Rains Measuring Up To 1.70 Cover County During Weekend

By E. B. Keng

Welcome rainfall covered the Sonora area Friday night, dropping moisture that measured from .50 to 1.70 inches. Sonora received 1.10 inches, with heavier rainfall occurring in some areas both east and west of town. The rain was spotted, however, and many ranches received only a half inch.

Threatening cloud over the weekend resulted in a general shower Monday morning, leaving 20 to 60 points of rain over the area. Rainfall totaled 2.03 inches through April, which is less than half of the long time average of approximately 5 inches for the first four months.

The recent moisture has produced an immediate growth of grasses and weeds, but good general rains are badly needed

for continued production. Moisture carried over from last fall resulted in good winter feed for livestock, but there is little deep moisture left for summer growth.

Representative rainfall reports gathered by the Soil Conservation Service include the following amounts for Friday night:

Curt Schwiening 1.30; Fred Earwood .50; Hospital ranch 1.70; J. A. Cauthorn .65; Harold Friess .75; Herbert Fields .70; Paul Turney .65; Alvis Johnson 1.00; Tom Davis 1.50; W. B. McMillan 1.40; Harold Schwiening 1.60; Phillip Jacoby 1.00; Ben Meckel 1.60; Aldwell Bros. 60; Andy Moore (Thorp) 1.60.

Mr. and Mrs. L. E. Johnson, Jr., and Mrs. Sam Allison spent several days in Houston this week.

Lions Schedule Annual Broom Sale To Benefit Blind Tuesday, May 12

Sonora Lions will canvass the town Tuesday, May 12, as they hold their annual sale of brooms and other articles made by the blind of Texas. Funds from this sale go each year to the Texas Blind Caravans and to the local club for use in aiding the visually handicapped here and for other worthwhile community projects.

Lions President Harold Scherz has divided the organization into nine groups who will be assigned to various areas of the town. Groups are as follows:

Group 1: Charles M. Chamberlain, George E. (Bud) Smith, and Mat Adams.

Group 2: Tommy Smith, Allan Guthrie, and Jimmy Hugh Harris.

Group 3: Byerl Dillard, Herbert Fields and Gene Shurley.

Group 4: Jo W. Hardgrave, Joe Nance and Stanton Bundy.

Group 5: R. S. Teaff, Max G. Hardegree and W. J. Thompson.

Group 6: Lee Patrick, C. W. Taylor and George Barrow.

Group 7: J. M. VanderStucken, George Brockman and Hal Whitsett.

Group 8: Hillman D. Brown, Alanson Brown, and W. F. Berger.

Group 9: James Hunt, Nolan Johnson and Doyle W. Morton.

An Editorial

RANCHMEN, READ THIS --- THEN MAKE YOUR DECISION

(Ranchman Jimmy Powell of San Angelo recently wrote top government officials regarding the proposed regulations to place all agricultural labor under certain restrictions. The substance of Powell's letter we print here in editorial form.)

As we all know the Department of Labor has recently begun a vigorous drive to bring all agricultural labor, both family type and migratory, under a plan designed to regulate housing, minimum wage and maximum hours, transportation, working conditions, food and various other items. On May 1 the regulation will be published in the Federal Register and, if not contested with sufficient evidence in a June 1 hearing, will become law.

The ability of a bureau to create a law with so profound an implication without the consent of Congress by merely issuing an administrative order is not for the best interest of the Constitution of the United States if read in the attitude in which our forefathers framed these laws of the land.

Economically appraising the agriculture industry, it is evident that regulation and unionization of agricultural labor would immediately impoverish the entire industry beginning with the vast number of small farmers and ranches and before long subduing the larger ones.

A bit of logic and thought will

suggest that the industry cannot support such an extravagant regulation. To begin with, the Federal government is already spending ten percent or eight billion dollars of its national budget annually to keep agriculture on its feet. Second, a farmer or rancher in the past seven years has been lucky to average so meager a return as one percent after taxes on his investment compared to the three percent or more average return in the manufacturing industry. Third, the drought which plagued all of agriculture and drove many thousands of farmers and ranchers into debt is still existent in some parts of the Southwest. In areas that are recovering, the marks of the disaster are still present in the form of low productivity of fertile lands and heavy financial debt hanging over the people.

