and how to prepare it for the table.

Freak Newspapers.

In Germany there is a newspaper that has nothing in it but stories about rheumatism. People having this trouble write in their experiences, doctors tell new ways to get rid of it and it seems that everybody there having rheumatism subscribes to this queer newspaper. Some years ago a Russian editor started a postcard-size newspaper, the print of which was so small that he furnished a magnifying glass to each of his regular subscribers. Somehow the idea didn't take, as he only printed a few numbers before finding out that the people didn't appreciate the idea, even though the magnifying glass was furnished free.

Needn't Worry About That.

"What am I to talk to my lady partner about?" asked a young man about to go to his first party, of an elderly friend.

"Surely you'll talk about the most pleasing question of all—her beauty."

"But if she doesn't happen to be beautiful?"

"No matter, she'll take your word for it."

CAPT. T. S. GARRISON WITH THE DEAD

Funeral Services Will Be Held Tuesday Morning at 10:00 O'clock at M. E. Church

The people of our city were shocked this morning when the information reached town that Capt. T. S. Garrison was dead, and the sad information about the good man's death spread rapidly throughout this section. His death occurred at 10 o'clock at his home and was the result of a hemorrhage.

The funeral services will be conducted at the Methodist church tomorrow morning at 10 o'clock, following which the body will be laid to rest in Wood Lawn cemetery.

He was up town last week and was active about his duties at his office until Saturday morning when he felt too ill to leave his room. Friday he was out at the fair grounds, and apparently was in good health. Just a short while before his death this morning he was conversing with his daughter, Mrs. C. E. Sanford, and remarked to her that he was ready to answer the call of his Master at any time.

Capt. Garrison died at the age of eighty-three and one-half years. He was born at Carrollton, Ga., May 17, 1837, and moved to Texas at the age of 31 years. He has been a citizen of Timpson ever since the town was first established and was here when the H. E. & W. T. railway built its narrow-gauge railroad to this city. He had faith in this section and invested his money in property and later saw the little old narrow-gauge extended on to Shreveport, which assured its expansion into a greater division of the Southern Pacific lines. He saw the need of another railroad for our city and he undertook to build the road that now runs from here to Longview. He saw this line successfully completed and for years was known as the "Calico Line", termed such because it was said that Capt. Garrison paid for the building of the road by selling calico at his Timpson store which he operated at the time.

He has been one of Timpson's greatest boosters. He believed that it was the only town in the world and always said that he wanted to live and die here among his friends. He was a candidate for State Treasurer twice and received a good vote over the state. He was active in every department of community life, always standing for what he thought best in National and State politics. He was a staunch prohibitionist and assisted in every way he could in voting whiskey out of the state and rejoiced when the nation was declared dry.

The Methodist denomination, of which he was a member, never had a more loyal supporter than Capt. Garrison. He has never missed a meeting of the Texas Conference and for many years has been elected a delegate to the general conference. When able to attend he never missed a service at his church. He has been chairman of the board of stewards of the Timpson church for many years, and was superintendent of the Methodist Sunday-school for a period of twenty years. He organized the Methodist church in this city and the first service was conducted in the depot of the first railroad that entered the city.

The news of his death will be received throughout Texas with much sorrow, because he was well known in the state as a prominent figure in every walk of life. He is survived by three sisters: Mrs. Carter of this city; Mrs. Daniels of Cushing; and Mrs. Johnson of Garrison; two daughters, Mrs. C. E. Sanford and Mrs. A. C. Vinson of this city; one son, John T. Garrison of Houston.

In the death of Capt. Garrison Timpson has lost one of her most progressive and loyal citizens and the entire town joins the Times in expressions of sympathy to the bereaved relatives.

All the business houses have agreed to close during the funeral services, as a token of the high regard in which the deceased is held by the people of the city.—Timpson Times, Monday.

STATE FURNISHES BREAD, PEOPLE PURCHASE WINE

Rome, Nov. 3.—Professor Ugo Ancona, formerly undersecretary of transportation in the Italian cabinet, has just made public a statement that while the Italian government has spent more than \$1,000,000,000 a year for bread for the people, the Italian workers have spent \$900,000,000 for wine alone in a year.

The government's expenditure for bread has resulted from its undertaking to pay the difference between the cost of producing wheat and the price of bread. In consequence of this the Italian workers have been able to buy bread at the rate of one lira for each kilogram of 2.26 pounds.

Professor Ancona says that while

the workers refuse to pay more than this, they have no objection to paying four or five lire for a quart of wine, which before the war cost about 12 cents a quart. He asks whether it is just that the Italian government should continue to supply over \$1,000,000,000 annually for bread when the people do not grudge \$900,000,000 a year for the luxury of wine.

The professor advocates that the Italians should eat less bread and pay what it costs and that they should drink less wine and export more of it, so that the profit on wine would help to pay for importation of bread.

The amount of land given over to wheat production greatly decreased last year. The disastrous result is that imports are increasing daily.

