Sonora Stars Nip San Angelo Team 10-9

By Bob Granger

The Sonora All Stars ended any hopes the Northern All Stars of San Angelo had of making a second straight trip to the state Little League tournament when they edged the San Angeloans 10-9, Saturday night at the local Little League Park.

After being held to only three hits and three runs through five innings of play, and trailing by a score of 6-3 going into the last inning, the local stars came roaring back in the top of the 6th inning to crack out five base hits and score seven runs to take the lead for the first time in the game 10-6. However, San Angelo wasn't through either as they scored three runs in the bottom of the sixth and had a serious threat going with the bases loaded when David Favila fielded a ground ball and stepped on third base to force a runner at third base and send the Sonora Stars against the

Pecos All Stars in the next game Friday night.

Through two innings of play, neither team was able to crack the score board. In the third inning Gilbert Samaniego blasted a towering home run with a runner on to send the Northern Stars ahead 2-0. In the fourth inning, San Angelo put three hits and a walk together to notch four more runs and take a 6-0 lead.

In the 5th inning, Sonora collected a couple of hits and two walks to score three runs putting the score 6-3. They held San Angelo scoreless in the bottom of the fifth to set up the wild sixth inning.

In the sixth, Sonora collected two walks after one man was out and banged out four straight doubles and a single to plate seven runs and go on top 10-6.

San Angelo didn't give up though as a single and hit batter put two men on base and Donald Cork stepped to

the plate and banged a three run homer to pull San Angelo within one run.

Although San Angelo was able to get three more men on base, the Sonora All Stars tightened up the defense and turned in some sparkling fielding plays to take the hard earned victory 10-9.

Gilbert Samaniego went all the way on the mound for San Angelo allowing eight hits and walking nine, to take the loss. Ronald Berkley went the route on the mound for Sonora, allowing 10 hits and seven men to get on base via the walk.

Sonora will meet Pecos Friday night, July 25, at Pecos. The game will start at 7 p.m.

Students Attend ACC Band Camp

Gary Wuest and Terri Simpler, members of the Sonora High School Band, have recently returned from two weeks of band camp at Abilene Christian College. This is the fourth year Wuest has attended the camp; the second for Miss Simpler. They were among the 280 students from all over Texas as well as Oklahoma that attended classes in band rehearsal, theory, twirling, drum majoring, rhythm, guitar, stage band and reed making.

Outstanding band students were presented medals and trophies for their efforts. Miss Simpler, who was eighth chair in the honor band, was awarded an honorable mention medal for clarinet class.

Wuest made first chair in the 100-piece symphonic band and was nominated for most outstanding bass clarinet.

Hi School Auditorium Renovation Approved

Plans for the renovation of the high school auditorium were approved at the regular meeting of the board of trustees held July 15. The architect, Augie Saxe of Houston, will re-check plans and estimates and report back to the board next month. The next step will be final approval of the plans and letting of bids on the project.

The board approved the contract with Region XV to supply media service and living science materials to the district for 1975-76 and accepted a bid from American Desk Co. for new student and teachers' desks for the high school. The First National Bank was named school depository for the years 1975-77.

Reports were received from

the superintendent on tax collections, budgets, statement of funds, and the maintenance program.

Resignations were accepted from John and Sue Butterfield, Cindy Kroeger, and Pam Bass.

The board approved contracts for Donald Paul, band director; Karen Beauchamp,

librarian; Rex Dale Ethridge, basketball coach; Betty Mitchell, math teacher; Lewis Ferguson, distributive education; Marsha K. Patton, junior high P.E. and coach; Connie Burrus, elementary; and Jan Ethridge, Title I.

New Section Of IH 10 Under Construction

According to District Engineer D. R. Watson of the State Department of Highways and Public Transportation, work will begin this week on construction of a new section of Interstate Highway 10 between Sonora and Junction. The job, seven

1965 SENIORS TO HOLD CLASS REUNION

Members of the 1965 graduating class of Sonora High School will hold a class reunion at the golf club park on August 16. Class members will hold a picnic and get-together and then attend the Sutton County Day Celebration. Former teachers and friends of these graduates are invited to attend the get-together.

miles long, lies mostly in Sutton County. Beginning in Sutton County 6.5 miles west of the Kimble County line, the job ends 0.5 miles east of the Kimble County line.

The contract, awarded June 20 to Allen Keller Company of Fredericksburg, is for \$6,247,552. Covering Stage I construction, which includes grading, structures, flexible base, and some two-course surface treatment, the project is expected to require about three years to complete. In some areas large amounts of limestone will be removed. State Department of Highways and Public Transportation designers, in an economy measure, have planned the use of this rock to manufacture the required flexible base material.

A pre-construction conference held July 17 in Sonora was attended by representatives of the Allen Keller Company, Sutton County, the Department of Public Safety, and the State Department of Highways and Public Transportation. Project organization, safety measure, and traffic arrangements were discussed. It was pointed out that there will be no interruptions of through traffic by construction operations except where necessary in making temporary connections, and that safety barricades and flagmen will be provided by the contractor during construction operations in the immediate vicinity of traffic movement.

The travelling public can expect very little inconvenience during this project, as most of present U.S. 290 will continue to serve as the route

(Cont'd on Page 8)

Samuels Youth Still Critical

12-year-old Johnny Samuels was still in critical condition Tuesday morning after suffering numerous injuries in a motorcycle wreck July 16. The youngster has been unconscious since the accident and is reported not responding to treatment.

The Samuels youngster is hospitalized in Hendrix Hospital in Abilene. The accident occurred three miles south of San Angelo on U.S. Highway 277. Also injured was the driver of the motorcycle, Thomas D. Wood, 15. Wood suffered a broken leg and arm and was treated at a San Angelo hospital and released the same day of the accident.

The two Sonora youngsters were enroute to San Angelo when the accident occurred. Department of Public Safety investigators said Wood and Samuels were in collision

with a car pulling a horse trailer. The driver of the car was not injured.

