SIXTIETH YEAR

Sonora, Texas, Friday, April 21, 1950

TWENTY-SEVENTH WEEK

## Sonora Opens Concho League Play Here Sunday Against San Angelo

The power-laden Sonora Broncos, slated by many to win this year's Concho Basin League flag, open the 1950 season here Sunday afternoon at 3 o'clock at Allison Field. The Broncos' opponents will be the league's San Angelo entry, the Sherwin-Williams Painters, an aggregation composed mostly of San Angelo Junior College students.

Scheduled to pitch Sunday for Sonora is Allen Owens, big left hander employed by the Foxworth-Galbraith Lumber Company. Other starters are Coach Billy Willard, shortstop, Dayton Cain, left field, Hut Moore, center field, Byron Stuart, catcher John Bell, first base, Juan Norriega, second base, H. P. McClennahan, third base, and Wallace Renfro, right field. Others officially listed on the team roster are W. N. Hannah, Bobby Granger, Alan Saunders, Red Thompson, Jack Henderson, Dickie Street and Wilfred Berger.

Manager of the team, elected before practice sessions started several weeks ago, is John Bell, who is employed by the State Highway Department here. Saunders is serving as business manager.

Initial financing of the team this year was done through sale of advertising on programs which will be given away to fans at the games. On the back of the program a scorecard is printed.

Other teams in the league this year are Miles, Robert Lee, Forsan and Big Lake. Teams will play a double-round robin, with a play-off between the top teams at the end of the season.

Cold drinks will be sold at the game, and admission prices will be 50 cents for adults and 25 cents for students.

## Mild Winter Aided Spread Of Screw-Worm Flies

A recently completed survey shows that the screw-worm fly survived this winter in a much larger area than ever before. This situation creates a real threat to the livestock industry of the state, says J. A. Deer, assistant extension entomologist of Texas A&M College.

He says the survey made by entomologists of the USDA Bureau of Entomology and Plant Quarantine at Kerrville, shows that in Texas the area where the fly was found to have survived the winter extends at least 300 miles farther north, 150 miles farther northeast and 200 miles farther northwest than during any winter since 1943 when the survey program was started. Three of the affected counties -- flies were found in 134 Texas counties -- border Oklahoma just east of the Texas Panhandle. Records show that during previous winters, the screw-worm fly survived in less than 30 counties in southern Texas and usually in no other states west of the Mississippi. This year they were found in 3 southwestern New Mexico counties, 9 southern Arizona counties and 3 counties in southern California.

Deer says that it now appears certain that the migration of the fly will be earlier and that it will probably migrate much farther northward than usual. He says the possibility of transporting screw-worm infested animals from the southern zone to northern states is greater this year than ever before.

Livestock owners, he says, should be on guard and should watch for early screw-worm infestations, especially in animals that are to be shipped to the northern states. He points out that dealers of livestock supplies should also be ready with plenty of Smear 62 should serious outbreaks occur in the state. Weather conditions during the next few weeks may be a determining factor in the seriousness of the situation, he says. Moisture will increase the possibilities of serious outbreaks.

In conclusion, he says, livestock owners should treat all wounds promptly with Smear 62 whether screw-worms are present or not. It is a surgical dressing as well as a worm killer and its use is just good insurance against screw-worm infestations.

C. E. Scott, owner of the Western Powder Co., left Wednesday by plane for Chicago, where he will attend a geophysicists convention, and Detroit, where he will visit his mother.

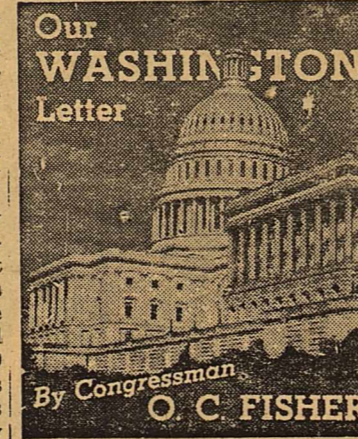

## Hunt Horses Qualify For Big Spring Races

Two horses belonging to James T. Hunt, Sonora, qualified in the 2nd. annual Sheriff's Posse Futurity Sunday in Big Spring, and are eligible to compete for the purses of \$11,000 to be paid to the winners of the two divisions next Sunday. Hunt, entering but one horse in each division, placed his Anthem in the quarter mile finals by running second to the King Ranch bred Reticule, entered by E. H. Lane of Odem, in the fastest elimination trial heat of the day. Reticule, leading two-year in the nation, tied a track record of 21 years standing at New Orleans in stepping off the quarter in .22, was registered at 23.7 on the Big Spring track which was decidedly slow following heavy rain on Saturday. Double Threat, the other Hunt entry, placed second to Hy Aethel in gaining a spot in the finals in that division.

The Big Spring Futurity in its second year has zoomed to the front as a major sporting event. It has seventy original nominees from seven states in the two divisions and besides the King Ranch record holders had many of the top thoroughbreds as well as quarterhorses in the entire southwest.

A special feature race is scheduled for the Saturday program at Big Spring when eight of the leading quarterhorses vie for a \$3,000 purse in an "open to the world" quarter mile race. Entries for this feature are Stymie, Miss Banks, La Machine, Miss Pinkie, Raindrop, Miss Chester, Skipper and Peter Pan H.

The two final stakes for the Futurity honors will be among the full program held at the Big Spring track Sunday. Several 5 as well as 7 furlong races are planned as added attractions.

Thousands of visitors thronged the streets of Washington last week during the annual Cherry Blossom Festival which coincided with Easter this year. The corridors of the capitol were crowded with parties of school children and other sight-seers from nearby states who took advantage of the holiday to visit Washington. It is too bad that Texas is so far away that our school children cannot readily visit their nation's capitol to view the many historic sights that should be a part of every youngster's education.

