George Weyerhaeuser Back At Home After Being Held By Kidnapers Nearly Week

Kidnap Gang Is Sought Under the Lindbergh Law

Nine Year Old Boy Tells About Gang of Six Keeping Masks On

IS SAFE AT HOME

Boy Told By His Abductors He Was Being Held In Oregon

By United Press

TACOMA, Wash., June 1.—The "Egoist" and five other kidnapers released George Weyerhaeuser uninjured on a tree-bordered road today and three hours later the nine year old member of the wealthy timber family was safe at home.

The grimy faced, sobbing boy said:

"I think my uncle paid the ransom yesterday or the day before."

The kidnapers, suspected of being from the Alvin Karpis gang, demanded \$200,000 in used, not marked, bills of \$10, \$10 and \$5 denominations, in a note signed "Egoist" delivered to the family six hours after George was snatched near a school.

The family would not say whether or not it had paid the ransom in whole or in part. The uncle mentioned is F. R. Titcomb, go-between in ransom negotiations.

George was "frightened, nervously upset and unable to answer questions clearly after his experience," Mr. and Mrs. J. C. Weyerhaeuser said in a prepared statement.

But he was not too upset to face the questioning of department of justice agents who sought information from him before he was permitted to sleep.

Federal men questioned the farmer, John Bonifas, into whose yard near Issaquah, Wash., 30 miles east of Tacoma in the foothills, the slender boy wandered at 4 a. m.

They questioned Early Robinson, taxi driver, who brought the boy part of the way home after he had started in the farmer's car.

Because the kidnapers held George more than seven days, the abduction became a federal crime and the men who took him are liable under the drastic Lindbergh law.

George believed these was a large river near the hideout. He said the six men wore masks constantly. He also said they told him he was held in Oregon.

Ordinance On the Rabies Vaccine Is Signed By Mayor

Attention was called Saturday to a new city ordinance, which was signed that day by Dr. Harry A. Logsdon, Mayor, and attested by R. A. Jameson, city secretary, which makes it unlawful to own a dog in Ranger unless it is vaccinated against rabies and licensed.

The ordinance, which is to be rigidly enforced, reads, in part, as follows:

"It shall be unlawful for any person, firm or corporation to keep a dog, or dogs, within the city limits of Ranger, without first having said dog or dogs vaccinated for rabies and having paid the license thereon."

The ordinance further states that any dog in the city limits, which does not have the proper tags, showing that it has been vaccinated and the license paid, shall be killed by any sanitary or police officer.

The ordinance provides a fine of not less than \$1 nor more than \$25 for violation of the ordinance, each day the ordinance is violated constituting a separate offense.

The previous ordinance, covering licensing of dogs, and which is still in effect, the new ordinance repealing only such passages as are in conflict, reads, in full, as follows:

Sec. 10. OWNERS OF DOGS MUST PAY TAX. That any person owning a dog or dogs of three months of age or upwards within the city limits of Ranger and desiring to keep same shall pay to the City Assessor and Collector of Taxes the sum of one dollar for each dog owned and desired to be kept within the city, and the said City Assessor and Collector of Taxes shall give a license to such person to keep his said dog or dogs so paid for a period of one year from the first of March of each year, and the City Assessor and Collector shall, upon payment of the said sum, deliver to the holder of the license by him issued a metal plate for each dog. Club Members Pay Dues From Maine And Over Nation

Demise of large oil operations in Cisco and moving of oil men to various parts of the United States has resulted in an unusual Elks club, believes B. S. Huey of Cisco, who attended the highway celebration in Eastland Thursday.

From Maine to California, said Huey, former club members of the Cisco group still remit their dues to his city. Some former members reside in New York City.

Explaining the situation, Huey stated that the club's dues can be paid anywhere and "an oil man never knows where he'll be tomorrow."

Huey was one of the Cisco early town builders. Many buildings were erected by his financial aid. Once he published a Cisco daily newspaper.

Operation of the paper, Huey recalled, the first year was \$93,000 and receipts were \$98,000. "I hired some fellow from Tulsa, and of course he had to have many assistants."

