ENROUTE TO SANTA FE

The special train, consisting of the private cars Ahumada and Santa Pedro, carrying Governor Curry and party of distinguished friends, left Torrance over the Santa Fe Central at 11:05 Wednesday morning enroute to Santa Fe, where the inauguration ceremonies were held yesterday. Large crowds met the train at every station to welcome the new chief executive of the territory, and the brass band, which accompanied the party played several selections at the depots of leading towns. The trip was safely made to Santa Fe, where an immense crowd greeted the new governor on the arrival of the special train.

The following distinguished party was aboard the special:

Governor Curry, Capt. Chas. Ballard, sheriff Chaves county, E. A. Cahoon, member territorial board of regents, J. W. Stockard, proprietor Torrance-Roswell auto line, W. M. Atkinson, chairman board of county commissioners Chaves county, K. S. Woodruff, ex-sheriff Chaves county, J. P. Church, member of city council, of Roswell, N. M.; Judge A. B. Fall, general counsel legal department Col. W. C. Greene, W. A. Hawkins, general attorney Rock Island system, of Three Rivers; J. E. Wharton, lawyer, Dr. George C. Bryan, member medical board, Judge Edward A. Mann, associate justice supreme court, of Alamogordo, C. F. Hunt, ex-sheriff Bernalillo county, of Albuquerque; H. B. Holt, member of the house, Mark B. Thompson, district attorney, Capt. Patrick F. Garrett, rancher, ex-sheriff, of Las Cruces, New Mexico; Felix Martinez, capitalist, of Las Vegas; Charles V. Safford, secretary territorial republican central committee, Charles F. Easley, member penitentiary board, Santa Fe; A. H. Hudspeth, member house Lincoln county, of White Oaks; W. C. McDonald, member cattle sanitary board, N. S. Rose, secretary and manager Carrizozo Outlook, of Carrizozo; Wm. Riley of Capitan; H. C. Clunn, private secretary Judge A. B. Fall, El Paso. Ladies of the party: Mrs. A. B. Fall, Mrs. Chas. L. Ballard, Mrs. J. W. Stockard, Mrs. W. C. McDonald and daughter, Mrs. William Riley.

LAST OFFICIAL ACT

Executive edict No. 5.

Executive Mansion,
Province of Samar, P. I.)
Enroute to the City of Santa Fe, N. M.

Realizing the necessity of aid and counsel from my gentlemen friends, and appreciating their presence and support, but above and beyond this we seek the wiser and higher counsel of the delegation of ladies accompanying this party, I hereby appoint as my special aides de camp, and solicit their united support whose authority as such will be recognized, by these presents, the following named ladies: Mrs. A. B. Fall, Mrs. Chas. L. Ballard, Mrs. J. W. Stockard, Mrs. W. C. McDonald and daughter Francis, Mrs. William Riley.

Witness my hand and the Great Seal of Samar this the Seventh day of August, in the year of Our Lord One Thousand Nine Hundred and Seven.

GEORGE CURRY,

Attested: Governor.

H. C. CLUNN,
Secretary.

TO INVESTIGATE

ALAMOGORDO CO.

Alamogordo, N. M., Aug. 6.—The government inspectors have arrived in this city and are busily engaged in examining the records of homestead entries, and incidentally any other records that may be useful. Mr. W. M. Tipton is conducting the investigation, with the assistance of an agent of the general land office. The gentlemen refuse to give out any information of the object of their investigation, but it is pretty well understood they are looking into the manner in which the Alamogordo Lumber company acquired the right to cut the timber from the Sacramento mountains. It seems that this land had been taken up by homesteaders, and very soon thereafter found its way into the mills of this company, and while there has in the past been much conjecture as to the legality of such movements, it has been claimed all the time by this company that the purchase of the lumber has been legitimate in every way. Its attorneys feel that any investigation will be welcomed by them in order to close the mouths of the gossips, and it is felt at this time that the investigation is being made particularly with reference to this company.

ARE YOU READING

"The Yellow Holly," the thrilling detective story now running in the El Paso Herald. If you are not, you are missing one of the great stories of the year.

A GROWING INSTITUTION

It was our good fortune on Tuesday of this week, to visit the works of the Rock Island Cement and Plaster company at Ancho station, some twenty miles north of here. This plant is one of the most important institutions in Lincoln county for several reasons. In the first place, these works started some five years ago in a small way and has grown steadily since that time, proving that the undertaking is a practical success.

The importance in a business way of a manufacturing establishment like this can hardly be over-estimated, yet, there is another feature in this instance much greater than that, which is the fact that these works are demonstrating the quantity and quality of building material which can be developed in this immediate vicinity for the building of cities and towns which are sure to come within a few years as a result of the settling up of our valley lands and the developing of our mining resources.

As already stated, these works began operations in a small way about five years ago, the first attempt being the manufacture of cement from the vast beds of gypsum located at that point. From this beginning the work was extended to other branches, such as the celebrated wood fibre plaster which is furnished by the company to builders all over the southwest.

From the start the works have been unable to supply the demand for their superior quality of building material, and now the plant, which has grown to an immense works, supporting a small village with its pay roll, is being doubled in capacity in order to supply the demand.

A novel method of enlarging is being resorted to in the case of the main mill; a foundation has been laid a considerable distance from the outside walls of the old building and solid concrete walls are being erected right over it as it stands. When the new fire proof building is completed the old one will be taken down leaving the machinery in place, the new machinery to be installed in the additional space provided.

A new and important branch has just been added to the works during the past year, which should prove of great value to the entire county and particularly to our town and the valley, this is a large pressed brick factory. The present output of this branch of the work is thirty thousand per day, and a machine is being put in for making vitrified blocks, which will equal forty thousand per day, thus giving an equal of seventy thousand brick per day.

A GOOD ONE

The entertainment given last Saturday by the ZoZo Imperial Minstrel was a good one from every point of view, and was enjoyed by all who attended. The songs and jocks were appropriate and well rendered, and the slight hand and ladgerdmain acts clever and artistic.

From start to finish the program was executed with the ability of professionals, and the change of scenes was made without delay or error which is a rare thing in amateur theatricals.

The troupe will probably make engagements with surrounding towns and render the program with slight changes and additions for the benefit of other audiences, which should be a rare treat to any and all who are so fortunate as to secure a date with them.

Full particulars of the inauguration of Governor Curry will be given in our next issue.

GREAT WORKS AND THEIR COST IN HUMAN LIVES

Spanning Wide Rivers, Erecting Skyscrapers, Boring Tunnels and Subways, Not Done Without Many Fatalities.

Tales of Heroism Relieve Recital of Appalling Disasters—Hairbreadth Escapes and Startling Adventures Form Part of the Building Up of the Great City of the Future—"Immunes" Sought All Over Earth.