The House is in the midst of its annual ten day Easter recess which enables members to visit constituents at home or catch up on back work. The Senate is back in session after a four day layoff in an effort to catch up with the House since its rules of procedure make progress somewhat slower than in the lower chamber.

**MOHAIR**  
Last year the Department of Agriculture and the Texas Sheep and Goat Raisers Association undertook a project to promote the use of mohair. The Department furnished \$20,000 and \$10,000 was raised by contributions from members of the Association to hire a private contractor to carry out the research and service work of the project.

The contractor has conducted extensive interviews among manufacturers, wholesalers and retailers to determine the changes in style, technical processes, and alternative raw materials which has resulted in the decrease demand for mohair. Textile engineering laboratories are being employed to develop fabrics made of mohair or mohair combined with other fibers such as cotton and synthetic staples. Prospective or improved uses of mohair are being investigated for such products as knitting yarns, furniture coverings, blanching, draperies, carpets,

## Loan To Finance Completion Of 4-H Club Barn

The Sutton County 4-H Club held its regular monthly meeting Wednesday night. George H. Neill, Andre Truden and Tom Darrow were guests of the club.

Truden and Darrow showed a series of slides of the effects of both good and bad soil conservation practices. Most of the slides were made in Sutton County on ranches owned by cooperators with the Edwards Plateau Soil Conservation District.

Neill talked with the club about a loan to complete the 4-H Club barn which was started last spring. The club voted to accept the loan and expressed its appreciation of Neill's and the bank's interest in the 4-H Club work in making this loan possible. Work will be started on the barn in the near future and it should be completed soon.

A field trip on the Tom Davis ranch next Saturday for all 4-H Club members was planned. All boys and girls who are interested in going are asked to meet at the Court House Saturday morning at 9 o'clock. Tom Darrow of the Soil Conservation Service will be in charge of the group.

## Home Freezers Taking Place Of Summer Canning

Quick freezing, both at home and commercially, is fast becoming the most popular method of food preservation. Homemakers like it because it is a time saver and the hot tiresome jobs that went with home canning are eliminated. Because of the newness of the method, research must be relied upon for the answers to many of the problems that arise. The Texas State Nutrition Council, according to Louise Mason, extension foods and nutrition specialist of Texas A&M College, has just released its 1950 recommendations on home freezing of fruits, vegetables, fresh poultry, meats and fish and cooked foods and flour mixtures.

She says the committee on food preservation of the State Council hopes the distribution of uniformly dependable information on freezing -- based on the latest research findings -- will help to improve the quality of frozen food. Its members believe a coordinated program between educational groups, locker plant managers, agencies and distributors of home freezing equipment will materially assist in this quality program.

## Popular Theories On Deer Habits Challenged By State Trapping Crews

Some popular theories about movement and feeding habits of deer have been challenged in findings by Game, Fish and Oyster Commission trapping crews.

For example, the old deer hunter's observations that deer feed during certain positions of the moon were not borne out by the studies, according to the Director of Wildlife Restoration. If weather conditions were to their liking, the deer fed regardless of the moon.

The trappers reported that mule deer moved around or fed very little during short periods of wet cold winds, high winds, and during rain or snow storms. It appeared that the deer congregated in arroyos, headers or on the lee side of hills and remained there until the weather changed. Low temperatures alone did not seem to keep them from feeding. If the wind blew hot or cold for several hours and slacked up for only a short period, the deer became very active.

In the mule deer trapping routine, it was learned that deer were attracted to the traps in several types of terrain. When inclement auto seat upholstery, and many others.

This project represents a splendid effort on the part of the mohair producers to develop their industry to meet the ever-changing demands of the public. A committee composed of various Agriculture Department officials supervises the project and meets every few weeks to review the progress being made by the contractor. I sit in on the meetings informally on behalf of the mohair producers. When the project is completed the committee hopes to have accumulated much valuable information that will provide many additional uses for mohair products.

## Swimming Pool To Be Opened This Summer

**EDWIN THOMPSON NAMED INSTRUCTOR**

The city swimming pool will be opened again this summer under the auspices of the Boys' and Girls' Program, it was decided at a meeting of the Lions Club's Boys' and Girls' Committee and a group of interested mothers Wednesday afternoon.

Coach Edwin Thompson, aided by a yet-to-be named assistant, will be in charge and will give swimming lessons as he did last year. Coach Thompson is a graduate of the Red Cross Instructors School at Marshall.

Prices set are \$3 for a series of ten swimming lessons to be given during the mornings; 25 cents adult admission and 15 cents student admission. Season tickets will be sold for \$7. The pool will open about June 1, and close at the end of August.

Until last year, the committee was informed, the pool broke about even, but last year, due to the polio scare, a loss of \$500 was incurred. Last year, before opening date, the city put the pool in good shape, including painting, repairing, installation of a windbreak, installation of an awning over the spectators' platform and blocking off the dirt street running around the pool. The Boys' and Girls' Program then took over maintenance of the pool for the rest of the summer. Cash on hand, according to George H. Neill, is \$1,431.98.

Other possibilities for a summer program discussed by the committee included handicraft work and recreational reading for small children, softball league, Teen Canteen, weekly movies, and tennis.

Coach Billy Willard, who will be in charge of the summer program, will meet with the committee to work out costs of the various suggested activities. Then a final meeting will be held to complete the program and work out dates. The swimming program is definite, however.

Those present at the meeting included Billy Willard, Herman Smith, R. M. McCarver, Mesdames Ben Mittel, M. C. Scott, C. T. Jones, Jr., W. T. Hardy, Duke Wilson, J. F. Howell, Frank Potmesil, M. E. Genrich, Joe M. Vander Stucken, and Dan Cauthorn. Also present were George H. Neill, A. E. Wells and Clay Puckett.