Marble Table Machine Law Seen As "Confusing" By Judge Davenport In Disposing of Controversy on Friday

Regret that marble and table machine laws are not definite and certain was expressed Friday by Judge George L. Davenport in 91st district court in connection with disposition of the Ranger-Cisco officials and operators controversy.

The temporary injunction issued May 22 was dissolved by the court.

"I regret that the law covering tables and machines, as are involved in this controversy is not more definite and certain," said Judge Davenport. "If that were true, those operating such machines would know with more certainty their legal rights and the officers who are charged with the enforcement of our laws could act within the scope defined by law."

"Under a law recently enacted by the legislature," continued Judge Davenport, "which as I understand is now in effect, machines

such as are involved in this controversy are taxed by the State of Texas, and under the act it becomes the duty of the state comptroller to collect the taxes thus imposed."

New legislation or decisions from the court of criminal appeals was foreseen "clarifying the statutes that are now confusing." The statement was based "on the assumption that the State of Texas would not be willing to collect taxes on machines and tables that could not be legally operated after such taxes were paid."

Representing the cities in the case were City Attorney R. E. Grantham of Cisco, City Attorney W. S. Adamson of Ranger, and Criminal District Attorney Grady Owens.

Representing the machine owners and operators were Earl Conner, Sr., and W. H. McDonald.

Cloudbursts and Tornadoes Take Heavy Toll of Lives In Southwestern Nebraska

ROOSEVELT IS STILL WORKING ON NEW NRA

By United Press

WASHINGTON, June 1.—President Roosevelt had determined today to exhaust every means of coping with the NRA crisis before resorting to the drastic expedient of attempting changes in the constitution, it was learned today.

Thus far no satisfactory plan for continuing the NRA has been evolved, and officials believed several days would elapse before a program could be brought out.

The newest development was a report Mr. Roosevelt, seeking a means of stabilizing the labor situation, would insist upon passage of the Wagner labor relations bill by congress.

Farm Imports are Below Average Of Past Ten Years

WASHINGTON.—Imports of competitive agricultural products for the eight months, July 1, 1934, to March 1, 1935, were lower than the average for the same months of the previous 10 years in every case except feeds and sugar, according to a study made by the bureau of agricultural economics of the United States department of agriculture.

The figures show that imports of fruits, excluding bananas, were 25 per cent below the 10 year average for the July 1 to March 1 period; vegetable oils and oil seeds, 14 per cent below the 10 year average; meats, 17 per cent below; vegetables, 51 per cent below; wool, 56 per cent below; dairy products, 61 per cent below, and eggs and egg products, 78 per cent below.

Sugar imports from July 1, 1934, to March 1, 1935, were 5 per cent above the 10 years average for these months and imports of feeds 186 per cent above. The most severe damage resulting from drought was to grain and forage crops. Drought damage to the 1934 corn crop is estimated at about one billion bushels and to the wheat crop about 300 million bushels. Production of oats and barley was reduced about 50 per cent by drought.

Imports of wheat for domestic consumption from July 1, 1934, to March 1, 1935, were 9,511,000 bushels. About half of this amount was low grade wheat for feed, and about half was durum wheat for seed and the manufacture of macaroni and similar products which require this particular kind of wheat. Production of durum wheat in 1934 in the United States was approximately one-tenth of average.

Corn imports for the eight-month period totaled 6,509,998 bushels, less than 1 per cent of the estimated loss due to drought.

Noncompetitive imports, including coffee, tea, spices, cacao, rubber, and silk were about 99 per cent of the 10 year average.

Death Toll Might Reach 100 Over a Hard Hit Section

All Communication Lines Down Over Wide Area Inundated Saturday

DAMAGE IS LARGE

The Last Telephone Line to One Town Breaks After a Report Made

By United Press

McCOOK, Neb., June 1.—Meager reports giving a constantly increasing death toll, today indicated the raging Republican river, tornadoes and cloudbursts had caused a major disaster in Southwestern Nebraska.

