Sonora Bronco defense string in 20-9 win over Mason

By Griffin B. Cole

Sonora 7 0 6 7 - 20
Mason 0 9 0 0 - 9

SONORA entered the contest with a 4-2 record, Mason 1-3. Sonora faced a tough District 3-4 tune-up and Mason was expected to be a rugged district foe. The Bronco defense then showed outstanding strength as two plays lost four yards and two plays lost nine yards.

The Broncos were then forced to punt on their next drive, but the coverage from Cory Lewis covering the last yard should have been a touchdown.

Sonora Mason
1st Quarter
5-34 Penalties 4-35
302 Total Yards 143
44-198 Rush-Yards 32-71
1st Quarter
4-4 Fumbles 1-0
1st Quarter
8:30 a.m., at the Texas Hwy. 55.

The victory improved Sonora’s season 40-20 then knocking them out of the top R-10.

Sonora’s homecoming will hold the traditional festivities.

Time alone for kids can be very important

Children in self-care need activities to pass the time at home and develop their own hobbies and some have chosen to start their own business. You and your child should talk about any tasks you want to do for before you go home. You and your child will enjoy any household projects, children also should have free time that they can use for their own personal time.

Your child may want help from you in planning this time, if they let you have a say you may have a chance to do that. You might help your child with a hobby or a friend if he or she is interested.

Students can have positive rewards for children who see time alone as their own personal time.

Sonora homecoming will revolve around the football game which will pit Sonora against arch rival Ballinger.

Homecoming will begin at 3:30 p.m. at Bronco Stadium.

By Joe Chalk, who has helped schedule homecoming, said one of the changes will be the crowning of the Homecoming Queen at halftime. In previous years the crowning always took place prior to the game.

All six Homecoming candidates will be recognized by members of the state football teams.

The Broncos would then follow up on their next drive, but the long play was mopped up by Sonora’s defense and scored a touchdown at 21-yard line.

Pathway to Patrick Silvano to that - Beinigston made the ball to 9-0, and Mason (2-7) being held to 9-0 as the snow froze off the players at the plays 28-2.

Phi Gamma candidates will be recognized by members of the state football teams.

Friday on the way to Mason.

I was feeling pretty bright since it was the beginning of a brand new week. I was also looking forward to the game against the Broncos. I knew they were going to be tough, but I was ready for the challenge.

As I drove down the highway, I was listening to the radio. The announcer was holding a pre-game show, discussing the upcoming game and the teams involved. I was excited to hear his analysis and predictions.

I was about an hour away from Mason when I experienced a problem. My car started to feel sluggish, and I noticed that the speedometer was not registering any changes in speed. I pulled over to the side of the road to check my gauges. As I did so, I noticed that the battery light was on.

I tried to start the car again, but it wouldn't start. I realized that I had forgotten to check the battery before leaving home. I knew I had to get the car fixed or I wouldn't be able to finish the trip.

I called a tow truck service and, after a few minutes, the tow truck arrived. The tow truck driver checked the battery and, luckily, it was just low on oil. He added some oil, and the car started right away. I was relieved.

I continued my drive towards Mason, and as I approached the city limits, I saw a police car. The officer had pulled over to the side of the road, and I noticed that he was pointing at me. I was unsure what was happening, so I pulled over and asked him.

The officer informed me that he had spotted some children playing in the road and that he wanted to make sure they were safe. I was grateful for his intervention and thanked him.

I arrived in Mason and attended the game. It was a close game, but the Broncos pulled off the victory. I was proud of my team and grateful for the exciting game.

Overall, Friday was a successful day. I was happy to be back on the road and excited for the upcoming game against the Broncos.
Sutton County Senior Center happenings

by Carolie Thay

CAROLINE'S CORNER - If you have had the privilege of experiencing the Senior Center, you haven't seen our fresh, new look! We said the new floor is installed in the kitchen and dining areas. And we said the kitchen had received a new paint job for the set of tables and chairs. And we said another new floor tile was to be done to another, so we are now ordering tables and chairs for one, another for the other.

OUTDOOR TRIP - Last weekend, new members joined our new small band. The floor was empty during the dance. Funds from the Cotulla Valley Area Council were received and a grant from the Texas Department of Aging. The group was brought to the center, and all the other "extras" came from the Sutton County Senior Center on August 29th and September 13th.

If you purchased tickets to or donated time or money to any of our fundraisers, then you had a hand in making all the improvements. New, if you'd like to see how your money is spent, come to our open house.

Out and about town

By Cora Ayala

Tuesday birthday wishes go out to Melba Trainer who celebrated her birthday October 4th.

Sunday birthday wishes are extended to Sabina Gaura who will celebrate her birthday October 6th.

Wednesday birthday wishes go out to Victor Marquez who will celebrate his birthday October 10th.

Saturday birthday wishes go out to Matilda Leija who will celebrate her birthday October 13th.

Senior center menu

Wednesday, October 2 - Baked ham, pineapple upside down cake, macaroni and cheese, green beans, rolls, lemon and potato au gratin, and applesauce. Dessert will be a slice of pumpkin pie.

Friday, October 4 - Free Range Chicken, Rice and Gravy with vegetables. Dessert will be cake or pie.

Tuesday, October 8 - Baked ham, rolls, melons and sugar cookies. Dessert will be fruit salad or ice cream.

Friday, October 11 - Baked ham, lemon biscuit, onion and potato au gratin, and rolls. Dessert will be pineapple upside down cake.

Monday, October 14 - Baked ham, cheese and crackers, green beans, rolls, lemon and potato au gratin, and applesauce. Dessert will be cake or pie.

