BEHIND THE SCENES IN WASHINGTON

WASHINGTON, July 26. — The "bottle trust" may be the next target in the series of Justice Department anti-monopoly prosecutions. Members of Assistant Attorney General Thurman Arnold's staff have worked up a case alleging violation of anti-trust laws in the beverage bottle industry and it will be alleged, if a suit is brought, that there is a lack of competition and that prices are too high. There is no assurance of prosecution and the bottle case may be "bottled up" indefinitely, but action is probable sooner or later. The case of eight major motion picture companies, against which suit has been brought on the ground of monopolistic practices which drive independent movie houses out of business, lay around in the department several months after being prepared. It was during that period that Will Hays and a galaxy of motion picture magnates visited the White House. As a matter of fact, the chief evils alleged in the movie suit—control of theaters by production

WPA headquarters has been sorely bothered by a problem involving both religion and ticks. It might be said that religion and ticks don't mix or it might be said that they do, although that's not the point at issue. A certain western state has been more than ordinarily afflicted with ticks lately—the kind whose bite may cause a fever which often has resulted fatally. Orders were issued that all WPA workers in the tick area be vaccinated. But some refused to take the serum on religious grounds and the state WPA officials wrote to Washington to ask whether these objectors should be fired. After consultation with lawyers and clergymen of various faiths, top WPA officials replied in the negative. But they urged the state WPA people to keep using moral persuasion because any deaths from causes arising on WPA work means the government must make insurance payment up to \$3500.

companies and the practice of block booking of films—have been going on for years, while gradually increasing in scope. An intensive federal investigation was begun about two years ago. If the big movie men care to divorce their production-distribution ownership from their theater ownership and eliminate block booking, there's little question that Attorney General Cummings and Arnold will be glad to call off the prosecution.

Half-Way-Around-the-World Flight

THE WORRIES OF THE IRISH

BIG, open-faced, smiling Denis Mulligan, director of the Bureau of Air Commerce, appears and is Irish as Irish as his name implies. When newspaper correspondents rushed to ask him what he would do about punishing another Irishman named Douglas Corrigan who had made a spectacular, unauthorized solo flight to Ireland, Mulligan told them to forget it and remarked that it was "a great day in the history of the Irish people."

But brave young Corrigan has given Mulligan and other federal aeronautics officials cause for worry. No end of bright young men are applying for permission to make equally spectacular flights and, worse yet, others are thought to be secretly planning to emulate Corrigan without asking permission. Some of these fellows have had only a few hours of flying experience in planes not even as airworthy as Corrigan's.

Aside from worrying about the lives of such daredevils, officials fear the effects of fatalities on commercial aviation. Any widely publicized airplane death has a certain depressing effect on ticket sales of air passenger lines. Recent British and German—as well as forthcoming American—trans-Atlantic experiments inspire a fervent but probably vain official hope that newspapermen will "play down" Corrigan while stressing more constructive aviation exploits.

Record Number of Votes Counted in Winkler County

KERMIT, July 26. — Moving to the polls in the greatest number since Winkler county was formed, voters here and in Wink and Clayborne Saturday decided the political fate of 44 aspirants for county and precinct offices. Sharing honors for interest were the races for sheriff, county judge and county attorney. In the first named race, Bishop G. Porter, former deputy, led a field of three with 716 votes a plurality of 15 over Ellis Summers, former chief deputy. W. A. (Uncle Billie) Priest, who has been sheriff of Winkler county for 26 years, trailed with 581. Weyland B. McCargo, justice of the peace for precinct No. 4, led the candidates for county judge with 693 tallies. C. E. (Red) Gilliam of Wink ran second with 624, Judge G. C. Olsen of Kermit was third with

The Town Quack

The post-election conversation is half of the show, and who can deny that politics is now in the show business. O'Daniel got elected for the way he could entertain the public. Sadler got in the run-off with his cousin Harley Sadler handling his campaign. One woman said Charley McCarthy will be a cinch for president if Bergen will allow his own name for vice-president.

This newspaper isn't much for getting into politics, but I want to say right now that we had better not lose C. V. Terrell from the railroad commission. A man was talking to a group of Midland men on South Main street Saturday. He got so excited telling how O'Daniel was running that he said he had already carried

Armless Youth Retains Right To Drive Auto

XENIA, O. (UP)—Armless since birth, Paul E. Layton, 21-year-old farm youth of nearby Osborn, is an expert motorist, using no special mechanical aids for operating his automobile. Young Layton guides the car with an arm stump on his right shoulder and shifts gears with his right leg. He has been driving for six years and also operates a tractor on his father's farm. In addition he is said to maneuver his feet to accomplish what ordinary persons do with their hands.