A collection to help the victim's mother, Mrs. Katie Samuels, defray expenses, is being taken at the Gulf Restaurant.

Young Samuels was chosen a member of the Sonora Little League All Star team and Saturday night's game against San Angelo was dedicated to him.

MRS. ALLEN INJURED IN HOME ACCIDENT

Mrs. Wilson (Berta) Allen of Bryan suffered a broken leg and ankle in an accident at the home of her daughter, Mrs. Bob Granger, Monday afternoon. She was taken to Shannon Hospital in San Angelo where she was to undergo surgery.

Brian Wayne Dietz was busy Monday afternoon getting his vehicles in tip top shape. Pepper [lower right hand corner] got cooled off, too, when his

master discovered him napping in the shade of a tree. Brian, 25 months old, is the son of Mr. and Mrs. Wayne Dietz.

Clarence Sisk, manager of the new Food Center, and Mr. Herbert Fields, owner of the store, were both on hand last Thursday, welcoming customers during the opening of the full line grocery store.

Machine Shop Opens In Sonora

Mr. Bill Keel has taken over the managership of a new Sonora business, Roger's Machine Company. The shop opened up Monday, July 14 and offers automotive parts, accessories, re-built parts, tape decks and speakers, motorcycle accessories, and other needs for garages and shops.

Rogers Machine Company has been in business in San Angelo the past twenty-one years and Mr. Keel has more than fifteen years experience with the company.

Keel brings with him his wife Cynthia and a daughter, Kristen, six years old.

The new Sonora business is located at 1020 S.E. Concho in the building previously owned and operated by Billie and Jeff Lambert.

No Parking Law Now In Effect

The no parking ordinance passed by the Sonora City Council at their July 7 meeting is in effect now, according to officials of the Texas Highway Department.

Work began on a large section of Crockett Street through town to enlarge the street to a four-lane. Sections of the street where the ordinance is in effect are from Martin Street to West 1st Street.

Persons violating this ordinance are reminded that they

will be found guilty of a misdemeanor offense and are subject to a fine of up to \$100.

Highway department engineers are also in the process of making a traffic count to see if activity on the street warrants traffic lights. City of Sonora Aldermen have asked for traffic lights at the corner of Main and Crockett Streets and at the intersection of Highway 277 South and Crockett Street.

Local Beauties Vie For Crown

Highlighting the first Sutton County Day Celebration, being jointly sponsored by the Sonora Jaycees and Jaycee-ettes, will be the crowning of the winner of the beauty contest.

Contestants will be rated by a panel of judges on poise, personality and beauty. There will be swim suit competition as well as the most fantastic legs award.

Twenty eight beauties have

been signed up thus far. Entrants will not be discriminated against due to race, color, national origin, marital status or age. It is hoped there will be many more entries before deadline time.

Business places, all oil and oil related companies, the Downtown Lions Club, the Chamber of Commerce and the City of Sonora have already signed up to sponsor one of the beauties.

Among those beauties already signed up as contestants are Bill Harle, Charles Graves, John Cotten, Hershel Davenport, Jim Garrett, Ken Braden and a number of Jaycees.

Anyone desiring to enter may contact Mrs. Scooter McMinn, Mrs. Gil Trainer, or any Jaycee member.

The contest will be held August 16

CB Radio Thefts Being Investigated

A rash of thefts of Citizen's Band radios are under investigation by the City of Sonora Police Department. Chief of Police Bill Webster said five of the radios were taken July 16 from locked cars.

Entry to the autos was

gained by breaking a window. All vehicles were parked around local night spots or motels.

Sunday, July 20, Melvin Glasscock of Glasscock Shell Station, reported to police that an ice machine located at

his station had been broken into.

City police arrested Ms. Judith Parker July 16. She was wanted by Brown County officials for forgery and passing and theft by check. She was later released to the Brown County Sheriff.

Theft Charges Filed Against Two Sonorans

Two Sonora men, Ernesto Guerra and Victor Lombano, are being held in Sutton County Jail in lieu of \$2,000 bond, on charges of theft.

The two were arrested Monday around 12:30 p.m. by Sonora City Police. They are charged with the theft of \$159.21 worth of groceries taken from the Foodway Store around noon on that same day. The men apparently carried the groceries out in grocery carts and stowed them in the trunk of their auto.

When city police discovered the stolen groceries they also found nine pairs of new boots and two pairs of shoes. After investigation it was found these were items taken during a burglary in San Angelo over the weekend.

Judge Mat Adams set bond on the subjects. They are also being held on burglary warrants for the San Angelo Police Department.

TDA Surveys Infestations Of Fire Ants

AUSTIN--Surveys to examine the extent of imported fire ant infestation in 52 counties are being conducted by crews from the Texas Department of Agriculture, Agriculture Commissioner John C. White has announced.

Ten teams will work this summer to document locations of the ants' cone-shaped hard mounds. Samples of the insects will be gathered for positive microscopic identification from Texarkana to San Antonio.

Austin To House Texas Law Center

The State Bar of Texas has been congratulated by the 64th Texas Legislature on the construction of a new Texas Law Center to be located within the Capitol complex. The resolution also recognized the State Bar's gift to the State of a Bicentennial Plaza and underground parking area.

Secretary of State Mark White presented a resolution to the State Bar during its annual meeting and convention in Dallas earlier this month.

The Texas Law Center, currently under construction in Austin at 15th and Colorado, will be officially dedicated on July 4, 1976.

A Bishop Looks at Life

By Everett H. Jones

Recently I have made a list of the ways I want something to happen instantly: instant hot water and a multitude of instant foods, an instant green light at an intersection, an instant answer to the telephone, instant service when I enter a store, an instant repair of my broken watch, instant news by radio, television and newspapers.

Doctors complain (rightfully) that we expect an instant relief from pain and an instant solution to what may be a complicated medical problem.

All of these forms of impatience are due to the amazing scientific and technological progress which enables so many things to happen faster than they did in former years. But this progress has had two bad results: we are kept in a state of tension and quick frustration, and we keep making impossible demands in areas where the results we want often require a lot of time and persistent effort on our part.