NACOGDOCHES OIL NEWS

In the Oil Springs vicinity Mr. A. C. Smith, formerly of the Carolina Oil Company, this city, brought in a shallow well at a depth of 275 feet, the well, it is thought, producing 3 or 4 barrels of oil a day, according to the opinion of Mr. Frank Tucker of the Mann Oil Company. Mr. Tucker made a trip to the Oil Springs country Tuesday, bringing back the report that drilling was going on unobscured. The Mann Oil Company will spud in Wednesday on the G. A. Blount ranch.

PUPILS WILL CO-OPERATE

Austin, Texas, Nov. 3.—Co-operating with the American Legion, the University of Texas Interscholastic League is to aid in the raising of funds for the American Legion Tubercular Hospital to be erected at Kerrville.

W. R. Duffey, assistant state director of publicity for the American Legion, through the extension department of the University of Texas, is making a direct appeal to the University Interscholastic Leaguers. Circular letters have been sent to practically every public school in the state. These letters appeal to the patriotism of the students. Instructions for carrying out the plans of the American Legion are also given. On November 6, the day proclaimed by Governor Hobby as American Legion Tag Day, the school children of the state will sell the tags, which are being sent out to the several schools by the Extension Department.

CHRISTMAS SEALS

Austin, Texas, Nov. 3.—J. W. Butler, former president of the Texas Bankers' Association and well known in the Lone Star state business world, has accepted the chairmanship of the 1920 Christmas Seal sale committee. This announcement was made today by the Texas Public Health Association which will direct the sale of 20,000,000 Tuberculosis Christmas seals in Texas during the Christmas Holidays.

Mr. Butler, formerly of Clifton, is now active vice president of the Texas Bank & Trust Company of Galveston. He will direct the state-wide fight for the raising of funds to fight tuberculosis through the sale of the little penny Christmas Seals.

Robert E. Lee graduated second in his class at West Point.

NASH FOUR PRICE \$1395 WITH CORD TIRES IS ANNOUNCED BY C. W. NASH

Announcement has been made that the price of the Nash Four with cord tire equipment will be \$1395 f. o. b. Milwaukee. C. W. Nash, president of the Nash Motors Company made the announcement at a sales meeting of the Nash distributors at the Kenosha factory. The price applies to the five passenger touring car and the two passenger roadster, no selling figures having yet been made on the five passenger sedan and three passenger coupe. The car, like the Nash Six, has two conspicuous and outstanding features—unusual power, due to its Nash Perfected Valve-Head Motor and really exceptionally beauty of design and finish.

Sample cars are being shipped to Nash distributors throughout the country this week. In outlining the method of distribution to be followed, Mr. C. B. Voorhis, vice president and general sales manager, stated will not give any dealer or distributor tributor has had his sample car to send sample cars to each of the 1,800 Nash dealers in the country and we will not give any dealer or distributor a second four cylinder car until all Nash dealers have received their first sample car. "The price of the Nash Four is extremely low for a car of its quality," said Mr. Voorhis, "which demonstrates again the ability of this organization to produce a fine product at a moderate cost."

While years were spent in designing, testing and perfecting the new Nash Four, the fact that the Nash Four Cylinder Car factory at Milwaukee is now entering regular production is looked upon as a distinct achievement. Just a few weeks more than a year ago the site now occupied by the Nash factory was a large farm. With the disappearance of the farm house and barns, construction of the first series of saw-tooth steel and concrete buildings was begun. Throughout the cold and snow of last winter, work on the Nash Four plant progressed. Switch tracks were laid, long concrete receiving and loading platforms were built and by Spring machinery of all descriptions began to arrive. Following the installation of the machinery, materials for the building of the Nash Four began to come in and today, while a number of new buildings are still to be constructed, the Nash Four plant is in regular production.

Those long identified with the automobile industry declare that few cars have ever been received with the confidence and interest that is manifested throughout the country in the Nash Four. At no time during the period when this car was in process of design was there any doubt as to any important point of construction.

The Nash Four is the logical result of a growing need for a really fine, moderate sized car combining power, flexibility, economy, comfort, easy-riding qualities and general excellence of performance. The Milwaukee factory is the embodiment of the ideals of C. W. Nash, based upon his twenty-seven years of manufacturing experience.

The tower of Pisa was under construction 200 years.

The United States has 54 different designs of bank notes.

A NOVEMBER SALE

Staged to meet the new conditions. A sale that means the sacrifice of thousands of dollars profit. We take this loss willingly because we believe that by so doing we are helping to establish the pre-war era of low prices.

Was Very Weak

"After the birth of my baby I had a back-set," writes Mrs. Mattie Crosswhite, of Glade Spring, Va. "I was very ill; thought I was going to die. I was so weak I couldn't raise my head to get a drink of water. I took . . . medicine, yet I didn't get any better. I was constipated and very weak, getting worse and worse. I sent for Cardui."