Right of Layton to drive the automobile under a state driver's license issued to him two years ago was upheld in court recently by Greene county Common Pleas Judge George H. Smith. The decision, while not ruling on Layton's ability to drive, was returned following a hearing on an injunction suit by Layton in which he sought to prevent the state bureau of motor vehicles from interfering with his right to drive. The armless youth was granted a driving license but later his ability was questioned. A special driving examination was held by the Ohio highway patrol and his right to continue to hold the permit was refused because Layton had failed to pass the examination. It was through this refusal that the court suit resulted. The court held that Layton, once having been granted a license regularly, could not be deprived of that license by the state registrar of motor vehicles under the drivers' license law.

We have never had a better response at an election party. Several thousand people came, went on milled around while we gathered, posted and announced the state, district, county and precinct results. It's a pleasure to be able to serve the public on such an occasion. We apologize. Billy Walsh got two votes as a write-in candidate for constable Saturday, and we failed to get them in the tabulation.

Television Ruins Phony, Alibis

The German husband who telephones home from a Bierstube and tells his frau he's "detained at the office" will be out of luck when use of the new television-telephone apparatus pictured above becomes general. It was recently successfully operated over the 650-kilometer stretch between Berlin and Munich. The Berlin operator shown here holds a cumbersome transmission cell which will be eliminated from sets for home use. He can see the Munich operator in the projection window at left. In the wall, next to it, is the round "eye" which transmitted his image to Munich.

New Gold Vein To Be Worked By 3 Partners

BEMIDJI, Minn. (UP)—Gold mining operations are expected to begin soon on a new Northern Minnesota gold find—not one of Klondike proportions, but with assay reports indicating gold present to quantities of between \$12 and \$14 a ton. The deposit was discovered in Big Bass lake, six miles from here, and amid secret investigation and assaying, the owners prepared to operate the claim.

The gold was located by J. J. Giroux and Mrs. Jane Hogan. Together with Vern Hutchins, a mining engineer, they have incorporated a mining company, and are moving equipment into the claim to begin commercial mining. Giroux is optimistic about the project. He believes that an even heavier vein of gold will be discovered, and asserts that the corporation will not sell stock, but will operate only for the discover-

ers. Sluiceways have been built on the claim and pipes have been laid to carry water from the lake into the ways. A steam shovel probably will be used to excavate the gold-bearing dirt.

Farm Devoted To Life Saving

WOODWORTH, Wis. (UP)—The "crops" of a farm near here have saved thousands of lives. Vaccines, toxins, toxoids, hormones and other biological products are the harvests of the United States Standard Products laboratory farm. From here serums are sent to hospitals throughout the country, sometimes flown by airplane to the bedside of a patient. More than 80 persons are employed caring for the herds of 70 horses, 1,200 sheep and thousands of white rats, mice, guinea pigs, pigeons, calves and other animals which produce the serums, and in inoculating the animals to produce the valuable fluids. The horses are stabled in labora-

tory-clean stalls, fed on special diets and pastured on the finest grass. Some of the horses, weighing less than two themselves, have produced more than a ton of blood for scientific cures, according to Floyd H. Eggert, youthful director of the serum farm. Retired horses are brought to the farm and placed on special diets. Their food is high in blood producing elements. After the first injection of toxic old-tetanus toxin treated to remove its poisonous qualities—the horse loafs for six months in the pasture and in its stall. Then it goes to work receiving regular injections. When it can stand heavy doses of toxoid without ill effects it is ready to be bled. Horses can be bled with safety every two months, according to Eggert.

SOCIETY NEWS SECTION

Meth Women Study 'Way of Witness'

The Methodist Women's Missionary Society met at the church yesterday afternoon at 3:30 to continue study of their Bible study book.

Mrs. J. L. Prothro opened the meeting with a prayer.

The scripture was given by Mrs. C. E. Nolan who taught the lesson on "The Way of the Witness." This lesson was based on chapter five of the study book.

Mrs. W. C. Hines closed the meeting with a prayer.

Approximately fifteen were in attendance.

Mrs. Grant Speaks At Baptist Meeting

All circles of the Baptist Women's Missionary Society continued their study course when they met together Monday afternoon at the church.

Mrs. R. O. Walker gave the devotional which introduced Mrs. G. R. Grant's talk on "The First Thing We Should Know About the Bible." Fifteen attended the meeting.

Christian Council Circle 1 Meets With Mrs. Cordill

Members of Circle No. 1 of the Christian Women's Council met with Mrs. J. S. Cordill at her home, 724 W. Storey at 3:30 Monday afternoon.

Mrs. G. H. Butler opened the meeting with the devotional, and Mrs. J. V. Stokes led in prayer.

Following the business session a refreshment plate was served to Mrs. Butler, Roy Jones, J. T. Ragsdale, Stokes, Ingram, Frank Elkin, D. B. Sulder, and the hostesses.

Hats, Utterly Feminine, Petite. Diminutive chapeaux, tilted at fantastic angles, have completely captured feminine fancies. A clever toque made entirely of rather wide pleated bands of sheer dull jersey, is draped intricately, criss-cross fashion, one fold of the fabric falling gracefully scarfwise to the right shoulder. Another hat of the same material, shallow, tilted daintily forward, has a narrow swirling brim and two gay-colored feathered birds perched at the top center crown.

