

**ANTELOPE HUNTING APPLICATIONS READY**

As applications for 1951 antelope hunting permits began arriving, the Chief Clerk of the Game, Fish & Oyster Commission announced additional data for sportsmen.

The exact number of permits to be issued has not been determined because the antelope herd census is still underway.

Persons who were assigned a permit last year in the impartial drawing for the 426 licenses issued have a low priority this year.

In the event there are more ap-

plications than permits, first priority will be given to persons who drew a permit last year but couldn't make the hunt and allowed the game department to assign an alternate.

Second priority will go to the person who failed to get a permit last year. Next comes those who held a valid 1950 permit and then, last, persons under 18 years of age and non-residents.

The first step in the procedure to seek a permit, according to the Chief Clerk, is to write the department for an application blank.

Then the applicant is sent literature describing the drawing and

regulations for the hunt, as well as a blank to fill out for return with his \$5 hunting fee. The Chief Clerk pointed out that no remittance should be forwarded until the routine data is received from the game department.

It was emphasized that members of hunting parties have a better opportunity of being assigned to the same ranch for antelope hunting if their applications are submitted clipped together.

The antelope hunt will be conducted in three consecutive 3-day periods beginning October 1 and ending October 9. The limit is one male antelope.

**Personal Notes**

E. W. Bridwell, son of Mrs. Bartie Lou Bridwell, is visiting his father G. B. Bridwell, in Wichita Falls for the duration of the summer.

Corky Schweining, Eddie Farrel Smith, Rayford Hull and George Barrow, Jr., have returned home after attending the summer term at Shriner Institute in Kerrville.

Mrs. J. A. Letsinger and children have returned this week from Grayford where she has been visiting her brother and family Mr. and Mrs. C. F. Crites.

Mr. and Mrs. Frank Franks and children of Victoria spent several days here last week visiting Franks' mother Mrs. Fannie Franks and other relatives.

**Cherry Tea Squares**

Ruby red cherries are happily employed as the colorful accent to delicious quick coffee cake squares. They're served at breakfast with bacon and eggs.

Those who take time for a good breakfast often say that they enjoy it more than any meal of the day. It's sound planning from a nutritional point of view, too. Like any engine the body needs refueling before work is demanded of it. Food experts say breakfast should supply from a fourth to a third of daily food needs.

Enriched breads are always included as a "starter" for the day because they provide food energy, protein for body-building, food iron and essential B-vitamins. With the great variety of plain breads, rolls and coffee cakes offered at bakeries today, breakfast can be interesting, colorful and well-balanced the year around.