For example, how many of us have been demanding that our political leaders give us an instant solution to the problems of energy shortage, unemployment and inflation. We forget how long these crises have been in the making and in how many ways we are all responsible for them. We forget also how many similar problems we have surmounted in the past.

Moreover, as Ted Fehrenbach the San Antonio historian has reminded us, we need to remember the inescapable delays in the democratic process of government. (Dictatorships work much faster!) He writes: "In a free society, politics is and must be the art of the possible...Our swings from 'reform' to 'conservatism' in this country should be seen as evidence of our innate ability for self-correction..."

One vast strength of Americans has been our ability to date to avoid substituting, for too long, ideology for experience." On a still deeper level our constant desire for immediate results can become a stumbling block in our relationship with God. We often want a magical escape from life--its dangers, sufferings, limitations and question marks. In our haste and immaturity, we manufacture an illusory God, a sort of Celestial Magician who will wave his wand at our request and give an instant answer to our need.

When the answer to our prayer is delayed, when God makes His rightful requirement that we help answer the prayer by our actions and attitudes, we feel let down and angry. What's the use of a God who doesn't come at our beck and call? We pay Him back by ceasing to believe and to pray.

Jesus made clear in both his life and teaching that no earnest prayer goes unanswered, but the answer is in God's way and in His time.

A long time ago a wise man wrote: "Wait on the Lord: be of good courage and he shall strengthen thine heart: wait, I say, on the Lord." (Psalm 27:14.)

The Consumer Alert

by John L. Hill Attorney General

AUSTIN--During the recent legislative session, a new Texas Mobile Home Standards Act was passed to upgrade the industry, and to provide more protection for the large number of Texans who are turning to mobile homes for their housing.

The new law, which will go into effect on September 2, will lessen the chance of deception in manufacturing, sales, distribution, setting up and tying down of mobile homes.

Problems about mobile homes have been so numerous in the past that our Attorney General's Office set up a Labor Division, which handles the mobile home complaints. In the first 10 months of its operation, the Labor Division received 1,200 complaints about mobile homes.

The new law has several important features that should help to reduce consumer dissatisfaction. First, it adopts the construction and safety standards set by the federal Housing and Urban Development Department, and authorizes the Texas Department of Labor and Standards to enforce these standards.

It also requires that any mobile home manufacturer must be licensed by the Department and hold a certificate of acceptability in order to do business in Texas. It will be against the law for a dealer to sell any mobile home manufactured after September 2 if it does not meet the standards, have a State seal of approval from the Department, and if it was not manufactured by a holder of a current certificate of acceptability.

A new minimum one-year warranty is provided under the law, and both manufacturers and dealers are jointly responsible for meeting a warranty claim. If a dealer or manufacturer fails to comply with a warranty, it is considered a deceptive trade practice.

THE DEVIL'S RIVER PHILOSOPHER SEZ.....

He's Sorry For Benjamin Franklin's Short-Sightedness 200 Years Ago

Editor's note: The Devil's River Philosopher on his bitterweed ranch on the Dry Devil's River discusses economic theory this week, sort of.

Dear editor:

You take a man like Benjamin Franklin, how was he to know 200 years ago that his notions about thrift would eventually be bad for the economy? That "a penny saved is a penny earned" is a theory that produces a nose-dive in the Gross National Product?

You see, according to an article I read last night, economists have been cheered because consumers, after holding back for three months, have now gone forward to buying more on credit. The Federal Reserve Board reported that consumer debt rose for the first time in three months, reaching 185 billion dollars, a gain of over 3 billion.

"Economists have pegged hopes for a significant recovery from the recession to a revival of consumer confidence and spending," the article said, and this jump, or plunge as Backward Ben Franklin might put it, in total indebtedness, is highly encouraging.

This theory shows why farmers for instance every time they go in debt to make a crop that loses money are strengthening the backbone of the economy.

It shows that the Federal government, now over 300 billion dollars in debt and going in deeper all the time,

is lighting the path toward economic recovery, and coming along with flashlights of their own are state and county governments. Take New York City for example. Clearly it has taken the lead in pushing for a healthier economy.

I feel sorry for Benjamin Franklin, but you've got to remember he had no way, looking 200 years down the road through those primitive spectacles he wore, to see that a solvent man is a road-block to economic recovery, that refusing to spend actually is sabotaging the economic machinery.

But he was a smart man, he could adapt to change and new ideas, and if he were around today, no doubt would be saying "a penny saved is a monkey wrench thrown."

By the way, do you sell subscriptions to The Devil's River News on credit? Aren't you in favor of whipping the recession?

Yours faithfully, J. A.

Cecil Westerman

Fire & Automobile Insurance

We're proud to be below average.

Table with 2 columns: City and Rate. Philadelphia \$23.75, Baltimore \$23.48, Washington, D.C. \$22.22, San Antonio \$20.60, St. Louis \$19.79, Austin \$19.10, Chicago \$17.89, Milwaukee \$17.54, Houston \$15.95, Cleveland \$15.81, Los Angeles \$15.69, Detroit \$14.72, New Orleans \$14.49, LONE STAR GAS SYSTEM \$14.41, Indianapolis \$14.14

Your town may have a general service rate above or below the average rate listed above. Rates differ in all the towns we serve, because each town has a unique gas distribution system and has different revenue requirements.

We know your gas bills have been rising steadily in the past year or two, and they'll continue to rise. The average price Lone Star has had to pay for gas supplies has risen more than 250 per cent during the past three years, and some of this increase has been passed on to our customers.

Lone Star has been consistently able to supply our customers with natural gas. Other parts of the country are having severe problems in obtaining adequate supplies of this premium fuel, and we're working hard to prevent those problems here in our area.

In fact, the average rate in cities on the Lone Star Gas Company system in Texas ranks among the lowest general service gas rates in the country for residential and commercial customers.

These rates are based on a recent comparison by Lone Star Gas. The rate you see listed for the Lone Star Gas system is based on the average of all general service rates in the 410 incorporated cities and towns we serve in Texas, and are based on 10-thousand cubic feet of natural gas used by residential customers on June 1, 1975.