Summer in the City Is One Long 'Clean-up' Campaign'

By ALICIA HART, NEA Service Staff Writer.

All the beauty advice to travelers and summer vacationists notwithstanding, the business of looking her best every hour of the day is a much bigger problem for the girl who spends the summer in town than for one who doesn't.

The vacationist may have to worry about what too much sun does to her skin, the effects of salt water on her hair or the callouses that canoe paddles, tennis rackets and golf clubs make on her hands. But, for her, the simple business of staying and looking just plain clean isn't overwhelmingly difficult. For the city woman, it is.

Also, there's the matter of getting enough sleep. Anyone who has been out in the sun part of the day and had a little exercise in the bargain, isn't likely to be troubled with insomnia.

But lack of sunshine and exercise plus the fact that her room is pretty hot and stuffy, just aren't conducive to restful sleep.

The city girl's problems, then, are: how to keep clean and how to get enough sleep. She should tackle both quite seriously. They are not unsolvable.

First of all, if you have to spend the summer in town, it's a mistake to try to get by with less than three baths (or showers) a day—one in the morning, one before dinner and another just before going to bed. If cooling cologne is patied on after each bath and a non-perspirant used several times a week, the feeling of freshness you have immediately after a bath will be more likely to be retained until time for the next one.

Also, don't overlook the importance of cleaning face and throat frequently during the day. Use a cool, clear cleansing lotion or soap and water, followed by a creamy lotion. Never, never put a layer of fresh powder and rouge on over stale

(From Charles of the Ritz.)

Off the face and off the neckline, this coiffure for hot summer weather is as comfortable as it is flattering. The hair is brushed upward all the way around, swirling slightly to the side at the back, and finished with a topknot of curls. There are no short, loose hairs left to fly about when the office electric fan goes on, and the curls are anchored first with a rubber band, then with a narrow ribbon.

Regular use of a creamy lotion keeps Gale Page's hands and arms smooth and white.

of fresh powder and rouge on over stale

Restricted Divorce Law For Hindus Proposed

NEW DELHI (U.P.)—For the first time efforts are to be made to introduce divorce legislation in the Hindu community in India. A member of the Indian Central Legislative Assembly has given notice of a bill to allow Hindu women to seek divorce when the husband is suffering from certain incurable diseases or is insane.

The bill will be introduced in the next session of the Central Assembly.

Firestone CUTS THE COST OF TIRE SAFETY

NOW YOU CAN BUY A FIRESTONE GUM-DIPPED TIRE AS LOW AS \$7.60

4.50-20

RIGHT now when you use your car more than at any other season of the year — when you want and need greater protection against blowouts, punctures and skidding — Firestone provides this three-way safety at NEW LOW PRICES. Now that it costs so little to make your car TIRE-SAFE car owners everywhere should replace dangerously worn tires with NEW, SAFE Firestone Gum-Dipped Tires, built with these patented and exclusive construction features:

Gum-Dipping, the Firestone patented process by which every fiber of every cord in every ply is saturated with liquid rubber, counteracts tire-destroying internal friction and heat which ordinarily cause blowouts. Nine extra pounds of rubber are added to every 100 pounds of cord.

Two Extra Layers of Gum-Dipped Cords under the tread, another patented Firestone construction feature, protect against punctures.

Scientifically Designed Non-Skid Tread made of tough slow-wearing rubber, assures safer stops and longer non-skid mileage.

With the low first cost, the extra safety and the long mileage of Firestone Convoy tires, you can no longer afford to take chances on unsafe tires. Join the Firestone Save-A-Life Campaign today by equipping your car with a set of new Firestone Convoy Tires — the safest tires that money can buy at these low prices.

LIFETIME GUARANTEE

Every tire of our manufacture, bearing our name and serial number, is guaranteed by us to be free from defects in workmanship and material, without limit as to time or mileage, and to give satisfactory service under normal operating conditions. If our examination shows that any tire has failed under the terms of this guarantee, we will either repair the tire or make an allowance on the purchase of a new tire.

Midland Girls Take Pack Trips at Camp

MAYHILL, N. M.—Jean Lewis has returned to Camp Mary White from a five-day pack trip which was spent at a ranger station 25 miles from camp proper. Accompanied by a chuck wagon, the girls rode to the ranger station and made it the base of their night camping. They spent their days riding to nearby points of interest.

A group of other Midland girls, Kathryn Jordan, Patty Jane Griswold, Mary Lou Hoskins, Liza Jane Lawrence, Marjorie Monaghan and Margaret Ann West, took a three-day pack trip to nearby Turkey Springs.

