Bovina, Texas

VOL. IX NO. 44

WHITTLIN'

BY DOLPH MOTEN

There's no doubt about it. Horses are on their way back.

To prove our point, we'll make mention of the three horse shows which are scheduled for the Bovina Roping Club's arena here in the next few months.

First is the Appaloosa show which is Saturday. Next is the county 4-H Club horse show scheduled for June 12. And in August, of course, as a part of Bull Town Days, is the annual Quarterhorse show.

Say we have 100 horses at each of the three shows -- and that's not a bad guess for the average -- that makes 300 head of horses which will be brought to Bovina this spring and summer. That's a lot of horses to be brought to a small town.

The people drawing power of horse shows shouldn't be overlooked from a business standpoint. Folks, who have show-type horses, as a rule, have money to spend for other things.

This community is extremely fortunate to be honored with these three shows, according to our way of thinking. The shows need the backing, support and cooperation of all segments of the business community.

There has been a certain amount of lack along these lines in years past.

A few columns ago, we quoted Bovina High Principal Alan Staley in regard to the fact that BHS was one of the smallest schools in the state to offer two foreign language courses.

We got away with it for a couple of weeks, too.

Then, we received word from Albert Fuller, the superintendent at Lazbuddie. He says that he likes to see people proud of their school. And of the number of foreign language courses those schools offer.

He's proud of his school, too. Lazbuddie offers three foreign languages -- Spanish and German, as does Bovina, plus French!

We're glad to give our neighboring school district its just recognition for including those courses in its curriculum.

John Santa Fe has received more compliments from Bovinians in the past seven days than it has in the past seven years. Those new railroad crossings are wonderful!

For shock-up motorist who were used to crossing them in their former state of disrepair, the smoothness is pleasantly surprising to say the least.

When we cross them now, we keep waiting for those jolts which we were accustomed to which never come.

The only people we know who could be unhappy about the improvements are those in the wheel alignment business. What Santa Fe has done on the crossings in Bovina won't do a thing to help their business. And we're glad!

Planning for a junior college in this area continues.

Muleshoe is carrying the ball for the project which would include forming a junior college district consisting of Bally and Farmer counties plus school districts in the northern part of Lamb County.

Two weeks ago, The Blade had a story of medium length with a four-column headline about a meeting concerning the junior college, which will, in all likelihood, be located at Muleshoe.

Junior colleges are becoming a greater and greater part of the higher education picture and probably one would be beneficial to this area. The big drawback, as it is to most everything, will be money. The junior college district has taxing power just as does a county, school district, city or any other branch of government. Supporters of the junior college will have to show the people that the school will be worth enough to the area to justify the increased taxes.

We're all for education, including junior colleges.

We're not, however, especially interested in helping Muleshoe be a better town -- we're much more interested in Bovina

(Continued on page 6)

THIRD ANNUAL--

Appaloosa Horse Show Here Saturday

Club Expects 100 Entries

BASEBALL BENEFIT--

Chicken Fry Set Sunday

Financing for the boys' baseball program here for this summer is scheduled to be taken care of Sunday.

Bovina Lions Club, sponsor of the baseball program, will have its annual chicken fry in the school cafeteria from 12 noon until 1:30.

Everyone in the community is invited to attend the dinner, announces Vernon Estes, who is in charge of it for the Lions Club.

Tickets are \$5 per couple and \$1 for children. Members of the Lions Club have been sold in advance by members of the civic organization for the past three weeks.

The meal, which will feature "all the chicken you can eat," according to Estes, will be prepared and served by Lions Club members.

The baseball program is expected to cost in excess \$500 and this is the primary fund-raising event for it.

LOTS OF COLOR --- This Appaloosa yearling stallion, Gem Dandee, owned by Earle Hise of Bovina, displays an abundance of the desired Appaloosa coloring and spots. He will be entered in the 1964 stallion class in Saturday's third annual Appaloosa Horse Show here. With proper ownership pride, Hise describes the colt as having "a million dollars' worth of color."

The first horse show of the season is scheduled here Saturday. It is the third annual Bovina Appaloosa show and will be at the Bovina Roping Club arena west of town.

Judging is scheduled to get underway at 10 a.m.

Halter classes, a total of 13 of them, will be judged during the morning, time permitting, with performance classes slated for the afternoon. There will be six performance classes including junior and senior reining, junior and senior cutting, Western pleasure and open calf roping.

Roping club members are hoping to have 100 or more horses entered in the competition. "It's hard to estimate how many you'll have," comments Hugh Moseley, Roping Club secretary. In '63, the first year of the Appaloosa show, 94 were entered. Last year, the total dropped to 57.

Some members of the sponsoring organization felt that the decline might have come about because the show here did not award trophies to first place winners. The situation has been

changed this year, however, and all first place class winners will be given trophies. In addition, rosettes will be given to the first six place winners in each class.

Hud Rhea of Roswell will judge the show.

The show is approved by the Texas Appaloosa Horse Club and the Golden Spread Appaloosa Horse Club. Each of those organizations will receive \$1 per entry fee.

All horses entered, except 1965 foals, must be registered in the foundation or tentative registry of the Appaloosa Horse Club, which is headquartered at Moscow, Idaho.

The entry fee per horse in the halter classes is \$7. Fee for performance classes is \$11 with \$5 per horse jackpot to be paid back to the top four placers at the rate of 40 per cent for first, 30 for second, 20 for third and 10 for fourth.

Bobby Calaway will be arena director. Mrs. Robert Read will be show secretary. Alan Staley will serve as announcer.

The Appaloosa show is one of the two planned by the Roping Club this year. The annual Quarterhorse show is scheduled for August 21 as a part of the community's Bull Town Days celebration.

A final planning session for Saturday's show was held by Roping Club members Monday night in Bovina Restaurant.

Okla. Lane Church Has New Pastor

Oklahoma Lane Baptist Church has a new pastor. He is Rev. Wayne Baldwin who began his duties there Sunday.

Rev. Baldwin comes to Oklahoma Lane from Eola, in Concho County near San Angelo, where he pastored a church for a year. Prior to going to Eola, he was pastor at Hamby, in Taylor County near Abilene, for two years.

A graduate of Howard Payne College at Brownwood, he served a church at DeLeon for three years while he was attending college.

Rev. Baldwin is married and has three small daughters.

Ray Wood, music and education director of the church, has been filling the pulpit for the past six months while the church was without a pastor.

Rev. Baldwin is a native of Brady.

REV. WAYNE BALDWIN

Students Have Picnic Day

Tuesday was "Picnic Day" for Bovina High students.

At 11, students adjourned to the football field for a picnic lunch and an afternoon of games and activities.

Weather by Willie

Anything from a Methodist sprinkle to a road strangler is in prospect.

OF '65 GRADUATING CLASS--

Looney, Minter Honor Students

Valedictorian of Bovina High's 1965 graduating class is Lynn Looney. She has an average of 95.31 during her four years in high school. She is the daughter of Mr. and Mrs. Howard Looney.

Billy Minter is salutatorian. His average for four years is 94.93. His parents are Mr. and Mrs. Henry Minter.

Third high student in this year's graduating class was Judy Strawn, daughter of Mr. and Mrs. Norvell Strawn, with an average of 92.83.

Announcement of the honor students from this year's graduating class of 27 was made this week by Alan Staley, high school principal.

Other members of the class who have an average of 90 or

more are Sandra Patterson, David Anderson, Tonya Ivy and Patsy Lloyd.

Commencement exercises are scheduled for Wednesday, May 19 at 8 p.m. in school auditorium.

SEASON STARTS MAY 24--

Players Named To Ball Teams

Bovina's boys' baseball program begins the 1965 season

May 24. That announcement was made this week by Gary Cox, one of the leaders of the program for Bovina Lions Club, following a meeting of team coaches and sponsors last week.

The schedule for Little League and pee wee teams has been drawn and players have been divided into teams for these two groups.

Planning for the Pony League is expected to be completed soon, possibly in connection with Friona's teams.

Six teams will compete in the Little League division with Bovina providing three, Oklahoma Lane one and Texico-Farwell two. In the pee wee league, Oklahoma Lane will have one, Texico-Farwell one and Bovina two.

Little League and pee wee games will be played both at Bovina and Farwell. The schedule will be printed in the Blade the week before the beginning of the season.

"He's in good condition," Coach Stone said in commenting on Carson's chances at state.

get to Austin."

Carson's best time of the year is 4:50.5.

He competed in an all-corners meet Saturday at Lubbock for athletes who had qualified for the state meet. He ran a 5:05 in it but Coach Stone says that he trained too hard the previous week in preparation for the state meet to be ready to run Saturday.

"We'll slack off today (Wednesday)," Stone says, "and just try to keep him ready until we

son's parents, Mr. and Mrs. M. H. Carson, will leave Thursday for the meet.

Coach Stone says he believes Richard will qualify for the finals and according to the times of other boys in the race, "He could do pretty well in the finals."

Carson was put through intensive training last week and Monday and Tuesday of this. "We'll slack off today (Wednesday)," Stone says, "and just try to keep him ready until we

NEW MOTEL OWNERS --- Mr. and Mrs. A. J. Hood have purchased Sands Motel on Highway 60 in Bovina and assumed management of the business Saturday. They purchased the motel from Mrs. Ada Brummett who has operated it since November 1960.