TAKE

CARDUI

The Woman's Tonic

"I found after one bottle of Cardui I was improving," adds Mrs. Crosswhite. "Six bottles of Cardui and . . . I was cured, yes, I can say they were a God-send to me. I believe I would have died, had it not been for Cardui." Cardui has been found beneficial in many thousands of other cases of womanly troubles. If you feel the need of a good, strengthening tonic, why not try Cardui? It may be just what you need.

L 76

SUNK IN COLLISION

Newport, R. I., Oct. 30.—Members of the coastguard crew stationed here reported early today that no trace had been found of the nineteen members of the crew of thirty-four who were on the concrete steamer Cape Fear when that vessel was sunk in Narragansett Bay last night in collision with the Savannah Line steamship City of Atlanta. Coastguardsmen searched all night, but found only quantities of wreckage. Points along the shore also reported wreckage but no word of the missing men. Both vessels carried full crews. The Cape Fear was struck amidships and within three minutes, bow first, in 129 fathoms, the greatest depth of the bay, it sank. The City of Atlanta's bow was damaged badly, but she anchored in the bay. The Cape Fear went down so quickly that the majority of the crew had to jump into the water.

The general sentiment now is that our teachers ought to be given enough salary to live on, but when we were little boys and going to school we had our doubts about that.

"SWAMP CHILL TONIC DOES THE WORK!"

Arkansas Merchant Highly Praises Famous Old Remedy

J. W. Mustain, Dealer in General Merchandise, Old Grand Glaize, Ark., sells a lot of Swamp Chill and Fever Tonic. The reason he sells a lot is expressed in a letter he recently wrote us, which says: "Swamp Chill Tonic sure does the work. I certainly want to thank you for your fair dealings."

John C. Rogers, Center, Tex., says: "I have sold your Swamp Chill Tonic for years and it is my favorite tonic. I always recommend it, because of its fine laxative properties."

Dealer C. E. Miller, Bernice, La., says: "I handle all the standard chill tonics on the market, but sell ten bottles of Swamp Chill Tonic to one of any other kind. After a customer has used it once he or she will use no other kind."

Thousands of other dealers in many different towns and cities strongly recommend Swamp Chill Tonic to their customers as the very best malaria remedy on the market. 60 cents a bottle—get one today.

A FELLOW WHO FIGHTS ALONE.

The fellow who fights the fight alone,
With never a word of cheer,
With never a friend his help to lend
With never a comrade near—
"The fellow who fights alone!"

The fellow who fights the world alone,
With never a father's smile,
With never a mother's kindly tone
His sorrowful hours to grieve,
Who joins the fray at the dawn of day
And battles till light is shown,
Must needs be strong, for the fight is long—
The fellow who fights alone!

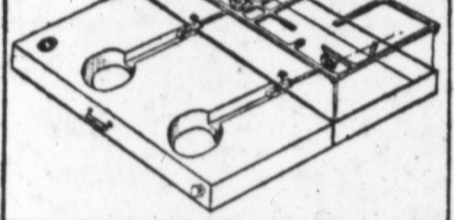

God bless the fellow who fights alone,
And arm his soul with strength!
Till safely out of the battle route
He conquering comes at length;
Till far and near into every ear
The fame of his fight is blown;
Till friend and foe in the victor know
The fellow who fights alone!

THIS PORTABLE STOVE HANDY

Of Value to Dweller in City Apartment as Well as the Hunter and Fisher.

Rare is the woman who, in boarding house or hotel, will not do surreptitious light housekeeping in her room, regardless of rules forbidding it.

For this purpose a new invention ought to be a great help. It is a portable cook stove which may be taken to pieces and folded into surprisingly

Portable Cook Stove.

small space; or, when wanted for use, can be put together offhand.

It burns kerosene and has two burners, with a grid above, so that one can prepare a modest meal on it quite nicely and expeditiously. For a camp stove it should serve admirably, as it is very compact and can be transported.—Philadelphia Ledger.

Ways of Lightning.

Judging by accounts in the public prints, lightning is attempting this season to show as much freakishness and variety as a British prime minister. In a western community a few days ago it shot its bolt through a knot hole in a veranda roof and tattooed a few artistic designs upon the shoulder of a fair young woman. In another place it tore an old cracked bell from a church tower and when the populace rushed up through the rain it found the breaks in the bell nicely welded. A dispatch from a Connecticut town reports that lightning there baked all the fruit on a heavily laden apple tree and never ruined a single specimen in the process. Truly, lightning is an interesting phenomenon of nature and it should command all the respect we have left over from just tribute to imaginative correspondents.—Toledo Blade.

Telephoned to Airplane.

Samuel Lastone, a London merchant and ship owner, desiring to change orders which were being taken to Paris by an aviator for the shipment of coal to Marseilles, appealed to the British air ministry, and in a few moments was calling from his desk telephone to get the aviator in flight. After calling twice he heard the aviator saying: "Chattaway speaking; who's calling?" He could hear the whir of the propeller and the aviator's voice sounded as if he were in the room. He said he was flying over Folkstone, with ten passengers aboard his airplane. The orders were given and obeyed.

Why They Giggled.