Mrs. Stocking Will Announce Health Program Over KRLH

"Let Me Ask You These" is the title of the paper to be read by Miss M. Elizabeth Wilson, county health nurse, as the feature of the weekly food health program to be broadcast over station KRLH Wednesday morning at 11 o'clock. The questions deal with whether or not children eat the proper foods, and if this may be mother's fault, Miss Wilson will also answer them.

Mrs. Hobart Stocking will announce her 15 minute program. The public is invited to tune in.

Classic Black and White.

Fashionable color combinations and fashionable colors come and go with the seasons, but the style-wise woman has always in her wardrobe at least one all black or black and white costume. Lunching recently at Hollywood's Brown Derby, Irene Dunne wore a sheer black crepe dress with simply draped bodice, short full sleeves, gently flared skirt, its four soft inverted pleats supplying the front fullness, under a black and white dotted linen redingote. Carrying further the black and white theme, the film star's accessories were of black kid, her chic exaggerated beret of black grosgrain accented with white.

Wearless Paths and Driveways.

To rid driveways and paths of weeds quickly, dampen the weeded area thoroughly and throw over a liberal amount of salt.

Household Hints

"Different" Wedding Veil.

Adapted from a native Mexican costume is a new wedding veil, actually a hooded cape, for the summer bride. The entire veil is studded with seed pearls. Framing the face and bordering the edge of the cape, cut rather short in front and dipping to the waist in back, is a wide pleated fringe. New, too, are white satin bridal mittens studded like the veil with seed pearls.

Unescapable Soap.

Looking for a clever gift for your week-end host or hostess? Then look at Castile soap, in lavender and pine odors, in the shape of a gigantic golf ball securely anchored on a heavy cord to hang around the shower-taker's neck. The gift box is as clever as the contents, too.

Adaptable Jacket Costume.

The distinctive simplicity of a gracefully tailored jacket costume makes it charmingly adaptable to any daytime occasion throughout the summer. Of smooth rayon shear, in pale maize, the dress is cut on slender lines with a slightly flared hemline, and the smart holo jacket is just short enough to show off the gay, Roman-striped flannel sash. It's shown with a navy cartwheel and navy pumps to match one of the colors in the sash.

Be Considerate Electric Appliances.

Your electric servants deserve more than just casual care. Upon buying electric equipment, read carefully the directions for its use and care. Don't neglect to keep it clean. (Caution: never wash electric coils with water), be sure to cut on slender lines with a slightly flared hemline, and the smart holo jacket is just short enough to show off the gay, Roman-striped flannel sash. It's shown with a navy cartwheel and navy pumps to match one of the colors in the sash.

Britain May 'Impress' Autos If War Comes

LONDON (U.P.)—Plans to "impress" commercial vehicles in time of war have been completed by the Royal Army Service Corps.

An index of certain suitable vehicles has been prepared. Special bodies for fitting are ready in a secret R. A. S. C. depot.

The R. A. S. C. has sufficient vehicles—ambulances, ammunition lorries, mobile workshops, motor carrying lorries, private cars, and motorcycles—to keep a British Expeditionary Force supplied.

Restricted Divorce Law For Hindus Proposed

NEW DELHI (U.P.)—For the first time efforts are to be made to introduce divorce legislation in the Hindu community in India. A member of the Indian Central Legislative Assembly has given notice of a bill to allow Hindu women to seek divorce when the husband is suffering from certain incurable diseases or is insane.

The bill will be introduced in the next session of the Central Assembly.

Christian Circle 2 Honors Mrs. Griffin At Weekly Meeting

Circle No. 2 of the Christian Women's Council held its weekly meeting with Mrs. A. B. Johnson at 103 S. L Monday afternoon at 3:30.

During the business meeting the circle selected a child to supply with clothing and other necessities during the coming school year.

Mrs. Earl Griffin was honored with a handkerchief shower as she is leaving for Oklahoma City where her husband has been transferred.

At the close of the social hour a refreshment plate was served to Mrs. L. B. Pemberton, B. W. Stevens, H. G. Bedford, J. H. Goodman, Earl Griffin, S. P. Howell, M. A. Park, J. E. Pickering, a guest, Mrs. Seth Ingram of Graham, and the hostesses.

This circle will be hostess to the entire Missionary Society at the church next Monday afternoon at 3:30.

Choir Is Composed Of Thirty Members For Song Service

The Presbyterian Auxiliary met for a song service at the church Monday morning at 9:30 o'clock. The choir was composed of the thirty members who were present.

Mrs. Ernest Sidwell was the leader, and Mrs. Lem Peters was in charge of the music.

Mrs. Jack Hawkins and Jessa Lynn Tuttle sang the solo parts.

Mmes. Edmund Hitchcock and Tom Sealy played violins throughout the song service. Special parts were taken by Mmes. Don Traylor, W. W. LaForce, E. A. Culbertson, J. M. Shrey, and R. Allen.

Mmes. R. C. Crabb, T. D. Kimbrough, D. G. Stookey, and Blanton were on the refreshment committee.