More than a score were known dead. There were reports, unconfirmed because the flood wiped away communication lines and had so damaged radio stations their signals could not be heard, the toll would run to hundreds.

Several towns were wiped out. Hundreds of families were homeless and marooned in the 150-mile length of the Republican river valley.

Damage estimates ran into millions of dollars.

One report came by telephone from Goodland, Kas., to the Denver Post. It said the torrents had wiped out the town of St. Frances, Kansas, and that at least 23 had perished. A few minutes later all communication with Goodland was broken.

The villages of Parks, Trenton, Stratton and Max were virtually wiped out and a huge death toll was probable in the devastated area.

While families fled to the hills on the rim of the valley, a tornado struck southwest of McCook early today. It was estimated that 16 lost their lives in the storm.

Thirty men were marooned in the McCook power plant at noon. They had labored all night pumping out the water. It appeared today they were in no danger.

Authorities in central Nebraska organized relief parties. At Holdrege a national guard company was called out and assumed control of the Oxford area. The town of Oxford was half inundated. Several families were missing. The Red Cross, Elks, American Legion and Chamber of Commerce banded together to direct rescue work and rehabilitation.

Airplanes soared over the valley directing rescuers in boats to marooned parties.

**Let Us Not Be Mislead
By A Market Boom**

There is a rumbling noise in the stock markets these days, and it all sounds very much like the machinery of an old-fashioned boom picking up speed to swing into high gear. And that, in turn, leads one to wonder if we could be on the verge of repeating the joy ride which ended up against a safety zone stanchion in October, 1929.

A stock market boom in itself need not do much harm to anyone who has the good sense to keep his fingers away from the hot end of the poker. It is only if we begin to look on stock quotations as the one great sign of national prosperity, and assume that a bubbling stock market is prosperity itself, that the joy ride will really be under way. That was what we did back in the glamorous twenties.

The stock market was our answer to everything, in those days. If anybody suggested that technological unemployment was becoming a grave problem, that our agriculture was critically ill, that our foreign trade was being erected on a basis of borrowed money, that we were losing sight of all human values in our race for riches—well, the one big answer to everything was that stock prices were 'way up and that anyone who didn't like it would best go back to Moscow, where he came from.

We can repeat that program if we choose. All ingredients for a stock market boom seem to be at hand—including the cheerful presence of Major Angas.

But we might as well remember that one our last joy ride we not only wrecked the automobile, but came uncomfortably close to breaking our own necks.

The danger lies in the chance that we may again mistake a rising stock market for an end in itself rather than a symptom.

A rising market does not bring prosperity. Prosperity brings a rising market. To put our chief energies into stimulation of market values would be to reach for the shadow and ignore the substance.

It would be like the janitor of the country schoolhouse who suggested that on cold days the thermometer be tied to the stovepipe, so that it would register suitably high temperatures.

If a high temperature in the thermometer is all we want, we can have it. If we have the good sense to demand that the room itself be comfortably warm, the thermometer readings will take care of themselves.

In other words—if stock prices are going up, fine and dandy; that must indicate a regaining of business health and confidence.

So long as we don't drop everything and rush off to lash the thermometer to the stovepipe, everything will be all right.

**States Where Sales Tax
Produces Relief Funds**

Gov. Henry Horner of Illinois is a democrat. He is a fighting democrat with a head and a will of his own. He has behind him a democratic legislature. He made three attempts to put over (for a second year) a sales tax to provide funds for the relief of the idle workers and their families. He won after two dismal setbacks. The lawmakers faced the music and the second year of the sales tax revenue is on the way. There is a reason for it. A commonwealth must do its part and stand some of the cost if its people expect to receive federal relief. And why not?

Speaking of the sales tax, it is very unpopular in Texas in certain circles of business and society and politics.