Mr. and Mrs. Harvey Cooper are on their vacation. During part of their trip west, they will visit Mrs. Cooper's mother in Big Spring.

## County Census About Half Way Completed; Expect Results In May

### Photo Studio To Open Monday

Bernard Carr, owner and operator of Carr Studio in Eldorado, announced this week that he will open a studio here Monday. Carr has leased the office adjoining the Davis Insurance Agency and formerly occupied by Clayton Bray.

Carr plans to handle cameras, photo supplies and will offer a three-day film developing service. He will do both commercial and portrait work.

For the time being Carr will keep office hours here on Mondays, Wednesdays and Fridays, devoting the other days to his Eldorado shop. Calls may be left at the Davis Insurance Agency.

### Woman Dies Of Heart Attack Here Tuesday

Funeral services will be held today at Bowie for Mrs. A. M. Pace, 77, who died suddenly Tuesday morning in front of Park Inn Cafe. The elderly traveler was stricken by a heart attack at 5:45 o'clock Tuesday morning as she and members of her party were preparing to enter their car. Death came a few minutes later.

Mrs. Pace, her daughter and son-in-law, Mr. and Mrs. O. L. Malone, were on their way from Redlands, California, to Houston to meet another daughter, Sgt. Ann Pace, who was returning from the Panama Canal Zone. The party had spent Monday night here.

Six children survive. Mrs. Pace's husband died in 1942 in Bowie.

### Sonora District Winners Go To Brownwood Meet

Fourteen Sonora students, first and second place winners in the District Meet held last weekend in Ozona, are eligible to compete in the Regional Meet in Brownwood today and tomorrow, A. E. Wells, school superintendent, announced Thursday.

Track and field results include: Rudy Bittle, first in 100-yard dash and first in 200-yard low hurdles. Gene Henderson, third in 200-yard low hurdles. The mile relay team, composed of Oscar Drennan, Pat Carroll, Ernest Crenno and Henry Berlanga, placed second.

Sonora swept most of the tennis events, placing high in every team and individual match. Junior girls' singles: Onita Smith, first; Myrtle McKee, second. Junior girls' doubles: Nancy Eaton and Patsy Drennan, second.

Junior boys' singles: H. W. Kile, second; Junior boys' doubles, John Mittel and George Wright, second; Girls' senior doubles: Joan Gardner and Norva Smith, first; Senior boys' doubles: Clay Odom and John Howell, second.

The junior boys' softball team won first in district. In the literary events, the one-act play won second, and Norris Loeffler was voted best actor. Members of the cast are: Loeffler, Peggy Barker, Jackie Wardlaw, Flora Dell Davis.

Other literary event winners included Tyree Hardy and Billy Scott, first in debate, Jack Ratliff, first in extemporaneous speech, Martha Renfro, first in girls' extemporaneous speech, and Oscar Carpenter, second in declamation.

Use shallow cultivation for the rose garden. The young feeder roots that are near the surface of the ground may be destroyed if deep cultivation is practiced.

pulling wires that drop the sliding doors.

All deer are tagged in the ear with a metal numbered tag. The tag bears a notation that hunters bagging the game should notify the Game Commission. Trappers cut off the bucks' horns for the dual purpose of preventing them from injuring themselves or other deer while in transit and also to spare them from becoming a target of hunters immediately after release. By the time the buck gets on legal hunting ground with a new set of antlers, the scientists will be ready to record how far he traveled from the original releasing place, how long he lived, and other data vital to planned wildlife management.

Nothing, in the way of actual figures, can be given at this time pertaining to the census count in Sutton County but, it can be stated that the operation is about 50% complete, according to W. B. (Buddy) Norton, Sutton-Kimble crew leader. Due to the fact that our nearest neighbor is sometimes 10 to 40 miles away in this western country, the enumeration process is bound to take more time than it would, of course, if this were, say, Rhode Island or Connecticut. Normally the count would have been complete by the end of April but, it looks like that we will be on into May with the local operation.

The importance of this 1950 Census cannot be over stressed since so much of our way of life in the future will be influenced by the statistics compiled from this "Operation Questions." Uncle Sam wants to know how Mr. America lives today -- April 1, 1950 and how -- what was he doing last week; does he live in a sod hut, tent, run down house or mansion; what was he doing last year -- 1949 and what was this land doing last year 1949. How many noses were there on April 1, 1950. If you were born since midnight of March 31, 1950; you are not a part of this count but, if you were here April 1, 1950, but since departed from the face of this earth, we count you as being here and a part of our population.

The enumerators and Norton the crew leader, of Sutton County wish to express their appreciation for the cooperation and courtesies received from the many people already visited and it delights them when they hear at each place-of-visit such words as, "We heard you were headed in this direction and were expecting you -- we're ready -- let's get to work," or, "I knew you were coming so I baked a cake."

The 4 Sutton County enumerators are a part of 140,000 such people handling this work in the United States and they are well trained at this business. Some of the questions asked may sound silly to you in this country but, we ask that you consider the overall operation and the many different types of country in these United States and see what a job it was or would be to segregate these questionnaires to fit each type individually. Farming and ranching in Texas is definitely of different nature than is that in the state of Pennsylvania for instance. If the question seems not to apply, in your case, yet is asked on the questionnaire, give it an answer, for the sake of the overall operation.

