ALMOST BLOCKED...The Indian Defense almost blocked this Paducah Dragon punt during their 35-21 victory last Friday night. The Tribe defense held the Dragons to 9 first downs and

170 yards total offense. Pictured above are Jessie Billington, 66, Chris Colbert 55, Nathan Frierson, Kelvin Marshall, 28, Vonnie Hise, 33 and David Tidwell 50. (Staff Photo by Don Comedy)

Indians Win Dist. Opener

The Haskell Indians opened district play last Friday night with a methodical win over the Paducah Dragons to the tune of 35 to 21. The Indian defense again played well giving up 72 yards rushing even though Paducah got 21 points. The Indians are on the road to Rotan this Friday for a 7:30 game. Even though the Yellowhammers are 0-4, they have some good young players. As one observer summed up their team, "they are a bomb that might explode and start winning at any time."

In the game Friday night, the Indians had a hard time getting their offense untracked. After a good runback of the kickoff by Frank Jordan, the Indians failed to move the ball so Archie Crim kicked the ball dead on the 2 yard line. However, on the first Paducah play, they made 30 of their 72 yards rushing and got out of the hole but were forced to punt the ball away. The Indians then started another drive; Kelvin Marshall scored a touchdown but it was called back because of a holding penalty. The Indians were finally completely flustered by penalties and forced to punt. Jordan downed Crim's punt on the 3 yard line. The Indian defense then held and the offense started a drive which ended with Archie Crim scoring on a sweep for 11

yards early in the second quarter to make the score 7-0 with McAdams tacking on the PAT.

The Indians spent all the second quarter cranking up drives which were stopped by penalties, interceptions, or fumbles, leaving the score 7-0 at the halftime.

After recovering a Dragon fumble early in the 3rd quarter, the Indians mounted a short drive of 20 yards with Archie Crim scoring from the 1 yard line and McAdams kicking point. The Indians then intercepted a pass and on the 1st play after the turnover, Vonnie Hise burst up the middle and outprinted the Dragon secondary for a third touchdown; McAdams' PAT was good and the score 21-0. Kelvin Marshall intercepted a pass and returned for a touchdown to make the score 28-0 at the end of the 3rd quarter.

At the opening of the 4th quarter Haskell moved the ball downfield but Dragon Bryan Walker intercepted a McAdams pass and dashed 99 yards for the first Paducah score making the score 28-7. Haskell took the kickoff and marched up field with a McAdams bomb to Jordan, climaxing the drive. McAdams kicked point, score was 35-7.

Haskell was penalized on

the ensuing kickoff setting Paducah up in good field position. The Indians were then penalized 2 more times. The Dragons aided by these penalties moved on in for their second touchdown. The last touchdown by the Dragons was the result of a 46 yard pass run in the latter stages of the game. The Indian secondary broke down on their tackling techniques to allow Burns, the Paducah end to go in for the score.

For the Indians, Kelvin Marshall gained 146 yards rushing for his 4th 100 yard game. Archie Crim added 71 yards. Haskell moved the ball almost at will but were constantly stopped by fumbles, penalties, and pass interceptions. However, this was the first conference victory for the Indians.

ABE Classes To Be Given

Adult Basic Education classes will be offered again this year. Registration will begin at 7:00 p.m., Monday night, Oct. 11th, at Haskell High School. Classes will be held each Monday, Tuesday, or Thursday night at the Haskell High School. The exact night will be decided according to the needs of the group. Classes will be held for three hours from 6:00-9:00 p.m. one night weekly.

Adults 16 years of age who have been out of school at least one year or persons 18 years of age or older may register for one of three levels of instruction. Basic level (grades 1-3) will be for those who have little or no schooling, need English as a second language, or are working toward U. S. citizenship. Intermediate level (grades 4-6) is for those who have

completed the basic level or have had some formal education. Advanced level is for those who have completed the intermediate level or have some junior high or senior high school education. The advanced level also prepares the student for the General Educational Development (GED) high school equivalency test.

All Adult Basic Education classes are free to those attending and the school will

provide books and supplies. The Adult Education Program is coordinated through the Sweetwater Adult Education Co-op and the Texas Education Agency.