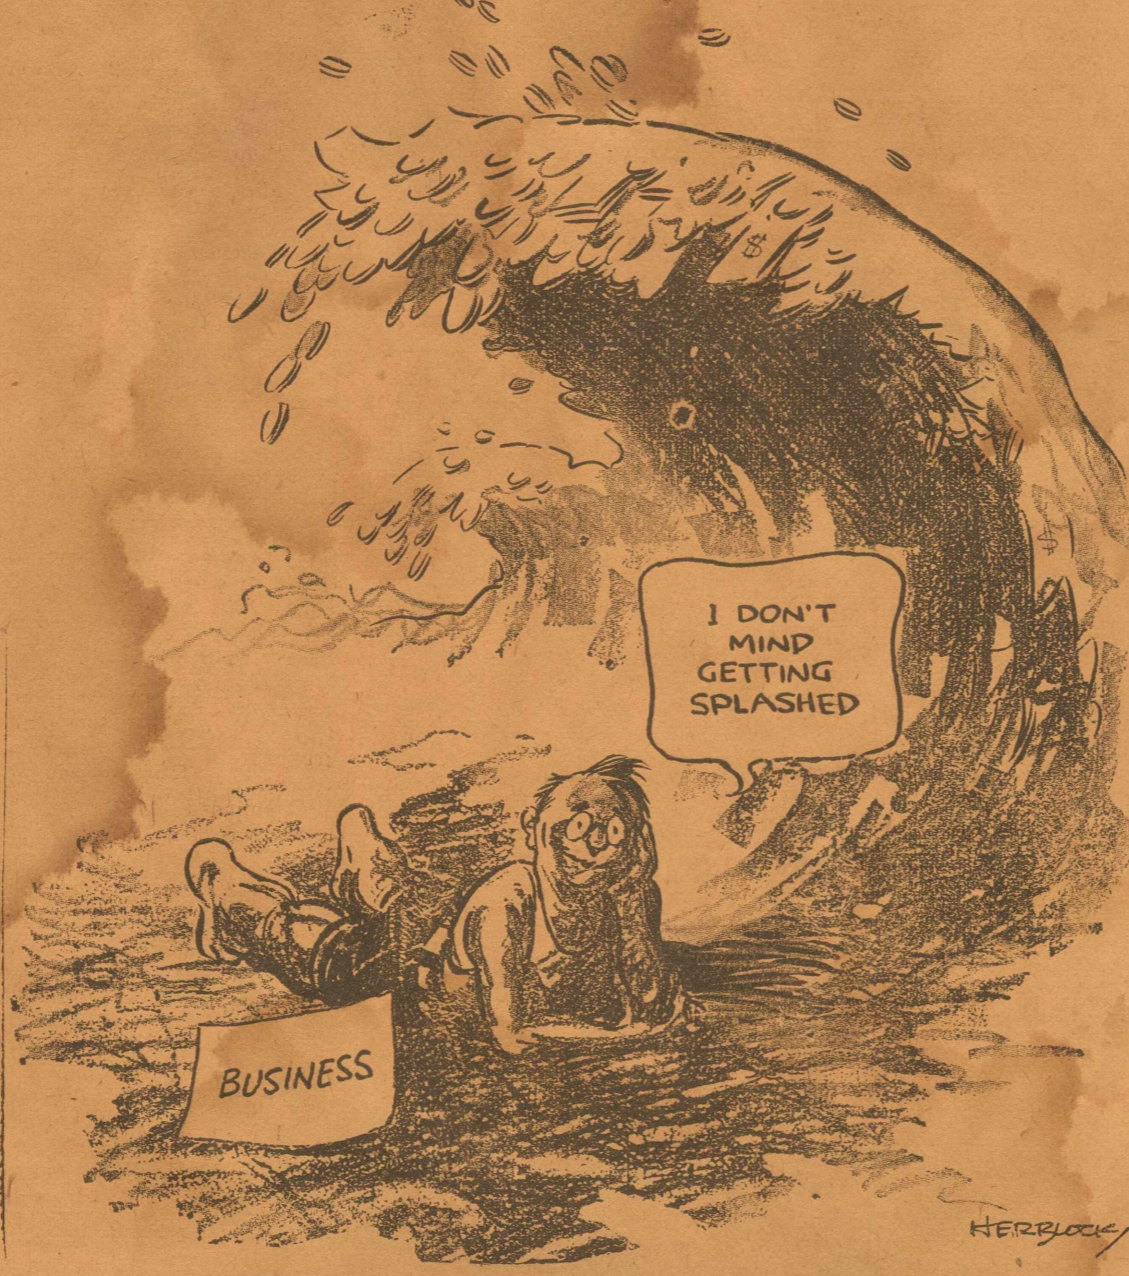

Gov. Frank Merriam of California is a republican. He faced the sales tax issue two years ago. This is the verdict from the city of Sacramento, the seat of government of the California paradise of sunshine and advertising genius: "California's barometer of better business conditions is the state sales tax of two and a half per cent. During nearly two years of operation there has been a constant increase in receipts until today it yields approximately \$13,000,000 a quarter. The tax represents payment of \$2.40 per quarter for each man, woman and child in the state."

At least this is the estimate given by the tax experts of the Golden Coast commonwealth. Texas has a larger population than California. Texas has five times the resources of California. California is doing its part toward carrying the burden of relief and its cost. Likewise, the very wealthy and very progressive commonwealth of Illinois. Texas taxpayers match the federal relief dollar demand.

A whole lot of people in this world need a little cheering up, especially those who are despondent about high taxes. They act as if there is not one ray of brightness anywhere. They feel that the burden of taxes is more than they can bear. Yes, they need cheering up.

As long as there is a margin between what a city is as a place in which to live and work and what it may become, there is work in every community for a Chamber of Commerce.

"HUGE BUYING WAVE PREDICTED"

"OUT OUR WAY" ————— By Williams

**Automobile Industry
Good Farm Customers**

The farmer's job used to be keeping the nation's dinner table supplied. During 1935 he will work to help supply materials for one million Ford cars.

Ford dealers point out that the Ford Motor Company will purchase many products of the farm and forests in order to complete its announced intention to build one million cars this year.

Here are some of the things that will have to be purchased:

3,200,000 pounds of wool requiring 800,000 sheep to produce it will go into upholstery, floor-coverings, linoleums and anti-rust preparations. The production of glass made from hides, glass made from milk, stearic acid, grease, glycerine, soap chips and 1,500,000 square feet of leather for upholstery will utilize 30,000 cattle. 20,000 hogs will supply lard oil for lubricants, oleic acid and bristles for brushes. The goat will yield 350,000 pounds of goat's hair for the mohair upholstery. This means that farms will shear 5,500 goats. Beeswax is not so much used as it was, but tons of beeswax will be used for electrical insulating compounds. 93,000,000 industrial honeybees will produce this beeswax.

Every four-door Ford sedan uses 70 pounds of cotton. A million cars will require over 60,000,000 pounds of cotton—25,000,000 pounds in tires; 34,000,000 pounds in batting, cloth, brake linings, battery boxes, timing gears and safety glass. It will take 425,000 acres of cotton to produce this material. The cornfield will produce a half a million bushels of corn to make busy alcohol and starch needed in manufacture. The fields will furnish 2,400,000 pounds of linseed oil. Even the fields of sugar cane will help build the Ford car, for they will furnish 2,500,000 gallons of molasses from which come solvents, anti-freeze and shock absorber fluids. Growers of the castor bean will supply 240,000 pounds of castor oil for lacquers and artificial leather.

The forest will make its contribution. 112,000,000 feet of lumber, mostly for packing purposes and 5,000,000 feet of paper board will be needed. The pitch pine will supply 2,000,000 pounds of turpentine for solvents and paints and adhesives. Rubber trees whose product is used in 203 parts of the Ford car, from tires to tops, will supply 83,000 tons of rubber. The cork trees will yield a quarter of a million pounds of cork. A farm industry new to the south will receive an impetus when 728,000 gallons of tung oil is used.

Products of Farm and Forest For One Million Fords

The motor car is not a kingdom in itself. It must buy something of nearly everything that is grown on the farm and that is made in other industries. Thousands of farms and industries are feeling a new impetus in business from the scheduled production of more than one million Fords for 1935.

