THE DEVIL'S RIVER PHILOSOHER SEZ.....

**Public Opinion Poll Business, No Overhead, Just Clear Profit**

Editor's Note: The Devil's River Philosopher has not recovered sufficiently from surgery to be able to write a column this week; consequently, he has a friend rummage through his elaborate filing system and pick out a column that ran years ago just to see if it would still stand up. If it is. What do you think?

Dear Editor: Why didn't you and me go into the public opinion poll business? I had this idea last night while I was looking over a copy of the Standard-Times and my dog dragged into the yard yesterday afternoon and left there un-torn, didn't he taste of it I guess, although I don't know why, you ought to see some of the bones he chews on.

At any rate, over on an inside page there was the result of the latest Gallup Poll. After surveying people clear across the nation, the Poll discovered that the "most urgent problem facing the average man and his family today is money." Of all family problems, it found, "the high cost of living overshadows all other worries of the American people today."

This is the reason you and me ought to start our own public opinion poll. I could have discovered the same results without interviewing a single person or using even a

postage stamp, and if you can sell the poll to other newspapers, everything we take in will be net profit, and I can sure use my part to help meet the high cost of living. You bought any tractor parts lately? Been to the hospital? Re-placed a picture tube? Fed a growing boy? Bought any dog food?

There are some things a man just knows automatically, and one of them is that regardless of how much he earns, his family is always one jump ahead in needing a little more. Every time he gets into a new income bracket, he discovers his family has been there for months already.

Another thing about this poll we ought to start is that we could use it over and over. Not only is it true that the average consumer is in an economic squeeze today, he was in one yesterday, last year, ten years ago, and most likely will be in one ten years from now. By the time you own one car, your family needs two, and when you swing that, color television comes in and the family next door has a speedboat.

Let's get this poll going. My tractor is missing out and my TV set is flickering.

Yours faithfully,  
J. A.

Don't forget to feed our feathered friends this winter.

Conserve and Save Tips for your Electric Range

- ☆ Using your range more carefully can mean significant savings on your fuel bills. Avoid the temptation to keep opening the oven door. You lose up to 20% of the heat every time you do.
- ☆ Pre-heating the oven and baking only one dish or heating a few rolls is wasteful. With a little planning you can cook an entire meal in the oven.
- ☆ Reduce heat as soon as practical. When water is boiling, medium heat will keep it boiling. Use pans with tight-fitting lids to conserve heat.

Remember REDDY Supplies the energy—but only YOU can use it wisely!

Appalled now and then at the *impropriety* of your own remarks? We say things we really don't mean. And occasionally we say what we do mean but really shouldn't say. No church claims it can train you to say the right thing at the right time — although expressing truth, concern and kindness toward others is very much a part of Christian living. Our churches teach the Gospel of Christ which has for two thousand years inspired truth, concern and kindness. The heart of that Gospel is God's Love for US and for ALL MEN. No person can hope always to say the right thing. But, generally, what we express are our *convictions*. Our church helps us discover and implement them!

NOTICE OF THE REQUIREMENT FOR THE FILING OF CLAIMS OF ALL WATER RIGHTS IN THE LLANO RIVER WATERSHED IN THE COLORADO RIVER BASIN AND OF THE PUBLIC HEARINGS ON SUCH CLAIMS

Notice is given pursuant to the Texas Water Rights Commission's order of August 4, 1975, and Section 5.306, et seq., Texas Water Code, that on or before April 1, 1976, all persons claiming any right to divert state water, except for domestic and livestock purposes, in the Llano River Watershed including portions of Sutton, Edwards, Real, Kimble, Kerr, Menard, Mason, Gillespie, San Saba and Llano Counties, Texas, shall file with the Texas Water Rights Commission a sworn claim setting forth the name and address of the claimant, the location and nature of the right claimed, including a description of any claim, permit, or certified filling under which the claim is made, the purpose of use, a description of the works and irrigated lands, if any, and all other information necessary to show the nature and extent of the claim.

The Llano River Watershed consists of the Llano River and its tributaries from its headwaters to, but excluding, the backwaters of Lake Lyndon B. Johnson. Instructions and forms for the filing of claims of water rights under adjudication proceedings may be obtained without cost from the Texas Water Rights Commission, P. O. Box 13207, Austin, Texas 78711. Use of Commission forms is not mandatory. Copies of the Investigation Report for the Llano River Watershed, together with all maps or plats, are available for inspection in the offices of the Texas Water Rights Commission in the Stephen F. Austin State Office Building, 1700 North Congress Avenue, Austin, Texas, and with the county clerks of Sutton, Kimble, Mason, Llano and Gillespie Counties, Texas.