New York.—Not millions of dollars alone, nor the skill of designers, nor the cunning of craftsmen enter into the making of a great city. Skyscrapers, bridges, tunnels and subways must be purchased at a heavy cost of human life. Few realize how many men die that a great public work may be created. Engineers and builders say that the sacrifice is inevitable. Six tunnel systems are being constructed under the North and East rivers. According to one estimate, there is one man killed in them, on an average, for every day of the year. A well-known engineer has estimated that every floor of a modern building of pretentious size has cost a life, either in the forests where the timber has been cut, in the coal and iron mines, and stone quarries, the steel mills, the caissons sunk deep in the earth for the foundations, or in the steel superstructures that rise lacelike to the sky.

Hairbreadth Escapes.

Yet the spirit of adventure walks hand in hand with death. While many lives were lost that the Brooklyn and Williamsburg bridges might be built, there were escapes by the workmen engaged on them that would seem grotesque and improbable if put into a novel. A man may die for every day of the year during the construction of a caisson or river tunnel, but the men who escape tell stories that would enhance the fame of Hugo, Poe, or Eugene Sue. The sacrifice of life in public works, too, is a story apart from the record of seven lives ended by violence in this city for every day in the year. It takes no count of the men, women and children killed by

terminal works, 20 in the Belmont tunnel, two in the subway borings under the East river, and three in the Hudson company's terminal at Church and Dey streets.

The erection of the Brooklyn bridge between 1870 and 1883 advanced to the accompaniment of casualty and death. John A. Roebling, the first engineer in chief, lost his life as the result of his responsibilities and an injury received while at work on the bridge. His eldest son, Col. W. A. Roebling, succeeded him, but the bridge was still in its early stages when he became an invalid from exposure, overwork and anxiety.

Border on Humorous.

Some of the escapes, miraculous as they seemed to be, were not without their suggestions of humor. One workman fell from the Manhattan anchorage to the ground, 80 feet below, struck a pile of lumber, and lived to tell of it. He struck the lumber with such force that he broke one of the planks neatly in the middle. Another workman plunged into one of the well holes in the Brooklyn tower. At the bottom, 104 feet below, was a pool of water with an empty cement barrel floating around in it. The falling man landed on the barrel and rolled off into the water. He was only slightly hurt.

An unprecedented record was made when the Williamsburg bridge was built between 1897 and 1904. Although as many as 250 men worked at once under compressed air in the caissons, not a single death from "the bends" was reported. The hard lessons of the Brooklyn bridge cais-

son were learned. At first the "sand hogs" worked in eight-hour shifts. The working periods were gradually reduced as the caissons sank deeper and deeper beneath the river bed, until, when the workmen were 107 feet below water level, the shifts had been reduced to two of 45 minutes each. The "sand hogs" were provided with dressing rooms, hot baths, steam elevators to carry them to the surface, and plenty of hot coffee. Some of the men were

attacked by caisson disease, but none of them ended fatally. This great public work was not to be accomplished, however, without the usual tribute of human life. The working force on the bridge varied from 400 to 800 men. Twenty of them were killed, mostly by falls. As was the case with the Brooklyn bridge, some of the escapes were grotesque, some almost miraculous.

Williamsburg Bridge Fire.

Many New Yorkers will recall the splendid spectacle one night early in November, 1902, when burning oil and woodwork atop the Manhattan tower of the bridge shone over the city like a blazing meteor. Then the firemen, powerless to fight the blaze 100 feet in the air, watched the flames spread

those killed or injured, 156 were workmen, three belonged to the engineering staff, and 17 were persons not connected with the operations. In the two years the subway cost 16 lives, all but one of the victims being workmen. Again in 1902 the list was formidable. Twenty-one lives were lost and 214 persons were hurt, 157 of them being employees.

Dangers of Compressed Air.

With all precautions it is apparently impossible to prevent "the bends" claiming its victims. Two "sand hogs" died in one day last October, for instance, because, as the doctors believed, they had passed too quickly from the compressed airlocks to the surface. A conspicuous example was the death of young Channing Bullard

A DYNAMITE EXPLOSION

A GAVE-IN

WORKMEN STRUGGLING TO BE FIRST OUT OF A FLOODED CAISSON

to the swaying foot bridges until they became great festoons of running fire.

Several men were on the bridge at the time, but they all escaped. One of them crossed the traverse platform from one blazing foot bridge to the other just as the burning structure fell. For awhile he hung there over the river swaying to and fro like a spider whose web is torn by the wind. Then he climbed to the big cable overhead and crawled slowly to the Brooklyn tower.

When the bridge was nearly finished a riveter slipped on an icy platform and fell 150 feet to the East river. He turned several somersaults on his way down, struck the water with a great splash, and was fished out almost uninjured. Later a riveter's apprentice stepped on a greasy girder, slipped and fell to the ground, 100 feet beneath. He landed in a heap of sand, got up and looked around, as he said later, "to see if he was dead." His only injuries were a broken arm and some bruises.

Lives Lost in Subway.

In the building of the subway there have been nearly 750 accidents, costing 90 lives, or four victims for every mile of track. Hardly had the work been started, in 1900, when falling rock in the south heading of the One Hundred and Sixty-eighth street tunnel killed five workmen and injured two others.

The explosion of dynamite in the same section of the work, near Forty-second street, on January 27, 1902, shattered the windows for blocks around and killed five persons, four of them being in the Murray Hill hotel. In October, 1903, another fall of rock near Fort George killed ten workmen.

It was not these more serious accidents, however, that swelled the list of dead in subway building to a formidable total. Rather was it the casualty to single workmen or to some careless bystander—death in the dark recesses of the East river tunnels or a Harlem bluff, the results of a misstep that sent a workman crashing into the depths of an open trench, injuries from falling timbers, or lives snuffed out by miscalculated blasts, or an avalanche of soggy soil. In 1900, when the subway was started, 27 workmen and eight outsiders were involved in accidents more or less serious. Constructive work was in progress at many points in 1901, and the number of casualties was swelled to 176. Of

on January 8, last, Bullard was a big, husky fellow, a graduate of Cambridge Latin school, and an expert electrician. He started to learn tunneling, and decided to begin at the bottom by becoming a "sand hog." He passed the examinations and went to work on a Monday morning as a hydraulic fitter in the Pennsylvania tunnel under the East river. When he came to the surface that night he almost fainted with "the bends." The physician took him back into the tunnel, put him in the medical airlock at the foot of the shaft, and, as is usually the case, "recompressed" him—that is, treated him under the pressure of compressed air. The next morning Bullard was unconscious. He was sent to a hospital, and died that evening. In his case it was said that he had Bright's disease which developed rapidly under air pressure.

Search World for "Immunes."

The necessity of obtaining "sand hogs" with these peculiar physical qualifications, with tunnel building in this city to an extent hitherto unprecedented for tunnel workers, and not a little difficulty in obtaining the required number. The Pennsylvania railroad, for instance, literally searched the world for men of experience to build the tunnels. On the cross-town shafts they have scores of Austrians who get their experience in the Simplon tunnel. The engineers and foremen include men who have tunneled in Egypt, South Africa and England. As many as 5,000 men have been employed at one time on the McAdoo tunnel project. On account of the constant menace to life and limb, their wages are proportionately large.

