Navy Man Killed In Car Accident

A car-truck collision five miles east on US 290 Saturday night left a California Navy man dead and his wife and small son injured.

Edward Charles Roberts, 18. along with his wife Kathleen, 18, and seven month old son, Christopher were eastbound when their car crossed the center stripe and collided headon with a "Mack" Truck Tractor and Semi-trailer driven by Charles Harrison Ojemann of Houston.

Roberts, driver of the car, was pronounced dead at the scene by JP Mat Adams. His wife and son were treated at Hudspeth Hospital and transferred to Shannon Hospital in San Angelo. Ojemann, driver of the truck was not injured.

Investigating the accident were DPS patrolmen Larry Hill and Archie Crenwelge. They were assisted by Sherrif A. P. Taylor and Deputy Mack West.

GRASSROOTS OPINION

BURLEY, IDAHO, SOUTH IDAHO PRESS: "The National Institute of Mental Health has used an experiment with a colony of mice to show that human society might be in trouble if all its problems were ever solved. When the mice were given the food and warmth of a perfect existence with no effort on their part, they became so lethargiceven toward reproductionthat the colony died out. There is surely a limit to how much we can rely on mice as stand-ins for human beings in scientific experiments, and this may be it. Still, these scientists may be on to something. The world has been waiting a long time for someone to invent a better mousetrap. Why not give mice all the cheese they can eat, and just wait for them to roll over dead from boredom?"

PERRY, FLA., NEWS-HER-ALD: "We all ... want prices to come down, but we're not so ready to have controls put on wages and incomes. If we are to stop inflation, control must begin at home-with the best kind of control there is, self-

control. ADAMS, N.Y., JEFFERSON COUNTY JOURNAL: "People in Washington just don't seem to catch onto the secret of high employment. It might be better to work for a little less than to continue crowded welfare rolls. Unemployment increased when the minimum was raised the last time, and it will increase when it is raised...this time, because many employers find they can do without some of the extra help. This is especially so in small communities."

OUAKERTOWN, PA., FREE PRESS: "The move to centralize collection of local taxes by a single agency, which means abolishing the local tax collector, perhaps strikes a nostalgic note to those who cherish our vesterdays, the yesterdays when local community affairs were handled by the local community. were quiet times, far less hectic than today and far less government. It was a time when the trolley passed freshcut fields, a time when the rivers were crystal clear and a time when the air was uncommonly clean. And now, unfortunately, the past is with us no more. The local tax collector, like the once-clean air, may vanish, vivid only in our memories.

NEW ROCKFORD, N. D., TRANSCRIPT: "Your tax dollars at work: two new office buildings and a parking garage in Washington, D.C. cost \$133 million. A lounge for House members only: new carpet \$32,000; new drapes, \$22,000; new chandeliers \$45,000. So you can see, the war on poverty continues."

For a number of years we have used a seat belt reluctantly but with reasonable good cheer. There was, however, no insistent little sneering mechanical device telling us we had to do so. We used the seat belt

The neighboring Department of Transportation had a pair of 75-foot poles. Peeved, HUD officials had two 80-foot poles erected. Cost to taxpayers:

Viewpoint

by T. DRISKELL

A friend of mine showed me an advertisement for a book which left me wondering, "What segment of American life it was an insight into?" The book was an Insurrectionist's Mannual. covering Assassination, Explosives, Igniters, Shaped Charges, Prussic Acid, Zip Guns, Silencers, and Evading Pursuit. Thirty delightful topics, with assurance, "If you can read it -- you can apply

It is by no means a unique

publication-so there must be apparently like all other things can be carried to an excess. It was all offered for \$5 postpaid (indubitably at the educational book rate). A publisher who unquestionably plainly has the good of the nation at heart, and to think I of all the time I have, vehemently spent contradicting foreign accusations that America's God is the almighty dollar. Obviously for a small segment of our population, I was "way off base".