Free facial and skin analysis by Miss Thelma Ballentine, Elmo makeup artist, at Midland Drug by appointment only. Phone 258. (Adv.)

Announcements

WEDNESDAY

Midland County health program will be broadcast over KRLH at 11 o'clock.

The Wednesday Afternoon Club will meet at 2:30 with Mrs. R. C. Moore on S Baird.

THURSDAY

Midland safety council will present its weekly program in the "Old Observer" series in a broadcast over station KRLH Thursday morning from 11:50 o'clock until noon. Billy Noble will have the role of the "Old Observer."

Midland county museum in the courthouse will be open Thursday afternoon from 2:30 o'clock until 5 o'clock. The public is invited.

FRIDAY

Belmont Bible class will meet with Mrs. W. P. Collins, 710 S Weatherford, Friday afternoon at 4 o'clock.

Stitch and Chatter club will meet Friday afternoon at 2 o'clock at the home of Mrs. E. L. Reagan, 211 E. Kentucky.

SATURDAY

Story Hour will be held Saturday morning in the children's library at the courthouse at 10 o'clock.

Midland county museum in the courthouse will be open Saturday afternoon from 2:30 o'clock until 5 o'clock. The public is invited.

CARDINALS, BARONS RAINED OUT

CLUBS WILL MEET THERE IN 2 GAMES THIS AFTERNOON

Rained out in their first scheduled game, the Midland Cardinals will return to Big Spring today for two games with the Barons of the Howard county capital.

Games in Big Spring have been rained out for the past four days. The field was ready for play until shortly before game time at which time another rain started falling. The already damp ground could not soak up the rapidly falling water and soon the field was a quagmire.

The first game this afternoon will start at 3 o'clock and the second affair will also be a day time affair. Probable pitchers for Midland are Parks and Nelson and for Big Spring it is likely to be Soden and Jacot. Soden, curve ball ace of the Barons staff, has lost his last five games but his inefficiency was blamed mostly upon overwork. With almost a week of rest since his last start, Soden will be the chief hope of the Big Spring club for an even split. Both Midland hurlers have also had several days of rest and should be in top condition.

The two clubs return here for games Wednesday and Thursday and the league leading Lubbock Hubbers will be here for games Friday and Saturday.

Another Effort to Inaugurate Softball Leagues Due Today

After one week of efforts toward getting started on the schedule in both the Industrial and Petroleum Leagues, officials today were hoping the rain jinx would let up enough to allow the season to start tonight.

Two games in the Petroleum League (both afternoon games) were played last week but all night games were rained out. As a consequence, the Atlantic Pipe Line company and the Stanolind clubs are leading, while the Industrial League is without a leader yet.

In this afternoon's games, scheduled to start at 5:30, the Baptist Church and the Gulf teams are to meet on the North diamond and the Shell and Texas clubs on the South diamond.

Tonight's games will find the Sinclair and Stanolind clubs opposing each other at 7:30, the Atlantic Pipe Line and Humble meeting in the second game.

Back to Work Again

Taking the mound for the first time since May 3, Dizzy Dean, Chicago Cubs' right-hander, turns one loose for a strike while scoring a 3-1 triumph over the Boston Bees at Wrigley Field, Chicago. Using a sidearm motion to favor his long-ailing arm in his comeback appearance, Dean gave the Bees only four hits and no walks.

Only One Active Volcano in U. S.

MINERAL, Calif.—Volcanologists anticipate eruptions within the next few years from Lassen peak, only active volcano in Continental United States.

Central feature of the Lassen Volcano National park, the volcano, after slumbering for 200 years, became active in May, 1914, as if precursor of the cataclysm of war so soon to follow. The volcano remained in periodic eruption for nearly seven years. The greatest of these explosions, in 1915, was ushered in by the rising of a mushroom-shaped cloud of smoke to a height of four miles. This was accompanied by a superheated gas blast which withered or destroyed every living thing over a ten-mile radius. Large trees were uprooted. Forests were scorched to a cinder, spreading fires. Large snow fields were instantly turned to water that flooded the lower valleys in rushing tides.

In addition to Lassen peak, which has an altitude of 10,453 feet, this northern California park contains other volcanic cones, fantastic lava fields, hot springs, mud volcanoes and boiling lakes. Some of the volcanic ash formations are similar to those in the proposed Big Bend National park in Texas, where there were ancient craters.

The highly colored earth, the sulphurous odors that rise from the ground, the roar of live steam coming up under pressure from vents, boiling pools, gurgling mud pots and small peyserlike formations all contribute to the weird atmosphere that hangs over most of these areas. There are impressive canyons and forests, and numerous alpine lakes.

Boiling Springs lake, encircled by a forest of conifers, is a seething cauldron with a shore line of about 2,000 feet. Willow creek geyser and the Devil's Kitchen afford much interest to park visitors. This geyser is one of the most active in the park. The Kitchen is a half-mile of canyon between lofty walls of volcanic rock. Most of the active geysers are found in Bumpas Hell, on the ancient crater rim, 8,000 feet above sea level.