The soloist was not adored by the rest of the choir. In fact, his conceit had made him occupy quite the opposite position. So, the other Sunday, when he sang in his solo from the oratorio of "Elijah," "It is enough," they all looked their agreement.

But there was joy on their faces when they noticed that the audience was giggling over the next phrase, "Oh, let me die." And when he worked the two phrases together and belted forth, "It is enough—oh, let me die," they just had to laugh.

She Thought Twice.

Jane had been into the jam and her mother in reproaching her had suggested that she think twice before doing wrong again.

After the second offense she was asked if she remembered the advice which had been given her.

"Certainly, mother," she replied, "I did think twice. First I thought I wouldn't, and then I thought I would."

A Happy Accident.

Miss Gushmore—I hear you're the man who invented that cute little Charlie Chaplin subnasal mustache. How did you ever happen to think of it?

Mr. Zitt—It happened this way. I had trouble getting my safety razor under my nose, so I just shaved the rest of my face and let it sprout there.

America to Have First Saint.

The American continent is soon to have its first saint in Marguerite Bourgeois, who was the founder of the Ladies of the Congregation of Notre Dame, Canada's great teaching order. She was born in 1620 and the greater part of her life was spent in Canada, where she accomplished a great work in the face of gigantic obstacles.

OBEDIENCE TO NATURAL LAW

Fear Implanted in Mankind for the Purpose of Promoting Caution—Differs in the Sexes.

"In normal, well-balanced persons there is a certain relation between the element of fear and the element of courage. Fear is an emotion existing for the purpose of promoting caution, and in primitive days and in animals tends to self-preservation. Anger, curiosity and courage are factors which oppose fear and flight. When knowledge, experience, repetition, finally limit or delimit the action of these two opposing instincts and emotions, conscious action is carried out with understanding according to the inherent reactions.

"Woman was made with the element of fear and caution more pronounced than in man, because woman, the mother, was not supposed to be the fighter. Man, primitive man, the fighter, was more endowed with courage."

These quotations from a report by Dr. Samuel Wylis Bandler of New York to the Journal of the American Medical Association preface a discussion of the differences in the ductless, or endocrine, glands in man and woman. In normal persons these balance each other, but the balance is different in the two sexes and, according to Doctor Bandler, it is this difference in balance that causes the differences in the instincts and emotions.

SHREWDNESS BORN IN HIM

Successful Man's Ability as Trader Was Shown at an Extremely Early Age.

From day to day proof is forthcoming that genius is spontaneous and not a slow growth—that it is of the type of Minerva who sprang full-armed from the head of Zeus. This is evidently as true of the genius of the mart as it is properly supposed to be of the more esthetic forms of genius.

An instance in substantiation of this opinion was recently related by a veteran business man as a side light on the why of the success of a well-known industrial leader.

"I remember him," it was related, "when he was a lad of six years. He wanted to trade a lantern for one owned by a playmate, which he admired. Coming to his father, he asked counsel about the matter and was informed that he should use his own judgment.

"Well, dad," said the boy, "I believe I'll trade; but wouldn't you take the oil out first?"—Wall Street Journal.

Made Thorough Job of It.

The domestic happiness of an innkeeper in a village in the Jura has been shattered by the action of a jealous wife. Ten years ago the innkeeper, who is French, brought home from America a buxom woman of Austrian birth named Sophie. Sophie is now fat and forty, and the affections of her husband have decreased. Sophie resolved to revenge herself, and when her husband was absent, she smashed all the furniture and then turned on all the taps of the wine barrels. Finally she soaked the wreckage with petroleum and set it alight. When the husband appeared his wife threw on the fire a number of bank notes which represented their savings. While the neighbors were busy trying to extinguish the flames Sophie handed herself from the branch of a tree.—From the Continental Edition of the New York Herald.

He Knew Its Use.

An Indianapolis family a few years ago took a boy from an orphanage. Now, of course, everything at the new home was different from the place he had just left. Still he tried to make himself at home and help all he could.

One day the woman of the house told her grown daughter to go upstairs after a box. The orphanage youngster offered to go instead. "But you don't know where to find it," protested the woman.

"Oh, yes, I do," the little boy insisted. He had gone to her closet before after things and had seen the boxes. "They are in the little pantry that you keep your clothes in."

Alloy Stronger Than Steel.

An Italian engineer has discovered a new alloy of zinc and copper which is stronger than steel and less corrosive than copper, says the Scientific American. The most important characteristics of the new alloy, which has been named "Black Metal," are the highest known breaking point, the highest limit of elasticity, perfect homogeneity and higher resistance to both heating and chemical action. It has been stated that it can successfully be cast, machined, rolled, forged, drawn and stamped. It is expected that it will prove an acceptable substitute for steel, brass and aluminum.

Ground Ice.

A professional paper of the United States geological survey on the Canning river region, in northern Alaska, describes the occurrence of ground ice in that region and reviews the literature of ground ice in considerable detail. The author concludes that the two varieties of ground ice most common in northern Alaska are formed by the burial of river ice by sediments and by the growth in place of vertical ice wedges.