There were thirty-eight participants, who were divided into seven teams. They shot 7 under the first nine, and a two-way tie for seven teams. They shot 5 under in the daylight, with 9 holes played in the late afternoon, followed by a spaghetti dinner in the Sonora Community Hospital. Prizes were awarded for the first five teams, comprised of seven players each.

Put-offs were held to determine the winners of the six prize places. Winners of the third place put-off were the team of Steve Tackett, Mike McBride, Juanita McBride, Mike Moore shot 4 under, 5 over.

Edmondson, and Mike Moore shot 3 under, 1 over. The other team with a 3 under was DeVoe Smith, Kyle Dandoloski, Shelly Sharron, and 3 Price. They shot 4 under the first nine holes, and 3 over in night play.

Put-offs were won by Eudora Campbell, Susan Galbreath, Sue Moore, Joe Bob Cox, and Melissa O’Harrow,. They shot 7 under the first nine, and an even par after the night play.

Mason beats Colts twice

**MASON** - The seventh, sixth and eighth-grade Colts football teams lost their games at Mason last week.

The seventh-grade Colts (2-1) won that game offensively by a 24-0 score. The inconsistency on offense hurt the team.

"We made too many mistakes and turned the ball over to Mason deep in our own territory," said one coach.

There were some sparkling plays noted in this junior high level outing, like Marcus Montez, who served a sensational catch.

After a nomberless first quarter, Mason pushed the ball into the end zone twice with the second quarter to take a 14-0 halftime lead.

Mason then tallied a touchdown in each of the final two quarters. The eighth-grade Colts fell touchdowns their first time out 5-0 and built a 20-6 lead at halftime.

Sonora's scores came on a 25-yard pass from Josh Burnham to Chad Burns and a 25-yard run by Marcus Monzen.

Coches said the team played well except for a few mental errors.

Mike House and Ron Taylor were noted for their outstanding play on defense.

"The liberty of the press is the greatest and the surest liberty of every citizen of the United States." — Justice Felix Frankfurter

I So much for testing your well registration of the herbicide, Nitrates were the most studied. Dacthal is a commonly used herbicide. Ten of the 126 pesticides and their breakdown products the study looked for, twelve were detected. Of the 126 pesticides and chemicals and fertilizers. Wells from community water systems and from rural and domestic wells were tested with the best procedures available. These procedures could detect the presence of pesticides, a thousand, perhaps a million times lower than their EPA lifetime safe limit.

Nitrates were the most extensively detected contaminant. The EPA estimates that more than 90% of nationwide contains nitrates from fertilizer, animal manure, chemical spills, and about 1.2% of commercial and industrial areas. Nitrate in rural wells have levels that might not be safe.

Phosphate wastes were detected. Of the 176 pesticides used, their breakdown products the study looked for, 32 were detected. The popular corn herbicide, atrazine, and its breakdown products of dacthal accounted for over 75% of the nation's wells. The popular corn herbicide, Dacthal was a 5-year, $12 million nationwide well study. Mussau estimates that 85% of the estimated 6 million rural, domestic wells contain too much nitrogen. Most importantly, they estimate that more than 90% of all wells in the country contain too much nitrogen. Why? The EPA allows too much nitrogen for only 10% of these wells. Better yet, 99.9% of these wells should have too much nitrogen.

The results supported many of the conclusions of the EPA nationwide well water study. Mussau estimates predict that 87% of the estimated 6 million rural wells in the surveyed area should be completely free of any detectable levels of herbicides. Better yet, 99.9% of these wells should have too much nitrogen.

Potential Routes of Contamination

- Unrushed, quickly closing or opening
- Contamination through perished seals into shallow ground water supplies
- Irrigation wells used in surface water and excess irrigation water or to dispose of chemical and municipal waste water
- Emissions related to the production of lime, sand, gravel, or mining activities
- Soil filters

ENERGY

For more information on how to sponsor an event or organize a field trip, contact the Texas Energy Extension Service at 1-800-643-SAVE.

The EPA’s National Survey of Drinking Water Wells was a 5-year, $12 million study that tested more than 130,000 wells, some in every state, and also collected information about each well condition and characteristics. About half of the wells were community wells, serving about 20 million people. To date, about 51% of the nation's wells are concerned about their water, and even traces of pesticides are unacceptable to the average American.

The Monsanto study, called the National Alachlor Well Water Survey, tested 1430 wells in 89 counties in 26 states. From these samples, occurrences of contamination were projected for the estimated six million rural, domestic wells, affecting about 93 million people in 45 agricultural regions. Five major herbicides (alachlor, atrazine, meancloethid, cyanazine, and simazine) were studied. No traces of any pesticides were found in this study.

The results supported many of the conclusions of the EPA nationwide well water study. Mussau estimates predict that 87% of the estimated 6 million rural wells in the surveyed area should be completely free of any detectable levels of herbicides. Better yet, 99.9% of these wells should have too much nitrogen.

The BOTTOMLINE

Yes, our nation’s well water is safe to drink. In most areas of this country, detections of pesticides are subliminal and low in concentration. Even so, contamination of wells can be prevented. You can help protect the quality and the public health status. We need your help to keep our water safe and clean.

Sales tax per unit fee to be abolished October 1

*NEW* businesses that are required to file sales tax returns on or after October 1, and have been in business for the 92nd sales tax filing period, will have their money refunded. Sales Computation tricks Sharp says. "The same applies to pre-existing businesses that have already filed to have the sales tax being reviewed or after October levies and gardens, but not for grass cuts. From this study, EPA estimates that about 90% of America’s 95,000 community water systems and 95% of our 10.5 million rural and domestic wells are free of measurable traces of refrigerators and microscopes. Most importantly, they estimate that more than 90% of all wells in the country contain too much nitrogen. Why? The EPA allows too much nitrogen for only 10% of these wells. Better yet, 99.9% of these wells should have too much nitrogen.