An effort is being made to determine the need for establishing Adult Basic Education classes in the neighboring towns of Rule, Rochester, Knox City, Munday, Weinert, and Aspermont. For further information, call the Haskell High School or Mrs. Betty Davis, Program Supervisor, at 864-2848, 864-2915, or 864-2284.

Methodist Church Is New Bloodmobile Site

The location of the Red Cross Bloodmobile in Haskell has been changed to the First United Methodist Church from 1 to 6 p.m. today (Thursday) according to Jerry Weatherly, blood drive chairman.

Weatherly has asked that all local citizens attempt to reach the goal of 80 units. If you cannot or will not give blood please call several of your friends and urge them to donate. Anyone between the ages of 17 and 66 can donate blood if they are in good

health and weigh at least 110 pounds.

Reformation Rally Set

The speaker for the third Lutheran Reformation Rally in Abilene's Civic Center will be the Rev. Fred A. Naumann, Professor at Concordia Teachers College, Seward, Nebraska. It will be held on Sunday, Oct. 31, at 4:00 p.m.

The rally draws Lutherans from many miles away in this part of Texas. It is sponsored by thirteen congregations in the Big Country: Grace Lutheran, Our Savior Lutheran and Zion Lutheran in Abilene; Trinity Lutheran in Albany; Bethel Lutheran, Avoca; Redeemer Lutheran, Cisco; Trinity Lutheran, Haskell; First Salem Lutheran, Roscoe; Faith Lutheran, Sagerton; Grace Lutheran, Snyder; Christ Lutheran, Stamford; Faith Lutheran, Sweetwater, and St. John's Lutheran, Winters.

Theme of the Rally is "HERE WE STAND", similar to the statement made by Martin Luther before the Diet of Worms, Germany, on October 31, 1517. Today the words encompass not only the principles of "Scripture Alone", "Grace Alone", and "Faith Alone", but also the importance of evangelism for our world, the need for spreading the Gospel, the insistence on the inspiration of the Bible.

On these all Lutherans can agree, whether their congregations are part of The American Lutheran Church, The Lutheran Church-Missouri Synod, or The Lutheran Church in America.

Each congregation is being asked to prepare a banner for the rally to be displayed on the stage. It is to be eight feet long and forty-four inches wide, on a ten-foot pole.

Mental Retardation

Editor—This is one of a series of articles about Mental Retardation prepared by Mrs. Eugene Cochran and the Public Education Committee of the Texas Association for Retarded Citizens.

LEGAL GUARDIANSHIP

At the time your child's mental incompetence is adjudged, you will probably seek the appointment of a legal guardian. In taking this step and securing such appointment your right to direct the affairs of your adult son or daughter is lawfully established. In the event the child survives both parents, the person named as successor guardian by a will is honored in most states. Since several states have special guardianship laws pertaining to mentally retarded persons, parents should study the pertinent laws in their state.

The Advantages of Guardianship—You as a parent exercise during your lifetime a "natural guardianship" of your retarded child during his minority. Legal guardianship is a mechanism through which the court assures that the rights and liberties of a retarded person are protected when he cannot protect them for himself. By this procedure, the legal power of choice in certain personal or financial matters is transferred from the retarded person to another who is willing and able to exercise it.

In some states, guardianship functions may be carried out by a "curator", "committee" or "conservator". A conservator is a person appointed to have charge of the person and/or property of one who is found by an appropriate court to be incapable of managing his affairs.

Guardianship Responsibilities Vary—When legal guardianship is required, it should be adapted to the circumstances of each case.

For retarded persons who are incapable of routine decisions and self-management, plenary (full) guardianship will be needed. By plenary guardianship, the guardian has full discretion as to residential placement after the death of parent's as well as control of the ward's property.

For less severely retarded adults, a limited guardianship will often suffice. The authority of a limited guardian is set forth in the court order or appointment. For example, a guardian or conservator of the property can be named to take over the financial or business interests of a retarded person who may be quite capable of handling his personal needs.

It may sometimes be wise to have both a conservator

and a guardian.