MR. AND MRS. A. J. HOOD--

New Owners At Motel Here

Sands Motel on Highway 60 in Bovina is under new ownership and management.

Mr. and Mrs. A. J. Hood have purchased the business from Mrs. Ada Brummett, the transaction was effective Saturday.

Hood has been an oil well driller for the past 18 years, working for Iraq Petroleum Co. in the Arabian Gulf for the past eight years. Prior to that, he worked in California for five years. He is an Air Force veteran of World War II.

Both Mr. and Mrs. Hood are natives of Winters. They became acquainted with this area through relatives who live in Farmer County. Mrs. Buck Gregory of Lariat is Mrs. Hood's sister. He has a sister, Mrs. Douglas Stephenson, who is a teacher in the Friona school system.

Mrs. Brummett operated the motel from November of '60 until Saturday.

She has moved to Perryton, her original home, to retire. "We have relatives in the area and we like this part of the country," Hood said in explaining why he chose Bo-

vena as a place to settle down after eight years of overseas oilfield work.

The motel's change of ownership is announced in advertisements in this issue of The Blade.

(Continued on page 3)

IN MILE RUN--

Carson In State Meet This Week

Miller Richard Carson will represent Bovina Mustangs track squad in the state track meet in Austin this weekend.

Carson qualified for the state meet by placing second in his event in the regional meet at Lubbock 10 days ago. He was the only Bovina athlete to qualify for the state meet.

He will run in the preliminaries Friday morning and the finals are slated for Saturday afternoon for those who qualify, announces Coach Roy Stone, Carson, Coach Stone and Car-

son's parents, Mr. and Mrs. M. H. Carson, will leave Thursday for the meet.

Coach Stone says he believes Richard will qualify for the finals and according to the times of other boys in the race, "He could do pretty well in the finals."

Carson was put through intensive training last week and Monday and Tuesday of this. "We'll slack off today (Wednesday)," Stone says, "and just try to keep him ready until we

Reflections

From *The Blade*

SIX YEARS AGO - MAY 6, 1959
 Allan Ray Wilcox was high scorer in Bovina Jaycees-sponsored teen-age road-e-o here Saturday.
 Forty-seven students were absent from elementary department of Bovina Schools Monday morning, reports Miss Grace Paul, grade school principal.
 Cary Joe Magness, Farwell, was elected president of Farmer County Chapter of March of Dimes.
 Coach Charles Don Smith's Bovina Mustangs continue to be on top in District 3-B baseball circuit.
 Two Bovina Main Street business buildings are being remodeled. Carpenters began work Monday morning on face-liftings for Bovina Beauty Shop and Trimble Barber Shop.
 Nine Bovina Boy Scouts, with Scoutmaster Vernon Estes and H.M. Odom, went camping in Palo Duro Park over the weekend.
 A crowd of over a hundred attended a piano recital presented by Mrs. Margaret Caldwell's music students Sunday afternoon.
 THREE YEARS AGO MAY 3, 1962
 With one of the highest averages in the history of Bovina High School, Jerry Rigdon has been named valedictorian of 1962 graduating class. During his four years in high school he compiled an average of 97.1. He is the son of Mr. and Mrs. Hodge Rigdon.
 Bovinas Gun Club Team No. 1 was first place winner in a team shoot in Friona Sunday.
 Dr. J.E. Shubert, district superintendent from Plainview, spoke to Methodist Men and wives at the annual Methodist Men's Ladies Night Banquet Wednesday evening at Bovina Methodist Church.
 Student Council representatives for Texas Tech's 1962-63 term were elected recently. Representative of Home Economics was Nickle Woefel of Bovina.
 Valedictorian of Bovina's eighth grade graduating class is Marha Irene Thornton, daughter of Mr. and Mrs. William Thornton. She has an average of 93.4 for two years in junior high.
 Democratic primary election, which features a pair of local races this year, is slated for Saturday.
 Qualified voters will mark their ballots for a county commissioner for Precinct 2 and for a justice of the peace in this voting precinct.

Dear Fellow Texan:
 Last year, we on the Senate Subcommittee on Frauds and Misrepresentations Affecting the Elderly, looked into the shocking situation of promoters, quacks, and dishonest salesmen who present to the elderly, various shams in the disguise of sorely needed goods and services.
 We found that there are four different types of services where fraud and misrepresentation is common. These are health foods and mail order medicines, mail-order sales of land, health insurance plans, and prepurchase of burial plans. Unfortunately, this area is confusing because in each of these areas there are responsible and honest businessmen offering responsible and honest goods and services.
 Today, Americans spend more than \$1 Billion a year for worthless health aids and quack medical cures - much of this is spent by the elderly. I would advise that you consult with your own physician or public health agency before buying such claimed cures or devices - this could save a great deal of expense and in some cases, heartbreak.
 Many elderly citizens also purchase land for homesites in faraway states, which has been misrepresented. Lands have been sold to the elderly which were under six feet of water and other lands have been sold to the elderly which were in the middle of the desert with no water. To avoid this deception, our Subcommittee has recommended requiring

Ponies Drop District Tilts

Bovina Mustang baseballers dropped their opening two district baseball games last week though they outlit their opponents in each game.
 Playing Nazareth Wednesday, they dropped a 7-4 contest. In a game with Lazbuddie here Thursday afternoon, they lost to Lazbuddie, 5-3.
 Al Shamblin went the distance on the mound for the Mustangs in both games, allowing only two hits to Lazbuddie.
 Gene Pruitt's triple was the big offensive blow for the locals in the Nazareth game.
 Coach Gary Cox's boys played Nazareth here Tuesday afternoon and conclude the season with a game at Lazbuddie Friday.

HORSE SHOW PRACTICE --- Farmer County 4-H Club members with horse projects went through a practice session Saturday afternoon at the roping arena here. Some 50 horses were on hand to practice for the county show which is scheduled for June 12. Shown here is a halter class "warming up" for the main event in June.

Pvt. Barron In Hawaii With Army
 HAWAII --- Army Pvt. Jerry L. Barron, son of Mr. and Mrs. Rouel G. Barron of Bovina, was assigned April 19 to the 25th Infantry Division at Schofield Barracks, Hawaii.
 Barron, a medical aidman in Headquarters Company, 1st Battalion in the division's 35th Infantry, entered the Army in November of 1964. He completed basic training at Fort Polk, La., and was last stationed at Fort Sam Houston, Tex.
 The 22-year-old soldier is a 1960 graduate of Bovina High School.

Mrs. Bell's Father Dies
 Alfred Guy Cooper, 67, father of Mrs. Durward Bell of Bovina died Wednesday of last week in University Hospital in Oklahoma City, Okla.
 Mr. Cooper underwent emergency surgery Monday morning. Funeral services were held Friday at the Methodist Church in Gruver with Rev. R. L. Kirk officiating. Burial was in the Gruver Cemetery.
 Mr. Cooper was born in Washington, Pa. and moved to Hansford County in 1917.

these mail land sales to be registered with the Securities and Exchange Commission.
 To avoid having the elderly become the victims of fraudulent health insurance, our Subcommittee recommended making it illegal to sell such insurance in violation of the statutes of a State where the sale or advertisement is made. It is hopeful that the "Medicare" bill will help relieve the temptation which a few unscrupulous so called insurance salesmen hold over the elderly.
 By care and caution, it is hoped that prospective buyers can avoid being trapped by the promoters of fraudulent burial services in advance of death. Many of these contracts promise much more than is actually provided, and the fraud may never be realized after the death of the buyer. Such frauds hurt the honest burial associations as much as the elderly.
 I would emphasize that the best protection that the elderly have is by being cautious and informed. However, in complex areas such as these, I think the Federal government should help protect their citizens against those who prey on the elderly.

PARMER COUNTY'S FINEST

A NEW DISHWASHER!--

Betty Hawkins Wins Nat'l Recipe Contest

Mrs. Harold (Betty) Hawkins of Bovina has received word from Better Homes and Garden Magazine that her recipe for Weenie-Lottas has won first place in the Quick and Easy Recipe Idea Contest. She entered the contest last November.

First prize was a General Electric dishwasher and the grand prize was \$5000. To qualify for the contest the recipe had to be an original, the brand names included in the

recipe so that the flavor would be the same and as easy to prepare.

There were thousands of entries in the nation-wide contest. The recipe is as follows:

Weenie-Lottas
1 package Armour weiners
10 tortillas
1 large can Wilson's chili
1 cup grated Longhorn cheese
10 small pickled chilies
Heat weiners, dip tortillas into hot grease just a few seconds, roll weiners in tortillas, place on a large heatproof platter. Heat chili undiluted and pour over the tortillas, sprinkle with grated cheese, garnish each tortilla roll with chilies. Place under broiler until cheese melts. Serve at once. This will make enough for five servings.
Betty gives the credit to her husband, Harold for the name Weenie-Lottas.
Betty says "the '59 model dishwasher I'm using is just about shot and the new one will surely come in handy."

FIRST PRIZE WINNER -- Mrs. Harold Hawkins is shown with a letter informing her that she is a first place winner in a nation-wide magazine's recipe contest.