Chief Cause of Danger.

The large number of casualties on the North river works is explained by the peculiar difficulties of the work. The East river tunnels were driven largely through rock. In the North river the tunnels must be driven through masses of soft silt, varying from oozing mud to treacherous quicksands. The compressed air must be maintained at a higher pressure to keep out the water. The danger is greatest from a "blowout" or a leak, with its sudden inrush of water. Indeed, the old heading of the tunnel which crosses the North river at Morton street was abandoned at one time because so many lives were lost by "blowouts."

They who grow in grace surely will grow more gracious.

FALLING 150 FEET TO THE EAST RIVER

WORKING 200 FEET ABOVE THE RIVER

HE CRAWLED SLOWLY TO THE BROOKLYN TOWER

accidents in the streets—one victim for every sunset.

A hint of the sacrifice of life in public works was found in the records of the board of coroners in Manhattan. Last year there were 2,160 deaths by violence in the boroughs, and 684, or nearly one-third, were caused by falls, explosions, the collapse of earth in excavations, premature blasts, and falling rocks and timbers. The river tunnels were pushed forward at the cost of 68 lives, or 43 in the Pennsylvania

sons had been well learned. At first the "sand hogs" worked in eight-hour shifts. The working periods were gradually reduced as the caissons sank deeper and deeper beneath the river bed, until, when the workmen were 107 feet below water level, the shifts had been reduced to two of 45 minutes each. The "sand hogs" were provided with dressing rooms, hot baths, steam elevators to carry them to the surface, and plenty of hot coffee. Some of the men were

PEOPLE TALKED ABOUT

HAS EYES ON WHITE HOUSE

Jesse R. Grant, son of Gen. U. S. Grant, is being mentioned as a candidate for the Democratic nomination for president of the United States. He is not only willing to accept the nomination, but is ready to come out openly and make a frank and determined effort to get it. This statement has been made with Mr. Grant's knowledge and consent by persons who are in close touch with him and thoroughly cognizant with his political plans. Those who know Mr. Grant personally believe that if he could get the nomination he would make a strong candidate for the Democrats, because they think he would be able to unite the factions of the party. The conservative elements of the Democracy, his friends say, ought to have more faith in him than in any other candidate so far mentioned.

As the son of Gen. Grant he is regarded by his friends as certain to get a large vote from federal veterans in the north whom no other candidate could entice from the Republican ranks.

Mr. Grant is a resident of New York city where he lives the simple life. He devotes his mornings to doing nothing in particular, as he has nothing to do. Every afternoon finds him in the Manhattan club, a Democratic stronghold. Here he smokes till dinner time.

Jesse Grant is not without opinions. He favors tariff revision, he thinks trusts harmless, he believes in restricting immigration, closing the gates to all but agriculturalists; he sees no danger in great fortunes and thinks the average American citizen is the best informed man in the world.

LEADING LEGAL LIGHT

Uriah M. Rose, one of the most distinguished figures in the large delegation of noted Americans to The Hague international peace conference, has been for many years regarded as the most scholarly lawyer in America. The man who is to-day a world-famed authority on international law and a powerful advocate of the new code of arbitration for settling the disputes of nations, was born 73 years ago in the backwoods of Kentucky. At the age of 19, when Abraham Lincoln was winning fame as a lawyer, young Rose began his brilliant career before the bar of the "Blue Grass" state.

While he has always been prominent in politics and a member of the national Democratic central committee for years, he has studiously refused public office. For the past quarter of a century he has been in the foremost rank of the Arkansas bar and reckoned as one of the leading legal lights of the nation, serving for three years as president of the American Bar association. Judge Rose has been a great traveler and observer of international conditions. He has contributed to the law journals many articles on American and European jurisprudence, particularly noteworthy among these being his papers on "Controversies of Modern Continental Jurists."

Judge Rose is a fine French scholar, a fact of considerable importance and usefulness to the delegation, as much of the conferences will be conducted in French.

AMERICAN BAYREUTH PLANNED

Mme. Lillian Nordica will establish on the Hudson, near New York, a Bayreuth in America. With a part of her great fortune the noted singer will erect the Lillian Nordica Festival house, which will be to this country what the famous operatic institution founded by Richard Wagner, and now maintained by his widow, is to Europe.

The site for the institution was purchased recently for \$100,000, and Mme. Nordica expects that the opera house will be ready for its formal dedication one year from next summer.

An American institute of music, where American young men and women who aspire to operatic honors will be taught by the foremost teachers in the world, is included in the plans of the famous singer. In a statement in which she announced her plans, Mme. Nordica said:

"Call my object philanthropic or what you may, but the idea of founding here in my own country an American Bayreuth has been my life's ambition. All the years I have been singing I have dreamed of such an institution. Now I am able financially to start this great project, which I know will be an institution which after I am dead will continue to grow and enlighten the people of this country, who are now awakening to the benefits to be derived from a musical education such as was not dreamed of ten years ago.

"In this plan of mine I am assured of the hearty cooperation of men and women of wealth. The latter years of my life I hope to give entirely to seeing this great institution grow until it can have no rival.

"The buildings that will be a part of the American Institute of Music alone will cover four acres. They will be erected close to the Lillian Nordica Festival house. In connection with the institute there will be dormitories and houses where the students at little expense will be able to live while pursuing their musical studies.

"Europe will contribute teachers, and they will be paid for their services more than they can hope to earn abroad.

"The Lillian Nordica Festival house will be in every way an exact reproduction of the theater erected by Richard Wagner. The Wagner operas will be given there in the summer with the greatest artists in the world."

PICTURESQUE ADMIRAL RETIRES

Command of the New York navy yard in Brooklyn was the other day relinquished by Rear Admiral Joseph B. Coghlan to Rear Admiral C. F. Goodrich. Rear Admiral Goodrich was formerly a member of the Endicott board of fortifications, president of the navy institute and commander in chief of the Pacific fleet.

Admiral Coghlan retires from active service. He declared if he had his life to go over again he would reenter the United States navy; that it is the finest organization of its kind in the world, and that it holds out greater inducements to the young men of this country than does the navy of any other nation. Admiral Coghlan thinks that our navy should be made bigger and stronger. He said:

"Peace in perpetuity, about which so much is being said just now, may be possible, but it is not reasonably probable. Be prepared to whip or be willing to get whipped is the position in which every great nation stands to-day. Let us keep peace while we have it. The only way to do this is to keep building battleships and adding to the numerical strength of the navy."

Admiral Coghlan thinks the United States ought to have the most powerful navy afloat. He was loud in his praise of the United States Naval academy and also of the men who are new enlisting in the navy. These bluejackets come largely from farms, he said, and they are selected with extreme care as to their physical fitness.

STATE OF OHIO, CITY OF TOLEDO, ss.