Picnic 'Pick-Me-Ups' To Try

A summer picnic can be a delightful change of pace for the entire family, and a few special touches can make picnicking easier and more fun for everyone.

Pack all picnic items, including food, silver or plasticware, paper plates and napkins, plastic glassware and cups, in a large tote basket. It's much easier to find everything if it's all together.

Try making hamburgers ahead. Form patties, add salt and seasonings, chopped onions if you like, wrap them in foil (6 to a package with Cut-Rite wax paper in between the patties to prevent sticking together) and freeze. By the time you arrive at your picnic spot and get the grill going, the hamburgers should be thawed and ready for cooking.

Fresh corn-on-the-cob makes a picnic perfect. Don't try to pick off the corn silk—take a damp, clean white Scott Towel

and rub downward on the ear. The strands will come off easily.

Take along colorful Scott placemats and decorated Viva napkins. Because they're paper, they can be tossed away in the trash can when the picnic is over for less clean-up and less to carry home.

Kids and picnics often add up to messy hands and faces. Take along plenty of damp, clean paper towels in a plastic bag for sticky fingers and faces or anything else that needs a quick wipe.

Hurricane lamps make an ideal centerpiece for picnic tables. They're colorful and particularly useful as the picnic runs into the late evening hours.

Be considerate—clean up after your picnic so the spot will be nice for others. Put all disposable items in a trash barrel. If no trash barrel can be found, take your trash home in a plastic bag for disposal.

4-H Dog Show Set August 16

Texas 4-H'ers will be showing off their canine friends at the fifth annual State 4-H Dog Show at the Bellaire Recreation Gym in Houston Aug. 16. Both purebred and non-purebred dogs may be entered in the show. Entries must be in by July 28 to the Texas Agricultural Extension Service District 11 Office, 301 North Main, Bryan, Texas 77801. 4-H'ers may enter a dog in each of the three divisions of classes—conformation, obedience and showmanship. There will also be drill team competition and special classes. All dogs must have a current vaccination certificate.

Butterfields Honored

Members of the 7 at 7 Bridge Club met at the ranch home of Mr. and Mrs. Bill Savell Friday night for supper and bridge. Club members Mr. and Mrs. John Butterfield were presented with a going-away gift by the club. Mr. and Mrs. Joe Lane won the traveling prize in bridge play; Mr. and Mrs. Joe Neil Smith won high, and Mr. and Mrs. James Alexander took the bingo prize.

SS Representative Sets August Visit

Garland Gregg, social security representative for the San Angelo Social Security Office, has scheduled his August visit to Sonora. He will be at the County Courthouse on Thursday, August 21 from 9:00 a.m. to 11:00 a.m. Anyone who wants to file a claim for benefits, get information, or transact other business with the Social Security Administration may contact him at this time.

If you have recently married and haven't changed your name on your social security card, contact the Social Security Office located at 2214 Sherwood Way (P.O. Box 3808) in San Angelo, Texas. Residents of Sonora may call toll free by dialing "Operator" and asking for "Enterprise 2058".

Luncheon Honors Mrs. Butterfield

Mrs. Clayton Hamilton and Mrs. George Wallace were hostesses last Friday to a luncheon honoring Mrs. John Butterfield. Twelve persons were in attendance. The Butterfields will be moving to Hobbs, New Mexico in the near future.

Some people believe that dropping a knife will bring on a gentlemen caller.

Mrs. Willie Gutierrez, nee Rosa Santos
Sarah Allison, bride-elect of Robert Post
Diane Langhamer, bride-elect of David Wuest

He is a mighty small man—almost too small to leave his footprints in the sand. But he is starting out on his own. He is exploring, seeking, learning. Where will his footsteps ultimately lead him?

There are so many courses a child may take—so many that a person of any age can follow. But it is never too late to change direction, even if it seems as if a dead end has been reached. The beauty of life is that the word itself is synonymous with hope.

If the direction your footsteps have been taking you is disappointing, then turn toward the Church. Remember, the Church has survived for centuries against odds that would have annihilated a lesser force. That in itself is reason enough to give it a chance—to see what it has to offer.

MELON MELANGE—Cool, refreshing melons are at their peak during the summer. Delicious when sliced and eaten plain, they also adapt well to some fancy touches. For Melon Melange Texas Department of Agriculture home economists combined watermelon, canteloup and honeydew balls and a liqueur syrup for an elegant dessert.

MELON MELANGE

1 cup sugar
1/2 cup water
1/3 cup orange liqueur
Watermelon
Canteloup
Honeydew
Combine and bring to boil sugar and water. Remove from heat and add liqueur. Prepare melon balls or diced melon from watermelon, canteloup and honeydew. Just before serving, pile melon balls in large serving bowl and pour liqueur-flavored syrup over fruit. Yield: 8-10 servings.

For additional recipes write Commissioner John C. White, Texas Department of Agriculture, P.O. Box 12847, Austin, Texas 78711.

Coffee Break

By Shirley Hill

A number of people have been dropping by trying to pay 15c for the Devil. Prices will not increase until September. Of course subscriptions will be due September 1 and if you pay them now they will be the new price. But still newspapers are a unique product which could sell for much more. What else can you buy in this day and age for 15c??

Then too you have to take into consideration the many, many uses of a newspaper. Now everyone knows that they are more commonly used to wrap fish...but what about starting fires, bird cage linings, fireplace logs, shreds for dog and cat beds, packing dishes and other breakables, making patterns, party hats, and Christmas decorations, lining garbage cans, making paper dolls, mulch for plants, and they are even used by painters??

See what you're getting for your money? --SKH--

Congratulations to Bill Savell and the Sonora Little League All Stars. They travel to Pecos Friday after defeating a confident San Angelo team Saturday night. Little league is a highly competitive sport that is enjoyed each year by countless young men and a few young ladies as of the past years. This brings to mind a poem copied from a Boy's Ranch newspaper I received some time back.