School Menu

Monday, May 10
Weiners and kraut, creamed potatoes, June peas, rolls, butter, half pint of milk, rice pudding.
Tuesday, May 11
Roast beef, brown gravy, creamed potatoes, buttered spinach, rolls, butter, half pint milk, peach halves.
Wednesday, May 12
Barbeque beef on bun, buttered corn, cabbage and green pepper salad, olives, brownies, half pint milk.
Thursday, May 13
Turkey salad, baked potatoes, lime jello salad, hot rolls, butter, half pint milk, wheat cookies.
Friday, May 14
Fish sticks, tartar sauce, baked beans, sliced tomatoes, cornbread, butter, half pint milk, apricots.

Wayne Rhodes Parents Of Son

Mr. and Mrs. Wayne Rhodes of Friona are the parents of a baby boy born Thursday, April 29, in Parmer County Community Hospital at 6:15 a.m. Robert Shane weighed 6 lbs. and 3 oz. Paternal grandparents are Mr. and Mrs. O. C. Rhodes of Friona and maternal grandmother is Mrs. George Lowe of Lompoc, Calif. Mrs. Rhodes is the former Judy Meachum.

Methodists Have Quickel Fish

Mr. and Mrs. I. W. Quickel provided the fish for family night at Bovina Methodist Church Thursday night.
Each family brought a covered dish and the Men's Class was host for the fish fry.
The children had a movie while the adults visited following the meal.

MISS PATSY LLOYD

Engagement Revealed

Mr. and Mrs. Travis Lloyd of Bovina announce the engagement and approaching marriage of their daughter, Patsy, to Larry Webb, son of Mrs. Bessie Webb, also of Bovina. All friends of the couple are cordially invited to attend the ceremony at 3 p.m., Sunday June 13 at the First Baptist Church in Bovina.
Invitations will not be mailed locally.

WITH BANQUET--

WMU Honors Senior Class

The WMU held its annual Senior Banquet Thursday night in First Baptist Church of Bovina.

The theme for the banquet was "Hitch Your Wagon to a Star". The ceiling was covered with hanging silver stars from a sky blue background.

Tables were decorated with Manzanita trees, with stars hanging from the limbs, and blue streamers with stars and stardust down the center of each table.

Jack Boggs, music and education director, served as master of ceremonies. Rev. Ralph Aday gave the invocation. Mrs. Ovid Lewis, WMU president, gave the welcome and Gary Beauchamp gave the response.

Margie Lynn Circle Meets

Margie Lynn Circle of the Methodist Church met at 2:30 p.m. Tuesday.
Mrs. Wilbur Charles led the program, "Money, a Tool for Fulfillment". Mrs. G. A. Bandy assisted her and following the program a question and answer session was held.
A business meeting was conducted by Mrs. Earl Ware. A motion was made and carried that a news report would be presented to the Bovina Blade each week.
The group discussed the spring district meeting in Olton May 6.
Mrs. Ivy led a short discussion on the book of Exodus.

Miss Shockley Earns Honor In Arizona

Myrtice Shockley, a former student of Bovina Schools, was selected as one of 14 students in Arizona to participate in the conference which is designed to help develop future leaders for marketing and distribution. She attends Mesa, Ariz., High School now.
Miss Shockley went to Chicago to attend the 19th Annual National Leadership Conference of the Distributive Education Clubs of America.
Myrtice is the daughter of Mr. and Mrs. Amos T. Shockley of 514 South Kachina in Mesa, Ariz. She is employed by the Arizona Bank, East Main Branch as part of her Distributive Education studies.
Myrtice has also qualified for a national office and plans to run for secretary-treasurer of National DECA.

Society Plans Sausage Dinner

The Guadalupe Society of St. Ann's Catholic Church held its regular monthly meeting Sunday. Plans were made for May 30th, the day on which 17 youngsters will receive their first Holy Communion.

The gowns to be worn by the children were made by the members and will be distributed by Mrs. Gloria Sandoval who is the chairlady.

Breakfast will be served to the children taking the first Communion immediately after the 8:30 a. m. Mass. The committee in charge is Mrs. Anthony Brito and Mrs. George Cervantez.

Arrangements for a Sausage Dinner to be served Sunday, May 16, were made. Final preparation will be done on Saturday, May 15, and all members are urged to be present. Prices for the dinner will be \$1.50 for adults and children under 12, 75 cents.

The meeting was dismissed with a prayer led by Rev. Claver Gilhin.

Refreshments were served by Mrs. George Cervantez and Mrs. Pete DeLeon.

Mrs. Steve Calhoun, a former resident of Bovina was here last week visiting friends and relatives. Mrs. Calhoun now lives in Winslow, Ariz.

J. W. Harris and Aubrey Brock spent a few days at Falcon Lake last week.

"A ROMAN HOLIDAY"--

Junior - Senior Banquet Friday

Annual Junior - Senior Banquet is Friday at 7:30 p. m. Guest speaker will be Rev. James McGenley, pastor of the College Avenue Baptist Church in Lubbock.

The theme for the banquet will be "A Roman Holiday." The Junior class is in charge of the decorations, program and menu.

After the banquet, parents and

friends are sponsoring a party for the high school in the Legion Hall.

The Juniors and Seniors will be guests of honor. The "Epics" of Eastern New Mexico University will play for the party. Admission for sophomores and freshmen will be \$1.00 per person.

The party will be semi-formal.

PAT'S TER

By Pat Hawkins

With school soon to be dismissed, the seniors have a full schedule of social functions to attend. Chances are that a few have already thought of the future. Can remember one senior that had a few misgivings about this big step in life. All the years spent planning on graduating and then in no time it was that time and how nice it would have been just to add a few years and enjoy that warm security of home.
Here's wishing the very best to each of you seniors and may the success of the world be yours.

It won't be long until camp time. Think this is one of the best opportunities for the youngsters to get acquainted with other children in other areas, and to see how they think and live.

The experience of roughing it is something in itself that will long be remembered.

Noticed that the little leaguers of the community are getting out the bats and balls and polishing up their gloves for the summer session on the diamond.

My hat's off to each and every supporter of this program. Believe it is as good as any and a lot better than most as far as participation and support.

It's spring cleaning time again. Read some helpful hints on how to enjoy this yearly ordeal. I admire any one that can say truthfully that they enjoy sweeping out winter to make room for summer.

The said article advises you to refuse all dates for one week, arrange for meals to be taken elsewhere, buy a new costume to fit the occasion and finish one job before starting another.

No doubt, I have always approached this thing all wrong. Things are always more rushed at the time I start than any other time of the year, and usually have unexpected guests once or twice walking over all the unfinished projects.

After this joyful week of digging out all the corners, the articles goes on to say you should treat yourself to a full week of parties at the beauty shop, Turkish bath, etc. In the meantime the wrecking crew has been busy while mommie was away and everything is back to normal in the house.

Mrs. Gober Hosts Wednesday Bridge

The Wednesday Afternoon Bridge Club met in the home of Mrs. Scott Gober last week for its regular meeting.

Ladies winning prizes for the afternoon were Mrs. Glenn Hromas, high, and Mrs. Bob McMeans, travelling prize.

The hostess served the group cherry and blueberry-banana pie, cheese pick-me-ups, relishes, coffee and cokes.

Those present were Mrs. Glenn Hromas, Mrs. Lanham Ford, Mrs. Nickle Foster, Mrs. Don Owens, Mrs. Bob McMeans, Mrs. Kent Glasscock and Mrs. Jon Lin Riddle.

Gober Heads Student Body

Lane Gober has been elected president of Bovina High student body for the '65-'66 school year.

Gober, who will be a junior, was elected along with other student council officers at elections held at school last week. Gregg Wilson, who will also be a junior, was named vice president.

Gwen Christian, who will be a senior, was elected corresponding secretary. Alan Carson, a sophomore-to-be, was named treasurer, and Connie Vaughn, who will be a senior, is recording secretary.

Members of the four classes which will be in high school next year were eligible to vote in the election.

Observes B'day With Party

Radford Venable was honored with a party on his 18th birthday Saturday night in his home. Hosting the party were his parents, Mr. and Mrs. Elton Venable.

Some 35 young people were present to celebrate. The group were served birthday cake, punch, chips and dips.

Thanks, Bovina Friends

This Week's DEVOTIONAL

POST CHRISTIAN PERIOD

A term which is recurring frequently in current articles of leading publications should cause every Christian a great deal of concern. This term, Post Christian Period, is not new but has been used increasingly in past months to characterize the age in which we are living. The term suggests that the Church has served her purpose and usefulness and that decay and decline is inevitable. The term also suggests that the Christian principles and practices which have been deeply embedded in the American way of life are now no longer desirable or practical.

Can it be that what Christ taught and the church has continued to teach concerning moral integrity, honesty, Chastity and brotherly-love have become obsolete?

If so, what then may I ask will take the place of these teachings?

My Christian friend, your loyalty to your Lord and His church are needed to discredit any idea that would undermine a way of life that in my opinion has made American what she is. God's Word is still true, "Righteousness exalteth a nation; but sin is a reproach to any people."

Ralph Aday, Pastor
First Baptist Church

BIBLE QUIZ

...by Don Stone

May's Prize Winner will receive: A fine book, ALL THE MEN OF THE BIBLE by Lockyer (\$4.95 value). Five runners-up will be awarded smaller books.

Mail your completed quizzes to: Box 422, Bovina.