But, They Had Not.

At a political meeting the chairman asked at the end of the candidate's speech whether "any gentleman has any question to ask?"

Some one rose and propounded an inquiry mildly critical of the prevailing political belief. A politician behind raised a club and struck him to the floor. The chairman looked round and asked quietly: "Any other gentleman a question to ask?"

With a smooth iron and Defiance Starch, you can launder your shirt-waist just as well at home as the steam laundry can; it will have the proper stiffness and finish, there will be less wear and tear of the goods, and it will be a positive pleasure to use a Starch that does not stick to the iron.

We gain strength of the temptation we resist.—Emerson.

NERVOUS COLLAPSE

IS OFTEN PREVENTED BY DR. WILLIAMS' PINK PILLS.

Taken When the First Warning Symptoms Are Noticed Much Needless Suffering May Be Saved.

Are you troubled with pallor, loss of spirits, waves of heat passing over the body, shortness of breath after slight exertion, a peculiar skipping of the heart beat, poor digestion, cold extremities or a feeling of weight and fullness? Do not make the mistake of thinking that these are diseases in themselves and be satisfied with temporary relief.

This is the way the nerves give warning that they are breaking down. It simply means that the blood has become impure and cannot carry enough nourishment to the nerves to keep them healthy and able to do their work.

Rest, alone, will sometimes give the needed relief. The tonic treatment by Dr. Williams' Pink Pills, however, prevents the final breakdown of the nerves and the more serious diseases which follow, because the pills act directly upon the impure blood, making it rich, red and pure.

Mrs. E. O. Bradley, of 103 Parsells avenue, Rochester, N. Y., says:

"I was never very healthy and some years ago, when in a run-down condition, I suffered a nervous shock, caused by a misfortune to a friend. It was so great that I was unfitted for work.

"I was just weak, low-spirited and nervous. I could hardly walk and could not bear the least noise. My appetite was poor and I did not care for food. I couldn't sleep well and once for two weeks got scarcely an hour's sleep. I had severe headaches most of the time and pains in the back and spine.

"I was treated by two doctors, being under the care of one of them for six months. I got no relief and then decided to try Dr. Williams' Pink Pills. I soon began to feel better and the improvement was general. My appetite became hearty and my sleep better. The headaches all left and also the pains in my back. A few more boxes entirely cured me and I was able to go back to work. I felt splendid and as though I had never been sick."

Dr. Williams' Pink Pills are invaluable in such diseases as rheumatism, after-effects of the grip and fevers, neuralgia, St. Vitus' dance and even partial paralysis and locomotor ataxia.

Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price, 50 cents per box, six boxes for \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y.

SICK HEADACHE

Positively cured by these Little Pills.

They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Prowsiness, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER. They regulate the Bowels. Purely Vegetable.

SMALL PILL. SMALL DOSE. SMALL PRICE.

In these days of political strife it is so pleasant to see a touch of the softer and better side of human life exhibited that we take the liberty to reproduce the following version of a pretty incident from the Carlsbad convention as told by the Roswell Register in its "Impressions of a Tenderfoot"

One day during the doings I saw a little incident that reminded me how human we all are, and that there is one immortal tie that makes us all kin. There was a distinguished group on the stand, men who are and have been for years prominent in the educational, political and public life of the territory and the southwest. A sea of happy, interested faces looked up from the street. Down the thoroughfare the life-laden breeze from the south swayed the flags and the bunting and kicked up a merry fuss among the leaves of the cottonwoods overhead. It was a time to inspire the painting of word pictures.

To my left on the stand sat a man who has grown gray in the public life of the territory, whom you read about in the papers as the monster of corruption, in others as a marvelously patriotic statesman, whom I have long known. Between us was a little open space, and after there had been a speech to remember many a long day, and a selection from the great Caman band, there slipped into it a little urchin of five or six maybe, who had grown tired under the excitement of the day and had slipped away from his mother, most likely busy at one of the numerous booths. He was tired. The eloquence of the great orators did not move him and he fell asleep in the shade. It was cool there and he was comfortable, so what mattered the fuss the grown-ups were making. In one chubby, dirty hand was a sadly battered flag, in the other a big hunk of taffy that had left its mark on his rosy cheeks and bow-like lips. His hat had been lost early in the game and his yellow hair was tossed by the caress of the breeze. Just simply a little tow-headed child, all right, and a tired one at that, and while he slept the orators thundered and the great Caman band gave up its burden of melody. The sun rose higher and a stray beam came down and struck the child in the face. Then the great man that is cursed and blessed held out his hat and shaded the child's face. He was quiet about it, and the hand never wavered until the beam passed on. There was a look in his eyes that made me sure that he heard neither the rethoric nor the melody. I knew he was thinking of a little mound over by the Rio Grande, where many a long year ago he saw his own little flaxen-haired boy laid away, leaving an imperishable memory and a heartache that even the years scarcely dim. Our eyes met as the sunbeam

passed, and though not a word was said, both understood, for you see my heart was sorely thinking of another little towhead that blessed me for a day and passed on. After all, the world is kin, and words are not necessary. He knew it and so did I, that day, though perhaps tomorrow and forever we will fight each other in the walks of life as men will.

KIND WORDS

The following complimentary notice, coming as it does from one of the most able lawyers in the territory, Col. Frost, of the New Mexican, and who has known us personally and in a business way for many years, is highly appreciated, as it shows that our feeble efforts to word for the interests of the community are recognized by persons who are in a position to judge accordingly:

The Carrizozo Outlook, a bright weekly newspaper which commenced publication in that growing division point on the El Paso & Southwestern Railway in Lincoln County six months ago is evidently prosperous and N. S. Rose is the editor and manager. Mr. Rose for a number of years was a resident of Cerrillos in this county published the Cerrillos Rustler and also practiced law there. Two years ago he went to Estancia where he remained about a year and a half practicing his profession. He took charge of the Outlook when it was started. The paper has been and is doing good work for its town and section and its evident prosperity is fully deserved. Editor Rose is a hard and conscientious worker always alive to the interests of the community in which he lives and where he publishes a newspaper. The Carrizozo Outlook is fully deserving of liberal support. The citizens of the new town and surrounding country will help themselves by helping the Outlook.

NOTICE OF SUIT

Territory of New Mexico, ss
County of Lincoln, ss
In the District Court.

James H. Hooper, Frank O. Anderson, James Cavan, L. Richard Hust, Arthur Willoughby, Arthur L. Gaylord, John Moore, Henry Peterson and William F. Paul, plaintiffs, against The Vanderbilt Gold Mining Company, Archibald Clark Foot, American Gold Mining Company, Chicago Title and Trust Company, Minor D. Gaylord and Brown and Manzaneros Company, defendants. No. 1662.