Pursuant to Section 5.308, Texas Water Code, the Texas Water Rights Commission further gives notice of the commencement of hearings to receive evidence concerning claims of water rights in the Llano River Watershed in the Colorado River Basin. At 1:00 p.m., on Monday, May 17, 1976, in the Kimble County Courthouse, District Courtroom, Junction, Texas, the Texas Water Rights Commission, either as a Commission or through a hearings examiner, will convene and commence hearings on all water right claims asserted in accordance with Section 5.307, et seq., Texas Water Code. The hearing on Monday, May 17, 1976, will be to consider jurisdiction. The time and place of individual evidentiary hearings on claims to be heard thereafter will be mailed to each claimant at a later date. The claims and evidence from the hearings will be the basis for the Commission's preliminary determination. Failure to appear and present evidence will jeopardize the water rights asserted in the claims.

## SMALL WONDER

How Little Things Can Really Mean A Lot

Few Americans realize it, but microfilming has become so highly developed that it is now possible to put 8000 manuscript-size pages on a single sheet of film. In fact, a typical copy of the Holy Bible can be placed on a piece of film measuring 2 inches by 2 inches!

Not only do businesses use microfilming as an efficient method of storing and retrieving information used daily, but it is used in schools, hospitals and libraries, too.

## Brucellosis Quarantine Delayed

The U.S. Department of Agriculture (USDA) announced January 2 that it is delaying the effective date of its federal brucellosis quarantine on Texas from January 5 until January 9.

According to officials of USDA's Animal and Plant Health Inspection Service (APHIS), the quarantine is being postponed because of a temporary 10-day restraining order issued December 30 by Judge J. T. Boyd of the state's 64th Judicial District Court in Castro County, Texas. The temporary restraining order requires the Texas Animal Health Commission to bring the Texas brucellosis program into compliance with the cooperative state-federal brucellosis program.

A hearing on the state court action is scheduled for

January 8 in Dimmitt, Texas. Issuance of the temporary restraining order by the state court means that Texas officials must comply with the uniform methods and rules of the national brucellosis eradication program for the duration of the order, according to Dr. John M. Hejl, APHIS deputy administrator for veterinary services. Therefore, in view of the state court's action and the forthcoming January 8 hearing, the effective date of the federal quarantine is being postponed until January 9, he said.

Dr. Hejl also said that through January 8 APHIS will continue to cooperate with Texas in carrying out the brucellosis program, including the payment of indemnities to owners of infected cattle.

Effective January 1, I purchased J.T. Ratliff's

interest in Ratliff - Kerbow Funeral Home serving Sonora and Eldorado. I would like to take this means of expressing my appreciation for the trust and confidence over the past 24 years. I hope to continue to merit the same trust and confidence.

Jack Kerbow

**Ocean Deep**  
Medical scientists are searching the high seas in quest of a cure for cancer.

Medicine has learned a great deal from the oceans; from electric eels, how to synthesize Penicillin (PAN); from the stings of a Man-of-war, how to treat allergies and shock... And now Plankton (tiny organisms that thrive in water) and Seaweeds are being investigated as possible sources of medicinal agents. Research vessels carry divers who scour the ocean, to gather specimens which will be subjected to intense scrutiny.

It is unlikely that there will ever be one drug to cure cancer, for there are many types of cancer; but there is great hope that the search will bring some gain.

### Map Designed To Aid Blind Students At UT

A lightweight, portable plastic map—with buildings raised and streets depressed—will help blind or partially sighted students get around better on The University of Texas campus.

The tactual map (measuring 11-by-11 1/2 inches) was designed as a master's thesis by Margaret Day, a graduate cartography student in the Geography Department.

With map in hand, the blind will be able to maneuver more easily around UT's malls, steps, fountains and ledges.

### Motorists Receiving New Auto Registration Application By Mail

Texas motorists this week will begin receiving their new auto registration applications in the mail.

But in 1976, instead of new metal license plates, Texas vehicles will sport small strips of reflective material. The bicentennial red, white and blue validation stickers are to be affixed to the area outlined by an embossed rectangle in the upper left-hand corner of the 5-year plates issued a year ago.

So, for the first time since World War II, Texans will use license plates issued in an earlier year. And plans call for annual reissue of the same plate numbers for the foreseeable future for periods of at least five years at a time.

The Lone Star State issued plates for the first time, in 1917, according to R. W. (Bob) Townsley, director of the Motor Vehicle Registration Division of the State Department of Highways and Public Transportation.

"Prior to that time motorists registered their vehicles in the county of residence," Townsley said. The county tax assessor-collector issued a plate number and the owner of the vehicle got appropriate materials from a convenient hardware store and made his own plate or plates.

The month-of-issue sticker will remain the same for the life of the vehicle and will be affixed in the upper left-hand

corner of the license plate. A definite advantage will be the elimination of long lines of motorists waiting to register their vehicles once each year, as only part of the registrations will be issued each month.

When the new monthly registration system becomes effective, cost of registration will be determined by the month of issue for the first year, and a motorist will pay for length of the registration period—whether for part of a year or more than a year.