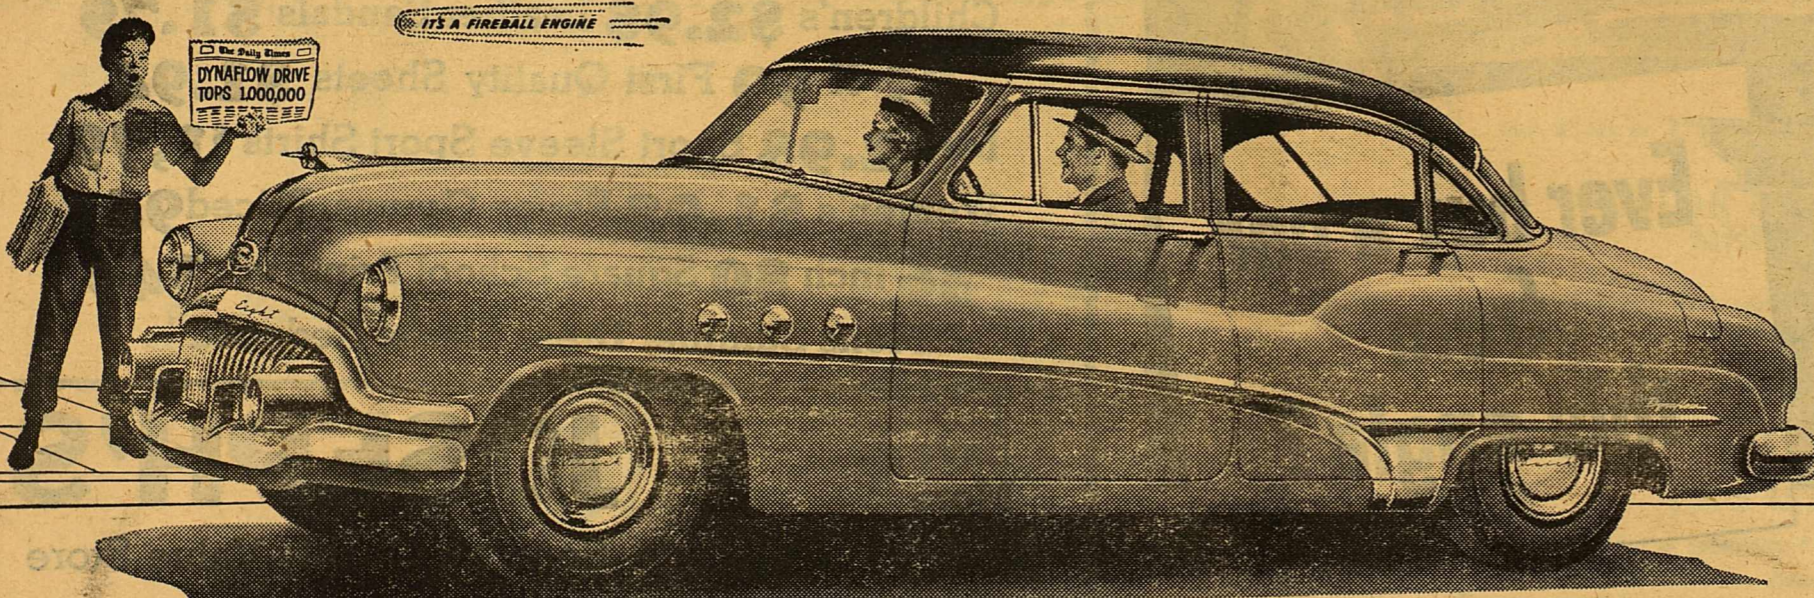

For example, quick coffee cakes can be changed to suit the season. Fluffy coffee cake squares are delicious flavored with fresh peach slices or raspberries for summer glamor. Often, you'll use spoonfuls of your favorite jam for an easy, colorful topping. In the fall you'll like to use drained canned cherries or pineapple chunks. The result in any case is a breakfast treat, and a happy "prescription" for vitamins and minerals.

Complete the breakfast menu with glasses of chilled fruit juice and the sunny-side eggs your man likes, and he'll give you a reputation as a wonderful cook.

**CHERRY OR RASPBERRY TEA SQUARES**

2 cups sifted enriched flour  
4 teaspoons baking powder  
1 teaspoon salt  
1/2 cup sugar  
1 egg, beaten  
1/4 cup milk  
2 tablespoons melted shortening  
1 cup drained cherries or raspberries or 1 cup fruit jam  
Confectioners' Sugar Icing

Sift together flour, baking powder, salt and sugar. To beaten egg add milk and melted shortening. Mix well. Add egg mixture to flour mixture, mixing only enough to moisten flour. Spread in greased 7 x 11 inch pan. With knife handle or teaspoon make hollows in dough 1 1/4 inches apart. Fill hollows with cherries, raspberries, or fruit jam. Bake in moderate oven (375°F.) 25 minutes. When cool, drizzle with Confectioners' Sugar Icing. Makes 1 tea cake, 7 x 11 inches.

**They Like it a Million!**

Last week Buick set a proud record. The millionth Dynaflo Drive\* was delivered to a happy owner. That's a new peak in popularity for modern drives which take you from a standing start to any cruising speed desired with a smooth, unfaltering swoop of power. "The biggest advance since the self-starter" is what the motorwise press called this Buick development back in 1948—and now a million owners can tell you how right that proved to be. Here, they found, was a basically different way of delivering power. It was the first drive to get completely away from any gears which function in a series of fixed stages—the first to apply supercharging principles that did new tricks with spinning oil. And how folks loved it! They loved the freedom from strain in traffic. And the new "sweetness" of ride which every passenger could enjoy. They loved the command it gives them of every traffic situation—and the relaxation it contributes to a long day's drive. They loved its extra safety in slippery going, and the improved control in mud and snow. As they piled up experience, they