REMEMBER.... HE'S JUST A LITTLE BOY He stood at the plate with

New Arrivals

Born to Mr. and Mrs. Will F. Whitehead in Methodist Hospital in San Antonio July 15, a son, Brady Cooper. He weighed eight pounds and one ounce.

Grandparents are Mr. and Mrs. Roy Cooper of Junction and Mrs. F. C. Whitehead of Del Rio. Mrs. Alfred Cooper of Sonora is the great-grandmother.

The Whiteheads also have another son, Bo, who is three and a half years old.

Wagners Feted On Anniversary

The Rev. and Mrs. A. B. Wagner were honored Sunday evening with a surprise party in celebration of their 47th wedding anniversary. The party was hosted by friends and members of Hope Lutheran of Sonora and Faith Lutheran Church of Ozona.

Friends from Eden were also included along with Mr. and Mrs. Frank Bond and Mr. and Mrs. Ben Cusenbary.

Cake, punch, and coffee were served.

A money tree, in the midst of an arrangement of pastel zinnias, was placed at the entrance of the church and presented to the honorees at the close of the reception.

WILSONS TOUR EASTERN STATES

Mr. and Mrs. Elmer Wilson and grandsons, David, Steve and Larry Jennings, recently returned from an extended trip through ten Eastern states. Highlights of the trip were visits to Opryland, Washington, D. C., Disney World and the Everglades.

News Letter

By Bob Krueger

One of the most vexing economic problems facing our nation is the combination of inflation with recession. Among the many explanations for this problem, I'd like to offer my perspective.

When this country was founded, settlers moved into an area, cleared it, planted and grew crops, and then moved on to new locations when the land was ruined. Toward the end of the century, our abundant lands began to play out, and we turned increasingly to technology to allow the continued improvement in our standard of living. By the time of World War II, our extraordinary industrial capacity and our unified labor force allowed us to create and mobilize an immensely

powerful force, and to emerge from the war undisputedly, the world's industrial and economic leader.

Since that time, however, the output per person in the U.S.A., which had for a number of years greatly excelled that of any other country, has begun to decline. The reason, I believe, is that we have put too much into immediate consumption and not enough into planned investment and capital formation—the ingredients for a healthy economy for the next generation. The early settlers knew that they could not consume all of their corn at the table; they had to have seed corn in order to plant for future years. The need is no different today.

During the Great Depression, we stimulated the economy by stimulating consumption; an economic theory urged by Keynes. But any economic theory has its limits, and we need to recognize that simply stimulating consumption is not

enough to deal with the needs of future generations.

One reason that we have combined inflation and recession (especially unemployment) is that our plant capacity is not sufficient to absorb our full work force. If enough capital is not invested in the future, then our productivity does not rise as fast as it should, and shortages occur. We now see shortages in areas such as steel, energy, mining, and many sectors of manufacturing. The American government, by consistently overspending (our government has run deficits in 14 of the last 15 years), has dried up our capital markets and has discouraged investment for future generations.

Japan currently invests twice as much as does the United States, and its gross national product grows at twice the rate of ours. Further, the growth in productivity of the Japanese worker has been three times as great as that of the

American worker in the past thirteen years. Merely stimulating consumption will do nothing for long-term economic growth unless a significant portion of spending is directed toward increasing the productive capacity of the nation.

If there is a moral for us in our experience of combined inflation and recession, it is that we must give attention to seed corn as well as table corn. We cannot simply live for today and for ourselves without thinking of the needs of our own future and that of our children. Not only must the government cease spending more than it takes in, but it should follow tax policies that encourage thrift, discipline, and hope, all values that immigrants who settled this country cherished very dearly.

Our pending shortages of natural resources such as oil, iron, aluminum, copper, mean that we must continue to invest in improved technology in order to pay for the natural resources which we will have to import. If we confront this task openly, with a sense of responsibility, both to ourselves and to the next generation, and if both citizens and political figures are willing to act in the interests of the long-run rather than the short-run, we will be able to work together toward an attitude of responsible statesmanship that seeks to combine foresight, experience, hope, and courage. Investment in the future need not be an instrument to setting class against class, or of using the values of the rich at the expense of the poor. Rather, it requires a responsible attitude toward both the present and the future.

Red tape is so called for the practice of tying official documents with tape of that color in 17th century England.

White's Auto Sonora, Texas

Sheep and Lambs Fed in Texas Down 2 Percent

The number of sheep and lambs on feed in Texas as of July 1 was down two per cent from a year ago, Agriculture Commissioner John C. White has announced.

Following the pattern of previous years, there was a significant drop in the number of animals going into drylot feed operations between March 1 and July 1. This drop is the result of better grazing conditions and reduced demands for sheep and lambs.

The 1975 drop was 26 per cent, from 170,000 in March to 126,000 on July 1. This compares with a 48 per cent decrease in 1974 when the totals fell from 240,000 to 129,000.

Marketings of fed sheep during March through June were 26 per cent below last year. Figures dropped from 219,000 in 1974 to 162,000 this year.

Current marketing intentions for the next three months call for 48,000 head to be placed on feed in July, 47,000 in August and 31,000 in September. However, final figures could be substantially higher because additional lambs will be placed on feed early in the period and marketed later in the period.

TIPS FOR OUTDOORSMEN

by Vern Sanford

When it comes to enthusiastic angling by fishermen of all ages and all ranks of life, crappie seekers undoubtedly head the list.

You'll find these anglers active day and night, sometimes seven days a week. Not just one or two boats at a time either—but dozens. Often they are huddled, two, three or four persons to the boat, in the same area. There's nothing clannish about crappie fishermen. They really stick together.

They're sometimes called brush fishermen. Once they locate a "hot spot", whether it be among a forest of trees or in the center of a clear lake, that's where they hie to enmasse.

You'll find these anglers sitting in a boat, almost hidden by shrubs and tree tops that protrude from the water.

You'll find them nestled far out in the clear, wide

waters. Or so it seems. But far below there's plenty of brush. They just may have anchored over an island. In fact, if brush wasn't there, the crappie wouldn't be — for crappie are seldom found elsewhere.