The Ford car is a good customer of the farmer. The farmer helps to build Ford cars just as Ford cars help to build the country.

Picking oranges on the F. C. Bowman ranch here, the worker suddenly came across a gold watch hanging from a branch. The watch had been given up as lost two weeks before in an automobile accident. Searchers had sifted sand all around the scene in hope of finding the valuable watch.

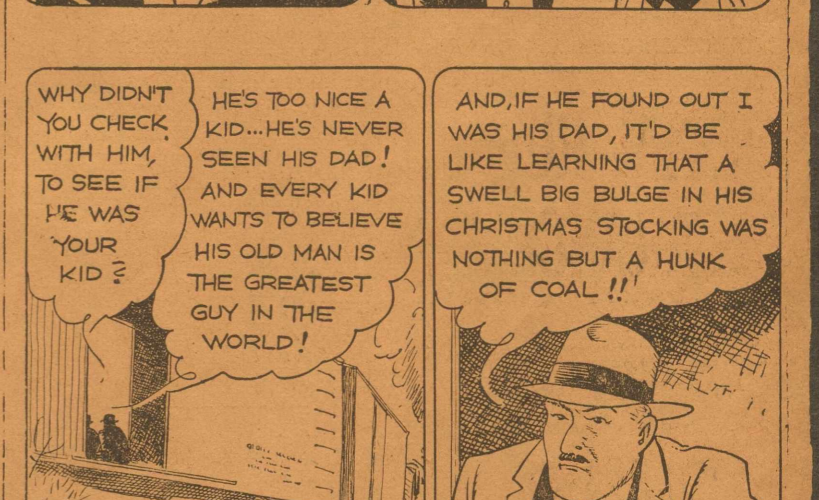

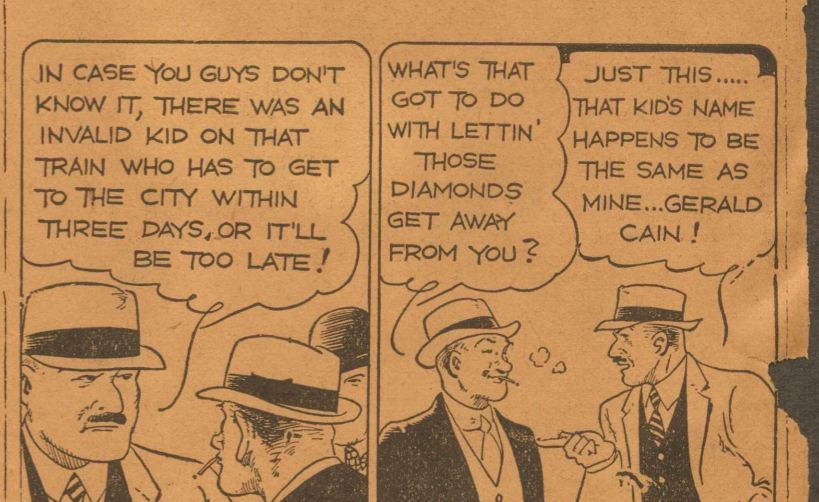

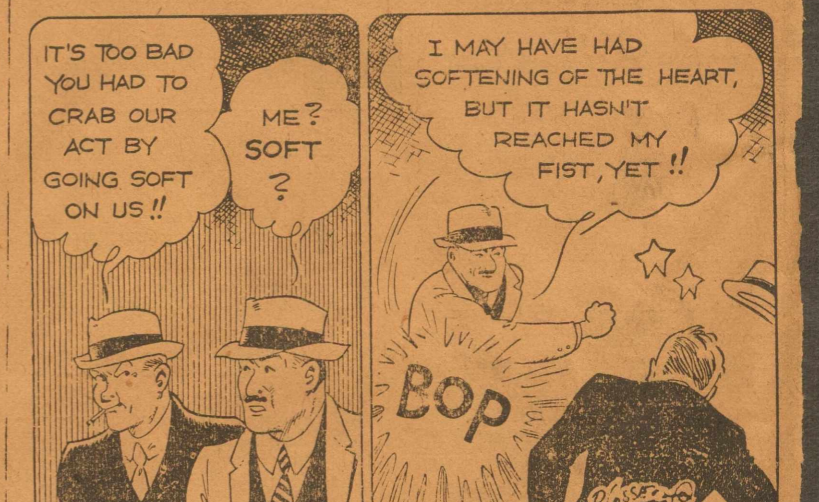

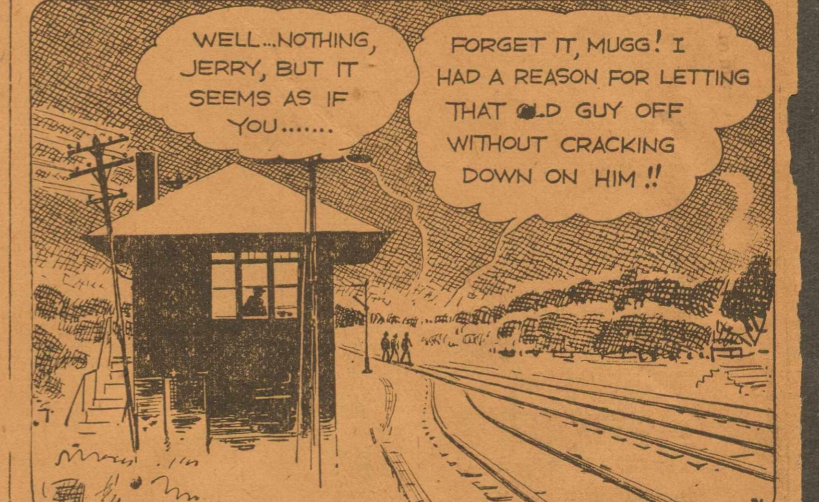

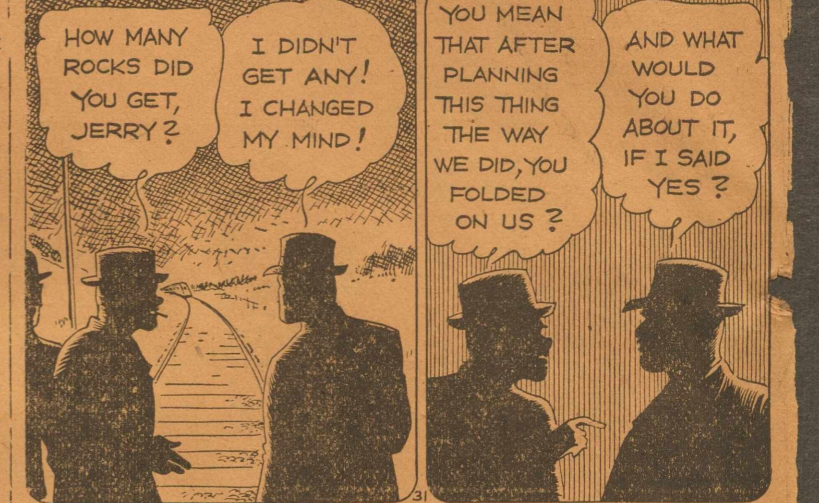

Authorities are puzzled over the motive behind disappearance of books from the Congressional Library, every congressman at one time or another having read a book.

THE institution of Sunday is a Christian institution. We call it the Lord's Day, but it is inevitably associated in the Scriptures, and in conception and practice, with the Jewish Sabbath.

COLLEGE STATION, Texas.—Problems of street buyers will be emphasized and typical cotton transactions will be demonstrated as a part of the course of the twenty-sixth annual session of the summer school of cotton which will open at the Texas A. & M. college June 4 and continue through July 13.

Prof. J. B. Bagley, head of the department of textile engineering of the college, will have charge of the school.

The school was planned to prepare young men to enter the cotton business, to train cotton growers to market their cotton intelligently and profitably and to assist cotton buyers to become more familiar with low grade and off colored cotton and to judge staple. It will offer instruction by professional cotton men with years of experience as teachers.