Chaos Crags and Chaos Jungles present the most spectacular scene of turbulent disorder to be found in the entire region. Piles of huge angular blocks of stone have been

thrown together in wild confusion over the surface of these domes. Enormous banks of talus, many of them over 1,000 feet high, encircle the domes, merging at the northwest into the choppy disarray of the Jungles.

Though hotel and cottage accommodations are available, Lassen Volcanic National park, established in 1916, is primarily a campers' park. Three camping spots have been developed and set aside as free public campgrounds.

There's bathing, fishing and swimming in the park, one section of which is kept open throughout the winter, for snow sports enthusiasts.

Refrigerating Need Cited by Physician

AUSTIN—Recent outbreaks of food poisoning show very strikingly the need for special care in handling and refrigerating any food that must be prepared some time in advance of serving, states Dr. Geo. W. Cox, state health officer.

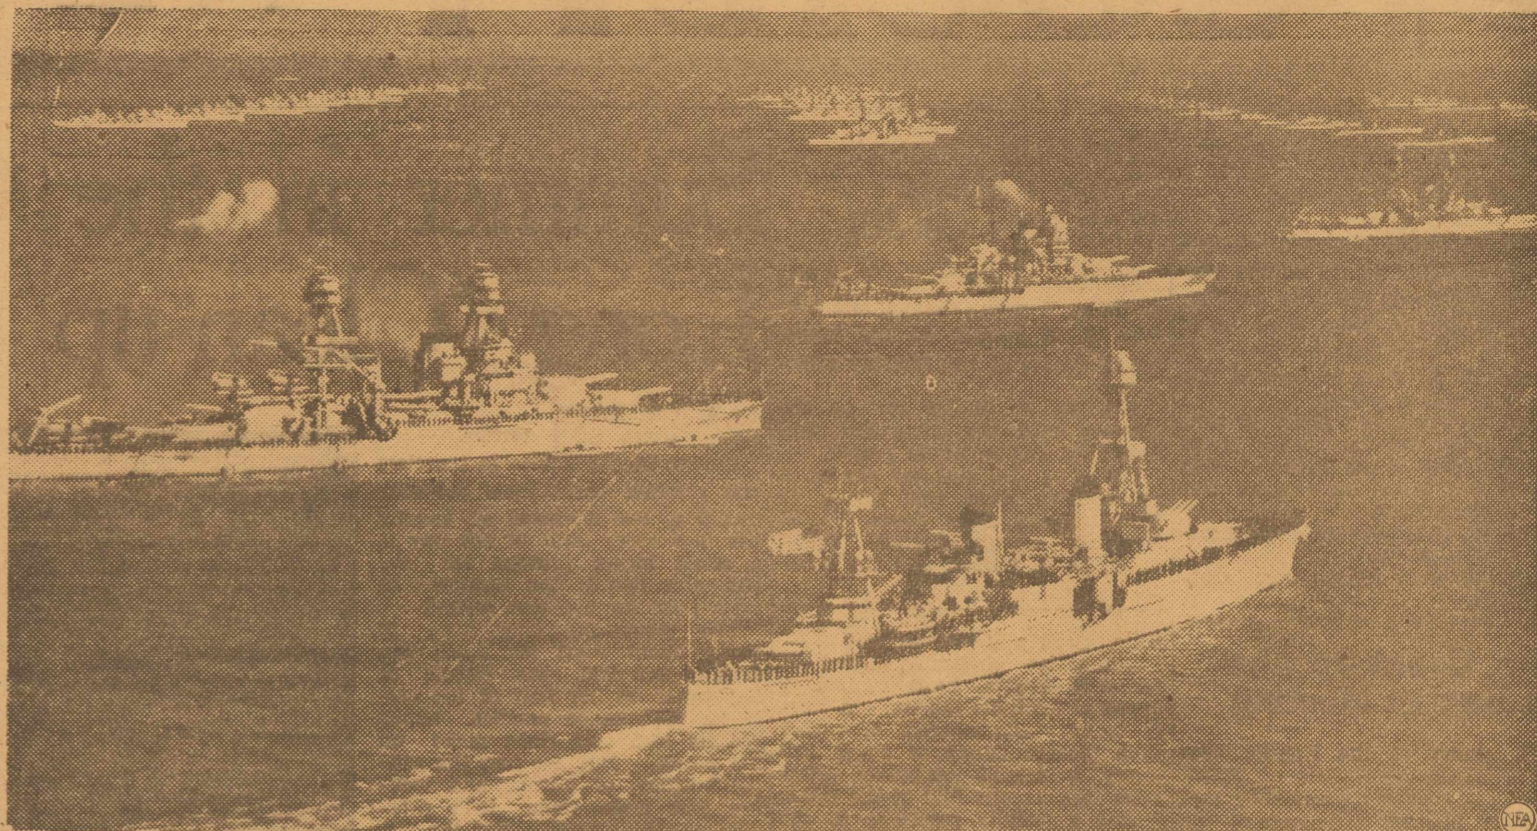

"Prevention of food poisoning requires clean food handled as little as possible and consumed while it is fresh. Foods prepared hours before serving, and allowed to stand at warm temperatures become good culture media for bacteria. Cooked products of a perishable nature are readily subject to decomposition, and must be kept well refrigerated.