With these few glaring facts one can only conclude that any increase in agricultural expenses would knock the props out from under our basic industry, lowering agricultural productivity drastically, bankrupting many individuals, thereby increasing the burden of agriculture on the nation and possibly leading to a full-fledged depression.

The experienced agricultural laborer is scarce and the supply of jobs for him is excellent. Agricultural jobs are in competition

Fisher Speaks Out On "Give Away" Michigan Policy

By Congressman O. C. Fisher
MICHIGAN, one of the Nation's richest states, is in financial trouble. Under Governor G. Mennen Williams' direction, a souped-up high-tax welfare program has depleted the state's finances to the point approaching bankruptcy.

Unable to meet its current payroll, state employees must wait for perhaps months to get their pay. Schools are hard-pressed. Voluntary advanced payment of taxes by Ford and other corporations helped for a while but that money is exhausted.

Williams, cast in the modern-day role of Nero, has with CIO and ADA support placated the voters with hand-outs, social welfare and artificial prosperity, but the chickens seem to be coming home to roost. The goose that laid the golden egg appears to be a bit groggy. Maybe it is a lesson in disguise, sent to prove the truth of the old adage that you can't have your cake and eat it too—that the something for nothing philosophy is but a snare and delusion.

BOY SCOUTS OF AMERICA are now preparing for their 50th birthday anniversary in 1960. Its alumni of almost 30 million have added new words to our national vocabulary — "good Scout", "good turn", etc. Perhaps no organization or movement, outside the church, has done more to weld the nation's character and strengthen the body politic through the years.

A CARD from Henry A. Wallace, postmarked in South Salem, N. Y., plugs for the corn tassel as our national floral emblem. "What you are voting for is not your favorite flower", says the former Secretary of Agriculture, "but a Distinctive National Emblem, a floral symbol representing the power of the United States.

YEARS AGO

May 7, 1898

Sonora will be represented in the war with Spain by R. S. Holland, lately with Mayer Bros. & Co.; Frank Anderson, recently with M. O'Meara; H. D. Knee, who worked on the T-Half Circle ranch and with Robert English; Robert Adams, who has been employed on various ranches and has grown to manhood in Sonora. R. E. Holland, before coming to Sonora, was first lieutenant of the San Angelo Rifles. H. D. Knee served 8 or 10 years in the U.S.A. and was honorably discharged. W. S. (Frank) Anderson came to Sonora about six months ago from Tanglewood, Texas, where his father is a physician. Anderson and Adams are not known to have belonged to any military organization but are stalwart and capable and will soon be on the ropes. Knee,

Anderson and Adams joined the San Angelo Rifles and Holland was already a member of the company.

-1898-

A story of the jail breaking of one W. P. Pue, a young man arrested a few weeks previously for stealing a gun from W. W. Wellmaker, was carried. The man stole a horse belonging to John J. Ford and a new Cattle Queen saddle, said the story. Sheriff McConnell offered \$25 for the man and \$25 for the horse and saddle.

Miss Phillips' class in elocution will give their second entertainment at the school house Thursday night. A very interesting program of recitations, drills and music has been arranged and the evening will close with a one-act play entitled "Too Much of a Good Thing," of which the following is a synopsis: * * * *

-1898- T. D. Newell, proprietor of the Sonora Water Works, has completed the new reservoir on the hill which affords 235,000 gallons additional storage capacity. The total water storage capacity now is 330,000 gallons. But few, if any towns of similar size in the state or out of it, can make such a showing. This additional storage and the new hose nozzles put Sonora in first-class fire fighting trim.

The commissioners' court meets next Monday and it is suggested that the county provide a burial ground. The present cemetery is small and more land is urgently needed.

Clarence Fambrough has accepted the agency of Shipman and Anderson of Brownwood, the monument men.

Roy Jean Pope Bride Of Jack Johnson In Church Ceremony Here Saturday

Mrs. Jack B. Johnson

Roy Jean Pope, daughter of Mr. and Mrs. Roy Pope, became the bride of Jack Berry Johnson, son of Cliff Johnson, in a double ring ceremony performed by the Rev. Doyle Morton in the First Baptist Church Saturday afternoon.

Given in marriage by her father, the bride wore a white gown with full ballerina length skirt of organza and fitted bodice of chantilly lace. She wore a crown of seed pearls to hold her tiered fingertip veil of illusion, and carried a white orchid in a stephanotis shower and lace leaves with white satin streamers.