Grading, stapling and cotton trade procedure will comprise the subjects to be taught. Facilities of the department of textile engineering, including the cotton mill, will be available for instructional work. Lectures will be given daily covering subjects of general interest.

Ford V-8 Brings Fine-Car Performance Within Your Reach

THE FORD V-8—one of the most important forward steps in the history of the automobile—brings to all the people what was formerly within reach of the few. The V-8 engine had always been known for its outstanding performance, but it was used only in expensive cars. People wanted it—knew it was better. But, few motorists could afford to pay \$2000 or more for an automobile.

The principle of the engine was right but the price was prohibitive. Ford decided to get that price down to where more people could have a V-8 car.

That was the new idea. The V-8 was a new kind of car to fit new times, but the thought behind it was the same... the tested Ford idea of service. The Ford Motor Company simply continued to do the pioneering work that has been its specialty for 30 years and set a new standard of value.

The significance of the Ford V-8 is that now it becomes possible for every one to have a really fine automobile at low cost. Price is not a barrier. Even those who can afford high prices for an automobile are driving the Ford V-8. It is the car of fashion as well as utility.

Today's Ford V-8 gives everything you would like to have in performance, beauty, comfort and safety. As for dependability and economy—the Ford has always been known for that. Today it stands also for the newest, latest developments in automobile building.

obtain clemency for Raymond Hamilton, youthful Dallas desperado who was electrocuted with Joe Palmer on May 10, for the murder of a prison guard.

"I feel sure that 80 per cent of the 40,000 men and women who signed the petitions asking for clemency, expressed themselves in the hope that we would continue with the work," Miss Boswell said. "They said they saw the futility of the electric chair as a preventative for crime."

Organization plans will be announced shortly, they said.

Governor Receives Many Requests
By United Press

AUSTIN.—Strange suggestions and inquiries are received at the governor's office. One lady seriously requested that the late Raymond Hamilton be commissioned a Texas ranger. The criminals would be afraid of him, she argued, although Hamilton maintained to the last that he never killed anyone.

A girl caller wanted to know how she could make her father support her. She was politely referred to the office of Attorney General Will McGraw. There, she probably was referred to her own district or county attorney. Statute forbids the attorney general to give private advice.

School delegations always have an entree to the governor, and such a delegation visits the state capitol almost every day. Recalling that school opportunities aided him as a poor boy, the governor sees in every school-boy caller a possible governor of the future.

AN ORDINANCE PROHIBITING THE KEEPING OF DOGS IN THE CITY OF RANGER, TEXAS, WITHOUT FIRST HAVING SAID DOGS VACCINATED FOR RABIES AND PAYING THE LICENSE THEREON.

Be it Ordained by the City Council of the City of Ranger:

Section 1. It shall hereafter be unlawful for any person, firm or corporation, to keep a dog, or dogs, within the city limits of the City of Ranger, Texas, without first having said dog, or dogs, vaccinated for rabies and having paid the license thereon.

Sec. 2. Any dog, or dogs, found in the city limits of the City of Ranger, Texas, that has not been vaccinated for rabies, or that does not have a license tax attached to its collar, showing the license paid for that year, shall be killed by any sanitary or police officer, or under his direction.

Sec. 3. Any person violating Section 1 of this Ordinance shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not less than \$1.00 nor more than \$25.00; and each day said person violates said Section 1 hereof shall constitute a separate offense.

Sec. 4. All Ordinances or parts of Ordinances in conflict herewith are hereby especially repealed.

Passed, approved and adopted this 28th day of May, A. D., 1935.

HARRY A. LOGSDON, Mayor.

To prevent the summer slump in attendance, every member should be in his place, unless he has some reason acceptable to God. Satan, the arch enemy of human souls, has an excuse factory for those unwilling to make a fight for the righteousness God requires of those who would build up the Kingdom. The church is a part of God's armory, where we may be equipped for service. Come to church!