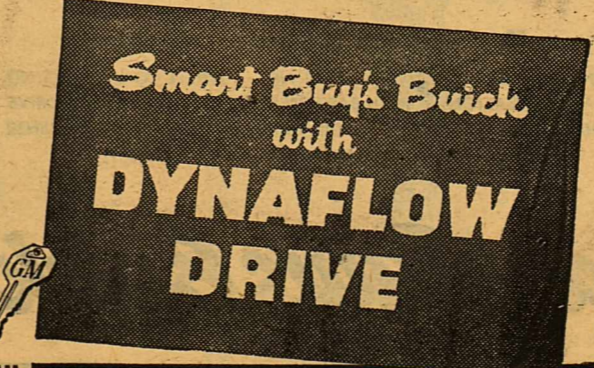

loved the unexpected savings of rear tire wear and the reduced strain on all driving parts, from engine to differential.

And finally—they loved what it does for the value of a Buick, as reflected in the extra dollars that Dynaflo\* adds to the resale price of a car.

Have you sampled this driving sensation?

There's no time like the present for discovering the thrills that more than a million Buick owners already know.

**Ever buy a car from this angle?**

**S**URE, a trim new Buick makes a mighty pretty picture when you see it in your driveway, or watch it wheel by.  
 But if you could get a mechanic's-eye view of this big, broad beauty as it sits on a lift, you'd see an impressive picture of rugged brawn that makes good-to-look-at Buicks give such a good account of themselves on the road.  
 You'd see the full-length torque-tube drive that firms the whole power relay system, and steadies your going like a giant hand beneath you.  
 You'd see big sturdy wheels with really wide rims that provide surer footing, give better car control, make tires last longer.  
 You'd see all four wheels cushioned by stout coil springs that are completely service-free, practically breakproof - and a principal reason for the ever-level Buick ride.  
 But mainly, you'd see the massive foundation that backbones every Buick -

the deep, wide, X-member frame that's rugged as a rock, and a brute for strength.  
 So when you look at the beauty of a Buick—the big mileage power of its valve-in-head Fireball Engine—and the moneysaving ability of its Dynaflo Drive\*—don't overlook the tough stamina that goes with it all.  
 And don't overlook the fact that a new '51 Buick, with all its heft, costs less per pound than any other car of comparable size, structure and weight.  
 Better come see us first chance you get—and find out what a smart buy this is—from every angle.

Equipment, accessories, trim and models are subject to change without notice.

**Improvement Of Pastures And Range Recovery Are Big Problems In State**

Improvement and maintenance of established pastures and recovery of the state's range land from nonforage growths are more closely associated in Texas than in other states because both are basic to problems in animal grazing. In order to identify and delimit the duties in these related fields the A. & M. College Extension Service is served both by a pasture and a range specialist.

Working mainly within areas of permanent or converted grazing lands, the pasture specialist through demonstration teaching, tours and other proved methods during 1950 sought to place pastures among farm cash crops. Among effective means to this end he encouraged the use of quality fertilizers, especially when seeding, and field trials of adapted varieties of grass. In connection with the latter, the specialist acted on behalf of the Texas Agricultural Experiment Station in distributing springs of coastal bermuda grass to more than 300 farmers in 71 counties.

During the year more than 70 pasture tours, instigated largely by county agricultural agents and other organizations identified with agriculture, were made with average attendance of about 50 persons. Fully on third of the formal tours

were followed by night meetings for discussion of pasture problems and showing of appropriate colored slides.

An irrigation pasture management school was taught at Lubbock from June 26 through July 11 with 19 county or assistant county agricultural agents completing the course. A pasture management school also was conducted within the year at Lufkin with 25 agents or assistants attending. During the course students were taken on tours of seven Experimental sub-stations. Meanwhile the specialist attended or participated in programs of several meetings within or beyond the state devoted to phases of agriculture.