Again we will say that considering the bigness of this Census taking operation, it being a census of population; census of housing; census of agriculture; and census of irrigation, we should answer all questions. Bear in mind that the Census Bureau is like a huge building with a log chain completely surrounding it and attached thereto a large padlock. Our constitution sets forth that every 10 years this job must be done and therefor all information accumulated is to be held as highly confidential -- no access to this compiled information is allowed the FBI, Income Tax Department, or others. As proven in a test case in the United States Supreme Court, Census material cannot be used for taxation, investigation, or regulation. Only compiled totals and averages going to make up huge volumes in books and records will be forthcoming from the 1950 Census. Though our actual work in this enumeration will be finished probably in May, Uncle Sam will not be able to state to the public at large the actual and final count of noses until late in December this year, and it is estimated that it will be some four or five years before further statistics will be forthcoming.

Invite your enumerator to a seat and give him a fair estimate in your answers, that's all we ask, and let him get on his way to that next place. This office assures you of proper and confidential handling of your filled questionnaires.

### MRS. JOHNSON HOME

Mrs. Alvis Johnson returned home Monday after a seven-month's absence, most of which was spent receiving medical treatment in Houston. Mrs. Johnson was accompanied here from Denton by her sister, Mrs. George M. Hopkins, at whose home she convalesced, following the series of operations. Her condition is reported to be good.

... Son of a gun ...

The new name of the neon sign area down around the bus station is "Neon Drive," the winning entry having been sent in by Jon Barton Dunagan, 10, fourth grade student. Second prize winner was sent in by Fred Adkins, and would call the area "Troy Patterson Addition." Troy Patterson being the name of the neon sign company that seems to have most of the Sonora sign business sewed up. Both entries won a free year's subscription to the paper and Jon Barton wins the picture of "Custer's Last Stand." All he has to do is come down here and haul it off.

Incidentally, everybody is getting in the act down on Neon Drive. Park Inn Cafe just erected two new signs atop the building -- but we were rather disappointed -- they don't flash on and off.

Professors are pretty smart people and usually we are scared to open our mouths in the august presence of one. But we read the other day where a professor at the University of Texas says that "square dancing can help prevent divorce because by learning to play together in active co-recreational sports, men and women will live together better." He may be right about some sports, but our idea, from observing some wives trying to keep their husbands straightened out in a square dance, is that square dancing should have caused more divorces than it prevented. (Not really -- we are only j-o-k-i-n-g.)

The report turned in Tuesday by the school evaluators is now in the process of being boiled down so that we can present it to you next week. All in all, the report was good, and spoke well of our school system.

The swimming pool will be open again this year and it is reasonable to expect a few polio cases in town during the summer. Last year, at the outset of the polio scare, many parents did not allow their children to swim in the pool. So most of the kids promptly went out to the nearest dirt tank and swam anyway. The pool is kept much cleaner and as long as a child does not get cold or too tired, his chance of contracting polio is very small.

Plenty of rain and cooler weather this week. We all like the rain, but it seems peculiar that, after spending a winter enjoying mild weather and finally becoming resigned to summer's approach, we should have winter thrust upon us. We blame the whole thing on the civil service system used by the weather bureau. Weather bureau people get their jobs by taking civil service examinations, and, once having got the job, don't have to worry about losing it; whereas, a politically appointed job holder does have to worry about losing his job. We think that if weather bureau people were appointed by the party in power they would be more particular about the kind of weather they give us. The way it is now, they just don't seem to care.

### CHARLES CUSENBARY WINS UNIVERSITY SPEECH CONTEST

Charles Lee Cusenbary, son of Mr. and Mrs. W. R. Cusenbary of Sonora, won first prize in the Intramural Extemporaneous Speaking Contest held last Wednesday at the University of Texas.

Cusenbary won over nine candidates with his speech on "American Economy, Boom or Bust in 1950."

### Soil Conservation District News

News of Edwards Plateau Soil Conservation District  
Prepared by Local SCS Personnel

Now that it has finally rained many cooperators with the Edwards Plateau Soil Conservation District are preparing to rest pastures. In order to take full advantage of the present moisture and also the bountiful grass seed crop last fall, as many pastures as possible should be deferred now. By so

doing, young grass seedlings will have a chance to become established before being subjected to grazing pressure.

At this time of the year, young grass plants are very palatable especially for sheep, and continuous grazing never allows them to get started. Due to this fact, pastures often fail to improve, even though fairly light stocked.

Grass plants are just like livestock -- the rancher needs to keep adequate replacements coming on or somewhere down the line he is apt to run out. He can purchase livestock replacements, but to obtain the grass seedling replacements it takes grass management.

Another factor that ranchers are finding important here in the district is the one of plant vigor.

Most ranges have been grazed continuously since last fall at least, and the summer grass plants are just now coming to life. A good rest now will allow these grasses to retain their vigor and strength, and assure the rancher of adequate feed production later.

A car pulls better after it is warmed up, and grass plants are the same -- they will produce better if allowed enough time to get "greened up" and put on plenty of leaf growth.

Grass plants live through their leaves, and a sure way to know them out of operation is to keep the leaves continuously eaten off during the growing season.

Since most ranches are stocked the year around, ranchers in working out conservation range plans with the Edwards Plateau Soil Conservation District have devised several means of managing their ranges to allow for pasture de-

ferments. Many cooperators, like Harold Schwiening Bill Wade, and others, completely rest one or more pastures from about this time of the year until late fall. The rested pasture is then grazed heavily during the winter.

Cleve Jones, Sr. rested his Taylor 1,000 Acre Pasture from April until November 1, last year, then stocked it at the rate of approximately 70 head of cows per section for the past six months. This rate would be equivalent of 35 head of cows on a year long or continuous basis. Jones states that the cows in this pasture did better than in any of his other pastures.

Even with this heavy winter use this pasture is still producing more feed than many which have been grazed continuously. The good grass cover left on the ground has held the moisture close to the surface and now helps retain the

maximum amount of the recent rains.