Where She Might Shine.

Mrs. Tossils—You've heard my daughter sing. Don't you think she's about ready for a public appearance?

The Impresario—Certainly, madam. I thought as I listened to her what a nice movie actress she'd make.

MOST FAMOUS PARIS SQUARE

Place de la Concorde: Enriched by Works of Art of Country's Greatest Sculptors.

The dreams of many men of genius have gone into the making of the Place de la Concorde, in Paris. Gabriel, the architect, constructed the pavilions and balustrades. The equestrian statue of Louis XV, which stood in the square until the Revolution, was the work of Bouchardon. Pigalle, one of his contemporaries, surrounded this statue with figures emblematic of Strength, Wisdom, Justice and Peace. The square received its present form in 1854 from designs by Hittorf. The great statues of the cities were made by four famous French sculptors, each of whom did two figures.

At the entrance to the Champs Elysees, which forms the western boundary of the place, are the famous "Horses of Marly," by Guillaume Coustou, and at the eastern side at the entrance to the Garden of the Tuilleries, are the "Renommées" of Cozyzevoz—Mercury and Fame bestride horses.

In the center rises the obelisk of Rameses II, towering 76 feet, and weighing 240 tons. It is a single block of reddish granite, more than 3,000 years old, and it once stood before the temple of Amenhotep, near Thebes. It was brought to Paris in 1838.

DOGS AND CHURCH WINDOWS

Both in Ancient and Modern Times Animals Representation Has Been Frowned Upon.

The stained-glass representation of the "Pedlar and his Dog," to which attention has been directed by the discovery of a boundary stone of "Pedlar's Acre," on the site of the new county hall, was removed, owing to the alleged incongruity of introducing the figure of a dog in a church window, says the Westminster Gazette.

Quite recently Chancellor Prescott of Carlisle refused a faculty a stained-glass window in a Westmoreland church because the design included a dog; and perhaps the only existing example of dogs used for ecclesiastical decorations are to be found in Lord Brownlow's private chapel at Ashbridge.

In this church one stained-glass window depicts Tobias and Sara in bed and a dog sleeping on the quilt, while in another window Job is shown being mocked by three men, one of whom is holding a dog by a chain.

British Warship's Great Guns.

At first sight it may seem strange that the Hood should carry only the same armament as the Queen Elizabeth, built some eight years before the Hood. As a matter of fact, the Queen Elizabeth's guns are forty-two calibers in length; but the guns of the Hood are forty-five caliber long and have greatly increased muzzle velocity. It is believed that the gun weighs a little under one hundred tons and fires a 1,950-pound shell with a muzzle velocity of 2,800 foot-seconds. Another improvement over the Queen Elizabeth is that the new guns have an elevation of 30 degrees for a maximum range of 38,000 yards. The loading gear has been so improved that the Hood is credited with being able to fire a salvo of eight guns every thirty-five seconds.—Scientific American.

Simple Trick of Artist.

Everybody has noticed that the eyes in some portraits follow one wherever he goes in the room. It is a bit uncanny to move about an apartment and have the eyes of a picture always upon one. Some superstitious persons are afraid to go into a picture gallery where portraits of their ancestors are to be found. The effect is simply an optical illusion and is secured by having the eyes in the portrait looking directly toward the front. Under such circumstances the pupil is necessarily in the middle, with an equal amount of "white" on each side. This relation does not vary at all with the position of the observer. No matter where you stand the pupil will be in the middle of the eye and the eye will seem to be looking at you.

Bird Outruns Horse.

Anyone who has traveled through Western Texas becomes familiar with the mesquite tree, or, as it sometimes grows, a shrub. In some places where it may grow to be thirty or forty feet high, it is commonly known as the chapparal, says the American Forestry Magazine of Washington. Here it is scrubby and masses into dense clumps, it being the home of that famous bird the "road-runner" or chapparal cock, and other interesting species. It is a form of big, ground cuckoo, that only takes to flight when hard pressed; while on open ground it can run so fast that an ordinary horse cannot keep up.

Disillusioned.

Waiting for his shoes in a white-wait repair shop, he was impressed by the apparent femininity, neatness and self-respect of the young woman attending the counter. He didn't like to see her handling worn shoes. He was wishing she were in another environment. Just then his shoes were passed along from the workman to her. She took them, looked at the tag, called a boy and pointing to the meditating customer, said: "Take these to that gink over there."

THANKFUL FOR GOOD PE-RU-NA DID HER YEARS AGO

Keeps the Medicine with Her for Safety

Mrs. Carl Linder, R. F. D. No. 2, Box 44, Dassel, Minnesota, writes: "I want to thank you for your kindness and the good your remedy did me years ago. I am perfectly well and visiting in Spokane, Wash. Were it not for Pe-ru-na I would not have been able to make this trip. I always take your medicine with me for safety should I take cold. Praise to Pe-ru-na."

As an emergency remedy for everyday ills, Pe-ru-na has been in use fifty years.

On the Jump!