The said defendants, The Vanderbilt Gold Mining Company, Archibald Clark Foot, Chicago Title and Trust Company and Minor D. Gaylord are, and each of them is hereby notified that a suit has been commenced against them in the District Court for the County of Lincoln, Territory of New Mexico, by the said plaintiffs, the purpose of said suit being to revive a former judgment rendered by said District Court the 19th day of October, 1899, in favor of these plaintiffs and against the defendants, The Vanderbilt Gold Mining Company and Archibald Clark Foot for the aggregate sum of \$3253.30 together with the costs of suit, and for the enforcement of a lien against and upon the American Lode Mining Claim in Nogal Mining District, Lincoln County, New Mexico. The amount claimed by the plaintiffs herein is said amount of \$3,253.30, with interest thereon from the date of said former judgment and costs and the continuation and revival of said lien; that unless you enter your appearance in said suit on or before the 5th day of October, 1907, judgment by default therein will be rendered against you. Hewitt & Hudspeth, whose address is White Oaks, New Mexico, are the attorneys for the plaintiffs.

A Word For the Boys

Kind Editor—Please give space for a few lines in your valuable paper for the benefit of the boys:

This has been a great year for landing so-called great men behind prison bars. Mayors of metropolitan cities, supervisors, bank presidents, cashiers, and even senators, are today wearing prison garbs who one year ago were leaders of men. A desire for wealth is commendable. No young man should allow himself to be discouraged nor his ambition to be dampened by the present common outcry against wealth. The opportunities which riches afford the possessor for doing good in this country are so numerous and ample that wealth, properly used, may be the means of making up the most admirable characters, while those who are inclined to depart from the path of rectitude would do so as quickly in one condition as in another. To save money and mass a fortune, if done with a proper notion, is not only a laudable ambition, but a duty to one's self, one's family and the community in which he lives. It is providing for old age, for calamity in business or sickness, for the means of helping the poor and relieving the oppressed. There can be no better instruction given a young man than that which impresses a true appreciation of the worth of money. Such an early impression would have saved many a man and family from serious misfortunes, discomfort, unhappiness, and even crime. The making of money and saving of money, as distinguished from the miserly love of money which is said to be the root of all evil, should be the aim of all young men who start out in life for themselves. They include habits of industry that leads the continent and often ward off dissipation, want and future misery. It was not the gathering in of wealth that has sent so many leading men to prison, it was the unlawful manner in which they endeavored to reach this harvest. All the wealth a young man can honestly accumulate will do him more good than harm.

Yours, etc.
P. C. BAIRD.

Stolen and Otherwise

A dispatch from Roswell says:—The body of Leland S. Terhune was found Tuesday afternoon buried in an irrigation ditch on the Booman farm, three miles east of Orchard Park. Moses L. Lewis, his cousin and partner, is under arrest and in jail suspected of being his murderer.

Bonny Ortiz, a printer, died recently in Santa Fe of Baight's disease.

Mrs. Francisco Marquez and two daughters, both under twelve year of age, were drowned at a ford in the San Juan river near Arboles by the overturning of their wagon.

Miss Emogene Hart, of Honolulu, and W. E. Johnston, of Rodeo, New Mexico, were married in Albuquerque recently. Miss Hart came all the way from Honolulu to wed the man of her choice. Mr. Johnston is a prominent business man of his home town. The ceremony was performed by Rev. George W. Dunlap of Las Cruces, and old friend of the bridegroom.

Mother Lucile, who was recently retired as sister superior of the Sisters of Loretto in Santa Fe, has been appointed teacher of music and languages at the new academy of the Sisters of Loretto at Kansas City, Mo. During her 40 years as superior of Loretto academy hundreds of young women have graduated from the institution. Her successor, Mother Barbara, has arrived in Santa Fe from El Paso.

The citizens of the growing little town of Estancia are very much worked up over the removal of the postoffice from the center of the business section to the Romero building, two blocks north. It is said that some men have taken the matter so much at heart that they refuse to mail their letters at the local office, sending them each evening by express to Santa Fe, or some other office, rather than walk the additional distance.

One half of a man's body held by the authorities of one state, and the other half held by another state, and each state refusing to give up the half it holds, is the situation now existing in Mexico, serves to magnify some of the incongruities of the laws of Mexico. Miguel Martinez, a Mexican Central brakeman, went to sleep under one of the cars of his train while it was on a siding at Espiritu Santo, Zacatecas. The train started up and cut him squarely in two at the belt, half of the body rolling to the side of the track and the other half becoming tangled in the brake beams, was carried to Salinas, San Luis Potosi. The authorities in each state took possession of half the body and each refuse to turn the half it has over to the other. No official investigation can proceed without a whole corpse as a basis, hence the authorities are at swords points and the relatives of the dead man are unable to do anything.

THE DAIRY

DAIRY REFRIGERATOR.

Plan of Construction Which Will Insure Good Results.

In building an ice box for storing butter and milk the first requirement is proper insulation. If a room is to be fitted up for this purpose make the flooring of ordinary inch lumber with 2x2 inch strips nailed across 18 inches apart, and on them lay two thicknesses of best odorless building paper and on these strips nail the flooring;

Section of the Ice Box.

turn the floor over, so naked strips will be uppermost (the strips are three inches shorter all around than the flooring); now put on two more thicknesses of paper, and lay flooring flush with strips; cut another set of strips three inches shorter than the floor. Lay on these two more thicknesses of paper and put on a last course of flooring.

There are now two perfect dead air spaces, which is a better non-conductor than any filling, and will always be sweet. Inside the room, sides are put on the same as bottom, except at the corners, where, as a matter of precaution, an extra thickness of paper is placed. In height of building leave enough room overhead for ice chamber (two feet, six inches is about right).

Now comes the principal feature of the room, namely, the ice racks. Four inches below, where the 2 ft. 6 inch line is from ceiling to cooler, nail securely a 2 in. x 4 in. scantling on long way of cooler, both sides alike; on these rest 2 in. x 4 in. pieces two inches apart. These are the floor of ice chamber.

The ice pans, or drip catchers, are made of 2 in. x 6 in. pine of good quality, thus: Gouge out one side, like a trough, full width of 2 in. x 6 in., and 1 1/2 inches deep in the middle, turn 2 in. x 6 in. over and take off corners, and plane, so the 2 in. x 6 in. will be a gradual fall from center to edge. These troughs run same way as ice rack. Before placing them, have tinner make a strong zinc or galvanized trough two inches wide, one side strengthened by wire turned in edge, other side straight; at one end have an outlet pipe soldered on, long enough to go through cooler and project an inch or more; if desired, an air trap is put on end. This trough runs lengthwise of room below ice rack, one end nailed two or three inches lower than other to secure quick drainage. On opposite side of room from gutter, secure a 2 in x 4 in. to lay first course on drip boards, convex side up, and three inches apart; these drip boards rest just over drain. Directly under the three inch space, and two or three inches lower down, place concave 2 in. x 6 in., one end resting on drain, and other end a little higher. The drip boards are not fastened, but can be taken down and washed readily. The rack for ice is not fastened, but can be removed at any time. Make doors on same plan as side and bottom. This room, built as above, will hold the same degree of temperature at all times and is very inexpensive.