Another grazing practice being used is one of rotating the grazing from one pasture to another.

Jack Turney, Lee Fawcett and others "double-up" in one or more pastures, thereby resting others. This practice, when used following rains is very beneficial to the grasses and in addition forces livestock onto less desirable vegetation in the grazed pastures, thus penalizing the poorer grasses the same as the more desirable varieties.

Of course, many district cooperators use a combination of these practices. W. B. McMillan, Harold Friess and others completely defer some pastures for the growing season and then rotate graze the remaining pastures.

The main thing is to develop a grazing plan to allow for range improvement, and now is the time

**INVITATION — AND A CHALLENGE**  
"You never can tell till you try"—so we want you to try the 1950 Buick. And we especially want you to compare it with others. Drive any other car—then drive Buick and see what your money should buy in ride, room, handling and power.

**Only Buick has Dynaflo — and with it goes:**

**HIGHER-COMPRESSION** Fireball valve-in-head power in three engines. (New F-263 engine in SUPER models.) • **NEW-PATTERN STYLING**, with **MULTI-GUARD** forefront, taper-through fenders, "double bubble" taillights • **WIDE-ANGLE VISIBILITY**, close-up road view both forward and back • **TRAFFIC-HANDY SIZE**, less over-all length for easier parking and garaging, short turning radius • **EXTRA-WIDE SEATS** cradled between the axles • **SOFT BUICK RIDE**, from all-coil springing, Safety-Ride rims, low-pressure tires, ride-steady torque-tube • **WIDE ARRAY OF MODELS** with Body by Fisher.

What you really have here is a four-way forefront. A design that sets the coming style note—avoids many a tangle with the car ahead—makes handling easier—and costs less to repair.

And note that parking-light lenses, made of plastic and set deep in recessed sockets, are well out of harm's way—even when pushing a stalled car.

You'll find this bold front end only on Buick—as you'll find Fireball power, Dynaflo Drive,\* Buick's wonderful ride, and many another headline value only on these beauties.

Why not see your dealer now for the whole story—including the happy story on prices to fit practically any budget?

\*Standard on ROADMASTER, optional at extra cost on SUPER and SPECIAL models.

## 58 Years Ago

A pleasant picnic and exploration of the Felton cave, 12 miles south of Sonora, was thoroughly enjoyed Sunday by Mr. and Mrs. Jno. W. Hagerlund, Mr. and Mrs. Knausenberger, Mr. and Mrs. J.

A. Hagerlund, Mrs. Lee, Miss Lee, Mrs. Murphy, Miss Collins, Miss Alice Hagerlund, Messrs. G. Huber, F. Vander Stucken, Mark Baugh, Steve and Mike Murphy. Life is made pleasant by social amusements and with such auxiliaries as turkey, chicken, ham, pies, salads, cakes, fruits, coffee, etc., the zenith is reached.

The proposition is this, if the city of Sonora and Sutton County will contribute \$600, the M. E. Church will erect a church building to cost not less than \$1,200 and complete the same by June first 1893.

Ed. Dupree of San Angelo passed through Sonora with a bunch of horses Monday on his way to San Angelo. Lon Hemphill helped him through with them.

Jim Robson, of the stock firm of Robson Bros., who lost about 700 head of sheep by drowning near Dr. J. H. Coleman's ranch a few weeks ago was in Sonora Thursday for supplies.

John Trent with the A. G. Anderson (formerly from near Colorado City, but now of Pecos County) rams will remain in Sonora about one week longer. The

A. G. Anderson and California progressive sheepmen should see these rams before purchasing elsewhere.

Sonora Music Patrons Invited To Join Ozona Concert Association

An annual concert series, presenting the world's distinguished artists will be held in Ozona. The concerts will be sponsored by the Ozona Municipal Concert Association and Sonorans interested in music are invited to join. A special Sonora committee has been appointed to sell season tickets from April 24 to April 29. Members of this committee are Mrs. Bryan Hunt, Mrs. A. E. Prugel, Mrs. Herman Smith, Mrs. E. D. Shurley, and Mrs. Louie Trainer. Season tickets will be \$5 for adults and \$2 for students, plus federal tax. Mrs. Trainer said.

Patrons are advised that there will be either four or five concerts given depending on the number of tickets sold. The first concert will be held at the opening of the fall season, either late September or early October.

The Ozona Municipal Concert Association is entirely non-profit and co-operative. Membership privileges are open to everyone, adults and children alike. A membership campaign week will soon be announced during which the entire citizenry will be invited to join the association. By paying the annual dues, each member will be entitled to attend all the concert presentations without further admission charge. There will be no single admissions sold for any individual concert.

Ozona now becomes affiliated with other municipalities throughout the nation operating on this same municipal plan presenting outstanding and topflight concert attractions locally. At least three concerts will be presented during the season, and as many more as the association's budget makes possible. Inasmuch as the Ozona Municipal Concert Association is 100 per cent co-operative, the more members in the association the larger the budget, and therefore the greater number of concerts possible. No additional assessments will be made on the members.

The number of memberships in the association will, of necessity, be limited to the seating capacity

Mrs. Friend To Present Piano Students Tonight

Mrs. Batts Friends is presenting her piano students tonight at 8 o'clock at the Elementary School auditorium, in a recital titled "Preludes in Pastels." About half of the students appeared recently on a program broadcast over San Angelo Station KGKL. Appearing tonight are Martha

of the high school auditorium, and memberships will be available only during the one campaign week. At the conclusion of the designated week, the membership rolls of the association will be closed for the season. Everyone, therefore, is urged to watch for the announcement of the campaign week, and all are advised to secure their memberships then without delay.