1. The books of the New Testament are arranged in an order which makes their messages meaningful to the reader, but this arrangement does not represent the order in which they were originally written. Take the Epistles of Paul for example. Which were written:

On his FIRST preaching tour? _____
On his SECOND preaching tour? _____

On his THIRD preaching tour? _____

In his FIRST Roman Imprisonment? _____

After his release from the first imprisonment? _____

In his SECOND imprisonment? _____

2. One question frequently raised is: "Why do we have four different GOSPELS, Matthew, Mark, Luke and John?" Besides being four witnesses, these four wrote from a point of view appealing to: The JEWS (which gospel?) _____
The GREEKS (which?) _____
The ROMANS (which?) _____
The WORLD view-point (which?) _____

April winners will be announced next week.

talk, so you may as well get interested.

Back in February, a Blade column carried a diet which has proven to be highly popular with overweight readers.

We're reprinting it this week not because we advocate it or think you should go on it, but because our "extra" supply of papers for that week is about exhausted and we're still getting requests for the diet.

This will give you a fresh batch to supply to our readers who are interested in it.

Mayo Clinic Diet

It goes without saying that no oil is used on salads -- tea and coffee always black, meat never fried, NO EATING between meals, use little salt, don't drink too much liquid. Don't add or subtract from this diet. Stay on the beam. This is based on chemistry and after two weeks, a chemical change will have taken place within the body.

If for some reason you go off the diet, you must start again from the beginning. Do this for two weeks only. You will lose twenty pounds in these two weeks. After this time, you will have diminished your appetite, but stay away from candy, etc.

DIET: Breakfast: (EVERY DAY) Grapefruit, 1 or 2 eggs, coffee or tea. The same every day except Monday, when you must eat three eggs.

Monday Dinner -- 3 eggs, tomatoes, coffee, or tea. Supper -- 3 eggs, combination salad, 1 piece of dry toast, grapefruit.

Tuesday Dinner -- 1 or 2 eggs, grapefruit, coffee or tea. Supper -- Steak, tomatoes, lettuce, celery, olives, cucumbers, coffee or tea.

Wednesday Dinner -- 1 or 2 eggs, tomatoes, spinach, coffee or tea. Supper -- 2 lamb chops, celery, tomatoes, cucumbers, coffee.

Thursday Dinner -- Combination salad, grapefruit, coffee. Supper -- Eggs, cottage cheese, spinach, dry toast, coffee.

Friday Dinner -- Eggs, spinach and coffee. Supper -- Fish, combination salad, 1 dry toast, coffee.

Saturday Dinner -- Fruit salad (nothing else). Supper -- steak, celery, tomatoes, cucumber, coffee.

Sunday Dinner -- Cold chicken, tomatoes, grapefruit. Supper -- Vegetable soup, chicken, tomatoes, cucumbers, coffee, cooked cabbage, celery and grapefruit.

Youngsters Learn By Doing

The activity caused by numerous horses and their riders isn't unusual around Bovina's Roping Club arena, but Saturday, the scene was marked by the age of the riders involved. Thirty youngsters, from the age 9 through 16, gathered there to learn how to handle their horses under competition.

These Parmer County young people are members of local 4-H Horse project groups. They met Saturday afternoon for a supervised practice session, in preparation for the county-wide 4-H Horse show coming up next month.

At present, there are about 50 4-H members in Parmer County who have enrolled in the 4-H Horse Program. This new program was started following a county-wide school survey last October for desired projects. In January, at a leader's meeting, the program of 1965 was officially developed.

Horse projects, as a whole, are very new everywhere. Texas has had such projects, in other areas, for about four years, Joe VanZandt, Parmer County Agricultural agent, reports. It is the newest, and fastest growing project for 4-H'ers in our county, as well as the state of Texas and all other states. Although it is so new in Texas, this state now ranks second in enrolled members; 7,845 last year.

The meeting Saturday was for the purpose of showing 4-H members how to handle their horses in front of judges. There were sessions on halter showing, as well as in reining, pole bending, barrel racing and western pleasure riding. The latter four are performance classes in which the ability of the horse and rider to work together are of prime importance. Western Pleasure riding, for example, is a display of the rider's ability to handle his horse through a number of bred-structured maneuvers and the horse's acceptance and obedience to these commands.

As horse projects are so new

in this area, these young people know very little about the methods used by officials to judge horses and riders in an arena. Men who know donated their time and talent to teaching the 4-H'ers Saturday.

Leaders of the Parmer County horse program are Wendol Christian, C. E. Trimble and Robert Read of Bovina; Pike Jordon, Delbert Garner and Mitz Walling of Farwell, Homer Linderman and M. H. Meason of Friona and Jack Templar of Lazbuddie. These leaders, as well as others, including Hugh Moseley, were at the practice session.

This new 4-H project for Parmer County young people has many advantages. As well as learning the responsibilities of taking care of an animal and learning, through the keeping of accurate records, the expenses involved, there is one overshadowing motive. In the minds of many parents, as well as of the youngsters, the joy and companionship of having a horse; the pleasure and pride in the appearance and performance of the animal are good enough reasons for having such a project.

Joe VanZandt reports that there are no set rules or requirements on how "good" a horse and his equipment must be. Grade as well as registered stock can be used and there will be no discrimination toward either one. He also points out that a family can invest as much or as little in a horse project as they desire. Naturally, there will be expenses, VanZandt points out, but in return, this project can last a girl or boy many years.

Looking to the future of this project, Parmer County youngsters have a definite incentive to work towards. Jess Walling, Bovina Quarter Horse breeder, has already donated four breed-structured maneuvers and the horse's acceptance and obedience to these commands. Final plans on how these services will be awarded

Grade Geldings 14 hands and under were put through their paces for the coming horse show at the Bovina roping arena on Saturday. Judges for the practice session were: C. E. Trimble and Hugh Moseley. Boys shown with their animals left to right: Donny Meason, Manuel Quintana, Loy Dale Clark, Rickey Meason, Jodey Fallwell, Royce Sisk and Bill Buchanan.

Registered geldings with their owners left to right: Barry Williams, Milton Walling, James Calloway, Dexter Garner and Derek Garner.

will be developed by the leaders sometime in May. The practice program Saturday was in preparation for the county wide 4-H Horse show that will be June 12 at the Bovina Roping Arena. This show will be a climax to several months of hard work for the youngsters and their horses. The high point winners of the June show will be competing in the district 4-H Horse Show in Dumas, July 9 and 10.

More such sessions are being planned. Bovina 4-H'ers plan to meet May 15, at 2:30 p. m. in the roping arena; Farwell youngsters will meet just north of Nickels Gin May 8 at 2:30 and the Friona horsemen also plan to meet May 8, at 2 p. m., in the Friona Jaycee Arena.

Members, with their horses attending Saturday included the following Friona youngsters: Kenny Carter, Bill Buchanan, Jody Fallwell, Linda McVey, Ricky Meason, Donnie Meason and Danny Carthel.

Bovina members included Raymond Quintana, Loy Christian, Daryl Kirkpatrick, Christie Trimble, Cindy Barrett, Randy Barrett, Manuel Quintana, Royce Sisk, Darlene Denney, Randy Kirkpatrick, Steven Wiseman, Vickie and Debra Hawkins.

From Farwell, there were Brad Jordon, James Calaway, Dexter Garner, Derek Garner, Milton Walling, and Barry Williams; and from Lazbuddie, Leta and Ernestine Templar and Loy Dale Clark.

Smaller slaughter supplies, a smaller lamb crop and a decline in the number of sheep and lamb in feedlots are expected to keep sheep and lamb prices for the remainder of 1965 above those of last year. John G. McHaney, Extension economist, reports that prices for wool are not so favorable. Unfavorable factors, he said, include larger world wool supplies, lower use and increasing substitution of man-made fibers for wool.

On The Farm In Parmer County

By JOE VAN ZANDT
County Agent

COTTON INSECT NOTES

With a lot of cotton being planted in past two weeks, most farmers will be thinking about cotton insect control real soon.

In fact some growers planned their early season insect control when they planted by using Di-Syston or Phorate. Both of these are systemic insecticides and give control for 5 to 6 weeks following planting of thrips, aphids, spider mites and leaf-miners.

There are eight different insecticides recommendations for thrip and fleahopper control. For thrips control measures should begin as soon as damage is apparent on seedling plants. On fleahoppers control measures should be started when 15 to 20 fleahoppers are found per 100 terminals when cotton reaches the fruiting state.

The eight different thrips and fleahopper insecticides are a. Dieldrin + DDT, b. Guthion, c. Strobane + DDT, d. Sevin, e. Toxaphene-DDT, f. Heptachlor + DDT, g. Endrin + DDT and h. Bidrin.

Every cotton grower should get a copy of the Guide for Controlling Cotton Insects which lists all of the recommended insecticides for cotton insect control.

Texas Insect Control recommendations can be summarized as follows:

1. Maintain a knowledge of the insect population levels through regular field inspections.
2. Apply insecticides only on the basis of insect infestation as determined by field inspections.
3. Carefully consider the immediate results as well as the long-range effects of any insect control program.

Cotton insect control today is much different from that of a few years ago. Today each producer must carefully weigh the insect situation in his field, consider all of the alternatives and make decisions on the basis of his own insect situation.

Perhaps the number one problem facing producers is insect resistance to many of the presently available chemicals. Our major problem here is the bollworm-tobacco budworm resistance. We will discuss these in a later news column as the cotton season progresses.