GOOD DAIRY POINTS.

In buying cows don't take the seller's pick.

It is not yet warm enough to leave the cows out of doors.

Beware of the hired man that is continually quarreling with the cows.

Remember that a cow is not a race horse and should not be a plaything for a trained dog.

Don't wait until the creamery turns out a batch of bad butter before beginning to haul the milk or cream to the factory every day.

Have patience with the calf. Don't expect him to know how to drink when he is only a day old. You certainly knew less at this age.

DAIRY IMPROVEMENT.

The Cream Should Be Cooled and Aired Immediately After Separating.

Great improvement could be made in the quality of cream if producers were more skilled in the process of cream separation. In nine cases out of ten improvement could be made with very little, if any, extra work or expenditure. The simple fact that cooling and airing cream immediately after separation and maintaining it at a low temperature will preserve its quality does not seem to be generally understood among cream producers.

The lack of cleanliness through all the operations is another great drawback to quality, and this is one of the hardest things to correct, but by careful grading and rewarding for good quality much of the trouble could be overcome.

The washing of dairy utensils is one of the features most neglected by the average cream producer. There is a strong temptation on the part of the user to wash his machine but once a day, or even less often. Milk pails, cans and strainers are not, as a rule, properly washed and aired. The cow stables are often dirty and unsanitary, and through the entire operation of production there is a lack of cleanliness. There should be much more care taken in keeping the utensils clean and sweet. Washing powders could be used to good advantage and their use should be encouraged. In nine cases out of ten there is not enough cleansing matter used. Some agent should be employed in the process of washing that will aid the removing of grease, and at the same time will sweeten and cleanse the utensils. For this purpose nothing is better than sal soda or concentrated lye, and enough of either should be used to give the water a slippery feeling. It may be needless to say that all utensils should have a previous washing in nearly cold water to remove all traces of milk or cream, then a bath in the alkaline water for sweetening and purifying, and lastly an immersion in boiling water. After these processes, do not wipe dry, but hang or set where the air can circulate freely; cover with a loose meshed cloth to exclude flies and dust and we have as nearly sanitary care of dairy vessels and utensils as possible. In this connection it may be well to suggest the using of brushes instead of cloths in washing where it is impossible to reach all crevices with the latter.

Another item which would tend to better sanitation, says Coleman's Rural World, would be better rooms or buildings for doing work. The location of the hand separator in about three cases out of four is in the kitchen. While this may be necessary, it is not desirable, and certainly it does not improve the quality of the cream. The separator should be located in a place where odors and contaminating influences do not exist. A little dairy house can be cheaply made and fitted to accommodate all the utensils and work necessary in the production of cream. This may be equipped according to the size of the dairy, and would tend in a marked degree to remove some of the disagreeable features of dairying, at least to the women who must be housekeepers as well as helpers in their husband's work, for the kitchen would then be much more easily kept clean.

HOW TO THROW A COW.

It Can Be Easily Done by Method Suggested Below.

An Oklahoma farmer recommends the method shown in the drawing.

Bringing the Animal down.

which he considers self-explanatory. After the rope is brought around twice as shown, just "pull."

Bad Flavors in Cream.
Most of the bad flavors of cream are those acquired by absorption, taken up from dirt and decaying vegetables kept near the cream. There is no reason why as good or better butter cannot be manufactured by the individual dairyman on the farm as in the creamery. The small hand separator, if properly cared for, will greatly facilitate the work.

Main Part of Herd.
The young bull is the main part of the herd. He should be fed proportionally as well as the cow giving milk—the food should not be fattening, but strengthening.

Young animals grow faster than old ones. Therefore, put in your best ticks at feeding the young.

DOES NOT FEAR GREAT WEALTH.

Justice Brewer Sees Growth of Spirit of Humanity in America.

New York.—"I do not view with alarm the accumulation of wealth, because I believe that the spirit of humanity and the sense of responsibility is growing among us," said Justice Brewer, of the United States supreme court, the other day, in discussing the future of the country.

"I wish the next 50 years were before me," said the justice, "that I might witness and participate in their events, for the coming half century is to be a marvelous period of history. Great inventions will be made, remarkable discoveries will be brought to light, civilization will advance, humanity will progress, and I believe that our nation will approach nearer the blessings of peace, of comfort and of happiness.

"The greatest hope for the future of the American nation is the development of its conscience. I think the spirit of religion is growing stronger—the religion of the Golden Rule and the good Samaritan.

"I look forward to the day when every man, woman and child in these United States shall have the blessings of physical comfort, the happiness of plenty; when there shall be no dire poverty and want."

TALL PEOPLE LIVE LONGEST.

Cleveland Health Officer Says Germs Can't Climb Up to Their Noses.

Cleveland, O.—Health Officer Martin Friedrich, of this city advances a new germ theory that is certainly encouraging to people who are tall.

"Blessed are the tall," says Friedrich, "for they shall live long. A six-footer," he continued, "has more chance to escape disease germs than the little fellow. Those built close to the ground must be on the lookout."

Friedrich was perusing the physicians' mortality reports, and noticed a prevalence of children's diseases. Out of 26 cases of cerebro-spinal meningitis, or spotted fever, reported to his department since January 1, all of the victims have been children.

"I believe that most of the disease germs are close to the ground," he said. "We know that these germs are taken into the system through the nose in breathing. They find a breeding place in the dirt of the streets, and as they are stirred up by the passing pedestrians, they are drawn into the nose.

"The germs never reach any great altitude. Most of them are falling toward the earth, and as the children's noses are closer to the ground than those of adults, they are more likely to inhale the disease-makers."

WIGS NOW MADE OF GLASS.

Lack of the Genuine Article Forces Use of Novel Substitute.

London.—The enormous feminine demand for artificial coils and toupees is leading to a famine in human hair. Formerly Swiss, German and Hungarian girls supplied the world of fashionable women with luxuriant tresses of all tints.

But the governments of many countries are now making it illegal for a girl to sell her hair or for any agent to buy it. The supply in consequence is running short, and the prices of real hair are trebling.

A series of successful experiments point to spun glass as the most effective substitute for human hair. Wigs made from spun glass are wonderfully light and fine and the texture soft and beautiful.

It is easy to produce any shade desired, while curls and waves can be manufactured at will to suit the fashion of the moment. The imitation is so realistic and true to life that it is impossible to detect the difference between it and real hair grown on the head.

SLOOP GOES TO JUNK PILE.

Historic War Vessel Condemned and Sold for \$4,210.

Philadelphia.—After having weathered storms for nearly three-quarters of a century the old sloop-of-war St. Louis has been sold by the governor to a junk dealer of this city for \$4,210. The vessel was condemned by a board of surveyors at League Island navy yard, and it was decided by the navy department that it should be sold, the upset price being fixed at \$3,300. The great amount of copper in the old hulk made it more than usually valuable.

