"SHOOT TO KILL" THE VOICE OF MISSOURI

Old Missouri needed to be shown. Old Missouri was shown. Now shoot to kill is the order given to the Missouri highway patrol. Machine guns are being placed in the hands of officers and will be used against the terrorists of the Southwest. Police authorities in Missouri and Kansas are purchasing these destructive weapons and arming their forces to meet the outlaws on an even footing. Col. Marvin Casteel is the superintendent of the Missouri highway patrol. He is a veteran of the World War. He is said to be as hard as chilled steel. In his order to the patrol he instructed his men "to disregard hostages of escaping criminals." In other words hostages will have to take their

This is the command of the Missouri colonel: "I have issued orders to shoot to kill and disregard whoever might be riding with the escaping criminals as hostages. The hostages may be killed later anyway and it is better to make sure that we get the bandits."

There are hijackers and bank robbers everywhere in and to a 160-acre tract of land in Missouri, Kansas, Oklahoma, Arkansas and Texas. EXPECT MORE

of Electrolux

AIR-COOLED at New Low Prices

Gives you Lowest Operating Costs Utter Silence ... and MORE!

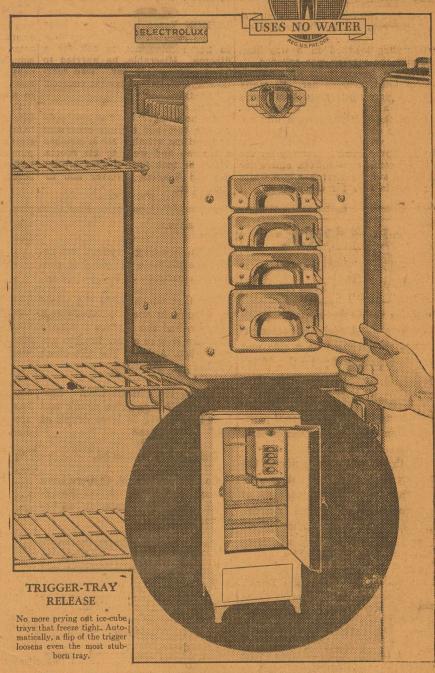

THERE are two ways wise shoppers take to judge I an automatic refrigerator. Some buy on the strength of general superiority. Some probe deeply into the details of operating cost, dependability, long life. Either way you look at it, EXPECT MORE from the New Air-Cooled Electrolux. You'll GET it!

To begin with, you'll get lower operating costs. The New Electrolux is even simpler than before. It has no moving parts. It uses no water. The refrigerant is circulated by a tiny gas flame which consumes less gas than ever. An automatic shut-off gives complete protection to the flame. Ordinary air cools the refrigerant.

And that's not all! You'll get permanent silence with Electrolux. It can't possibly make a sound. You'll get porcelain interiors, extra food space, non-stop defrosting, plenty of ice cubes as well as such exclusive features as adjustable split shelves, two-temperature chilling unit which insures constant uniform cold, automatic trigger release on ice trays.

No wonder new owners insist upon talking about Electrolux! When you see it, you're bound to share their admiration for the finest refrigerator money can buy! Yet prices are at a new low. Terms are generous. Inspect the New Air-Cooled Electrolux for yourself! On display at our showroom?

trembling again.

keep things going.

"Cousin Elinor."

Elinor clung to her.

CARRETT COLVIN, back in New York after years abroad, fells in love with 20-year-old Edinor Stafford. Barrett is 35, wealthy, and has made a name for himself as an archeologist. Years before he shielded his half-sister, MARCIA, when a youthful romance ended disastrously, MARCIA had a son whom Barrett adopted. Marcia is constantly in fear that her husband will learn of the affair.

LIDA STAFFORD, Elinors be a utiful and unscrupulous mother, is carrying on a filration with VANCE CARTER. Lida schemes constantly to keep in the good graces of MISS ELLA BEXTON, her husband's aunt, in order to inherit a share of the Sexton fortune.

When she learns that Barrett kind of cake you get at the German watched Vance Carter lurch toward the seventhan watched watched vance Carter lurch toward watched vance Carter lurch toward watched vance Carter lurch toward the side of the street once more for the street once more for with the rest but unsteadily. "You haven't told us, Elinor," Bessie was saying, "what you're going to do with your \$10. I do wish, dear, it had been more for you!"

"I'm going to blow it in on a party that we'll have here!" Elinor and swered. Sexton let out a whoop. "I'm going to blow it in on a party that we'll have here!" she with the had it. Wilkins, spelling the night doorman, opened the taxicab door. It was that Carter man again, he saw. The one who nad been coming there so much to see Mrs. Stafford. And more "shot" than usual, too.

Smiling cynically watched vance Carter lurch toward watched vance Carter lurch toward the should be the street once more for the street once more and to his waiting and to his waiting the head to the street onc

MEXTON, her husband's aunt, in order to inherit a share of the Sexton fortune.