Mark the date of June 16 on your calendar as our area entomologist will be here that day to discuss insect control with all of us. We plan to have several field meetings over the county that day.

PASTURE WEED CONTROL

If you have a pasture that was overgrazed last year suggest you inspect it for weeds coming up after our rains last week. You may want to consider spraying a heavy weed infested pasture with 2, 4-D amine salt.

Weedy plants use 4 to 11 times more water to produce a pound of dry matter than do range and pasture grasses and may retard range improvement. This is one of the reasons why weeds sap all of the moisture from ground and produces little useable forage.

HORSE EXERCISE

Parmer County horse owners, young and old alike, need to restrain their enthusiasm for a long spring gallop on their favorite mount. Be sure the horse can take it. We noticed several of our 4-H Horse owners riding their horses a little

THE HIGH PLAINS FARM AND HOME

Economist Explains Wheat Situation

The total supply of wheat in the U.S. for the 1964-65, July 1, 1964 to June 30, 1965, marketing year is now estimated at 2,195 million bushels, the smallest since the 1957-58 season, says John G. McHaney, Extension economist, Texas A&M University.

Total disappearance of wheat—food, seed, industrial, feed and exports—in 1964-65 is estimated at 1,290 million bushels or the same as the 1964 production but 150,000 bushels less than the 1963-64 disappearance. McHaney said this could mean a carryover on June 30, 1965, about equal to the 901 million bushels of a year ago, or it could go as high as 905 million bushels.

In discussing the export picture, McHaney said estimates place the 1964-65 exports at 675 million bushels a drop of 185 million bushels from 1963-64. Because of the recent dock strike, the economist says there is a possibility that the estimated export total may not be reached. And too, he adds, good crops in many exporting countries sharply restricted U.S. commercial exports from July

1964 to January 1965. Shipments under government financed programs comprised about 82 per cent of the total wheat exports during that period, compared with 70 per cent for the long time average, he said.

Maintenance of a high level of wheat prices, resulting primarily from the U.S. and Canada withholding their surpluses from the market, has encouraged increased wheat production in many countries, explains McHaney. He noted the U.S. sharply increased its export payments for both wheat and flour on January 25, 1965. This had the effect of lowering U.S. export prices and making U.S. wheat more competitive in world markets.

The nation's 1965 winter wheat crop on April 1 was estimated at 1,037 million bushels, one percent more than last year's crop. The estimated yield per seeded acre of 23 bushels compares with 23.7 for last year and a 1959-63 average of 22.8 bushels. Texas production, based on April 1 prospects was estimated at 66.6 million bushels, up 8 percent from last year.

Rains Suspend Planting, Farmers Happy!

Rains which dumped considerable water on Farmer County last week caused suspension of planting in most areas of the county. Farmers wearing happy smiles gathered in local cafes in their respective areas to discuss the benefits of the much needed moisture and make predictions on the Farmer County wheat crop (to

be harvested in the not to distant future). Most of the ground in the area was in readiness for planting and many of the dryland farmers were waiting patiently for the rains -- which came in time

to break what looked like a first class drought to many of the weather prognosticators and old-timers in the area who were already beginning to predict "This sure looks like a bad-unn" due to the unseasonably hot

weather of the previous week. Temperatures had ranged into the high 90's for several consecutive days prior to the rains. Cotton planting was slowed by at least five days as temperatures dropped well below the

recommended 65 degrees. Farmers use as a rule for cotton planting 65 degrees at eight inch depth for several days. Sorghum planting was just around the corner for most area farmers when the rains came as most farmers hold with a May 1 starting date for the county's number one crop. However, a few hardy irrigation farmers had already planted a portion of their allotted acreage.

The rains will also prove beneficial to the vegetable farmers who although, they do not depend on the elements for moisture believe that some water from the sky is a great asset in getting the seed beds ready for the planting season. By Friday of last week planting operations had been resumed on most Farmer County farms. Only a few scattered farms reported no moisture from the rains which were general over the Texas Panhandle.

These sugar beets on the Oakley Stevenson farm were planted on March 15. Stevenson, who is trying sugar beets for the first time says he is pleased with the growth of the plants at this point.

Wise Shopping Can Save On Meat Costs

Prices advanced slightly on some meats this week, but shoppers will be able to find some good values, nevertheless.

Among some of the better offerings in the meat department, according to Mrs. Gwen Ciyatt, A&M Extension consumer marketing specialist, are beef chuck roasts, round and sirloin steaks, short ribs, ground beef and beef brisket. Ham portions and slices of bacon are being featured in a number of stores.

Poultry is still a popular buy, and fryers are retailing at attractive prices. Chicken hens also are moderately priced.

Eggs are low in price, with the large size eggs offering the best value. Select AA to A grade from refrigerated cases for best quality, suggests Mrs. Ciyatt.

Reports on fresh vegetables indicate that the quality is improving. Sweet corn is coming to market, the quality is good and prices are reasonable. Cabbage is still priced relatively high. Carrots, mustard greens, squash, celery and dry onions are among the best vegetable choices.

Quality and quantity of fresh strawberries continue variable. Bananas, pears, oranges, grapefruit and pineapple are available at moderate prices. Supplies of watermelons and cantaloupes have increased and prices have dropped slightly. Additionally, each store has planned other "specials", and wise shoppers will consider these when making up their marketing lists, Mrs. Ciyatt says.

Soil Additives And Conditioners- Consider Carefully Before Buying

As expected in a rapidly changing agriculture, new products such as soil conditioners continue to appear on the market. Jim Valentine, Extension Area Soil Chemist, The Agricultural Extension Service, states some may have merit while others are of questionable value or may be entirely worthless. Benefits to be derived from their use may be stated in vague or misleading terms and statements may be based on mere opinion or pure fancy.

Valentine further states it is always hazardous to purchase a material that bears no guarantee as to its formulation. By not stating what is in the product the seller is in no way liable, and existing laws such as those governing fertilizers have no jurisdiction over the manu-

facturer or seller. The primary soil conditioner for this area is organic matter and if your soil contains a modest one per cent organic matter this is equal to 20,000 lbs. per surface six inches. We have no known bacteria deficiency, and it is estimated that there are 400 to 500 lbs. of live bacteria in an acre furrow slice of soil. The population rises and falls depending on the amount of residue returned, moisture, and temperature.

Soil structure is the result of the soil's physical and chemical properties and is influenced primarily by organic matter. Thru good residue management and by avoiding tillage when soil is wet, favorable structural conditions can usually be maintained.

Valentine concludes by saying its your money-consider the products carefully before buying and do not expect non fertilizer materials to substitute for the plant food elements commonly obtained thru commercial fertilizers.

New house construction provides the planning flexibility for including a disaster shelter or safety zone. Because of this flexibility, the shelter space can be usable space, construction costs can be kept low, and the overall space relationships within the house will be better than if a shelter area is added later, say Extension agricultural engineers at Texas A&M University.

Summer-like temperatures are increasing the numbers of persons participating in water sports and the number of accidents and fatalities. Most of the accidents could be prevented, says the Texas Farm and Ranch Safety Council, if water sportsmen would observe the simple rules of safety.

Give Fingerlings A Chance To Grow

Farmers and ranchers planning to stock their ponds this spring should remove adult fish from the pond before introducing fingerlings, says Wallace Klussmann, Extension wildlife conservation specialist at Texas A&M University.

"Additional stocking of a pond previously stocked is seldom the solution to poor fishing problems," said Klussmann.

"Bass fingerlings introduced into a pond having a few adults are almost certain to be eaten by the larger fish. Adult bass will also eat catfish and sunfish fingerlings."

One common mistake often made after stocking fingerlings is putting in a few large fish that someone has caught, hoping to produce a few "big ones" in a hurry.

These larger fish will eat the fingerlings just as would the old adult fish.

Trash fish may easily be introduced by going to a nearby creek or pond and seining fish for stocking. State and Federal fish hatcheries are the best places to get stocking fingerlings, Klussmann said.

Adult fish populations in private ponds can be removed by the use of rotenone. Rotenone is not a poison. Since the fish are killed by suffocation, they are safe for human consumption.

Five pounds of 5 per cent rotenone powder per acre foot of water is the usual recommendation. In warm water (65° F. or above) where thorough and even distribution can be made, three pounds of rotenone per acre foot of water is usually sufficient. Mix the rotenone powder with enough water to make a thick paste. Then add water to increase the volume until you have a mixture about the density of milk.

For the best distribution, pour the rotenone behind a boat with an outboard motor. In small ponds or areas of large ponds that are inaccessible by boat, the mixture can be sprayed from the bank. Another unsophisticated but effective way to treat small areas is by "mud-balling" the rotenone when mixed with enough water to form a paste and then tossing these balls into the water.

"Once adult fish are removed, you can be fairly certain your new fingerlings will grow to a catchable size in a short time," said Klussmann. "Your local county agricultural agent has detailed information on rates and application methods."