Texas ranges are native pastures and the grass which finds foothold there has to strive for survival against the uncertainties of moisture and the creeping invasion of brush. According to the Extension Service range specialist about 65,000,000 acres of Texas range land are infested with mesquite and other varieties of noxious shrubs. The primary problems of management include brush invasion overgrazing lack of appreciation by ranchmen for a coordinated range management program. Despite the formidable and other situations demanding re-

ray, county agricultural agents under the leadership of the range specialist are attacking these problems principally through demonstrations.

In the field of brush control 1,321 demonstrations involving 402,512 acres were conducted in 126 counties, including mesquite work alone in 63 counties. Of this number, 16 county agricultural agents tested a new type hormone, 2, 4, 5-T esteh, by hand methods using cut surface, trunk and foliage treatment. A total of 604 demonstrations in proper stocking involving 2,000,000 acres were conducted in 111 counties, while 1,314,000 acres in 126 counties furnishes the operating field for demonstrations in deferred or rotating grazing for range recovery on behalf of 550 operators. More uniform distribution of livestock on ranges has followed construction of numerous wells and earthen tanks. At the same time fences have been built so that ranges can be utilized more uniformly and, accordingly, better managed. Meanwhile, agents supervised 1,610 range seeding demonstrations on 181,247 acres.

During the year county agricultural agents trained 4,200 4-H Club boys in 127 counties in plant and grass identification. Teams from 104 counties took part in 259 contests, while 36 range demonstration teams gave 86 performances on range management practices and principles, and 335 club boys in 56 counties carried range management demonstrations.

Four years ago a range school for county agents was set up with the aid of the Range and Forestry Department of the A. & M. College. The 1950 class brought to about 100 the number of agents who have attended. Agents studied range plants, ecology, plant succession and range management in the field, information important to the ranchmen and farmers they serve.

**THIS TASTES GOOD IN TEXAS**

Lemon Meringue Pie  
 1 1/2 cups sugar  
 7 tablespoons cornstarch  
 1 1/2 cups boiling water  
 3 egg yolks  
 3 tablespoons butter  
 4 tablespoons lemon juice  
 1 1/2 tablespoons grated lemon rind  
 Meringue: 3 egg whites; 6 tablespoons sugar; 1 teaspoon lemon juice, if desired.  
 Mix sugar and cornstarch. Stir in boiling water, cook over direct heat, stirring constantly until mixture thickens and boils. Set over boiling water and cook 10 minutes

longer. Beat egg yolk slightly; beat in a little of the hot mixture. Then into hot mixture in double boiler. Cook 5 minutes, stirring constantly. Remove from over hot water. Blend in butter, lemon juice, rind. Cool. Pour into cooled baked pine shell. Beat egg whites stiff but not dry. Gradually beat in sugar-continuing beating until mixture is stiff and glossy. Slow and complete blending in of sugar prevents beads of sugar on meringue. Add lemon juice at the last. Spread over cooled filling, sealing to edges of pastry. Brown in moderate oven (350 Deg. F.) 13 to 15 minutes.

**Personal Notes**

Visiting Mr. and Mrs. Leon Windham are Mrs. Windham's mother, Mrs. Della Stracener of Snyder, and brother, T-Sgt. Joel Stracener and daughter Carol of Lubbock, this week.

Cpl. Floyd Kile, Jr., was home on leave last week visiting his mother Mrs. E. A. Kile. He had just finished 8 weeks training course in leadership school at Ft. Reiley, Kansas. He is now stationed at Ft. Bragg, North Carolina.

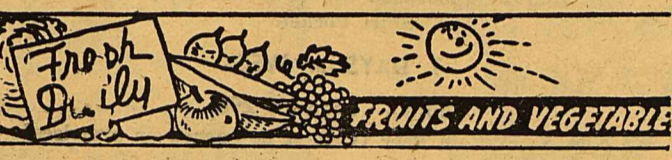

Mrs. John Varnell of Petersburg was here visiting her mother, Mrs. F. A. Kile last week.

Mr. and Mrs. C. S. Warren and son Wade were here last week from Big Lake visiting her mother Mrs. F. A. Kile.

Mrs. Bartie Lou Bridwell has just returned from a two weeks vacation in Dallas, Fort Worth and Houston where she visited her sister Mrs. P. O. Lesenne.

Miss Carrie Crites has returned home from Fort Worth, where she has been attending Parker High School.