When she learns that Barrett is about to propose to Elinor she deliberately tries to break up the romance and succeeds. The girl is heartbroken when she does not hear from him. One day they meet at her aunt's home. Barrett offers Lida a cigaret and she refuses, declaring she does not smoke. Rebellious at her mother's hypocrisy, Elinor takes a cigaret, thereby offending Miss Sexton who once more revises her will.

A few days later she dies. Her will leaves practically her entire fortune to Barrett. He does not want, it and yet can not turn it over to the rightful inheritors.

NOW GO ON WITH THE STORY

has whipped cream on it and are!" the doorman thought.

"We'll have that cake!" . . .

30-YEAR-OLD DEBT PAID

BATON ROUGE, La.-F. P. ummers, merchant, recently received a \$10 money order in payment for a debt contracted 30 years ago. The debt was for goods purchased by a customer who later became ill and was unable to pay. The customer stated in a letter which accompanied the money order that he was sorry he couldn't pay interest.

It is a matter of simple justice, no doubt, that an autoist who at tempts to burn up the road often lands in the cooler.

Lady's Cetter

to a Henry Ford Dearborn, Nich.

A lady writes to say that she does not understand why an 8-cylinder car does not cost more to run than a car with fewer cylinders. She refers to my statement that our Ford V-8 develops more power on a gallon of gas than any car we have made.

The use of 8-cylinders does not mean the addition of two or four extra fuel consumers. It is not, for example, a 4-cylinder engine multiplied by two. Our 8-cylinder engine takes the fuel supply of an ordinary 4-cylinder engine and divides it eight ways. And why?

By reducing four larger explosions into eight smaller ones, we get engine smoothness and quietness. Eight-cylinders indicate the way the gas is used, not the amount. It is just the difference between going upstairs in four long jumps or in eight ordinary steps.

Two things use up gas-bad engine design and useless car weight. Besides having an engine that gets a high percentage of power out of the fuel, the Ford V-8 has a light, strong body and chassis so that no power is wasted in moving excess weight.

The only extravagance about the new Ford V-8 engine is in the building of it. The extravagance is ours-the economy is yours.

The whole question of car economy needs clearing up. An economical car gives economy all round. Price, operation, upkeep, all play their part. If what you save on gas you lose elsewhere, that is not economy.

As to upkeep, our dealers say that in recent years the improved quality of Ford cars has cut down their repair business 50 per cent. As to price with quality, -- judge for yourself.

As to economy, here is the record of a stock car three weeks out of shop in Oklahoma:

On a run of 10,054 miles at the rate of 1,000 miles a day-the Ford V-8 gave 18.8 miles per gallon of gas. Not a drop of water was added to the radiator. The oil was changed once in 1,000 miles.

That should answer a lot of questions.

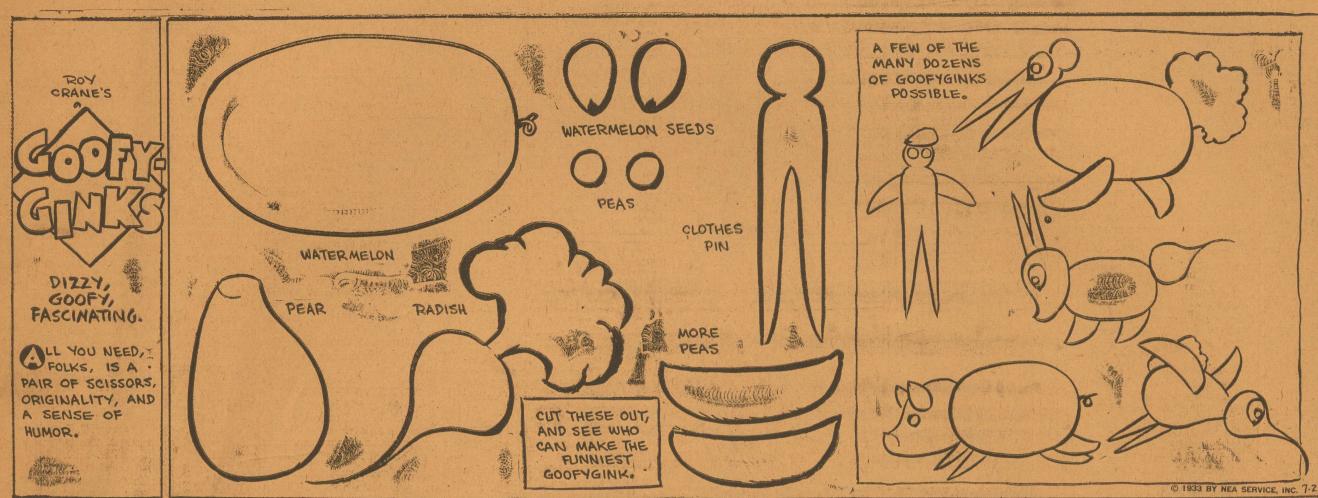

June 30th, 1933