Recreation Workshop Well Attended

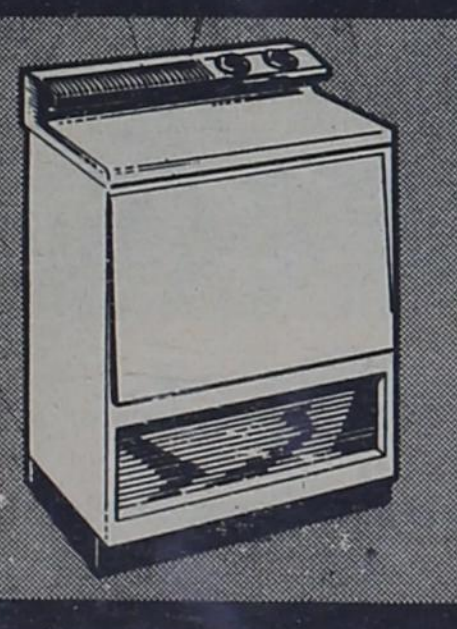

Leaders from 4-H Clubs and Home Demonstration Clubs spent two days in a Workshop at the Hub Community Center where they received instruction and information on leading games, for various age groups, for small groups and large groups, quiet games, active games and other techniques in the art of successful recreation party fun. The Workshop was conducted by Miss Lucille Moore, Recreation Specialist of the A&M Extension Service.

According to County Home Demonstration Agent, Cricket B. Taylor, these leaders will share the information with their Club groups throughout the County, and will assist 4-H members in planning recreation for Community Club programs and parties.

Those attending were: Mmes. Estis Bass, Northside Home Demonstration Club, H. R. Coconougher, Northside, Meryle Masste, Northside; Dee Brown, Lora Brown and V. W. Rannals, Midway; Ralph Price, Gene Welch and Travis Stone, Black; Jimmy Briggs, Lazbuddie Club; Joel White, Oklahoma Lane Club; Joe Allen and Leland Gustin, Rhea Club; and Clarence Monroe, Hub Club.

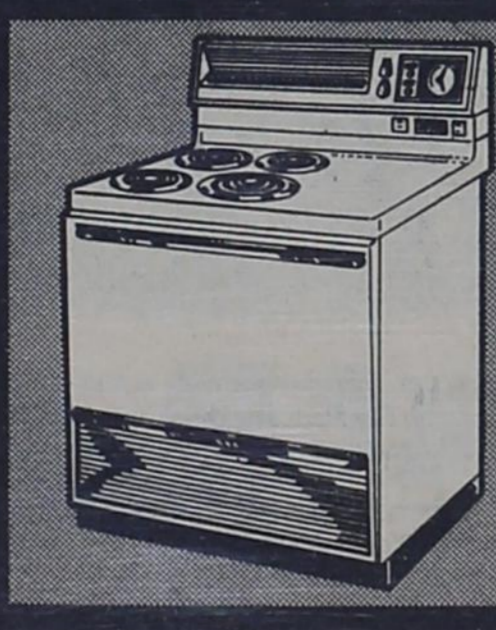

Make mother happy Sunday and for years to come!!!

GIVE HER AN ELECTRIC CLOTHES DRYER

An automatic ELECTRIC CLOTHES DRYER will make Sunday an unforgettable Mother's Day for Mom. She'll enjoy the way she can waltz through washday and the way her clothes dry... fluffly and sparkling clean—all for just 5 cents per load, total energy cost!

COTTON TALKS
FROM PLAINS COTTON GROWERS, INC.

LONG CARRYOVER and then announces the amount of the export subsidy. To all who can subtract one from the other this constitutes an announcement, a full year in advance, of the price foreign mills will be expected to pay for U. S. cotton. And cotton leaders have pointed out repeatedly to the Department that this is the biggest fly in the export ointment. Not only does it allow other cotton exporting countries to know exactly at what price they can sell their entire production, but it also allows them to plan their production, in advance, with a guaranteed price.

Donald Johnson, Executive Vice President of Plains Cotton Growers, Inc., believes that the support price should be announced for the year, but that the amount of the export subsidy should remain flexible in order that U. S. price reflect changing market conditions. "In this way," Johnson says, "we would be serving notice that we intend to sell cotton in the world market under conditions and at prices dictated by that market. The fixed-price policy of the U. S. in recent years makes it impossible to say what the world price would be, but even if it were necessary to increase the export subsidy, a great deal of expense would be saved by putting current crop cotton directly into the market instead of into the loan to be sold out later at a loss."

This line of thinking falls in line with the recommendation of the American Cotton Producers Association detailed last week. That recommendation urges that the Commodity Credit Corporation be required to establish a specific export goal of not less than 7 million bales per year, and that CCC use flexibility features in sales programs to attain this goal.

Whatever cotton law is put on the books to succeed the current program when it expires in July of 1966, the Administration and the State Department, with their concern for maintaining, or creating cordial relations with other countries which produce cotton for export, will have much to say about how much cotton the U. S. sells to foreign countries and at what price.

As has been pointed out by Seton Ross, Editor of "Cotton" magazine: "This drop (in exports) is due to lack of proper administration, not to the law itself. There is sufficient flexibility in existing statutes to permit annual exports of between 6 and 7 million bales." Political complexities, however, along with the many other factors bearing on U. S. exports, make it difficult to determine whether administration of the current program has been "proper." For example, record crops in foreign free-world countries, near-record production in communist countries, low mill activity and reduced stocks in some major importing countries are all elements influencing export levels.

But notwithstanding these facts, it can still be said that any evaluation of the current cotton program's success or failure with respect to solving cotton's over all problems should not be made on the basis of exports, over which it has had no control.

It is because one-price cotton has increased domestic cotton consumption by about 7 per cent, and promises to bring about further increases, that most cotton producer groups are supporting an extension of at least the one-price principle of the current program. There is every indication from the domestic textile industry that, given a chance to buy cotton at the same price as foreign mills, cotton consumption in the 1965-66 marketing year will equal or exceed the 9.4 million bales used in 1964-65. Assuming exports of even 5.5 million bales, this would bring total offtake to 14.9 million -- well above the 14.5 million bale production to be expected from estimated 1965 plantings of 14.2 million acres. In the future as in the past, the accuracy of this offtake projection will be highly dependent on the number of bales sold to foreign users.

The Department of Agriculture each year announces the support level for U. S. cotton

Proper Storage Emphasized

Do you hunt, push objects around, or stretch into an awkward position to reach items you want from a storage area? If you do, then you're wasting time and energy and becoming frustrated as you hunt.

What can you do about it? A good test of any storage space is to ask yourself, "Can I see items in it easily?"

A young child can quickly see the toys he wants when they're stored on open shelves at a convenient height. Such an arrangement also helps to prevent toys from being bent or broken as is likely to happen if a child throws them into a box or chest.

With open shelves, you can encourage a child to care for his toys and to keep them off the floor. Toys scattered around a room may cause an accident, either to a child or an adult.

Storing articles where they're easy to see is complicated by the many different items of various sizes and shapes you and your family have to store.

At Home In Parmer County

By CRICKET B. TAYLOR
County HD Agent

Home Demonstration Clubs and 4-H Leaders had two full days recently in a Workshop without a dull moment for the entire time. Miss Lucille Moore, the Recreation Specialist made sure that no one became bored. She was indeed a wonderful inspiration and had a way of making everyone feel relaxed and part of the group.

WHAT DO YOUR CLOTHES DO FOR YOU?

People tend to judge you by your estimate of yourself as indicated by your appearance. Do they really tell the truth?

The way you dress affects you and the people around you. Whether the effect is favorable or unfavorable depends on you. Your clothes and your total appearance are your introduction to people. Do they make a favorable impression, which makes people want to know you better—the real you?

Clothes can say that you don't care what people think about you or they may say you have lost interest in life, or sloppy ill-fitted clothes can represent a sloppy mind, or they may say you are an energetic, vital individual with a wholesome approach to life.

A person can look anyway they wish, if they know the rules.

MAY PROGRAM

Wardrobe Planning is the program for this month. Information will be given and discussed considering the three important steps for being well dressed—Income, Occasion, and Individuality. This program is available to Home Demonstration Clubs and other groups upon request.

4-H PROJECT WORK

Mrs. Webb Gober, leader for Oklahoma Lane 4-H group of girls in Home Improvement, had the girls over to discuss plans, learn about selection and hanging pictures. While there we saw some of the things Kathryn Gober had done in her project work. It was amazing the amount of useable space that was made available in a small bedroom closet, by planning. A shift in rods, shelves and the use of door space and accessories really made a neat closet.

Texas dairymen grossed \$155 million from the sale of dairy products in 1964, 2 per cent more than in 1963, reported the Texas Crop and Livestock Reporting Service. The average number of cows declined but the production per cow increased to bring total milk production up by 2 per cent. The 6,150 pounds of milk per cow was 8 per cent above the average for 1963.

To remove a white spot caused by a wet glass, set on mahogany furniture, smear with a thick coat of petroleum jelly and leave for a few days. The stain should be gone when the jelly is wiped off.

Nuclear Science Used To Improve Agriculture

A group of news media representatives visiting Texas A&M University this week saw and heard how nuclear energy is being used to explore a wide variety of agricultural production problems.

They learned, for example, how nuclear science is digging up information on crop and livestock losses from bugs, disease and weeds which are costing the United States about \$22,500 per minute of \$12 billion a year.

Dr. Ruble Langston of the Plant Sciences Department told the newsmen that nuclear energy is often used as a tracer to mark movements of chemicals, insects, nutrients, hormones and other items. It is something like a farmer bell his lead cow to keep track of herd movements.

He cited the screwworm eradication program in Texas as an outstanding example of the atom at work for agriculture. Five years ago, screwworm infestations were common. Today, they are relatively rare.