EASTERN STAR PLANS INITIATION TUESDAY

Initiation ceremonies for three will be held Tuesday night, April 25, at 7:45 o'clock, at the Masonic Hall, according to Mrs. A. E. Prugel.

All local members of the Order of the Eastern Star plus a number of San Antonio visitors will attend, Mrs. Prugel said Thursday.

Drive safely! Observe stop signs.

**MUSIC CLUB HEARS DISTRICT LEADER AT BANQUET THURSDAY NIGHT**

Mrs. Robert B. Wylie of Abilene, president of Sixth District Texas Federation of Music Clubs, was a guest speaker at a meeting of the Sonora Music Club Thursday night at the Sonora Woman's Club. Before the meeting Mrs. Wylie was honored with a dinner at the Ka-Bar Club.

During the meeting Mrs. George Barrow presided and Mrs. Louie Trainer, first vice-president, was appointed to serve as general arrangement chairman for the district meeting of the music club convention which will meet here next October.

Mrs. H. B. Tandy of Ozona presented a plan for a community concert being sponsored by Ozona and asked the Sonora club to participate. The following members offered to solicit member-

ships here, Mmes. E. D. Shurley Bryan Hunt, Louie Trainer, H. M. Smith, Ben Cusenbary and A. E. Prugel.

Folk Dancing and Ballads" was the theme of the program directed by Mrs. Vestel Askew. Peggie Sue Reiley sang "Juanita" and "Red River Valley" accompanied by Mrs. Louie Trainer. The junior square dance club presented two numbers with Albert Ward, as caller. Those taking part were Nancy Hunt, Vicki Jo Savell, Elisabeth Street Betsy Ross, Bill and Shannon Ratliff, Connie Mack Locklin and Raymond Darrow.

Mrs. Ben Cusenbary and Mrs. E. D. Shurley were hostesses and served refreshments to 30 members and visitors. Visitors were Mmes. Tandy, Lowell Littleton, both of Ozona, Glen Pass of Del Rio, Wylie of Abilene. Armer Earwood, Gay Copeland, W. M. McMillan, H. Smyrl and Clay Puckett.

**MRS. DARROW HOSTESS TUESDAY AFTERNOON**

Mrs. Tow Darrow entertained with a bridge party Tuesday afternoon at her home. Mrs. Katie Brasher won high, Mrs. H. V. Morris won low, and Mrs. R. G. Nance won bingo.

Spring flowers were used as decorations and refreshments of pie, ice cream and coffee were served to the following: Mesdames W. O. Crites, Morris, Nance, Brasher, B. C. McGilvray, O. G. Babcock, M. E. Genrich, Tommy Smith, J. W. Trainer, Shelley Lowe, and Arthur Carroll.

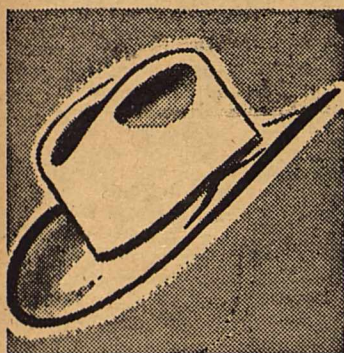

**W. M. DOUGLAS DEAD**

The Rev. and Mrs. Henry Marshall left Monday for Aransas Pass, where they visited their son and family, Mr. and Mrs. Charles W. Marshall. They returned home Thursday.

Mrs. Louie Smith is recovering from an operation performed Saturday in San Angelo.

Mrs. Robert Halbert returned Tuesday night from Stephenville, where she had gone to be with her father, the Rev. B. C. Huggins, who was ill.

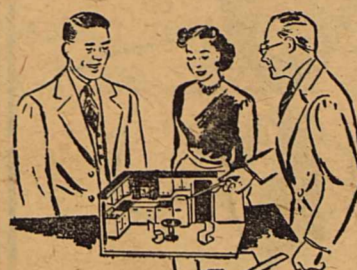

With Hotpoint Appliances -  
You Can Now Plan and "Build" Your All-Electric Kitchen on Your Dining Room Table at Home

When you start to plan an all-electric kitchen for your new home, or to remodel your present one, a neighborhood kitchen planning specialist or appliance dealer can help you "build" the new kitchen on the dining room table weeks and months before construction gets under way. He probably is no magician, but he brings the kitchen, including draperies and samples for floor covering, so that you may select everything from the room arrangement to the fittings. Today, Hotpoint, a leading producer of electric kitchens—and this includes planned home laundries—has outfitted thousands of kitchen dealers with miniatures of all the automatic pushbutton appliances that have been developed to save the housewife time and work.

The planning specialist will drop around in the evening when the family is together, carrying a little black suitcase. When the case of kitchen fittings is opened, the kitchen engineer opens his suitcase and pulls out a board divided into one inch squares made of linoleum or composition board. This is floor for the kitchen you are going to "build."

If you are building a new home you may have architect's drawings showing the room size, windows, doors and radiator locations. The visiting specialist takes these drawings and places walls which simulate your new kitchen on his miniature floor. If you are going to remodel your present kitchen he measures its dimensions and makes a floor plan on a pad of squared paper. "Constructed" you are ready to select and place the floor appliances and cabinets. There will be the refrigerator, the electric range—perhaps in the apartment house size as well as the standard; the sink enclosing the dishwasher or a separate dishwasher which can stand alongside the sink; a selection of base and wall cabinets in various sizes.

Among his aids for kitchen planning, the specialist will have diagrams which show three, or possibly more, basic kitchen designs such as the common "L" shape, the "U" shape; or, the kitchen in which the appliances

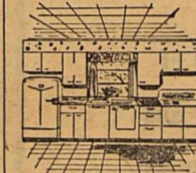

are arranged along opposite walls. After selecting the basic floor design for your appliances, you determine how each should be placed in order to create the greatest accessibility to other parts of the house and the outdoors. For example, the refrigerator will be located at the point nearest the door where supplies arrive.