Crappie are fidgety fish, dashing here, there and everywhere that they can find safety from marauders. Which brings us back again to brush.

Crappie are popular, perhaps for many reasons. In the first place they are plentiful. When you find their hideout you'll find plenty of these fish. They are always hungry, or so it seems. A good crappie fisherman quite often brings in 50 or 60 or more of them at a time. Because these fish are so plentiful there is no catch limits set by law.

Until you learn their wily ways, crappie are difficult to catch. Really it's an art in itself. Crappie are so crafty that they can take

a minnow off a hook without the line showing the least motion. This they do by attacking from below the bait, rising when they strike.

Also they are great nibblers. Crappie anglers know that the slightest movement of the line is the signal to set the hook. Then "all hell breaks loose" for these little boogers are full of fight.

Another reason anglers go for crappie is they are delicious food and can be fileted with little or no bones.

Size isn't a big factor in their popularity since most are "pan size", but some two pounders and upwards are caught.

Ever so often there is a surprise catch among the crappie, in the form of a three or four pound black bass.

All of which makes crappie fishing the favorite pastime of anglers of all ages and both genders.

THE JOKE'S ON US

VAUDEVILLE WAS THE STARTING ARENA FOR MANY OF THE BEST KNOWN COMEDIANS. MUCH OF WHAT HAPPENED ON STAGE WAS IMPROMPTU, AND SOME PERFORMERS DISCOVERED THEY COULD GET A BETTER AUDIENCE REACTION WITH ONE-LINERS THAN THEY COULD WITH THEIR SCHEDULED ACTS.

PUNS STARTED OUT AS SUBTLE FORMS OF COMMENTARY, BUT EVOLVED INTO A FORM OF HUMOR. COURT JESTERS RELIED ON PUNS WHEN SPEAKING TO THEIR KINGS AND QUEENS. BY CHOOSING WORDS WITH DOUBLE MEANINGS THEY FOUND THEY COULD MAKE A SERIOUS STATEMENT AND GET A LAUGH, TOO. (IT WAS ALSO A WAY FOR THEM TO TELL A JOKE AND NOT LOSE THEIR HEADS!)

Dollars & Good Sense

by William J. Martin
Special Consultant to AVGO FINANCIAL SERVICES

With gasoline prices still on the rise and world-wide shortages still a reality, I thought I'd list a few reminders that can save you gas and money.

1. Don't let the car idle for long periods of time. Cut the engine off if you'll be waiting for more than a minute.
2. While driving, maintain a steady speed. If you can adjust your timing correctly, you'll make more green lights, and this saves too.
3. Avoid unnecessary braking or riding the brake pedal.
4. Try to drive in non-rush periods.
5. If you have an automatic transmission, don't change the gears yourself.
6. If you have manual transmission, drive in the highest possible gear without making the engine labor.

Following these rules, you'll conserve your money as well as fuel.

A weekly public service feature from the Texas State Department of Health

Accent on Health

J.E. PEAVY, M.D., Commissioner of Health

Chances of a poisoning within the home increase with the advent of every new household chemical, but there's one danger which has remained constant—common plants, trees and shrubs.

While vegetation in its various forms helps sustain life, many varieties are potential killers, warns the Texas Department of Health Resources. Potential sources of poison thrive in backyards and gardens all across Texas. The little-known sources of these poisons are common, garden-variety plants.

Most plants are harmless. Many are poisonous under certain conditions. A few are poisonous under nearly all conditions. More than 700 species of plants in the United States are known to have caused death or illness. Each year, about 12,000 children in this country chew or swallow potentially poisonous plants. Parents need to be especially watchful of small children, especially on picnics and outings, since they come in contact with many plants.

The poisonous nature of a plant is caused by the presence of one or more kinds of substances. There are some substances which are themselves toxic to animals: an alkaloid, for example, is the toxic principle in poison hemlock. Other substances are initially harmless but may decompose to form toxic products soon after being eaten—an example is glucoside, a sugar produced in wild cherry which changes to form the highly toxic prussic acid. Some substances are formed by the action of micro-organisms on plants: a fungi on moldy hay forms decomposition products, some of which may be toxic. Still other substances are absorbed directly from the soil and stored in harmful quantities in the tissues of certain plants: selenium, for example, may be found in some species of locoweeds, or potassium nitrate may be present in oats.

To the average person, the term "poisonous plant" suggest one that poisons upon contact, causing a mild or severe dermatitis or skin irritation. Texas certainly has its fair share of the plants known to be capable of causing such irritations, say State Department of Health Resources officials. Possibly the most familiar are the leaves, bark, and fruit of poison ivy and poison oak.

But did you know that hairy leaves and stems of parsnip and lady slippers, the milky juice of spurge, and the leaves of the cultivated primrose are also causes of

dermatitis? Lily bulbs and stalks, stinging nettles, and vanilla beans likewise have toxic qualities, and are capable of producing severe skin irritations.

Most poisonous plants are harmful only when they are eaten. In the case of nitrate-containing plants, the nitrate content is reduced to the toxic substance. This substance then enters the blood stream and changes the red pigment of the blood in such a way that it is incapable of transporting oxygen to body tissues. The result is suffocation.

Poisonous mushrooms,

mostly toadstools, cause more than 100 fatalities in this country each year. Daffodil bulbs, larkspur seeds, lily of the valley flowers, and jasmine berries are all harmful if eaten. So, too, are the leaves of the poinsettia and oleander bush, and all parts of buttercups, rhododendrons, and laurels. In some plants, only particular parts are toxic. A classic example is the rhubarb which has a perfectly edible stalk, but contains a deadly poison in the leaf.

If you are exposed to a poisonous plant, immediately wash the contact area with laundry soap and water to remove toxic resins.

Measures can also be taken to prevent the accidental eating of plants. Keep children away from plants and teach them not to chew

plant stems or to put plant parts, such as berries or bulbs, in their mouths.