The St. Louis was built at Washington in 1828, and was the vessel with which Capt. Ingraham overawed an Austrian squadron in the harbor of Smyrna and secured the release of an American citizen who was held a prisoner on the Austrian flagship. Capt. Ingraham cleared for action and served notice that he would open fire on the squadron if the man was not surrendered by a certain hour. Before the time limit expired the man was sent on board the St. Louis.

RUNS OSTRICH RANÇH

MRS. PEARSON MAKES BUSINESS OF RAISING BIG BIRDS.

Has Just Started First Farm in Cuba—Feathered Animals Just Big, Healthy Idiots, She Says.

New York.—Mrs. Katherine Pearson of Phoenix Ariz., and Havana, Cuba, is not only the ostrich queen of the western hemisphere, but of the world at large. Her ostrich farm near Phoenix is the largest breeding ranch in America, and the farm near Havana on which she has just settled 45 birds is the first of its kind in Cuba. She owns more birds than any other woman ostrich farmer on the face of the earth.

"To begin at the beginning of my experience with ostriches I must tell you that my husband first bought a

Young Chicks Just Hatched Out.

farm and a few birds near Jacksonville, Fla.," said Mrs. Pearson when talking to a reporter. "Mr. Pearson was the manager of the theater on Union square known as Keith's.

"Shortly after our marriage he developed consumption and we had to go south for his health. After a few years, the climate not having proved beneficial, he decided to go to Phoenix. We sold out in Florida and started breeding ostriches on the Phoenix farm with 250 birds.

"My husband was becoming more feeble every day. I tried to do my duty, and as a result I learned all the ins and outs in breeding birds and selling feathers.

"Since my husband's death I have increased the Phoenix flock to 980 breeders and the acreage to 2,000, making it the largest breeding farm in America. On the Havana farm there are at present only 27 acres and 45 birds. It is only an experiment,

A FIND IN ANCIENT RHODES.

Rock Carved in Relief of a Greek Ship Discovered by Danish Explorers.

New York.—The Royal Academy of Sciences and Letters at Copenhagen is reaping a rich reward from the expedition it sent in 1902 to Lindos, a small town on the south coast of Rhodes, once a great island home of Greek culture in the Aegan sea. Since the Danes began to dig deep into its

Relief Carving of Ancient Greek Ship.

soil they have unearthed the larger part of its beautiful Acropolis, a fine temple and ancient stairway of remarkable workmanship and an enormous amount of statuettes, vases and other antiquities.

The Acropolis of Lindos was especially rich in the signatures of artists who had beautified it. Before the Danes began their work only 12 of these signatures had been found, but the Danish explorers have added 74 names of men, several of whom made reputations that still survive.

The most curious discovery of all is described and pictured in the last report of the society. While the party were excavating along the face of an ancient wall built some 200 years before the Christian era, they came to the edge of a carving in the rock.

They followed it eagerly for days before they knew certainly what it represented. Finally they brought the whole carving into view and it proved to be a representation in re-

and I do not think it wise to get more birds until after these have proved the healthfulness of the climate.

"While in Arizona and Florida we never lost a grown bird except through accident.

"Ostriches mate when they are about three and one-half years old, and, like pigeons, remain together, entirely faithful, until they die. At least I have been told that they mate for life, and so far as I know it is true, though, as I said before, I never knew one to die a natural death. In case of an accident I have known the widowed bird to accept a second mate, but not until after several years.

"They usually lay two nests of eggs of from 12 to 14 each, and you can count on getting an increase of from 10 to 25 chicks. I have often known a pair of good breeders in a good season to hatch every egg and raise every chick.

The ostrich is as senseless an animal as exists. So far as I am able to judge they are absolutely and entirely without brains.

"You can teach them nothing, and it makes no difference how long you feed them or how kind you are, they never even get to recognize you. They know their mate, and that is, I believe, as far as their power of recognition goes.

"While I have heard the men on the farm say they didn't have sense enough to follow a leader, I have noticed that if a bird in one pen began to run, pretty soon every bird on the farm was running—for no apparent reason, just running. When they are in full feather they make a pretty sight in running, as they hold out their wings, and so show the beautiful plumes underneath.

"They do take pride in their plumage. When they are first plucked they become very sulky and seem to wish to hide themselves. If a plucked bird is turned with the unplucked, they fall on him tooth and nail, and the poor fellow is made to suffer for his loss.

"Ostriches are plucked every eight months. I use the work plucked, though the feathers are seldom pulled. When ripe they are cut, and later when the old quills have become perfectly dry they are drawn from the sockets by means of a pair of tweezers. This is not the slightest bit painful to the birds, and there is no blood drawn.

"A healthy ostrich, and I never saw a grown bird that was not healthy, will yield from \$30 to \$50 worth of feathers a year. As year-old birds are now selling in Arizona for \$100 apiece for the South African breed, and \$50 more for Nubians, you can judge the yearly profits on a pair of good breeders."

Relief of the stern of an ancient Grecian vessel.

A plaster cast made from it is now in the museum at Copenhagen and experts who have seen either the original at Lindos or the cast at Copenhagen say that it is a faithful representation of an ancient ship. The relief is in no respect embellished for decorative effect, but is a reproduction, perhaps on a slightly smaller scale, of the stern of a Greek vessel of the Hellenic epoch.

Some of the coins of that time show reliefs of vessels and a considerable number of representations of ships have been discovered. The largest is now in the Palazzo Spada and the resemblance between it and the relief found at Lindos is very striking. The relief, however, has far more detail, and it was a splendidly executed piece of work.

On the side of the ship an inscription was cut into the stone showing that the relief was not meant merely as an ornament. It was hewn out of the rock to form the base of a statue in bronze in honor of Hagesandros. The statue has not been found, but the remains of an iron fence erected in front of the relief were unearthed.

Popularity of Poets.

This may be a utilitarian age, but the poets still have the call on popularity. Public school teachers see that abundantly demonstrated every time the birthday of a famous man is celebrated in the public schools. In case of a great naturalist, a scientist, an inventor, a patriot or a statesman the pupils take part in the exercises as requested, but they do it in a perfunctory manner which indicates that their hearts are not in the performance. But with the poets it is different. No need for urging them. The tributes of praise and affection are voluntary. More pupils than are wanted rush to the front with yards of poetry that they want to recite, and instead of wondering how on earth they can ever sustain enough interest to carry out an interesting programme, the teachers are driven to wondering how they can keep down the bubbling enthusiasm.

**JIM MCGUIRE TO HANDLE
BOSTON AMERICAN TEAM**

Old Highlander Successor to Bob Unglaub, Who Has Not Proven a Winner.

Jim McGuire, the famous old catcher of the New York Highlanders, is to manage the Boston American league team.

Bob Unglaub not having made a success as manager of Boston since he replaced George Huff, President John I. Taylor has been looking for Unglaub's successor for some time. Finally McGuire's experience of 25 years in baseball and his popularity and high standing as a player with both the public and players induced Taylor to enter into negotiations with Frank Farrell for McGuire's release and purchase.