Mrs. Tommy Thompson, the bride's sister, was matron of honor. She wore a blue shantung sheath with pearl trim and blue accessories. Her corsage was white carnations. Billy Frank Turney served as best man.

Mrs. Alfred Schwiening, Jr., played traditional wedding music and accompanied Miss Alice Lee Daughtrey who sang "I Love You Truly."

The bridal arch was entwined with white chrysanthemums and lemon leaves, flanked on either side with tall white baskets of white gladioli, delphinium and blue daisies.

Mrs. F. M. Mayhew was hostess for the reception which followed the ceremony in the church dining room.

Mrs. Johnson is a graduate of Sonora High School and Durham's Business College, Austin. Her husband is a graduate of Sonora High School and attended San Marcos State Teacher's College. He has spent the past three years in the Air Force with one year in Korea. He is now stationed at Ozona Radar Station, where the couple will make their home.

**HIGH LIGHTS AND SIDELIGHTS
 FROM THE STATE CAPITOL**

Most people in or connected with the 56th Legislature are
 comforting themselves with the
 knowledge that air conditioning
 was installed in House and Senate
 chambers last year.

It may be pretty hot, they say,
 before a majority of both houses
 come to agreement on new taxes.

House members systematical-
 ly cut to pieces the big omnibus
 tax bill (HB727). As originally
 proposed, it would have raised
 \$300,000,000, mostly from scores
 of new selective sales taxes on
 items ranging from face paint to
 house paint. After members got
 through cutting out the things
 that brought the loudest howls,
 it was down to less than one-
 fourth its starting size.

It was then given preliminary
 approval (second reading) by the
 narrowest of votes, 74-to-72,
 counting Speaker Waggoner
 Carr's "yes" vote. Carr stepped
 down from the speaker's rostrum
 to plead with members to
 pass the bill, even though it had
 been stripped to practically noth-
 ing, so as to "get something to
 the Senate."

Senate cannot consider a tax
 bill until it has been passed by
 the House. But for the Senate,
 getting the shattered fragments
 of HB727 is like getting four
 wheels and some broken glass
 with the invitation to make an
 automobile.

TASK AHEAD—In the days
 that remain until May 12, or in
 special sessions thereafter, the
 Legislature faces these decisions:

1. Appropriations—House has
 passed a bill calling for
 \$322,000,000 in general revenue;
 Senate, a bill for \$302,000,000.
 Differences must be adjusted in
 conference committee, which
 neither presiding officer seemed
 in a hurry to appoint. This
 could mean some sort of agree-
 ment that there would be no
 final decision on the appropria-
 tions bill until a tax program
 emerges.

2. Taxes—Either house's spend-
 ing bill, with the deficit added in,
 would require something around
 \$300,000,000 in new tax money.
 This much, it seems certain, must
 be found, somewhere.

3. School improvement—Bakers
 of the Hale-Aikin Committee
 program will push for adoption
 of at least part of that program.
 It would add some \$100,000,000 a
 year to state expenses.

"COW BILLS" PASS—Senate
 has given final approval to three
 bills affecting ranches and dairy-
 men.

A milk bill, sponsored by Sen.

Grady Hazlewood of Amarillo,
 would prohibit bringing milk from
 other states unless it could be
 established that the milk was
 produced under the health and
 sanitation standards placed on
 Texas producers.

Sen Ray Roberts of McKinney
 pushed through a bill that would
 provide a penalty for allowing
 cattle to roam on state and na-
 tional highways and relieve moto-
 rists of liability for hitting stock.

A bill tightening licensing re-
 gulations of veterinarians also
 was passed by the Senate. Sen.
 Andy Rogers of Childress, spon-
 sor, noted that there is no pre-
 sent law to suspend licenses of
 veterinarians guilty of mal-
 practice.

WHAT'S THE USE—Senators
 refuse, 16-to-15, to take up Sen.
 A. M. Aikin's bill to improve
 schools and raise teacher pay.

Those who opposed and pass-
 ing the bill before tax money is
 found wouldn't bring a "crying
 dime" to the teachers.

Hopeful teachers could take
 some comfort from the fact that
 some who voted against consid-
 ering the bill said they would favor
 it when money is on hand.