If your child does eat a plant, and you are uncertain whether it is poisonous, immediately call a doctor. He, in turn, will contact one of the 21 Poison Control Centers near you for emergency medical and antidote information. Take your child to the Emergency Room of the nearest hospital, and if possible, bring a piece of the suspected plant with you so it can be analyzed for possible toxic substances. The Poison Control Centers are located in Abilene, Amarillo, Austin, Beaumont, Corpus Christi, El Paso, Fort Worth, Galveston, Grand Prairie, Harlingen, Laredo, and Lubbock; also in Midland, Odessa, Plainview, San Angelo, San Antonio, Tyler, Waco, Wharton and Wichita Falls.

Your SASA savings work for you right here

In fact, your money works for you twice. First, you receive generous earnings, compounded daily to provide maximum annual yield. Second, your SASA savings help build homes, improve homes and remodel homes right here which creates jobs for you and your neighbors. So, put your money to work right here by putting your money in a SASA savings account. After all, we're here to help.

Food Stamp Fraud

WASHINGTON—Scandalously loose federal regulations are taking food from the mouths of the needy and giving it, at taxpayers' expense, to the undeserving.

The federal food stamp program has degenerated into a gigantic boondoggle. What began 10 years ago as a modest federal project funded at \$40 million has mushroomed into a fiscal monster that will devour \$5 billion of the taxpayers' money this year.

Use of food stamps has increased from one of every 439 Americans in 1965 to one of every 13 Americans today, and the growth of the program is likely to be even more astronomical in the future. Under present regulations, one of every four Americans is eligible for food stamps, and that could easily grow to one of every three Americans.

Under present regulations:
—Some able-bodied persons who do not want to work can get food stamps;
—Owners of jewelry, furs and luxury appliances can get food stamps;
—Minor children can get food stamps without parental consent or control.

Enough is enough. It is time to put a halt to the flagrant abuses of the food stamp program.

I have joined with Sen. James Buckley (R-N.Y.) and nearly 70 other members of the Senate and House in sponsoring the National Food Stamp Reform Act. Our bill would save taxpayers at least \$2 billion each year, while at the same time increasing benefits to genuinely needy food stamp recipients by as much as 29 percent.

The National Food Stamp Reform Act contains 41 separate provisions to reduce the overall cost of the program by eliminating fraud and abuse and by redefining eligibility requirements.

Administration of the food stamp program would be transferred from the Department of Agriculture to the Department of Health, Education and Welfare in order to eliminate costly administrative duplication in the welfare system.

Among the reforms the bill would make are:

—Use of federal government indices to set cut-off points for food stamp eligibility;

—Elimination of the present complicated system of income deductions which makes it possible for families making as much as \$20,000 a year to be eligible for food stamps;

—Denial of food stamp eligibility to able bodied persons without small children who are not willing to work, and

—Establishment of accurate monthly reviews to determine whether a food stamp recipient should retain his eligibility.

At the same time, the National Food Stamp Reform Act would significantly expand nutritional assistance. Millions of poor people would benefit directly. The food stamp allotment of each recipient would be immediately increased by 29 percent, and the elderly, who are least able to defend their pocketbooks from the ravages of inflation, would be given special consideration.

Summer Employment Program Being Administered By CVCOG

Young people in the Concho Valley region between the ages of 14 and 21 who meet eligibility requirements, are invited to participate in the summer employment program being administered by Concho Valley Council of Governments.

Funded under Title III of the Comprehensive Employment and Training Act, the program will provide summer jobs for 310 youth who are economically deprived and who plan to return to school in the Fall.

Between now and the start of school, the youth will work 40 hours a week. After school starts and until the program expiration date of September 30, the hours will be reduced to 15 hours per week. Job placements will be in the public sector, (such as governmental units, school districts, etc.) as well as with private, non-profit agencies.

The Concho Valley region includes Coke, Concho, Crockett, Irion, Kimble, Mason, McCulloch, Menard, Reagan, Schleicher, Sterling, Sutton and Tom Green. Youth in any of those 13 counties who believe they are eligible for the job placement program should contact the CVCOG Manpower Program

personnel, Room 310, 7 W. Twohigh Building, San Angelo, Tx., or call (915) 653-1214 for more information.

To all renters: Your landlord's property insurance does not cover your personal furnishings and belongings. A Tenant Policy, from Morgan & Hunt Insurance, will protect against theft and personal liability, as well as the destruction of your personal property.

REDDY'S HELPFUL FREEZER TIPS

- Defrost promptly—frost build-up of more than 1/4" makes cooling units work harder—they use more energy and wear out faster
- Prepare food for refrigeration by letting hot dishes partially cool before refrigeration or freezing.
- Keep it full—but without overcrowding. A half-empty freezer uses more energy, because air is harder to keep cold than chilled foods and liquids
- Check gaskets to help prevent energy-wasting air leaks. Close door on a heavy piece of paper. If it pulls out easily, gaskets may be worn.

Pick up your FREE copy of "ENERGY CONSERVATION" Booklet from

West Texas Utilities Company An Equal Opportunity Employer

Remember Reddy Supplies the energy—but only YOU can use it wisely!

through the construction area.

Keith Keller, General Superintendent for the Allen Keller Company, indicated that the Company will be hiring all classes of laborers and equipment operators in a few weeks. As an Equal Opportunity Employer, they welcome all applicants.

Supervising Resident Engineer Joe W. Lane of Sonora will be in charge of the project for the State.

FANCY THAT!

THE LONGEST NECKS IN THE WORLD BELONG TO BURMA'S PANDAING PEOPLE WHO STRETCH THEM UP TO 15 INCHES WITH COPPER COILS!

ENGLAND'S PRINCE PHILIP, ON A TRIP TO NEW GUINEA, MET WITH TRIBAL SUBJECTS, INCLUDING ONE WEARING A VERY COLORFUL AND UN-BRITISH HABAND NECKTIE. (THE PEOPLE AT HABAND-- ONE OF AMERICA'S LARGEST MENSWEAR MAIL ORDER HOUSES-- LEARNED ABOUT IT FROM A PICTURE IN NATIONAL GEOGRAPHIC MAGAZINE.)