There's nothing to worry about if you do forget to tell us you're in a hurry for your battery. We work on the principle that you *always* want service on the jump and we're here to give it to you.

Maybe you'd like to know about the Still Better Willard Battery with Threaded Rubber Insulation—the kind selected by 152 manufacturers of passenger cars and motor trucks.

Fordson

TRADE MARK

Farm Tractor

More than 100,000 Fordson tractors have been sold to farmers in the United States. They are helping those farmers to do better and more work in less time and at less cost. North, East, South, West—everywhere the Fordson has proven itself a money-maker and a real necessity to the farmer. Besides it is helping mightily to solve the labor problem.

These one hundred thousand, and more practical farmers have affirmed the economy—the exceptionally low fuel and operating cost—of the Fordson; it is compact and devoid of excessive weight. And it is built of the same strong iron and steel as is the Ford car.

Winter or bad weather does not hinder the Fordson's usefulness. Day or night—twenty-fours a day if you choose—you can utilize the Fordson.

Only so many Fordsons are allotted this territory. Orders are being filled in sequence—first come first served. Let us have yours now.

There is a practical use for the Fordson every day of the year. Let's tell you. Come in and let's have a tractor talk. Give us a chance to make a demonstration on your own farm.

Sergeant Green reports that the week just past he enlisted at the local army recruiting station five men, all of them coming from Linn Flat.

Oilmen are flocking to Nacogdoches in such numbers that the hotels and rooming houses find difficulty to accommodate them.

TWO CARS COME NEAR HAVING SMASH UP

Thursday afternoon on Main street in front of the Stone Fort National Bank two cars, driven by J. C. Shipp and B. B. Muckleroy, collided, both cars sustaining damaged running boards. Mr. Muckleroy was driving east on Main street and Mr. Shipp was driving west, and from appearances neither of the drivers saw each other until it was too late. Mr. Muckleroy made a frantic effort to swerve around out of the path of Mr. Shipp, and Mr. Shipp did his best to apply his brakes, which seemed to take a notion not to work. Both men were pretty much frightened, but received no injuries.

SCHOOL BOARD PAYS FINE OF TEACHER AND FREES HIM OF BLAME

From the Shreveport Times. Texarkana, Oct. 26.—Lynn B. Davis principal of the Texas side High School was fined \$1 and costs, making a total of \$11.70, in justice court this morning on a plea of guilty, entered for him by friends, on a charge of simple assault alleged to have been committed upon Rurnels Willis, a high school student, the early part of last week. It was alleged that Willis had cursed the principal, whereupon the latter chastised him. The father of young Willis subsequently attacked Davis and struck him several blows, it is said. The school board then held a meeting and expelled young Willis and another boy, who, it was claimed, had encouraged Willis in his conduct toward the principal. The board at the same time exonerated the principal.

It is said that fifty citizens asked for but were denied the privilege of paying Davis' fine. The school board prorated the amount among themselves, saying they believed it was their duty as well as privilege to pay it.

Couldn't Put in Full Week's Work

Harding Gains Twenty-eight Pounds and Works Every Day Since Taking Tanlac.

"I have gained twenty-eight pounds and all my old-time strength and energy has returned to me since I began taking Tanlac," said George L. Harding, a well-known longshoreman of 914 1/2 James Street, Seattle, Wash.

"For two years," said Mr. Harding, "I had indigestion so bad that everything I ate seemed to poison me. My stomach would cramp and I would double up like a jack-knife and I suffered constantly from headaches, constipation and dizziness. I had the rheumatism so bad in my hips and knees that I could hardly life anything—although I have been used to hard work all my life. Finally my troubles got so bad that I could not work more than two or three days a week and I knew I couldn't keep going at that much longer."

"One night as I was sitting in the Union Hall, all doubled up with cramps in my stomach, one of the boys advised me to try Tanlac and sure enough it began to relieve my troubles right away. Now I eat anything I want and lots of it; the rheumatism has left me entirely and I work with the best of them every day. I hardly ever felt better in all my life and Tanlac has set me so firmly on my feet it is a pleasure to give my endorsement."

Tanlac is sold in Nacogdoches by Stripling, Haselwood & Co., Swift Bros. & Smith and in Garrison by the Dale Drug Co.

GET AN EDUCATION FOR WHICH THE BUSINESS WORLD PAYS CASH

If You Can't Attend School, Let the Mail Bring it to You. The Largest, Most Successful School of Business Training in America.

By the use of a very thorough, practical course of Telegraphy, Byrns Shorthand and Typewriting, Practical Bookkeeping, Business Finance, Penmanship, Lettering and Salesmanship, our school has grown very rapidly and the success of our students has been wonderful. Mr. Byrne, the author of the famous systems; and the originator of our practical methods of correspondence instructions, is at the head of our Home Study Department.

To show our faith in our methods we have for many years, agreed, at the completion of the course, to refund every cent of tuition if it is not satisfactory and as recommended. No one has asked for their money back. This proves that our courses were what they wanted and is evidence they are what you should have to achieve success in a business career. Advantages of our Courses by Correspondence.