Spring Rains

**Prove Benefit
 To Wildlife**

General rains throughout Tex-
 as during the past two weeks
 have brought on many favorable
 conditions for the benefit of
 wildlife, according to the as-
 sistant secretary of the Game
 and Fish Commission.

"These early rains will provide
 fine grass and cover for both
 birds and animals," he said. "This
 will be particularly good for the
 quail production, provided we
 don't get floods during the nest-
 ing season."

There was an exceptionally
 good carry-over quail crop in
 many of the areas of Texas dur-
 ing the past season, according
 to biologists. In areas, however,
 where additional stock is requir-
 ed there will be an ample num-
 ber of birds from the State game
 farm at Tyler.

"Now is the time for land-
 owners to place their orders for
 these birds," he said. "If they
 will contact their game wardens,
 the wardens can inspect their
 property and they can order the
 birds for future shipment."

The quail are sold to land-
 owners at 50 cent each for re-
 stocking purposes. This is ap-
 proximately half the cost of pro-
 duction.

They are not released in un-
 suitable areas, however. There
 must be sufficient cover and food
 possibilities to care for the birds.

In some places sportsmen's
 clubs have bought the quail for
 release on land where hunting
 privileges will be available in
 season.

 section in 1919 he made many
 friends and whenever he has
 business in the south he makes
 it his chance to visit these
 friends.

**Bow Hunters
 To Get Open
 Deer Season**

The Game and Fish Commis-
 sion has yielded to the request of
 Texas bow hunters for an open
 season in counties under regula-

tory authority, according to the
 assistant secretary of the Com-
 mission.

At the meeting last week a
 sub-committee of the Commis-
 sion offered the following resolu-
 tion, which was adopted:

"That a hunting season, for
 the use of bow and arrow, be
 provided for in each county
 under regulatory control of the
 Game and Fish Commission after
 the holding of a public hearing.

Such season to precede the gun
 season and where possible to
 provide for a period of time be-
 tween the bow season and the gun
 season. That such season not ex-
 ceed 30 days and not exceed the
 gun season.

"That regulations on the size
 and type of equipment to be used
 by the bow hunters be developed
 in cooperation with the organized
 bow hunters of the State."

May Flowers Bring Strained Backs, Home Accidents

Seed catalogs, rakes, shovels, hoes and trowels are usually the first signs of Spring. These precede the Bluebonnets, Dogwood, Indian Blanket, Jonquils, Redwood and other Texas flora. Close on the heels of Spring flowers, come strained backs, cut fingers, busted shins and assorted bruises. May is the month most closely associated with the last grouping.

Actually, according to the Texas Safety Association, most of the minor-sometimes serious-accidents of the amateur dirt gardener can be eliminated by (1) not over-doing one day's work, and (2) taking common-sense safety precautions.

Use the right garden tool for the right job, and until winter's dormant muscles begin to loosen up, don't work in the yard in long stretches at any one time.

And don't forget the dangers inherent in many garden insecticides, many of them are extremely poisonous and should be used and stored with the care recommended on the bottle or in the package—never permit small children to be around them.

Too, if the increase in use of power lawn tools continues this year, and there is no reason to think it won't, many many more Texans are going to suffer the sad experience of serious injury or death caused through mishandling such equipment. Most manufacturers provide safety instruction booklets with power mowers,

Devil's River Philosopher Says Fidel Castro Didn't Fly Into Washington To See A Barber

Editor's Note: The Devil's River Philosopher on his bitter-weed ranch on Devil's River tells what he knows about Fidel Castro this week. He's probably as accurate as he ever is, which is something we never know.

Dear editor:
I don't know any more about Fidel Castro than he does about me, but I have been reading about his success in winning a revolution in Cuba and have found that things are working out about like I expected.

I mean, putting down a dictator for another, is a highly commendable piece of work, but in these days, when you win a revolution or a war, your troubles are just beginning. Sort of like getting married.

I mean, sitting out in the Cuban jungles plotting how to overthrow a dictator is a definite piece of work, and when you finally get him overthrown and he flies off to another country with a few million dollars, and

clippers, etc. Read them carefully and follow their direction explicitly—to do so might very possibly save you many hours of pain or grief.

you get through riding in triumph down main street and sit down behind a desk and size up the job ahead, the situation loses a lot of its glamour.