Symptoms Of Emergencies

You're scared. Suddenly, without warning, you're in pain, or you can't breathe, or you feel so weak that you collapse. You think maybe it's not so bad. It'll go away. But it doesn't. You don't know what to do. "Call your local ambulance service," says Ms. Michal Hubbard, coordinator for West Central Texas Emergency Medical Services (EMS). "That's what they're here for—so you can get help when you need it." In Haskell, just dial 864-2621, and an

ambulance staffed with trained people who know what to do will be there. "Anytime there's a severe, sudden or unexpected change in how you feel or how you're able to function can be considered an emergency," says Ms. Hubbard. "It can happen to you, or to someone you love—and it's frightening. But getting help fast is the most important part of saving that life." "Many people don't get help as quickly as they need it because they're hesitant to call an ambulance," says Dr.

Dale Brannom, Physician Director of the West Central Texas EMS Advisory Council. "One reason people don't call is that they're not sure if they're sick enough to need emergency care," says Dr. Brannom. "They think they'll be embarrassed if the problem turns out to be a minor one—and they don't want to put doctors, nurses and the ambulance attendants to a lot of trouble for nothing. "But since prompt care is so important," he says, "it's a person's duty to himself and his loved ones to learn to

recognize symptoms of emergency situations, so he can call for help." Dr. Brannom explains some of the more common emergencies and how they feel: -Heart Attack causes severe pain, pressure or squeezing in the center of the chest. The pain may spread to the shoulder, neck, arms, jaw or back. The victim may also have shortness of breath, nausea, sweating or feelings of weakness and restlessness. -Choking is an emergency when the person is unable to speak, breathe or swallow. The person may turn blue in the face, and/or collapse. Other respiratory difficulties cause similar symptoms—gasping, a different rate of breathing, foaming from the mouth and a blue tinge to the skin, tongue, lips and nails. -Hemorrhage is excessive, uncontrollable bleeding, or ANY bleeding from the eyes or ears. -Stroke causes a sudden, rapid loss of the ability to move all or part of the body.

There's a feeling of weakness complicated by slow breathing in which the cheeks puff and the mouth sags. The victim is usually in a state of confusion, and his speech isn't clear. -Fractures, or broken bones, are present when there is pain, tenderness, swelling and bruising. Bone ends may be exposed, or the broken part of the body, such as the arm, may be twisted in a strange manner. The patient may not be able to move or feel anything in the area of the break. -Burns are serious enough to call an ambulance when there is a deep reddening of the skin and formation of blisters, or when the skin is whitened or charred. Other burns can be treated promptly at home or by a doctor. -Poisoning causes a variety of symptoms, depending on what the cause is. They include nausea, vomiting and cramping; unexplained collapse, shortness of breath or change in the rate of breathing; irritation, inflammation or

swelling of the skin. Dr. Brannom stresses that you should look for and keep any suspected poison in its container, so emergency care personnel will know how to treat the patient. -Convulsions demand immediate attention when the patient has repeated fits or seizures without regaining consciousness. A single convulsion can be waited out, and the patient taken to a doctor afterwards. -Allergic reactions include itching, burning skin and swelling of the face and tongue. The victim's lips may turn blue and he may faint or have difficulty breathing. -Unexplained sleepiness, failure to hear or respond, confusion or change in behavior can also be emergency symptoms. "The rule of thumb is: When in doubt, call for assistance," says Dr. Brannom. "Don't hesitate because you think it's not serious enough." "We'd lot rather give help

to someone who could have waited a few minutes than not to reach someone in time." **Bible Class Meets Sunday** Mrs. Frank Cadenhead (Billie) has opened her Bible Study Class to include single young adults of all persuasions. The class meets every Sunday morning at 9:45 in the House of Life, southwest corner Ave. E, and 3rd street. Donuts, juice, milk and coffee will be served. Noting that Haskell is blessed with a growing number of single young adults, in addition to college students who are coming home for the weekends, Mrs. Cadenhead is extending an invitation to persons of all faiths and races to come and study together and then proceed to worship services in the church of their choice. **We pack SELLING POWER in our CLASSIFIED ADS.**

Squares Entertain Some people may think that residents of Care Homes just sit around with folded hands and nothing to do. Not so at Rice Springs Care Home, especially when people such as Leon Ivy and other Squares turn out for an evening of square dancing to entertain the folks. Eyes sparkled and feet and hands kept time as the residents remembered when they, too, were square dancing. One dance "The Blue Moon of Kentucky" was dedicated to Norma Wiseman, an employee who is leaving Rice Springs. Square dancers were Mr. and Mrs. Orville Hamilton, Rochester, Mr. and Mrs. Bill Bowles, Mr. and Mrs. Bill Dunning, Mr. and Mrs. James Dodson, Rule, Mr. and Mrs. Delbert LeFevre, Sagerton, Mr. and Mrs. Cliff Gholson, Aspermont, Mr. and Mrs. Dent Atchison and Mr. and Mrs. E. L. Hilliard of Haskell.