Vocational Program Being Added To Local High School Curriculum

Students at Sonora High School will have the opportunity this year to take part in a program which mixes classroom education and on-the-job training in a variety of occupations.

Classes in Home Economics Cooperative Education have been added to the curriculum for junior and senior students, Dr. Joe Andrews, superintendent of schools, announced.

Dr. Andrews said that practical work experience will be provided for students through part-time employment at cooperating businesses throughout Sonora.

Typical occupations in the program are art and craft aide, child care aide, companion to the elderly, clothing assistant, consumer aide, dietetic aide, fabric coordinator, fashion coordinator, floral designer, food caterer, food service employee, home furnishings aide, and house-keeping management assistant.

The course is set up for one or two years and carries six credits each year, Mrs. Diann Keller, teacher-coordinator of the program, said. Students will receive pay comparable to that paid beginning workers in the

same occupations.

"The addition of this type of program will do much to provide the youth of any town with a well-rounded educational program that will fulfill the need for practical and useful training," said Mrs. Keller.

Mrs. Keller stated it is hoped that the program will enable a large portion of students who desire to become occupationally competent, to enter fulltime employment upon graduation from high school.

An advisory committee of local business people will be established to assist Mrs. Keller with the program.

County's Oil And Gas Production Valued In Excess of \$100,000

The production of crude oil and natural gas in 1974 continued to have a significant impact on the economy of Sutton County, with the estimated value of the county's production, royalty payments, and state severance taxes reaching new highs.

Sutton was one of 197 counties--an increase of four from 1973--which produced oil and gas valued in excess of \$100,000 in a year which saw the total value of state production jump from just over \$6.7 billion to almost \$11.4 billion.

The county ranked 106th in the state in the total value of

petroleum produced--\$16.9 million--with \$1.6 million of that coming from the sale of 232,610 barrels of crude oil; \$15.3 million from the sale of 52.7 million MCF of natural gas.

This study by the Texas Mid-Continent Oil & Gas Association shows also that the county's petroleum production last year resulted in the payment of \$2.1 million to royalty owners.

"These figures, whether considered statewide or individually in almost 80 percent of Texas' 254 counties, emphasize the importance of a healthy petroleum industry in the nation's No. 1 energy state," said Sherman Hunt, a Dallas independent oil man who is president of Texas Mid-Continent.

"In the face of declining production in Texas, it is significant that this increased return to royalty owners and producers came from crude oil and natural gas which is free from restrictive federal price controls. But there are at this time proposals in Congress which would place all of Texas' petroleum production under federal price controls, with predictable disastrous consequences for the industry, as well as the whole economy of the state," Hunt said.

The survey also shows that the State of Texas received \$1,225,707 in production taxes from county wells, with \$74,900 coming from crude oil output and \$1,150,807 from natural gas production.

Oil and gas developers and producers spent an estimated \$19.8 million drilling 228 wells in Sutton county last year, with 10.3 percent of that figure lost in 36 dry holes. The total drilling yielded one oil well and 191 gas wells. The exploratory effort in the county included the drilling of 14 wildcat wells seeking new oil and gas fields.

According to the Texas Employment Commission, 587 oil and gas industry employees worked in the county in 1974 and shared a payroll totalling \$8.5 million.

Processing plants also added to the county's petroleum-related economy: The "Oil and Gas Journal" list two natural gasoline processing plants, with a daily capacity of 60 million cubic feet.

Numerous Games Being Planned For Sutton Co. Day Celebration

Eleven games are being planned to entertain young and old during the Sutton County Day Celebration scheduled for Saturday, August 16. Among these will be the tug-of-war where ten man teams from different companies in town will compete against each other. Members of the Sonora Jaycees, who are sponsoring the celebration, urge any business or company who has not been contacted to call Jaycee Herbert Jones at 387-3655.

Other games scheduled for the event are sponge throws, egg tosses, spike driving contests, sack races, a turkey shoot, horse shoe throwing, a watermelon eating contest, washer throws and games of chance.

On tap for the younger set are the bicycle and tricycle races. Youngsters from 3-5 will be eligible to compete in the tricycle race. Three divisions of bicycle races are scheduled with 5-7 year olds in one group; 8-10 in a group,

and 11-14 year olds in the third group.

Everyone is invited to enter any or all of the contests.

Family Land Registrations Arrive Slowly

AUSTIN--Agriculture Commissioner John C. White has announced that registrations for the Family Land Heritage Program are trickling in to the Texas Department of Agriculture (TDA) with less than a month to go before the Aug. 15 deadline.

"Fewer than 50 farmers and ranchers have qualified for this year's program," he said. "Last year we honored 565."

White urged Texans whose families have worked the same land continuously for 100 years or more to apply.

Applications are available at the county judge's office in each county settled by 1875. Judges in parts of the state settled after that date did not receive forms. However, if a family in one of these areas thinks they qualify, they may write directly to TDA for an application.

Families last year were honored at ceremonies at the state fairgrounds in Dallas where they received a certificate recognizing their contribution. Historical information on their land was printed in the first edition of TDA's Family Land Heritage Registry.

To qualify, land must have been agriculturally productive and owned by family members for 100 years or more. If all the land was ever rented out, it will not qualify.

Persons must live on and work the land or, if they live off it, actively manage it.

Food Center's first customer last Thursday was none other than Mrs. Herbert Fields, the owner's wife. Checking out Mrs. Fields' purchases on the new IBM computer cash register was Mrs. Jean Wall. The Food Center has three check out counters and an express check out.

Older Texans help pass on family heritage and traditions to younger members and serve as a link to the family's historical past, Mrs. Ilene Miller, family life education specialist with the Texas Agricultural Extension Service, The Texas A&M University System, reminds.

To ancient people, spices were valued like gold because of their preservative powers, Marilyn Haggard, foods and nutrition specialist with the Texas Agricultural Extension Service, The Texas A&M University System, points out.