Dr. Wyman Dorrough, entomologist at Texas A&M, said one of the big obstacles in the never-ending fight against bugs is to develop pesticides that are both effective and reasonably safe to handle. Answers are sought through metabolism studies using radioisotopes as tracers.

NEW

A new bulletin is available in our office entitled "Care of Household Metals and Kitchenware." Its up-to-date information on cleaners and the type needed for the various new metals that are found in our kitchen and homes. As new things arrive on the market, then that calls for new knowledge of their care also. Really we can never stop learning when we reach the point we are through learning about new things then we are indeed through.

Come by the Home Demonstration Agent's office on the second floor of the Courthouse in Farwell and pick up your copy. Its free. Or call 481-3619 and ask for a copy to be mailed to you.

Beauty of Ornamentals Depends On Insect Control

by County Agent Joe VanZandt

The potential beauty of an ornamental plant may be marred and, in some instances, the plant may be killed by insect infestations. Practically every ornamental plant and shade tree grown in Texas is subject to attack by one or more insect pests during the growing season. Preventive measures can greatly reduce the amount of insect damage. Such measures also contribute to the beautification of home grounds and gardens and to community improvement.

In most cases, it is not necessary to be able to identify every insect or pest attacking plants around the home. The main points to know are how the insect is causing damage and the part of the plant it is feeding on. The majority of ornamental pests can be classified according to their type of mouthparts—sucking or chewing—and the resultant damage to the plant. However, the type of mouthparts of a few insects is not indicative of the type of damage inflicted. These pests include gall-forming insects, tree borers, and the leafminers.

The mouthparts of sucking insects are arranged so that a hollow beak can be inserted into the tissue and the plant juices withdrawn. This, of course, weakens the plant, and death may result if infestations are sufficiently heavy.

Chewing insects consume foliage by their feeding activity, thus reducing the food manufacturing areas of the plant and causing a loss of natural beauty. Some insects habitually girdle or sever the plant near the soil surface which results in loss of the entire plant.

In controlling several insects on ornamental plants, combination sprays or dusts, or a specific insecticide may be used. Combination sprays or dusts are not named as such by the manufacturers. These mixtures are sold under various trade names and all brands

contain a mixture of two or more insecticides. A fungicide also may be included in the mixture. These chemicals are packaged in small containers designed for home use and directions for applying the insecticides can be found on the label. There are several brands of combination sprays and dusts on the market and anyone of these combinations will give satisfactory control of a large variety of sucking and chewing insects.

One certain insecticide will do the job as well as two or three mixed together. If some insect is attacking flowers, trees or shrubs and feeding on the foliage, the combination insecticides will generally give good results. It is best to use these mixtures if you are not sure just what insect is involved. In general, sprays will give better control of ornamental pests than dusts.

Don't expect the recommendations given in L-199, Texas Guide for Controlling Insects on Ornamental Plants to work 100% in every case. For example, if certain plants are infested with a heavy infestation of scales or spider mites, it will generally require two or more thorough spray applications applied at 7 to 10 day intervals to obtain satisfactory control. In many instances the homeowner may not follow directions and will be disappointed in the control obtained. Improper spray equipment could be a limiting factor.

Five basic principles for successful ornamental pest control are:

1. Good equipment for applying the insecticide.
2. Selection of the proper insecticide.
3. Application of the insecticide in the proper manner.
4. Starting control measures before serious damage occurs.
5. Repeat applications must be made in 7 to 10 days to control certain pests such as scales, white flies and spider mites.

"Many new materials are found to be inadequate and further costly investigation is eliminated," Dorrough pointed out. "Those materials metabolized too slowly, or in some cases too rapidly, are discarded and the more promising chemicals are studied further."

Another speaker, Dr. Page W. Morgan of the Plant Sciences Department, described a number of ways radioactivity is used to track hormone movements in plants.

He said hormones are "chemical messengers that scurry about the plant telling buds, leaves, branches and roots to grow or not to grow, to mature or to die." Especially significant research is underway on better ways to control brush, such as mesquite.

"Using radioactive 2, 4, 5-T, one promising lead has already turned up," Morton said. "Addition of ammonium thiocyanate to the herbicide gets more of it to the mesquite root, resulting in better kill. Based on these isotope-assisted findings, a combination of ingredients mesquite killer should soon be on the market."

Soil moisture probes, a new and more accurate way of measuring soil water through atomic energy, were explained by Dr. J.R. Runkles of the Soil and Crop Sciences Department. Conventional methods require expensive equipment and many man hours of labor.

The new system involves measuring the soil moisture content by determining density of a "cloud of slow neutrons after a source of fast neutrons is placed in the soil." If soil moisture is low, the density of the slow neutron cloud will be less than if moisture content is high.

Dr. George M. Krise, biologist, said an ordinary Spanish goat can often absorb sizable doses of radiation and still perform physical tasks, but this doesn't mean man can do the same.

Discussing radiation effects on goats and their relationship to man, he said goats have been found to be unusually resistant to radiation. Much more research must be done with other animals before results can be "extrapolated" or applied to humans.

Various animals have been tried in radiation experiments, and the Spanish goat is a favorite because it and man are similar in some ways.

"Man lives under a variety of changing environmental conditions and might be considered a wild-type," Krise explained. "By and large, the Spanish goat is a wild-type animal since it is seldom cared for under normal cultural conditions."

Dr. Carl M. Lyman, head of the Biochemistry and Nutrition Department, discussed experiments on a yellow pigment known as gossypol in cottonseed meal. If fed improperly, can be poisonous to some types of livestock.

Radioactive carbon is providing some of the answers. The gossypol is separated from the seed after the parent plant has been treated with organic substances labeled with the carbon. If the separated gossypol is radioactive, then the substance given to the plant had to be used to make gossypol.

Dr. W.C. Ellis of the Animal Science Department said radioactive flow markers are proving valuable in studying nutritive value of forages.

He said the flow rate of forage particles through an animal's digestive tract is being determined by "marking" the particles with a radioactive isotope of cerium, a metallic element.

Dr. J.H. Quisenberry, head of A&M's Poultry Science Department, discussed studies on effects of radiation on poultry and eggs.

"Chickens and turkeys have a greater natural resistance to irradiation than man and many other animals. Therefore, they could become a most important source of food in case of nuclear attack," he said.

Plan For Future Use Of Leisure, Advises Sociologist

"Education in the future will need to place more emphasis upon wise use of leisure time," said Reagan Brown, Extension sociologist, Texas A&M University. He said it is estimated that the average person 35 years

from now will have twice as much leisure time as the person of the present. "Either we start planning today for wise use of this time or we pay the consequences," he added.

Brown said that increasing concern for training of our citizens in wise use of leisure time is not just a desire to make people's lives more pleasant for them. Monotony in work and in off hours is a social danger no less than disease, disorder, and illiteracy.

"Our failure to embrace this belief is raising the crime rate, increasing population in mental hospitals, multiplying physical and moral weaklings rejected by the armed forces, and raising the percentage of youths who want security at the very onset of their careers and who are afraid of trial and adventure," he stated.

Participation is most important and involves more than just being a spectator to a sport that offers only passive sideline involvement. In addition to what is commonly called physical recreation, participation may be in the form of civic affairs or social services which offer meaningful leisure time activity and satisfying personal experience," Brown explained.

He said that this does not mean that one's work or profession will be neglected by that life will be looked upon as an entity and preparation for it will be treated as such.

American life in the future is going to be leisure time oriented in contrast to a work oriented past. How well and how soon we adjust to this change will have much to do with our country's future welfare, Brown concluded.

WHERE IT GOES: Last year, every American working an eight-hour day put in two hours and 21 minutes to pay taxes, the Tax Foundation reports.

CPI Joins Fight On Boll Weevil

Cotton farmers are seeking ways to get the boll weevil, the pest that eats up profits by the millions, to feed himself to death—but not on cotton.

A research grant for the work has been made to Southern Research Institute, Birmingham, Ala., according to Roy Davis of Lubbock and Jack Funk of Harlingen, Texas trustees for the Cotton Producers Institute.

Scientists are working to isolate and identify a substance in the cotton plant which they know causes the boll weevil to feed. Next step will be to find a way to produce the substance, or feeding stimulant, artificially.

This would open up new approaches for farmers to use in achieving less expensive and more effective control of the pest.

With use of an attractant, also found in the cotton plant, for example, the boll weevil could be lured to a selected, non-cotton field area. There the feeding stimulant would cause the insect to consume insecticides or disease-producing organisms.

Another possibility would be use of the feeding stimulant with another recently discovered stimulant—one that would cause the weevil to lay eggs on other plants. Thus the larvae which normally feed only on cotton would starve to death.

Control methods based on attractants, feeding stimulants, and mating habits may eliminate the need for massive and widespread use of insecticides with

Stretch Food Budgets By Comparative Shopping

Money-minded shoppers can stretch food budgets by comparative shopping. Although it may be time-consuming, the practice can result in savings for other essential items for the family.

This reminder comes from Mrs. Gwen Clyatt, Texas A&M University Extension consumer marketing specialist.

She suggests that food shoppers check food advertising at home, and analyze possible savings which can be realized by using "specials," coupons or other sales practices.