"Most food poisoning is caused by infection by certain types of bacteria which grow rapidly under favorable conditions, such as high temperature and high humidity. The infection may come from dirty hands, utensils, flies, rodents, contaminated water, infected food materials and in some cases in certain types of bacteria, which are rapidly spread and not necessarily associated with filthy conditions.

"Picnic food is particularly susceptible to transmitting food poisoning to the members of the picnic party. Be sure you have sound, fresh, foods clean, free from stagnant odors, slime, etc. Require all who prepare the food for use to wash their hands thoroughly before handling it. Avoid excessive hand contacts with the food. See that clean containers are used and that special care is exercised in wrapping foods and in protecting them from contamination.

"If food must be prepared much in advance of use, cook it thoroughly, keep it refrigerated and otherwise protected at a temperature under 50 degrees F. until you are ready to use it. Avoid serving foods that are readily infected, such as certain salads, and cream-filled pastries. Any foods that are not to be

As Big Guns of U. S. Navy Boomed a Salute to the Chief

With smoke still rising from the guns of three huge battleships this picture shows the U. S. S. Houston, with President Roosevelt aboard, cruising by in review to receive the navy's 21-gun salute to the chief. This pageant of naval might, staged in San Francisco Bay, was the most spectacular review the Pacific coast had seen in many years. The three vessels in the foreground, in addition to the Houston, are the battleships Pennsylvania, Idaho, and Nevada. Riding at anchor in the background are four lines of 60 fighting boats. After passing the battleships, the Houston, with the President's flag flying from the mast, swung to the left and then circled the fleet.

Behavior Clinic On Crime Urged

CLEVELAND (UP)—A city child clinic to help parents solve their children's behavior problems has been suggested in the biennial report of juvenile court.

If such a clinic is established, Cleveland will be a pioneer in this field.

The court's report, written by M. S. Laird, the court's research director, said that the clinic would aid in preventing delinquency.

"The court is sometimes asked to act in this capacity, but too often this help is requested much too late," the report said.

It added that a clinic of this type should co-operate with the public and parochial schools, the child-caring agencies and settlements, the child guidance clinic and the juvenile court. The clinic might develop to where it could take over the social treatment and readjustment of delinquents.

Emphasis of Might Behind President's Peace Plea

The great guns of the U. S. cruiser Houston form an emphatic background as President Roosevelt and Rear Admiral Claude C. Bloch are pictured watching the might of 65 war vessels parade past them in review at San Francisco. The President stood under the guns of this armada as he made his plea for a disarmament move in 1939. The Houston is presidential headquarters for Mr. Roosevelt's tour of the Galapagos and Cocos islands which will bring the President back to the east via the Panama Canal.

Solid Comfort on the Firing Line

With a minimum of exertion, C. F. Hill, secretary of the English Eight Club, squints through telescopic sights in the 1100-yard shoot of the National Rifle Association's imperial meeting at Bisley, England.

"CAN'T BEAT IT FOR VALUE!"

Says O. H. Deans about the big, 2-ounce red tin of this popular "makin's" tobacco

THE Deans brothers (O. H., left, and Bruce, right) interrupt Bill Tew (center—selling a plow) long enough to get in some praise for their "makin's" tobacco. Says "O. H.": "You sure get full value with Prince Albert!" "Suits me just fine," adds Bruce. Prince Albert twirls up in a jiffy into swell cigarettes. They burn slower, cooler—and you get around to 'em from every 2-ounce tin. Just open a tin—small Prince Albert's fragrant aroma—you'll know why P. A. gives tastier, mellow, milder, "makin's" smokes.

O. H. DEANS (he's the one on the left) says: "There's a heap of smooth rich taste and good body to a P. A. 'makin's' smoke—and no harshness! For 'makin's' tobacco, that extra-mild Prince Albert just can't be beat." (Nothing like mild, mellow P. A. for pipes, either!)

served immediately should be kept on ice. Milk, ice cream and dairy products in general should be from approved sources.

"Digestive upsets cannot always be blamed on the food served or eaten at an outing. Sometimes excessive heat and humidity combined with over-exertion and over-heating, as well as over-eating, help to bring them about. Remember this, and don't indulge in too strenuous exercises when the days are hot and muggy. Don't over-indulge, either, in: unwise combinations of foods."

Old Log Cabin Shingled.