This background of literature makes our economic question marks even bigger and more critical. Give us any economic upheaval and there will be a decided tendency for the readers of such "do it yourself" literature to surface and have a 'go" at it. Oddly enough, though they (the questionably oriented do-it-yourselfers) do not represent the greatest threat to you and me.

For years, we have been painted a huge lucid picture of the ogre Communism. The reds are a threat, it is true, but the threat they pose is not from the workers, but rather from the elite upper and high middle class so-called university intellectuals. Those intellectuals are, however, not supported by a viable mass of revolutionaries.

Given any sort of upheaval, and you can anticipate an increase of insurrection, sabatoge, and "loose-nut" revolutionaries. Then the real threat will emerge, on the pretext of restoring order, and demand that in the interest of restoration of order, personal freedoms be "temporarily" suspended. The seeds of fascism are indigenous to capitalism, hence the assumption that our greatest threat is really that we will fall over backward into fascism escaping from communism. To you and me, there is no difference, they are the same bag, and in terms of your freedom and mine-

they both stink. Let's agree to think twice before we give up our personal freedoms for any reasons whatsoever.

A Bishop Looks at Life

COLORFUL GUATEMALA

By Everett H. Jones, Retired Bishop of the Episcopal Church

Bishop Jones has been on a tour of Central America. This is his concluding report.) Antigua, Guatemala-We heard that Antigua was famous for its religious processions, especially during Holy Week. We were not able to be here at that time but we were fortunate enough, on May Day, to see a procession in honor of a local patron saint, Father Pedro de Bettancourt, a beloved benefactor devoted to the needs of the poor.

The procession emerged from the massive stone colonial La Merced Church amid the clanging of bells and the firing of guns and firecrackers. The leader was a Mayan Indian palying a shrill tune on a simple reed instrument. Behind him came crosses and banners, groups of devout men and women, and finally the consecrated host carried by a vested priest under a canopy. As the priest and his attendants left the church there was an explosion of noise, at which all in the procession and the hundreds of spectators fell to their knees.

The last contingent was a motley collection of local citizens who formed a band, including a very audible drum. Then, came a mixed group of ice cream vendors, souvenir salesmen, and interested hangers-on.

As the procession made its way thru the narrow, cobblestone streets of this ancient city it often marched over a bed of fresh green pine leaves (symbols of eternal life) and the famous hand-made "carpets". The latter were designs made of colored sawdust. Theywere laid by loving hands just before the march began. One, some twenty feet long, was formed in front of an old folks' home and paid tribute to these senior citizens. Another, still larger, was laid by a group from a nearby village as their offering for the occasion. In each case the sawdust design was sprinkled with water when complet-

As the above description will suggest, the word for Guatemala is "colorful". Its temperate climate produces trees and flowers in prodigal abundance. The enchanted visitor feasts his eyes on luxuriant isplays of bougianvillea, hibiscus, golden rain tree, jaca-

ed, to keep it from blowing

randa, poinciana, frangipani. The country is noted for textile weaving and for the variety of vivid colors and patterns in which the weaving is done. At a market such as we attended in Chichicastenango the crowded square is a riot of color, with representatives from each village dressed in the distinctive costume of that

In addition, Guatemala has a colorful history, which falls into three definite periods: Mayan, Colonial and Modern. Each of these deserves greater attention than is possible in this report.

Suffice it to say a few words about the past glory of Antigua. It was founded in 1542 and for over 200 years served as the capital of all Central America. In the 17th Century it was a center of wealth and culture rivalling Lima and Mexico City. In the 18th Century it had around 100,000 population, with the foremost university of Latin America.

This glittering era ended in 1773 when two earthquakes leveled the city. Three years later the capital was moved to Guatemala City. But Antigua has remained a major tourist center with the atmosphere of a fine Spanish colonial city. Even the ruins left by the earthquake have a charm and beauty carefully protected by the present generation.

The Devil's River Philosopher Sez.....