Heading the dictator off at the pass is one thing, but finding the tax money to build the roads the people can drive around on enjoying the freedom you've just given them is another thing. Getting the deed to a piece of land is not the same as paying off the mortgage on it. Consequently, after Castro had been in office a few months, it didn't surprise me any to see him heading for the United States, and I don't think he was coming over here to see a barber. I don't think he came right out and asked for a loan, but when any government official in the world has a big job on his hands requiring a lot of money and he flies to Washington, you can be sure, was never kicked in the head by a horse.

What he was doing was proving he wasn't a Communist, as this is the main step these days

Eighth Annual Slow Down And Live Campaign To Start

More than 4-million Texas motorists will be asked to "Slow Down and Live" this summer and those who persistently ignore the request will find that, in many areas, stepped up law enforcement programs will forcibly remind them of it.

This summer will mark the eighth annual "Slow Down and Live" campaign, created by the Association of State and Provincial Safety Coordinators and conducted throughout the U. S., Canada and Puerto Rico. The Texas phase of the program will be coordinated by the Texas Safety Association.

Highway speed is the target of the program, which will begin on Memorial Day and continue through Labor Day.

"By speed we don't mean just speed above the legal limits, although that is a big part of the picture," explained J. O. Musick, Austin, TSA's general manager.

"The program hits at all dangerous or excessive speed. A motorist can be driving within legal limits and still be driving too fast for traffic conditions. For example: 40 mph in a 60 mph zone can be considered too fast in some instances, say during a heavy rain storm or near the scene of an accident. This is only one of many possible instances in which a driver might be driving at a legal rate, but driving excessively fast," Musick said.

Musick pointed out that the only person who has the answer to the speed problem is the individual driver himself.

"Through TSA facilities, numerous government agencies, local law enforcement, many Texas businesses and local safety councils, this program will attempt to constantly remind the individual of his responsibility in the Slow Down and Live campaign," he said.

They're so out of touch with the international situation they not only demand that you not be a Communist, they also check around to see if you're a safe risk. CHAMBER OF COMMERCE COMMENTS

By H. V. (Buzzie) Stokes
FLOWERS FOR THE LIVING: There are very few men who have seen more race meets than this writer. We have seen them from Ft. McKavitt to New York. We think the one just ended in Sonora is one of the best we have ever seen. To make it so, hundreds of hours of time was spent by local committeemen. We are going to dedicate this column toward calling your attention to many of the men who contributed so much to making this affair so successful.

Bob McCarver is President of the Sonora Park Assn. He was at all hours on the job making the plans click. Then there was Wesley Young, the head steward of the race meet, and Duke Wilson, head judge. These two guys worked like Trojans before and during the race meet at many jobs, as did Joe B. Ross, custodian of the horse barns. Others who put in many hours, beyond the call of duty, were Gene, Jerry and Sonny Shurley, Bustie and Bud Halbert, Bud Smith, John Fields, Andy Moore and many others. Gay Copeland helped in many ways and especially by making the Hangar available for

special events. Edwin Sawyer, Jack Mackey and Vernon Cook contributed much by installing television sets in front of the grandstand Saturday for the Kentucky Derby. Roy Cooper did yeoman service in printing the programs early but of all the people who worked very few exceeded the effort put out by the Boy Scouts and their adult leaders. They not only worked on the track on cleanup, but conducted a concession stand that kept a great number of people busy, sold cushions, programs and otherwise made themselves useful. Not only the boys were working but so were their dads and their mas. If they didn't make a bunch of money they deserved to.

We would like to pass out two compliments especially. One is to the people, those in attendance. We have never seen a better behaved crowd any where. The other is to the peace officers. They were on the job around the clock, were courteous to all and helpful in many ways. This includes our county officers, the City Marshall, Highway Patrol, Game Warden, Immigration Officers and visiting officers.

with jobs in the cities and oil fields. It is evident that their real wages are as good as or better than those of other laboring groups and in only very small isolated instances do you find difficulty of job procurement although it is temporary. With this in mind, you can readily see that no regulation of agricultural labor is needed or wanted by anyone connected with the industry in this area.

Therefore we must call upon our representatives to act immediately in our best interests by vigorously opposing and negating regulations amending provisions under the Wagner-Peyser Act for the employment of domestic labor and by vigorously opposing and negating the enactment of any legislation which extends the coverage under any wage and hour provision to agriculture or associated industries and further call off the Department of Labor which is evidently misinformed.