Montreal Maps Aid to Safety

MONTREAL (UP).—One of the greatest drives ever undertaken in Canada to reduce the motoring accident and death toll is to be opened by police here.

The campaign, organized secretly upon the orders of Director of Police Fernand Dufresne, involves appointment of the first police "traffic engineer" in Canada, setting up of a motoring "rogues" gal-

Free facial and skin analysis by Miss Thelma Ballentine, Elmo make-up artist, at Midland Drug by ap-pointment only. Phone 258. (Adv.)

lery," and taking of a complete census of accidents at street inter-sections throughout the city. It is the result of 6,441 city accidents in which 76 were killed and 2,738 in-jured last year. The goal of the campaign is a 50 to 60 per cent reduction in accidents.

The city's first police traffic en-gineer is Howard M. A. Baker, who was sent to the Harvard univer-sity's bureau for street traffic re-search to study for one year. His official title is "Traffic Engineer of the Montreal Police Department."

The first such police post ever created in Canada.

Baker's task will be to undertake engineering studies and analyses of accidents to ascertain their causes and to develop remedial measures. The studies include vol-ume statistics of direction and turning movements of vehicles, speed figures, vehicle and pedestri-an observation of traffic lights and stop signs, pedestrian movements, and parking practices.

Collision diagrams will be used to show the accident experience at certain areas and to bring out any outstanding similarity of acci-dents. Condition diagrams will be used to depict the physical condi-tion in hazardous locations with a view of localizing conditions that might have a direct bearing on accidents, such as a high hedge at a street corner which cuts down vis-ibility, causing right-angled colli-sions.

Rogues' Gallery Set Up.
The motoring "rogues' gallery" will contain the list of offenses committed by all motorists. In fu-ture, when a Montreal motorist is brought to trial on some charge associated with an auto accident, police will be able to supply the man's motoring "record" and if it is bad it will go against him.

The accident census is being made to determine the most dan-gerous spots in the city. An in-vestigation and compilation of data on 324 intersections where four or more accidents have oc-curred during the past eight months have been completed. The survey has taken eight months.

Canada Builds Giant Hangars

WINNIPEG, Man. (UP).—The Trans-Canada Air Lines' hangars here and at Lethbridge have been built with an eye to the future.

Reaping the benefit of the ex-perience of American and Euro-pean airlines, whose hangars often have proved inadequate as large aircraft came into use, Trans-Canada officials have designed both the Winnipeg and Lethbridge hangars so that the space in them can be doubled if necessary, giving a clear opening of 200 feet, or suf-ficient to accommodate any size of aircraft likely to be used in the Canadian service.

The main hangar and the two-story administration building here have been completed, and the gen-eral staffs and technicians have been transferred from temporary offices to the permanent quarters. Aircraft will be moved into the hangar as soon as the taxi strips from the main runways of the air-port are completed. Part of the machine shop, engine test house and several concrete aprons are still under construction.

The main hangar, of brick con-struction and with steel frame-work supporting huge areas of glass on two sides, is large enough to accommodate four of the Lock-heed 14's at one time, together with smaller aircraft.

Feldspar Area Open Now for Mining Claims

CUSTER, S. D. (UP).—Mining in the largest feldspar and permitte deposit in the United States will be permitted under modification of restriction regarding mining in the game preserve of Harney Peak National forest, according to M. W. Heumphaeus, South Dakota mining inspector.

The modifications throw open approximately 46,000 acres ad-joining Custer State park. Only two sections around Mount Rush-more will be excluded.

Heumphaeus predicts that with the larger mining territory South Dakota will lead the nation in feldspar production. It was second to North Carolina last year.

Permits to mine will be issued to civilians, and must be obtained through the mine inspection office. Heumphaeus said. No permits will be issued for claims within 660 feet of federal, state or county roads, and all federal and state mining laws must be obeyed.

No production plants or mills can be erected.

Title of the mining claims will remain with the government. Heumphaeus said, although indi-viduals may work the claims for an indefinite period. There will be no government charge for opera-tion of claims.

Quarrel Between 2 Brothers Ends With Both Near Death

TISHOMINGO, Okla., July 26 (AP).—Brothers Nick and Ike McDonald were wounded critically today in what officers described as a duel climaxing a quarrel lasting for years.

The brothers, both in their forties, were found by families in a pasture at dawn. Nick was suffering a shot-gun wound in the stomach and Ike had wounds near the heart.

The two lived on adjacent farms, and the latest quarrel was said to have been over stray calves.

following fall and winter. In some instances the shelters were located on the open prairie fully two miles from territory where quail had been known to winter before, and Leh-mann found they attracted and held coveys.

The fenced shelters, Lehmann found, can be established at little cost, and can be made to produce quick results.

Two types of shelters are recom-mended, one for regions having na-tive cover, and the other for regions where no native cover is present and must be created artificially by brush piles. Crops planted in the shelters should be rotated.