He Finds Far More Ramifications Of The Watergate Affair Than Foreseen

Philosopher on his bitterweed ranch on Dry Devils River comes up with what he considers another strange aspect of the Watergate hearings.

Dear editar: A lot of people are asking, how do you tell who's lying and who's telling the truth in the Watergate heaings? About 90 percent of the

time I can't tell you, but occasionally you can figure out, or at least estimate, when two witnesses are telling the truth. For example, one says the

other is a liar, the other says the former is a liar. It's possible both are telling the truth on that point. At any rate, the hearings

are certainly teaching me some things I didn't know be-

For example, one Senator, in raking a witness over the coals after he'd admitted he'd been caught inside the Democratic Headquarters at 2 o'clock in the morning with the burglar tools on him, said, "Look, here you are a man with two college degrees, didn't you have better sense than to pull a stunt like that?'

This puts an entirely new light on college degrees, one I'd never heard of before. I had always thought that a college degree was a report on how many courses you had passed, not how much sense you've got.

If colleges are paying any attention to the hearings they'll take immediate steps to stop the spread of the notion that a degree implies the holder is a sensible man. He can or he can't be, but the diploma is no index. That ain't what is's for, and it's wrong for the Watergate hearings to be giving out such a notion. While it looks like

Flappers Stay In **Fashion Foreground**

Flappers of the 20's and those svelte creatures of the 30's con tinue to make clothing news, according to fashion observers.

"They're independent and sharp-looking in today's double knits and wash-and-wear fabrics," Vivian Warminski remarked when asked for a word on fashion during May, Senior Citizens Month.

"More and more older women are wearing pant suits, which are fashionable and comfortable," the clothing specialist of Texas A&M University noted.

'And they find shirtwaist dresses, caftans, and cardigan sweater sets suitable -- to name

Fashion guides for older women are keyed to the same type of clothing they consider suitable for the middle aged woman with some variations related to figure changes, she

"They admit they like today's easy-care clothing, which adds to their self-sufficiency, but above all, they want smartly styled, attractive and comfortable fashions.'

The Indians of coaches Bill Savell and John Bell came into Little League park last week to pound out 29 runs in two games to sweep both games and take a one game lead over the Astros and Rangers. The Indians blanked the Rangers Tuesday 10-0 and came from behind in the last two innings to score 10 runs and overtake the Astros 19-11. Sharing pitching duties for the Indians were Cody Savel

by BOBBY JOE GRANGER

and Mike Lopez. The Rangers and Astros split both their games and fell one game behind. After suffering the Cardinals 10-0 loss to the Indians, the Rangers came up against the Cardinals and put on their best display of baseball of the year to beat the Cardinals 5-1. Gregg Tedford and Joey Kirby each pitched three innings to put the clamp on the Cardinal bats along with strong defensive

play in the field. The Astro defensive play and pitching suffered a slight lapse as the Astros allowed 28 runs to be scored against them. At the plate the Astros held up good as they scored 23 runs and hit the ball good. The Astros scratched out a 12-9 win over the Cardinals and then lost to the Indians 19-11. Benny Granger and Eddie Noriega carried the pitching load for

the Astros. The Cardinals fell deeper into the cellar as they lost both games. The Cardinals continue to play good ball but can't seem to win one. In Thursdays contest, the Cardinals played good ball, but only scored one run due to inability to get a hit in the crucial situations.

IT'S GREAT TO REALIZE THAT WHEN I PUT MONEY IN THE BANK, THE BANK OWES ME THE MONEY AND GUARANTEES MY RIGHT TO WITH-DRAW IT. THE BANK BECOMES MY DEBTOR AND I LIKE THAT. NOW WHEN I WALK PAST THAT BIG BUILDING WHERE MY MONEY IS KEPT I SAY, "HEY, YOU OWE ME MONEY!"

Stop in and open a Checking or Savings Account with us. The First National Bank would like to you money.