INTRODUCING . . .

TO SERVE YOU BETTER

Melva, (Mrs. Felton), Everett is one of Haskell National Bank's "newer" employees, but certainly not new to Haskell, or to bank employment. She came to H.N.B. in February of this year, and has proved to be a very competent, and dependable worker. She came to work at a time when there was an urgent need "bookkeeping wise", and she stepped right in, like the "pro" she is, almost as though she had worked there before. Haskell National Bank feels very fortunate to have acquired such a fine person, and is well aware that her previous working experience has helped tremendously in her adjustment to it's method of operation. There is so much to learn, at first, that it takes a person with much "cool" to keep from hitting the panic button. Melva works in the bookkeeping department, and has learned to operate the "399" computer, and is also learning the proof machine. Bookkeeping, in a bank, means many things, check sorting and filing, statement making and mailing, machine operation, and endless lists of things to remember: correct signatures, stop payment orders, who can sign on what accounts, accounts being held for various reasons, and on and on.

Melva is a H.H.S. graduate and the daughter of Mrs. Willie Adress of Haskell. She is married to Felton Everett, also a H.H.S. graduate. Following their marriage, they moved to Big Spring, Texas, and Melva was employed in State National Bank there for about eighteen months. When the Everetts returned to Haskell, Melva began work in the County Tax Collectors' Office, where she worked for three and one half years, before coming to H.N.B. Felton became the Mutual of Omaha Insurance representative for this area. Felton and Melva have four daughters: Pat, (Mrs. Steven) Grand, a H.H.S. graduate and employed at Oates Drug, Nancy, a 1976 graduate of H.H.S. and now a student at South Plains Junior College in Levelland, Sherrie, a H.H.S. Junior, and Cindy, a Junior High student. Four daughters makes for much activity around the house, and the Everetts are actively involved in many school functions, including much work with the Band Booster Club.

The Everett family lives at 405 N. Avenue B, and are all members of Haskell's First Baptist Church, where Felton serves on the Board of Deacons.

Jr. High Football

The Haskell Warriors traveled to Knox City last Thursday for 3 games. The seventh grade version of the Warriors won their first game of the season 8 to 0. The youngest Warriors have improved their defense a great deal and moved the ball on offense with more consistency. Their record moved to one win and one loss.

The eighth grade lost their first game in two years by the score of 30 to 12. The Knox City 8th graders had a very explosive, quick team with good size. This loss left the 8th grade record at 3 wins and one loss.

The junior varsity again shut out an opponent by the score of 20 to 0. The tough "sic'em" defense of the junior varsity started in the Knox City backfield all night. These very aggressive youngsters stuck some vicious blows on defense, Monnie Hise, Mark Jackson, and Willie Marshall were particularly devastating. On offense, Monnie Hise sparkled with several slashing runs. Johnny Yearly also exploded for several good gainers. The junior varsity's record is now 4-0.

The freshmen defeated the Olney freshmen at Olney by the score of 12 to 6. Rocky Young dashed off one 25 yard run for a touchdown. Steve Escobedo scored the other touchdown on a short run. The freshmen brought their record to one win, one loss, and one tie. The Freshmen are showing much of the same toughness and aggressiveness that is necessary to become good varsity players.

revolutionary operator "Control Center" concept.

The "Control Center" is a departure from the add-on cab of the past. It is an integral part of the tractor located forward of the conventional design, permitting maximum visibility and improved riding quality. It also accommodates aft-mounting of a larger fuel tank and molded auxiliary tanks on the left side of the tractor for a full day of continuous work under heavy load.

Other equipment in this new 1977 lineup includes three windrowers with an exclusive single auger over-shot headed in 12 and 14-foot sizes; two forage harvesters for use with tractors ranging from 100 to 150 PTO hp; various haying equipment; materials handling machinery; and tillage equipment such as chisel plows, plows, disk harrows and soil conditioning units.