Center Work Points

The range is frequently at the point closest to the dining room or eating nook. Most kitchen planners prefer to have the "clean-up center" because it can include the food disposal and automatic dishwasher—between these two points. Foods taken from the refrigerator usually go to the sink before they reach the range. This works in reverse as meal left overs are transferred to storage containers at the sink and then placed in the refrigerator. Also the center position of the sink makes convenient to both refrigerator and range.

U-Type Design

Wall-Type Design

Another point that the specialist will advise is to have a window above the sink. This not only permits better light for cleaning jobs, but also offers a view when you are doing chores at the sink.

When the floor layout has been settled, you select the wall-cabinets. There are different sizes for areas over working counters, the range and the refrigerator. The number of these handy storage units is limited only by the wall space available. In a well-planned kitchen the amount of space needed in the wall-cabinets should be determined to a considerable extent according to the specific appli-

ances. For example, should you select an 8 cu. ft. refrigerator you need a total of 24 cu. ft. of dry storage space close at hand for foods awaiting preparation.

Home economists at Hotpoint, Inc., have determined that a three to one ratio of dried to refrigerated foods make a very adequate storage center. The cabinets over and near the range should contain the condiments and such dry foods as cereals and others that go directly to the range from the package. Of course, the equipment and utensils used for cleaning should be near the dishwasher sink.

All the foregoing steps in building your kitchen on the dining room table can be accomplished in the same time it has taken to read about them, if you have no unusual complications.

The next, and probably as important as any other step in the process, is the selection of the colors and type of decorations you want to "personalize" your kitchen. You have two basic elements to consider—the floor covering and the tops on your base cabinets.

Change Color Scheme

The color scheme of your curtains and any decorative pieces that enter in are equally important but, unlike the floor and the base tops, they can frequently be changed. The floor and the cabinet tops will be with you many years if not for the rest of the time you may use the house; and they must have colors and patterns that you know you will enjoy living with.

Many of the larger department stores and home furnishings stores have divisions which not only supply floor coverings and drapes, but also take a complete contract for the appliances and all other fittings. This type of transaction has one advantage in that it assures you that a single "family of mechanics" will do the entire job. Also, you have to deal with only one merchant.

If you are going to build or remodel, by all means make inquiries about this "build-it-yourself-in-miniature" service. It takes much of the guess work out of procuring your new kitchen.

**THIS TASTES GOOD IN TEXAS**  
**Bean Loaf**  
 2 1/2 cups cooked red beans  
 1 cup boiled rice  
 2 eggs, beaten  
 1/2 teaspoon salt  
 1/2 teaspoon sugar  
 2 teaspoons grated onion  
 2 tablespoons melted butter  
 2 tablespoons chopped parsley

Mash beans and mix well with other ingredients. Turn into buttered casserole and bake in a moderate oven (350 degrees F.) approximately one hour or until a sharp knife inserted in the center of the loaf comes out clean. Serve hot with tomato sauce or chili sauce. Serves 6.  
 Tomato Sauce  
 1 No. 2 can tomatoes

1 teaspoon grated onion  
 1/2 teaspoon salt  
 1/2 teaspoon sugar  
 2 tablespoons butter  
 2 tablespoons flour  
 1/4 teaspoons Worcestershire  
 Combine first 4 ingredients and simmer 15 minutes. Pot through a strainer to remove seeds. Melt butter, blend in flour, and add tomatoes and Worcestershire sti-

This is the story of a historic bell, told by Harry Putman of the Cuero Record:

The bell originally was used on the steamer Reliance to sound the hours and to herald the approach of the little vessel into the harbor. It was in the summer of 1856 that the Reliance glided into the port of Indianola, then a thriving city on the Gulf coast of Texas. That night, fire broke out aboard the ship and it was destroyed, the bell going down with the charred hulk.

Lutherans of Indianola obtained permission from the ship's owners to try to salvage the bell, which was done, and it was placed in the steeple of the Lutheran Church.

In 1864, three Union gunboats bombarded Indianola and captured the city. Supplies were seized and soldiers climbed into the belfry and tossed the bell to the ground. Then it was carried to the beach to be shipped north to be made into bullets.

But, that night, members of the congregation, after obtaining permission from their pastor, slipped down to the beach, loaded the bell on a wheelbarrow, pushed it to a wagon and, after a journey, it was buried under the sand.

ring until sauce boils and thickens. Makes about 2 cups.

Mrs. Ella Wallace and Mrs. Libb Wallace were in San Antonio last week for medical treatment.

Mrs. Alan Saunders returned home Monday from a San Angelo hospital where she underwent an operation last week. She is improved.

A terrible storm swept down on Indianola in 1875 and, when a second disaster struck in 1886, the survivors decided to move inland and Indianola was abandoned. Many went to Cuero and when the Lutheran congregation built a church and it was found there was not enough money with which to buy a bell, George Wasserman told of helping to bury the bell 25 years before and offered to act as guide in its recovery. He led a party to the spot and the bell was dug up, and found to be only slightly tarnished.

It was placed in the steeple of St. Mark's Church, where it remained until 1894 when a member presented the church with a larger bell and the old one was used by the Cuero volunteer fire department. New equipment was installed in 1913 and the bell was consigned to the scrap pile.

Here it was discovered, some years later, by Joe Pannen, a member of the congregation. At his suggestion it was returned to the church as a gift and the old bell now hangs in the steeple of the handsome Saint, Mark's Lutheran Church.

**MISSIONARY UNION HOLDS MEETINGS WEDNESDAY**

Members of the Women's Missionary Union of the Baptist Church met in Circles for their programs Wednesday afternoon.