Less cost—not one-sixth of that required to attend school. No loss of time or salary. You "earn while you learn," save your leisure time that might otherwise be wasted; make just as much salary as you would if you were not studying at odd times. You study at home. The education comes to you. Three months free use of a standard typewriter given with the shorthand course. You use time that you would otherwise throw away. Enter school for personal work without paying additional tuition. Fill in and mail for free catalogue.

PUBLIC SCHOOLS TO CLOSE ON ARMISTICE DAY

Superintendent R. F. Davis of the Nacogdoches public schools has announced his intention to declare a holiday on November 11, in order that the public school children may be pleasantly reminded of the fact that November 11 is Armistice Day.

Also County Superintendent G. B. Layton has stated that he would authorize the county schools to declare similar action.

He believes that it is altogether fitting and proper to suspend all business activities on November 11 in commemoration of the greatest military victory of all time.

The American Legion will have charge of all activities for this occasion. This insures a profitable and interesting time for all.

STUDY OUR ARMY METHODS

The Hague, Nov. 2.—The Dutch War Department has decided to study American army methods and, with the permission of the United States government, has sent a commission of officer observers to the American army on the Rhine.

A HAPPY PASTOR AND WHY

I take this method of expressing to the people of Chireno by grateful appreciation of their recent expression of friendship and interest in me, in the nature of an old-time "Pounding."

On October 23d, at about 8 o'clock p. m. at the commodious and hospitable home of Mr. and Mrs. H. W. Birdwell, the people began to gather, bringing with them their "pounds" or multipounds of syrup, sugar, coffee lard, canned goods and other articles too numerous to mention, until, despite the rain and mud, sufficient numbers had gathered to have a very pleasant social hour. The pastor, being delayed on account of rain, did not reach the place till next morning, when, upon his arrival, he was conducted to the dining room, where met his eyes a sight calculated to make anyone glad—a fine collection of groceries of almost every variety.

Passing hurriedly to the church, we were greeted by a goodly congregation smiling their welcome.

Whether or not the message of the hour was better than usual, others must say; but what manner of person must one be who would not have awakened in him the best impulses of which he is capable, by such tokens of appreciation.

This service closed our fourth year's work as pastor in the town. Other pastors during this time have been Brethren Harrell, Lancaster, Wilson, Walker and Weiner. During this time we have seen scores profess religion and take their places with the Christian people standing for righteousness in home and government.

One new church adorns the town and two others are planned. The general thinking of the people has been turned more and more Christward. It goes without saying that attachments have been formed during this time that are hard to sever, and we feel ourselves inclined to accept the hearty call for another year.

C. A. Ray.

LARGEST WOMAN IS DEAD

Bristol, England, Nov. 2.—Lucy Moore, reputed to be the heaviest woman in the world has just died here.

At one time she weighed 668 pounds. Miss Moore was born in Kentucky and had been in the show business for many years. She traveled all over the world and was said to have received many offers of marriage.

WHAT SMALL FARMS CAN DO

Mandan, N. D., Nov. 3.—What can be done on a small farm has again received illustration this year at the North Dakota Trailing School, which operates a model farm of seventy-five acres here. J. M. Devine, son's production on seventy-five acres thus:

Garden products, \$3,078; farm products, \$3,948.40; dairy and hog department \$4,652.17; Chickens, \$452; canned fruit and vegetables \$500. Total revenue \$12,610.57. Omitting garden products an canned fruit and vegetables, the income from ordinary farm products was \$9,022.57.

Howe's royalty on sewing machines amounted to more than \$2,000,000.

The River Po begins to form its delta sixty miles from its mouth.

YOU WOULDN'T TRY TO TAME A WILD CAT

Mr. Dodson Warns Against Use of Treacherous, Dangerous Calomel.

Calomel salivates! It's mercury. Calomel acts like dynamite on a sluggish liver. When calomel comes in contact with sour bile it crashes into it, causing cramping and nausea.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tonic for a few cents which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you right up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

If you take calomel today you will be sick and nauseated tomorrow; besides, it may salivate you, while if you take Dodson's Liver Tonic you will wake up feeling great, full of ambition and ready for work or play. It's harmless, pleasant and safe to give to children; they like it.

NOT MUCH

This time, but it means a great deal if you will last now.

We have had a fine trade on our shoes this season, because we have made the prices and have been willing to sell on a small profit.

We still have quite a lot of shoes on hand and want to make a clean sweep of them by Christmas and in order to do so we are willing to sacrifice our profits.

Our shoes are marked in plain figures with prices on them, so that you can see the price and everyone knows that have bought shoes from us that we have stuck to these prices, but we have gone through our stock and made a reduction in price, with few exceptions and have marked the new prices in red and blue figures, so that you can see what the reductions are. We have made substantial reductions that will look good to you.

We are selling some shoes below cost, some we are selling at about half and some we are making a small profit on. But the main object is to turn them into money. Don't you buy until you see our prices, or you will be sorry.