### GRINDING GRAIN FOR LAMBS NOT PROFITABLE EXPERIMENTS SHOW

The practice of grinding sorghum grain for fattening lambs does not appear to be profitable.

No significant difference in gain for ground and unground sorghum grain was observed in lamb feeding tests conducted at the Ysleta Experiment Station in the El Paso Valley during the two years, 1947-48 and 1948-49.

An increased gain of only 2.2 pounds per lamb was obtained by grinding the grain. This experiment involved 876 lambs in four feeding periods which averaged 93 days.

In the same experiment, cottonseed cake was compared with sorghum grain plus cottonseed cake as a concentrate for lamb fattening. Practically the same rates of grain and feed utilization were obtained from the two rations. However, carcasses from the lambs fed grain and cottonseed cake graded higher than those from lambs receiving cake as the only concentrate.

A comparison was also made of 41 per cent protein cottonseed cake and 28 per cent protein whole pressed cottonseed cake as concentrates in a ration with alfalfa hay for fattening lambs. Differences in rate of gain, feed required to produce 100 pounds of gain and carcass grades were not significant.

Complete results of these feeding trials are reported in Texas Agricultural Experiment Station Bulletin 733, which is available from the Publications Office, College Station, Texas.

Mr. and Mrs. Artie Joy and sons John Wesley and A. Z. left Monday for Laramie, Wyoming where they will visit the University of Wyoming. A. Z. plans to attend that University this fall.

Mrs. H. C. Walters and daughter Barbara is in Lamesa visiting her parents Mr. and Mrs. W. S. Moore.

Attend SOME Church Sunday.

Personal Notes

Miss Wilma Elliot of Austin is here visiting her brother and family, Mr. and Mrs. L. W. Elliot.

Miss Eva Lee Moore and Miss Johnnie Johnson spent the weekend in Junction visiting the Preston Praters and other friends.

Will Behrens, father of Mrs. Ervin Willman, spent last week in Mason visiting relatives and friends.

Mr. and Mrs. Walter Fuller and children of Roswell, New Mexico and Mr. and Mrs. Arthur Fuller of Lamesa were here this week visiting their sister and family, Mr. and Mrs. G. W. Kisselburg.

Mrs. E. N. Williams and Mrs. G. W. Kisselburg were in Hale Center visiting Mr. and Mrs. H. T. Kisselburg last week.

Mrs. Mora C. Clark of Ft Worth is here visiting her mother, Mrs. M. S. Davis, and her sister, Mrs. W. E. Wallace.

E. W. Bridwell, son of Mrs. Bartie Lou Bridwell, is visiting his father G. B. Bridwell, in Wichita Falls for the duration of the summer.

Corky Schweining, Eddie Farrel Smith, Rayford Hull and George Barrow, Jr., have returned home after attending the summer term at Shriner Institute in Kerrville.

Defense is your job, too!

Searching our coastal waters for unidentified submarines, this Navy blimp pilot is constantly on the alert to protect American shores. His blimp carries the most effective airborne detection gear in the world, enabling him to pinpoint and track a target even when it is submerged. And he is doing a vitally important job in defense of America.

Defense is your job, too. And one of the best ways for you to do your part is by keeping yourself and your country economically strong. Buy U. S. Defense\* Bonds now and regularly. Go to the pay office where you work and sign up for the Payroll Savings Plan or join the Bond-A-Month Plan where you bank. But don't put it off—do it today!

The U. S. Defense Bonds you buy give you personal financial independence

Remember that when you're buying Defense Bonds you're building a personal reserve of cash savings. Money that will some day buy you a house or educate your children, or support you when you retire. Remember, too, that if you don't save regularly, you generally don't save at all. So go to your company's pay office—now—and sign up to buy Defense Bonds through the Payroll Savings Plan.

Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own automatically goes on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not \$25—but as much as \$33.33—if you just hold it the extra ten years! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's, too, buy U. S. Defense Bonds now!

\*U. S. Savings Bonds are Defense Bonds Buy them regularly!

The U. S. Government does not pay for this advertising. The Treasury Department thanks, for their patriotic donation, the Advertising Council and