Circle Y met with Mrs. Boyd Moore with their topic "Christ Is Counting on Me" being presented by Mmes. W. O. Crites, Moore and Bob Odom. The opening prayer was given by Mrs. Odom, the devotional by Mrs. Lawrence Nichols and the closing prayer by Mrs. Nichols. There were twelve members present.

Circle O met with Mrs. J. P. Smith. The topic was "Today's Apostles Over the World." Mmes. Tommy Chenault and Tim McCoy were in charge of the program with the opening prayer being given by Mrs. Aubrey Ward, the devotional by Mrs. Smith and the closing prayer by Mrs. T. F. Kenemer. There were eleven members present.

Circle U met in the home of Mrs. Ben Berry for a mission program, with the topic "My Neighbor and I Introducing Jesus to Our Friends," in charge of Mmes. Alfred Cooper and J. E. Eldridge. Mrs. Eldridge gave the opening prayer, Mrs. W. L. Anthony, the devotional, and Mrs. Anthony gave the closing prayer. Circle U had eight members present.

**The Weather**

Wednesday	60	52	.00

The Rev. J. E. Eldridge returned Friday from a few days' vacation trip to Fort Stockton.

**NOTICE TO BIDDERS:**

NOTICE IS HEREBY given that the Commissioner's Court of Sutton County, Texas will receive bids at the office of the County Judge of Sutton County, until 10 o'clock A M on May 8th, 1950, for furnishing said County with one Diesel tandem drive motor grader with standard equipment, self starting and lighting systems, fully enclosed cab with safety glass. Complete unit weighing a minimum of 21,000 pounds, Diesel engine with minimum of 100 H P, delivered at Sonora, Texas.

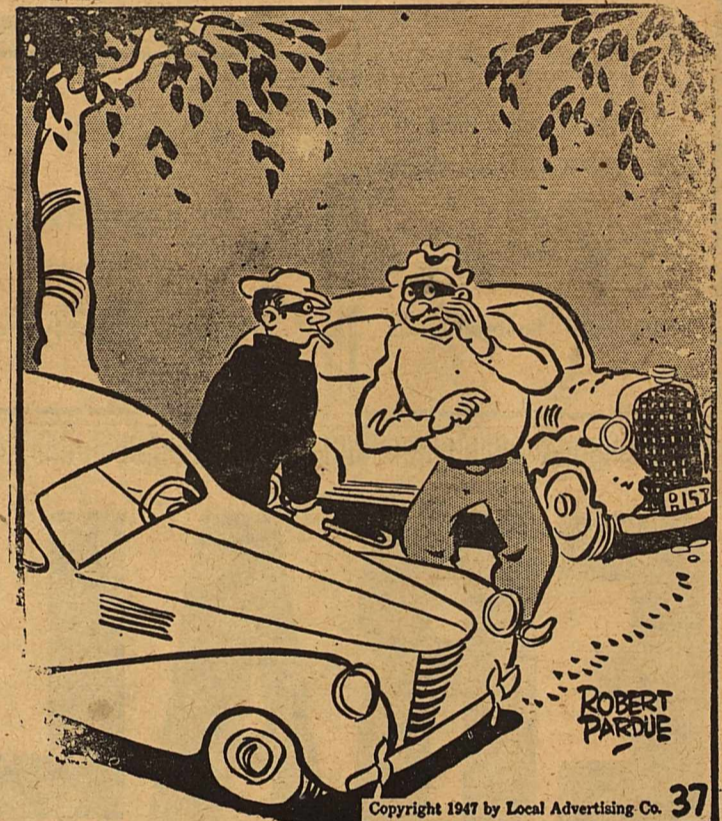

The Court shall have the right to reject any and all bids and bidders shall be required to give a good and sufficient bond in the full amount of the contract price, for the faithful performance of said contract, executed by some surety company authorized to do business in this State.

The successful bidder will be expected to take one No. 11 Caterpillar motor Grader as part payment of said equipment, and notice is also given that it is the intention of said County to issue time warrants for the payment of all or a part of the balance of the contract price of said equipment, said time warrants not to exceed Eleven Thousand, Nine Hundred & No/100 Dollars in total amount, to bear interest at the rate of three per centum per annum and to mature in one to ten years from date of issue.

GEORGE WYNN,  
County Judge,  
Sutton County, Texas.

Mrs. Mildred Saunders and daughter, Pamela, of Shawnee, Oklahoma, were the guests this week of Mr. and Mrs. H. C. Saunders. Mrs. Saunders is returning to Shawnee today, while her daughter will remain for a visit.

**CAR FIRE LAST NIGHT**

A faulty emergency brake was given as the cause of a fire in the Seth Lancaster car Thursday night about 10 o'clock. Mrs. Lancaster, her son, Joe Richard, and Connie Mack Locklin were returning to Sonora from the Rip Ward ranch when the fire broke out near the Del Rio highway bridge. Firemen answering the call reported damage as negligible.

As any woman knows, even the best perfume will evaporate into thin air if the stopper isn't replaced properly.

It's the same way with money. On payday, you feel so wonderfully wealthy — but suddenly, if you don't watch out, your cash seems to be vanishing into thin air.

There's one good way to put a stopper on money-evaporation. All you do is sign up for the Payroll Savings Plan where you work (or if you work for yourself, join the Bond-A-Month Plan at your bank) and a certain amount is deducted automatically from your salary.

It's painless—you'll never miss the money. It's safe—you've got Uncle Sam backing up your investment. It's profitable—\$4 for every \$3 after ten years.

And what a happy feeling to know that a part of your salary is tucked away for the future!

*Automatic saving is sure saving—U.S. Savings Bonds.*