Then, in the store, read labels and other information to learn price and net weight of food products. Next, estimate the cost of "like" foods, per unit of weight or volume, such as cost per ounce, pound, pint, quart or serving. This gives the true or real -- cost of the food compared to other alternative choices, Mrs. Clyatt says. For most families, food is

the largest item of expenditure. A five to 10 percent savings in food shopping over a 12-month period would amount to enough to satisfy other essential needs for the family.

Food shoppers this week will note that there are good supplies of high quality eggs available. And prices are still reasonable. Chicken hens and fryers are about the same price as last weekend.

Beef prices are edging upward slightly. This may be a good time to shop for specials and buy extra cuts for the freezer. There's a wide variety of beef cuts from which to choose.

Good values -- both cost-wise -- are to be found at produce counters. Grapefruit and oranges are still good selections, and strawberries are on many markets at reasonable prices. Pineapples, pears, bananas, avocados, and grapes are other fruits to consider. Vegetable choices range from

carrots to head lettuce, eggplant, mustard greens, cabbage, cauliflower and cucumbers.

Dairy foods are of excellent quality and price.

"The music of the cold season is background counterpoint to the year-long symphony -- the primeval, elemental notes. Each segment of the calendar is a separate movement that, with the others, makes a complete whole." -- Haydn S. Pearson, Litchfield (Conn.) Enquirer.

Building A New House -- Or A Barn -- Or A Machinery Shed?

Planning any new construction on your farm? You'll likely profit if you check with your county agricultural agent. He can tell you about the farm building plan service available from Texas A&M University's Agricultural Extension Service and can show you what plans are available.

Texas Station Aids In New Forage Sorghum Development

A new sweet sorghum variety named Rio is making its debut this spring as a potential supplementary crop for southern states.

Fred Miller, research associate in the sorghum section of Texas A&M University's Soil and Crop Sciences Department, says the variety is disease-resistant, high yielding and is high in sugar content.

Rio was developed by the U.S. Department of Agriculture's Agricultural Research Service and the Mississippi and Texas Agricultural Experiment Stations.

The plans are for typical farm service buildings and are listed in the new 1965 Catalog of Building and Equipment Plans. These plans were developed over many years on the basis of research

and field experience. Agricultural engineers at Texas A&M say most build not more than one major size building of any one type during their lifetime. Therefore, reliable information is necessary to help plan and construct the best building for any one specific purpose.

In selecting plans, the entire farm operation and probable use of other buildings must be carefully considered. And building which does not permit the best use of labor and equipment or which does not do the job for which it is needed, should be remodeled, say the engineers.

Miller said seed for founders is available from the Foundation Seed Section, Soil and Crop Sciences Department, Texas Agricultural Experiment Station, College Station, Texas. He said the high sucrose, or sugar, content means that Rio could become a sugar crop in some areas, such as the Rio Grande Valley. The variety also looks good as a high yielding silage crop.

The new sweet sorghum is a selection from a cross between Rex and another research line. Tests have been conducted in Texas, Mississippi and other southern states.

Rio, Miller emphasized, is highly resistant to leaf anthracnose and rust, two major ailments of sweet sorghum. It also has shown good resistance to damage from cotton insecticides currently used in the South.

He said Rio is equal or superior to Tracy, Brawley and Rex in stalk production per acre. But under ideal growing conditions, it reaches 1 to 2 feet taller than Tracy and can be subject to lodging. The variety matures in 105 to 130 days and yields about as much seed per acre as Tracy.

At Texas A&M, Rio is being further researched by using it as a male parent on grain sorghum female steriles to produce high yielding forage hybrids with a better sugar content, Miller added.

A visit to another farm where a building similar to that planned is in use would be time well spent. All plans selected should be carefully studied and all desired changes made before starting the construction, advise the engineers.

Fishing Fees Help Provide Good Angling

J. Weldon Watson, executive director of the Texas Parks and Wildlife Department, reminded fishermen that buying a \$2.15 fishing license is not so much a matter of obeying a state law as it helping raise money to provide even better fishing.

"Actually," said Watson, "the mere purchase of a fishing license makes every one a stockholder in an operation that is designed exclusively to help him attain his own personal recreational objectives."

Watson went on to say that: "This is a pretty big operation since we use the money to finance state hatcheries which are the key to restoration work. We use a substantial part of it to match Federal aid under the Dingell-Johnson act which returns .75 cents to the state for every .25 cents it puts up. And we use a part to finance our enormous research program which right now for example is striving to add the fighting walleyed pike and northern pike to our vast fresh water areas."

The Executive Director said "all these \$2.15 fees go to make up sizeable working capital," explaining that the 902,000 individual fishing licenses sold last fiscal year ending August 31, netted the Department \$1,805,000, all to be used for the improvement of fishing.

Watson stressed that under Texas' distinctive universal fishing license law, passed in 1957, salt water as well as fresh water fishermen need licenses. He also emphasized that non-residents pay the same fee as residents and that under the liberal exempt provisions of the law all persons over 65 and under 17 years of age may fish free, whether they are residents or non-residents. Watson estimated at least another 100,000 are privileged to fish free because of the age provision.

The executive director suggested a good sportsman's slogan might be: "Don't forget your fishing license because the game warden may check you next!"

Soil Additives And Conditioners Consider Carefully Before Buying

As expected in a rapidly changing agriculture, new products such as soil conditioners continue to appear on the market. Jim Valentine, Extension Area Soil Chemist, the Agricultural Extension Service, states some may have merit while others are of questionable value or may be entirely worthless. Benefits to be derived from their use may be stated in vague or misleading terms and statements may be based on mere opinion or pure fancy.

Valentine further states it is always hazardous to purchase a material that bears no guarantee as to its formulation. By not stating what is in the product the seller is in no way liable, and existing laws such as those governing fertilizers have no jurisdiction over the manufacturer or seller.

The primary soil conditioner for this area is organic matter and if your soil contains a modest one per cent organic matter this is equal to 20,000 lbs. per surface six inches. We have not known bacteria deficiency, and it is estimated that there are 400 to 500 lbs. of live bacteria in an acre furrow slice of soil. The population rises and falls depending on the amount of residue returned, moisture and temperature.

Soil structure is the result of the soil's physical and chemical properties and is influenced primarily by organic

Keeping Summer Fun

Want to enjoy the sun? Don't make the mistake of overexposure. Depending upon the fairness of your skin, stay out in the sun one half to one hour the first day, and gradually increase the time each day. It's the best way to prevent peeling -- and painful sunburn.

Taking a long drive with the family on a hot summer day? Keep the children amused with games such as twenty questions, geography, or the license plate game where you see how many different state plates you can identify.

And, as hot summer sun can play havoc with everyone's hair whether it's at the swimming pool or on the golf course, you'll want a good shampoo for the entire family. New Breck Concentrate Shampoo takes care of Dad's hair as well as Mother's, corrects dandruff problems, and comes in a handy unbreakable tube. Z

Trends In Men's Fashions

An important trend in men's fashions this season is the "American" look. This is depicted in rugged fabrics and weaves, in practicality with the durable press feature.

So says Dr. Graham Hard, Texas A&M University Extension clothing specialist.

Colors which are favorites this season range from the sunset tones to earthy hues and even red, white and blue combinations. These are in casual models with a Western influence.

According to the American Institute of Men's and Boy's Wear, browns will be important in accessories for the next few seasons at least. Ranging from deep browns to light tans, from wools and clays to deep golds, these smart accessory shades are increasing in numbers in ties and shirts.

Also expected to be fashion leaders this season are sports jackets with triple stitching on the collar and lapels, and hop-sack slacks, which look equally good.

When a man selects a new suit, he should try this test for correct fit: Raise his arms, move the shoulders about or change positions. Even with the jacket buttoned, the garment should show no evidence of

tautness, the American Institute of Men's and Boy's Wear emphasizes. A good general rule in figuring the suit size of a boy is to add two to his age. An average 10-year-old for example, should have a size 12.

A three-button jacket fits best with just the middle button buttoned. On a two-buttoned suit, button the top button if the placement is low, and the bottom button if stance is high.

In caring for clothes, put plenty of newspapers in with any woolen clothes that are being stored for the summer. Moths hate newspaper. Most cleaners offer an inexpensive service on cleaning and storing winter clothing -- and this service will save one from worrying about moth damage.

Learn Backyard Rose Gardening

For versatility, roses are hard to beat, says Walter Haldeman of The Pennsylvania State University. The plants thrive in many kinds of soil -- sandy, clay, or gravel -- and look well placed alone or in groups. But the ground must be well drained and in a sunny location.

According to a Penn State correspondence course, roses can be planted in borders with other shrubs, or in perennial flower beds. If placed along the side of a vegetable garden, they brighten the whole area with their blooms. Some roses make effective accent plants -- those placed alone in prominent positions of the home grounds. Roses deserve better treatment than to be planted in beds in regular rows. They have much ornamental value, points out Haldeman.

Care of the plants can be difficult at times. Insects and diseases find rose foliage, stems and flowers to their liking. So spraying is needed. And selection of plants with flower colors to fit harmoniously into a general garden plan demands study.

SPORTS AFIELD

By Ted Kesting

Not pausing long enough on the back cast will make your fly line crack like a whiplash behind you -- weakening your leader and breaking off flies. -- Sports Afield.

Pitch your tent opposite the prevailing wind and dig a shallow trench completely around it, with a lead-off to carry away excess rainwater. -- Sports Afield.