Parents should be sure to caution children against the dangers of fire. In case of a clothing fire, warn them not to run or remain standing, but to drop down and roll on the ground. If indoors, drop to the floor and roll into a rug to smother the flames. If no rug is handy, a heavy coat or wool blanket will do. Jumping under the shower or spraying with a garden hose attached and coiled both indoors and outdoors, for emergency fire use.

No segment of the economy has ever changed so fast and so completely as has agriculture during the past 60 years. When these changes have required capital, your Federal Land Bank has been a primary source of funds. There will be more changes. But we believe that a free agriculture—based on the family-operated farm or ranch—will continue to flourish in any new environment.

We are banking on the farm family and on the family farm.

Wildlife Exhibit To Disband

After May 1977 the Parks and Wildlife Department's traveling wildlife exhibit will be disbanded. This measure, another of the agency's program cuts, is attributed to decline in Game and Fish Fund Nine revenue which is the primary source of the exhibit's financing.

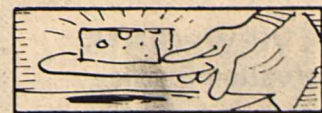

A part of the P&WD's Information and Education Division, the wildlife exhibit was organized in March 1950 to show live wildlife specimens representative of various parts of the state and provide educational information about them to the public.

Most animals in the exhibit are furnished under a cooperative agreement with the San Antonio Zoological Society.

This is the exhibit that was viewed recently at the Haskell County Fair.

The New Chevrolet.

A whole new car, a whole new ball game.

It was clear that cars had to become more efficient. Not just small cars. All cars.

It was equally clear that plenty of people still preferred cars of size and substance, and

were not about to settle for less. So we gave them more.

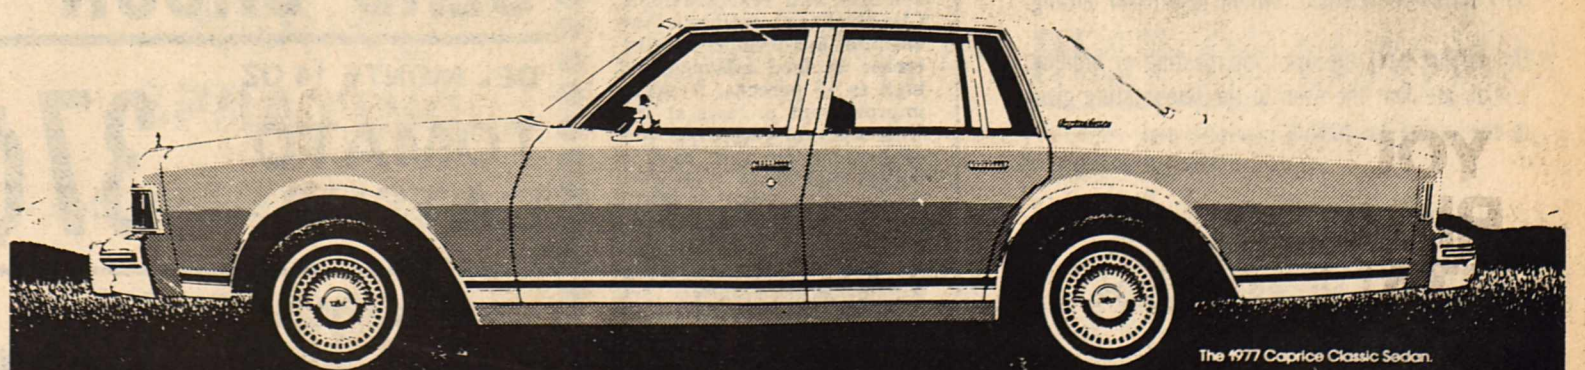

More economy and common sense on the one hand, more head room and rear leg room and trunk room

on the other.

All in a crisp, clean, beautiful new package we call The New Chevrolet. A whole new kind of 6-passenger car that's more manageable in size, more

responsible in its use of fuel and materials, yet retains "big car" room, ride, comfort and pride.

It's more than a new car. It's a whole new ball game. See for yourself at your Chevrolet dealer today.

The Haskell County Development Group elected to enter into a special wind erosion control program. The Haskell County ASCS Office informed me this week that they expect to receive funds for this program early in November.