Jim McGuire.

The old catcher will get a largely increased salary over what he received as a player, and, although he had not outlived his usefulness as an active player, he was becoming a bit too stale to do the work behind the bat called for by the fast game of the present. In fact, he has been utilized mostly this season as a coach for young pitchers, at which he has no superior.

McGuire parts with the Highlanders with regret, but he also appreciates the fact that there is a good field opened for him as a manager, a position he has long had ambition to fill.

It is said that McGuire will receive a salary of \$8,000. The New York club receives about \$3,000 for McGuire's release. McGuire has been in business as a professional ball player since 1882, when he joined the Toledo club.

LANGE HAD CODE OF ETIQUETTE

Good Yarn Is Told on Anson's Old Outfielder.

The mention of Bill Lange's name recently in connection with a San Francisco club calls to mind an incident which happened a few days after Bill had been playing in the Chicago outfield. Bill, who in those days was just fresh from the Pacific coast, was a big, bashful fellow, and with no indications of ever turning out to be the brash cut-up he afterward became.

Anson had him playing in center field, with Jimmy Canavan on third. It was noticed that whenever Lange got the ball he would invariably fire it to Canavan, no matter what the proper play was.

At last Anson, driven to desperation by Bill's peculiar actions, rushed out to him and excitedly shouted: "Hey, there, you big lobster! What d'ye mean by throwing that ball to Canavan all the time?"

"Why, Cap," politely replied Lange, "Mr. Canavan's the only gentleman I'm acquainted with on the team!"

It seems that the California code of politeness required introductions all around, and Bill didn't want to be accused of deficiency in etiquette.

AMONG THE MINORS

Toledo let out Gene Demont because he could not hit the ball.

York has released Outfielder Vinson, the player once with Cleveland and Chicago.

Disch, who failed to make good with Detroit, is playing center field for Marshalltown, in the Iowa State league.

Manager Arnold, of the Grand Rapids team, has refused to accept Groeschow's resignation as captain.

Outfielder Jimmy Hart has been appointed manager of the Sioux City team.

Famous Frank Selee has resigned as manager of the Pueblo club on account of ill health. The resignation went into effect on June 1.

Eddie Wheeler is keeping his Denver team above water. He has been able to win more than half his games and hang to third place.

Umpire Conahan was mobbed at Pueblo recently. On the way to his hotel he was hooted at and struck by several missiles without serious injury.

THE OUTLOOK

LOCAL MENTION

B. F. English spent last Sunday at Alamogordo and Cloudcroft.

N. S. Rose left Monday night for a business trip to Ancho, Corona and Santa Fe.

J. V. Tully, of Glencoe, was in town yesterday and made some purchases of real estate.

Quite a number of substantial buildings are in course of construction in our town these days.

F. W. Gurney spent a few days in town the first of the week, looking after business interests.

W. C. McDonald, wife and daughter went to Santa Fe Tuesday to attend the inauguration of Governor Curry.

Mrs. A. H. Harvey returned last night from Ocean Park, Cal. where she had been visiting for the past month.

Wm. Riley and wife were with the Lincoln county crowd at Santa Fe during the inauguration yesterday.

Mrs. Dora Kahler returned last Saturday from Cloudcroft, where she had been for a week on a visit to relatives.

Mr. Ben Horner, superintendent of the Vera Cruz mines, was a business visitor in our town the first of the week.

Hon. A. H. Hudspeth was a prominent figure in the Lincoln county delegation at the inauguration of Governor Curry.

The roof is now in place on the new residence of W. W. Arnold and the inside finishing is being pushed to completion.

Mr. J. M. Rice, president of the Eagle Mining and Improvement Co., of Parsons, transacted business in town last Tuesday.

B. J. Mustin arrived from El Paso Thursday. He has charge of the construction of the Bonito pipe line and says that work will be started at once.

Wm. Kennedy wishes to notify his patrons that he has moved his Ice Cream Parlor to the building formerly occupied by the New Market, next door to Barrett & Co's barber shop.

R. B. Rice, a civil engineer from Las Vegas, passed through our town Monday evening en route home from Orogrande, where he is employed as engineer for a mining company.

Dr. T. H. Williams, dentist, of Oklahoma, who has spent every summer here during the past six years, has opened an office over the Exchange bank for one week. Persons needing dental work will do well to call and see him.

George Spence and family, who have been living in Oklahoma the past few months, returned last Sunday, and will locate in Carrizozo. The partnership of Spence & Rose, lawyers, has been renewed with its office in the Outlook building, and all classes of legal business will be promptly attended to by them.

Subscribe for The Outlook.

Prof. S. G. Anderson was at the county seat for a few days this week.

Father Girma, of Lincoln, was a visitor in our town the first of the week.

A number of base ball enthusiasts accompanied the base ball team to Corona yesterday.

The house recently erected by Don Scipio Salazar is completed and will soon be ready for occupancy.

Lincoln county was well represented at the inauguration of Governor Curry in Santa Fe yesterday.

There will be Catholic services at the school house on Sunday, August 18th, at 9 a. m. All are cordially invited to attend.

BASE BALL AT CORONA

The Carrizo base ball team returned this morning from Corona where they crossed bats with the Corona team. The Corona boys were easy marks, as is shown by the score which in the last half of the ninth inning stood 23 to 0 in favor of Carrizozo. We have one of the best base ball teams in this part of the country, and when it comes to playing the national game "we are there with the goods." The boys enjoyed the trip and all report a fine time.

LONG & LONG

It's a long story to tell of all the good things in store for those who trade with the new City Meat Market under the management of the new proprietors, Messrs. Long & Long.

These gentlemen have purchased the market formerly owned by Charles Hinton, and remodelled it in such a manner as to make a first class meat and vegetable market. The entire inside of the building has been renovated and arranged for convenience and elegance. It is the intention of the new proprietors to keep the best to be had in both meats and vegetables and to meet the requirements of their patrons in every possible manner.

QUARTERLY CONFERENCE

The fourth quarterly conference of the M. E. church south was held August 3, in this town, and the following officers were elected: J. N. White, Sunday school superintendent; board of stewards, W. W. Arnold, H. B. Tompkins, C. C. Bourne, Joe N. White, W. E. Winfield; trustees, Joe N. White, C. C. Bourne, H. B. Tompkins; buildings, W. W. Arnold chair man, Joe N. White secretary, C. C. Bourne, treasurer, H. B. Tompkins and W. E. Winfield. Special music for next Sunday evening. Everybody invited.

ESTRAY

One dun pony, flat mane and tail, about 13 1/2 hands high, broke to ride, about 12 years old, branded C right shoulder, Indian brand bow and arrow barred out left shoulder, H M B connected with bar below on left thigh. Can be had by calling at my ranch ten miles south of Estey, Socorro county, and paying costs A. S. MAYES.