We have made reductions on other goods also.

Eggs are scarce and high. Remember that we are selling Reefe's "More Eggs." People who have tried it, make good reports on it and are buying it again.

Blackman's "Medicated Salt Brick" is fine for your horses, cows or hogs. Try it once and you will use it again.

4-1w. C. W. Butt.

4-2wp.
COW FOR SALE—Good cow, 8 years old, freshened three months ago. Gives 4 gallons milk per day. J. W. Parrish. Phone 527. 2-2dw1

FOR SALE—Registered Jersey male. Age 7 months. Price \$15 if taken by November 10th. T. B. Floyd. 3-1dlwp.

STOMACH ON A STRIKE

"Pape's Diasepsin" puts Sour, Gassy, Acid Stomachs in order at once!

Wonder what upset your stomach—which portion of the food did the damage—do you? Well, don't bother. If your stomach is in a revolt; if sick, gassy and upset, and what you ate has just fermented and turned sour; head dizzy and aches, belch gasses and acid and erucate undigested food—eat a tablet or two of Pape's Diasepsin to help neutralize acidity and in five minutes you wonder what became of the indigestion and distress.

If your stomach doesn't take care of your liberal limit without rebellion; if your food is a damage instead of a help, remember the quickest, surest, most harmless antiacid is Pape's Diasepsin, which costs so little at drug stores.

CARD OF THANKS

We wish to thank our many friends who assisted us during the illness and death of our loving wife and mother, and hope if this sad fate befalls any of you, the same kindness will be shown you.
 Rev. U. V. Perry and Children.

HAVE YOU A FARM OR UNIMPROVED LANDS TO TRADE FOR A GOOD HOME AND REVENUE BEARING PROPERTY IN NACOGDOCHES. ZENO COX. 4-2w

LOST MULE

Brown mare mule, about 7 years old; has light mane; wire cut on left front leg, weighs about 850 pounds. Will pay liberal reward for return or information. Notify L. B. Mast, Nacogdoches, Texas, or write J. W. Allen, Rt. 3, Lufkin, Texas. 4-2dw1.

WANTED—100 POUNDS CHINQUEPINS. E. H. POWER. 1cp

NACOGDOCHES OIL NEWS

Men interested in the big shallow oil pool located at Oil Springs are coming to Nacogdoches on every train with the view of investigating and investing in the acreage of the pool. As a consequence of this the local hotels are crowded to the limit, and those fortunate enough to get rooms are frequently compelled to wire in their reservations. The other night at one of the hotels here, the talkative oilmen, discussing the county's oil fields, drew forth the remark, "By the way, this scene here tonight in the hotel reminds one of Ranger and Wichita Falls in the days of '18 and '19."

If the bowels do not act regularly, assist them with an occasional dose of Herbine. It is a fine bowel tonic and laxative. Price 60c. Sold by Stripling, Haselwood & Co. b

Sergeant William Greene, who was stationed here for several months as recruiting officer for the United States army, closed the office and left Saturday for headquarters at San Antonio. The sergeant's gentlemanly deportment and kindly courtesy won him many friends while in Nacogdoches, and he carries with him the very best wishes of all who came in contact with him officially or socially.

If your child eats ravenously at times and at other times has no appetite at all, look out for worms. White's Cream Vermifuge is the remedy to use. It clears them out. Price 35c. Sold by Stripling, Haselwood & Co. b

Judge S. M. King of Beaumont is here. Judge King came up to attend the funeral of Hon. Smith Garrison, who died at his home in Timpson Monday morning and was buried Tuesday morning at 10 o'clock.

Rubbed into the skin for rheumatism, neuralgia, contracted muscles, sprains or lameness. Ballard's Snow Liniment goes right through the flesh to the bone, easing pain and removing the cause. It is a powerful pain relief. Three sizes, 30c, 60c, and \$1.20 per bottle. Sold by Stripling, Haselwood & Co. b

HOLIDAY NOVEMBER 11.

- Miss N. L. Jackson.
- Greene & Muller.

Rusty nail wounds, festering sores, burns and scalds heal rapidly when Liquid Borozone is applied. It is both antiseptic and healing. Price 30c, 60c and \$1.20. Sold by Stripling, Haselwood & Co. b

The case of the State vs. Tyre set for Wednesday, has been reset for Monday next. Capt. W. W. Lee of the Nacogdoches company of the National Guard, who was notified last night and his trip to Galveston postponed accordingly. It will be remembered that Tyre, who was on sentry duty at the soldiers' camp while troops were stationed at Galveston during the operation or martial law, shot and killed a citizen named Robertson, who refused to heed the challenge to halt. Tyre was exonerated by a court martial, but must now stand trial in a civil court.

If your bowels do not act regularly, you feel uncomfortable, and the longer this condition exists the worse you feel. To put an end to the misery, take Herbine. It purifies the bowels, restores energy and cheerful spirits. Price 60c. Sold by Stripling, Haselwood & Co. b

Try a Sentinel west ad.