The practices that have been adopted for this special wind erosion program include WE-1, Establishing Field Windbreaks; WE-2, Establishing Permanent Vegetative Cover, and WE-3, Establishing Stripcropping Systems. There may be a chance that the program for Haskell County will be amended to include Livestock Water Facilities which will include wells for livestock water, storage facilities, developing springs or seeps for livestock water, and pipelines for livestock water.

The current program will cover 90 percent of the actual cost, not to exceed an amount determined by the County Committee of ASCS. WE-1, Establishing Field Windbreaks will include cost-sharing for site preparation, seedlings, seeding operation, and necessary fencing for site protection.

WE-2, Establishing Permanent Vegetative Cover will include cost-shares for seed, seeding operation, fertilizer, sprigs and sprigging operation and litter cover. Cost-sharing under WE-2 will not be authorized for clearing of obstructions from the area to

be seeded or fenced. WE-3, Establishing Stripcropping Systems will include cost-shares for seedbed preparation, seed, and seeding operation, and litter cover if necessary. Stripcropping systems will be cost-shared on 90 percent flat rate rather than on actual cost.

Should Livestock Water Facilities be adopted for Haskell County, the cost-share rate will be at 50 percent of the actual cost not to exceed an amount to be determined by the County ASCS Committee.

I believe this special program for wind erosion control will be of great benefit to Haskell County. The Boards of Directors of the California Creek and Wichita-Brazos Soil and Water Conservation Districts hardly agree that the program should be of great benefit, and urge any and all interested producers to make inquiries into the program details either at the Haskell County ASCS Offices or the Soil Conservation Service Field Office in Haskell.

All phases of the Wind Erosion Program will be assigned to the Soil Conservation Service for planning and installation. All phases of the program will, of necessity, have to conform to the standards and specifications for each practice as set forth in the Haskell Field Office Technical Guide.

Producers with conservation plans will simply amend their conservation plan to include

these practices. Producers who currently are not under agreement with either of the local soil and water conservation districts will be urged to develop plans for their entire farm unit to include the special wind erosion program.

Help may be on the way for lowering the costs of feeding cattle. Initial research on a new compound called monensin has had positive results at several agricultural colleges and test stations. Classified as an antibiotic, the chemical has produced an increase in feed efficiency as high as 13 percent. Average improvement in tests at the University of Nebraska was 11 percent. On that basis a dollars and cents evaluation means a savings of about twenty dollars a head in the average feeding cost for feedlot beef. Food and Drug Administration officials are expected to react more favorably toward the new compound than toward the still controversial DES since monensin acts only in the rumen of the animal and reportedly leaves no residues in tissue. Researchers say the compound enhances gain efficiency when used in amounts small enough to be comparable to adding one pint to 5,000 gallons of water.

eggs well; add mashed bananas and melted shortening. Add dry mixture. Stir until well blended. Add chopped nuts. Stir lightly. Grease bottom only of a loaf pan. Sprinkle bottom of pan lightly with corn meal. Pour batter into pan. Bake at 350 degrees 60 to 70 minutes or until bread is done. Let bread partially cool in pan 20 to 30 minutes before turning out on rack. Cool thoroughly before slicing or wrapping for storage.

The Haskell Junior 4-Hers met October 2, under the leadership of Kay Campbell. Hollie High acted as president and called the meeting to order. Kimla Strickland called the roll and the girls discussed what they would like to do in future meetings.

Kay Campbell then instructed the girls in rolling and cutting sugar cookies. Kimla made powdered sugar icing while cookies were baking and Hollie made grape Kool-aid. The cookies were iced with yellow icing to represent gold stars at the 1976 Gold Star Banquet.

Those present enjoyed the refreshments they had made and the meeting was adjourned.

★ For best results, use flat bottom utensils with tight fitting covers. Utensils of medium or heavy weight aluminum conduct heat faster, transfer heat evenly and respond quickly to temperature changes.

★ Match the utensil to the size of the unit. Use 8 inch units for large utensils. Use 6 inch units for small to average sized pans.

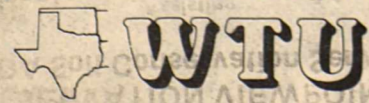

★ Use high setting for a quick start for any surface cooking, or to boil water quickly. When cooking temperature is reached, switch to a lower setting.

★ Do not pre-heat the oven for roasting or broiling, but do pre-heat the oven to the temperature given in the recipe for baking.
